Bureau of Justice Statistics reports

(revised February 1990)

Call toll-free 800-732-3277 (local 301/251-6500) to order BJS reports, to be added to one of the BJS mailing lists, or to speak to a reference specialist in statistics at the Justice Statistics Clearinghouse, National Criminal Justice Reference Service, Box 6000, Rockville, MD 20850.

BJS maintains the following mailing lists:

- Law enforcement reports (new)
- Drugs and crime data (new)
- Justice spending & employment
- White-collar crime
- National Crime Survey (annual)
- Corrections (annual)
- Juvenile corrections (annual)
- Courts (annual)
- Privacy and security of criminal history information and information policy
- Federal statistics (annual)
- BJS bulletins and special reports (approximately twice a month)
- Sourcebook of Criminal Justice Statistics (annual)

Single copies of reports are free; use NCJ number to order. Postage and handling are charged for bulk orders of single reports. For single copies of multiple titles, up to 10 titles are free; 11-40 titles \$10; more than 40, \$20; libraries call for special rates.

Public-use tapes of BJS data sets and other criminal justice data are available from the National Archive of Criminal Justice Data (formerly CJA/N), P.O. Box 1246, Ann Arbor, MI 48106 (toll-free 1-800-999-0960).

Acknowledgments

Hundreds of criminal justice professionals contributed to the success of the 1990 series of *Directories* by providing information on the level of automation in their agencies and describing criminal justice information systems. The National Clearinghouse for Criminal Justice Information Systems is grateful for the participation of these practitioners and developers and for the support and leadership of the Bureau of Justice Statistics which has long recognized the value of information technology to the administration of justice.

Foreword

The Bureau of Justice Statistics has supported and long encouraged the criminal justice community to replicate, coordinate and share information management systems, policy and data. To facilitate such sharing, BJS and SEARCH Group have, since 1980, collaborated on producing three editions of the *Directory of Automated Criminal Justice Information Systems*, a project initiated by the Law Enforcement Assistance Administration in 1972. The *Directories* provide information about particular information systems and the level of automation among justice agencies. They are designed with the specific intent of facilitating the exchange of information and the transfer or adaptation of exemplary systems.

Our latest, and fourth such collaboration, the 1990 edition of the *Directory of Automated Criminal Justice Information Systems*, is comprised of five separate volumes, one for each of the principal criminal justice disciplines: Corrections, Courts, Law Enforcement, Probation and Parole, and Prosecution. Taken together, the *Directories* are a valuable resource for criminal justice agencies in the process of selecting an automated information management system that will meet their individual needs. It is the hope of the Bureau of Justice Statistics that this series of *Directories* will promote computerized information processing and also will help state and local agencies to generate accurate and timely criminal justice statistics.

This series of *Directories* is part of the Bureau of Justice Statistics' continuing efforts to inform the national justice community of advances in information management and to promote automation among criminal justice practitioners nationwide.

Introduction

In 1976 SEARCH Group created the National Clearinghouse for Criminal Justice Information Systems to promote and facilitate the transfer of automated, public domain information management systems. The role of the Clearinghouse has grown to include the collection and dissemination of information about proprietary information systems as well. In support of this function, the Clearinghouse maintains the Automated Index of Criminal Justice Information Systems — a database containing information on automated systems and the hundreds of agencies using those systems. Since 1980 the Clearinghouse, with support from the Bureau of Justice Statistics, has published three editions of the *Directory of Automated Criminal Justice Information Systems* based on information generated from the Index's database. The *Directory* has served as a valuable resource for criminal justice practitioners who needed guidance in selecting an appropriate automated records system and it has also helped to minimize duplicate system development efforts.

Methodology

The SEARCH Automated Index of Criminal Justice Information Systems, the database for the printed *Directory*, was completely redesigned in 1989 and this *Prosecution Directory* reflects that revision. The redesign of the Automated Index altered the structure of the database and required modifications to the survey instrument used to collect the data. (See Appendix 3, *Sample Survey: Prosecution* and Appendix 4, *Sample Survey: Software Developer* for samples of the survey instrument.) Surveys were mailed to all agencies and software developers listed in the 1986 *Directory of Automated Criminal Justice Information Systems*. In addition, SEARCH requested state planning agencies, statistical analysis centers, state Attorneys General, and the directors of state and national criminal justice associations to identify automated criminal justice agencies and justice information systems that would be appropriate to include in the 1990 series of *Directories*. SEARCH then mailed surveys to the agencies and the system developers/

vendors. If a vendor identified agencies where the vendor's product was installed, a survey was also mailed to those agencies.

Organization and Use

The *Directory* has traditionally been published at three-year intervals as a single, large volume. In this 1990 edition, five separate volumes were published — one *Directory* for each of the principal criminal justice disciplines: *Corrections* (Volume I); *Courts* (Volume II); *Law Enforcement* (Volume III); *Probation and Parole* (Volume IV); and *Prosecution* (Volume V). Separate, discipline-specific volumes significantly reduced the publication size, making it easier for users to quickly locate the information they need. Together, the *Directories* contain profiles on 130 automated systems and over 700 criminal justice agencies.

Each *Directory* is divided into four parts: Part I, Agency Description Records; Part II, System Description Records; Part III, Indices; and Part IV, Appendices. The Agency Description Records are based on information provided by individual agencies that responded to SEARCH's national survey of criminal justice agencies, and the System Description Records reflect survey responses from the system developers and vendors.

A primary difference between past editions of the *Directory* and the 1990 edition is the manner in which information is presented. Previously, an automated system that was operating in several different agencies was independently described in the *Directory* by each installation, causing a great deal of duplication and some inaccuracies in the publication. Now, in the 1990 edition, the system information is listed only once, and agencies using that particular system are cross-referenced.

Part I: Agency Description Records

Agency Description Records for prosecution are divided into four sections. The first section at the top of the page provides the name, address and telephone number of the agency, the name and title of a contact person, and indicates the type of agency, the population size of the jurisdiction served, the number of full-time and part-

time prosecutors, and the number of criminal and civil cases filed in 1988.

The second section, "Computer Equipment," contains information on the agency's computer hardware. The record describes the agency's access to a computer (whether it has exclusive use, shares with another agency or division, or relies on a central data processing bureau for computer services); the number of Full-time Equivalent data processing employees; and the hardware configurations used (type, manufacturer and model, operating system, quantity and the type of Local Area Network).

The third section, "Automated Functions," lists the agency's general functions that are automated, such as accounting, electronic mail, spreadsheets and word processing. This section also lists any automated functions that are specific to prosecution, such as assignment-attorneys, subpoena processing and victim/witness control. (See Appendix 1, *Automated Functions: Discipline-Specific*, for a complete listing of the choice of automated functions for each discipline.)

The final section of the Agency Description Record is "Criminal Justice Software Applications," which lists the name and acronym of any criminal justice or prosecution-specific software application currently used by the agency. If the software package has a corresponding System Description Record entry containing system information supplied by the developer/vendor, then the page on which that record appears is also listed. This cross-reference enables the reader to learn about the functions, features and operational requirements of the system.

Part II: System Description Records

Prosecution System Description Records are divided into five sections. The first section lists the product name and acronym (if there is one), as well as the developer's name, address, telephone number and the name and title of a contact person. The record indicates whether the product is proprietary or in the public domain, whether the software can be modified and whether the

source code is available. It also identifies the programming language the system is written in, and lists the vendor support services offered and any special product features.

Section two, "Computer Equipment," lists the hardware configurations upon which the system runs, indicating the type (main-frame, minicomputer or microcomputer), manufacturer and model, operating system, and if it runs on a Local Area Network.

Section three, "Automated Functions," lists any automated functions of the system that are specific to prosecution, such as calendaring/scheduling, case management and victim/witness control. (See Appendix 1, *Automated Functions: Discipline-Specific*, for a complete listing of the choice of automated functions for each discipline.)

The fourth section is the "Narrative" in which the vendor provides a general description of the system, and often includes the price of the product.

The fifth, and final, section of the System Description Record, "System Users," lists up to three agencies that have obtained the named product. If the specified agency has a corresponding Agency Description Record entry containing operational information supplied by a prosecutor's office, then the page on which that record appears is also listed. This cross-reference enables the reader to learn about the agency in which the system is operating.

Part III: Indices

The *Prosecution Directory* has two major types of Indices which enable readers to search the *Directory* quickly and easily for information on agencies and systems: Agency Indices and System Indices.

Index A, Agency Indices, includes five Indices of the agencies described in Part I: Agency Description Records:

1. *Agency Index by Agency Name* — alphabetically lists agencies by name, and includes each agency's city and state;
2. *Agency Index by Total Cases Filed/1988* — numerically ranks the agencies by the number of cases they filed in calendar year 1988, and includes the agency name, city and state;
3. *Agency Index by Computer Equipment* — alphabetically lists hardware manufacturer and model number of the computer equipment used by each agency;
4. *Agency Index by Automated Functions* — organizes the agencies by type of prosecution-related automated function, and alphabetically lists each agency by name;
5. *Agency Index by Criminal Justice Software* — alphabetically lists the criminal justice software applications that each agency has indicated it uses.

Index B, System Indices, includes five Indices of the systems described in Part II: System Description Records:

1. *System Index by System Name* — alphabetically lists systems by name, and includes each system's acronym, if there is one;
2. *System Index: Mainframes and Minicomputers* — alphabetically lists hardware manufacturer and model number of the mainframe or microcomputer that runs the listed software system;
3. *System Index: Microcomputers* — alphabetically lists the microcomputer's operating system that is required to run the listed software system;
4. *System Index by Automated Functions* — organizes systems by type of prosecution-related automated function, and alphabetically lists each agency by name; and

5. *System Index of Public Domain Systems* — alphabetically lists those systems that are in the public domain.

Part IV: Appendices

This *Prosecution Directory* has the following five Appendices:

1. *Automated Functions: Discipline-Specific* — A list of the discipline-specific, automated system functions included on the survey instrument. This listing includes the automated functions for each of the five disciplines: Corrections, Courts, Law Enforcement, Probation and Parole, and Prosecution;
2. *Manufacturer Abbreviations* — An alphabetical list of the abbreviations used to describe hardware manufacturers throughout the *Directory*, and the corresponding full company name;
3. *Sample Survey: Prosecution* — A sample of the survey form mailed to prosecutors;
4. *Sample Survey: Software Developer* — A sample of the survey form mailed to software developers and vendors; and
5. *Update/Correction Notification Form* — A form to be used to inform SEARCH of any agency or system record additions, updates, omissions or corrections.

Limitations

Although the compilers of this *Prosecution Directory* have sought to create a useful and comprehensive resource document, readers need to be aware of and understand its limitations. It is not an exhaustive list of all automated criminal justice agencies or of all criminal justice information management systems. The publication is based on information voluntarily provided by criminal justice practitioners and system developers and vendors who responded to our survey. It was not possible to verify all submitted information and thus the data were accepted and used as reported.

If, for example, a survey was incomplete or an answer was unclear, the *Directory* will show a blank for that particular response.

Whenever possible, systems listed under "Criminal Justice Software Applications" in an Agency Description Record will be cross-referenced with a System Description Record. Likewise, if a developer describes a system in a System Description Record and indicates that the system is operational in a particular agency, every attempt was made to create a corresponding Agency Description Record. As mentioned above, however, records were only created if the developer and the agency submitted a complete survey form.

This *Prosecution Directory* can provide an excellent overview of a prosecutor's office size and level of automation, as well as a representative sketch of a system's functions and features. Systems are frequently updated, however, and just as frequently are replaced. Personnel turnover and organizational changes may also cause some of the information contained in the *Directory* to be out of date. We suggest that readers interested in a particular system contact the developer or the agency that is using the system to verify the *Directory's* information and to learn first-hand of the system's capabilities.

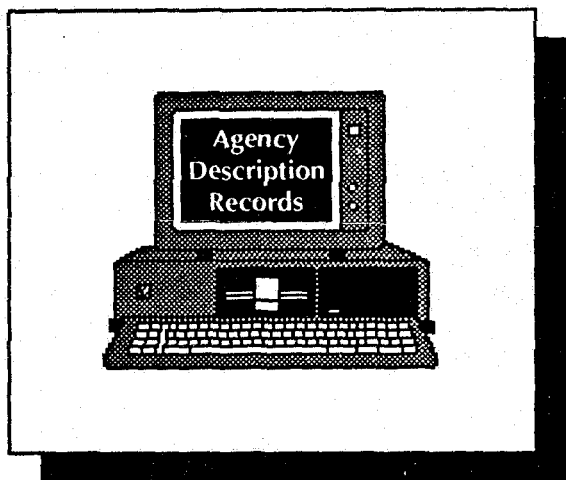

Readers are strongly encouraged to review the other four volumes in the *Directory* series when searching for an appropriate system or a comparable agency. For example, it is possible that a system that is used by a prosecutor's office, and thus is listed under "Criminal Justice Software Applications" in an Agency Description Record, is part of a larger system that was developed by a law enforcement agency. Because a law enforcement agency developed the system, the System Description Record may be in the *Law Enforcement Directory* (Volume III), not the *Prosecution Directory* (Volume V).

When reviewing the contents of the *Directories*, readers should also bear in mind that two different systems may have the exact same name. By checking the information in the System Description Record, readers can determine if identically-named systems are, in fact, produced by the same developer.

Finally, it is important that any omissions or errors be corrected and new information added to the Automated Index of Criminal Justice Information Systems. Readers are asked to use the *Update/Correction Notification Form* (See Appendix 5) to keep SEARCH informed of agency and system changes. This form may also be used to request a survey for the purpose of adding new Agency Description Records or System Description Records. All submitted forms will be used to amend and expand future editions of the *Directory* and the Automated Index of Criminal Justice Information Systems.

Computerized Access to Directory Information

As noted earlier, the Automated Index of Criminal Justice Information Systems is the database for the printed *Directories*. The Automated Index is continuously updated and revised as SEARCH receives new information on systems and automated agencies. Practitioners may access the Automated Index through the SEARCH-BBS, an electronic bulletin board that is available free of charge to the criminal justice community. Users may search the Automated Index for systems that meet specific functional, hardware, or software needs. They may also identify agencies which meet certain criteria and then review the criminal justice information systems in use by those agencies. Both of these approaches utilize a user-friendly, menu-driven system. To access the Automated Index through the SEARCH-BBS, users need a microcomputer, a modem and a communications package. Users are registered on-line by dialing 800-448-8257. (Please set your communication package to 8 data bits, 1 stop bit, no parity). Practitioners may also call or write to SEARCH and request a custom search of the Index database.

NARRATIVE

DACSS is a menu-driven application that collects, organizes, analyzes, tracks and prints legal data for a prosecutor's office. Through the integration of word processing with the application, the system supports prosecuting attorneys and administrative personnel in the areas of case tracking and preparation of legal documents, while producing management and statistical reports as by-products. Pricing for the application ranges from \$12,000.00 to \$25,000.00, based on number of users.

1989 Survey of Automated Criminal Justice Agencies

Many criminal justice practitioners are discovering the benefits of using computers in their agencies. But agencies are often not informed about the existence and capabilities of automated information systems designed specifically for criminal justice. The National Clearinghouse for Criminal Justice Information Systems—a multi-functional program of SEARCH Group, Inc. and the Bureau of Justice Statistics—was established to collect and disseminate this information to benefit state and local justice agencies.

The Clearinghouse documents public domain and proprietary automated information systems and promotes and facilitates the transfer of proven criminal justice systems. For more than 12 years, the Clearinghouse has operated the Automated Index of Criminal Justice Systems. This Index contains information on over 1,500 operational justice systems and is an invaluable resource for criminal justice personnel who are turning to computers to solve their information management problems. In response to telephone requests from criminal justice agencies, SEARCH staff query the Automated Index database about systems that perform specific justice functions or which operate on particular hardware or operating systems.

SEARCH Group, Inc., is a nonprofit, public-interest organization dedicated to applying information technology to benefit criminal justice. SEARCH was recently awarded a grant by the Bureau of Justice Statistics, U.S. Department of Justice, to redesign and enhance the Automated Index. Enhancements planned for the Automated Index will increase its usefulness in responding to inquiries from agencies and expand its capability for more detailed data.

This survey is part of the Index enhancement effort and is designed to collect information on the types of **automated system(s)** maintained by your agency. Knowledge of your agency's automated system could help other agencies which are seeking to use technology to effectively manage their data. Your completed and returned survey will ensure that:

- The descriptions of your automated systems are included in the 1989 edition of the *Directory of Automated Criminal Justice Information Systems*, published by the Bureau of Justice Statistics; and
- The information on your agency's system(s) listed in the Automated Index is current, complete and accurate.

Does your agency use a computer to accomplish any of its tasks?

☐ No, we have a manual system

☐ Yes, we have an automated system.

If **"No"**, it is not necessary for you to complete this survey. However, in order that this survey may be accounted for, we ask that you kindly return it as soon as possible. Please refold the survey, staple it (taking care to expose the portion that is addressed to SEARCH Group, Inc.) and drop it in the mail.

If **"Yes"**, we would appreciate your completing the survey, which should take about 10 minutes. To return the survey, please refold and staple it (taking care to expose the portion that is addressed to SEARCH Group, Inc.) and drop it in the mail. If you have any questions regarding this survey, please contact Cheryl Moore at SEARCH Group, Inc. (916) 392-2550. Thank you.

- Thank you for taking the time to complete this survey. The timely data you provide will help to ensure the effectiveness of the Automated Index.

1989 Survey of Criminal Justice Software Developers

Many criminal justice practitioners are discovering the benefits of using computers in their agencies. But agencies are often not informed about the existence and capabilities of automated information systems designed specifically for criminal justice. The National Clearinghouse for Criminal Justice Information Systems — a multi-functional program of SEARCH Group, Inc. and the Bureau of Justice Statistics — was established to collect and disseminate this information to benefit state and local justice agencies.

The Clearinghouse documents public domain and proprietary automated information systems and promotes and facilitates the transfer of proven criminal justice systems. For more than 12 years, the Clearinghouse has operated the Automated Index of Criminal Justice Systems. This Index contains information on over 1,500 operational justice systems and is an invaluable resource for criminal justice personnel who are turning to computers to solve their information management problems. In response to telephone requests from criminal justice agencies, SEARCH staff query the Automated Index database about systems that perform specific justice functions or which operate on particular hardware or operating systems.

SEARCH Group, Inc., is a nonprofit, public-interest organization dedicated to applying information technology to benefit criminal justice. SEARCH was recently awarded a grant by the Bureau of Justice Statistics, U.S. Department of Justice, to redesign and enhance the Automated Index. Enhancements planned for the Automated Index will increase its usefulness in responding to inquiries from agencies and expand its capability for more detailed data.

This survey is part of the Index enhancement effort and is designed to collect information on the types of **automated** system(s) maintained by your agency. Knowledge of your agency's automated system could help other agencies which are seeking to use technology to effectively manage their data. Your completed and returned survey will ensure that:

- The descriptions of your automated systems are included in the 1989 edition of the *Directory of Automated Criminal Justice Information Systems*, published by the Bureau of Justice Statistics; and
- The information on your agency's system(s) listed in the Automated Index is current, complete and accurate.

Please take this opportunity to provide us with information about the automated system(s) your organization has developed. The survey can usually be completed in less than 15 minutes. When you have completed this survey, please refold and staple it (taking care to expose the portion that is addressed to SEARCH Group, Inc.) and drop it in the mail. If you have found it necessary to copy and/or insert additional pages, please be sure that a complete, stapled survey is included for each product described. A large envelope may be used to return two or more surveys.

Your cooperation and attention to this survey are greatly appreciated. If you have any questions regarding this survey, please contact Cheryl Moore at SEARCH Group, Inc. (916) 392-2550.

Please submit a completed survey for each individual criminal justice-oriented product offered by your firm or agency. Where pages of the survey are common to two or more of the products you are describing, feel free to copy the completed pages and insert them in the appropriate product description. This will save you time and duplication of effort.

We ask that you do not list the individual modules that comprise an integral system separately as products unless each module can operate as a stand-alone package.

1. Full Product Name _____ Acronym (if applicable) _____

2. Is this product comprised of stand-alone modules capable of functioning independently?

☐ No ☐ Yes

If yes, please list the modules (use additional paper if necessary)

A. _____
 B. _____
 C. _____

3. Which computers can be used to operate this product? (Please place a check mark in front of the manufacturer's name and include the model name or number for each computer system.)
