Alcohol and Drug Abuse Directors

Bureau of Justice Assistance
633 Indiana Avenue, N.W., Washington, D.C. 20531
(202) 272-6838

The Assistant Attorney General, Office of Justice Programs, coordinates the activities of the following program Offices and Bureaus:
National Institute of Justice, Bureau of Justice Statistics, Bureau of Justice Assistance, Office of Juvenile Justice and Delinquency
Prevention, and Office for Victims of Crime.
I am pleased to present this manual for instructing the case management model, Treatment Alternatives to Street Crime (TASC). The Bureau of Justice Assistance (BJA) has identified TASC as one of 11 "certified" programs eligible for block grant funding under the Justice Assistance Act of 1984 and the Anti-Drug Abuse Act of 1986. BJA's program brief for TASC identifies 10 program elements and performance standards as "critical" to the proper operation of a TASC program.

This manual is designed to teach the fundamentals of the TASC critical elements and how to effectively perform each. New staff will find the course an excellent orientation to the case management concept. Experienced staff will find the course a valuable review.

Sincerely,

[Signature]

Charles P. Smith
Director

The contents of the TASC Critical Elements Training Course represent the joint efforts of many contributors. Portions of the course were written by Chet Bell, Foster Cook, Joe Infantino, Harvay Landress, Kate Nielsen-Nunez, Tom Turner, Beth Weinman, and myself. Many of these individuals served as reviewers of various drafts and served as faculty for the field test of the course. John Gregrich and Jody Forman, Bureau of Justice Assistance project officers, also provided technical support and assistance in the development of the course.

Thanks are also due to Carrie Gibson and Kari Bean who provided secretarial support. Marion Ciaccio served as editor of the manuals and Majken Peterzen as graphic artist and layout specialist.

All of the above contributed significantly in the development and production of this course and the manuals. Their contributions are appreciated.

Mark P. Fontaine
Florida Alcohol and Drug Abuse Association
Introduction

The goal in designing this training package was to create a vehicle for instructing new staff in the "critical elements" of TASC. The critical elements are those activities and relationships that are unique to the TASC model.

TASC Critical Element Training has been developed by the Florida Alcohol and Drug Abuse Association (FADAA) for the National Association of State Alcohol and Drug Abuse Directors (NASADAD) under a cooperative agreement with the U.S. Department of Justice. Each of the contributors to the development of this training package has worked in TASC for a minimum of three years. The package has been written, revised, field tested and again revised in an effort to obtain a training design which covers all of TASC's conceptual bases in a stimulating format.

TASC is maturing as a field, and this training package is designed to make TASC a permanent intervention model for intervening with drug-dependent offenders while fostering an orthodoxy among TASC sites which will serve to give all TASC projects a common language and philosophy. Finally, this training provides participants an opportunity to experience TASC as a generic model flexible enough to respond to the particular needs and demands of a local community.

This manual is designed to be a working tool for you. Space is provided to take notes and record information that will assist you in your job. Use the training to learn as much as you can about TASC. It's a proven effective model which offers the opportunity to create a synergy between criminal justice and treatment providers to benefit the drug-dependent offender in specific and the community in general.
Module I: INTRODUCTION

PURPOSE
This session is designed to familiarize you with the other participants in the training and with the contents of the course.

OBJECTIVES
By the end of this session you will be able to:
- List at least five topic areas to be covered in the course
- State times that training days will begin and end
1. Name two types of frequently used urinalysis confirmation tests.

2. List the three client eligibility criteria generic to most TASC programs.

3. The best metaphor to describe TASC’s linkage with criminal justice and treatment is

4. List five of the ten TASC critical program elements.

5. Five of the critical elements may be described as _______________, while the other five are described as

6. List 8 common stages in the processing of defendants by the criminal justice system.

7. Two benefits of TASC intervention to the criminal justice system include _______________ and _______________.

8. Formal agreements between TASC and justice agencies should include ____________ and ____________

9. List three major drug abuse treatment program modalities.

10. List two barriers to good working relationships between TASC and treatment.

11. List two variables which can affect the development of local eligibility criteria.

12. List three components of a TASC screening interview.

13. List six components of an assessment interview.
TASC CRITICAL ELEMENT TRAINING
PRETEST (CONT)

14. List three variables which affect TASC’s treatment referral capability

15. Define the term "case management."

16. Describe the most common TASC strategy for assisting clients who are in danger of termination from a treatment program.

17. List four documents which must be in the client file.

18. Define the term "chain of custody" as it relates to TASC.

19. List two types of technology available for urine testing.

20. List two differences between a general release of confidential information and a criminal justice release.

21. List two situations where information can be released about a client without his/her consent.

22. List five of the nine elements of a general release of information.

23. Where are confidentiality regulations published?

24. List three populations other than adult drug abusers where the TASC model has been proven effective.

25. List two problems associated with urine collection.

Module II: UNDERSTANDING TASC

PURPOSE
This module is designed to provide you with an understanding of the TASC concept and how the program acts as a bridge between the criminal justice and drug treatment systems.

OBJECTIVES
By the end of this session you will be able to:

- Describe the TASC model through the use of a bridge analogy
- List the three primary client eligibility criteria necessary to receive TASC services
- List and define TASC's four basic services
TASC
ELIGIBILITY CRITERIA

JUSTICE SYSTEM INVOLVEMENT

SUBSTANCE ABUSE INVOLVEMENT

CLIENT PROVIDES INFORMED, VOLUNTARY CONSENT TO PARTICIPATE IN TASC
The TASC Bridge

Justice System
- legal sanctions
- community safety
- punishment

Treatment System
- therapeutic relationship
- changing individual behavior
- reducing personal suffering
TASC SERVICES

IDENTIFICATION
The process of locating drug-involved offenders who are potentially eligible to participate in a substance abuse treatment program.

ASSESSMENT
Evaluation or appraisal of a TASC candidate's suitability for substance abuse treatment in a specific treatment modality/setting, giving full consideration to current and past use/abuse of drugs, justice system involvement, medical, family, social, education, military, employment and treatment histories.

REFERRAL
To submit data gathered on an offender to a substance abuse treatment agency for its consideration of accepting the individual into treatment. Further, the process of physically linking the client with the treatment provider.

CASE MANAGEMENT
An approach to working with clients that includes functions of planning, linking advocating, monitoring and assessing the client's progress in TASC and treatment.

Understanding TASC - A Summary

JUSTICE AND TREATMENT HAVE DIFFERENT ORIENTATIONS AND METHODS OF OPERATION

TASC FACILITATES COMMUNICATION AND COORDINATION BETWEEN THE TWO SYSTEMS

TASC CAN BE SEEN AS A BRIDGE THAT LINKS THESE SYSTEMS

TASC SERVICES THAT LINK THESE SYSTEMS ARE IDENTIFICATION, ASSESSMENT, REFERRAL AND CASE MANAGEMENT

THERE IS NO TYPICAL CLIENT, BUT ALL CLIENTS SHOULD BE LEGALLY INVOLVED SUBSTANCE ABUSERS AND WILLING TO PARTICIPATE IN TASC VOLUNTARILY
Module III: TASC HISTORY AND CRITICAL ELEMENTS

PURPOSE
This module is designed to review the history of the TASC concept and the critical program elements that make up TASC. It will provide a framework for understanding how TASC developed, why the concept has proven effective, and what essential elements are necessary for a program to be called TASC.

OBJECTIVES
By the end of this session you will be able to:

- List four key steps in the development of the TASC concept
- List at least five TASC Critical Program Elements
- Take three TASC critical program elements and list two performance standards used to measure compliance with the element
OUTLINE HISTORY OF TASC

1962 - Robinson v. California

1970 - Special Presidential Commission on Drugs

1971 - Special Action Office for Drug Abuse Prevention developed initial TASC program model

1972 - Law Enforcement Assistance Administration (LEAA) funded the first TASC site in Wilmington, Delaware

1973 - National Institute on Drug Abuse (NIDA) funded eight TASC sites, LEAA an additional five sites

1974 - All TASC funding consolidated under LEAA. First evaluation study conducted

1975 - 29 TASC sites operational in 24 states

1976 - Guidelines expanded to admit clients whose sole drug of abuse was alcohol

1978 - Second evaluation study completed
OUTLINE HISTORY OF TASC (CONT)

1979 - LEAA provided additional TASC funding - statewide programs developed in Arizona, Florida, Illinois, Michigan, New Jersey, Oklahoma, Pennsylvania

1980 - LEAA abolished, federal funding terminated,
1984 state and local agencies responsible for continuation

1984 - Justice Assistance Act passed by Congress with TASC cited as a model eligible for funding

1985 - Bureau of Justice Assistance makes block grants available to states to begin new or enhance existing TASC programs

1986 - Congress passes Drug Enforcement, Education and Control Act providing additional block grants

1986 - BJA funds available for training and technical assistance to TASC programs

1989

9 URINALYSIS

10 CASE MGMT REPORTING/TERMINATION
TASC CRITICAL ELEMENTS

ORGANIZATIONAL ELEMENTS

1. BROAD BASED SUPPORT BY THE JUSTICE SYSTEM

Performance Standards:
A. Formal agreements outlining responsibilities and expectations for TASC and criminal justice agencies

B. Clear procedures for communication - reports, schedules, etc.

2. BROAD BASED SUPPORT BY THE TREATMENT COMMUNITY

Performance Standards:
A. Formal agreements outlining responsibilities and expectations for TASC and treatment agencies.

B. Satisfaction of state licensing requirements (if appropriate)

C. Clear procedures for communication - reports, schedules, etc.

3. AN INDEPENDENT TASC UNIT WITH A DESIGNATED ADMINISTRATOR

Performance Standards:
A. TASC an independent agency or a separate unit of the host agency

B. A full-time qualified administrator

4. POLICIES AND PROCEDURES FOR REGULAR STAFF TRAINING

Performance Standards:
A. A plan which assures 32 hours of relevant training for all TASC staff

B. Agency policies and procedures available to all staff

5. A MANAGEMENT INFORMATION - PROGRAM EVALUATION SYSTEM

Performance Standards:
A. Defined standardized reports for data collection

B. Collection of data on:
   - number of clients identified/referred/accepted from different justice agencies
   - client profile information
   - amount/type of client termination outcomes
   - services provided by TASC staff

C. Analysis of data, use in evaluation and reporting to administration and staff
6. CLEARLY DEFINED CLIENT ELIGIBILITY CRITERIA
Performance Standards:
A. Client eligibility criteria that must include at minimum:
   - justice involvement, current and/or previous drug dependence, voluntary,
     informed consent.
B. Regular review of program compliance with criteria

7. SCREENING PROCEDURES FOR EARLY IDENTIFICATION OF TASC CANDIDATES WITHIN THE JUSTICE SYSTEM
Performance Standards:
A. Methodology for client identification
B. Screening procedures that emphasize early intervention and early release

8. DOCUMENTED PROCEDURES FOR ASSESSMENT AND REFERRAL
Performance Standards:
A. Face-to-face interview
B. Adherence to eligibility criteria
C. Referral to/acceptance by treatment within 48 hours of TASC assessment
D. Development of contingency procedures for monitoring clients if treatment
   not immediately available

9. POLICIES, PROCEDURES AND TECHNOLOGY FOR MONITORING TASC CLIENTS' DRUG USE/ABUSE STATUS - INCLUDING URINALYSIS OR OTHER PHYSICAL EVIDENCE
Performance Standards:
A. Urinalysis procedures which maintain chain of custody
B. Specified testing frequency for each level of participation
C. Formal contracts with certified or licensed laboratories

10. MONITORING PROCEDURES FOR ASCERTAINING CLIENT COMPLIANCE WITH ESTABLISHED TASC AND TREATMENT CRITERIA AND REGULAR PROGRESS REPORTING TO REFERRING JUSTICE SYSTEM COMPONENTS
Performance Standards:
A. Clear success/failure criteria
B. Individual client treatment and TASC case management plans
C. Reporting procedures
D. Freestanding TASC client files which document program progress
Module IV: ESTABLISHING BROAD BASED SUPPORT OF THE JUSTICE SYSTEM

PURPOSE
This module is designed to provide participants with an overview of the criminal justice system, how TASC can effectively integrate with that system and how to establish and maintain necessary communications and strong linkages between TASC and criminal justice.

OBJECTIVES
By the end of this session you will be able to:

- List at least eight stages of criminal justice processing
- Describe the process by which TASC can intervene in at least three of those stages
- Identify four TASC benefits to the criminal justice system
- List five techniques for effective jail work
- List five strategies for complying with court protocol
STAGES OF CRIMINAL JUSTICE PROCESSING
COMMON CRIMINAL JUSTICE TERMS

RAP SHEET

DOCKET

FELONY

MISDEMEANOR

SPEEDY TRIAL

COURT ORDER

DIVERSION

ROR

BAIL

BOND

PLEA BARGAIN

CAPIAS/WARRANT

NOLO CONTENDRE
RATIONALE FOR
EARLY TASC INTERVENTION

• Reaches client at point of greatest needs and highest motivation level

Provides maximum information to court at time of sentencing

Saves money, time and resources for both corrections and the courts

Increases likelihood of successful TASC and treatment participation

Strengthens client motivation for treatment
TASC BENEFITS TO
CRIMINAL JUSTICE SYSTEM

JAILS
Reduces tension
Reduces discipline problems
Reduces overcrowding

COURTS
Focuses resources
Provides additional information on defendants

PROBATION AGENCIES
Additional supervision
Assistance in linking clients with treatment

PAROLE AGENCIES
Assures continuity of care after release

COMMUNITY
Reduces costs
Increases public safety
Reduces criminal activity
Reduces drug abuse
ELEMENTS OF COOPERATIVE AGREEMENTS WITH CRIMINAL JUSTICE AGENCIES

TASC AGREES TO:

A. Specific points of intervention  
B. Time frames for action on referrals  
C. Frequency of client contact  
D. Frequency of client progress reports and info in reports  
E. Time frames for notification of client termination, client disappearance, etc.  
F. Criteria for termination from TASC

CRIMINAL JUSTICE AGENCY AGREES TO:

A. Provide access to booking logs and other identification materials  
B. Provide interviewing space  
C. Access to jail  
D. Access to inmates  
E. Provide appropriate response to notification of client success and/or failure in treatment  
F. Refer eligible clients to TASC consistently  
G. Provide personnel to support TASC in an advisory role
Progress Reports - provided on a regular basis whether weekly, monthly or other negotiated time frame. Provides outline of client progress toward specific objective criteria.

Warning Letters - notification to justice and client that the client's TASC status is in jeopardy. Letter should cite objective data that verifies problems and recommends corrective action(s).

Termination Letters - notification to justice and the client that client has been successful/failed to meet outlined criteria. Objective data to back up termination and date of termination are included.

Court Testimony - provision of oral or written information to the court regarding client progress.
Some Jail and Court Do’s and Don’t's

DO:

Learn and respect jail and court policies, procedures and schedules

Maintain a professional demeanor with clients, correctional officers, attorneys, judges, probation officers, etc. at all times

Dress appropriately at all times – especially in court

Use stipulations and draft orders to obtain court action

Advise the bailiff of your business upon entering the courtroom

DON’T

Joke about crime or drugs with prisoners

Make comments about criminal justice staff or inmates to others

Be drawn into discussions with clients about complaints of unfair treatment or give advice to clients about problems outside of those which are directly TASC-related

Violate confidentiality of clients

Speak in court unless requested by the court
Module V: BUILDING BROAD BASED SUPPORT OF THE TREATMENT SYSTEM

PURPOSE
This session is designed to provide you with an overview of substance abuse treatment modalities and regimens. Further, to explore and identify how TASC can work effectively with the treatment system.

OBJECTIVES
By the end of this session you will be able to:

- Provide a definition of substance abuse treatment and list at least four major substance abuse treatment modalities

- Describe three concepts that TASC can utilize to develop and maintain good relationships and communication with treatment

- Identify three potential barriers to good relationships and communication between TASC and treatment providers

- List five issues which must be clarified in letters of agreement between TASC and treatment providers
SUBSTANCE ABUSE TREATMENT MODALITIES

**Detoxification**— Structured medical or social milieu in which individual is monitored while undergoing withdrawal from the acute physical and psychological effects of addiction.

**Methadone Treatment**— outpatient mode for opiate-dependent persons. Counseling, urinalysis and supervised dispensing of methadone.

**Long-Term Residential**— inpatient, 6-24 months duration with increasing levels of responsibility and privilege. Often in three major phases of treatment including inpatient, live-in/work-out and re-entry.

**Short-Term Residential**— e.g., 28 day inpatient, although may be as long as 90 days and may include detox as first phase.

**Halfway House**— transitional facility where client lives on-site while involved in work, school, training, etc., off premises.

**Day Treatment**— Client resides at home while attending counseling/treatment 4-8 hours per day, 5-6 days per week.

**Drug Free Outpatient**— client sees therapist 1-5x/wk for counseling, may include individual, group and family therapy.

**Support Groups**— self help peer groups such as NA, AA, ACOA, etc. Meetings widely available in community at no cost.

**Education Groups**— seminars, specific interest meetings designed for increased awareness regarding an issue.

**Family Education Groups**— structured education groups to inform family members of issues regarding chemical dependency.

**Auxiliary Services**— supplemental services provided outside of treatment, e.g., job placement, training, food stamps, vocational rehabilitation.
ELEMENTS OF COOPERATIVE AGREEMENTS WITH SUBSTANCE ABUSE TREATMENT PROGRAMS

TASC AGREES TO:

A. Provide intervention support
B. Provide assessment information with all referrals
C. Provide case management regarding client’s criminal justice issues.

TREATMENT AGENCY AGREES TO:

A. Provide treatment slots for TASC clients
B. Provide reports of client progress in treatment to TASC
C. Notify TASC of:
   missed appointments
   elopement
D. Provide intake in a timely fashion
Treatment Alternatives to Street Crime

Letter of Agreement with ____________________________

When duly signed this letter constitutes an agreement between Treatment Alternatives to Street Crime, herein referred to as "TASC," and ____________________________ herein referred to as the "Provider."

I. The Provider agrees that as long as it has treatment vacancies available it will accept clients who qualify for its treatment referred by TASC.

II. The provider shall provide the necessary materials, facilities, services and qualified personnel to furnish treatment and rehabilitation to substance abusing offenders in accordance with the following: [Here should be inserted a brief description of the provider's services; the description should include]:
   A. The name, mailing address, location(s) and telephone number of the provider
   B. The type(s) of service provided
   C. The provider's hours of operation
   D. The provider's criteria or requirements for admission
   E. The person(s) to be contacted in making a referral
   F. The procedures to be followed in making a referral
   G. Fees to be paid by clients

III. TASC shall provide the necessary materials, facilities, services and qualified personnel to furnish identification, assessment, referral and case management of alcohol and drug-dependent offenders in accordance with the following [include the following information about TASC]:
   A. The name, mailing address, location(s) and telephone number of TASC
   B. The purposes of TASC intervention
   C. Services provided
   D. Hours of operation
   E. Physical environment
   F. Criteria for admission to TASC
   G. Termination procedures
   H. Relationships with court and other agencies
   I. How referrals are made to TASC

IV. TASC and the provider agree to promptly communicate in writing to one another any substantial change in their services as described above.
V. Reporting procedures
A. Provider will notify TASC immediately if client absconds or fails to appear.
B. TASC will contact the provider at least once each week to confirm client attendance.
C. TASC will send to the provider on or before the 20th of each month a Monthly Report Form for each client.
D. Provider counselor will complete the report and return it to TASC case manager by the 30th of the month.
E. TASC case managers will discuss each client with the client's counselor at least once each month.
F. TASC case managers will directly contact clients as necessary.
G. In situations where termination of a TASC client from treatment is warranted, the provider will discuss (when possible) the incident with the TASC case manager prior to the decision to terminate the client.

VI. TASC and the provider agree to fully discuss and put in writing specified allegations of any breach in this agreement prior to taking any action as outlined in the following sanctions:
A. Breach of this agreement by TASC may result in the refusal of the provider to accept subsequent TASC referred clients and the termination of the provider's responsibility to provide the services listed in Section II.
B. Breach of this agreement by the provider may result in TASC's refusal to refer future TASC clients to the provider and the removal of existing TASC clients from the provider for placement in other clinics.

Module VI: CLIENT IDENTIFICATION AND SCREENING

PURPOSE
This module is designed to provide a rationale for the development of clear client identification and screening protocols and to allow you to practice skills in eligibility determination and screening.

OBJECTIVES
By the end of this session you will be able to:

- Identify the three minimum eligibility criteria for use in any TASC program
- Describe the process of developing local eligibility criteria
- List four variables which must be addressed in developing eligibility criteria
- List six elements of a TASC screening interview
- Identify four issues which must be addressed in developing the screening interview document and format.
CLIENT IDENTIFICATION METHODS

REVIEW ARREST REPORTS, BOOKING LOGS, COURT DOCKETS

DEVELOP RELATIONSHIPS WITH JAIL PERSONNEL. GET THEM TO "THINK TASC" AND PROVIDE YOU WITH REFERRALS

SET UP TASC INFORMATION/ORIENTATION GROUPS IN THE JAIL

PUT UP TASC POSTERS IN POLICE STATIONS, BOOKING AREAS AND CELLBLOCKS

PROVIDE INFORMATION ON TASC SERVICES TO THE LOCAL BAR ASSOCIATION
ELEMENTS OF THE SCREENING INTERVIEW

- Demographic Information

- Interview Information (when, where)

- Arrest Data and Current Legal Status

- Prior Arrest History

- Drug Use History

- Drug Abuse Treatment History

- Explain TASC Services

- Obtain Client Consent to Services

- Obtain Releases of Information

- Screener's Comments and Recommendation

- Screener's Signature
Screening Considerations

Verify information
- Don’t take the client’s word regarding criminal and treatment history
- Talk with a family member or other significant person in the client’s life to verify family information
- Talk with probation officers, attorneys, correctional officers who may have dealt with the client in the past
- Talk with arresting officer

Clearly explain TASC services to the offender
- Explain both benefits and requirements of TASC
  Benefits:
  - May facilitate release from jail
  - May facilitate entry into a treatment program
  - Representation by TASC at court appearances
  Requirements:
  - Attendance at treatment
  - Drug free
  - Avoidance of criminal behavior

Location of screening
- Provide privacy
- Provide dignity
- Reduce stress and anxiety

Assure confidentiality
- Protect client rights
- Obtain releases of information
- Reassure client that screening information is confidential
Module VII: ASSESSMENT AND REFERRAL

PURPOSE
This module is designed to provide you with the tools to conduct an assessment of client needs and to provide an understanding of the mechanics of matching treatment needs with available treatment modalities.

OBJECTIVES
By the end of this session you will be able to:

- Define six terms related to assessment and referral
- List six of the eleven critical components of an assessment
- Conduct a client assessment employing at least six of the eleven critical assessment components
- Develop a treatment recommendation based on one of three simulated case scenarios
Terms

Assessment - appraisal of an individual, with a goal of making recommendations for corrective action of problem behaviors

Psychosocial History - a collection of historical information including social functioning and mental status of the individual

Motivation - desire to act or change

Diagnosis - the labeling of a set of client attributes or symptoms

Referral - the act of recommending movement from one place to another
Assessment Interview Stages

Preparation
- Review existing data
- Note problem areas for exploration in assessment

Introduction
- Establish rapport
- Clarify role of assessor
- Elicit client's expectations
- Assure confidentiality

Development
- Move questions from the general to specific
- Ask open-ended questions which require a subjective response
- Assess level of response – primarily on emotional or cognitive level
- Note attempts at denial, projection, blaming

Termination
- Clarify remaining questions
- Fill in gaps, discuss inconsistent responses
- Provide client feedback on your impressions
- Inform the client of what to expect next in the intake process
- Again reinforce confidentiality
- Document fully immediately after ending the interview
ASSESSMENT COMPONENTS

DRUG HISTORY
Frequency, intensity, duration
Primary drugs of abuse
Evidence of dependency

CRIMINAL HISTORY
# and nature of prior arrests
History of violence
Current legal status
History of failure to appear, escape, probation violation, etc.

MENTAL STATUS
Oriented to person, place, time
Ability to concentrate
Appropriateness of responses

TREATMENT HISTORY
# and type of prior treatment experiences
Treatment outcomes
Nature of referral to treatment

FAMILY HISTORY
History of neglect, abuse, criminality in family
History of substance abuse in family
History of psychiatric disorder
ASSESSMENT COMPONENTS (cont)

PERSONAL HISTORY
Childhood development
Critical life events, i.e., marriage, school, neglect, abuse, etc.
Military service

EDUCATIONAL HISTORY
Highest grade completed
Vocational training
Learning disabilities
Adjustment problems

EMPLOYMENT HISTORY
# and type of jobs during past 5 years
Job skills, training
Attitudes toward work

MEDICAL HISTORY
Family history of heart disease, cancer, etc.
AIDS risk assessment
Medical checklist

SUPPORT SYSTEMS
Peers
Employment
Community activities

ASSESSMENT SUMMARY - RECOMMENDATION
### Mental Status

Note below anything you notice during the assessment which would indicate that the client may be in need of further assessment for potential mental health problems. This would include impairment in memory, inappropriate responses to questions, descriptions of hallucinations, etc. Also note if the client appears to be depressed, expressed any suicidal thoughts, was excessively anxious, angry or aggressive.

# Psychosocial Assessment

1. **Physical Description of Client** (include ht, wt, hair & eye color, distinguishing marks)

2. **Previous Treatment History:**
   - Program Name
   - Location
   - Modality
   - Contact Person
   - Admit Date
   - Discharge Date
   - Comments:

3. **Family History** (include parents, siblings, spouse, children, hx of substance abuse, mental health tx, hx of physical or sexual abuse, critical family incidents):

4. **Personal History** (client's assessment of critical incidents, strengths, weaknesses and assessment of self as seen by parents, siblings, spouse):

5. **Current Support System** (individuals and institutions)

6. **Educational History**

7. **Employment History** (include # of jobs and # of months employed in past two years)

8. **Marital History** (include # and duration)

9. **Military History**

10. **Medical History** (include developmental, hospitalizations, major illnesses, allergies, current meds)

11. **Additional Comments/Impressions/Summary/Treatment Recommendations**
REFERRAL ISSUES

1. Knowledge of available treatment resources

2. Admission criteria of treatment resources

3. Costs

4. Contact persons

5. Description of program activities and rules for the client
Module VIII: CASE MANAGEMENT

PURPOSE
The purpose of this module is to communicate to you basic methods of effective case management and tracking of the client's progress through the criminal justice and treatment systems.

OBJECTIVES
By the end of this session you will be able to:

- Identify at least three of the five case management functions
- Provide at least three intervention strategies available to case managers
- Define the terms "case conference" and "jeopardy status"
- Write a client progress report which contains at least 60% of the required reporting elements
- Provide at least three examples of information which will assist the court in case disposition
Case Management Services

Assessment

Planning

Linking

Monitoring

Advocacy
Implementing Case Management Services

Identify, locate and assess needs of target population

Identify and train key actors in justice and treatment

Identify treatment resources and develop referral agreements

Identify ancillary resources in the community

Operationalize eligibility criteria
Factors Affecting the Quality of Case Management

Caseload

Office Location

Decision-Making Power of Case Manager

Availability and Accessibility of Services
The Case Management Continuum

1. Client is accepted in TASC

2. TASC facilitates placement of the client into treatment

3. TASC client is accepted into treatment

4. Maintenance of TASC program success/failure criteria

5. Identification of "flags" that may signal client failure

6. Monitoring of client progress/behavior

7. Reporting client progress to criminal justice

8. Providing ancillary referral services

9. Client is terminated from TASC
Monitoring Issues

Tasc Client Orientation

Contact with Caseload

Reporting

Unsuccessful Termination

Successful Termination

Termination from Treatment - not TASC

Date: ____________________________
Case Conference

Definition: An activity which serves to facilitate a client's movement in treatment or positively out of the system.

Criteria for Calling a Case Conference

Case Conference Participants

Case Conference Preparation

Case Conference Follow-up
Alert/Jeopardy Status

Definition: A means of warning the TASC client that he/she has taken a step toward unsuccessful termination

Example Criteria for determining alert/jeopardy status:

- Continued use of drugs as evidenced by urinalysis
- Failure to appear for appointments at TASC or treatment
- Violations of treatment program regulations
Notes on Case Conference Role Play
Module IX: URINALYSIS TESTING

PURPOSE
This session is designed to inform you of the need for detailed policy and procedures regarding urinalysis. Further, to educate you regarding the value of urinalysis in the identification, diagnosis, monitoring and management of TASC clients.

OBJECTIVES

Upon completion of this module you will be able to:

- List three TASC critical elements where urinalysis is utilized
- List at least two types of technology available for testing urine
- Differentiate between screening and confirmation tests
- List four activities involved in the chain of custody process
- Describe one method for implementing random urinalysis
- List at least three special considerations in urine monitoring and methods for addressing those problems
Currently Available Urinalysis Technologies

Screening Tests

Radioimmunoassay (RIA)

Enzyme Immunoassay (EMIT)

Therapeutic Drug Monitoring System (TDX)

Thin Layer Chromatography (TLC)

Confirmation Tests

Gas Chromatography (GC)

Gas Chromatography/Mass Spectrometry (GC/MS)

High Pressure Liquid Chromatography (HPLC)
Uses of Screening Tests

- Identification of the drug using offender
- Client confrontation
- Determining jeopardy status
- Confirmation that client is drug free

Uses of Confirmation Tests

- Confirm, reject screening test results
- Submission as evidence in court
Chain of Custody

1. Collection

2. Client-Specimen Identification

3. Testing

4. Reporting
Color Coded, Random Urinalysis

Listed below are the instructions you will follow in TASC's Color Code Urinalysis System. Through cooperating with this program you can help yourself by proving to the criminal justice system that you are drug free.

1. You will be assigned a color by your TASC case manager

2. You will call the following number every day including Saturday and Sunday (you may call any time day or night)

3. A recording will give you the color of the day. If your color comes up, you will report to the TASC office the next day to leave a urine specimen (For example: you call on a Monday. Your color is given on the recording. You will then come in on Tuesday to leave a specimen.)

4. Urine specimens are collected by a nurse from 6 a.m. to 11 a.m. and 1 p.m. to 6 p.m. on weekdays, and on Saturday and Sunday from 9 a.m. until 12 noon. We provide for observed and verified collections to support our testimony in court.

5. When you come in for urinalysis, you will be required to pay for the cost of processing the sample.

The Color Code System is designed to help you by:

- Giving you a daily reminder of your decision to stay away from drugs

- Making it necessary to give up your habit entirely since this system is random, and you will never know when your color is coming up

- Helping TASC feel confident in providing a positive, good report of your progress to the courts.
Module X: RECORDKEEPING/DATA COLLECTION

PURPOSE
This module is designed to introduce you to the need for clear and complete recordkeeping, as well as its benefits in charting client progress and ensuring TASC credibility.

OBJECTIVES

By the end of this session you will be able to:

- List two different kinds of information needed from a client record by a TASC Case Manager

- Identify three negative situations that could result from poor/incomplete recordkeeping
Recordkeeping Plan

1. Standard Terms to be Used

2. What Data are Needed?
   Data Collection and Entry Procedures

3. Logical Structure
Elements of Good Case Notes

Objective Information

Clarity

Conciseness

Summary of Activity

Avoid in Case Notes

Subjectivity

Personal Bias

Hearsay/Unfounded Information

Failure to indicate date, time and location of interaction with client and method of interaction (personal, telephone or correspondence)
File to Include

- A copy of original assessment

- A copy of original recommended plan sent to treatment prior to client's acceptance

- A copy of court order (if appropriate)

- Signed consents and client agreements

- Case management notes that relay the client's case history including:
  * All contacts, both face-to-face and telephone
  * Face-to-face and telephone conversations with client's counselor
  * All urinalysis submissions
  * Any alert notices, court appearances, case conferences, etc.
  * All referral efforts or contacts made for ancillary services
  * All other conversations about client within confines of confidentiality laws
  * Any efforts made to contact client, justice or treatment personnel
  * Any verification regarding client employment, school, hospitalization, etc.

- All monthly progress reports

- All client related correspondence
Exercise: Recording Progress Notes

32 year old Larry has been involved in TASC for three weeks. Below is a transcript of his meeting today with his case manager.

Larry:
I've been in the program for three weeks now and already you are on my back about how many times I have to piss in the damn bottle.

Case Manager:
Well, Larry, as we discussed in your case plan, you will be required to submit to random urinalysis on a weekly basis.

Larry:
I don't care what the tests say. I haven't done any damn toot since I was arrested.

Case Manager:
Larry, the tests conducted have each tested positive for cocaine. What do you have to say about that?

Larry:
Nuthin.

Case Manager:
Larry, you are also aware that participation in group counseling is also a required part of your treatment program.

Larry:
Yeah, tell that to my foreman. I lost my job and then I lost my ride.

Case Manager:
You lost your job this week, yet you missed group the first two weeks you were in the program; and, as I recall, you had no trouble riding over for urinalysis, in your car, during the same period.

Larry:
Yeah, I forgot that I had group on the same day you wanted some piss.
The New TASC Client (Cont)

Case Manager:
Larry, can you also account for not checking in with the employment agency, as we discussed last week?

Larry:
I told you - no ride.

-----------------------------

Based on the above information, write a progress note in Larry's record.

---------------------------------------------------------------------
Exercise: Case Record Scenario

Scenario A:

Background and Case Plan:
- 33 year old white male
- entered treatment July 1985 for poly-drug abuse
- Treatment includes:
  1. Outpatient sessions
  2. Random urinalysis
  3. Group activities

Case Notes:
- July through October, client attended outpatient and group as assigned
- Stopped attending in November, TASC case manager tried to contact. No contact made
- Client returned to treatment on November 15. Alert/jeopardy notice issued
- Four urine specimens positive for cocaine
- February 4 - second alert/jeopardy notice issued
- February 8 - case conference held
- Client attends group
- March 6 threatens another client in group
- March 7 client terminated

Scenario B:

Background and Case Plan:
- 33 year old white male
- Entered treatment 7/20/85. Primary drug of abuse: cocaine
- Treatment schedule:
  1. Outpatient substance abuse counseling 2x/wk at New Horizon, counselor: Roger Johnson
  2. 1 urine specimen at TASC each week
  3. One outpatient group per week at New Horizon

Case Notes:
July:
- attended outpatient sessions 7/21, 7/23, 7/26, 7/29
- Urinalysis tested negative on 7/22, 7/28
- attended group 7/25, 7/30 good participation
Exercise: Case Record Scenario (cont)

August:
- attended outpatient sessions 8/2, 8/5, 8/9, 8/12, 8/16, 8/19, 8/23, 8/26
- urinalysis tested negative on 8/4, 8/11, 8/18, 8/25
- attended group 8/3, 8/10, 8/17, 8/24 - good participation

September:
- attended outpatient sessions 9/2, 9/5, 9/9, 9/12, 9/16, 9/19, 9/23
- urinalysis tested negative on 9/7, 9/12, 9/20, 9/28
- attended group 9/1, 9/8, 9/15, 9/22 - good participation

October:
- attended outpatient sessions on 10/2, 10/5, 10/9, 10/12, 10/16, 10/19, 10/23, 10/26
- urinalysis tested negative on 10/4, 10/11, 10/18, 10/25
- attended group on 10/3, 10/10, 10/17, 10/24

November:
November 10: Client has failed to attend any group activity since October 24. Attempts to contact client on 10/25, 28, 30. No contact made by this writer.
- attended outpatient sessions on 11/1, 11/4, 11/8, 11/15, 11/22, 11/29
- missed sessions on 11/11, 11/17, 11/21, 11/24
- attended group on 11/21, 11/28.
- urinalysis - no testing on 11/2, 11/10,
  tested positive for cocaine 11/20
  tested negative 11/28

December:
- attended outpatient sessions on 12/2, 12/4, 12/8, 12/11, 12/14/, 12/19, 12/22, 12/27, 12/29.
- tested negative on 12/2, 12/14, 12/20, 12/26
  tested positive for cocaine on 12/7 - probation notified
- attended group on 12/4, 12/11, 12/18, 12/26
Exercise: Case Record Scenario (Cont)

January:
- attended outpatient sessions on 1/3, 1/5, 1/9, 1/16, 1/22, 1/25, 1/28
  missed sessions on 1/11, 1/14, 1/20
- tested negative on 1/5, 1/12, 1/25
  tested positive for cocaine on 1/18, 1/30
- failed to appear for group counseling

February:
February 4: Second alert/jeopardy notice issued
February 8: Case conference held with client, case manager, probation officer
and New Horizons counselor. Client restored to original treatment plan of
weekly urinalysis, outpatient counseling 3x/wk and group counseling 1x/week.
- attended outpatient sessions on 2/8, 2/9, 2/11, 2/17, 2/28
  missed sessions on 2/14, 2/15, 2/20, 2/24
- tested negative on 2/8, 2/15, 2/20, 2/26
- failed to appear for group counseling

March:
- tested positive for cocaine on 3/1, 3/3
- failed to appear for individual sessions on 3/4, 3/5
- threatened another client in group counseling session on 3/6
- terminated negatively 3/7
Module XI: CONFIDENTIALITY

PURPOSE
This module is designed to introduce you to the concepts of confidentiality in alcohol and drug abuse patient records. Also to be discussed is the application of these regulations in working with TASC clients.

OBJECTIVES

By the end of this session you will be able to:

- Describe what records are covered by the confidentiality regulations
- Describe what must be told clients about the confidentiality of their records
- List five of the nine elements that must be included in a general release of information
- Describe the differences between a general consent for release and a criminal justice release
- Describe the conditions where minors may sign their own releases
- List five of the seven situations where information can be released without a client's consent
- Describe the differences between a subpoena and a court order as they apply to the confidentiality regulations
- Describe the different conditions under which a court order may be granted to release confidential information
- Describe how to respond to a subpoena
Confidentiality of Alcohol and Drug Abuse Patient Records
(Sample Notice)

The confidentiality of alcohol and drug abuse patient records maintained by this program is protected by Federal law and regulations. Generally, the program may not say to a person outside the program that a patient attends the program, or disclose any information identifying a patient as an alcohol or drug abuser

Unless:
(1) The patient consents in writing
(2) The disclosure is allowed by a court order; or
(3) The disclosure is made to medical personnel in a medical emergency or to qualified personnel for research, audit, or program evaluation.

Violation of the Federal law and regulations by a program is a crime. Suspected violations may be reported to appropriate authorities in accordance with Federal regulations.

Federal law and regulations do not protect any information about a crime committed by a patient either at the program or against any person who works for the program or about any threat to commit such crime.

Federal laws and regulations do not protect any information about suspected child abuse or neglect from being reported under State law to appropriate State or local authorities.

All Releases of Information Must Contain

1. Name of person or program to make disclosure

2. Name of individual or organization to which disclosure is being made

3. Name of the patient

4. Purpose of the disclosure

5. How much and what kind of information is to be disclosed

6. Signature of patient and, when required, signature of parent or guardian of a minor

7. Date consent is signed

8. Statement that consent is subject to revocation

9. Date, event or condition upon which consent will expire, if not revoked before
Notice which must accompany any disclosure of patient records:

Each disclosure made with the patient's written consent must be accompanied by the following statement:

"This information has been disclosed to you from records protected by Federal confidentiality rules (42 CFR Part 2.) The Federal rules prohibit you from making any further disclosure of this information unless further disclosure is expressly permitted by the written consent of the person to whom it pertains or as otherwise permitted by 42 CFR Part 2. A general authorization for the release of medical or other information is NOT sufficient for this purpose. The Federal rules restrict any use of the information to criminally investigate or prosecute any alcohol or drug abuse patient."
Required Information for Criminal Justice Releases

A. Consent Authorized

B. Duration of Consent

C. Revocation of Consent

D. Redisclosure

Disclosures Without Patient Consent

1. Report of child abuse/neglect

2. Crimes on program premises or against program personnel

3. Medical emergencies

4. Research activities

5. Audit and evaluation activities

6. Qualified service organization

7. Court Orders
Case Studies in Client Confidentiality

Case 1: A counselor in an alcohol and drug abuse outpatient clinic indicates that she will resign at the end of the month. As program director, you are concerned about protecting confidentiality of all oral and written patient information to which this staff member has access. Develop appropriate procedures to ensure confidentiality.

Case 2: A student was suspended from all classes pending treatment for an apparent drug problem. He enrolled in a treatment program. The student completed the necessary treatment and sought readmission to high school. The principal now requests a report on his treatment and progress in the program.

Case 3: Two investigators from the FBI and Defense Intelligence Agency have appeared at your office wanting information on a former client with a long history of both criminal offenses and substance abuse treatment failures. They claim the client has applied for a job requiring top secret clearance, hence the investigation. They also claim a Federal law authorizes them to get whatever information is necessary to conduct their investigations. The investigators claim they believe the client was seen in your program because they found a 7 year old court order mandating the client to attend your program. What would you do?

Case 4: Seventeen year old Brad, who was convicted as an adult after his third felony drug charge, was assessed by TASC, referred and admitted to a day care program. His mother is calling to find out if Brad is attending treatment, since he hasn’t been home in two days and she’s extremely concerned. Your records don’t seem to have a release from Brad to speak with his mother, but you think he did sign one with the treatment program. Unfortunately, his counselor is not available. What would you do?
Case 5: An Assistant State Attorney investigating a double homicide calls you stating that one of your TASC clients is a suspect. He has been unable to locate the client and wants you to tell him the client's address. The State Attorney is insistent that unless you give him the information he wants, he will have you arrested for obstruction of justice. What do you do?

Case 6: You have received a telephone call from the father of a 20 year old client who is being seen this evening in outpatient group counseling. The father wants to know if his son can be reached in the session, as he needs to speak with him on the phone. What do you say?

Case 7: A former client was dropped from TASC because he had dirty urines and discontinued treatment. He is now in violation of his probation, and you are presenting testimony in court. While on the stand, the judge asks you to tell him about the client's childhood, his drug history and if the client ever admitted to committing any crimes for which he has never been arrested. What do you say?

Case 8: A client who is enrolled in methadone maintenance was injured in an accident on his construction job last year. The client applied for worker's compensation insurance because he has $2,500 in medical bills and missed three weeks of work. The insurance company refuses to pay claiming that he was a drug addict and that he was on methadone at the time of the accident. The insurance company is claiming that the methadone was the cause of the accident. You have received a subpoena from the insurance company to verify that the client is on methadone. The company is also asking for a complete copy of the client's treatment records. How do you respond?
Frequently Asked Confidentiality Questions

1. If a client discloses that he has knowledge about a serious crime (for example, murder or arson), what should be done? What if the client admits he committed such a crime but was never prosecuted?

ANSWER: No disclosure can be made by the program without the client's written consent or an authorizing court order (unless it involves child abuse, which must be disclosed in accordance with state law). The program can apply for a "good cause" court hearing which would permit the program to release information to the proper law enforcement agency. Section 2.63(a) (2) permits a court to order the release of this kind of information. It is advisable for programs to adopt policies to deal with dilemmas such as this, deciding in advance whether court orders will be sought to disclose information about extremely serious crimes. Clients should be oriented to these policies at admission.

2. If a client threatens to commit a crime, what should be done?

ANSWER: If the crime is threatened against the program or staff, this can be reported to local law enforcement authorities without violating the confidentiality regulations. If the threat is against a third person, a court order must be obtained in accordance with Sections 2.63 and 2.65. If the threat would result in immediate harm to a person, legal counsel should be immediately obtained. If counsel cannot be obtained, it is probably best to disclose the minimum amount of information necessary to protect the individual's safety. This is commonly known as the "duty to warn."

3. If it is suspected that a client is the victim of child abuse, can this be reported?

ANSWER: The Federal confidentiality regulations do not provide any protection for cases of suspected child abuse or neglect. All such incidents must be reported in accordance with state law.
Frequently Asked Confidentiality Questions (cont)

4. An agency refers an individual for services. Can requests be answered about whether the referred individual actually appeared?

**ANSWER:** If the initial referral was made by someone other than the client, the program may answer whether the person referred actually appeared. The program may not disclose whether the individual was admitted to the program, unless there is a signed release of information. If there is a court order for the individual to be seen at a program, whether the person appeared or not may be reported to the appropriate court officer (e.g., probation department).

5. Must I surrender my records to a law enforcement officer if served with a subpoena?

**ANSWER:** Section 2.61 states "The person may not disclose the records (of a client) in response to the subpoena unless a court of competent jurisdiction enters an authorizing order under these regulations." Thus, records should never be disclosed pursuant only to a subpoena. If a subpoena is received, an objection should be filed with the individual who authorized it, as well as with the appropriate court.

6. If a client signs a release for information to be disclosed from his record to a third party, must copies also be made available to the client if requested?

**ANSWER:** The Federal confidentiality regulations are silent on this point. Thus, applicable state law will determine the answer. In some states, based on state statute or case law, clients or patients have the right to inspect or obtain a copy of their records. In other states, this right is not guaranteed. Legal opinion should be obtained to determine local statutes and case law.

7. If a client wants to have a copy of his record, does a release have to be signed?

**ANSWER:** No. The client does not have to sign a release in order to obtain a copy of his record. See Question #6 above.
Frequently Asked Confidentiality Questions (cont)

8. A TASC program is part of a mental health center, which requires that all client records be kept centrally. Can TASC records be combined with the general records of mental health clients?

**ANSWER:** Yes. However, the records of TASC clients are still subject to all the requirements of the confidentiality regulations. Section 2.16 requires each program to "adopt in writing procedures which regulate and control access to and use of written records which are subject to these regulations." Thus, the mental health center must limit access to TASC records to only those staff with a legitimate reason to view the records.

9. Can confidential information be released to a family member by phone, or must it be only in person or in writing?

**ANSWER:** There must be a signed release in order for any information to be disclosed. Such disclosures can be made by phone, in person or orally. Be certain that phone disclosures are actually made to the authorized person.

10. If a client has signed a release to his probation officer, how much can I tell over the phone?

**ANSWER:** As long as there is a valid release of information, disclosure can be made over the phone. The information to be released is limited by the kind and amount of information specified to be disclosed in the release. The proper form for releases is contained in Section 2.31 of the regulations.

11. If a client makes a request for information to be released from his record and a release of information is signed, does the program have to release the information?

**ANSWER:** The confidentiality regulations do not compel a program to release any information solely based on the client's written request. Thus, the answer to this question will depend on state law. Programs should obtain legal counsel to determine the applicability and interpretation of state law.
Frequently Asked Confidentiality Questions (cont)

12. Can a client's record be brought to court if staff receive a subpoena to testify in court?

**ANSWER:** It is best not to bring a record into court. The person subpoenaed should review the record before court, taking pertinent notes if necessary. If the subpoena is a "duces tecum" then the records should be brought to court.

13. If a person currently under probation applies for drug treatment, can the person's probation officer be told?

**ANSWER:** No. No information can be disclosed to the officer, including the fact that the probationer has applied for treatment, unless the probationer has signed a written consent for the release of confidential information.

14. Can a criminal justice confidentiality release also be used as a release for treatment?

**ANSWER:** Probably not. While the two releases are similar, they are not identical. Once a criminal justice release is signed, it cannot be revoked until the duration specified in the release is reached. A non-criminal justice release must state that revocation can be made at any time. A criminal justice release also allows redisclosure to those individuals within the criminal justice system who have made participation in TASC or treatment a condition of any criminal proceeding, or who have a need for the information in connection with their duty to monitor the client's progress. The non-criminal justice release does not permit redisclosure unless it is specified in the release.

15. If a client decides to drop out of TASC and revokes his release, can his probation officer be informed that he has been terminated from TASC?

**ANSWER:** The release for a criminal justice client must state that it is revokable upon the passage of a specified amount of time or the occurrence of a significant event. This means a criminal justice client cannot revoke his release until the specified time or event has been reached. The client's probation officer should be informed if the client drops out of TASC. Program managers should be sure their releases conform to the requirements of Subpart C (Sections 2.31 - 2.35) of the confidentiality regulations.
Frequently Asked Confidentiality Questions (cont)

16. A former TASC client is being violated because he did not complete treatment two years ago. At the time there was a valid release from TASC to the probation officer. The local prosecuting attorney has called asking for information about the client's attendance, urinalysis results and treatment outcome. Can this information be given?

**Answer:** Yes. As long as there was a valid release covering the time while the client was in TASC and treatment, this information can be shared with the prosecutor. Staff can also testify at a hearing or in court concerning this client who failed TASC.
Part II

Department of Health and Human Services

Public Health Service

42 CFR Part 2
Confidentiality of Alcohol and Drug Abuse Patient Records; Final Rule
DEPARTMENT OF HEALTH AND
HUMAN SERVICES
Public Health Service
42 CFR Part 2
Confidentiality of Alcohol and Drug Abuse Patient Records

AGENCY: Alcohol, Drug Abuse, and Mental Health Administration, PHS, HHS.

ACTION: Final rule.

SUMMARY: This rule makes editorial and substantive changes in the "Confidentiality of Alcohol and Drug Abuse Patient Records" regulations. These changes are an outgrowth of the Department’s commitment to make its regulations more understandable and less burdensome. The Final Rule clarifies and shortens the regulations and eases the burden of compliance.

FOR FURTHER INFORMATION CONTACT: Judith T. Galloway (301) 443-3200.

SUPPLEMENTARY INFORMATION: The "Confidentiality of Alcohol and Drug Abuse Patient Records" regulations, 42 CFR Part 2, implement two Federal statutes applicable to alcohol abuse patient records (42 U.S.C. 290dd-3) and drug abuse patient records (42 U.S.C. 290ee-3).

The regulations were originally promulgated in 1975 (40 FR 27702). In 1980 the Department invited public comment on 15 substantive issues arising out of its experience interpreting and implementing the regulations (45 FR 53). More than 450 public responses to that invitation were received and taken into consideration in the preparation of a 1983 Notice of Proposed Rulemaking (48 FR 38735). Approximately 150 comments were received in response to the Notice of Proposed Rulemaking and were taken into consideration in the preparation of this Final Rule.

The proposed rule made both editorial and substantive changes in the regulations and shortened them by half. This Final Rule adopts most of those changes, with some significant substantive modifications and relatively few editorial and clarifying alterations.

Synopsis of Substantive Provisions

The Confidentiality of Alcohol and Drug Abuse Patient Record regulations (42 CFR Part 2) cover any program that is specialized to the extent that it holds itself out as providing and provides alcohol or drug abuse diagnosis, treatment, or referral for treatment and which is federally assisted, directly or indirectly (§ 2.12(a) and (b)).

The regulations prohibit disclosure or use of patient records ("records" meaning any information whether recorded or not) unless permitted by the regulations (§ 2.13). They do not prohibit giving a patient access to his or her own records (§ 2.23). However, the regulations alone do not compel disclosure in any case (§ 2.23(b)).

The prohibition on disclosure applies to information obtained by the program which would identify a patient as an alcohol or drug abuser (§ 2.12(a)(1)). The restriction on use of information to investigate or to bring criminal charges against a patient applies to any alcohol or drug abuse information obtained by the program (§ 2.12(a)(2)).

Any disclosure permitted under the regulations must be consistent with information which is necessary to carry out the purpose of the disclosure (§ 2.13).

The regulations permit disclosure of information if the patient consents in writing in accordance with § 2.31. Any information disclosed with the patient’s consent must be accompanied by a statement which prohibits further disclosure unless the consent expressly permits further disclosures or the disclosure is otherwise permitted by the regulations (§ 2.33). Special rules govern disclosures with the patient’s consent for the purpose of preventing multiple enrollments (§ 2.34) and for criminal justice referrals (§ 2.35).

The regulations permit disclosure without patient consent if the disclosure is to medical personnel to meet any individual’s bona fide medical emergency (§ 2.51) or to qualified personnel for research (§ 2.52), audit, or program evaluation (§ 2.53). Qualified personnel may not include patient identifying information in any report or otherwise disclose patient identities except back to the program which was the source of the information (§ § 2.52(b) and 2.53(d)).

The regulations permit disclosure pursuant to a court order after the court has made a finding that "good cause" exists. A court order may also disclose for noncriminal purposes (§ 2.64); for the purpose of investigating or prosecuting a patient if the crime involved is extremely serious (§ 2.65); for the purpose of investigating or prosecuting a program or a person holding the records (§ 2.66); and for purpose of placing an undercover agent or informant to criminally investigate employees or agents of the program (§ 2.67).

A court order may not authorize disclosure of confidential communications unless disclosure is necessary to protect against an existing threat to life or serious bodily injury of another person; to investigate or prosecute an extremely serious crime; or if the patient brings the matter up in any legal proceedings (§ 2.63).

A court order may not authorize qualified personnel who received information without patient consent for the purpose of conducting research, audit, or program evaluation, to disclose that information or to use it to conduct any criminal investigation or prosecution of a patient (§ 2.82).

Information obtained under a court order to investigate or prosecute a program or other person holding the records or to place an undercover agent or informant may not be used to conduct any investigation or prosecution of a patient or as the basis for a court order to criminally investigate or prosecute a patient (§ 2.66(d)(2) and § 2.67(c)).

These regulations do not apply to the Veteran’s Administration. They exchanges within the Armed Forces or between the Armed Forces and the Veterans’ Administration: to the Veterans under State law of incidents of suspected child abuse and neglect to appropriate State or local authorities: to communications within a program or between a program and an entity having direct administrative control over the program: to communications between a program and a qualified service organization: and to disclosures to law enforcement officers concerning a patient’s commission of (or threat to commit) a crime at the program or against personnel of the program (§ 2.12(c)(2)).

If a person is not now and never has been a patient, there is no patient record and the regulations do not apply (§ 2.13(c)(2)).

Any answer to a request for a disclosure of patient records which is not permitted must not affirmatively reveal that an identified individual has been or is an alcohol or drug patient.

One way to make such an answer is to give a copy of this confidentiality regulations to the person who asked for the information along with general advice that the regulations restrict the disclosure of alcohol or drug abuse patient records and without identifying any person as an alcohol or drug abuse patient (§ 2.13(c)).

Each patient must be told about these confidentiality provisions and furnished a summary in writing (§ 2.22).

There is a criminal penalty for violating the regulations: not more than $500 for a first offense and not more than $2,000 for each subsequent offense (§ 2.4).
Inasmuch as it is the Department of Justice which has ultimate and sole responsibility for prosecuting violations of these regulations, the Final Rule continues to provide for the reference of reports of any violations to the United States Attorney for the judicial district in which the violations occur. It also continues to provide for the reference to the Regional Offices of the Food and Drug Administration of any reports of violations by a methadone program. As a regulatory agency, the Food and Drug Administration has both the organization and authority to respond to alleged violations.

The Final Rule no longer directs reports of violations by a Federal grantee or contractor to the Federal agency monitoring the grant or contract; as in the proposed revision of the rule, violations by a Federal agency to the Federal agency responsible for the program. This change is made in recognition of the lack of investigative tools available to granting and contracting agencies and of the ultimate referral which must be made to the Department of Justice. Of course, if alleged violations come to the attention of the Department of Health and Human Services, they will be forwarded to an appropriate representative of the Department of Justice.

The proposed rule at § 2.12, the Final Rule is applicable to any alcohol and drug abuse program within the meaning of these regulations so long as the entity is specialized by holding itself out to the community as providing diagnosis, treatment, or referral for treatment for alcohol and/or drug abuse. If a facility is a provider of general medical care, it will not be viewed in whole or in part as a program unless it has either (1) an identified unit, i.e., a location that is set aside for the provision of alcohol or drug abuse diagnosis, treatment, or referral for treatment; or (2) it has personnel who are identified as providers of diagnosis, treatment, or referral for treatment and whose primary function is the provision of alcohol or drug abuse services. Regardless of whether an entire legal entity is a program or if a part of the entity is a program, the confidentiality protections cover alcohol or drug abuse patient records within any federally assisted program. As “program” is defined in these regulations.

Those comments opposed to limiting applicability of the regulations to “specialized” programs focused on the desirability of full and uniform applicability of confidentiality standards to any alcohol or drug abuse patient record irrespective of the type of facility delivering the services. The Department takes the position that limiting applicability to specialized programs, i.e., to those programs that hold themselves out as providing and which actually provide alcohol or drug abuse diagnosis, treatment, and referral for treatment, will simplify administration of the regulations without significantly affecting the incentive to seek treatment provided by the confidentiality protections.

Applicability to specialized programs will lessen the adverse economic impact of the current regulations on a substantial number of facilities which provide alcohol and drug abuse care only as an incident to the provision of general medical care. We do not foresee that elimination of hospital emergency rooms and general medical or surgical wards from coverage will act as a significant deterrent to patients seeking assistance for alcohol and drug abuse. While some commenters suggested that there will be an increased administrative burden for organizations operating both a specialized alcohol and/or drug abuse program and providing other health services, we view this as the same burden facing all general medical care facilities under the existing rule.

In many instances it is questionable whether applicability to general medical care facilities addresses the intent of Congress to enhance treatment incentives for alcohol and drug abuse inasmuch as many alcohol and/or drug abuse patients are treated in a general medical care facility not because they have made a decision to seek alcohol and drug abuse treatment but because they have suffered a trauma or have an acute condition with a primary diagnosis of other than alcohol or drug abuse.

In sum, we are not persuaded that the existing burden on general medical care facilities is warranted by the benefit to the entities in that setting. Therefore, the Final Rule retains the language of the proposed rule at § 2.11 defining “program” and making the regulations applicable at § 2.12 to any information about alcohol and/or drug abuse patients which is obtained by a federally assisted alcohol or drug abuse program for the purpose of treating, making a diagnosis for treatment, or making a referral for treatment of alcohol or drug abuse.

Communications between a Program and an Entity Having Direct Administrative Control

The existing regulations at § 2.11(p)(1) and the proposed rule at § 2.12(c)(3) exempt from the restrictions on disclosure communications of information within a program between or among personnel in connection with their duties or in connection with provision of patient care, respectively. The Department has previously interpreted the existing provision to mean that communications within a program may include communications to an administrative entity having direct control over the program.

The Final Rule has incorporated that legal opinion into the text by amending § 2.12(C)(3) to exempt from restrictions on disclosure “communications of information between or among personnel having a need for the information in connection with their duties that arise out of the provision of diagnosis treatment, or referral for treatment of alcohol or drug abuse” if the communications are within a program or between a program and an entity that has direct administrative control over the program. Paragraph (d) of that same section is accordingly amended to restrict any further disclosure by an administrative entity which receives information under § 2.12(C)(3).

Explanation of Applicability

The existing regulations are applicable to patient records maintained in connection with the performance of
any alcohol abuse or drug abuse prevention function which is federally assisted. Applicability is determined by the nature and purpose of the records, not the status or primary functional capacity of the recordkeeper. The definition of "alcohol abuse or drug abuse prevention function" includes specified activities "even when performed by an organization whose primary mission is in the field of law enforcement or is unrelated to alcohol or drug abuse."

The proposed regulations and the Final Rule at § 2.12(e) make the regulations applicable to any information about alcohol and drug abuse patients which is obtained by a federally assisted alcohol or drug abuse program. A program is defined to be those persons or legal entities which hold themselves out as providing and which actually provide, diagnosis, treatment, or referral for treatment for alcohol and/or drug abuse. Thus, there is a fundamental shift toward determining applicability on the basis of the function of the recordkeeper and away from making that decision based solely on the nature and purpose of the records.

No alcohol and drug abuse patient records, whether identified by the nature and purpose of the records or the function of the recordkeeper, are covered by these regulations unless the diagnosis, treatment, or referral for treatment with which the records are connected is federally assisted.

Several commenters pointed out that while the regulatory language of the proposed rule on its face applies the rule to information about alcohol and drug abuse patients in federally assisted programs, the explanation of the applicability provision at § 2.12(e)(2) obscures the otherwise forthright statement by an additional standard based on the type of Federal assistance going to the program, i.e., some patient records in a federally assisted program would be covered and others would not. Those who commented on this section urged that coverage distinctions under the explanation in § 2.12(e)(2) be omitted because they result in disparate treatment of patient records within an alcohol and/or drug abuse program based on the type of Federal assistance going to the program. Other commenters asserted that basing coverage on the type of assistance is inconsistent with the clear meaning of the applicability provision in the proposed and Final Rule.

The Final Rule revises the proposed explanatory material at § 2.12(e)(2) to show that all alcohol and drug abuse patient records within a covered program are protected by the confidentiality provisions and that the record of an individual patient in an uncovered program, whose care is federally supported in some way which does not constitute Federal assistance to the program under § 2.12(b), is not afforded confidentiality protections. Thus, where a Federal payment is made to a program on behalf of an individual patient and that program is not otherwise federally assisted under § 2.12(b), the record of that individual will not be covered by the regulations. Although the Department expects them to be rare, it would be possible for such instances to occur. For example, if a Federal court places an individual in a for-profit program that is not certified under the Medicare program, that is not authorized to conduct methadone treatment, and is not otherwise federally assisted in any manner provided in § 2.12(b), the record of that individual would not be covered by the regulations even though the Federal court paid for the individual's treatment.

Comments to the proposed rule were persuasive that the type of assistance should not affect the scope of records covered within a covered program. When the determination of covered records was based on the purpose and nature of each record, it was consistent to view Federal assistance from the perspective of each individual record. However, when the determination of which records are covered is based on who is keeping the records, as in the proposed and Final Rule, it is consistent with the approach to view Federal assistance from the program level as applying to all alcohol and drug abuse patient records within the program.

Determining coverage based on Federal assistance to the program rather than to an individual represents a change in policy from the current regulations under which the Department views a Federal payment made on behalf of an individual as sufficient to cover that individual's record. However, any disadvantage in not covering individual records in those rare cases which may occur is outweighed by the advantages of consistency and efficiency in management of the program as a result of all alcohol and drug abuse patient records in the program being subject to the same confidentiality provisions.

The Final Rule includes new material at § 2.12(e)(3) which briefly explains the types of information to which the restrictions are applicable, depending on whether a restriction is on disclosure or on use. A restriction on disclosure applies to any information which would identify a patient as an alcohol or drug abuser. The restriction on use of information to bring criminal charges or investigate a patient for a crime applies to any information which would permit the recordkeeper to conduct methadone treatment, or referral for treatment of alcohol or drug abuse.

Several commenters strongly urged the explicit inclusion of school-based education and prevention programs in the applicability of the regulations. School-based education and prevention activities may fall within the definition of a program if they provide alcohol or drug abuse diagnosis, treatment, or referral for treatment and if they hold themselves out as doing that. That is reflected in the Final Rule at § 2.12(e)(1) with the inclusion of "school-based programs" in the list of entities which may come under the regulations.

An example of how diagnosis affects coverage has been omitted at § 2.12(e)(3)(i). It is omitted not because the example could never occur under the Final Rule, but because it is unlikely that a "specialized" program, as program is defined under these regulations, would be treating a patient for a condition which is not related to alcohol or drug abuse such that the reference to a patient's alcohol or drug abuse history would not be related to the condition for which treatment is rendered. Inasmuch as the regulations only apply to programs, this example is more likely to confuse than provide guidance and for that reason has been taken out.

Notifying a Parent or Guardian of a Minor's Application for Treatment

The proposed rule at § 2.14 reorganized and revised but did not substantively amend the existing § 2.15 dealing with the subject of minor patients. Under both the existing and proposed rules, a minor patient's consent is generally required prior to notifying the minor's parent or guardian of his or her application for treatment. This is true even though without notification it is impossible to obtain parental consent in those cases where State law requires a parent, guardian, or other person to consent to alcohol or drug abuse treatment of a minor.

While this issue was not raised in the proposed rule, the Department has received several inquiries on it from the public since the proposed rule was published suggesting that in those States, where the parent's or guardian's consent is needed for the minor's treatment, the program should be free to notify the parent or guardian of the minor's application for treatment without constraint. The Department has considered this issue and decided to
make no substantive changes in the existing section dealing with minor patients. Although both the current rule and the proposed rule generally prohibit parental notification without the minor's consent, they also provide for an exception. Under this exception such notification would be permitted when, in the program director's judgment, the minor lacks the capacity to make a rational decision on the issue of notification, the situation poses a substantial threat to the physical well-being of the minor or any other person, and this threat may be alleviated by notifying the parent or guardian. Under this provision, the program director is vested with the authority to determine when the circumstances permitting parental notification arise. In discussing the Department's philosophy behind this provision, § 2.15-1(e) of the existing rule states: "It [this provision] is based upon the theory that where a person is actually or legally incapable of acting in his own interest, disclosures to a person who is legally responsible for him may be made to the extent that the best interests of the patient clearly so require." While this exception would not permit parental notification without constraint whenever the program director feels it is appropriate, the Department believes it does provide the program director with significant discretion and does permit parental notification in the most egregious cases where the "best interests of the patient clearly so require." Accordingly, the Department has determined not to make any substantive changes in the manner in which the existing rule handles the issue of parental notification. However, proposed § 2.14 has been revised to clarify that no change in meaning is intended from the current rule.

Finally, it should be noted that this rule in no way compels a program to provide services to a minor without parental consent.

Separation of Clinical from Financial/ Administrative Records

The current rules governing research, audit, or evaluation functions by a governmental agency at § 2.53 state that "programs should organize their records so that financial and administrative matters can be reviewed without disclosing clinical information and without disclosing patient identifying information except where necessary for audit verification." The proposed rule transformed this hortatory provision for maintenance of financial/administrative records apart from clinical records into a requirement in § 2.18 dealing with security for written records.

Several commenters predicted that such a requirement will pose an extremely cumbersome burden on programs, perhaps tantamount to requiring maintenance of two systems of files. The Final Rule has adopted the recommendation of those commenters to drop this requirement, primarily on the basis of the potential administrative and recordkeeping problems it poses in the varied treatment settings to which these regulations are applicable.

While it is desirable to withhold clinical information from any research, audit, or program evaluation function for which that clinical information is not absolutely essential, the Final Rule does not require recordkeeping practices designed to guarantee that outcome. The Final Rule does, of course, implement the statutory provisions which prohibits those who receive patient identifying information for the purpose of research, audits, or program evaluation from identifying, directly or indirectly, any individual patient in any report of such research, audit, or evaluation or otherwise disclosing patient identities in any manner (see §§ 2.52(b) and 2.53(d)).

Subpart C- Disclosures with Patient's Consent

Notice to Patients

Like the proposed rule, the Final Rule at § 2.22 requires that notice be given to patients that Federal law and regulations protect the confidentiality of alcohol and drug abuse patient records. The response to this provision in the proposed rule reflects strong support for notifying patients of confidentiality protections, although it was stressed that the notice should be simplified in order to be useful rather than confusing to the patient. Some of those who recommended against adoption of a notice provision did so on grounds that the notice as proposed is too complex. Therefore, in response to many who supported the notice provision and those who opposed it on grounds that it is too complex, the Final Rule substantially revises the elements which must be included in the written notice to each patient and accordingly rewrites the sample notice which a program may adopt at its option in fulfillment of the notice requirement.

Form of Written Consent

The proposed rule retains the requirements in § 2.31 of the existing regulations for written consent to disclosure of information which would identify an individual as an alcohol or drug abuser. There was a great deal of support among those who commented on this provision for the retention of the existing elements of written consent on grounds that the present system is working well and that the elements which go to make up written consent are sufficiently detailed to assure an opportunity for a patient to make an informed consent to disclose patient identifying information. Others recommended a more generalized consent form.

The Final Rule retains all elements previously required for written consent, though in one instance it will permit a more general description of the required information. The first of the required elements of written consent in both the existing and proposed rule (§ 2.31(a)(1)) asks for the name of the program which is to make the disclosure. The Final Rule will amend that element by calling for "(1) The specific name or general designation of the program or person permitted to make the disclosure." This change will permit the patient to consent to disclosure from a category of facilities or from a single specified program. For example, a patient who chooses to authorize disclosure of all his or her records without the necessity of completing multiple consent forms or individually designating each program on a single consent form would consent to disclosure from all programs in which the patient has been enrolled as an alcohol or drug abuse patient. Or a patient might narrow the scope of his or her consent to disclosure by permitting disclosure from all programs located in a specified city, from all programs operated by a named institution, or as now, the patient might limit consent to disclosure from a single named facility. (In this connection, the Department interprets the existing written consent requirements to permit consent to disclosure of information from many programs in one consent form by listing specifically each of those programs on the form.)

This change generalizes the consent form with respect to only one element without diminishing the potential for a patient's making an informed consent to disclose patient identifying information. The patient is in position to be informed of any programs in which he or she was previously enrolled and from which he or she is willing to have information disclosed.

With regard to deficient written consent, the Final Rule at § 2.31(c) reverts to language from the existing regulations rather than using the language of the proposed rule to express the idea that a disclosure may not be made on the basis of a written consent
which does not contain all required elements in compliance with paragraph (a) of § 2.31. There was no intention in drafting the proposed rule to establish a different or more stringent standard than currently exists prohibiting disclosures without a conforming written consent. Because that was misunderstood by some, the Final Rule will not permit disclosures on the basis of a written consent which, "On its face substantially fails to conform to any of the requirements set forth in paragraph (a) of this section . . . ."

Express Consent to Redisclosure Permitted

Both the existing and proposed rules at § 2.32 prohibit redisclosure by a person who receives information from patient records pursuant to the written consent of the patient and who has been notified that the information is protected by Federal rules prohibiting disclosure except as permitted by those Federal rules. However, the statement of the prohibition on redisclosure at § 2.32 does not make evident the Department's interpretation that it is possible for a patient, at the same time consent to disclosure is given, to consent to redisclosure in accordance with the Federal rules. The Final Rule rewords the statement of prohibition on redisclosure and adds the phrase shown in quotes below to the second sentence as follows:

The Federal rules prohibit you from making any further disclosure of this information "unless further disclosure is expressly permitted by the" written consent of the person to whom it pertains or is otherwise permitted by 42 CFR Part 2.

The purpose of the added phrase is to acknowledge that redisclosure of information may be expressly permitted in the patient's written consent to disclosure. For example, a patient may consent to disclose pertinent information to an employment agency and at the same time permit the employment agency to redisclose this information to potential employers, thus making unnecessary additional consent forms for redisclosures to individual employers. Similarly, a patient may consent to disclose pertinent information to an insurance company for the purpose of claiming benefits, and at the same time consent to redisclosure by that insurance company to another organization or company for the purpose of administering the contract under which benefits are claimed by or on behalf of the patient.

Patient Consent to Unrestricted Communications for the Purpose of Criminal Justice System Referrals

Most of those who commented on the revision of § 2.35 generally supported the proposed changes. However, two State commenters encouraged retention of language in the existing regulations which explicitly permits a patient to consent to "unrestricted communications." Otherwise, those commenters say, the revision will act as a deterrent to criminal justice system referrals.

Both the proposed and Final Rule omit most limitations on disclosures to which a patient may consent. The criteria for permitting release of information with patient consent under the Final Rule are: (1) A valid consent to § 2.31 and (2) a determination that the information disclosed is necessary to carry out the purpose for which the consent was given § 2.31(a)). Although special rules for disclosures in connection with criminal justice system referrals were retained, they do not restrict "how much and what kind of information" a patient may consent to have disclosed under § 2.31. Section 2.31(a)(5) places no restrictions on how much or what kind of information a patient may consent to have disclosed. That section simply requires that each written consent describe how much and what kind of information the patient consents to have disclosed. A patient may consent to disclosure of any information concerning his or her participation in a program. In the case of a consent for the purpose of a criminal justice system referral, consent to disclose "any information concerning my participation in the program" pursuant to § 2.31(a)(5) would permit "unrestricted communications" from the program to appropriate persons within the criminal justice system to the same patient permitted by the existing rule. Therefore, the Final Rule does not substantively alter § 2.35 as proposed. (Paragraph (c) has been reworded for clarity.)

Subpart D—Disclosures Without Patient's Consent

Elimination of the Requirement to Verify Medical Personnel Status

The proposed regulations at § 2.51 implement the statutory provision which permits a disclosure "to medical personnel to the extent necessary to meet a bona fide medical emergency." The proposed rule added a requirement not contained in the existing § 2.51 that the program make a reasonable effort to verify that the recipient of the information is indeed medical personnel.

The Final Rule deletes the proposed verification requirement in response to comments from several sources that such a requirement is unnecessary, will cause delay, and could possibly impede emergency treatment. In view of those comments and our interest in easing the burden of compliance where possible, the Final Rule does not require verification of the "medical personnel" status of the recipient of information in the face of a medical emergency.

However, the statute permits disclosures only to medical personnel to meet a medical emergency and elimination of the verification requirement does not in any way expand upon the category of persons to whom a disclosure may be made to meet a medical emergency. Neither does elimination of the verification requirement affect the provision in the Final Rule at § 2.51(c) that a program document in the patient's records any disclosure which is made in the face of a medical emergency.

Assessment of Research Risks

The proposed regulations at § 2.52 modified and streamlined existing provisions in §§ 2.52 and 2.53 governing disclosures for scientific research. The proposal clarified that the determination of whether an individual is qualified to conduct scientific research is left to the program director, and required that such qualified personnel have a research protocol which includes safeguards for storing patient identifying information and prohibits redisclosures except as allowed by these regulations.

The Final Rule adds an additional condition: The program director must ensure that a written statement is furnished by the researcher that the research protocol has been reviewed by an independent group of three or more individuals who found that the rights of patients would be adequately protected and that the potential benefits of the research outweigh any potential risks to patient confidentiality posed by the disclosure of records.

This revision was prompted by comment from both the public and private sectors that review of the research protocol for the purpose of ensuring the protection of human subjects participating in the research (in this case, the patients whose records are proposed for use in research) is imperative prior to permitting disclosure of patient identifying information for the conduct of scientific research. The requirement that researchers state in writing that the protocol has been reviewed for the protection of human subjects will provide an additional point.
of reference for the program director in determining whether to release patient identifying information for research purposes.

Researchers who receive support from the Department and many other Federal agencies are required under regulations for the protection of human subjects to obtain review of their protocol from an "institutional review board (IRB)." Such boards generally are set up by the institution employing the researcher. Regulations require that IRBs be composed of persons with professional competence to review research, as well as persons who can judge sensitivity to community attitudes and ethical concerns. Documentation of review and approval by an IRB or by another group of at least three individuals, appropriately constituted to make judgments concerning the protection of human subjects, would meet the new requirement in § 2.52(a)(3).

Audit and Evaluation Activities by Nongovernmental Entities

The proposed regulations at § 2.53 simplify and shorten the provisions on audit and evaluation activities and divide them into two categories: (1) Those activities that do not require copying or removal of patient records, and (2) those that require copying or removal of patient records. The proposed rule permits governmental agencies to conduct audit and evaluation activities in both categories. In addition, if no copying or removal of the records is involved, the program director may determine that other persons are "qualified personnel" for the purpose of conducting audit and evaluation activities. There is no provision for nongovernmental entities to perform any audit or evaluation activity if copying or removal of records is involved.

In response to the proposed rule the Department received comment that third party payers should be permitted to copy or remove records containing patient identifying information as is permitted by governmental agencies that finance or regulate alcohol or drug abuse programs.

Recognizing that private organizations, as governmental agencies, have a stake in the financial and programmatic integrity of treatment programs arising out of their financing of alcohol and drug abuse programs directly, out of peer review responsibilities, and as third party payers, the Final Rule permits access to patient identifying information for audit and evaluation activities by private organizations in circumstances identical to the access afforded governmental agencies. Specifically, if a private organization provides financial assistance to a program, is a third party payer covering patients in the program, or is a peer review organization performing a utilization or quality control review, the Final Rule permits the private organization to have access to patient identifying information for the purpose of participating in audit and evaluation activities to the same extent and under the same conditions as a governmental agency.

Audit and Evaluation of Medicare or Medicaid Programs

In response to specific questions which have come to the Department's attention and in recognition of the continued importance of the integrity of the Medicare and Medicaid programs to the delivery of alcohol and drug abuse services, the Final Rule includes a new paragraph (c) in § 2.53 which clarifies the audit and evaluation provisions as they pertain to Medicare or Medicaid.

Specifically, the new paragraph clarifies that the audit and evaluation function includes investigation for the purpose of administering enforcement of any remedy imposed by law by any Federal, State, or local agency which has responsibility for oversight of the Medicare or Medicaid programs. The new paragraph makes explicit that the term "program" includes employees of or providers of medical services under an alcohol or drug abuse program.

Finally, it clarifies that a peer review organization may communicate patient identifying information for the purpose of a Medicare or Medicaid audit or evaluation to the agency responsible for oversight of the Medicare or Medicaid program being evaluated or audited.

Subpart E—Court Orders Authorizing Disclosure and Use

Court-Ordered Disclosure of Confidential Communications

The existing regulations at § 2.63 limit a court order to "objective" data and prohibit court-ordered disclosure of "communications by a patient to personnel of the program." The proposed regulations delete the provision restricting a court order to objective data and precluding an order from reaching "communications by a patient to personnel of the program." Deletion of that provision provoked considerable discussion and concern on the part of a large number of persons, 83% of whom opposed allowing court-ordered disclosure of nonobjective data.

The Final Rule at § 2.63 restores protection for many "communications by a patient to personnel of the program" and information which is of a nonobjective nature, but it does not protect that information from court order in the face of an existing threat to a third party or in connection with an investigation or prosecution of an extremely serious crime.

Because the existing regulations seem to be dealing uniformly with two related but not necessarily identical types of information, i.e., "objective" data and "communications by a patient to personnel of the program," the Final Rule drops those terms in favor of the term "confidential communications," a term in use since 1973 in existing § 2.63-1. "Confidential communications" are the essence of those matters to be afforded protection and are as readily identified as "objective" data.

Furthermore, protection of "confidential communications" is more relevant to maintaining patient trust in a program than is protection of "communications by a patient to personnel of the program," a term which does not distinguish between the innocuous and the highly sensitive communication.

Most comments in opposition to relaxing the court order limitations on confidential communications said that the potential for court-ordered disclosure of confidential communications will compromise the therapeutic environment, may deter some alcohol and drug abusers from entering treatment, and will yield information which may be readily misinterpreted or abused.

While freedom to be absolutely candid in communicating with an alcohol or drug abuse program may have therapeutic benefits and may be an incentive to treatment, it is the position of the Department that those therapeutic benefits cannot take precedence over two circumstances which merit court-ordered disclosure of confidential communications.

The first of these is a circumstance in which the patient poses a threat to any third party. Existing rules do not permit a court to authorize disclosure of any communication by a patient to a program: for example, that the patient is abusing a child or has expressed an intention to kill or seriously harm another person. The balance between patient confidentiality and an existing threat posed by the patient to life or of serious bodily injury to another person must be weighted in favor of permitting a court to order disclosure of confidential communications which are necessary to protect against such an existing threat.

The second of these circumstances is one in which a patient's confidential
communications to a program are necessary in connection with investigation or prosecution of an extremely serious crime, such as a crime which directly threatens loss of life or serious bodily injury. The Department has reinstated the provision permitting a patient to consent to an open hearing in a noncriminal proceeding but with the same formality as is required by the proposed rule for a consent by the patient to use his or her name in an application for an order for an arrest. Therefore, the Final Rule at § 2.64(c) requires that any hearing be held in such a way as to maintain the patient's confidentiality "unless the patient requests an open hearing in a manner which meets the written consent requirements of these regulations."

Content of Court Order—Sealing of Record as an Example

The content of a court order authorizing disclosure for noncriminal purposes and any order for disclosure and use to investigate or prosecute a program or the person holding the records is limited at § 2.64(e) to essential information and limits disclosure to those persons who have a need for the information. In addition, the court is required to take such other measures as are necessary to limit disclosure to protect the patient, the physician-patient relationship, and the treatment services. We have included at § 2.64(e)(3) an example of one such measure which may be necessary: sealing the record of any proceeding for which disclosure of a patient's records has been ordered. It is the Department's experience that heightened awareness of this possibility by members of the treatment community and legal profession can limit dissemination of patient identifying information to those for whom the court determined "good cause" exists without turning all or a part of a patient's treatment record into public information. The Final Rule adds as an example of a measure which the court might take to protect the patient, the physician-patient relationship and the treatment service "sealing from public scrutiny the record of any proceeding for which disclosure of a patient's record has been ordered." A similar change has also been made in § 2.67(d)(4).

Extremely Serious Crime as a Criterion for a Court Order to Investigate or Prosecute a Patient

The proposed rule at § 2.64 purported to retain the existing standard with regard to court orders which may be issued for the purpose of investigating or prosecute a patient; i.e., the standard that no court order may authorize disclosure and use of patient records for investigation or prosecution of nonserious crimes. In an effort to clarify the nature of those crimes for which a court may order disclosure and use of patient records to investigate or prosecute the patient, the proposed rule dropped the term "extremely serious" crime in favor of a more specific functional definition of a crime which "causes or directly threatens loss of life or serious bodily injury." While the proposed rule purported to retain the existing standard, comments received from law enforcement agencies have contested that outcome, asserting that the criterion as proposed would be significantly narrowed. Arguing in favor of a broader standard, law enforcement interests advocated a more flexible criterion which would permit courts to weigh relevant factors on a case-by-case basis.

Inasmuch as the change in the proposed rule was intended to clarify—not to further limit—those crimes for which a court may authorize use of a patient's record to investigate or prosecute the patient, the Final Rule reinserts the existing language, "extremely serious." This broader criterion will permit more flexibility and discretion by the courts in deciding whether a crime is of a caliber which merits use of a patient's treatment record to investigate or prosecute the patient.

The Final Rule names as examples of "extremely serious" crimes homicide, rape, kidnapping, armed robbery, assault with a deadly weapon, and child abuse and neglect. Deleted from the list of proposed examples is "sale of illicit drugs."

Based on the view that most patients in drug abuse treatment are vulnerable to a charge of sale of illicit drugs, many commenters asked that "sale of illicit drugs" not be categorically named as an extremely serious crime. To do so, they asserted, would make all patients in drug rehabilitation or treatment programs vulnerable to investigation or prosecution by means of court-ordered use of their own treatment records.

While the Final Rule eliminates "sale of illicit drugs" as an example of an extremely serious crime, it does not alter the authority of a court to find that under-appropriate circumstances sale of an illicit drug is, in fact, an extremely serious crime, and it reflects a decision to leave any such determination up to a court of competent jurisdiction which is called upon to order the use of a patient's treatment record to prosecute the patient in view of any circumstances known to the court.
New Law to Permit Reporting of Child Abuse and Neglect

Section 106 of Pub. L. 99-401, the Children’s Justice and Assistance Act of 1986, amends sections 523(e) and 527(e) of the Public Health Service Act (42 U.S.C. 290dd-3(e)) and 42 U.S.C. 290dd-3(e)(1) to permit the reporting of suspected child abuse and neglect to appropriate State or local authorities in accordance with State law. The amended sections of the Public Health Service Act provide:

The prohibitions of this section do not apply to the reporting under State law of incidents of suspected child abuse and neglect to the appropriate State or local authorities.

This newly enacted statutory exception to the restrictions on disclosure of information which would identify an alcohol or drug abuse patient provides a straightforward avenue for making reports of incidents of suspected child abuse and neglect in accordance with State law without resort to devices explained in the preamble to the proposed rule, i.e., obtaining a court order, reporting without identifying the patient as an alcohol or drug abuser, getting the patient’s written consent, entering into a qualified service organization agreement, or reporting a medical emergency to medical personnel. While the potential still exists for using the devices described in the proposed rule, there is no foreseeable reason to use them to report suspected child abuse and neglect in view of the amendment.

Although the new law excepts reports of suspected child abuse and neglect from the statutory restrictions on disclosure and use, it does not affect the application of the restrictions to original alcohol and drug abuse patient record maintained by the program. Accordingly, if, following a report of suspected child abuse or neglect, the appropriate State authorities wish to subpoena patient records (or program personnel to testify about patient records) for civil or criminal proceedings relating to the child abuse or neglect, appropriate authorization would be required under the statutes and regulations. While written patient consent would suffice for a civil proceeding, it would be necessary to obtain an authorizing court order under paragraph (b)(3)(C) of the confidentiality statutes and §2.55 of the regulations for use of the record to criminally investigate or prosecute a patient.

Editorial Changes

The Final Rule makes very few editorial or clarifying changes to the regulations as proposed.

Number, tense, punctuation, and sequential numbering are changed where appropriate. Definitions applicable only to prevention of multiple enrollments in detoxification and maintenance treatment programs are moved from the definitions section to §2.34. Section 2.35(c) has been rewritten for clarity. A clarifying phrase or word is added to the definition of “patient identifying information” at §2.11, to §2.19(a)(1) and (b)(1) and to §2.21(a)(8). The phrase “or other” has been added to §2.53(c) because a court order under §2.56 may be issued to investigate a program for criminal or administrative purposes. At §2.58(d)(3) alternative language is adopted consistent with language used elsewhere to express a similar thought. At §2.58(d)(4) the term “program” is used in lieu of “person holding the records” inasmuch as none but a program will be providing services to patients.

Regulatory Procedures

Executive Order 12291

This is not a major rule under Executive Order 12291. Overall costs to general medical care facilities will be reduced as a result of the decision to apply the amendments only to specialized alcohol and drug abuse treatment programs. Cost to covered programs will be reduced somewhat by simplification of the rules. The amendments do not have an annual effect on the economy of $100 million or more or otherwise meet the criteria for a major rule under the Executive Order. Thus, no regulatory analysis is required.

Regulatory Flexibility Act

As a result of the decision to apply the regulations only to specialized alcohol and drug abuse treatment programs, the Final Rule will not have a significant economic impact on a substantial number of small entities. The regulations will no longer apply to general medical care providers which render alcohol or drug abuse services incident to their general medical care functions; thus, the number of small entities affected will be less than substantial. The economic impact will be less than significant because much of that impact arises from the cost of determining that the records of a general medical care patient are subject to the regulations and thereafter treating those records differently than all others in the general medical care facility. It is anticipated that programs covered by these rules will realize a small savings as a result of the simplification of the rules.

Information Collection Requirements

Information collection requirements in this Final Rule are:

1. Obtaining written patient consent (§2.31(a)).
2. Notifying each patient of confidentiality provisions (§2.22), and
3. Documenting any disclosure to meet a medical emergency (§2.51). The information collection requirements contained in these final regulations have been approved by the Office of Management and Budget under section 350(h) of the Paperwork Reduction Act of 1980 and have been assigned control number 0930-0099, approved for use through April 30, 1989.

List of Subjects in 42 CFR Part 2

Dated: July 11, 1989.

Robert E. Wisdom, Assistant Secretary for Health.

Otis R. Bowen, Secretary.

The amendments to 42 CFR Part 2 are hereby adopted as revised and set forth below:

PART 2—CONFIDENTIALITY OF ALCOHOL AND DRUG ABUSE PATIENT RECORDS

Subpart A—Introduction

Sec.

2.1 Statutory authority for confidentiality of drug abuse patient records.
2.2 Statutory authority for confidentiality of alcohol abuse patient records.
2.3 Purpose and effect.
2.4 Criminal penalty for violation.
2.5 Reports of violations.

Subpart B—General Provisions

2.11 Definitions.
2.12 Applicability.
2.13 Confidentiality restrictions.
2.14 Minor patients.
2.15 Incompetent and deceased patients.
2.16 Security for written records.
2.17 Undercover agents and informants.
2.18 Restrictions on the use of identification cards.
2.19 Disposition of records by discontinued programs.
2.20 Relationship to State laws.
2.21 Relationship to Federal statutes protecting research subjects against compulsory disclosure of their identity.
2.22 Notice to patients of Federal confidentiality requirements.
2.23 Patient access and restriction on use.
Subpart C—Disclosures With Patient’s Consent

Sec.
2.31 Form of written consent.
2.32 Prohibition on redisclosure.
2.33 Disclosures permitted with written consent.
2.34 Disclosures to prevent multiple enrollments in detoxification and maintenance treatment programs.
2.35 Disclosures to elements of the criminal justice system which have referred patients.

Subpart D—Disclosures Without Patient Consent

2.51 Medical emergencies.
2.52 Research activities.
2.53 Audit and evaluation activities.

Subpart E—Court Orders Authorizing Disclosures and Use

2.61 Legal effect of order.
2.62 Order not applicable to records disclosed without consent to researchers auditors and evaluators.
2.63 Confidential communications.
2.64 Procedures and criteria for orders authorizing disclosures for noncriminal purposes.
2.65 Procedures and criteria for orders authorizing disclosure and use of records to criminally investigate or prosecute patients.
2.66 Procedures and criteria for orders authorizing disclosure and use of records to investigate or prosecute a program or the person holding the records.
2.67 Orders authorizing the use of undercover agents and informants to criminally investigate employees or agents of a program.

Subpart A—Introduction

§ 2.1 Statutory authority for confidentiality of drug abuse patient records.

The restrictions of these regulations upon the disclosure and use of drug abuse patient records were initially authorized by section 408 of the Drug Abuse Prevention, Treatment, and Rehabilitation Act (21 U.S.C. 1175). That section as amended was transferred by Pub. L. 98–24 to section 527 of the Public Health Service Act which is codified at 42 U.S.C. 290e–3. The amended statutory authority is set forth below:

Section 290e–3. Confidentiality of patient records.

(a) Disclosure authorization

Records of the identity, diagnosis, prognosis, or treatment of any patient which are maintained in connection with the performance of any drug abuse prevention function conducted, regulated, or directly or indirectly assisted by any department or agency of the United States shall, except as provided in subsection (e) of this section, be confidential and be disclosed only for the purposes and under the circumstances expressly authorized under subsection (b) of this section.

(b) Purposes and circumstances of disclosure affecting consenting patient and patient regardless of consent

(1) The content of any record referred to in subsection (a) of this section may be disclosed in accordance with the prior written consent of the patient with respect to whom such record is maintained, but only to such extent, under such circumstances, and for such purposes as may be allowed under regulations prescribed pursuant to subsection (a) of this section.

(2) Whether or not the patient, with respect to whom any given record referred to in subsection (a) of this section is maintained, gives his written consent, the content of such record may be disclosed as follows:–

(A) To medical personnel to the extent necessary to meet a bona fide medical emergency.

(B) To qualified personnel for the purpose of conducting scientific research, management audits, financial audits, or program evaluation, but such personnel may not identify, directly or indirectly, any individual patient in any report of such research, audit, or evaluation, or otherwise disclose patient identities in any manner.

(C) If authorized by an appropriate order of a court of competent jurisdiction granted after application showing good cause therefor. In assessing good cause the court shall weigh the public interest and the need for disclosure against the injury to the patient, to the physician-patient relationship, and to the treatment services. Upon the grant of such order, the court, in determining the extent to which any disclosure of all or any part of any record is necessary, shall impose appropriate safeguards against unauthorized disclosure.

(c) Prohibition against use of record in making criminal charges or investigation of patient

Except as authorized by a court order granted under subsection (b)(2)(C) of this section, no record referred to in subsection (a) of this section may be used to initiate or substantiate any criminal charges against a patient or to conduct any investigation of a patient.

(d) Continuing prohibition against disclosure irrespective of status as patient

The prohibitions of this section continue to apply to records concerning any individual who has been a patient, irrespective of whether or when he ceases to be a patient.

(e) Armed Forces and Veterans’ Administration: interchange of records: report of suspected child abuse and neglect to State or local authorities

The prohibitions of this section do not apply to any interchange of records—

(1) within the Armed Forces or within those components of the Veterans’ Administration furnishing health care to veterans, or

(2) between such components and the Armed Forces.

The prohibitions of this section do not apply to the reporting under State law of incidents of suspected child abuse and neglect to the appropriate State or local authorities.

(f) Penalty for first and subsequent offenses

Any person who violates any provision of this section or any regulation issued pursuant to this section shall be fined not more than $500 in the case of a first offense, and not more than $5,000 in the case of each subsequent offense.

(g) Regulations; interagency consultations; definitions, safeguards, and procedures, including procedures and criteria for issuance and scope of orders

Except as provided in subsection (h) of this section, the Secretary, after consultation with the Administrator of Veterans’ Affairs and the heads of other Federal departments and agencies substantially affected thereby, shall prescribe regulations to carry out the purposes of this section. These regulations may contain such definitions, and may provide for such safeguards and procedures, including procedures and criteria for the issuance and scope of orders under subsection (b)(2)(C) of this section, as the judgment of the Secretary is necessary or proper to effectuate the purposes of this section, to prevent circumvention or evasion thereof, or to facilitate compliance therewith.

Subsection (h) was superseded by section 111(c)(3) of Pub. L. 96–581. The responsibility of the Administrator of Veterans’ Affairs to write regulations to provide for confidentiality of drug abuse patient records under Title 38 was moved from 21 U.S.C. 1175 to 38 U.S.C. 4134.

§ 2.2 Statutory authority for confidentiality of alcohol abuse patient records.

The restrictions of these regulations upon the disclosure and use of alcohol abuse patient records were initially authorized by section 333 of the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act of 1970 (42 U.S.C. 4582). The section as amended was transferred by Pub. L. 98–24 to section 523 of the Public Health Service Act
New Law To Permit Reporting of Child Abuse and Neglect

Section 108 of Pub. L. 99–401, the Children's Justice and Assistance Act of 1988, amends sections 522(e) and 527(e) of the Public Health Service Act (42 U.S.C. 290dd–3(e) and 42 U.S.C. 290ee–3(e)) to permit the reporting of suspected child abuse and neglect to appropriate State or local authorities in accordance with State law. The amended sections of the Public Health Service Act provide:

The prohibitions of this section do not apply to the reporting under State law of incidents of suspected child abuse and neglect to the appropriate State or local authorities.

This newly enacted statutory exception to the restrictions on disclosure of information which would identify an alcoholic or drug abuse patient permits a straightforward avenue for making reports of incidents of suspected child abuse and neglect in accordance with State law without resort to devices explained in the preamble to the proposed rule, i.e., obtaining a court order, reporting without identifying the patient as an alcoholic or drug abuser, getting the patient's written consent, entering into a qualified service organization agreement, or reporting a medical emergency to medical personnel. While the potential still exists for using the devices described in the proposed rule, there is no foreseeable reason to use them to report suspected child abuse and neglect in view of the amendment.

Although the new law excepts reports of suspected child abuse and neglect from the statutory restrictions on disclosure and use, it does not affect the applicability of the restrictions to the original alcohol and drug abuse patient record maintained by the program. Accordingly, if following a report of suspected child abuse or neglect, the appropriate State authorities wish to subpoena patient records (or program personnel to testify about patient records) for civil or criminal proceedings relating to the child abuse or neglect, appropriate authorization would be required under the statute and regulations. While written patient consent would suffice for a civil proceeding, it would be necessary to obtain an authorizing court order under paragraph (b)(2)(C) of the confidentiality statutes and §2.65 of the regulations for use of the record to criminally investigate or prosecute a patient.

Editorial Changes

The Final Rule makes very few editorial or clarifying changes to the regulations as proposed.

Number, tense, punctuation, and sequential numbering are changed where appropriate. Definitions applicable only to prevention of multiple enrollments in detoxification and maintenance treatment programs are moved from the definitions section to §2.34. Section 2.35(c) has been rewritten for clarity. A clarifying phrase or word is added to the definition of "patient identifying information" at §2.11, to §2.19(a)(2), §2.19(a)(6), §2.23(a)(3), and §2.23(a)(8). The phrase "or other" has been added to §2.53(c) because a court order under §2.66 may be issued to investigate a program for criminal or administrative purposes. At §2.58(d)(3) alternative language is adopted consistent with language used elsewhere to express a similar thought. At §2.58(d)(4) the term "program" is used in lieu of "person holding the records" inasmuch as none but a program will be providing services to patients.

Regulatory Procedures

Executive Order 12391

This is not a major rule under Executive Order 12391. Overall costs to general medical care facilities will be reduced as a result of the decision to apply the rule only to specialized alcohol and drug abuse treatment programs. Cost to covered programs will be reduced somewhat by simplification of the rules. The amendments do not have an annual effect on the economy of $100 million or more or otherwise meet the criteria for a major rule under the Executive Order. Thus, no regulatory analysis is required.

Regulatory Flexibility Act

As a result of the decision to apply the regulations only to specialized alcohol and drug abuse treatment programs, the Final Rule will not have a significant economic impact on a substantial number of small entities. The regulations will no longer apply to general medical care providers which render alcohol or drug abuse services incident to their general medical care functions; thus, the number of small entities affected will be less than substantial. The economic impact will be less than significant because much of that impact arises from the cost of determining that the records of a general medical care patient are subject to the regulations and thereby treating those records differently than all others in the general medical care facility. It is anticipated that programs covered by these rules will realize a small savings as a result of the simplification of the rules.

Information Collection Requirements

Information collection requirements in this Final Rule are:

1. Obtaining written patient consent (§2.31(a)).
2. Notifying each patient of confidentiality provisions (§2.22), and
3. Documenting any disclosure to meet a medical emergency (§2.51).

The information collection requirements contained in these final regulations have been approved by the Office of Management and Budget under section 3506(h) of the Paperwork Reduction Act of 1980 and have been assigned control number 0930–0099, approved for use through April 30, 1989.

List of Subjects in 42 CFR Part 2

Robert E. Wisdom.
Assistant Secretary for Health.
Ottis R. Bowen.
Secretary.

The amendments to 42 CFR Part 2 are hereby adopted as revised and set forth below:

PART 2—CONFIDENTIALITY OF ALCOHOL AND DRUG ABUSE PATIENT RECORDS

Subpart A—Introduction

Sec.
2.1. Statutory authority for confidentiality of drug abuse patient records.
2.2. Statutory authority for confidentiality of alcohol abuse patient records.
2.3. Purpose and effect.
2.4. Criminal penalty for violation.
2.5. Reports of violations.

Subpart B—General Provisions

2.11 Definitions.
2.12 Applicability.
2.13 Confidentiality restrictions.
2.14 Minor patients.
2.15 Incompetent and deceased patients.
2.16 Security for written records.
2.17 Undercover agents and informants.
2.18 Restrictions on the use of identification cards.
2.19 Disposition of records by discontinued programs.
2.20 Relationship to State laws.
2.21 Relationship to Federal confidentiality requirements.
2.22 Notice to patients of Federal confidentiality requirements.
2.23 Patient access and restriction on use.
which is codified at 42 U.S.C. 290dd-3. The amended statutory authority is set forth below:

**Section 290dd-3. Confidentiality of patient records**

(a) Disclosure authorization

Records of the identity, diagnosis, prognosis, or treatment of any patient which are maintained in connection with the performance of any program or activity relating to alcoholism or alcohol abuse education, training, treatment, rehabilitation, or research, which is conducted, regulated, or directed by a department or agency of the United States shall, except as provided in subsection (e) of this section, be confidential and be disclosed only for the purposes and under the circumstances expressly authorized under subsection (b) of this section.

(b) Purposes and circumstances of disclosure affecting consenting patient and patient regardless of consent

(1) The content of any record referred to in subsection (a) of this section may be disclosed in accordance with the prior written consent of the patient with respect to whom such record is maintained, but only to such extent, under such circumstances, and for such purposes as may be allowed under regulations prescribed pursuant to subsection (g) of this section.

(2) Whether or not the patient, with respect to whom any given record referred to in subsection (a) of this section is maintained, gives his written consent, the content of such record shall be disclosed—

(A) To medical personnel to the extent necessary to meet a bona fide medical emergency.

(B) To qualified personnel for the purpose of conducting scientific research, management audits, financial audits, or program evaluation, but such personnel may not identify, directly or indirectly, any individual patient in any report of such research, audit, or evaluation, or otherwise disclose patient identities in any manner.

(C) If authorized by an appropriate order of a court of competent jurisdiction granted after application showing good cause therefor, in assessing good cause the court shall weigh the public interest and the need for disclosure against the injury to the patient, to the physician-patient relationship, and to the treatment services. Upon the granting of such order, the court, in determining the extent to which any disclosure of all or any part of any record is necessary, shall impose appropriate safeguards against unauthorized disclosures.

(c) Prohibitions against use of record in making criminal charges or investigation of patient

Except as authorized by a court order granted under subsection (b)(2)(C) of this section, no record referred to in subsection (a) of this section may be used to initiate or support any criminal charges against a patient or to conduct any investigation of a patient.

(d) Continuing prohibition against disclosure irrespective of status as patient

The prohibitions of this section continue to apply to records concerning any individual who has been a patient, irrespective of whether or when he ceases to be a patient.

(a) Armed Forces and Veterans' Administration: interchange of record of suspected child abuse and neglect to State or local authorities

The prohibitions of this section do not apply to any interchange of records—

(1) Within the Armed Forces or within those components of the Veterans' Administration furnishing health care to veterans, or

(2) Between such components and the Armed Forces.

(b) Effect. (1) These regulations prohibit the disclosure and use of patient records unless certain circumstances exist. If any circumstances exist under which disclosure is permitted, the circumstance must remove the prohibition on disclosure but it does not compel disclosure. Thus, the regulations do not require disclosure under any circumstances.

(2) These regulations are not intended to direct the manner in which substantive functions such as research, treatment, and evaluation are carried out. They are intended to insure that an alcohol or drug abuse patient in a federally assisted alcohol or drug abuse program is not made more vulnerable by reason of the availability of his or her patient record than an individual who has an alcohol or drug problem and who does not seek treatment.

(3) Because there is a criminal penalty (a fine—see 42 U.S.C. 290ee-3(f), 42 U.S.C. 290dd-3(f) and 42 CFR § 4.4) for violating the regulations, they are to be construed strictly in favor of the potential violator in the same manner as a criminal statute [see M. Kraus & Brothers v. United States, 327 U.S. 614, 621-22, 66 S. Ct. 707-08 (1946)].

§ 2.4 Criminal penalty for violation.

Under 42 U.S.C. 290ee-3(f) and 42 U.S.C. 290dd-3(f), any person who violates any provision of these statutes or these regulations shall be fined not more than $500 in the case of a first offense, and not more than $3,000 in the case of each subsequent offense.

§ 2.5 Reports of violations.

(a) The report of any violation of these regulations may be directed to the United States Attorney for the judicial district in which the violation occurs.

(b) The report of any violation of these regulations by a methadone program may be directed to the Regional Offices of the Food and Drug Administration.

Subpart B—General Provisions

§ 2.11 Definitions.

For purposes of these regulations:

Alcohol abuse means the use of an alcoholic beverage which impairs the
physical, mental, emotional, or social well-being of the user.

Drug abuse means the use of a psychoactive substance for other than medicinal purposes which impairs the physical, mental, emotional, or social well-being of the user.

Diagnosis means any reference to an individual's alcohol or drug abuse or to a condition which is identified as having been caused by that abuse which is made for the purpose of treatment or referral for treatment.

Disclose or disclosure means a communication of patient identifying information, the affirmative verification of another person's communication of patient identifying information, or the communication of any information from the record of a patient who has been identified.

Informant means an individual:
(a) Who is a patient or employee of a program or who becomes a patient or employee of a program at the request of a law enforcement agency or official; and
(b) Who at the request of a law enforcement agency or official observes or interviews patients or employees of the program for the purpose of reporting the information obtained to the law enforcement agency or official.

Patient means any individual who has applied for or been given diagnosis or treatment for alcohol or drug abuse at a federally assisted program and includes any individual who, after arrest on a criminal charge, is identified as an alcohol or drug abuser in order to determine that individual's eligibility to participate in a program.

Patient identifying information means the name, address, social security number, fingerprints, photograph, or similar information by which the identity of a patient can be determined with reasonable accuracy and speed either directly or by reference to other publicly available information. The term does not include a number assigned to a patient by a program, if that number does not consist of, or contain numbers (such as a social security, or driver's license number) which could be used to identify a patient with reasonable accuracy and speed from sources external to the program.

Program means an individual, partnership, corporation, Federal, State or local government agency, or any other legal entity.

Program means a person which in whole or in part holds itself out as providing, and provides, alcohol or drug abuse diagnosis, treatment, or referral for treatment. For a general medical care facility or any part thereof to be a program, it must have:
(a) An identified unit which provides alcohol or drug abuse diagnosis, treatment, or referral for treatment or
(b) Medical personnel or other staff whose primary function is the provision of alcohol or drug abuse diagnosis, treatment, or referral for treatment and who are identified as such providers.

Program director means:
(a) in the case of a program which is an individual, that individual;
(b) in the case of a program which is an organization, the individual designated as director, managing director, or otherwise vested with authority to act as chief executive of the organization.

Qualified service organization means a person which:
(a) Provides services to a program, such as data processing, bill collecting, dosage preparation, laboratory analyses, or legal, medical, accounting, or other professional services, or services to prevent or treat child abuse or neglect, including training on nutrition and child care and individual and group therapy, and
(b) Has entered into a written agreement with a program under which that person:
(1) Acknowledges that in receiving, storing, processing or otherwise dealing with any information from the program, it is fully bound by these regulations; and
(2) If necessary, will resist in judicial proceedings any efforts to obtain access to patient records except as permitted by these regulations.

Records means any information, whether recorded or not, relating to a patient received or acquired by a federally assisted alcohol or drug program.

Third party payer means a person who pays, or agrees to pay, for diagnosis or treatment furnished to a patient on the basis of a contractual relationship with the patient or a member of his family or on the basis of the patient's eligibility for Federal, State, or local governmental benefits.

Treatment means the management and care of a patient suffering from alcohol or drug abuse, a condition which is identified as having been caused by that abuse or both, in order to reduce or eliminate the adverse effects upon the patient.

Undercover agent means an officer of any Federal, State, or local law enforcement agency who enrolls in or becomes an employee of a program for the purpose of investigating a suspected violation of law or who pursues that purpose after enrolling or becoming employed for other purposes.

§ 2.12 Applicability.
(a) General—(1) Restrictions on disclosure. The restrictions on disclosure in these regulations apply to any information whether or not recorded, which:
(i) Would identify a patient as an alcohol or drug abuser either directly, by reference to other publicly available information, or through verification of such an identification by another person; and
(ii) Is drug abuse information obtained by a federally assisted drug abuse program after March 20, 1972, or is alcohol abuse information obtained by a federally assisted alcohol abuse program after May 13, 1974 (or if obtained before the pertinent date, is maintained by a federally assisted alcohol or drug abuse program after that date as part of an ongoing treatment episode which extends past that date) for the purpose of treating alcohol or drug abuse, making a diagnosis for that treatment, or making a referral for that treatment.
(2) Restriction on use. The restriction on use of information to initiate or substantiate any criminal charges against a patient or to conduct any criminal investigation of a patient (42 U.S.C. 290ee-3(c), 42 U.S.C. 290dd-3(c)) applies to any information, whether or not recorded which is drug abuse information obtained by a federally assisted drug abuse program after March 20, 1972, or is alcohol abuse information obtained by a federally assisted alcohol abuse program after May 13, 1974 (or if obtained before the pertinent date, is maintained by a federally assisted alcohol or drug abuse program after that date as part of an ongoing treatment episode which extends past that date) for the purpose of treating alcohol or drug abuse, making a diagnosis for the treatment, or making a referral for the treatment.
(b) Federal assistance. An alcohol abuse or drug abuse program is considered to be federally assisted if:
(1) It is conducted in whole or in part, whether directly or by contract or otherwise by any department or agency of the United States (but see paragraphs (c)(1) and (c)(2) of this section relating to the Veterans' Administration and the Armed Forces);
(2) It is being carried out under a license, certification, registration, or other authorization granted by any department or agency of the United States including but not limited to:
(i) Certification of provider status under the Medicare program;
(ii) Authorization to conduct methadone maintenance treatment (see 21 CFR 291.300); or

(iii) Registration to dispense a substance under the Controlled Substances Act to the extent the controlled substance is used in the treatment of alcohol or drug abuse:

(3) It is supported by funds provided by any department or agency of the United States by being:

(i) A recipient of Federal financial assistance in any form, including financial assistance which does not directly pay for the alcohol or drug abuse diagnosis, treatment, or referral activities; or

(ii) Conducted by a State or local government unit which, through general or special revenue sharing or other forms of assistance, receives Federal funds which could be (but are not necessarily) spent for the alcohol or drug abuse program: or

(iv) It is assisted by the Internal Revenue Service of the Department of the Treasury through the allowance of income tax deductions for contributions to the program or through the granting of tax exempt status to the program.

(c) Exceptions—(1) Veterans' Administration. These regulations do not apply to information on alcohol and drug abuse patients maintained in connection with the Veterans Administration provisions of hospital care, nursing home care, domiciliary care, and medical services under Title 38, United States Code. Those records are governed by 38 U.S.C. 4132 and regulations issued under that authority by the Administrator of Veterans' Affairs.

(2) Armed Forces. These regulations apply to any information described in paragraph (a) of this section which was obtained by any component of the Armed Forces during a period when the patient was subject to the Uniform Code of Military Justice except:

(i) Any interchange of that information within the Armed Forces; and

(ii) Any interchange of that information between the Armed Forces and those components of the Veterans Administration furnishing health care to veterans.

(3) Communication within a program or between a program and an entity having direct administrative control over that program. The restrictions on disclosure in these regulations do not apply to communications of information between or among personnel having a need for the information in connection with their duties that arise out of the provision of diagnosis, treatment, or referral for treatment of alcohol or drug abuse if the communications are

(i) within a program or

(ii) between a program and an entity that has direct administrative control over the program.

(4) Qualified Service Organizations. The restrictions on disclosure in these regulations do not apply to communications between a program and a qualified service organization of information needed by the organization to provide services to the program.

(5) Crimes on program premises or against program personnel. The restrictions on disclosure and use in these regulations do not apply to communications from program personnel to law enforcement officers which—

(i) Are directly related to a patient's commission of a crime on the premises of the program or against program personnel or to a threat to commit such a crime; and

(ii) Are limited to the circumstances of the incident, including the status of the individual committing or threatening to commit the crime, that individual's name and address, and individual's last known whereabouts.

(6) Reports of suspected child abuse and neglect. The restrictions on disclosure and use in these regulations do not apply to the reporting under State law of incidents of suspected child abuse and neglect to the appropriate State or local authorities. However, the restrictions continue to apply to the original alcohol or drug abuse patient records maintained by the program including their disclosure and use for civil or criminal proceedings which may arise out of the report of suspected child abuse and neglect.

(d) Applicability to recipients of information—(1) Restriction on use of information. The restriction on the use of any information subject to these regulations to initiate or substantiate any criminal charges against a patient or to conduct any criminal investigation of a patient applies to any person who obtains that information from a federally assisted alcohol or drug abuse program, regardless of the status of the person obtaining the information or of whether the information was obtained in accordance with these regulations. This restriction on use bars, among other things, the reproduction of that information as evidence in a criminal proceeding and any other use of the information to investigate or prosecute a patient in respect to a suspected crime. Information obtained by law enforcement agents or informants (see § 2.222) is subject to the restriction on use.

(2) Restrictions on disclosures—Third party payers, administrative entities, and others. The restrictions on disclosure in these regulations apply to:

(i) Third party payers with regard to records disclosed to them by federally assisted alcohol or drug abuse programs;

(ii) Entities having direct administrative control over programs with regard to information communicated to them by the program under § 2.12(c); and

(iii) Persons who receive patient records directly from a federally assisted alcohol or drug abuse program and who are notified of the restrictions on redisclosure of the records in accordance with § 2.2(b) of these regulations.

(e) Explanation of applicability—(1) Coverage. These regulations cover any information (including information on referral and intake) about alcohol and drug abuse patients obtained by a program (as the terms "patient" and "program" are defined in § 2.11) if the program is federally assisted in any manner described in § 2.12(b). Coverage includes, but is not limited to, those treatment or rehabilitation programs, employee assistance programs, programs within general hospitals, school-based programs, and private practitioners who hold themselves out as providing, and provide alcohol or drug abuse diagnosis, treatment, or referral for treatment.

(2) Federal assistance to program required. If a patient's alcohol or drug abuse diagnosis, treatment, or referral for treatment is provided by a program which is federally conducted, regulated, or supported in a manner which constitutes Federal assistance under § 2.12(b), that patient's record is not covered by these regulations. Thus, it is possible for an individual patient to benefit from Federal support and not be covered by the confidentiality regulations because the program in which the patient is enrolled is not federally assisted as defined in § 2.12(b). For example, if a Federal court placed an individual in a private for-profit program and made a payment to the program on behalf of that individual, that patient's record would not be covered by these regulations unless the program itself received Federal assistance as defined by § 2.12(b).

(3) Information to which restrictions are applicable. Whether a restriction is on use or disclosure affects the type of information which may be available. The restrictions on disclosure apply to any information which would identify a
patient as an alcohol or drug abuser. The restriction on use of information to bring criminal charges against a patient for a crime applies to any information obtained by the program for the purpose of diagnosis, treatment, or referral for treatment of alcohol or drug abuse. (Note that restrictions on use and disclosure apply to recipients of information under §2.212(d).)

(4) How type of diagnosis affects coverage. These regulations cover any record of a diagnosis identifying a patient as an alcohol or drug abuser which is prepared in connection with the treatment or referral for treatment of alcohol or drug abuse. A diagnosis prepared for the purpose of treatment or referral for treatment but which is not so used is covered by these regulations. The following are not covered by these regulations:

(i) diagnosis which is made solely for the purpose of providing evidence for use by law enforcement authorities; or

(ii) A diagnosis of drug overdose or alcohol intoxication which clearly shows that the individual involved is not an alcohol or drug abuser (e.g., involuntary ingestion of alcohol or drugs or reaction to a prescribed dosage of one or more drugs).

§2.13 Confidentiality restrictions.

(a) General. The patient records to which these regulations apply may be disclosed or used only as permitted by these regulations and may not otherwise be disclosed or used in any civil, criminal, administrative, or legislative proceedings conducted by any Federal, State, or local authority. Any disclosure made under these regulations must be limited to that information which is necessary to carry out the purpose of the disclosure.

(b) Unconditional compliance required. The restrictions on disclosure and use in these regulations apply whether the holder of the information believes that the person seeking the information already has it, has other means of obtaining it, is a law enforcement or other official, has obtained a subpoena, or asserts any other justification for a disclosure or use which is not permitted by these regulations.

(c) Acknowledging the presence of patients: Responding to requests. (1) The presence of an identified patient in a facility or component of a facility which is publicly identified as a place where only alcohol or drug abuse diagnosis, treatment, or referral is provided may be acknowledged only if the patient's written consent is obtained in accordance with subpart C of these regulations or if an authorizing court order is entered in accordance with Subpart E of these regulations. The regulations permit acknowledgement of the presence of an identified patient in a facility or part of a facility if the facility is not publicly identified as only an alcohol or drug abuse diagnosis, treatment or referral facility, and if the acknowledgement does not reveal that the patient is an alcohol or drug abuser.

(2) Any answer to a request for a disclosure of patient records which is not permissible under these regulations must be made in a way that will not affirmatively reveal that an identified individual has been, or is being, diagnosed or treated for alcohol or drug abuse. An inquiring party may be given a copy of these regulations and advised that they restrict the disclosure of alcohol or drug abuse patient records, but may not be told affirmatively that the regulations restrict the disclosure of the records of an identified patient. The regulations do not restrict a disclosure that an identified individual is not and never has been a patient.

§2.14 Minor patients.

(a) Definition of minor. As used in these regulations the term "minor" means a person who has not attained the age of majority specified in the applicable State law, or if no age of majority is specified in the applicable State law, the age of eighteen years.

(b) State law not requiring parental consent to treatment. If a minor patient acting alone has the legal capacity under the applicable State law to apply for and obtain alcohol or drug abuse treatment, any written consent for disclosure authorized under Subpart C of these regulations may be given only by the minor patient. This restriction includes, but is not limited to, any disclosure of patient identifying information to the parent or guardian of a minor patient for the purpose of obtaining financial reimbursement. These regulations do not prohibit a program from refusing to provide treatment until the minor patient consents to the disclosure necessary to obtain reimbursement, but refusal to provide treatment may be prohibited under a State or local law requiring the program to furnish the service irrespective of ability to pay.

(c) State law requiring parental consent to treatment. Where State law requires consent of a parent, guardian, or other person for a minor to obtain alcohol or drug abuse treatment, any written consent for disclosure authorized under Subpart C of these regulations must be given by both the minor and his or her parent, guardian, or other person authorized under State law to act in the minor's behalf.

(2) Where State law requires parental consent to treatment the fact of a minor's application for treatment may be communicated to the minor's parent, guardian, or other person authorized under State law to act in the minor's behalf only if:

(i) The minor has given written consent to the disclosure in accordance with Subpart C of these regulations or

(ii) The minor lacks the capacity to make a rational choice regarding such consent as judged by the program director under paragraph (d) of this section.

(d) Minor applicant for services lacks capacity for rational choice. Facts relevant to reducing a threat to the life or physical well being of the applicant or any other individual may be disclosed to the parent, guardian, or other person authorized under State law to act in the minor's behalf if the program director judges that:

(1) A minor applicant for services lacks capacity because of extreme youth or mental or physical condition to make a rational decision on whether to consent to a disclosure under Subpart C of these regulations to his or her parent, guardian, or other person authorized under State law to act in the minor's behalf, and

(2) The applicant's situation poses a substantial threat to the life or physical well being of the applicant or any other individual which may be reduced by communicating relevant facts to the minor's parent, guardian, or other person authorized under State law to act in the minor's behalf.

§2.15 Incompetent and deceased patients.

(a) Incompetent patients other than minors—(1) Adjudication of incompetence. In the case of a patient who has been adjudicated as lacking the capacity, for any reason other than insufficient age, to manage his or her own affairs, any consent which is required under these regulations may be given by the guardian or other person authorized under State law to act in the patient's behalf.

(2) No adjudication of incompetency. For any period for which the program director determines that a patient, other than a minor or one who has been adjudicated incompetent, suffers from a medical condition that prevents knowing or effective action on his or her own behalf, the program director may exercise the right of the patient to consent to a disclosure under Subpart C of these regulations for the sole purpose of

other person authorized under State law to act in the minor's behalf.

(ii) The minor lacks the capacity to make a rational choice regarding such consent as judged by the program director under paragraph (d) of this section.

(1) A minor applicant for services lacks capacity because of extreme youth or mental or physical condition to make a rational decision on whether to consent to a disclosure under Subpart C of these regulations to his or her parent, guardian, or other person authorized under State law to act in the minor's behalf, and

(2) The applicant's situation poses a substantial threat to the life or physical well being of the applicant or any other individual which may be reduced by communicating relevant facts to the minor's parent, guardian, or other person authorized under State law to act in the minor's behalf.

§2.15 Incompetent and deceased patients.

(a) Incompetent patients other than minors—(1) Adjudication of incompetence. In the case of a patient who has been adjudicated as lacking the capacity, for any reason other than insufficient age, to manage his or her own affairs, any consent which is required under these regulations may be given by the guardian or other person authorized under State law to act in the patient's behalf.

(2) No adjudication of incompetency. For any period for which the program director determines that a patient, other than a minor or one who has been adjudicated incompetent, suffers from a medical condition that prevents knowing or effective action on his or her own behalf, the program director may exercise the right of the patient to consent to a disclosure under Subpart C of these regulations for the sole purpose of
of obtaining payment for services from a third party payer.

(b) Deceased patients—(1) Vital statistics. These regulations do not restrict the disclosure of patient identifying information relating to the cause of death of a patient under laws requiring the collection of death or other vital statistics or permitting inquiry into the cause of death.

(2) Consent by personal representative. Any other disclosure of information identifying a deceased patient as an alcoholic or drug abuser is subject to these regulations. If a written consent to the disclosure is required, that consent may be given by an executor, administrator, or other personal representative appointed under applicable State law. If there is no such appointment the consent may be given by the patient’s spouse or, if none, by any responsible member of the patient’s family.

§ 2.16 Security for written records.

(a) Written records which are subject to these regulations must be maintained in a secure room, locked file cabinet, safe or other similar container when not in use; and

(b) Each program shall adopt in writing procedures which regulate and control access to and use of written records which are subject to these regulations.

§ 2.17 Undercover agents and informants.

(a) Restrictions on placement. Except as specifically authorized by a court order granted under § 2.8 of these regulations, no program may knowingly employ, or enroll as a patient, any undercover agent or informant.

(b) Restriction on use of information. No information obtained by an undercover agent or informant, whether or not that undercover agent or informant is placed in a program pursuant to an authorizing court order, may be used to criminally investigate or prosecute any patient.

§ 2.18 Restrictions on the use of identification cards.

No person may require any patient to carry on his or her person while away from the program premises any card or other object which would identify the patient as an alcoholic or drug abuser. This section does not prohibit a person from requiring patients to use or carry cards or other identification objects on the premises of a program.

§ 2.19 Disposition of records by discontinued programs.

(a) General. If a program discontinues operations or is taken over or acquired by another program, it must purge patient identifying information from its records or destroy the records unless—

(1) The patient who is the subject of the records gives written consent (meeting the requirements of § 2.31) to a transfer of the records to the acquiring program or to any other program designated in the manner of obtaining this consent must minimize the likelihood of a disclosure of patient identifying information to a third party; or

(2) There is a legal requirement that the records be kept for a period specified by law which does not expire until after the discontinuation or acquisition of the program.

(b) Procedure where retention period required by law. If paragraph (a)(2) of this section applies, the records must be:

(1) Sealed in envelopes or other containers labeled as follows: “Records of [insert patient’s name] required to be maintained under [insert citation to statute, regulation, court order or other legal authority requiring that records be kept] until a date not later than [insert appropriate date]”; and

(2) Held under the restrictions of these regulations by a responsible person who must, as soon as practicable after the end of the retention period specified on the label, destroy the records.

§ 2.20 Relationship to State laws.

The statutes authorizing these regulations (42 U.S.C. 290e–3 and 42 U.S.C. 290dd–3) do not preempt the field of law which they cover to the exclusion of all State laws in that field. If a disclosure permitted under these regulations is prohibited under State law, neither these regulations nor the authorizing statutes may be construed to authorize the disclosure that is prohibited by State law. However, no State law may either authorize or compel any disclosure prohibited by these regulations.

§ 2.21 Relationship to Federal statutes protecting research subjects against compulsory disclosure of their identity.

(a) Research privilege description. There may be concurrent coverage of patient identifying information by these regulations and by administrative action taken under Section 303(a) of the Public Health Service Act (42 U.S.C. 242(a) and the implementing regulations at 42 CFR Part 2a); or section 502(c) of the Controlled Substances Act (21 U.S.C. 872(c) and the implementing regulations at 21 CFR 1316.21). These “research privilege” statutes confer on the Secretary of Health and Human Services and on the General, respectively, the power to authorize researchers conducting certain types of research to withhold from all persons not connected with the research the names and other identifying information concerning individuals who are the subjects of the research.

(b) Effect of concurrent coverage. These regulations restrict the disclosure and use of information about patients, while administrative action taken under the research privilege statutes and implementing regulations protects a person engaged in applicable research from being compelled to disclose any identifying characteristics of the individuals who are the subjects of that research. The issuance under Subpart E of these regulations of a court order authorizing a disclosure of information about a patient does not affect an exercise of authority under these research privilege statutes. However, the research privilege granted under 21 CFR 291.505(g) to treatment programs using methadone for maintenance treatment does not protect from compulsory disclosure any information which is permitted to be disclosed under those regulations. Thus, if a court order entered in accordance with Subpart E of these regulations authorizes a methadone maintenance treatment program to disclose certain information about its patients, that program may not invoke the research privilege under 21 CFR 291.505(g) as a defense to a subpoena for that information.

§ 2.22 Notice to patients of Federal confidentiality requirements.

(a) Notice required. At the time of admission or as soon thereafter as the patient is capable of rational communication, each program shall:

(1) Communicate to the patient that Federal law and regulations protect the confidentiality of alcohol and drug abuse patient records and that the program may not invoke the research privilege under 21 CFR 291.505(g) as a defense to a subpoena for that information.

(b) Notice required. The written summary of the Federal law and regulations must include:

(1) A general description of the limited circumstances under which a program may acknowledge that an individual is present at a facility or disclose outside the program information identifying a patient as an alcoholic or drug abuser.

(2) A statement that violation of the Federal law and regulations by a program is a crime and that suspected violations may be reported to appropriate authorities in accordance with these regulations.

(3) A statement that information related to a patient’s commission of a crime on the premises of the program or

95
against personnel of the program is not protected.

(4) A statement that reports of suspected child abuse and neglect made under State law to appropriate State or local authorities are not protected.

(5) A citation to the Federal law and regulations.

(c) Program options. The program may devise its own notice or may use the sample notice in paragraph (d) to comply with the requirement to provide the patient with a summary in writing of the Federal law and regulations. In addition, the program may include in the written summary information concerning State law and any program policy not inconsistent with State and Federal law on the subject of confidentiality of alcohol and drug abuse patient records.

(d) Sample notice.

Confidentiality of Alcohol and Drug Abuse Patient Records

The confidentiality of alcohol and drug abuse patient records maintained by this program is protected by Federal law and regulations. Generally, the program may not say to a person outside the program, or disclose any information identifying a patient as an alcohol or drug abuse patient unless:

1. The patient consents in writing;
2. The disclosure is allowed by a court order; or
3. The disclosure is made to medical personnel in a medical emergency or to qualified personnel for research, audit, or program evaluation.

Violation of the Federal law and regulations by a program is a crime. Suspected violations may be reported to appropriate authorities in accordance with Federal regulations.

Federal law and regulations do not protect any information about a crime committed by a patient either at the program or against a person who works for the program or about any threat to commit such a crime.

Federal laws and regulations do not protect any information about suspected child abuse or neglect from being reported under State law to appropriate State or local authorities.

(Approved by the Office of Management and Budget under Control No. 0930-0098.)

§ 2.23 Patient access and restrictions on use.

(a) Patient access not prohibited. These regulations do not prohibit a program from giving a patient access to his or her own records, including the opportunity to inspect and copy any records that the program maintains about the patient. The program is not required to obtain a patient’s written consent or other authorization under these regulations in order to provide such access to the patient.

(b) Restriction on use of information. Information obtained by patient access to his or her patient record is subject to the restriction on use of his information to initiate or substantiate any criminal charges against the patient or to conduct any criminal investigation of the patient as provided for under § 2.12(d)(1).

Subpart C—Disclosures With Patient’s Consent

§ 2.31 Form of written consent.

(a) Required elements. A written consent to a disclosure under these regulations must include:

1. The specific name or general designation of the program or person permitted to make the disclosure;

2. The name of the individual or the name of the organization to which disclosure is to be made;

3. The name of the patient;

4. The purpose of the disclosure;

5. How much and what kind of information is to be disclosed;

6. The signature of the patient and, when required for a patient who is a minor, the signature of a person authorized to give consent under § 2.14; or, when required for a patient who is incompetent or deceased, the signature of a person authorized to sign under § 2.15 in lieu of the patient;

7. The date on which the consent is signed;

8. A statement that the consent is subject to revocation at any time except to the extent that the program or person which is to make the disclosure has already acted in reliance on it. Acting in reliance includes the provision of treatment services in reliance on a valid consent to disclose information to a third party.

9. The date, event, or condition upon which the consent will expire if not revoked before. This date, event, or condition must insure that the consent will last no longer than reasonably necessary to serve the purpose for which it is given.

(b) Sample consent form. The following form complies with paragraph (a) of this section, but other elements may be added.

1. (name of patient) □ Request □ Authorize
2. (name or general designation of program which is to make the disclosure)

3. To disclose: (kind and amount of information to be disclosed)

4. To: (name of title of the person or organization to which disclosure is to be made)

5. For (purpose of the disclosure)

6. Date (on which this consent is signed)

7. Signature of patient

8. Signature of parent or guardian [where required]

9. Signature of person authorized to sign in lieu of the patient [where required]

10. This consent is subject to revocation at any time except to the extent that the program which is to make the disclosure has already taken action in reliance on it. If not previously revoked, this consent will terminate upon: (specific date, event, or condition)

(c) Expired, deficient, or false consent. A disclosure may not be made on the basis of a consent which:

1. Has expired;

2. On its face substantially fails to conform to any of the requirements set forth in paragraph (a) of this section;

3. Is known to have been revoked; or

4. Is known, or through a reasonable effort could be known, by the person holding the records to be materially false.

(Approved by the Office of Management and Budget under Control No. 0930-0098.)

§ 2.32 Prohibition on redisclosure.

(a) Notice to accompany disclosure. Each disclosure made with the patient’s written consent must be accompanied by the following written statement:

This information has been disclosed to you from records protected by Federal confidentiality rules (42 CFR Part 2). The Federal rules prohibit you from making any further disclosure of this information unless further disclosure is expressly permitted by the written consent of the person to whom it pertains or as otherwise permitted by 42 CFR Part 2. A general authorization for the release of medical or other information is NOT sufficient for this purpose. The Federal rules restrict any use of the information to criminally investigate or prosecute any alcohol or drug abuse patient.

§ 2.33 Disclosures permitted with written consent.

If a patient consents to a disclosure of his or her records under § 2.31, a program may disclose those records in accordance with that consent to any individual or organization named in the consent, except that disclosures to central registries and in connection with criminal justice referrals must meet the requirements of § 2.34 and 2.35, respectively.
Disclosures to prevent multiple enrollments in detoxification and maintenance treatment programs.

(a) Definitions. For purposes of this section:

Central registry means an organization which obtains from two or more member programs patient identifying information about individuals applying for maintenance treatment or detoxification treatment for the purpose of avoiding an individual’s concurrent enrollment in more than one program.

Detoxification treatment means the dispensing of a narcotic drug in decreasing doses to an individual in order to reduce or eliminate adverse physiological or psychological effects incident to withdrawal from the use of a narcotic drug.

Maintenance treatment means the dispensing of a narcotic drug in the treatment of an individual for dependence upon heroin or other morphine-like drugs.

Member program means a detoxification treatment or maintenance treatment program which reports patient identifying information to a central registry and which is in the same State as that central registry or is not more than 125 miles from any border of the State in which the central registry is located.

Restrictions on disclosure. A program may disclose patient records to a central registry or to any detoxification or maintenance treatment program not more than 200 miles away for the purpose of preventing the multiple enrollment of a patient only if:

1. The disclosure is made when:
   a. The patient is accepted for treatment;
   b. The type or dosage of the drug is changed; or
   c. The treatment is interrupted, resumed or terminated;
   d. The disclosure is limited to:
      i. Patient identifying information;
      ii. Type and dosage of the drug; and
      iii. Relevant dates.

2. The disclosure is made with the patient’s written consent meeting the requirements of §2.31, except that:
   a. The consent must list the name and address of each central registry and each known detoxification or maintenance treatment program to which a disclosure will be made; and
   b. The consent may authorize a disclosure to any detoxification or maintenance treatment program established within 200 miles of the program after the consent is given without naming any such program.

(c) Use of information limited to prevention of multiple enrollments. A central registry and any detoxification or maintenance treatment program to which information is disclosed to prevent multiple enrollments may not redisclose or use patient identifying information for any purpose other than the prevention of multiple enrollments unless authorized by a court order under Subpart E of these regulations.

(d) Permitted disclosure by a central registry to prevent a multiple enrollment. When a member program asks a central registry if an identified patient is enrolled in another member program and the registry determines that the patient is so enrolled, the registry may disclose—

1. The name, address, and telephone number of the member program in which the patient is already enrolled to the member program asking for information.

2. The name, address, and telephone number of the inquiring member program to the member program in which the patient is already enrolled.

The member programs may communicate as necessary to verify that no error has been made and to prevent or eliminate any multiple enrollment.

(e) Permitted disclosure by a detoxification or maintenance treatment program to prevent a multiple enrollment. A detoxification or maintenance treatment program which has received a disclosure under this section and has determined that the patient is already enrolled may communicate as necessary with the program making the disclosure to verify that no error has been made and to prevent or eliminate any multiple enrollment.

§2.35 Disclosures to elements of the criminal justice system which have referred patients.

(a) A program may disclose information about a patient to those persons within the criminal justice system which have made participation in the program a condition of the disposition of any criminal proceeding against the patient or of the patient’s parole or other release from custody if:

1. The disclosure is made only to those individuals within the criminal justice system who have a need for the information in connection with their duty to monitor the patient’s progress (e.g., a prosecuting attorney who is withholding charges against the patient, a court granting pretrial or posttrial release, probation or parole officers responsible for supervision of the patient); and

2. The patient has signed a written consent meeting the requirements of §2.31 (except paragraph (a)(8) which is inconsistent with the revocation provisions of paragraph (c) of this section) and the requirements of paragraphs (b) and (c) of this section.

(b) Duration of consent. The written consent must state the period during which it remains in effect. This period must be reasonable, taking into account:

1. The anticipated length of the treatment;

2. The type of criminal proceeding involved, the need for the information in connection with the final disposition of that proceeding, and when the final disposition will occur;

3. Such other factors as the program, the patient, and the person(s) who will receive the disclosure consider pertinent.

(c) Revocation of consent. The written consent must state that it is revocable upon the passage of a specified amount of time or the occurrence of a specified, ascertainable event. The time or occurrence upon which consent becomes revocable may be no later than the final disposition of the conditional release or other action in connection with which consent was given.

(d) Restrictions on disclosure and use. A person who receives patient information under this section may disclose and use it only to carry out that person’s official duties with regard to the patient’s conditional release or other action in connection with which the consent was given.

Subpart D—Disclosures Without Patient Consent

§2.51 Medical emergencies.

(a) General Rule. Under the procedures required by paragraph (c) of this section, patient identifying information may be disclosed to medical personnel who have a need for information about a patient for the purpose of treating a condition which poses an immediate threat to the health of any individual and which requires immediate medical intervention.

(b) Special Rule. Patient identifying information may be disclosed to medical personnel of the Food and Drug Administration (FDA) who assert a reason to believe that the health of any individual may be threatened by an error in the manufacture, labeling, or sale of a product under FDA jurisdiction, and that the information will be used for the exclusive purpose of notifying patients or their physicians of potential dangers.

(c) Procedures. Immediately following disclosure, the program shall document the disclosure in the patient’s records, setting forth in writing:
(1) The name of the medical personnel to whom disclosure was made and their affiliation with any health care facility;

(2) The name of the individual making the disclosure;

(3) The date and time of the disclosure; and

(4) The nature of the emergency (or error, if the report was to FDA).

(Approved by the Office of Management and Budget under Control No. 0939-0099.)

§ 2.52 Research activities.

(a) Patient identifying information may be disclosed for the purpose of conducting scientific research if the program director makes a determination that the recipient of the patient identifying information:

(1) Is qualified to conduct the research; and

(2) Has a research protocol under which the patient identifying information:

(i) Will be maintained in accordance with the security requirements of § 2.18 of these regulations (or more stringent requirements); and

(ii) Will not be redisclosed except as permitted under paragraph (b) of this section.

(b) A person conducting research may disclose patient identifying information obtained under paragraph (a) of this section only back to the program from which that information was obtained and may not identify any individual patient in any report of that research or otherwise disclose patient identities.

§ 2.53 Audit and evaluation activities.

(a) Records not copied or removed. If patient records are not copied or removed, patient identifying information may be disclosed in the course of a review of records on program premises to any person who:

(1) Agrees in writing to:

(i) Maintain the patient identifying information in accordance with the security requirements provided in § 2.18 of these regulations (or more stringent requirements);

(ii) Destroy all the patient identifying information upon completion of the audit or evaluation; and

(iii) Comply with the limitations on disclosure and use in paragraph (d) of this section; and

(2) Performs the audit or evaluation activity on behalf of:

(i) An authorized audit or evaluation organization.

(b) Copying or removal of records. Records containing patient identifying information may be copied or removed from program premises by any person who:

(i) Maintains the patient identifying information in accordance with the security requirements of § 2.18 of these regulations (or more stringent requirements).

(ii) Destroys all the patient identifying information upon completion of the audit or evaluation;

(iii) Comply with the limitations on disclosure and use in paragraph (d) of this section; and

(iv) Performs the audit or evaluation activity on behalf of:

(A) An authorized audit or evaluation organization.

§ 2.51 Legal effect of order.

(a) Effect. An order of a court of competent jurisdiction entered under this subpart is a unique kind of court order. Its only purpose is to authorize a disclosure or use of patient information which would otherwise be prohibited by 42 U.S.C. 290ee-3, 42 U.S.C. 290dd-3 and these regulations. Such an order does not compel disclosure. A subpoena or a similar legal mandate must be issued in order to compel disclosure. This mandate may be entered at the same time as and accompany an authorizing court order entered under these regulations.

(b) Examples. (1) A person holding records subject to these regulations receives a subpoena for those records: a response to the subpoena is not permitted under the regulations unless an authorizing court order is entered. The person may not disclose the records in response to the subpoena unless a court of competent jurisdiction enters an authorizing order under these regulations.

(2) An authorizing court order is entered under these regulations, but the person authorized does not want to make the disclosure. If there is no subpoena or other compulsory process or a subpoena for the records has expired or been quashed, that person may refuse to make the disclosure. Upon the entry of a valid subpoena or other compulsory process the person authorized to disclose must disclose, unless there is a valid legal defense to the process other than the confidentiality restrictions of these regulations.

§ 2.62 Order not applicable to records disclosed without consent to researchers, auditors and evaluators.

A court order under these regulations may not authorize qualified personnel, who have received patient identifying information without consent for the purpose of conducting research, audit or evaluation, to disclose that information.
Federal Register / Vol. 52, No. 110 / Tuesday, June 9, 1987 / Rules and Regulations 21813

or use it to conduct any criminal investigation or prosecution of a patient. However, a court order under § 2.66 may authorize the disclosure and use of records to investigate or prosecute qualified personnel holding the records.

§ 2.63 Confidential communications.
(a) A court order under these regulations may authorize the disclosure of confidential communications made by a patient to a program in the course of diagnosis, treatment, or referral for treatment only if:
   (1) The disclosure is necessary to protect against an existing threat to life or of serious bodily injury, including circumstances which constitute suspected child abuse and neglect and verbal threats against third parties;
   (2) The disclosure is necessary in connection with investigation or prosecution of an extremely serious crime, such as one which directly threatens life or serious bodily injury, including homicide, rape, kidnapping, armed robbery, assault with a deadly weapon, or child abuse and neglect;
   (3) The disclosure is in connection with litigation or an administrative proceeding in which the patient offers testimony or other evidence pertaining to the content of the confidential communications.

§ 2.64 Procedures and criteria for orders authorizing disclosures for noncriminal purposes.
(a) Application. An order authorizing the disclosure of patient records for purposes other than criminal investigation or prosecution may be applied for by any person having a legally recognized interest in the disclosure which is sought. The application may be filed separately or as part of a pending civil action in which it appears that the patient records are needed to provide evidence. An application must use a fictitious name, such as John Doe, to refer to any patient and may not contain or otherwise disclose any patient identifying information unless the patient is the applicant or has given a written consent (meeting the requirements of these regulations) to disclosure or the court has ordered the record of the proceeding sealed from public scrutiny.
(b) Notice. The patient and the person holding the records from whom disclosure is sought must be given:
   (1) Adequate notice in a manner which will not disclose patient identifying information to other persons:
   (2) An opportunity to file a written response to the application, or to appear in person, for the limited purpose of providing evidence on the statutory and regulatory criteria for the issuance of the court order.
(c) Review of evidence: Conduct of hearing. Any oral argument, review of evidence, or hearing on the application must be held in the judge's chambers or in some manner which ensures that patient identifying information is not disclosed to anyone other than a party to the proceeding, the patient, or the person holding the record, unless the patient requests an open hearing in a manner which meets the written consent requirements of these regulations. The proceeding may include an examination by the judge of the patient records referred to in the application.
(d) Criteria for entry of order. An order under this section may be entered only if the court determines that good cause exists. To make this determination the court must find that:
   (1) the information and the manner of obtaining the information are not available or would not be effective; and
   (2) the public interest and need for the disclosure outweigh the potential injury to the patient, the physician-patient relationship and the treatment services;
(e) Content of order. An order authorizing a disclosure must:
   (1) Limit disclosure to those parts of the patient's record which are essential to fulfill the objective of the order;
   (2) Limit disclosure to those persons whose need for information is the basis for the order; and
   (3) Include such other measures as are necessary to limit disclosure for the protection of the patient, the physician-patient relationship and the treatment services: for example, sealing from public scrutiny the record of any proceeding for which disclosure of a patient's record has been ordered.

§ 2.65 Procedures and criteria for orders authorizing disclosure and use of records to criminally investigate or prosecute patients.
(a) Application. An order authorizing the disclosure of the record of the proceeding sealed from public scrutiny.
(b) Notice and hearing. Unless an order under § 2.64 is sought with an order under this section, the person holding the records must be given:
   (1) Adequate notice (in a manner which will not disclose patient identifying information to third parties) of an application by a person performing a law enforcement function:
   (2) An opportunity to appear and be heard for the limited purpose of providing evidence on the statutory and regulatory criteria for the issuance of the court order and:
   (3) An opportunity to be represented by counsel independent of counsel for an applicant who is a person performing a law enforcement function.
(c) Review of evidence: Conduct of hearings. Any oral argument, review of evidence, or hearing on the application shall be held in the judge's chambers or in some manner which ensures that patient identifying information is not disclosed to anyone other than a party to the proceedings, the patient, or the person holding the records. The proceeding may include an examination by the judge of the patient records referred to in the application.
(d) Criteria. A court may authorize the disclosure and use of patient records for the purpose of conducting a criminal investigation or prosecution of a patient only if the court finds that all of the following criteria are met:
   (1) The crime involved is extremely serious, such as one which causes or directly threatens loss of life or serious bodily injury including attempted suicide, homicide, rape, kidnapping, armed robbery, assault with a deadly weapon, and child abuse and neglect;
   (2) There is a reasonable likelihood that the records will disclose information of substantial value in the investigation or prosecution;
   (3) Other ways of obtaining the information are not available or would not be effective;
   (4) The potential injury to the patient, to the physician-patient relationship and to the ability of the program to provide services to other patients is outweighed by the public interest and the need for the disclosure;
   (5) If the applicant is a person performing a law enforcement function that:
      (i) The person holding the record has been afforded the opportunity to be represented by independent counsel and
      (ii) Any person holding the records which is an entity within Federal, State, or local government has in fact been
representatively by counsel independent of the applicant.

(e) Content of order. Any order authorizing a disclosure or use of patient records under this section must:

(1) Limit disclosure and use to those parts of the patient's records which are essential to fulfill the objective of the order.

(2) Limit disclosure to those law enforcement and prosecutorial officials who are responsible for, or are conducting, the investigation or prosecution, and limit their use of the records to investigation and prosecution of extremely serious crime or suspected crime specified in the application; and

(3) Include such other measures as are necessary to limit disclosure and use to the fulfillment on only that public interest and need found by the court.

§ 2.66 Procedures and criteria for orders authorizing disclosure and use of records to investigate or prosecute a program or the person holding the records.

(a) Application. (1) An order authorizing the disclosure or use of patient records to criminally or administratively investigate or prosecute a program or the person holding the records

(2) The application may be filed separately or as part of a pending civil or criminal action against a program or the person holding the records (or agents or employees of the program or person) in which it appears that the patient records are needed to provide material evidence. The application must state the application for an order under § 2.85 of these regulations.

§ 2.67 Orders authorizing the use of undercover agents and informants to criminally investigate employees or agents of a program.

(a) Application. A court order authorizing the placement of an undercover agent or informant in a program as an employee or patient may be applied for by any law enforcement or prosecutorial agency which has reason to believe that employees or agents of the program are engaged in criminal misconduct.

(b) Notice. The program director must be given adequate notice of the application and an opportunity to appear and be heard (for the limited purpose of providing evidence on the statutory and regulatory criteria for the issuance of the court order), unless the application asserts a belief that:

(1) The program director is involved in the criminal activities to be investigated by the undercover agent or informant.

(2) The program director will intentionally or unintentionally disclose the proposed placement of an

undercover agent or informant to the employees or agents who are suspected of criminal activities.

(c) Criteria. An order under this section may be entered only if the court determines that good cause exists. To make this determination the court must:

(1) There is reason to believe that an employee or agent of the program is engaged in criminal activity;

(2) Other ways of obtaining evidence of this criminal activity are not available or would not be effective; and

(3) The public interest and need for the placement of an undercover agent or informant in the program outweigh the potential injury to patients of the program, physician-patient relationships and the treatment services.

(d) Content of order. An order authorizing the placement of an undercover agent or informant in a program must:

(1) Specifically authorize the placement of an undercover agent or an informant;

(2) Limit the total period of the placement to six months;

(3) Prohibit the undercover agent or informant from disclosing any patient identifying information obtained from the placement except as necessary to criminally investigate or prosecute employees or agents of the program; and

(4) Include any other measures which are appropriate to limit any potential disruption of the program by the placement and any potential for a real or apparent breach of patient confidentiality; for example, sealing from public scrutiny the record of any proceeding for which disclosure of a patient's record has been ordered.

(e) Limitation on use of information. No information obtained by an undercover agent or informant placed under this section may be used to criminally investigate or prosecute any patient or as the basis for an application for an order under § 2.85 of these regulations.

Module XII: SPECIAL POPULATIONS

PURPOSE
This module is designed to acquaint you with issues surrounding the application of the TASC model to the following populations: adolescent offenders, DUI offenders, chronically mentally ill offenders and perpetrators of family violence.

OBJECTIVES

By the end of this session you will be able to:

- Provide through written examples three elements of the TASC model which correspond to the needs of adolescent offenders and the juvenile justice system

- Provide through written examples three elements of the TASC model which correspond to the needs of DUI offenders

- Provide through written examples three elements of the TASC model which correspond to the needs of the chronically mentally ill offender

- Provide through written examples three elements of the TASC model which correspond to the needs of perpetrators of family violence
Special Population Considerations

ADOLESCENT OFFENDERS

DUI OFFENDERS

CHRONICALLY MENTALLY ILL OFFENDERS

FAMILY VIOLENCE PERPETRATORS
Case Profile: Adolescent Offender

A 15 year old girl who attends a public school in a local suburb is referred to TASC. Her school performance is deteriorating from straight A's, and she was thrown off the gymnastics team after showing up for practice obviously under the influence of alcohol. She has frequently missed classes during the previous six months, and is now on academic and social probation. Well-liked and previously successful, she had won a civic merit prize for character and academic achievement in sixth grade. Her physician father and both grandfathers are recovering alcoholics. The girl has no previous treatment experience.

At the time of the evaluation she was drinking daily, starting with a pint of wine before school. She reports no ability to control her drinking. When she tried to stop she became anxious and developed a rapid heart beat. She was defensive and frightened about her drinking. Her arrest on the previous weekend for shoplifting a bottle of wine from a convenience store resulted in her intake into the local juvenile detention center. The girl has also been charged with resisting arrest when she became belligerent with the arresting officer. He noted on the arrest report that she appeared to be intoxicated at the time of arrest.

List the issues TASC must address in order to intervene effectively with this client.
Case Profile: DUI Offender

Karen Martin is a 32 year old white female ordered to TASC by the county traffic court. She is charged with DUI/DWI and numerous other charges resulting from a collision with another car in which the second car was totalled and the driver hospitalized. At the time of arrest Martin's blood alcohol level was .15. She is married, employed and has one child. This is her first DUI/DWI arrest. She has no criminal history and has never received any type of substance abuse treatment.

List the issues TASC must address in order to intervene effectively with this client.
Case Profile: Chronically Mentally Ill Offender

Don Jenkins is a 24 year old white male carrying a diagnosis of schizophrenia, chronic undifferentiated type, first diagnosed at the age of 17. Don is also known to abuse substances, particularly alcohol and marijuana. He is of borderline intellectual functioning with a full scale IQ of 75. Don’s parents are divorced. His father’s whereabouts are unknown. His mother and stepfather live in the area, but are unable to care for him at home due to Don’s bizarre behavior and threats of violence toward his mother.

Don is frequently preoccupied with devils and the occult. He is often demanding and threatening toward others. He has a history of arrests for trespassing, public intoxication and battery. He has been barred from the community mental health center’s residential programs because of aggressive acts toward residents and staff, as well as substance use. He is eligible for SSD, SSI and OSS, as well as Medicaid benefits, with total benefits of $520 per month.

Don is currently prescribed prolyxin, a major tranquilizer used to control his illness. IM injections of the drug are utilized to ensure adherence to the medication regime. Don is currently nearing release from a civil psychiatric hospital after serving nearly two years in a state corrections mental health institution, followed by a state hospital for the criminally insane, and then the civil hospital. Don will remain under the indefinite jurisdiction of the court as a result of being found not guilty by reason of insanity on a charge of aggravated assault. The judge has asked TASC to coordinate local placement and case management of Don when he returns to the community.

List the issues TASC must address in order to intervene effectively with this client.
Case Profile: Family Violence Perpetrator

Ronnie Black, an enlisted Navy man, was arrested for spouse abuse when he became violent during an argument over family finances one evening. He struck his wife several times. After the attack she took their two daughters, ages 1 and 4, with her to a local shelter for battered women. She informed staff at the shelter that this was at least the fifth similar episode of violence. Ronnie moved out of the house into the barracks on base. A restraining order was placed on Ronnie barring him from the house. Two nights after the order was issued, his wife called him. She sounded intoxicated on the phone and claimed that she had taken a number of sleeping pills.

Ronnie called an ambulance to the house, fearing for his wife's and children's safety. Medics found his wife not to be in any state of medical emergency. When Ronnie arrived at the home shortly thereafter, his wife called the police and had him arrested for violating the restraining order.

List the issues TASC must address in order to intervene effectively with this client.
TASC CRITICAL ELEMENT TRAINING POSTTEST

1. Name two types of frequently used urinalysis confirmation tests. ______________________________________________________________

2. List the three client eligibility criteria generic to most TASC programs. ______________________________________________________________

3. The best metaphor to describe TASC's linkage with criminal justice and treatment is _____________________________________________

4. List five of the ten TASC critical program elements. ______________________________________________________________

5. Five of the critical elements may be described as ________________, while the other five are described as __________________________

6. List 8 common stages in the processing of defendants by the criminal justice system. _____________________________________________

7. Two benefits of TASC intervention to the criminal justice system include ____________________________ and ____________________________

8. Formal agreements between TASC and justice agencies should include ________________ and ________________

9. List three major drug abuse treatment program modalities. ______________________________________________________________

10. List two barriers to good working relationships between TASC and treatment. ________________________________________________

11. List two variables which can affect the development of local eligibility criteria. ________________________________________________

12. List three components of a TASC screening interview. ______________________________________________________________

13. List six components of an assessment interview. ______________________________________________________________
14. List three variables which affect TASC's treatment referral capability.

15. Define the term "case management."

16. Describe the most common TASC strategy for assisting clients who are in danger of termination from a treatment program.

17. List four documents which must be in the client file.

18. Define the term "chain of custody" as it relates to TASC.

19. List two types of technology available for urine testing.

20. List two differences between a general release of confidential information and a criminal justice release.

21. List two situations where information can be released about a client without his/her consent.

22. List five of the nine elements of a general release of information.

23. Where are confidentiality regulations published?

24. List three populations other than adult drug abusers where the TASC model has been proven effective.

25. List two problems associated with urine collection.
