U.S. Department of Justice Bureau of Justice Statistics

Buren of Justice Skitistics Bull ethn

Justice Expenditure and Employment, 1983

Federal, State, and local governments in the United States spent nearly \$39.7 billion in fiscal year 1983 for civil and criminal justice, an increase of 10.7% over the previous fiscal year. During the same period, total government expenditures for all activities increased by 9.5% to \$1.35 trillion. Although spending for justice activities increased at a higher rate than spending for all government sarvices, the proportion of spending for criminal and civil justice remained the same for the two years, 2.9%. (Justice expenditure data for 1982 have been revised; see footnote 2.) The 2.9% in 1983 was distributed as follows:

- 1.5% for police protection,
- o 0.8% for corrections, and
- o 0.6% for judicial and legal services.

The 2.9% of spending for criminal and civil justice in 1983 compares with spending for other governmental services as follows:

Social insurance payments 22.0% National defense and international relations 16.9 13.1 Education Interest on debt 9.8 6.2 Public welfare Housing and the environment 5.4 4.2 Hospitals and health Transportation 3.4 2.9 Justice Space research .5 and technology

¹ Data for other governmental functions are from U.S. Bureau of the Census, <u>Governmental Finances in 1982-83</u>, table 1 as revised. "Social insurance payments" is "insurance trust expenditure" in the source; it includes Social Security, unemployment compensation, employee retirement, workers compensation, and a residual "other" category.

This bulletin marks the second time that BJS has reported on the portion of total government spending devoted to funding criminal and civil justice programs and services. In fiscal year 1983 Federal, State, and local government spending for justice activities remained less than 3% of all government spending.

Altogether, Federal, State, and local governments spent almost twice as much on housing and the environment as they spent for criminal and civil justice, more than three times as much for interest payments on public debt, four times as much on education, and almost six times as much on national defense.

For the first time this year, BJS is presenting data for individual States on the proportion of State and local government spending for criminal and civil justice. Overall, 6.2% of all State and local gov-

ernment spending was for justice activities in 1983: 3.2% for police protection, 1.7% for corrections, and 1.3% for judicial and legal services. Given the current national debate on the appropriate level of resources needed to deal with growing jail, prison, probation, and parole populations, it is interesting to note that total correctional costs consumed less than 2% of State and local spending in three-fourths of the States.

July 1986

I would like to express my gratitude to the thousands of State and local governments who participate in the BJS and the Census Bureau surveys. Without the data they provide, Federal, State, and local efforts to develop and implement sound crime control policies would be weakened.

Steven R. Schlesinger Director

The percent of spending for justice activities varies by level of government and reflects the fact that criminal justice is primarily a State and local responsibility. County governments devoted 14.2% of direct expenditures to justice activities; city and town governments, 10.5%; State governments, 5.0%; and the Federal Government, 0.6% (table 1).

Local governments made nearly three-fifths of the Nation's direct civil and criminal justice expenditures, or \$23.1 billion, followed by State governments with \$11.7 billion and the Federal Government with \$4.8 billion (table 2).

More than half—\$20.6 billion—of the Nation's total justice expenditure was for police protection, and just over a fourth, \$10.4 billion, was for corrections, including jails, prisons, probation, and parole. The combined activities of courts, prosecution and legal services, and public defense accounted for \$8.6 billion, or 21.7% of the total.

Within each category of justice ac-

tivity, the distribution of expenditure by level of government reflects the different responsibilities of each level. Police protection is primarily a local responsibility; accordingly, local governments spent 74% of the total police protection expenditure in the country in 1983 (table 3). Corrections is primarily a State responsibility, and the State governments accounted for 60.7% of the Nation's corrections expenditure. Overall, local police spending represented 38.5% of the Nation's total direct justice expenditure, and State corrections accounted for the second largest portion, 15.9%.

Combined, State and local governments spent 87.8% of the Nation's justice monies. Local governments alone spent 58.3% of the total. The Federal Government's 12.2% of justice spending ranged from 5.5% of total corrections expenditures to 17.7% of total judicial and legal expenditures.

Trends

From 1982 to 1983, the Nation's costs for justice activities grew by 10.7%. Federal justice spending increased 10.9%, slightly faster than at the State (10.2%) or local level (10.6%).

Corrections costs increased the most, 15.1%, compared with judicial and legal services (10.9%) and police (8.5%). The growth in corrections spending was seen at all levels of government, ranging from an increase of 12% at the Federal level to 14.2% at the State level and 17.8% at the local level. Corrections costs also outpaced law enforcement costs from 1980 to 1983-increasing by 50.9% compared to 36.2% for police. The 1980-83 rate of growth in corrections was about the same at each level of government-Federal (48.5%), State (51.1%), and local (55.8%). During this period police spending increases varied slightly more. ranging from 34% at the local level to 45% at the Federal level, with State police costs increasing 35%.

From 1982 to 1983, local judicial and legal services spending grew by 15.2%, Federal by 9.6%, and State by 7.3%. Judicial and legal cost data for 1980 are not available for all levels of government.

²Federal justice expenditures for 1982 have been revised as follows from that previously reported (in thousands of dollars): total—\$4,458,000; police—\$2,527,000; judicial and legal—\$1,390,000; and corrections—\$541,000. The U.S. totals have been revised accordingly: total—\$35,839,477; police—\$19,022,184; judicial and legal—\$7,770,785; and corrections—\$9,046,508.

Justice employment

In October 1983, the Nation's civil and criminal justice systems employed more than 1.3 million persons, with a total October payroll of \$2.3 billion (table 4).

Local governments accounted for more civil and criminal justice employment than the Federal and State governments combined. Of all the Nation's justice employees, 64.8% were engaged in local activities (table 5).

Reflecting the fact that law enforcement is essentially the responsibility of local governments, 80.7% of the Nation's police employees were working at the local level. State governments employed 10.6% of police protection workers; the Federal Government, 8.7%.

Local governments also dominate judicial and legal employment, though not as much. Local employees account for 56.6% of judicial and legal sector employment; State governments, 32%; and the Federal Government, 11.4%.

The distribution of corrections employees reflects State government dominance in that sector—61.9% of corrections employees worked for State governments, followed by 35% at the local level and 3.2% at the Federal.

Per capita spending

The Federal, State, and local governments combined spent \$170 per capita on civil and criminal justice activities in 1983. Of this, \$88 per capita was for police protection, \$44 was for corrections, and \$37 was for judicial and legal services, such as courts, prosecution, and public defense.

The \$170 per capita for justice activities compares with a total of \$5,772 per capita for all governmental functions. The per capita figures for various categories of governmental expenditure are as follows:

State comparisons

In nine States the combination of State and local direct expenditures in fiscal 1983 for civil and criminal justice activities exceeded one billion dollars (table 6). Across the Nation, State and local governments spent \$149 per capita on justice activities (table 7). This ranged from less than \$80 per capita in

West Virginia (\$68), Mississippi and Arkansas (each with \$76) to more than \$200 per capita in five States and the District of Columbia: Wyoming and California (each with \$203), New York (\$220), Nevada (\$278), Alaska (\$534), and the District of Columbia (\$552).

Full-time equivalent employment in State and local justice activities stood

at 1.1 million persons in October 1983 (table 8). This was equivalent to 47.8 persons per 10,000 population nationally (table 9). In proportion to its population, Delaware was the State with the most justice employees (68 per 10,000 population), followed by Nevada (67), New York and New Jersey (each with 66.7), and Alaska (64.5). (The District of Columbia had 134.4.) The States

L			

with the fewest were West Virginia with 30.2, Mississippi with 33.3, and Arkansas with 33.5.

Nationally, 6.2% of all State and local spending was devoted to civil and criminal justice. About half of this was for police (3.2%), followed by corrections (1.7%) and judicial activities (1.3%) (table 10). The proportion of

State and local spending directed to justice functions ranged from a low of 3.2% in West Virginia to a high of 9.9% in Nevada. (The District of Columbia allotted 10.7% of its total expenditure to justice activities.) In 41 States civil and criminal justice accounted for 4.0% to 7.0% of total direct expenditures. There was also substantial similarity in spending patterns for the specific jus-

tice functions: in 45 States police expenditures were 2.0% to 4.0% of all spending; in 36 States and the District of Columbia judicial costs were 1.0% to 2.0% of spending; and in 40 States corrections costs were 1.0% to 2.0% of all spending.

Definition of terms

This section provides brief definitions of the terms used in this report. More explicit definitions are contained in the full report, Justice Expenditure and Employment Extracts: 1982 and 1983.

Expenditure includes only external cash payments made from any source of monies, including any payments financed from borrowing, fund balances, intergovernmental revenue, and other current revenue. It excludes any intragovernmental transfers and noncash transactions, such as the provision of meals or housing of employees. It also excludes retirement of debt, investment in securities, extensions of loans, or agency transactions. Total expenditures for all government functions include interest payments on debt, but the justice expenditure data do not.

Expenditure is divided into two major categories:

o Direct expenditure is all expenditure except that classified as intergovernmental. It includes "direct current expenditure" (salaries, wages, fees and commissions, and purchases of supplies, materials, and contractual services) and "capital outlays" (construction and purchase of equipment, land and existing structures). Capital outlays are included for the year when the direct expenditure is made, regardless of how the funds are raised (for example, by bond issue) or when they are paid back. o Intergovernmental expenditure is the sum of payments from one government to another, including grants-in-aid, shared revenues, payments in lieu of taxes, and amounts for services performed by one government for another on a reimbursable or cost-sharing basis (for example, payments by one government to another for boarding prisoners).

Total expenditure data (sometimes called "all expenditures" in this report) for all levels of government combined, for local governments combined, and for State and local governments combined have been adjusted to remove duplicative transactions between governments. These occur when one government makes a payment to another government (intergovernmental expenditure) and the recipient government spends the money (direct expenditure). As an example, if a city government pays a county government for police protection, the amount of money is an intergovernmental expenditure for the city government and a direct expenditure for the county when it spends the money for police salaries and other expenses. If these two amounts are added together for the

total local police protection expenditure figure, they would be counted twice. thereby inflating the amount of money actually spent. For this reason, the total is adjusted to include such amounts only once. The Federal expenditure data and total State government expenditure data are not affected by duplicative intergovernmental transactions.

Employees are all persons on government payrolls during the pay period including October 12, 1983. They include all paid officials and persons on paid leave, but exclude unpaid officials, persons on unpaid leave, pensioners, and contractors.

Full-time employees are all persons employed on a full-time basis, including all full-time temporary or seasonal workers who were employed during this pay period.

Full-time equivalent employment is a statistical measure that estimates the number of employees that would be on the payrolls if the total hours worked by part-time workers were actually worked by full-time workers. It is calculated by dividing the total payroll (full-time plus part-time) by the full-time payroll and multiplying the result by the number of full-time employees.

Payroll is the gross payroll before deductions and includes salaries, wages, fees, and commissions paid to employees as defined above for the month of October 1983.

Police protection is the function of enforcing the law, preserving order, and apprehending those who violate the law, whether these activities are performed by a police department or a sheriff's department. Private security police are outside the scope of the survey.

Judicial and legal services include all civil and criminal courts and activities associated with courts; the civil and criminal justice activities of the attorneys general, district attorneys, State's attorneys, and their variously named equivalents; corporation counsels, solicitors, and legal departments with various names; and legal counsel and representation in either criminal or civil proceedings as provided by public defenders and other government programs that pay the fees of courtappointed counsel.

Corrections involves the confinement and rehabilitation of adults and juveniles convicted of offenses against the law and the confinement of persons suspected of a crime awaiting trial or adjudication. It includes costs and employment for jails, prisons, probation, parole, pardon and correctional administration. Data for institutions with authority to hold prisoners beyond arraignment (usually 48 hours or more) are included in this sector. Data for lockups or "tanks" holding prisoners less than 48 hours are included in "police protection."

Methodology and limitations

The data in this report were compiled by the U.S. Bureau of the Census for the Bureau of Justice Statistics using existing available sources and data from the Census Bureau's 1983 sample surveys of government finance and employment. The data in this report are preliminary and subject to change.

The justice data in this report include the expenditures and employment of the Federal Government, the State governments, and a sample of county, municipal, and township governments. Unless otherwise noted, data for total governmental functions and non-justice governmental functions also include the expenditures of special districts and school districts, which generally do not have justice functions. Justice expenditure data for these districts are not collected, although in 1978 (the most recent year for which such data are available) 0.6% of justice expenditure was made by such districts. The special district and school district data are included in the total government spending data to permit meaningful comparisons between States because of their varying use of school districts to finance education.

A more detailed description of the survey methodology (including sample design and sampling errors) can be found in Census Bureau publications and in the forthcoming BJS final report for 1982 and 1983 expenditure and employment data, both cited in the "Further reading" section of this report. Data in the BJS report will be presented in greater geographical, functional, and financial detail.

It is important to note that long-term trend comparisons between the data in this report and the data in reports for 1971 through 1979 are complicated by changes in methodology in the justice expenditure and employment series. These changes are described in the BJS Bulletin, Justice Expenditure and Employment, 1982, "Methodology and limitations," p. 5.

Further reading

To obtain other BJS justice expenditure and employment reports or to be added to the bulletin and/or expenditure and employment mailing lists, write to the National Criminal Justice Reference Service (301/251-5500 or toll-free 800-732-3277), User Services Dept. 2, Box 6000, Rockville, Md. 20850. Bureau of Justice Statistics
Bulletins are prepared principally
by the staff of BJS. This bulletin
was written by Sue A. Lindgren.
Joseph M. Bessette and Benjamin
H. Renshaw III, BJS deputy
directors, edited this bulletin.
Marilyn Marbrook, publications
unit chief, administered bulletin
production, assisted by Millie J.
Baldea, Joyce M. Stanford, and
June I. Maynard. John Curry of
the U.S. Bureau of the Census
provided data tabulations and
technical advice.

July 1986, NCJ-101776
