ILLINOIS  
DEPARTMENT  
OF  
CORRECTIONS

110134

MICHAEL P. LANE  
Director

1301 Concordia Court / P. O. Box 19277 / Springfield, IL 62794-9277 / Phone (217) 522-2666

October 1, 1988

Honorable Members of the General Assembly  
State House  
Springfield, Illinois 62706

Dear Members of the General Assembly:

In fiscal year 1989, the Department of Corrections is once again faced with managing an increasing prison population with diminishing resources. Although the enacted FY89 budget does enable the recall of the parole agents laid off last year and the reopening of the Hardin County Work Camp, the budget will not allow the Department to maintain current staffing levels at adult and juvenile facilities. The budget also fails to include sufficient resources to feed the inmate population and to address needed repair and maintenance projects. Despite the fact that the new correctional centers in Mt. Sterling and Canton will soon be ready for operation, no funds are included for opening these facilities. As a result of these issues, the Department of Corrections will request supplemental appropriations for fiscal year 1989.

Attached is the Department of Corrections' October 1988 Quarterly Report pursuant to Public Act 83-942, as amended by Public Act 85-252. The reports consists of two sections: Section I - Adult Facilities and Section II - Juvenile Facilities. This letter summarizes key facts reflected in this report.

Section I - Adult Facilities

Significant Facts:

1. Total prison population increased by 760 inmates since a year ago.
2. The security staff ratio on August 31, 1988 (0.281) is the lowest since the Quarterly Report began in January 1984. There are fewer correctional officer per inmate today than four and one-half years ago.
3. Capacity is 539 more beds than one year ago.
4. The maximum security institutions are at 96 percent of rated capacity and 150 percent of ideal capacity. Systemwide, the Adult Division is operating 697 inmates over rated capacity and 4,420 inmates over ideal capacity.

NOV 1988

OCT 27 1988

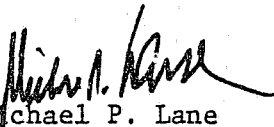

ACQUISITIONS

Section II - Juvenile Facilities

Juvenile institution in-residence population was 1,162 on August 31, 1988 (Table 1). This compares to a rated capacity of 1,174 (Table 4). Thirty-three percent (33%) of the juvenile population are murderers, Class X, or Class 1 offenders (Table 2).

If you have any questions or require clarification of the data tables, please contact the Intergovernmental Relations Office at extension 2104.

Sincerely,

  
Michael P. Lane  
Director

NOTE: Data on class of crime is obtained from the Correctional Institution Management Information System (CIMIS). Class of crime data reflects the highest class of crime for which an inmate has been committed. CIMIS reflects on its count inmates who are temporarily out of the institution on writs, bonds, or furloughs. Also, data entry delay may cause some discrepancy with other counts.

# SECTION I - ADULT FACILITIES

9

Projected Adult Prison Population for each of the  
Succeeding Twelve Months Following each Reporting Date,  
Indicating All Assumptions Built into such Population Estimates

<u>Date</u>	<u>Projections based on Fiscal Year 1987 Data</u>
July 1988	20,617
August 1988	20,734
September 1988	20,781
October 1988	20,916
November 1988	20,920
December 1988	20,924
January 1989	21,034
February 1989	21,022
March 1989	21,117
April 1989	21,225
May 1989	21,278
June 1989	21,293
July 1989	21,356
August 1989	21,325
September 1989	21,347
October 1989	21,441

These revised population projections reflect DOC's efforts to improve upon its methodology to project prison population using a simulation model. Conceptually, the model is designed around the movement of individuals through the prison system. The data reflects fiscal year 1987 experiences. The underlying assumptions are:

1. New felony and life admissions (direct from court) were based on a demographic admission rate at the fiscal year 1987 level.
2. Defaulter admissions (technical violations and new offense violators) were based on the probability (violation rate) that 25% of all inmates on supervision will violate supervision and be returned to prison; of which 50% will be new offense violators and 50% will be technical violators. This assumption is based on fiscal year 1988 lay offs of parole agents.
3. Admissions were seasonally adjusted based on past 4 years average percentage distribution by month and the number of delivery days in each month for 1987.
4. Class of crime distributions were based on actual distributions of admissions by class of crime for fiscal year 1987 as reported in CIMIS.
5. Sentence estimates for new admissions were based on the fiscal year 1987 actual distribution of sentence lengths by class of crime. This data was obtained from CIMIS.
6. Assumed all inmates will receive all their day-for-day good time.
7. For new admissions, there is a probability that 26% will have some good time revoked and 62% will have some time restored, while 39% will have all restored. This is based on fiscal year 1987 CIMIS data.
8. Jail credits and probation credits were based on actual admission distribution of fiscal year 1987 CIMIS data by class of crime.
9. Assumes an average of 70 days of MGT per inmate.
10. Projected exits for inmates in the current population as of June 30, 1987, were based on the sentence calculation module of CIMIS. For those with indeterminate sentences, it was assumed those inmates who have yet to see the Prisoner Review Board on their minimum sentence will exit on their minimum, while those having already passed their minimum will exit on their projected maximum release date.

NOTE: CIMIS refers to Correctional Institution Management Information System.

December 1989	1,440
January 1990	1,440
February 1990	1,426
March 1990	1,396
April 1990	1,387
May 1990	1,363
June 1990	1,344

These population projections reflect DOC's efforts to improve upon its methodology to project juvenile institutional book count using a simulation model. Conceptually, the model is designed around the incarceration process of youths committed to IDOC. The data reflects fiscal year 1985 experiences. The underlying assumptions are:

1. Projected admissions based upon 1985 state demographics would remain stable over the next five years.
2. Delinquent youth currently in institutions will exit within two months of their scheduled administrative review date.
3. Time left to be served by the existing parolees is based upon the assumption that future releases from parole will continue at the fiscal year 1985 rate.
4. Use of the model's output involves the assumption that the institutional resident count will remain equal to or near the rated capacity. Use of the output will include subtracting capacity and temporary absences from book count.

Date	Projected Book Count	Average AP, AC, UA	Average EA	Number in Residence	Date	Projected Book Count	Average AP, AC, UA	Average EA	Number in Residence
July 1988	1,448	-113	-95	1,240	July 1989	1,414	-113	-95	1,206
August 1988	1,467	-113	-95	1,259	August 1989	1,422	-113	-95	1,214
September 1988	1,458	-113	-95	1,259	September 1989	1,436	-113	-95	1,228
October 1988	1,472	-113	-95	1,250	October 1989	1,436	-113	-95	1,222
November 1988	1,482	-113	-95	1,274	November 1989	1,443	-113	-95	1,235
