JAN 7 1986

ACQUISITIONS

Dear Governor Collins:

Significant accomplishments were made by the Kentucky State Police during the year of 1985. It is with great pride and pleasure that I submit to you and the citizens of this Commonwealth the 1985 Kentucky State Police Annual Report on behalf of the dedicated employees and officers who, by working together, have made this department one of the most highly respected law enforcement agencies in the nation.

Overall, our record reflects positive results despite difficult budgetary times. During 1985, we experienced the lowest traffic fatality count since 1960 and calls into our toll-free hotline reporting possible drunk drivers increased. Contacts with and assists to the public increased, as did services.

In addition, the Kentucky State Police has and is experiencing a marked improvement technologically through the modernization of equipment and the advanced training of personnel.

Nineteen hundred and eighty-five was a very productive year for the Kentucky State Police. I hope you will find this report to be informative, in that, it reflects the dedicated efforts put forth by the employees of the Kentucky State Police.

Sincerely,

Morgan T. Elkins
Commissioner

OUTSTANDING ACCOMPLISHMENTS

The Missing Child Information Center is a nationally recognized leader in the recovery of missing children to their parents. The intelligence section was directly tied to the location of 19 missing children and adults and distributed 31,000 missing person flyers.

The Narcotics Section was recognized on a national level with its success in the Operation Delta 9 Campaign, which saw the development and implementation of an undercover rotation plan and a record number of marijuana plants destroyed. The program was changed so that primary investigative efforts were directed toward large scale producers. The Kentucky State Police destroyed 149,284 marijuana plants from 513 different plots.

The 1985 fatality rate for Kentucky was the lowest record since 1961, with 722 deaths on state highways. This result was a combination of intensified DUI efforts, speed enforcement and emphasis on safety belts and child safety seats.

Drunk driving arrests by the Kentucky State Police were down by 24.4% demonstrating the effectiveness of the new tougher DUI law. The Kentucky State Police have attained these reductions by instituting stricter enforcement techniques and increasing public information campaigns. Some of the new methods to reduce drunk driving were:

1. Commissioner Morgan T. Elkins served as the National Chairman for Operation C.A.R.E. (Combined-Accident Reduction Effort), and has encouraged a strong dedication to safety on the highways.
2. Utilization of a Mobile Breath Testing Unit for roadside testing of suspected drunk drivers. The unit effectively reduces the time lapse between transport from the scene of arrest to the nearest jail, by allowing immediate breathalyzer tests on the scene inside the unit. Previously, transporting those arrested may have allowed enough time for their BAC (Blood Alcohol Concentration) to drop.
3. Utilization of hand-held Portable Breath Testing Units for on-the-scene testing of suspected drunk drivers as a preliminary sobriety test. Again, this tool effectively eliminates any time lapse that may cause the BAC to drop, and also saves man-hours by getting correct results on the scene for further action.
4. Participated in and organized a national, intensified DUI public information and enforcement called "D" Day on Trafficways. A total of 41 states were involved with 25 reporting "zero" fatalities during the 13-hour reporting period. This is compared to 24 states participating in 1984.
5. Kentucky helped organize and participated in the national "All American Buckle-Up Week".
6. The "Make It Click" program was held for the second year in a row, with schools in fourteen counties participating and the Jaycees organization became involved on a statewide level. The aim, to encourage use of safety belts and increase usage in these target areas, was realized. A study by the University of Kentucky Transportation Research Program showed statistically significant increase in usage rates overall. The Jaycees also adopted the "Make It Click" program as a statewide project.
7. Utilization of the new high-speed pursuit vehicles in high-accident locations where speed was a contributing factor to vehicle accidents. These cars are equipped with state-of-the-art equipment including highly-advanced radar and VASCAR (Visual Average Speed Computer and Recorder).
8. Successful 55 MPH Speed Enforcement Programs were conducted in 20 counties where excessive speed was a major factor in vehicle accidents.

SEVERAL PROGRAM AND EQUIPMENT CHANGES WERE MADE IN 1985 TO INCREASE THE EFFECTIVENESS AND PRODUCTIVITY OF THE KENTUCKY STATE POLICE.

Over \$300,000 in annual savings was realized by efficient and effective changes in the telephone and communication systems of the Kentucky State Police.

Standardization of the issuing of shotguns and new off-duty weapons resulted in the uniformity of weapons among officers.

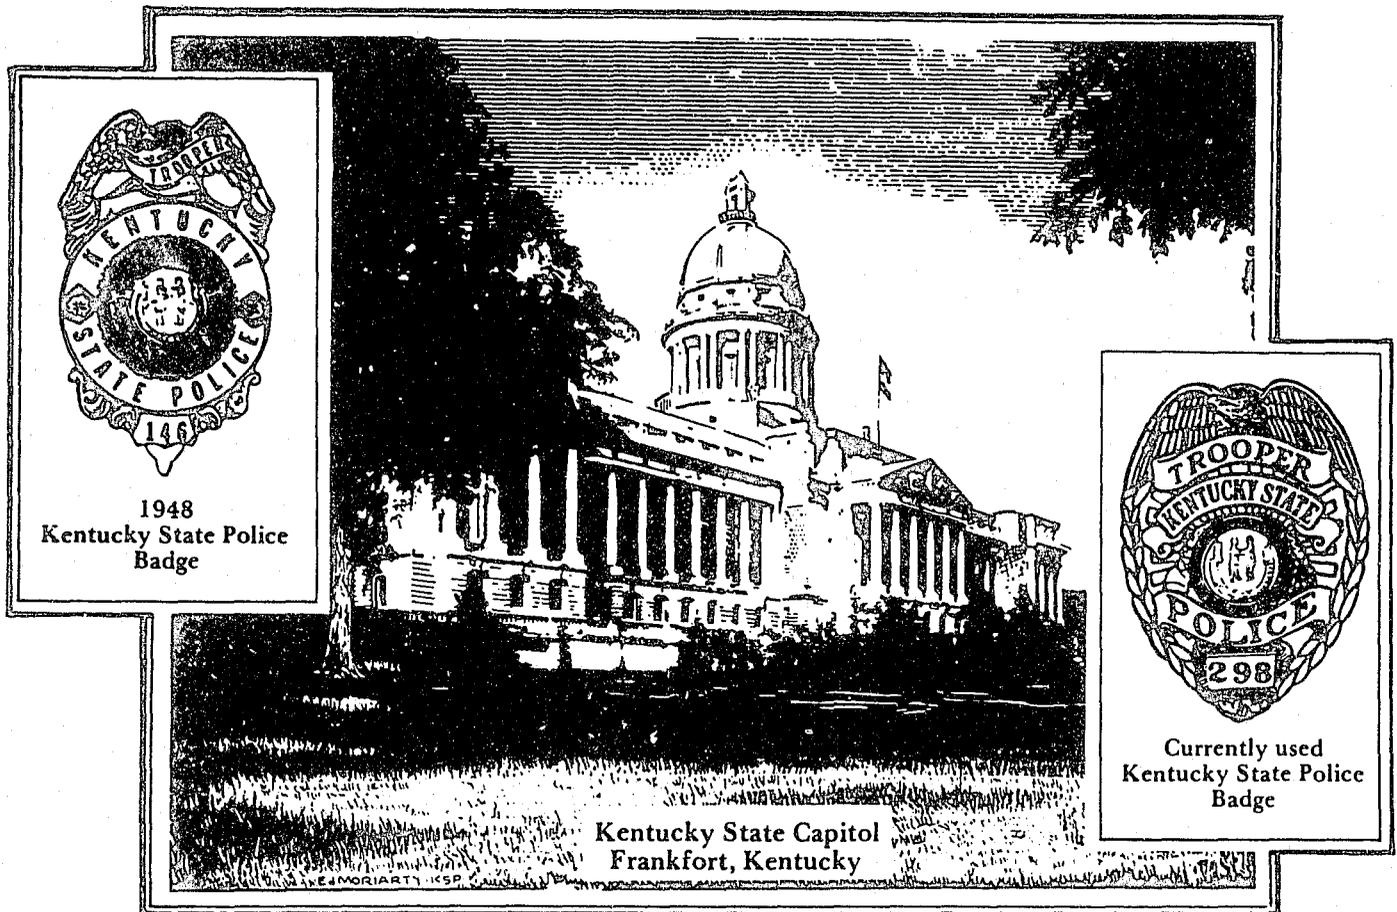

All victims of accidents and crimes were offered information to aid in their stressful situations through the Victim Assistance Program. By the end of 1985, 20,000 contacts were totalled, between victims and the KSP, helping them better understand the criminal investigation techniques used and the flow of the judicial system.

Purchase of a new Honeywell Computer system, which is being installed in 1986, allows for office automation for the entire state police network statewide. This will provide immediate retrieval of files and information from one source to another in a matter of seconds.

Special Response Teams were re-organized with a lieutenant assigned as the tactical leader allowing for better coordination and control of the SRT's.

Central Data Base computer of all hazardous material incidents was acquired. The Central Data Base is available to six state agencies, including the Kentucky State Police, that are directly responsible for the transportation, handling and enforcement of hazardous materials in Kentucky. The data base is to be used by all agencies for central data as well as computerizing their own individual data. In this manner, each agency can see the severity of any problems as a whole, or just extract the specific information they need.

A HISTORY

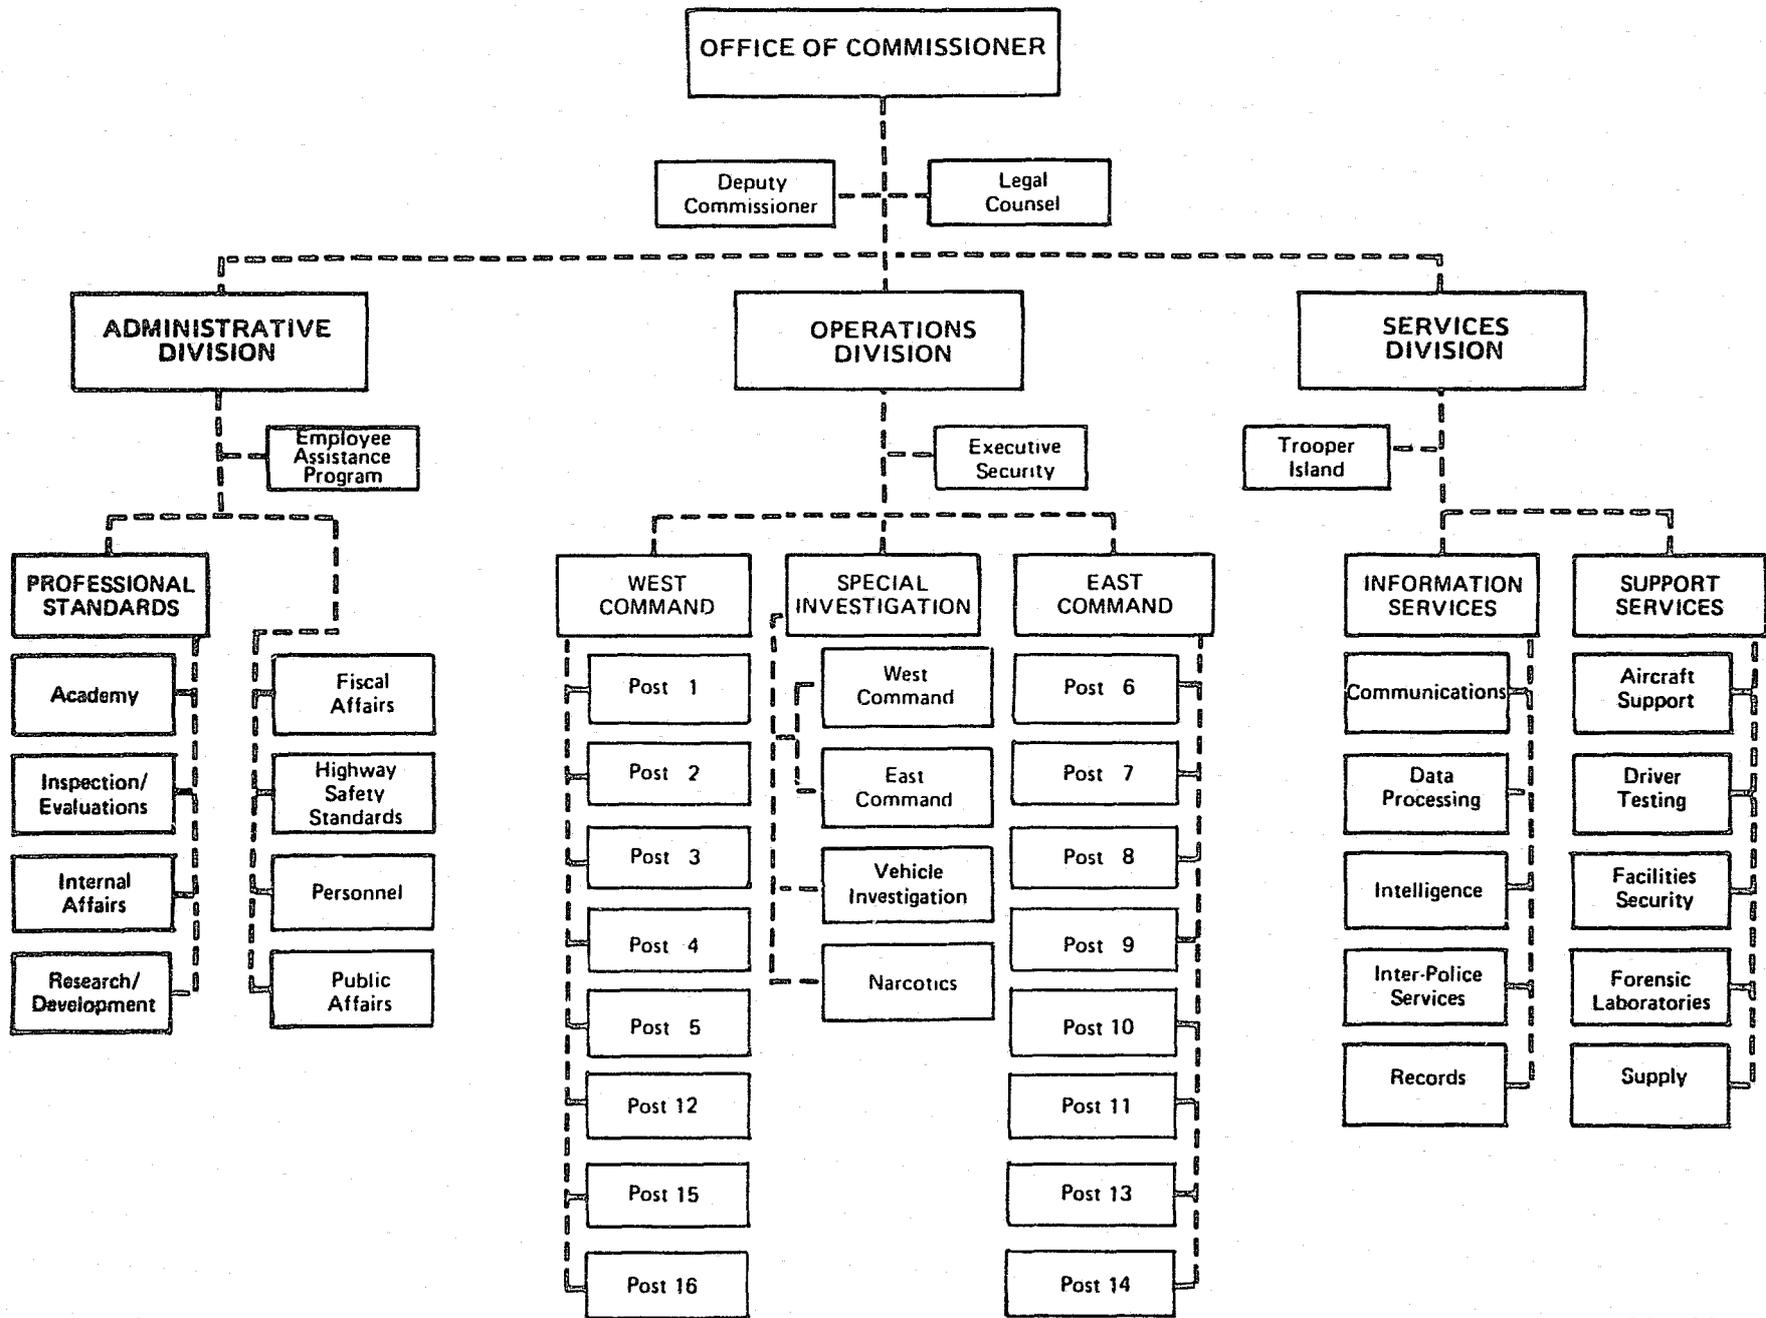

The Kentucky Highway Patrol had its beginnings in 1936 when the State Highway Department was created with a Division of Highway Patrol with broad powers to regulate and enforce the traffic laws of Kentucky. Forty officers were employed to patrol the state's highways. By 1938 the force had increased to 200 officers.

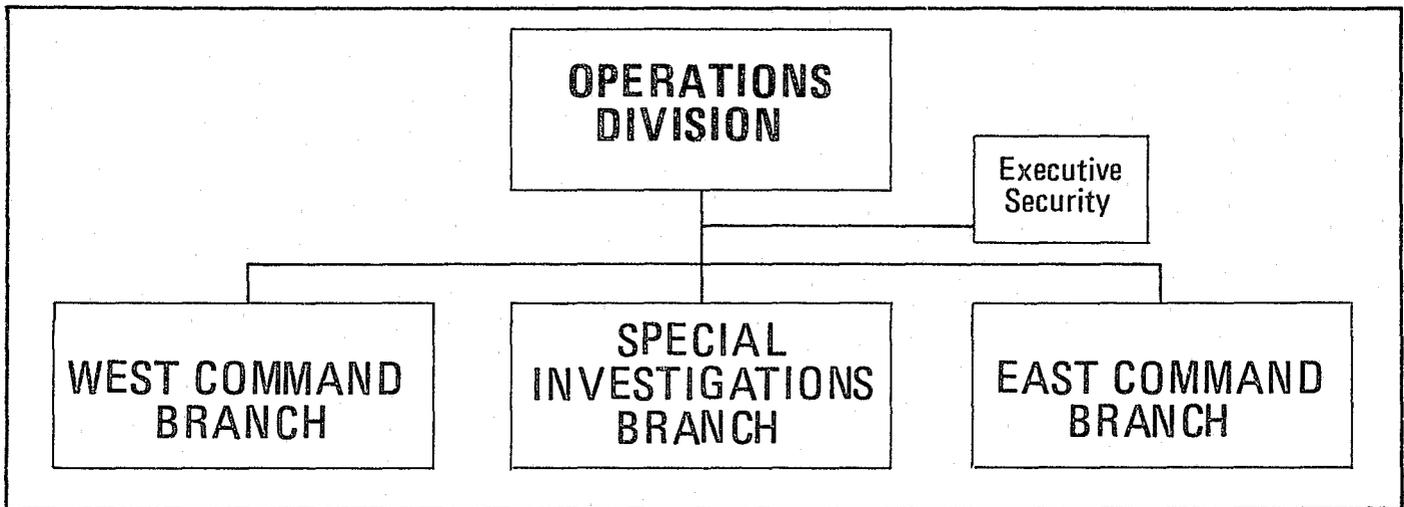

On July 1, 1948 the Kentucky State Police was formed when legislation was signed giving its officers full police powers, both traffic and criminal.

Pride is the mark of those who have earned the right to wear the emblem of the Kentucky State Police... men and women who have met the test for service in an organization that prides itself on a long and hard won reputation for courage, performance, integrity, and professionalism.

Since 1948 the Kentucky State Police has fostered and served that tradition by demonstrating their readiness and ability to respond around the clock wherever they are needed, no matter how difficult or dangerous the job may be.

OPERATIONS DIVISION

The Operations Division provides total police service to the citizens of Kentucky, people traveling through the Commonwealth, and officials of other law enforcement agencies. The focus of the Division is to prevent traffic accidents, and to protect our citizens through the detection, apprehension, and conviction of criminal law violators. Additionally, the Division investigates organized criminal activity, stolen motor vehicles, unlawful drug use, corruption, and ensures security for the Governor, Lieutenant Governor, and their families.

Assigned to the Division are sixteen (16) posts under the East and West Command Branches; Vehicle Investigations, Narcotics, and East and West Command Sections under the Special Investigations Branch; and the Executive Security Section.

The Operations Division is the very core of the Kentucky State Police as it provides the front line protection and the services for the citizens of the state. The year of 1985 has proven to be one of the most successful years for the Division as great steps were taken to make the roadways of the state a safer place to travel.

There was a 23-year low in traffic fatalities statewide in 1985 - fewer by 41 than 1984, for a 5.3% decrease. This decrease was achieved by the implementation of the following programs:

All posts participated in "D" Day on Trafficways on December 13; the state emerged from this 13-hour period without a single traffic-related death.

Ten Mustang high-speed pursuit vehicles were purchased for use in high accident locations where speed is the probable causal factor.

A new breathalyzer Use and Maintenance Program was implemented.

The mobile breath test unit was displayed at numerous sites across the state.

A strong dedication by all troops to the Traffic Alcohol Program and the 55-mph speed enforcement.

Along with the regular patrol of the troopers, many enforcement programs and services were extended to the public to enhance the safe environment of the state. Enormous success was achieved in combating crimes against children. The Kentucky State Police ranked fifth in the nation during the Operation Delta 9 campaign, a national Marijuana Eradication Program. In 1985, a record 305,907* plants in 1,315 different locations were destroyed. Many political corruption and white collar crimes were successfully investigated. A Victim Support Program was developed with over 20,000 contacts by the end of the year.

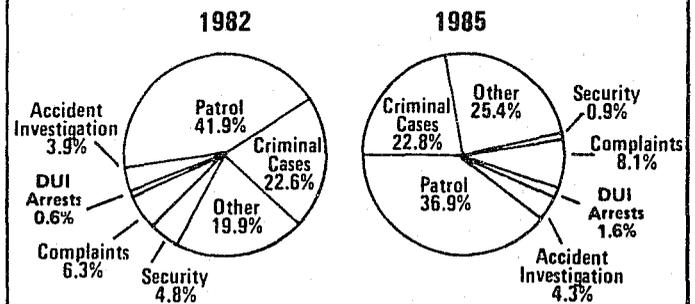

**All KSP units - eradication reported.*

The Operations Division is staffed with some of the finest law enforcement personnel in the nation. These troopers have excelled in the high quality training offered and have been issued the most current and best equipment available. Combining these tools and training with the trooper's high level of dedication and professionalism has made Kentucky a safer place to live. Having accomplished this in 1985, the pride of Kentucky State Police has carried forth and shined.

SPECIAL INVESTIGATIONS BRANCH

The Special Investigations Branch is responsible for directing the investigation of white collar crime, organized crime, fraud, corruption in business and government, and maintaining liaison with other law enforcement agencies at local, state and federal levels.

In 1985, Special Investigations was staffed with seventy-six (76) sworn personnel.

Special Investigations West Command Section

In 1985, Special Investigations West successfully initiated the investigation of numerous multi-faceted cases. Some areas of investigation have been fencing operations, stolen car rings, burglaries and theft of farm chemicals. Voting irregularities involving absentee ballots in several counties have been under investigation along with various complaints of political corruption.

Special Investigations West recognized success during the year in its investigations of large scale, organized crime-connected drug dealers and rural organized crime.

Following is a breakdown of activities and properties recovered:

CASES	270
ARRESTS	234
INT'S SENT TO INTELLIGENCE	275
DRUGS SEIZED OR DESTROYED	\$670,491
PROPERTY RECOVERED	\$302,270
TOTAL DRUGS/PROPERTY	\$972,761
ORGANIZED CRIME	216
WHITE COLLAR	25
POLITICAL CORRUPTION	19
MISCELLANEOUS	10

Special Investigations East Command Section

In 1985, Special Investigations East has had enormous success in combating crimes against children. The Section has developed a sophisticated method allowing a proactive approach in apprehending the sex offender. Through a federal charge of using mail to distribute materials portraying a sexual performance by a minor, arrests of pedophiles living in Kentucky have been made.

During the year, Special Investigations East has conducted investigations in county governments in four different counties which have led to numerous arrests. Charges were brought for voting irregularities, theft by deception, official misconduct, bribery of public servants and forgery.

Following is a breakdown of activities and properties recovered:

CASES	766
ARRESTS	1,149
DRUGS SEIZED OR DESTROYED	\$16,304
PROPERTY RECOVERED	\$50,445
TOTAL DRUGS/PROPERTY	\$66,749
INT'S SENT TO INTELLIGENCE	37
ORGANIZED CRIME	263
WHITE COLLAR	193
POLITICAL CORRUPTION	234
MISCELLANEOUS	76

Vehicle Investigation Section

The Vehicle Investigation Section is responsible for tabulating recoveries of stolen motor vehicles and arrests by field officers from all divisions, maintaining custody of the motor vehicle registration files and furnishing registration data and technical assistance to all law enforcement agencies upon request.

Effective July 1, 1985, the Auto Theft Section was officially changed to the Vehicle Investigative Section. Eighteen detectives were trained by the Section in March. All 16 Posts, as well as Special Investigations East and West, have a Vehicle Investigation Specialist.

Using this system, the Vehicle Investigation Section played a successful role in the detection and processing of Chop-Shop operations. The Section was also successful in the enforcement of motor vehicle registration laws; especially relating to dealer plates and temporary tags.

The Section's goals and objectives are to detect and prevent vehicle theft activity by coordinating leads, evidence, and information with these personnel. A referral system has been set up to distribute these leads, evidence and information.

1985 TOTAL KSP VEHICLE THEFT ACTIVITY

RECOVERIES	1,002
ARRESTS	255
VALUE OF RECOVERED PROPERTY	\$4,875,883

1985 MOTOR VEHICLE DOCUMENT EXAMINERS

SPECIAL ASSISTS	13,025
ASSISTS CONFIRMED FOR STOLEN	9
STOLEN VEHICLES ENTERED NCIC/LINK	7,990
MOTOR VEHICLE DOCUMENTS EXAMINED	123,513
DETECTED AS ALTERED/STOLEN COUNTERFEIT	467
DETECTED AS SUSPECT	2,984
HITS FROM TITLE APPLICATIONS	2,856
STOLEN VEHICLES RECOVERED	2

1985 SWORN PERSONNEL ASSIGNED TO SECTION

CASES OPENED	4
VEHICLE RECOVERIES	0
ARRESTS	0
SPECIAL IDENTIFICATION ASSISTS	465
RESULTING IN RECOVERY	50
RESULTING IN ARRESTS	3
INTELLIGENCE REPORTS	32
THEFT RINGS DETECTED	3
TOTAL REFERRALS	424
REFERRALS RESULTING IN CASES OPENED	57

Narcotics Section

The Narcotics Section has a multifaceted mission within the Kentucky State Police. First and foremost, the Narcotics Section is the lead enforcement entity relative to the suppression of drug trafficking and production within the Commonwealth. The Section is charged with directing its enforcement efforts in that direction. In addition, the Narcotics Section provides technical and logistical support to other Kentucky State Police Posts and Sections as well as other state, federal, and local agencies as they relate to drug enforcement. This support includes - but is not limited to - marijuana analysis, marijuana eradication, drug eradication, and canine services (drug detection and tracking dogs).

The Narcotics Section has personnel assigned to two (2) full-time federal task forces and several part-time assignments. The assignments assure cooperation and participation in all major drug investigations within the Commonwealth.

The Narcotics Section has continued to direct much of its enforcement efforts against major drug dealers and producers. The Kentucky State Police 1985 Marijuana Eradication Program saw a record number of plants seized. The program was changed in that the primary investigative efforts were directed toward large scale producers. In 1985, the personnel within the Narcotics Section were responsible for the eradication of 149,284* marijuana plants from 513 different plots. Sixty-six (66) arrests were made. Numerous major undercover operations were successfully directed throughout the year.

The development and implementation of an undercover rotation plan was accomplished. This rotation plan makes Kentucky one of the first state level agencies in the nation to make such a policy change relative to its undercover operatives.

A complete N.C.I.C. file and O.C.A. file (duplicated by Headquarters Radio) was set up and maintained by the Section Office.

All N.C.I.C. entries from the general posts were cleared and re-entered through Headquarters Radio. This centralization has enabled the section to be totally accurate in its N.C.I.C. validation process.

**Narcotics Section only - eradication reported*

The procedure for submission of evidence to the Lab was altered to include the "white" copy of the KSP-41 accompanying the evidence at all times. This procedure will enable a more exact evidence accounting and makes the active KSP-41 file much easier to audit. This procedure ensures that accountability is maintained and precludes the "mis-labeling" or "misfiling" of evidence.

A closed-pending evidence release file has been initiated. This file allows for the lag time often encountered when a case is closed and the original KSP-41 is forwarded from a post to the section.

In 1985, the Narcotics Section opened 1,790 cases which resulted in 1,105 arrests. Following is a breakdown of this activity:

CASES INVESTIGATED

	NUMBER	% OF TOTAL
SCHEDULE I OFFENSE	1092	61.01%
SCHEDULE II OFFENSE	264	14.75%
SCHEDULE III OFFENSE	7	.39%
SCHEDULE IV OFFENSE	23	1.28%
OTHER CASES OPENED	404	22.57%

ARRESTS MADE

	NUMBER	% OF TOTAL
SCHEDULE I OFFENSE	612	55.38%
SCHEDULE II OFFENSE	182	16.47%
SCHEDULE III OFFENSE	13	1.18%
SCHEDULE IV OFFENSE	17	1.54%
OTHER OFFENSES	281	25.43%

Executive Security

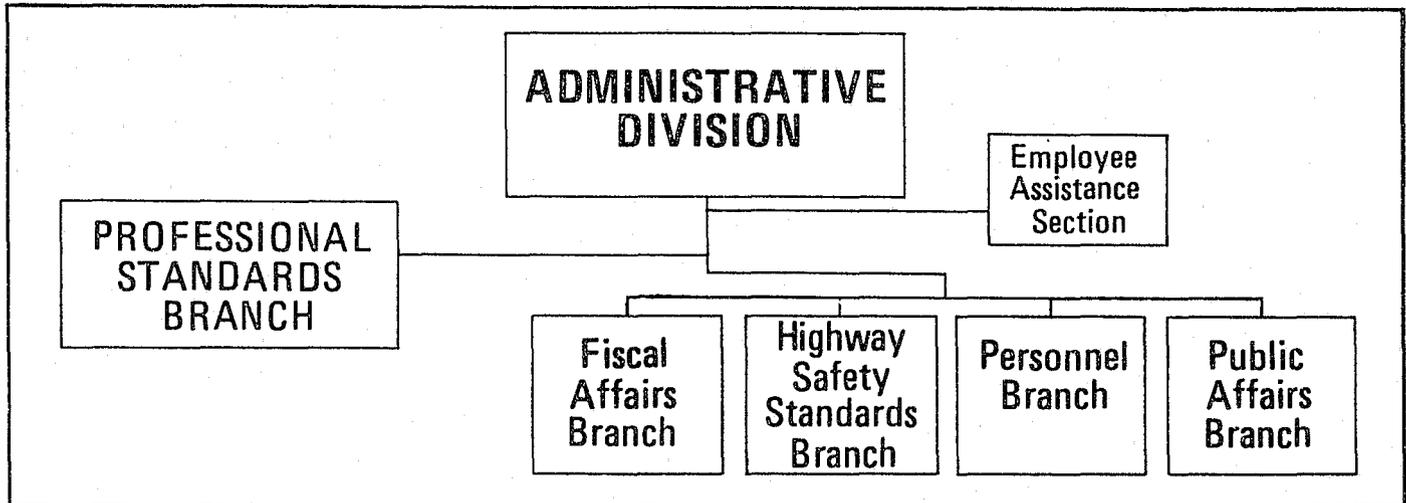

The Executive Security Officers have primary responsibility for the safety of the Governor, the Lieutenant Governor, their families, residences and possessions.

In 1985, Executive Security fulfilled their responsibilities while staffed with thirty-one (31) sworn personnel.

KENTUCKY STATE POLICE
1-800-222-5555
HOTLINE TO REPORT AN INTOXICATED DRIVER

ADMINISTRATIVE DIVISION

The Operations division is responsible for providing the front line protection and services for the citizens of the state, but this can only be accomplished through effective assistance by the Administrative Division.

Personnel must be provided with the highly professional and specialized training needed to accomplish the enormous obligations which must be met daily in the field. A vast array of statistical analysis and information must be made available to the field staff to aid in their successful patrol. And then a means of inspection and evaluation to ensure the effectiveness of all personnel and programs. These responsibilities are met by the Professional Standards Branch.

The Kentucky State Police must have a budget prepared and monitored to ensure that monies are available to provide necessary equipment, training and personnel to provide protection and services to the people of Kentucky.

Manpower allocation must be studied and distributed to maximize the efficiency of the State Police. And an interrelationship must exist between the Kentucky State Police and the news media. These functions are all managed by the Administrative Division along with an assistance program for all employees.

PROFESSIONAL STANDARDS BRANCH

The Professional Standards Branch is responsible for the coordination, supervision, and management of the State Police Academy, Inspections/Evaluations, Internal Affairs and the Research and Development Sections.

Academy

The Kentucky State Police Academy is responsible for administering in-service, cadet, and specialized training programs within the department; and for the development, administration, monitoring, and periodic re-evaluation of those programs.

As the technical and legal requirements of law enforcement increase, the importance of up-to-date training is critical in accomplishing the mission of the Kentucky State Police Trooper. During 1985, the Kentucky State Police Academy offered and conducted a wide range of training programs for the benefit of the State Police as well as local departments and other state agencies. A total of 888 State Police officers and civilians, and 220 individuals representing twenty-eight (28) local and state agencies attended training programs.

There were forty-one (41) in-service and specialized programs conducted covering eighteen (18) different courses.

Seventy-two (72) officers graduated from cadet training as members of Cadet Class No. 62 and No. 63 on March 2 and November 2, 1985, respectively. During calendar year 1985, these classes represented thirty-one (31) weeks and approximately 1400 hours of instruction.

In addition to the development, instruction and/or coordination of the training programs, Academy staff members provided assistance to other state and local agencies. Assistance and instruction were provided at seminars across the state in the area of child abuse and personnel, and equipment made available for taping of interviews.

Inspections/Evaluations Section

The Inspections/Evaluations Section is responsible for inspecting posts and sections, reviewing record-keeping, conducting inventories of supplies and evidence at each location, and submitting written reports of these activities. The Section is responsible for evaluating all components of the State Police to determine the level of management, and recognizing potential problems. Recommendations are made to offset potential problems and improve professional management.

It was noticed that the inspection procedures and rating criteria were tracked by various supervisors. This resulted in higher average scores throughout the year. This is a natural process of upgrading that occurs as the various posts learn areas of deficiencies and make appropriate changes or corrections prior to inspection. This is a healthy outgrowth of the inspection process and points to proactive attitudes of Post Commanders.

In 1985, the Inspections/Evaluations Section inspected the following posts and sections:

Post 3	Bowling Green
Post 4	Elizabethtown
Post 6	Dry Ridge
Post 11	London
Post 12	Frankfort
Post 14	Ashland
Post 16	Henderson
Vehicle Inspections Section	
Special Investigations-West	

During 1985, of the seven (7) posts that were inspected, there were interviews conducted with 153 officials and 65 citizens. Overall, the interviews conducted with officials and citizens were very positive.

Internal Affairs Section

The Internal Affairs Section provides the Commissioner the assistance necessary to discharge his implicit duties relating to the maintenance of good order and discipline within the agency, and to ensure that the police mission of the agency is executed within the constitutional limits imposed by the United States and the Commonwealth of Kentucky. The Section shall also serve as a clearinghouse and central repository for all matters relating to discipline of agency personnel.

In 1985, the Internal Affairs Section handled 131 cases. Of these, fifty-four (54) were cases originated internally and seventy-seven (77) originated externally. Of these cases, eighty-nine percent (89%) of the internal cases were sustained and twenty-one percent (21%) of the external cases sustained.

Research And Development Section

The Research and Development Section serves as the agency's research staff for various studies including budgetary calculations, manual review and maintenance, innovative programs, and efficiency research and analysis of policies and procedures within the department.

In 1985, the Research and Development Section responded to ninety-five (95) questionnaires, routinely drafted memorandums for the Commissioner's signature, reviewed proposed legislation for the 1986 General Assembly, drafted numerous general orders, and revised the Kentucky State Police Manual.

The Section compiled and analyzed numerous statistical summaries on a monthly, quarterly, semi-annual, and annual basis. Data was compiled and narratives written for the 1986-88 Kentucky State Police Budget. The Manpower Allocation Study was conducted and proposed allocation for each cadet class was provided.

The personnel of the Research and Development Section was also responsible for the success of the following endeavors:

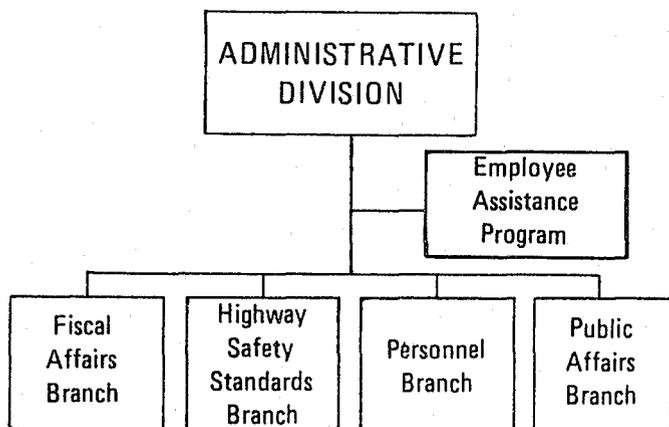

Conducted feasibility studies in nine (9) separate areas.

Administered and monitored fourteen (14) federal grants.

Developed plans, wrote specifications, and monitored the completion of a mobile breath testing vehicle.

Recruited and selected qualified State Police applicants. Duties included the formation of recruitment teams; correspondence, testing, and news releases; coordination of and service on oral interview boards; and review of background investigations.

Recommended and established a psychological testing program for cadet applicants.

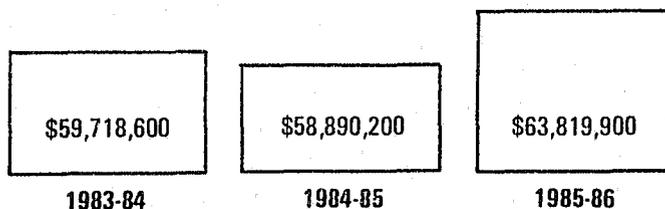

FISCAL AFFAIRS BRANCH

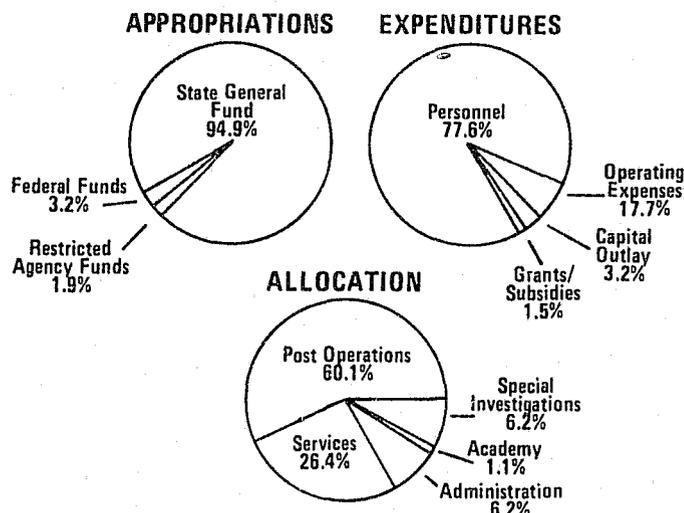

The Fiscal Affairs Branch is responsible for all agency budget-related functions, fund transfers, account monitoring, purchase approvals, and for conducting special projects related to the budget.

In 1985, Fiscal Affairs prepared and submitted the Department's 1986-88 Biennial Budget Request to the Governor. This included providing the necessary justification when requested by the Governor's staff. A detailed line-item monthly budget on the appropriate fiscal year's funds was prepared. This enabled Fiscal Affairs to provide management with current and up-to-date reports on the financial condition of the department. (A monthly financial report was prepared detailing expenditures incurred during each month as well as cumulative expenditures for year-to-date.) Throughout the year, all purchases were also checked to insure that they complied with applicable regulations and policies.

FY APPROPRIATIONS KSP

FY 1984-85 BUDGET KSP

HIGHWAY SAFETY STANDARDS BRANCH

The Highway Safety Branch has the responsibilities of administration and monitoring all existing and future programs in Kentucky funded by the National Highway Traffic Safety Administration.

In 1985, Highway Safety conducted a three-day Alcohol Conference. There were, in attendance, 147 people from eight southeastern states.

The Branch assisted and provided funding for four (4) conferences and/or training sessions, the Traffic Alcohol Programs (TAP) and Preliminary Breath Testers (PBT's). A mobile breath testing unit for the Kentucky State Police and ten (10) high-speed pursuit cars were funded.

A pilot project provided funding for prosecuting attorneys to be added in two counties in order to obtain the best DUI prosecution possible and to establish an expertise that might be disseminated statewide.

PERSONNEL BRANCH

The Personnel Branch is responsible for the recruitment, screening, and placement of qualified personnel to fill professional, administrative, and technical positions within all divisions of the department. The Personnel Branch administers the agency's payroll and benefit programs. It is also responsible for the interpretation of Administrative and Personnel Rules and Laws and for the administration and maintenance of all personnel records and related documents. The Personnel Branch actively participates in reviewing changes in fringe benefits, wage administration, promotions, reclassifications, and salary adjustments, and issues all personnel orders.

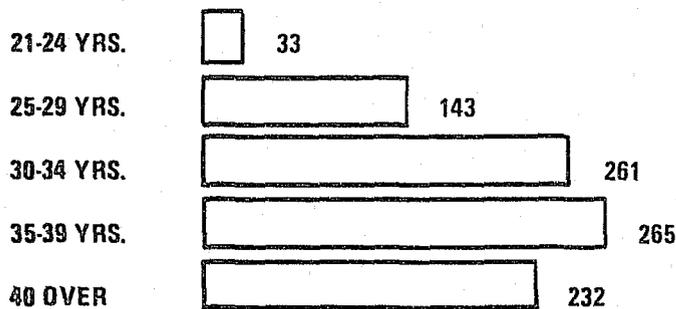

In 1985, to reduce the number of "new hires" when filling vacant positions, the Department of State Police utilized an Internal Promotion Program. During the past year, a total of 67 civilian employees were promoted and/or transferred into existing vacant positions, thus making it unnecessary to fill vacancies with "new hires".

Two (2) additional CRT terminals were installed during 1985 in the Personnel Branch. These terminals will provide additional editing capabilities and direct entering and verification of payroll transactions.

PUBLIC AFFAIRS BRANCH

The Public Affairs Branch provides technical assistance to the Public Affairs Officers throughout the state and functions as liaison between Headquarters and the media.

The Kentucky State Police Public Affairs Branch has been very successful in developing programs of both state and national interest in 1985. The National Operation C.A.R.E. Conference was held in Lexington, Kentucky during April with 130 representatives from thirty-three (33) states. The Kentucky State Police also hosted the National Executive Board Meeting of Operation C.A.R.E. at Rough River State Resort Park in October. The Public Affairs Branch had the responsibility for coordinating and organizing these conferences.

"D" Day on Trafficways is a drunk driving awareness campaign set up as a deterrent effort. This program was developed by the Kentucky State Police Public Affairs Branch and has been adopted as a national program by Operation C.A.R.E. In 1984, there were twenty-four (24) states participating with Kentucky in "D" Day. In 1985, the number of participating states grew to forty-one (41) and there were no fatalities during the enforcement period in twenty-one (21) states.

In Kentucky, forty-four (44) local police agencies joined with the Kentucky State Police in "D" Day on Trafficways and for the second year, no one died on Kentucky's roadways during the period.

The Public Affairs Branch and the sixteen (16) Public Affairs Officers have concentrated their efforts on the (2) major problem areas of media relations and safety education.

The media relations program has become a very important aspect of the overall mission of the Kentucky State Police. The image of the State Police is shaped by what people read about the agency in the press and view about the agency on television. In 1985, the Public Affairs Branch staff and Public Affairs Officers met with the Kentucky Broadcasters Associations and Kentucky Press Association in a continuing effort to improve media relations.

Safety education activities provide an extension to media programs by educating small groups about the State Police. In 1985, the "CLICK" program, encouraging the use of safety belts, proved a success as fourteen (14) counties participated with approximately 38,000 students. The Public Affairs Branch assisted the Tennessee Highway Patrol in organizing the second annual All American Buckle-Up Week. This is an effort to encourage the public to try their safety belt for a one week period.

During the year, 2,327 programs covering ten (10) areas of education and/or safety were presented with an attendance of 116,174.

C.A.S.P.E.R., the educational robot spent a busy year working with the "CLICK" campaign and visiting posts. There were approximately 300,000 people in attendance at the towns and events attended by C.A.S.P.E.R.

The Kentucky State Police Historymobile and antique cars were viewed at many festivals across the state with an attendance at these events of 79,063.

Employee Assistance Program

The Employee Assistance Program provides assistance, counseling, referral, and guidance to all Kentucky State Police employees and their families.

The diversified assistance and supportive counseling offered by the chaplains is a monumental asset to the Kentucky State Police. A great effort has been made to keep all employees aware of the available services and programs. Also, the chaplains strive to remain current as to the needs of the employees.

In 1985, the following services were offered:

TOTAL CONTACTS **554**

SERVICES DIVISION

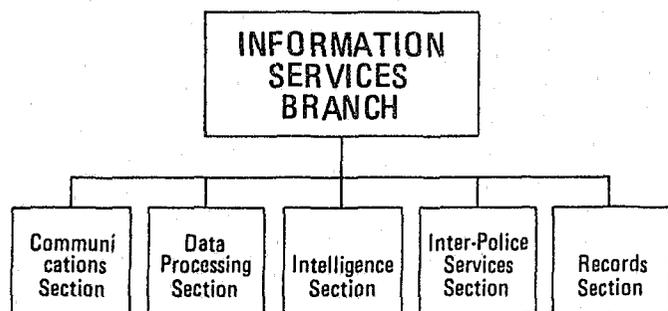

The Services Division is responsible to the Commissioner and is responsible for the coordination and management of the activities of the Information Services Branch, Support Services Branch and the Trooper Island Program.

The successful enforcement by the Kentucky State Police is dependent upon a strong Services Division. The information provided by the Services Division keeps the Trooper abreast of data necessary to his/her function. The Division also provides all equipment utilized by the State Police along with a records keeping and communications system that is mandatory for the effective and safe patrol of all troopers.

The assistance and maintenance provided by the Sections of the Support Services Branch accentuate the effectiveness of the patrol and criminal investigation of the Operations Division.

INFORMATION SERVICES BRANCH

The Information Services Branch is charged with providing technical assistance to functions of the Department through its Communications, Data Processing, Intelligence, Inter-Police Services and Records Sections.

Communications Section

The Communications Section specifies, purchases, and maintains electronic equipment requisite to an efficient communications system. It is responsible for training dispatcher and office personnel in the proper operation of radio equipment and computer-related communications.

In 1985, replacement of 125 additional vehicular repeaters and portable radios, and 65 mobile radios was authorized. Technicians performed 711 preventive maintenance checks.

Numerous trainings were conducted or supported by this Section, including sessions on the Breathalyzer, moving radar, and the 2-way radio. The 1-800 emergency telephone program grew in acceptance and performance, generating over 60,000 calls. Recommended changes in the Department's telephone system realized nearly a \$300,000 annual savings.

Data Processing Section

The Data Processing Section stores and dispenses computerized criminal justice information; and is the Department's resource for its office automation system.

Attempting to achieve the goal of a unified record system in 1986, all individual supervisor's records, other agency's records, and information pertaining to billing, maintenance, and calls for service were standardized and consolidated in 1985.

A contract was signed with Benchmark for a new computer system with office automation capabilities.

Intelligence Section

The Intelligence Section provides support to the Department and other criminal justice agencies via the collection, analysis, and dissemination of intelligence information.

Section activity increased by 17% in 1985, to 44,100 activities. There were 2,336 requests for information from local, state, federal and international agencies. Attention was focused on four priorities: 1) Crimes of Violence Against People, 2) Missing Children/Persons Program, 3) Terrorism and Hate Organizations, and 4) Crimes against Property.

The Section distributed over 31,000 Missing Person flyers and was directly tied to the location of 19 missing children and adults.

Inter-Police Services Section

The Inter-Police Services Section ensures the proper submission of quality, timely and complete criminal justice data to the Information Services Branch.

Ninety-nine percent of the 350 participating in-state police agencies compiled with the Section's report requests in 1985, versus 87% in 1984. The four men assigned to the Section achieved 2,569 personal contacts this year, driving over 130,000 miles.

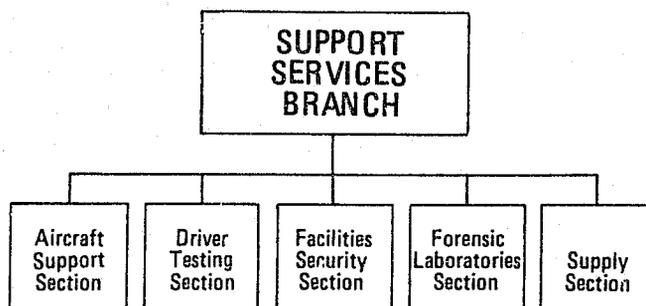

Records Section

The Records Section receives, maintains and analyzes records of traffic accidents and traffic law activities, criminal cases and statistics, criminal history and identification documents.

Automation/computerization of fingerprint technician administrative functions was partially effected in 1985. An improvement of better than 5% was noted in the number of fingerprint cards correctly processed. In nearly all Records Section units, there was a reduction in turnaround time in responding to criminal justice agency requests.

SUPPORT SERVICES BRANCH

The Support Services Branch is responsible for the coordination, supervision, and management of the Aircraft Support, Driver Testing, Facilities Security, Forensic Laboratories, and Supply Section.

Aircraft Support Section

The Aircraft Support Section is responsible for the operations, maintenance, coordination and management of all State Police aircraft.

In 1985, the Aircraft Section again increased the number of prisoners transported which has a positive impact on Posts, field units, and the court system. In doing so time, manpower, and transportation costs were saved. A total of 39 prisoners were transported on 33 flights from locations around the country. An average savings of five hundred dollars was realized per prisoner.

The pilots reported 216 fields of marijuana discovered by aircraft statewide. Section aircraft flew a total of 280 hours searching for marijuana. This resulted in one field of marijuana being discovered every 1.3 hours of flying time.

The Aircraft Section flew transport flights for other state agencies. Agencies served were:

AGENCY	NUMBER OF FLIGHTS
DIVISION OF WATER SAFETY	2
DEPARTMENT OF JUSTICE	4
MILITARY AFFAIRS	2
DIVISION OF AERONAUTICS	6

Law enforcement agencies statewide requested services from the Aircraft Section. Agencies served were:

AGENCY	NUMBER OF FLIGHTS
LEXINGTON METRO P.D.	3
D.E.A.	6
SHERIFF'S DEPARTMENTS	34
F.B.I.	2
WOODFORD CO. POLICE	2

The aircraft were flown in adverse weather conditions, hostile environments during criminal details and marijuana searches. The aircraft operated on a wide scope of operation ranging from Texas to Washington, D.C., to Miami and did so without a mishap. Our flight safety record continued to be unblemished for the year 1985. Following is a breakdown of activity in 1985:

TOTAL ACTIVITY HOURS

ACTIVITY	HOURS
TOTAL FLIGHT TIME	1,404
CRIMINAL DETAILS	168
SPECIAL DETAILS	198
AIR PATROL CONTACTS	106
MARIJUANA FLIGHTS	280
10-15 TRANSPORTS	274
KSP TRANSPORTS	121
OTHER TRANSPORTS	68
OTHER POLICE DEPARTMENTS	168
TRAINING FLIGHTS	125

Driver Testing Section

The Driver Testing Section is responsible for Uniform Driver Testing Standards throughout the Commonwealth and ensuring that only qualified persons obtain a Kentucky operator's license.

During 1985, there were 335,000 individuals given driver-related examinations. A new program was implemented for administering written and oral versions of the road rules and sign tests in foreign languages in order to facilitate testing of persons of foreign extraction with English difficulties.

The Examiner's Manual dealing with specifics to examiners' testing tasks was revised and these changes will be effective March 1, 1986. The Driver Manual was also revised and published during 1985.

The backlogs of test-appointments were reduced by streamlining procedures and better matching available personnel to the workload. All test scores were reviewed and modified where needed.

Facilities Security Section

The Facilities Security Section has the responsibility for maintaining security at designated state-owned or leased facilities and property.

During 1985, the Facilities Security Section provided manned security for nineteen (19) specific property locations that are state-owned. Several other outlying buildings in the Frankfort area which are state occupied were provided security by mobile patrol units.

All commissioned officers were given firearms training and issued a .357 Magnum.

Forensic Laboratories Section

The Forensic Laboratories Section has the responsibilities to conduct scientific examinations of evidence submitted by State Police personnel and local agencies in support of the state criminal justice system.

In 1985, the case load increased for all laboratories within the section. Following is a comparison of cases and evidence received in 1984 and 1985:

CASES RECEIVED		
1984	1985	% Increase
14,321	15,874	10.84
CASES COMPLETED		
1984	1985	% Increase
14,242	15,677	10.08
EXHIBITS EXAMINED		
1984	1985	% Increase
48,330	55,051	13.91

The Photographic Section within the Central Laboratory printed a total of 229,571 color prints and made 15,374 hand enlargements during 1985. These totals represent approximately a 20% increase over 1984.

The Polygraph Section conducted 702 polygraph examinations during 1985, down from 860 in 1984. A total of 94 confessions were obtained by the polygraph examiners as a result of the examinations.

During 1985, laboratory personnel made 848 court appearances, gave expert testimony 482 times and traveled 127,266 miles to and from courts in Kentucky.

Approximately 68% of the entire work load of the Forensic Laboratories Section was submitted by agencies other than the State Police. The lab provides service to local police, sheriffs, coroners, prosecutors, and public defenders. Additionally, approximately 44% of all the polygraph examinations conducted were done at the request of other agencies. Rape evidence kits, gunshot residue kits, trace evidence kits, and blood alcohol vials are supplied to other police agencies. Also, over 15,000 hand enlarged color prints were supplied prosecutors for use in court presentation.

To stay current with the ever changing technology, lab personnel continually attend advanced training sessions and forensic conferences. During 1985, a total of 19 people assigned to the Forensic Laboratories Section attended an advanced training session or a forensic conference.

Supply Section

The Supply Section is responsible for the acquisition, disposal, storage, maintenance and distribution of equipment and supplies necessary for the efficient operation of the agency and for maintaining such records as are necessary to accomplish this objective.

In addition to the various day-to-day routine functions of the Supply Section, the following accomplishments were completed in 1985:

Two hundred and eleven (211) new vehicles were issued and four hundred and forty-nine (449) used vehicles reissued. One hundred and ninety-five (195) vehicles were sold at public auction and eighteen (18) vehicles were sold to other governmental agencies.

Two hundred and eleven (211) new cars were prepped. One hundred and sixty-four (164) vehicles were stripped. One hundred and ninety-five (195) vehicles were checked over before auctions.

General repairs were made to one thousand one hundred and twenty-seven (1,127) vehicles. One hundred and forty-one (141) wrecker runs were made.

Two hundred and twenty-two (222) vehicles were repaired.

Two thousand two hundred and fifty-five (2,255) requisitions for office supplies and forms were processed and delivered to all State Police Sections and Divisions.

Three thousand three hundred and twenty-three (3,323) additions of new equipment were added to the inventory. Six hundred and twenty-eight (628) deletions of equipment were removed from inventory. Seven thousand seven hundred and five (7,705) pieces of equipment were transferred from one location to another.

Fourteen thousand four hundred and six (14,406) items in thirty-three (33) different categories were received. One hundred and nineteen (119) weapons were repaired in the Armor Room.

Departmental purchase orders were requested for ninety-three (93) different classifications of items. Purchase requisitions were prepared on ninety-five (95) different classifications of items.

Trooper Island

Trooper Island Boys Camp was developed by the Kentucky State Police as part of a long range program aimed at preventing accidents and crimes. Established in 1968, the camp provides camping and educational opportunities for approximately seven hundred 10- to 12-year-old boys each year at no charge. Each boy is selected by a Trooper from his county and taken from an environment where he would not have the opportunity to attend camp. The camping program is dedicated toward touching the whole person, building the physical body through nutritious food and exercise, developing mental capabilities with classroom study and providing spiritual growth through non-denominational chapel services. All of the growth experiences are shared with the Troopers that serve as counselors bonding the young boys to their new found friends.
