# Nebraska Uniform Crime Reporting Program

---

## INTRODUCTION

The Nebraska Uniform Crime Reporting (UCR) Program involves the collection, compilation and analysis of crime statistics reported by Nebraska law enforcement agencies in accordance with guides and regulations prescribed by law.

The Nebraska Commission on Law Enforcement and Criminal Justice, hereafter referred to as the Commission, administers the Program under the following statute:

### Chapter 81-1425

"(6) collect, develop and maintain statistical information, records, and reports as the Commission may determine relevant to its functions."

### Chapter 81-1426

"Public officers and agencies, information, records, reports; furnish to the Commission:

"(1) The Commission may obtain from all public officers or agencies whose functions include the control, apprehension, trial, or correction of criminal offenders in this state, such information, records, and reports as the Commission may determine relevant to its functions." "(2) It shall be the duty of all public officers and agencies whose functions include the control, apprehension, trial, or correction of criminal offenders to provide such information, records, and reports as the Commission shall reasonably require."

## HISTORICAL BACKGROUND

The counterpart of the Nebraska UCR Program is the National UCR Program under the direction of the Federal Bureau of Investigation (FBI). The National Program was the result of a need for nationwide and uniform compilation of law enforcement statistics. Uniform Crime Reports were first collected in 1930 after being developed by a committee of the International Association of Chiefs of Police (IACP). Today, the IACP continues to serve in an advisory capacity to the FBI in its operation of the Program. In 1966 the National Sheriffs' Association (NSA) established a Committee on Uniform Crime Records to serve in an advisory capacity to the National UCR Program while actively encouraging sheriffs throughout the nation to participate in the UCR Program.

During the 1970's, the FBI actively assisted individual states in the development of state UCR Programs which are compatible with the national Program. Nebraska was one of the first states to develop a state UCR Program. After a three-month evaluation, the Nebraska UCR Program became operational on January 1, 1971. Commencing on that date all crime statistics flow through one central agency, this Commission, before submission to the National UCR Program. The State Patrol, all sheriffs' departments and all police departments of municipalities of 1,500 population and over are required to submit Uniform Crime Reports by the seventh day after the end of the month. During 1988, a total of 165 law enforcement agencies were required to submit UCR's. All UCR's are verified and any errors or questionable data are corrected by telephone contact with the agency in question. After verification and processing of data, a magnetic tape is built and submitted to the National UCR Program. This Commission publishes quarterly and annual reports based upon data submitted.

## **UNIFORM CRIME CLASSIFICATIONS**

Uniformity of reporting depends upon the proper classification of offenses by the law enforcement agencies. The basic guidelines for classifying offenses are formulated by the Federal Bureau of Investigation. It must be emphasized that the following classifications are not meant to be legal definitions as they are written in the Nebraska Penal Code. The purpose of these classifications is to establish a uniform national system for classifying similar offenses even though their legal definitions may vary considerably from state to state.

### **PART I OFFENSES**

#### **(1) Homicide -**

- (a) Murder - any unlawful killing of a human being in which the element of malice aforethought was present in the murder. Manslaughter - any unlawful killing of a human being without the element of malice aforethought.
- (b) Death by Negligence - any death that occurs because of the negligence of some person other than the victim and that is not in the commission of an unlawful act.

#### **(2) Rape -**

- (a) Rape by Force - the carnal knowledge of a female forcibly and against her will, but excluding statutory rape and other sex offenses.
- (b) Assault to Rape - all assaults and attempts to rape.

(3) **Robbery** - the felonious and forcible taking of the property of another against his will by violence or by putting him in fear. Robbery differs from larceny in that it is aggravated by the element of force.

(a) **Armed Robbery - Any Weapon** - when any object is so employed as to constitute force or the threat of force, it will be considered a weapon. This would include firearms, knives, clubs, brass knuckles, blackjacks, broken bottles, acid, explosives, etc. Cases involving possible pretended weapons or cases involving weapons not seen by the victim but which the robber claims to have with him are counted in this category.

(b) **Strong Arm-No Weapon** - includes muggings and similar offenses when no weapon is used but strong-arm tactics are employed to deprive the victim of his property. This is limited to hands, arms, fists, feet, etc. As in armed robbery, all attempts are included.

(4) **Assault** - an attempt or offer, with unlawful force or violence, to do physical injury to another. General Rule - all assaults will be classified in the following categories, excluding assaults with intent to rob or rape.

(a) **Gun** - all assaults and attempted assaults involving the use of any type of firearm. This includes revolvers, automatic pistols, shotguns, zip guns, rifles, pellet guns, etc.

(b) **Knife or Cutting Instrument** - all assaults and attempted assaults involving the use of cutting or stabbing objects such as knives, razors, hatchets, axes, cleavers, scissors, glass, broken bottles, daggers, ice picks, etc.

(c) **Other Dangerous Weapons** - assaults or attempted assaults when any object other than a gun, knife, or cutting instrument is used. This includes clubs, bricks, jack handles, bottles, explosives, acid, lye, poison, scalding water and cases of attempted drownings, burnings, etc.

(d) **Hands, Fists, Feet, Etc. (Felony)** - any assaults with hands, fists, feet, etc. which could result in a felony conviction. In order to be classified as a felony, the victim must suffer great bodily harm.

(5) **Burglary** - any unlawful entry or attempted forcible entry of any structure to commit a felony or larceny. For Uniform Crime Reporting purposes, burglary with larceny is classified and scored only as burglary; the larceny is excluded. Breaking and entering of a motor vehicle is classified as larceny.

(a) **Forcible Entry** - All offenses where force of any kind is used to unlawfully enter a locked structure to commit a felony or with intent to steal something. This includes entry by use of a master key, celluloid or other device that leaves no outward mark but is used to open a lock. Concealment inside a building followed by breaking out of the structure is scored here.

- (b) Unlawful Entry-No Force - any unlawful entry when you fail to discover any evidence of forcible entry.
- (c) Attempted Forcible Entry - when determined that forcible entry has been attempted.
- (6) **Larceny-Theft (Except Auto Theft)** - the unlawful taking of the property of another with intent to deprive him of ownership. This involves all larcenies and thefts resulting from pocket picking, purse snatching, shoplifting, larceny from auto, larceny of auto parts and accessories, bicycle theft, larceny from buildings and larceny from any coin-operated machines. Any theft that is not a robbery or any theft that does not result from a breaking and entering is scored here. Embezzlements, unlawful conversions, larceny by bailee, frauds or bad check cases are excluded.
- (7) **Motor Vehicle Theft** - larceny or attempted larceny of automobiles. All thefts and attempted thefts of motor vehicles are included. This includes all vehicles which can be registered as a motor vehicle in this state. Those incidents in which the alleged offender had unlawful access to the vehicle as in a family situation or the unauthorized use by others having lawful access to the vehicle such as chauffeur, employee, etc. are excluded.

This includes all arrests for the violation of state and local ordinances, specifically those relating to the unlawful possession, sale, use, growing, manufacturing and making of narcotic drugs. Four divisions of narcotic drugs are recognized. These are:
- (a) Opium and cocaine and their derivatives (morphine, heroin, codeine),

## **CRIME INDEX**

The extent, fluctuation and distribution of crime in the state is measured by the crime index. The crime index is composed of the following offenses: murder, manslaughter, forcible rape, robbery, felony assault, burglary, larceny-theft, motor vehicle theft and arson. Many categories of crime are not of sufficient importance to be included in the index; some serious crimes, such as kidnapping, do not occur with enough regularity to be meaningful in the index. With these considerations in mind, the above offenses were selected as a group to serve as a measure of crime.

## **CLEARANCES**

For UCR purposes, an offense can be cleared by arrest or by exceptional means. An offense can be cleared by arrest when the offender is identified, there is enough evidence to charge him and he is actually taken into custody. The arrest of one person can clear several offenses and several persons may clear one offense. When some element beyond police control precludes formal charges against the offender, such as the victim's refusal to prosecute or death of the offender, an offense can be cleared by exceptional means. There is no distinction made between cleared by arrest and cleared by exceptional means in this publication. A distinction is made between total clearances and those involving only persons under 18 years of age (juveniles). A juvenile clearance is counted only when juveniles are exclusively involved in the clearance of an offense.

## **CRIME RATES**

Crime rates relate the incidence of crime to population. Estimates of current permanent population are used in computing crime rates. Crime rates allow for comparisons between several areas with different populations over a period of time without the information being biased by population differences. To compute a crime rate, first divide the population of the area by 100,000 and then divide the crime index by that answer. Throughout this report a crime rate per 1,000 population is used to be more meaningful for the state.

## CRIME FACTORS

Statistics gathered under the UCR Program are law enforcement statistics. The agencies report the offense and arrest data according to the standard offense classifications and not according to state statutes or local ordinances. Offenses are related to municipality and county in which they occur, rather than to the agency which may investigate, arrest or otherwise dispose of the case. The clearance is attributed to the municipality or county in which the offense occurred, even though the arresting agency may not be the department originally reporting the offense.

The factors which influence crime rates are dependent upon many characteristics of the community, and therefore, when attempting to interpret the crime statistics presented herein, one should be aware of the social structure and the factors that lead to or cause criminal behavior.

Awareness of the presence of certain crime factors, which may influence the resulting volume and type of statistics presented, is necessary if fair and equitable conclusions are to be drawn. These crime influencing factors are present, to some degree, in every community and their presence affects, in varying degrees, the crime experience of that community. Attempts at comparison of crime figures between communities should not be made without first considering the individual factors present in each community. Below are some of the conditions which will by type and volume affect the crime that occurs from place to place:

Density and size of the community population and the metropolitan area of which it is a part.

Composition of the population with reference particularly to age, sex and race.

Economic status of the population.

Relative stability of populations, include commuters, seasonal and other transient types.

Climate, including seasonal weather changes.

Educational, recreational and religious characteristics.

Standards governing appointments to the police force.

Policies of the prosecuting officials and the courts.

Attitude of the public toward law enforcement problems.

The administrative and investigative efficiency of the local law enforcement agency, including the degree of adherence to crime reporting standards.

Caution should always be used when using the crime statistics presented herein, however, it should also be kept in mind that the data presented is the most accurate currently available. The law enforcement personnel who provide the data are to be commended for their efforts to provide accurate data. Without their sincere cooperation, this publication would not be possible. Crime is a social problem and therefore, should be a concern of the entire community.

# Murder, Manslaughter

---

Murder is defined as the unlawful killing of a human being in which the element of malice aforethought was present. Manslaughter is defined as any unlawful killing of a human being without the element of malice aforethought. Suicides, accidental deaths and justifiable or excusable homicides are excluded.

## Volume and Rate

During 1988, a total of 54 murder, manslaughters were reported by law enforcement agencies in Nebraska. Murder, manslaughter accounted for 1.3 percent of all violent crimes and one-tenth of one percent of all index offenses. In 1988, there were .03 murders per 1,000 population.

## Murder, Manslaughter Analysis

In all cases of murder, manslaughter reported under the UCR Program, a supplementary report is submitted by the reporting agency. The supplementary report provides the age, sex and race of the victim, weapon used to commit the offense, relationship of the victim to the offender, and circumstances or motive leading to the crime.

In 1988, male victims accounted for 74 percent of the total murder victims, with 31 percent of those being in the age group of 18-29. Female victims accounted for 26 percent of the total murder victims. Victim analysis by race disclosed that 61 percent were White, 33 percent were Black, 6 percent were Indian, and 2 percent were Asian/Pacific Islander.

Of the known perpetrators, males accounted for 86 percent and 39 percent of those were in the age group of 18-29. Female perpetrators accounted for 14 percent. White perpetrators accounted for 61 percent, Blacks accounted for 37 percent, and Indians accounted for 2 percent.

Most murders, 74 percent, were committed by a relative or acquaintance of the victim. A further breakdown indicated that 20 percent were committed by a relative; 54 percent were committed by an acquaintance; 15 percent were committed by strangers and in 11 percent of the cases the relationship between the perpetrator(s) and victim(s) was unknown.

54 murder, manslaughters were cleared in 1988. Juvenile clearances accounted for 16.7 percent of the total clearances.

Handguns were used in 40.7 percent of the murders and a knife or other cutting instrument was used in 18.5 percent of the incidents.

Law enforcement agencies reported no property stolen in connection with murder, manslaughter in 1988.

# Arrest Data

---

Under the Uniform Crime Reporting Program, an arrest is counted each time a person is taken into custody, summoned, notified or cited. When a person under 18 years of age commits an offense and the circumstances are such that if the offender were an adult an arrest would be made, the offender is counted as an arrest by the reporting agency.

For reporting purposes, one arrest is counted each time a person is taken into custody, regardless of the number of charges placed against him. If an individual is arrested more than once during the year, an arrest is counted each time. When several persons are arrested in connection with the same offense, each is counted as an arrest.

## Volume and Rate

Law enforcement agencies in Nebraska reported 64,391 arrests in 1988. This represents a nine percent increase over 1987. There were 40.2 arrests per 1,000 population in 1988 as compared to 36.9 arrests per 1,000 population in 1987.

Arrests for Part I offenses accounted for 19.8 percent of the total arrests. Of the arrests for Part I offenses, larceny-theft accounted for the greatest portion, 77.0 percent. The greatest percentage of arrests for Part II offenses was for driving under the influence, 22.0 percent.

During 1988, arrests for crimes of violence (murder, manslaughter, forcible rape, robbery and felony assault) accounted for 8.0 percent of all arrests for Part I offenses and 1.2 percent of the total arrests.

Arrests for crimes against property (burglary, larceny-theft, motor vehicle theft and arson) accounted for 92.0 percent of all arrests for Part I offenses and 18.2 percent of the total arrests.

Arrests for Part I offenses decreased one percent over 1987. Arrests for Part II offenses increased twelve percent over 1987. Arrests for forgery had the greatest percentage increase, 108 percent, over 1987.

## Arrests by Age

The number of persons under the age of 18 (juveniles) arrested during 1988 increased nine percent over 1987. The arrests of persons age 18 and over (adults) increased ten percent.

# Officers Killed and Assaulted

The killing or assaulting of a law enforcement officer is a serious problem faced by the law enforcement administrator and should be of the gravest concern to the public at large. Such acts directly affect the functioning of proper law enforcement operations and thus reduce the ability of our law enforcement agencies to combat crime and maintain law and order. The ambitious young person who today considers a career in law enforcement must also consider the risk of being killed or assaulted by a member of the society he is sworn to protect.

Unfortunately, in 1988 the Omaha Police Division did not provide any information regarding assaults on law enforcement officers.

## Officers Assaulted

During 1988, there were 144 assaults on law enforcement officers. This represents a 14 percent decrease over 1987. While every assault does not result in personal injury to the officer involved, many of them do result in physical harm to the officer and loss of duty time. During 1988, personal injury was involved in 30.5 percent of the assaults.

Most of the assaults occurred while responding to disturbance calls and most of these were inflicted with personal weapons such as hands, fists, or feet.

## Law Enforcement Employee Data

The Nebraska Uniform Crime Reporting Program surveys law enforcement agencies each year concerning employee data. As of October 31, 1988, there were 3,699 persons employed full-time in 163 law enforcement agencies.

Of the 3,699 employees, there were 2,663 sworn officers and 1,036 civilian employees. Based upon an estimated population of 1,601,000 there were 1.7 sworn officers per 1,000 persons in the State. The rate of law enforcement officers per 1,000 population for any given agency is influenced by many factors. The determination of law enforcement strength for a certain area is based on such factors as population density, size and character of the community, geographic location and other conditions which exist in the area.

Females accounted for 6.2 percent of the sworn personnel and 70.3 percent of the civilian personnel.
