A REVIEW OF
UNIFORM CRIME REPORTS

ACQUISITIONS

HAWAII CRIMINAL JUSTICE DATA CENTER

JUNE 1987

FOREWORD

Crime is one of the foremost items of concern to all citizens of Hawaii. Because crime and the fear of crime affects everyone, there exists a need for timely, accurate and reliable reporting on the number and nature of crime. The State of Hawaii Uniform Crime Reporting (UCR) Program was established in response to this need.

The Hawaii Criminal Justice Data Center of the Department of the Attorney General currently compiles, analyzes and publishes UCR data. The data obtained through the UCR Program is a set of uniformly defined crime statistics that make possible yearly, inter-agency and national comparisons. Such information on crime in the state and counties of Hawaii help criminal justice agencies in making administrative and operational decisions. It also serves to inform the public on the extent and nature of criminal activity in Hawaii.

Crime in Hawaii 1986, A Review of Uniform Crime Reports, presents UCR data for the calendar year 1986. It shows that reported Crime Index offenses have increased significantly over 1985 levels. This is the first increase since 1982.

The Hawaii Criminal Justice Data Center wishes to express its appreciation to Joseph Cravalho, Chief of Police, Maui Police Department; Calvin Fujita, Chief of Police, Kauai Police Department; Douglas G. Gibb, Chief of Police, Honolulu Police Department; Guy Paul, Chief of Police, Hawaii Police Department; and to their respective research staffs for providing the data reported herein; and to the Federal Bureau of Investigation which provided assistance and guidance in the collection of the Uniform Crime Reports. Their assistance is gratefully acknowledged.

INTRODUCTION

Background

The Uniform Crime Reports (UCR), are a long-standing source of information about law enforcement and crime. The UCR arose from a recognized need for a nationwide system of uniform crime statistics. The Federal Bureau of Investigation (FBI) was designated to serve as the national clearinghouse for data collected under the UCR Program.

The FBI receives information either directly from a local law enforcement agency or from a state-level UCR Program. Local agencies submitting data directly to the FBI receive support and guidance from the national program. State-level programs also receive support and act as intermediaries between the FBI and local agencies. State-level programs were developed to transfer the data collection responsibility from the FBI to a state agency. This helps to streamline operations at the national level.

Operational Criteria

The purpose of the state-level UCR Program is:

to establish, at the state level, the responsibility to collect and report uniform crime data in accordance with standards developed jointly by the FBI and the International Association of Chiefs of Police (IACP).

The conditions under which a State program is developed and by which it must operate are set by the FBI and is designed to ensure consistency and comparability of data collected by State programs. The conditions are as follows:

(1) The State program must conform to the national Uniform Crime Reports standards, definitions, and information required. This, of course, does not prohibit the State from collecting other statistical data beyond the national collection.

(2) The State agency must have a proven, effective, mandatory, statewide program and have instituted acceptable quality control procedures.

(3) Coverage within the State by a State agency must at least be equal to that attained by Uniform Crime Reports.

(4) The State agency must have adequate field staff assigned to assist local units in record practices and crime reporting procedures.

(5) The State agency must furnish to the FBI all of the detailed data regularly collected by the FBI in the form of duplicate returns, computer printouts, and/or magnetic tape.

(6) The State must have the proven capability (tested over a period of time) to supply all statistical data required to the FBI in time to meet national Uniform Crime Reports publication deadlines.

(7) The FBI will continue its internal procedures of verifying and reviewing individual agency reports for both completeness and quality.

(8) The FBI will continue to have direct contact with individual reporting units within the State where necessary in connection with crime reporting matters, but will coordinate such contacts with the State agency.

(9) Upon request, the FBI will continue its training programs within the State with respect to police records and crime reporting procedures. For mutual benefit these will be coordinated with the State agency.

(10) Should circumstances develop whereby the State agency cannot provide the data required by the national program, the FBI will reinstitute a direct collection of Uniform Crime Reports from police units within the State.

Information Requirements

The Uniform Crime Reporting Program has been traditionally oriented toward law enforcement statistics. The basic data elements required by the FBI, when supplemented by additional state oriented items, permit a variety of interesting statistical analyses.

Three categories of statistical reporting are utilized:

- 1) Reported Offenses
- 2) Arrest Patterns
- 3) Offense Characteristics

Reported Offenses

All offenses reported by the UCR program are offenses known to the police. Unreported crimes are difficult to measure and so are not taken into account. Because not all crimes come to the attention of the police, the IACP chose to obtain data on seven offenses. Their selection was based on the seriousness of the crime in terms of nature and/or volume, frequency of occurrence and likelihood of being reported. The seven offenses are collectively known as the Crime Index and serve as a gauge to measure the fluctuations in volume and rate of crime. The crimes selected are the violent crimes of murder and non-negligent manslaughter, forcible rape, robbery, and aggravated assault, and the property crimes of burglary, larceny-theft and motor vehicle theft. In 1979, arson was added by Congress as the eighth Crime Index offense.

The eight Crime Index offenses together with manslaughter by negligence, make up a group of crimes known as Part I offenses. Part II offenses are all other offenses not included in Part I. Information on Part I offenses include the number of crimes committed, the number cleared by arrest or by exceptional means and the number of persons arrested. Only arrest data are reported for Part II offenses.

Because there are differences in criminal codes throughout the nation, the UCR Program uses a standard set of definitions for each offense. Law enforcement agencies submit data in accordance with these definitions without regard for local statutes. This standardization allows the aggregation of state statistics into a national total.

Arrest Patterns

Statistical reports derived from arrest information are presented with other UCR exhibits because they are primarily of interest to law enforcement agencies.

Offense Characteristics

Detailed characteristics are collected for selected offenses. For example, victim age, sex and race are recorded for murder incidents. In addition, elements such as the relationship of the victim to the offender and type of weapon are also collected for murders. Robberies can be broken down by type of weapon, type of robbery and value of property stolen. Monetary losses resulting from other crime index offenses are also collected.

Recent Developments

In 1982, the U.S. Department of Justice, in conjunction with the FBI, awarded a contract to Abt Associates, Inc., to study the national UCR program. The study was designed as a three-phase effort: Phase I, a study of the original and current systems; Phase II, submission of recommendations for change of the existing system; and Phase III, implementation of the approved changes.

Phase I was completed in the fall of 1984. Phase II was completed in 1985 with the release of a report entitled, "Blueprint for the Future of the Uniform Crime Reporting Program." In the report, Abt Associates made three major recommendations:

- 1) Implementation of an incident-based or unit record reporting system,
- 2) Collection of data on two levels, one for large agencies and one for smaller agencies,
- 3) Implementation of structured quality assurance methods.

Phase III is currently in progress. A consultant was hired to develop new definitions for both Part I and Part II offenses in accordance with the blueprint report and to determine the data elements to be collected. In addition, a pilot program was initiated in South Carolina. This test program should begin producing data in the revised formats in 1987.

Hawaii UCR Program

The Hawaii Criminal Justice Data Center manages the Hawaii UCR program. The Data Center edits the UCR reports received from agencies contributing data, corrects errors, then forwards the reports to the FBI. The Data Center also provides technical assistance and training to the contributing agencies.

Prior to the Data Center's involvement in the program, the agencies submitted the reports directly to the FBI. With the Data Center's involvement, the FBI has a single point of contact in the state. As such, the Data Center functions as an UCR clearinghouse. The Data Center helps the FBI in distributing program information and in answering possible problems with Hawaii data.

The Data Center is constantly attempting to improve the UCR program in order to provide more meaningful analysis of data. One of the changes made to the program involves the race element. The FBI uses only four race categories: White, Black, American Indian or Alaskan Native, and Asian or Pacific Islander. Recognizing the unique racial breakdown for Hawaii, the Hawaii program has expanded the categories to include: Chinese, Japanese, Filipino, Samoan, Korean, Hawaiian/Part Hawaiian, and Other.

As crime is one of the highest public concerns, timely and accurate information are necessary to assist criminal justice administrators and other public officials in assessing the problem. UCR data analyzed by the Data Center and published approximately every three months, help in this respect.

CRIME IN HAWAII 1986, General Notes

Arson

Although the property crime of arson is an Index offense, arson data are not included in the Crime Index totals in this publication. This allows comparisons to be made with previous annual reports without having to adjust for arson. Arson is included in the "modified" Crime Index.

Aggravated Assaults

Aggravated assault is probably the most difficult offense to classify. Because the definition is open to interpretation, large variations may be present between agencies depending upon how the definition was interpreted. There may even be variation between years. Caution should be used when analyzing aggravated assault trends.

Percent Change Trend Graphs

The percent change graphs in this publication present the percentage change for the years 1983 to 1986, each compared against the base year, 1982.

Population and Other Estimates

The 1986 resident population figures used in this report were provided by the FBI. The state total is the U.S. Bureau of the Census' (BOC) provisional estimate as of July 1, 1986. The population for the counties was obtained by using the state provisional estimate and the 1984 BOC estimates for counties. The rate of growth for the state was applied uniformly to each county in the state.

De facto population figures were taken from the State Department of Planning and Economic Development's (DPED) State of Hawaii Data Book 1986. Information on households, motor vehicles and bicycles was also obtained from the Data Book (Tables 38, 498, and 517 respectively.)

Population data broken down by race and age in Tables 10 and 11 were taken from the Data Book and are based on the BOC's 1980 census of population. Female population was estimated as 49 percent of the resident population.

Limitations

The current program does not collect data on incidents or victim characteristics nor does it differentiate between military, visitor, or resident victims or offenders. This data would be pertinent to any analysis of crime in Hawaii. An incident-based system like the one recommended in the study of the national UCR program is a possible solution. An automated incident-based reporting system with direct data entry by agencies would lend itself to more detailed analysis. Such a system may better satisfy Hawaii's need for crime information and still meet FBI requirements.

HAWAII CRIME SUMMARY

CRIME INDEX OFFENSES

The number of Crime Index offenses reported in 1986, excluding arson, was 60,230. This is a 9.9 percent increase from the 1985 total of 54,814. Increases were noted in all categories, the greatest of which were 20.1 percent in aggravated assault and 18.6 percent in murder and nonnegligent manslaughter. (It must be remembered, however, that small actual differences are often translated into large percentage differences when the numbers used are small.)

LARGEST CATEGORY OF CRIME INDEX OFFENSES

Larceny-theft was the largest category of Crime Index offenses (66.3 percent). In 1986, a total of 39,922 larceny-thefts was reported to the police, a 6.9 percent increase from 1985.

VIOLENT CRIMES

Violent crimes totaled 2,604 in 1986, a 12.6 percent increase over the 1985 total of 2,313. The numbers of murders, rapes, robberies, and aggravated assaults increased by 18.6 percent, 6.1 percent, 7.7 percent, and 20.1 percent, respectively.

PROPERTY CRIMES

There were 57,626 crimes involving property, an increase of 9.8 percent over 1985. Of the property crimes, larceny-theft comprised 69.3 percent with burglary and motor vehicle theft accounting for 24.7 percent and 6.0 percent, respectively.

Seventy-two percent of all reported burglaries were residential, of which 59.9 percent were committed during the day. Non-residential burglaries committed during the day comprised 40.4 percent of all non-residential burglaries.

MODIFIED CRIME INDEX TOTAL

Modifying the above Crime Index total, 60,230, to include arson results in an increase of 9.7 percent over 1985. Modifying the property crime number in this way results in an increase of 9.5 percent. (Arson itself decreased by 12.9 percent over 1985.)

VALUE OF PROPERTY STOLEN

The total value of property stolen in Hawaii in 1986 was \$39,727,867, an increase of 15.2 percent from the 1985 figure of \$34,491,119. The police departments were successful in recovering 24.6 percent of the loss, or \$9,788,488, a decrease from the 28.1 percent recovery rate in 1985.

TOTAL ARRESTS REPORTED

There were 50,270 arrests for non-traffic offenses in 1986. Juvenile arrests accounted for 29.1 percent of all arrestees. In comparison, 27.0 percent of the arrestees in 1985 were juveniles.

ARRESTS REPORTED FOR CRIME INDEX

In 1986, there were 11,370 arrests made for Crime Index offenses, accounting for 22.6 percent of all arrests.

NARCOTIC DRUG ARRESTS

There were 4,409 arrests for drug violations reported in 1986 as compared with 5,132 in 1985. The majority of these arrests (72.1 percent) were for possession of marijuana. Of the drug arrests, 17.6 percent involved juveniles.

GAMBLING ARRESTS

Of 572 arrests made for gambling in 1986, 10.5 percent involved juveniles. In comparison, 12.6 percent of those arrested for gambling in 1985 were juveniles.

CRIME INDEX OFFENSES

Reported Crime Index offenses increased by 9.9 percent from 54,814 reported in 1985 to 60,230 in 1986. Violent crimes rose by 12.6 percent from 2,313 reported in 1985 to 2,604 reported in 1986, where an increase was reflected in all categories of violent crime.

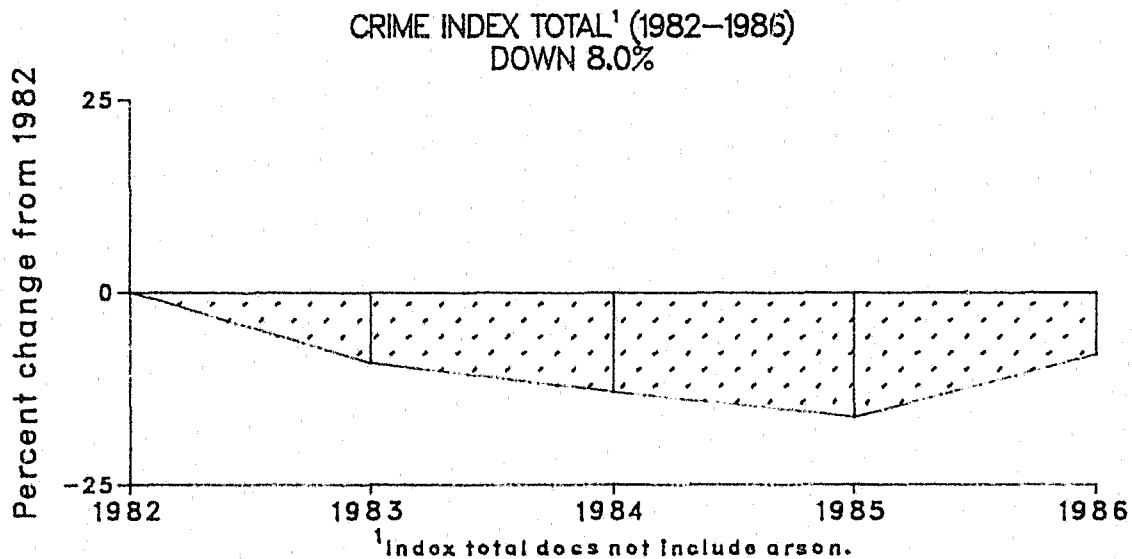

Property crime rose by 9.8 percent, where an increase was reflected in all categories of property crime.

The rate per 100,000 population for Crime Index offenses in 1986 was 5,671.4, a 9.1 percent increase from the 1985 rate of 5,200.6. Maui had the highest rate, 7,088.3 per 100,000, and Hawaii County had the lowest rate, 4,907.2 per 100,000. The rates for Honolulu and for Kauai were 5,642.5 and 5,373.3, respectively.

The national rate for 1985 was 5,206.5 per 100,000 and for Western States, 6,405.1 per 100,000. (The Western States are Arizona, Colorado, Idaho, Montana, Nevada, New Mexico, Utah, Wyoming, Alaska, California, Oregon, Washington, and Hawaii.)

Modified Crime Index Offenses Total

When arson was included with the other Crime Index offenses, the 1986 Crime Index total increased by 9.7 percent although the number of arson offenses had decreased. Including arson changes the total very little because arson accounts for only 0.8 percent of all Crime Index offenses.

Adjusted Crime Rate

The rates per 100,000 presented in this publication are based on resident population figures. This allows comparisons to be made with previous reports and with data from other states and the nation.

Since Hawaii has a large visitor population on any given day, an adjusted crime rate has also been calculated to account for that group. The table below presents both the unadjusted crime rate (based on resident population), and the adjusted crime rate (based on de facto population), excluding arson.

CRIME RATES: UNADJUSTED AND ADJUSTED STATE OF HAWAII 1986

	Unadjusted	Adjusted
Population base as of July 1, 1986	1,062,000 ^a	1,177,000 ^b
Murder	4.8	4.3
Forcible rape	31.0	28.0
Robbery	106.3	95.9
Aggravated assault	103.1	93.0
Burglary	1,338.8	1,208.0
Larceny-theft	3,759.1	3,391.8
Motor Vehicle Theft	328.2	296.2
TOTAL	5,671.4	5,117.2

^a FBI estimates based on information from the Bureau of the Census.

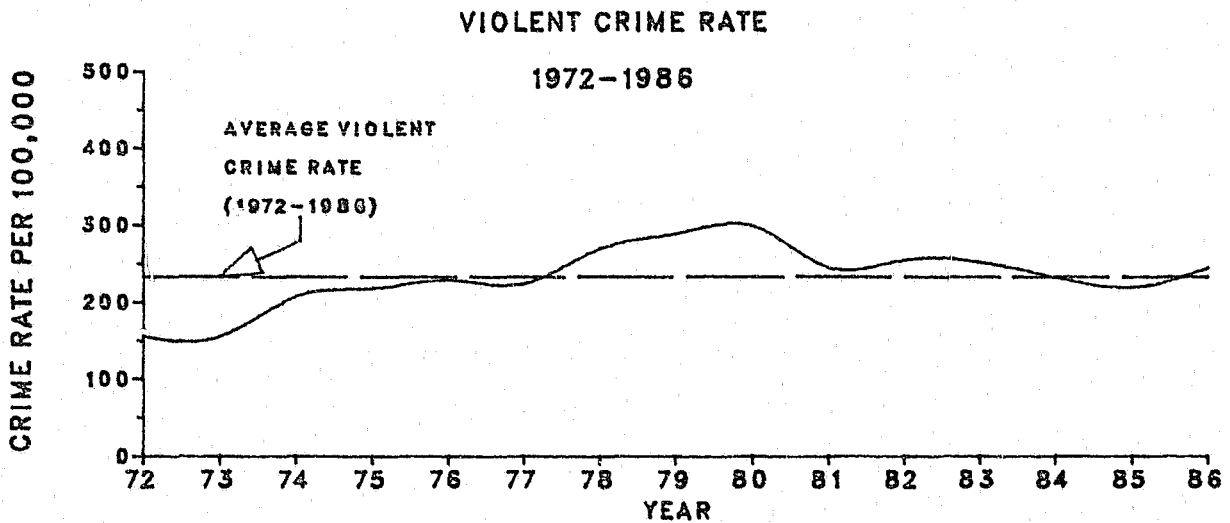

^b Estimates based on provisional data for 1986 from the State of Hawaii, Department of Planning and Economic Development.

Crime Rate Trends, 1972-1986

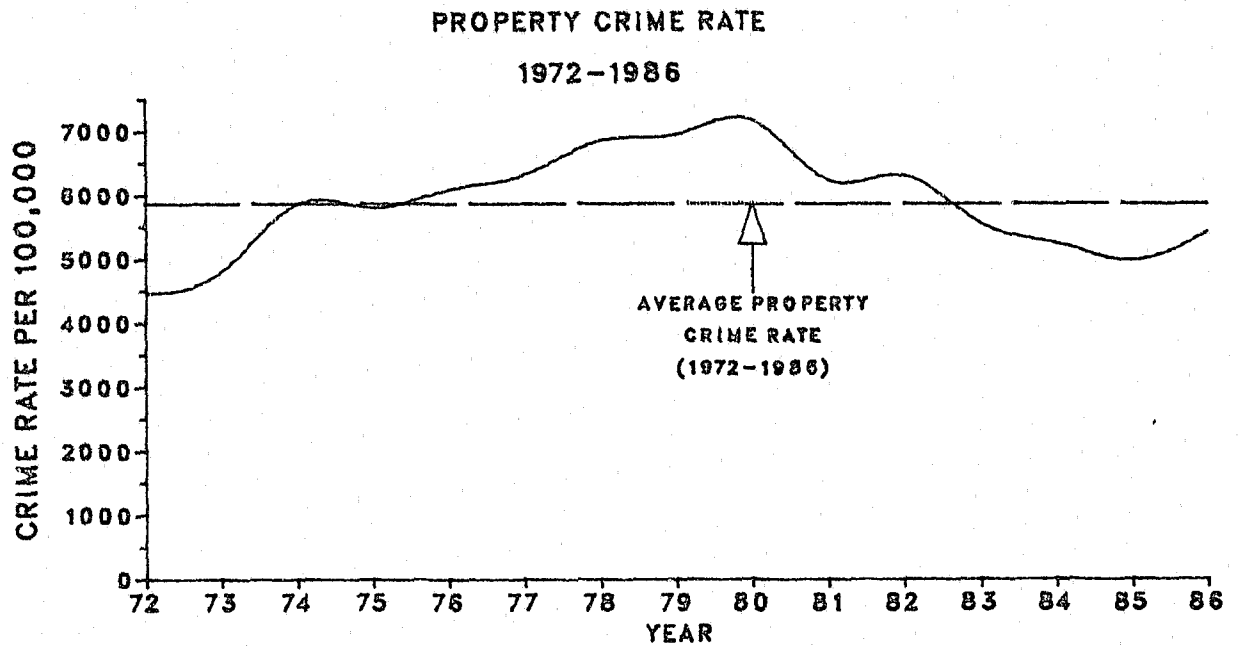

The crime rate for reported index offenses for the state has, in general, increased from 1972 to 1980 and decreased from 1980 to 1986. Although the rate in 1986 is higher than the rate in 1985, it is still well below the apex reached in 1980. The total crime rate in 1986 is lower than the 15-year average total crime rate.

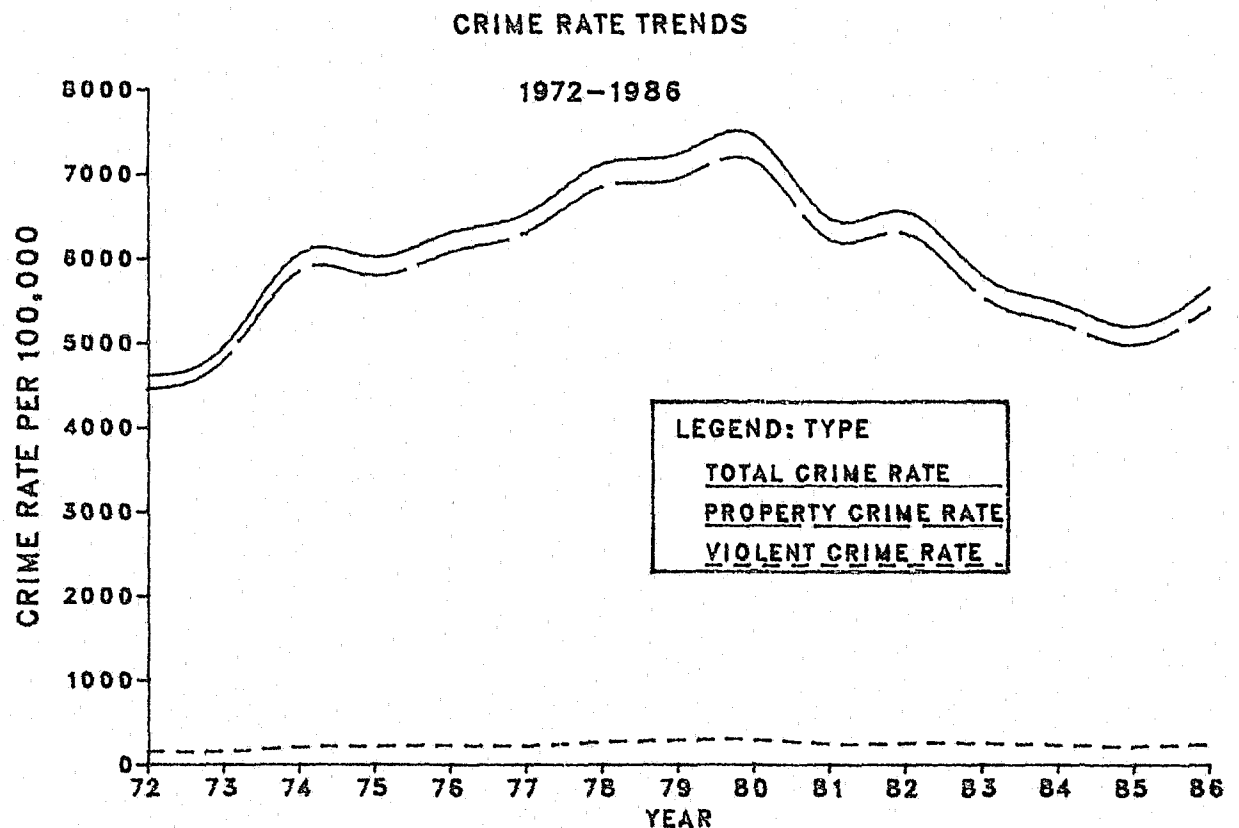

The violent crime rate trend follows the total crime rate trend. The violent crime rate in 1986, however, is slightly higher than the 15-year average violent crime rate.

The property crime rate trend resembles the total crime rate trend, as property crimes comprise approximately 95.7 percent of all crime index offenses. The property crime rate is lower than the 15-year average property crime rate.

When the total crime rate, violent crime rate and property crime rate are superimposed on the same graph, the influence of property crimes on total crime index offenses is clearly seen.

MURDER AND NONNEGLIGENT MANSLAUGHTER

Definition

Murder and nonnegligent manslaughter, as defined in the Uniform Crime Reporting (UCR) Program, is the willful (nonnegligent) killing of one human being by another.

The classification of this offense, as for all other Crime Index offenses, is based solely on police investigation as opposed to the determination of a court, medical examiner, coroner, jury, or other judicial body. Not included in the count for this offense classification are deaths caused by negligence, suicide, or accident; justifiable homicides; and attempts to murder or assaults to murder, which are scored as aggravated assaults.

Trends

Year	Number of Offenses	Rate Per 100,000 Population
1985	43	4.1
1986	51	4.8
Percent Change	18.6	17.1

The number of homicides known to law enforcement agencies in Hawaii increased by 18.6 percent from 43 in 1985 to 51 in 1986. The average for the five-year period 1982 to 1986 is 43.2 homicides per year.

Forty-six of the homicides occurred in the City and County of Honolulu. (There was one justifiable homicide in Honolulu which is excluded from the figures presented.) Kauai County, which reported 2 homicides in 1985, reported 1 in 1986. Maui County and Hawaii County each reported 2 homicides.

The graph below shows the percent change in the number of homicides for years 1983 through 1986 compared to the base year, 1982. The 1984 decrease in level appears to be reversing itself. All the years used in the comparison are at levels above that of the base year, however, with the highest level reached in 1983.

Risk

The overall risk of being murdered is very low, approximately 5 in 100,000. Certain characteristics, however, may increase that risk.

Fifty-nine percent of the victims were males. The average age of the victims was 34.3 years, where the eldest victim was 86.

In 1985, the rate for both the nation and Western States was 8 per 100,000. The average age of victims in the U.S. under 75 (excluding unknowns) was 33.0 years. The greatest monthly proportion of homicides in the nation and in Hawaii in 1985 was reported in December. The greatest proportion in Hawaii in 1986 was reported in April.

The table below shows percentages of murders by month. Please note that the percentages may not add up to 100, due to rounding. This pertains to all tables of this type.

MURDERS BY MONTH (Percent of annual total)

Month	Hawaii 1986	Hawaii 1985	U.S. 1985
January	7.8	4.7	8.1
February	2.0	11.6	7.9
March	5.9	9.3	8.1
April	15.7	4.7	7.6
May	7.8	7.0	7.6
June	9.8	7.0	8.2
July	3.9	2.3	9.3
August	5.9	9.3	9.1
September	11.8	4.7	8.1
October	5.9	4.7	8.4
November	9.8	14.0	8.2
December	13.7	20.9	9.4

The percentage of victims killed by a firearm was 29.4 percent. Almost half of the victims (43.1 percent) knew their assailants. The assailant was a relative in 11.7 percent and a friend or an acquaintance in 31.4 percent of these cases.

Arrests

Arrest figures presented here may include arrests for offenses committed in previous years. This also applies to all other arrest data presented in this report.

Forty-six arrests were made for murder in 1986 as compared to 39 in 1985. This is an increase of 17.9 percent.

In 1986, nine juveniles were arrested for murder. The adult age group with the greatest number of arrests (7) was the 25 to 29 year group. Most of the arrestees were male; only one was female.

**MURDER VICTIM CHARACTERISTICS
DISTRIBUTION OF VICTIMS BY RACE
1986**

**MURDER VICTIM CHARACTERISTICS
RELATIONSHIP OF VICTIM TO OFFENDER
1986**

MURDER VICTIM CHARACTERISTICS DISTRIBUTION OF VICTIMS BY AGE 1986

MURDER TYPE OF WEAPON USED 1986

FORCIBLE RAPE

Definition

Forcible rape, as defined in the UCR Program, is the carnal knowledge of a female forcibly and against her will. Assaults or attempts to commit rape by force or threat of force are also included; however, statutory rape (without force) and other sex offenses are not included in this category.

Trends

Year	Number of Offenses	Rate Per 100,000 Population
1985	310	29.4
1986	329	31.0
Percent Change	6.1	5.4

The number of rapes reported to law enforcement agencies increased by 6.1 percent from 310 reported in 1985 to 329 reported in 1986.

Rapes decreased in the City and County of Honolulu from 248 in 1985 to 241 in 1986. Increases were noted in the rates of the other counties, however. Reported rape increased from 25 in 1985 to 29 in 1986 in Maui County, from 11 to 19 in Kauai County, and from 26 to 40 in Hawaii County.

The graph that follows shows the percent change in the number of reported offenses for years 1983 through 1986 compared to 1982 (the base year). All the years included in the comparison are at levels lower than that of the base year. The level in 1986, however, is closest to that in 1982. Over the five-year period 1982 to 1986, reported rapes decreased by 3.8 percent.

Risk

Since under the UCR definition of rape, only women can be victims, reported rapes per 100,000 females is a better indicator of risk. In 1986, the rate was 63.2 rapes per 100,000 females. This is a 5.3 percent increase from the previous year's rate of 60.0 per 100,000 females. In 1985, the national rate per 100,000 females was approximately 71 while, for the Western States, it was 85.

Of the 329 rapes reported, 267 or 81.2 percent were actual rapes and 62 or 18.8 percent were attempted.

In 1986, rapes occurred most frequently in January, April, and December. In 1985, rapes were most frequently reported in May, July and August. The table below shows the percentage of reports by month for Hawaii in 1985 and 1986, and for the nation in 1985.

RAPES BY MONTH (Percent of annual total)

Month	Hawaii 1986	Hawaii 1985	U.S. 1985
January	10.3	9.4	7.2
February	5.8	5.2	6.6
March	7.3	5.5	8.2
April	9.7	10.3	8.3
May	9.4	12.3	8.9
June	7.6	8.4	9.0
July	7.6	12.6	10.1
August	6.7	12.3	9.9
September	9.1	2.9	8.8
October	8.2	6.5	8.5
November	8.2	8.1	7.7
December	10.0	6.8	6.9

Arrests

The number of arrests for rape increased by 5.1 percent from 137 in 1985 to 144 in 1986.

Of the 144 arrested in 1986, 88.2 percent were adults, and all were males. Of all age categories, 20.8 percent were in the age group 25-29, 11.8 percent were 21 years old, and 11.8 percent were in the age group 30-34.

ROBBERY

Definition

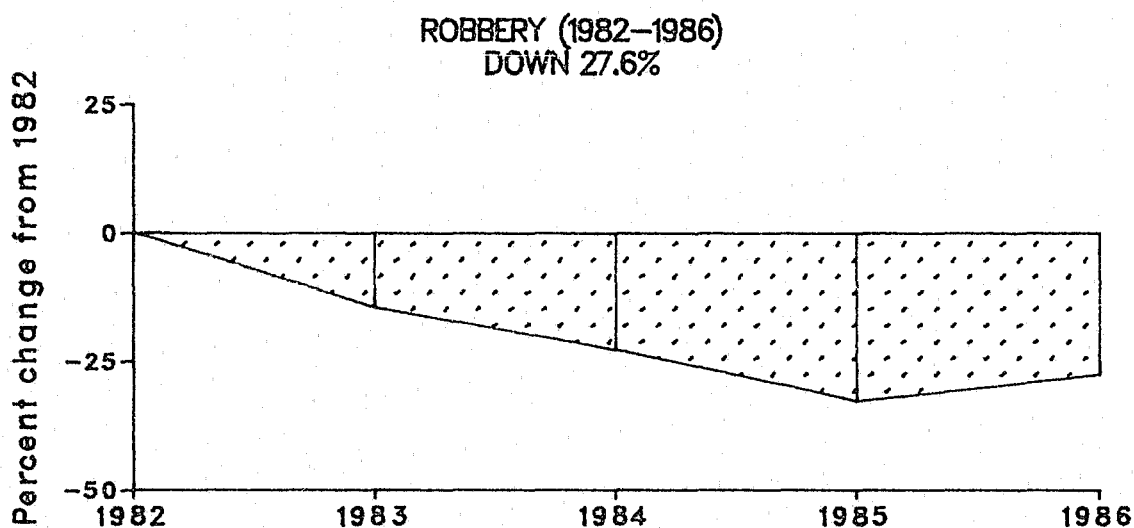

Robbery is the taking of, or attempt to take, anything of value from the care, custody, or control of a person or persons by force, by threat of force or violence, or by putting the victim in fear.

Trends

Year	Number of Offenses	Rate Per 100,000 Population
1985	1,048	99.4
1986	1,129	106.3
Percent Change	7.7	6.9

The number of reported robberies increased 7.7 percent from 1,048 reported in 1985 to 1,129 reported in 1986. All counties except Maui County demonstrated increases in reported robberies. The number rose by 9.0 percent in the City and County of Honolulu, by 11.1 percent in Kauai County, and by 19.4 percent in Hawaii County. In Maui County, the number decreased by 30.2 percent, from 43 reported robberies in 1985 to 30 in 1986.

The percent change in the number of reported robberies for the years 1983 through 1986 is compared to 1982 (the base year) in the graph below. The increase in robbery in 1986 interrupted a steady decrease begun in 1982. Over the five-year period of the comparison, there was a 27.6 percent decrease in robbery. Trend graphs are also presented for various types of robbery.

Risk

The overall robbery rate per 100,000 population in Hawaii increased 6.9 percent from 99.4 per 100,000 in 1985 to 106.3 per 100,000 in 1986. The national robbery rate in 1985 was 209 per 100,000, and for Western States, the rate was 237 per 100,000.

Increases were noted in the numbers of highway robberies (28.7 percent), convenience store robberies (20.9 percent), residential robberies (2.4 percent), and bank robberies (22.5 percent). There were decreases in the numbers of commercial house robberies (1.6 percent), service station robberies (6.7 percent), and miscellaneous robberies (7.6 percent).

The greatest proportions of robberies were reported in March and in June (10.5 percent each) in 1986, as compared to June in 1985. Nationally, in 1985, the greatest proportion of robberies was reported in December.

ROBBERIES BY MONTH (Percent of annual total)

Month	Hawaii 1986	Hawaii 1985	U.S. 1985
January	6.9	8.1	8.6
February	8.6	8.1	7.4
March	10.5	9.2	7.9
April	7.8	7.6	7.3
May	8.3	8.0	7.5
June	10.5	10.5	7.7
July	7.5	8.6	8.6
August	9.6	9.2	8.9
September	7.0	8.9	8.4
October	7.4	7.5	9.1
November	8.4	6.0	8.8
December	7.5	8.3	9.7

Arrests

There were 10.4 percent fewer arrests for robbery in 1986 than in 1985.

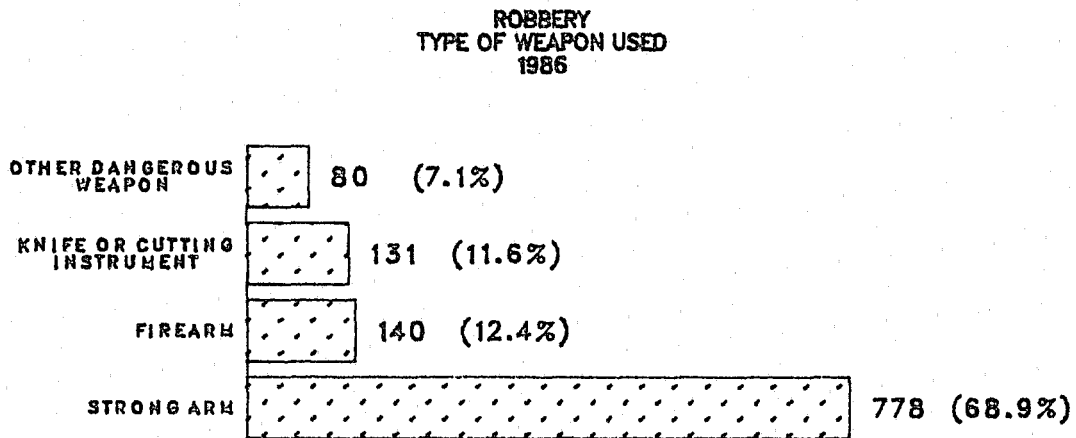

Of the 429 arrests in 1986, males accounted for 93.9 percent. The age group 25-29 accounted for 14.0 percent, and the age group 30-34 contained 10.5 percent. Nineteen-year-olds and eighteen-year-olds comprised 10.5 percent and 10.3 percent of the arrests, respectively. Juveniles were the subjects of 22.4 percent of all robbery arrests.

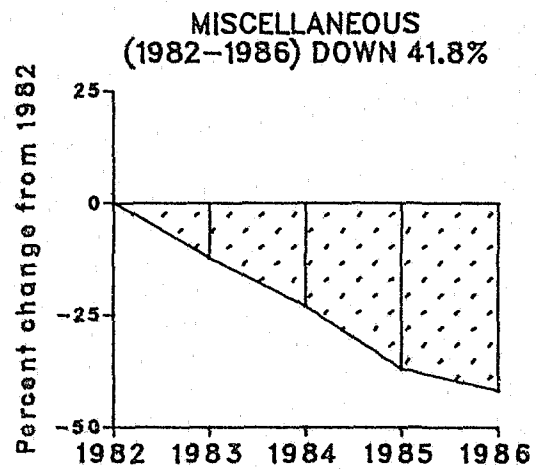

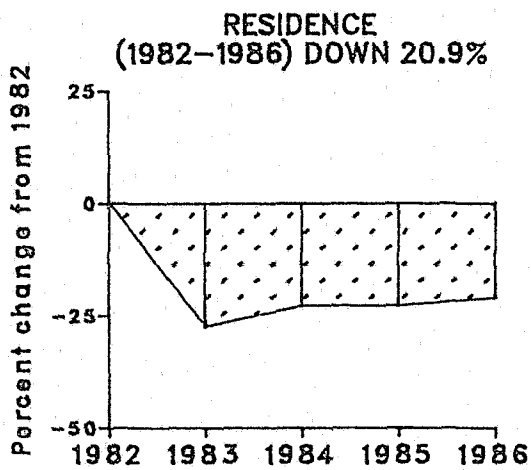

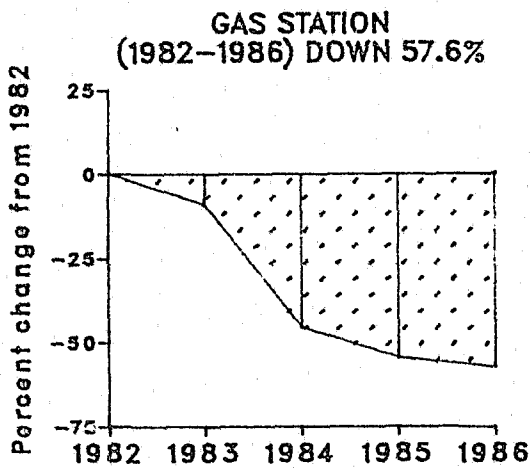

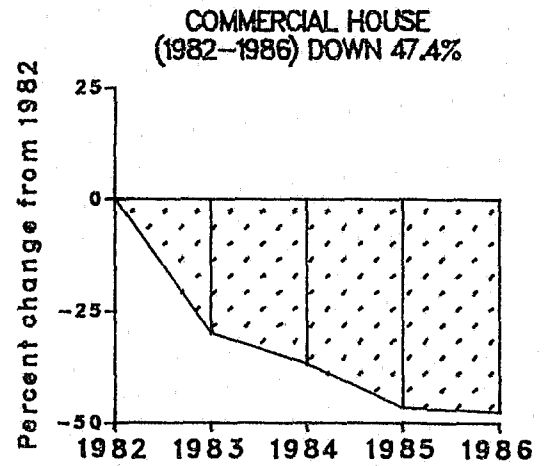

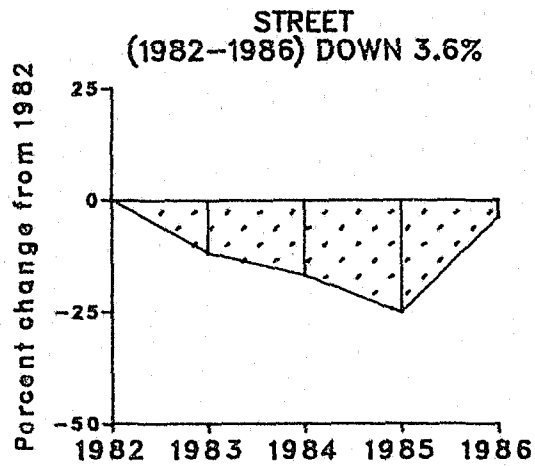

Value

The estimated dollar loss rose by 62.8 percent. In 1986, \$829,364 was taken. The average loss in 1986 was \$735 per robbery compared to \$486 per robbery in 1985.

The greatest dollar loss was noted in commercial house robbery. Although there were 2 fewer commercial house robberies in 1986, the dollar loss was 5.5 times the dollar loss noted in 1985. (See Table 7.)

Increases in dollar loss were also noted in highway robbery, service station robbery, convenience store robbery, residential robbery and miscellaneous robbery. The only decrease occurred in bank robbery, where the dollar loss in 1986 was half the dollar loss noted in 1985.

AGGRAVATED ASSAULT

Definition

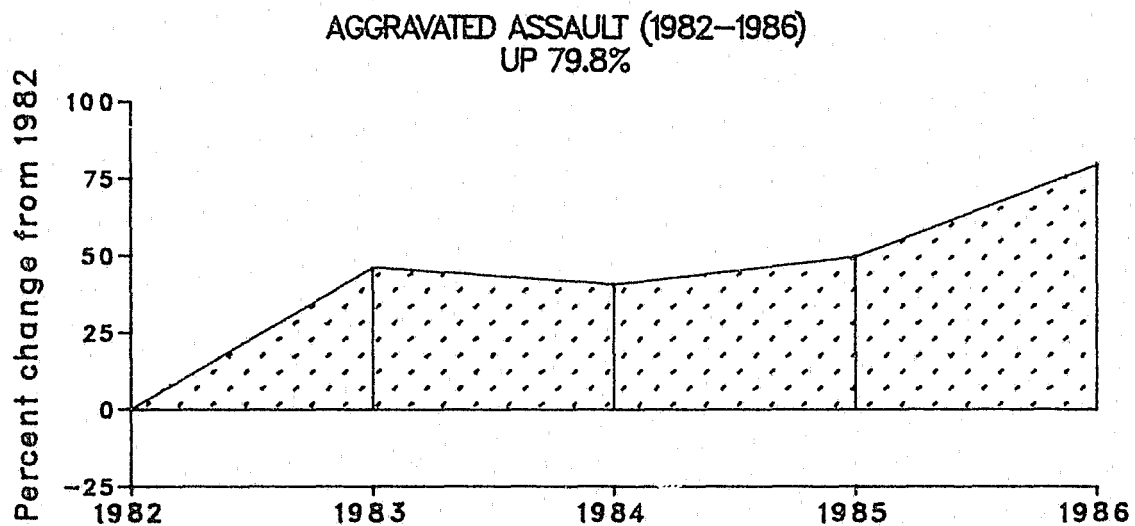

Aggravated assault is the unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault is usually accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Attempts are included since injury need not result when a gun, knife, or other weapon is used which could and probably would result in serious personal injury if the crime were successfully completed.

Trends

Year	Number of Offenses	Rate Per 100,000 Population
1985	912	86.5
1986	1,095	103.1
Percent Change	20.1	19.2

Aggravated assault offenses known to law enforcement agencies rose 20.1 percent from 912 assaults in 1985 to 1,095 assaults in 1986. Aggravated assaults increased by 33.5 percent in Honolulu, by 16.4 percent in Kauai County, and by 1.9 percent in Hawaii County. A decrease of 7.1 percent in aggravated assaults was noted in Maui County.

There has been a general increase in the numbers of reported aggravated assaults, as shown in the graph below, over the period of 1982 to 1986. The increase over this period has been by 79.8 percent.

Risk

The aggravated assault rate in Hawaii in 1986 was 103.1 per 100,000 population, an increase of 19.2 percent over the 1985 rate of 86.5 per 100,000. Maui County had the highest rate, 214.4 per 100,000, and Honolulu had the lowest rate, 89.5 per 100,000.

The national rate for aggravated assault in 1985 was 303 per 100,000, and the rate for the Western States was 340.8 per 100,000.

In 1986, firearms were used in 27.8 percent of aggravated assaults. Knives or other cutting instruments were used 28.2 percent of the time. However, a weapon other than a firearm or a knife was used 44.0 percent of the time. (Physical force is considered a weapon other than a firearm or a knife.)

The greatest proportions of aggravated assaults in 1986 were reported in March and November. In 1985, the greatest proportions were reported in June and December for Hawaii and in July and August for the nation.

AGGRAVATED ASSAULTS BY MONTH (Percent of annual total)

Month	Hawaii 1986	Hawaii 1985	U.S. 1985
January	8.6	6.1	7.0
February	6.8	7.5	6.8
March	9.5	9.5	8.2
April	9.0	8.6	8.2
May	8.1	8.1	8.8
June	8.7	10.5	9.0
July	8.4	9.3	9.5
August	8.6	9.5	9.5
September	6.6	5.6	8.9
October	7.4	6.2	8.8
November	9.7	8.6	7.9
December	8.7	10.4	7.4

Arrests

Arrests for aggravated assaults rose by 6.6 percent from 528 in 1985 to 563 in 1986. There were 16 more juvenile arrests in 1986 than in 1985, but adults still accounted for about 9 out of 10 arrests. The age group 25-29 accounted for 19.0 percent of arrests, and the age group 30-34 accounted for 16.0 percent of arrests for aggravated assault. Eleven percent of the arrestees were female.

1986**

BURGLARY

Definition

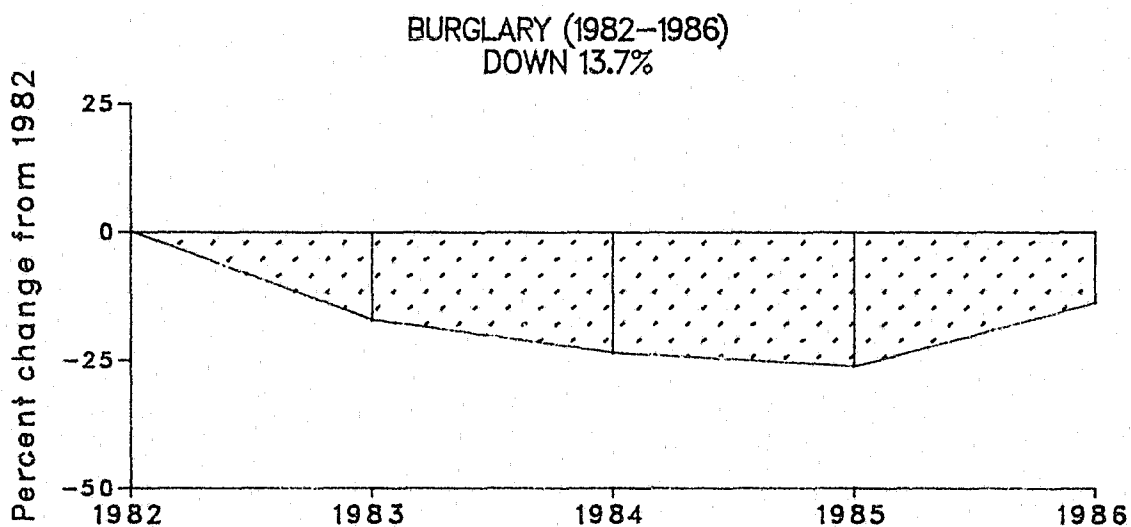

The Uniform Crime Reporting Program defines burglary as the unlawful entry of a structure to commit a felony or theft. The use of force to gain entry is not required to classify an offense as burglary. Burglary is categorized into three subclassifications: forcible entry, unlawful entry where no force is used, and attempted forcible entry.

Trends

Year	Number of Offenses	Rate Per 100,000 Population
1985	12,164	1,154.1
1986	14,218	1,338.8
Percent Change	16.9	16.0

Reported burglaries increased 16.9 percent from 12,164 in 1985 to 14,218 in 1986. An increase was reflected in all four counties. Burglaries rose by 18.8 percent in Honolulu, by 15.1 percent in Hawaii County, by 12.7 percent in Maui County, and by 1.5 percent in Kauai County.

The graph below shows the percent change in reported burglaries for each year compared to 1982. The increase in burglaries in 1986 interrupted a marked and steady decrease that stemmed from 1982. Over the period 1982 to 1986, burglaries decreased by 13.7 percent.

Risk

The burglary rate per 100,000 population increased by 16.0 percent from 1,154.1 in 1985 to 1,338.8 in 1986. The burglary rate was highest in Maui County, where the rate was 1,818.6 per 100,000 population. Hawaii County had the lowest rate, 1,294.1 per 100,000.

Nationally in 1985, the rate was 1,287 per 100,000, but for Western States, it was 1,654 per 100,000.

Of all burglaries, 71.9 percent were residential. Based on an estimate of 327,392 households, the chance of a household being burglarized is 3 in 100.

Most residential burglaries take place during the day while most nonresidential burglaries occur at night.

No force was involved in 18.8 percent of all burglaries. Attempts accounted for 9.1 percent.

In 1985, the greatest proportion of burglaries was reported in December in Hawaii and in August in the nation. In 1986, the greatest proportion of burglaries in Hawaii was reported in December.

BURGLARIES BY MONTH (Percent of annual total)

Month	Hawaii 1986	Hawaii 1985	U.S. 1985
January	8.7	8.1	8.2
February	7.9	7.6	7.2
March	9.0	7.9	8.2
April	8.5	7.6	7.8
May	8.3	8.6	8.0
June	7.5	8.5	7.9
July	7.7	8.9	9.0
August	8.4	8.4	9.1
September	7.7	7.3	8.5
October	8.1	8.1	9.0
November	8.9	8.8	8.5
December	9.3	10.3	8.8

Arrests

Arrests for burglary increased by 13.8 percent in 1986. The ratio of females to males arrested for burglary increased from 8.2 per 100 in 1985 to 8.9 per 100 in 1986. The majority of arrestees (91.8 percent) were male.

In 1986, the proportion of arrestees who were juveniles decreased from 51.7 percent to 50.1 percent.

Value

The dollar loss due to burglaries increased in 1986 by 17.4 percent. The average value per offense in 1986 was \$736. In 1985, the average was \$733.

BURGLARY BY TYPE OF ENTRY 1986

LARCENY-THEFT

Definition

Larceny-theft is the unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. It includes crimes such as shoplifting, pocket-picking, purse-snatching, thefts from motor vehicles, thefts of motor vehicle parts and accessories, bicycle thefts, etc., in which no use of force, violence, or fraud occurs. In the Uniform Crime Reporting Program, this crime category does not include embezzlement, "con" games, forgery, or worthless checks. Motor vehicle theft is also excluded from this category, as it is a separate Crime Index offense.

Trends

Year	Number of Offenses	Rate Per 100,000 Population
1985	37,357	3,544.3
1986	39,922	3,759.1
Percent Change	6.9	6.1

Reported larceny-thefts increased by 6.9 percent from 37,357 in 1985 to 39,922 in 1986. An increase was reflected in all four counties. Larceny-theft rose by 15.2 percent in Kauai County, by 9.4 percent in Maui County, by 7.0 percent in Honolulu, and by 0.1 percent in Hawaii County.

The number of larcenies from coin machines decreased by 47 percent, and the decreases in the values of dollar losses due to pocket-picking and to larceny from coin machines were 24 percent and 68 percent, respectively. The numbers of larcenies and the values of dollar losses in other categories showed increases.

The following graph shows the percentage change in total number of larceny-thefts for each year since 1982. The trend for reported larceny-theft is similar to that for burglary and robbery, where the increase in robberies in 1986 interrupted a steady decrease that began in 1982.

Risk

The larceny-theft rate per 100,000 population increased by 6.1 percent in 1986. Maui County had the highest rate of all the counties, a rate of 4,646.6 per 100,000. Hawaii County had the lowest rate, 3,236.2 per 100,000.

In 1985, the national rate was 2,901 per 100,000 and the Western States' rate was 3,597 per 100,000. Hawaii's 1985 rate, 3,544.3 per 100,000, exceeded the national rate by 22.2 percent but was surpassed by the rate for the Western States by 1.5 percent.

Based on 1985 registration data, the chances of having a bicycle stolen are about 3 in 100.

Using 1985 registration data, the chances of having something stolen from a passenger automobile are about 1 in 100.

The greatest proportion of larceny-thefts in Hawaii in 1986 was reported in July, August, and December (9.0 percent each). In 1985, the greatest proportion was reported in August, both in Hawaii and nationally, at 9.0 percent and 9.5 percent, respectively.

LARCENY-THEFT BY MONTH **(Percent of annual total)**

Month	Hawaii 1986	Hawaii 1985	U.S. 1985
January	8.2	8.1	7.4
February	7.8	7.6	7.0
March	8.8	8.8	8.2
April	7.9	8.2	8.1
May	7.7	8.6	8.4
June	8.4	8.2	8.5
July	9.0	8.5	9.3
August	9.0	9.0	9.5
September	7.8	7.8	8.4
October	8.1	8.1	8.9
November	8.4	8.2	8.2
December	9.0	8.7	8.1

Arrests

Arrests for larceny-thefts increased by 4.2 percent from 7,078 arrests in 1985 to 7,373 in 1986.

Most of the arrestees, 69.5 percent, were males, as compared to 68.3 percent in 1985. Consequently, the ratio of females to males decreased from 46.4 per 100 in 1985 to 44.0 per 100 in 1986.

The proportion of arrestees that were adults increased, from 55.7 percent in 1985 to 56.3 percent in 1986. The percentage of individuals 20 years of age or younger in 1986 was 55.5 percent.

Value

The average dollar loss due to larceny-theft increased by 8.5 percent in 1986. The average value in 1986 was \$436 while in 1985 it was \$402.

MOTOR VEHICLE THEFT

Definition

In Uniform Crime Reporting, motor vehicle theft is defined as the theft or attempted theft of a motor vehicle. This definition excludes the taking of a motor vehicle for temporary use by those persons having lawful access.

Trends

Year	Number of Offenses	Rate Per 100,000 Population
1985	2,980	282.7
1986	3,486	328.2
Percent Change	17.0	16.1

The number of reported motor vehicle thefts increased by 17.0 percent from 2,980 in 1985 to 3,486 in 1986. Motor vehicle theft rose by 63.4 percent in Kauai County, by 18.0 percent in Honolulu, by 9.7 percent in Hawaii County, and by 1.4 percent in Maui County.

The graph below shows that there was very little change in the number of reported motor vehicle thefts from 1982 to 1983. From 1983 to 1985, however, there was a sizable decrease, followed by an increase in 1986. Over the period 1982 to 1986, motor vehicle theft decreased by 16.6 percent.

Risk

Reported motor vehicle thefts per 100,000 population increased by 16.1 percent in 1986. Honolulu reported the highest rate per 100,000 population, 347.1, while Hawaii County reported the lowest, 207.7.

In 1985, the national rate per 100,000 was 462 and for the Western States, it was 524. Hawaii's 1985 rate of 282.7 was lower than both the national and the Western States' rates.

The chance of having an automobile stolen in Hawaii in 1986 was about 6 in 1,000 cars. This figure is based on 1985 registrations of passenger cars. In 1986, more motor vehicle thefts were reported in November than in any other month, as compared to March in 1985.

MOTOR VEHICLE THEFTS BY MONTH (Percent of annual total)

Month	Hawaii 1986	Hawaii 1985	U.S. 1985
January	7.9	6.8	7.8
February	7.8	8.7	7.1
March	7.2	11.9	8.1
April	6.7	8.3	7.8
May	6.7	9.1	8.0
June	9.5	7.4	8.2
July	10.0	8.3	8.9
August	8.7	8.4	9.1
September	7.5	7.2	8.7
October	9.7	7.6	9.1
November	10.3	6.7	8.6
December	7.9	9.5	8.7

Arrests

In 1986, 872 arrests were made for motor vehicle thefts, an increase of 6.9 percent from the 816 arrests made in 1985. Most of the arrestees, 85.6 percent, were male. The number of male arrestees increased by 4.6 percent, and the number of female arrestees increased by 22.3 percent.

Juveniles made up 57.7 percent of the arrestees where the number increased 45.0 percent from 1985. In general, people ages 20 or younger accounted for 75.0 percent of all arrests. In 1985, that group accounted for 66.1 percent.

MOTOR VEHICLE THEFT BY TYPE OF VEHICLE 1986

The pie chart above shows that automobile theft is the most common type of motor vehicle theft.

ARSON

Definition

Arson is defined by the UCR Program as any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

Only fires determined through investigation to have been willfully or maliciously set are classified as arson. Fires of suspicious or unknown origins are excluded.

Trends

Year	Number of Offenses	Rate Per 100,000 Population
1985	558	52.9
1986	486	45.8
Percent Change	-12.9	-13.4

Reported arson offenses decreased by 12.9 percent from 558 reported in 1985 to 486 reported in 1986. The number of arson offenses went down by 9.4 percent in Honolulu, by 31.0 percent in Maui County, by 9.1 percent in Kauai County, and by 13.9 percent in Hawaii County. (It should be noted that Kauai's decrease is due to 1 less arson offense reported in 1986 than in 1985.)

The graph below shows that data for 1983 to 1986 are at levels higher than that for 1982 (the base year). The decrease in reported arson offenses in 1986 interrupted the steady increase begun in 1982, returning reported arson to a level similar to that of 1983.

Risk

The arson rate per 100,000 population in Hawaii decreased by 13.4 percent from 52.9 in 1985 to 45.8 in 1986. The national arson rate was 50 per 100,000 in 1985; however, since the agencies reporting complete arson data covered only about 77 percent of the U.S. population, the rate does not represent the total U.S. arson experience.

In Hawaii in 1986, the greatest proportion of arson occurred in January as compared to August in 1985.

Arrests

Arrests for arson decreased by 4.7 percent from 43 arrests in 1985 to 41 in 1986. Of the arrestees, 29.3 percent were juveniles. Most of the arrestees, 73.2 percent, were male.

CRIME CLOCK 1986

NOTE: The Crime Clocks should be viewed with care. Being the most aggregate representation of UCR data, it is designed to convey the annual reported crime experience by showing the relative frequency of occurrence of the Index Offenses. This display should not be taken to imply a regularity in the commission of offenses, rather, it represents the annual ratio of crime to fixed time intervals.

State Ranking by Crime Rates 1985

State	Population	Rank	<u>Total Crime Index</u>		<u>Violent Crime</u>		<u>Property Crime</u>

Includes District of Columbia.

Rates are per 100,000 resident population.

CLEARANCES

Crime Index offenses are cleared by either arrest or exceptional means. An offense is cleared by arrest if at least one person is arrested, charged and turned over to the court for prosecution. It should be noted that the number of offenses and not the number of persons arrested is used to count clearances. Several offenses may be cleared by the arrest of one person, or the arrest of several people may clear only one crime.

In order for an offense to be cleared by exceptional means, the law enforcement agency must:

- 1) know who the offender is and
- 2) know where the offender can be located but, by some means outside the control of the agency, cannot arrest him.

For example, offenses cleared by exceptional means include cases where the offender dies and when extradition is denied. A complete list is given in the UNIFORM CRIME REPORTING HANDBOOK.

CLEARANCES , 1986 (Arson not included)

Category	Number of Offenses	Number of Clearances	Percentage*
OFFENSES:			
Murder	51	16	31.4
Forcible Rape	329	197	59.9
Robbery	1,129	268	23.7
Aggravated Assault	1,095	571	52.1
Burglary	14,218	1,519	10.7
Larceny-theft	39,922	7,411	18.6
Motor Vehicle Theft	3,486	541	15.5
COUNTIES:			
Honolulu	46,455	7,309	15.7
Hawaii	5,339	1,864	34.9
Maui	6,018	853	14.2
Kauai	2,418	497	20.6
TOTAL	60,230	10,523	17.5

*Note: In this table, Percentage is the number of clearances per 100 offenses. However, clearances may also occur for offenses reported in previous time periods.

OFFENSE STATISTICS

The following section presents statistics on Crime Index offenses reported to law enforcement officials. Tables 1 through 4 focuses on the number of offenses. The remaining tables focus on the value of property stolen and recovered. Please note that although arson is a Crime Index offense, data on arson is not included in this section.

ARREST STATISTICS

Persons Arrested

The number of persons arrested for all violations except traffic in the reporting jurisdictions is compiled from monthly returns submitted by the contributing agencies. The age, sex and race of these persons are recorded, and data are collected on juveniles and adults to compute arrest trends and volume.

The Age, Sex, and Race of Persons Arrested form is used to collect data on the number of arrestees and not on the number of persons charged. The same person may be arrested several times during a month for similar or different violations within a jurisdiction; each arrest is counted. A person may be arrested on several charges at one time; however, only one arrest would be scored.

Race of persons arrested is presented using the State of Hawaii reporting format. National categories are White, Black, American Indian and Alaskan Native, and Asian or Pacific Islander. For the State of Hawaii, the Asian and Pacific Islander category is divided into the following groups: Chinese, Japanese, Filipino, Hawaiian/Part Hawaiian, Korean, Samoan, and Other.

The following tables present data on persons arrested in the State of Hawaii, 1986, by age, sex and race.

Table 10
Population and Arrests, Distribution of Ethnic Stock

JUVENILE ARREST STATISTICS

Juvenile Arrests

This section presents data on juvenile arrests. Juvenile arrests include cases where a young person is summoned, cited, or notified to appear before the juvenile court for situations which would result in arrest if the offender were an adult. (Juveniles may also be arrested for running away or for curfew and loitering law violations.)

Police Disposition of Juveniles

Unlike arrested adults who are usually held for prosecution or are released for future handling in court, juveniles, depending on the seriousness of the offense and their prior record, may be warned and released to parents or guardians. Juveniles may also be referred to the probation agency, to juvenile court, to welfare agencies, to other enforcement agencies, or to adult court.

The table below presents police dispositions of juveniles by county and type. It should be noted that many dispositions were pending at the time of submission of the reports. This situation accounts for instances where the total number of arrests exceeds the total number of dispositions. At the same time, however, finalization of dispositions pending from previous months can cause the total number of dispositions to surpass the total number of arrests.

POLICE DISPOSITION OF JUVENILES (Excluding Neglect and Traffic Cases)

	Honolulu	Hawaii	Maui	Kauai	Total
Total Juvenile arrests	10,543	1,792	994	1,305	14,634
Handled within Dept. and released	3,612	135	38	218	4,003
Referred to Juv. Court or Probation Dept.	5,251	1,657	938	987	8,833
Referred to Welfare Agency	78	0	3	68	149
Referred to other Police Agency	0	0	13	0	13
Referred to Criminal or Adult Court	0	0	0	5	5

UNIFORM CRIME REPORTING DEFINITIONS

Part II Offenses

1. Other Assaults

All assaults other than aggravated are included in this category.

2. Forgery and Counterfeiting

Included in this classification are all offenses dealing with or attempting to deal with the making, altering, or possessing, with intent to defraud, anything false in the semblance of that which is true.

3. Fraud

Fraudulent conversion and obtaining money or property by false pretenses; includes bad checks, confidence games, etc., except forgeries and counterfeiting.

4. Embezzlement

Misappropriation or misapplication of money or property entrusted to one's care, custody, or control.

5. Stolen Property: Buying, Receiving, Possessing

Included in this category are all offenses of buying, receiving, and possessing stolen property, as well as all attempts to commit any of these offenses.

6. Vandalism

Vandalism consists of the willful or malicious destruction, injury, disfigurement, or defacement of any public or private property, real or personal, without the consent of the owner or person having custody or control, by cutting, tearing, breaking, marking, painting, drawing, covering with filth, or any other such means as may be specified by local law.

This offense covers a wide range of malicious behavior directed at property such as: cutting auto tires, drawing obscene pictures on public restroom walls, smashing windows, destroying school records, tipping over gravestones, defacing library books, etc.

All arrests including attempts are scored as vandalism.

7. Weapons: Carrying, Possessing, Etc.

This class deals with weapon offenses, regulatory in nature, such as: manufacture, sale, or possession of deadly weapons; carrying deadly weapons, concealed or openly; using, manufacturing, etc., silencers; furnishing deadly weapons to minors; aliens possessing deadly weapons.

All attempts to commit any of the above.

8. Prostitution and Commercialized Vice

Included in this class are sex offenses of a commercialized nature, such as: prostitution; keeping bawdy house, disorderly house, or house of ill fame; pandering, procuring, transporting, or detaining women for immoral purposes, etc.

All attempts to commit any of the above.

9. Sex Offenses

(Except forcible rape and prostitution and commercialized vice.)

Included are offenses against chastity, common decency, morals, etc.; adultery and fornication; buggery; incest; indecent exposure; indecent liberties; intercourse with an insane, epileptic, or venereally diseased person; seduction; sodomy or crimes against nature; statutory rape (no force).

All attempts to commit any of the above.

10. Narcotic Drug Laws

Narcotic drug law arrests are made on the basis of the narcotics used. The following are subdivisions of narcotic drug law arrests:

Included are all arrests for violations of State and local laws, specifically those relating to the unlawful possession, sale, use, growing, manufacturing, and making of narcotic drugs.

- (1) opium or cocaine and their derivatives (morphine, heroin, codeine)
- (2) marijuana
- (3) synthetic narcotics - manufactured narcotics which can cause true drug

- addiction (demerol, methadones)
(4) dangerous nonnarcotic drugs (barbiturates, benzedrine)

11. Gambling

All charges which relate to promoting, permitting, or engaging in gambling are included in this category.

To provide a more refined collection of gambling arrests, the following breakdown of gambling arrests are furnished:

- (1) bookmaking (horse and sport book)
- (2) numbers and lottery
- (3) all other

12. Offenses Against the Family and Children

Included here are all charges of non-support and neglect or abuse of family and children:

- (1) desertion, abandonment, or non-support of wife or child
- (2) neglect or abuse of spouse or child (if injury is serious, score as aggravated assault)
- (3) nonpayment of alimony

All attempts to commit any of the above.

13. Driving Under the Influence

This class is limited to the driving or operating of any vehicle or common carrier while drunk or under the influence of liquor or narcotics. Included are: operating a motor vehicle while intoxicated; operating an engine, train, streetcar, boat, etc., while intoxicated.

14. Liquor Laws

With the exception of "drunkenness", liquor law violations, State or local, are placed in this class. Included are: manufacture, sale, transporting, furnishing, possessing, etc., intoxicating liquor; maintaining unlawful drinking places; advertising and soliciting orders for intoxicating liquor; bootlegging; operating still; furnishing liquor to a minor or intemperate person; using a vehicle for illegal transportation of liquor; drinking on a train or public conveyance.

All attempts to commit any of the above.

15. Drunkenness

Included in this class are all offenses of drunkenness or intoxication, with the exception of "Driving Under the Influence" (Offense No. 13).

- (1) drunkenness
- (2) drunk and disorderly
- (3) common or habitual drunkard
- (4) intoxication

This class is omitted in Hawaii. There are no arrests made under this section. Chapter 737-1 of the Hawaii Revised Statute was repealed under Act 9, Session Laws of Hawaii, effective January 1, 1973.

16. Disorderly Conduct

All charges of committing a breach of the peace are placed in this class. Included are: affray; unlawful assembly; disturbing the peace; disturbing meetings; disorderly conduct in State institutions, at court, at fairs, on trains, or public conveyances, etc.; prize fights; blasphemy, profanity, and obscene language; desecrating flag; refusing to assist an officer.

All attempts to commit any of the above.

17. Vagrancy

Persons prosecuted on the charge of being a "suspicious character or person, etc." are included in this class. Included are: vagrancy; begging; loitering (persons 18 and over) vagabondage.

18. All Other Offenses

Included in this class are all other State or local offenses not included elsewhere such as:

- admitting minors to improper places
- abduction and compelling to marry
- bigamy and polygamy
- blackmail and extortion
- bribery
- combination in restraint of trade; trusts, monopolies
- contempt of court
- criminal anarchism
- criminal syndicalism
- discrimination; unfair competition
- kidnapping
- marriage within prohibited degrees

- offenses contributing to juvenile delinquency (except as provided for in offenses 1 to 28 inclusive) such as employment of children in immoral vocations or practices, admitting minors to improper places, etc.
- perjury and subordination of perjury
- possession, repair, manufacture, etc. of burglar's tools
- possession or sale of obscene literature, pictures, etc.
- public nuisance
- riot and rout
- trespass
- unlawfully bringing weapons into prisons or hospitals
- unlawfully bringing drugs or liquor into State prisons, hospital, etc.; furnishing to convicts
- unlawful disinterment of the dead and violation of sepulture
- unlawful use, possession, etc., of explosives
- violations of State regulatory laws and municipal ordinances (this does not include those offenses or regulations which belong in the above classes)
- violation of quarantine

All offenses not otherwise classified and all attempts to commit any of the above.

19. Suspicion

While "suspicion" is not an offense, it is the ground for many arrests in those jurisdictions where the law permits.

After examination by the police, the prisoner is either formally charged or released. Those formally charged are entered in one of the Part I or II Offense Classes. This class is limited to "suspicion" arrests where persons arrested are released by the police.

20. Curfew and Loitering Laws (Juveniles)

All arrests made for violation of local curfew or loitering ordinances.

21. Runaway (Juveniles)

For purposes of the Uniform Crime Reporting Program, reported in this category are

apprehensions for protective custody, as defined by local statute. Arrests made by other jurisdictions of runaways are by the home jurisdiction. Not included are protective custody actions with respect to runaways taken for other jurisdictions.
