

Office of Criminal Justice Plans and Analysis

Government of the
District of Columbia

Marion Barry, Jr., Mayor

126496

In attempting to develop policy and program agendas for the District's criminal justice system and clients, it is essential that policymakers and program planners remain abreast of criminal justice issues and trends. The office of Criminal Justice Plans and Analysis is the government agency responsible for providing accurate and current data and analysis about trends and issues in the District's criminal justice system. The annual **Crime and Justice Report** is the publication in which this important information is reported and made available to government agencies and the public.

The 1989 **Crime and Justice Report** provides a comprehensive overview of criminal justice trends and issues in the District of Columbia. This report contains information and statistical analyses of trends in law enforcement, the courts, corrections,

parole and juvenile justice. Information presented here addresses questions about types of crime reported and number of arrests, crime in particular areas of the city and criminal justice agency expenditures and caseload sizes. Data are provided over the past five- and, in some cases, 10-year periods. Characteristics of adult and juvenile arrestees, including drug use, and descriptions of the criminal and juvenile justice processes are also provided in this report.

With the vital data presented here and the insightful descriptions of analysis results, this report serves as an invaluable tool for government officials as well as private organizations, groups and citizens to not only understand the problems and issues of the city's criminal justice system, but also develop strategies and programs to address these concerns and plan for the future.

The District's criminal justice system is comprised of five basic organizational components: police, prosecution, defense, courts, corrections and parole. Together these components carry out the criminal justice process. This process involves detection of crime and apprehension of criminals, pretrial decisions and services, trial, sentencing and corrections or service of sentences. In carrying out these functions, the various criminal justice agencies participate in a host of information and data-gathering activities that have a vital role in monitoring and evaluating activities and progress and in examining trends in the District's criminal justice system.

This report provides a statistical overview of activities and outcomes in the different stages through which persons and cases are processed in the District's criminal justice system. The data are presented in an order that parallels the actual flow of cases through the criminal justice system from reported offenses to corrections and parole. Also included are descriptions of the criminal justice and juvenile justice processes in the District.

The data represent five- and 10-year trends. Graphs, charts and maps appearing in this report are derived from data presented in the tables, text and appendix sections. In addition to the statistical

charts and graphs, a geographically-based analysis that presents the location of reported offenses in the District of Columbia is provided.

The law enforcement section of this report includes information about reported crime in the District, adult arrests and characteristics of adult arrestees. Also included is a geographical analysis that shows the location of crime in the city.

Data pertaining to prosecutions and convictions are presented in the section on courts. Prosecutions and convictions by offense type are also included in this section.

The corrections section of this report presents data on the average daily population of the District's correctional facilities and incarceration rates. The section on parole reports data for grants and revocations.

The section on juvenile justice includes information on juvenile arrests, prosecutions and dispositions as well as juvenile drug use.

A special addition to this report includes a discussion focusing on homicide and violent crime. A variety of indicators are examined including occurrence, motives, methods and sociodemographic characteristics of victims and assailants.

The total expenditures of the District of Columbia government increased 38 percent from fiscal year 1985 to 1989, rising to more than \$3.3 billion. Nearly a quarter of the District's budget is earmarked for public safety and justice. Public safety and justice expenditures increased 43 percent between fiscal years 1985 and 1989 from \$535,022,000 to \$767,746,000 (Table 1, Figure 1). In 1989, 70 percent of the expenditures for public safety and justice was devoted to the Metropolitan Police Department and the Department of Corrections.

The Department of Corrections last year had the largest budget within the public safety and justice sector. Its expenditures have increased 58 percent from \$136,559,000 in 1985 to \$215,468,000 in 1989. The Metropolitan Police Department had the next largest expenditures which rose 40 percent from \$151,662,000 in 1985 to \$212,428,000 in 1989 (Table 2, Figure 2).

Figure 2
Criminal Justice Expenditures
By Agency, 1989

The largest increases in the public safety and justice sector were for the Board of Parole and Pretrial Services Agency whose previous budgets were among the smallest within public safety and justice. The Board of Parole's budget began in 1985 at \$1,088,000 and by 1989 rose to \$5,041,000, an increase of 363 percent. Much of this increase is the result of the transfer of parole supervision authority from the Department of Corrections to the Board of Parole in fiscal year 1988. The Pretrial Services Agency had an increased budget of \$2,821,000 in 1989, up 90 percent from \$1,486,000 in 1985. The smallest budgetary increases were seen in the court system and the Public Defender Service. The court system budget increased 29 percent from \$59,698,000 in 1985 to \$77,189,000 in 1989. The budget for the Public Defender Service rose 31 percent from \$4,246,000 in 1985 to \$5,583,000 in 1989.

Prepared by: Office of Criminal Justice Plans and Analysis.

The District's criminal justice system is comprised of five basic organizational components: police, prosecution, defense, courts, and corrections. These major components participate in a five-stage criminal justice process:

- Detection of crime and apprehension of offenders
- Pretrial decisions and services
- Trial
- Sentencing
- Corrections or service of sentence

There are six publicly financed District agencies that have statutory responsibilities for administering the criminal justice process: Metropolitan Police Department, Pretrial Services Agency, Superior Court, Corporation Counsel, Department of Corrections, and the Board of Parole. Additionally, the Public Defender Service, an independent agency, and the United States Attorney's Office are involved in the city's criminal justice system.

The criminal justice process begins with the police who must determine the validity of a reported crime and follow by investigation, identification, and possible apprehension of suspects. The police must then decide, based upon the facts of the case, the nature of the charges to be forwarded to the prosecutor for a determination of whether or not and what to prosecute.

At the next stage, the alleged offender's pretrial status must be determined based upon the recommendation of the Pretrial Services Agency prior to arraignment in the case of alleged misdemeanors or presentment in the case of alleged felonies. Several factors are considered in the decision to release or detain a defendant. In reviewing a defendant's case, the pretrial examiner considers his ties to family and community, employment status, residency, prior record of failure to appear in court, drug abuse and criminal history, and other indicators of reliability.

In the case of arraignment, charges are presented, a plea is entered, and a trial date may be set. In the case of presentment, the arrestee is informed of the charge, counsel is appointed (if necessary), pretrial status is determined, and a date is set for a preliminary hearing (unless waived).

In felony proceedings, the pretrial stage involves a series of preliminary and Grand Jury hearings. The hearings are designed to ensure that the evidence and facts of the case presented are sufficient to establish probable cause for indictment. In a preliminary hearing, a judge determines from the evidence presented by the prosecutor if there is probable cause to believe that a crime has been committed. In a Grand Jury hearing, the prosecutor's evidence is reviewed and, if the evidence is sufficient, an indictment is issued. In a small percentage of cases, the Grand Jury can initiate an investigation, issue an indictment based on investigation findings, and then issue an arrest warrant. The defendant indicted under these circumstances is then arraigned and subsequently stands trial.

The prosecutor remains the key participant throughout this stage of the criminal justice process and may use some discretion until Grand Jury indictment to dismiss the case for any number of reasons. In the District, the Office of the Corporation Counsel prosecutes juvenile cases, traffic cases, some misdemeanor cases, and civil suits to which the District government is a party. The United States Attorney's Office handles the prosecution of all other criminal cases.

In felony prosecution, if probable cause is established at the preliminary hearing stage, the case is bound over to the Grand Jury. If the Grand Jury indicts, the case then proceeds to arraignment, where a plea is entered. Before a defendant enters a plea or goes to trial, it is the obligation of the defense counsel to investigate the case and interview any witnesses. In the majority of cases, disposition is resolved by a plea of guilty to all or some of the charges indicated. If pleas bargaining occurs, the prosecutor and defense counsel discuss whether the client can plead guilty to the given charges or lesser charges based on the defendant's prior criminal record and role in the crime. If a felony defendant pleads not guilty, a trial by either judge takes place and a determination of guilt or innocence is made. If a defendant pleads guilty, or if a defendant is found guilty by a judge or jury, a conviction is established and a sentence is imposed.

Persons who have pled guilty or been convicted following trial are subsequently sentenced by the court. Sentencing options include incarceration, probation, a fine, placement in a halfway house, institutionalization or community service. If a person is sentenced to incarceration, a classification evaluation is conducted to determine the level of supervision and services he will need. The findings of this study are the basis for deciding the facility in which the inmate's sentence will be served.

If not incarcerated, a person may be sentenced to probation for a maximum of five years. Conditions of probation include drug testing, alcohol treatment, employment and reporting to an assigned probation officer. Also, a person may be placed in a residential treatment facility for all or part of his probation. Violation of probation terms may result in probation extension or revocation. If probation is revoked, the probationer may then be incarcerated, or placed in a halfway house. If a probationer adheres to the terms of his probation, it may be terminated early.

Once an inmate has served his minimum sentence, he may be considered for parole. Parole eligibility is determined by a review of reports of progress during incarceration, parole guidelines, personal interviews as well as other factors that indicate the possibility of risk to the community. If parole is granted, an inmate may be released to a halfway house, a work-release program, or directly into the community.

Overview

The Metropolitan Police Department (MPD) is primarily responsible for law enforcement in the District of Columbia. The department has both city and state law enforcement authority and is charged with a broad range of statutory and municipal law enforcement responsibilities. In addition to the MPD, which has a funded strength of 4,055 police officers, there are 23 other public law enforcement authorities operating in the District of Columbia with more than 3,000 commissioned police officers. Among the public agencies with police powers are the U.S. Secret Service Uniformed Division, the U.S. Capitol Police, the U.S. Park Police and the Metro Transit Police.

The most common way in which a crime becomes known to the police is for the victim to report it. Other crimes become known when a law enforcement officer either witnesses a crime in progress or uncovers evidence of a crime while conducting patrol duties. A citizen other than the victim may also witness a crime and then report the crime to the authorities.

Reported offense data throughout the United States focus primarily on the eight major offenses defined by the Federal Bureau of Investigation (FBI) as Crime Index offenses, or Part I offenses. These offenses are further divided into two groups: violent offenses, which include homicide, rape, robbery and aggravated assault; and property offenses, which are burglary, larceny, motor vehicle theft and arson. In selecting the crimes to be included in the Crime Index, the FBI considers several factors. The seriousness of the crime and frequency of occurrence serve as indicators of the nation's crime experience. While there are differences in criminal status for given crimes in different jurisdictions, all crime index offenses are fully defined and a single definition for each of the chosen offenses was developed to ensure measurable crime data (See appendix for definitions).

Part II offenses encompass all other crime classifications outside those defined as Part I

offenses (see appendix for definitions). This category of offenses was devised and adopted in order that law enforcement, judicial and penal statistics might be uniformly compiled in terms of a single classification of offenses.

After a crime is reported, the police must determine the validity of the reported offense. Once validated, the police investigate and attempt to identify and apprehend a suspect. After an individual is taken into custody, the police decide, based on the facts of the case, which charge to impose and forward to the prosecutor. A complete description of the criminal justice process after arrest is given in the section entitled "The Criminal Justice Process in the District of Columbia."

This section of the report examines reported offense data, geographical patterns of crime, arrest data, characteristics of arrestees and trends and issues concerning reported offenses and arrests in the District.

Reported Offenses

An analysis of Crime Index offenses for the past 10 years reveals that the overall crime index total has fallen 3 percent since 1980. This decrease is attributable to a decrease in the number of property crimes reported from 51,263 to 49,374 in 1989, representing a 4 percent decrease. The trend of violent crime changed very little during the past decade, rising 1 percent since 1980.

More recently, Crime Index offenses have increased 1 percent since 1988. Violent crime increased 9 percent and property crime decreased by 1 percent. The increase in violent crime can be attributed to an 18 percent increase in homicide, a 13 percent increase in rape, a 15 percent increase in robbery and a 1 percent increase in assault. The decrease in property crime is due to the 4 percent decline in burglaries and auto theft and 32 percent decrease in arson from 1988 to 1989 (Table 3, Figure 3).

The following classifications will be used in this and subsequent tables:

Crime Index Total equals violent crime total plus property crime total.

Violent Crime Total equals the sum of homicide, forcible rape, robbery, and aggravated assault.

Property Crime Total equals the sum of burglary, larceny-theft, motor vehicle theft, and arson.

Rates are calculated per 100,000 residents.

* Justifiable and excusable homicides are not included in total.

** Population estimates for 1988

Source: 1980-1989: Metropolitan Police Department, "Offenses Reported Under Uniform Crime Reporting Program."

Prepared by: Office of Criminal Justice Plans and Analysis.

Reported Crime Relative to Other Cities

In a comparative analysis of reported crime in U.S. cities with populations greater than 400,000, data for 1989 show that 18 cities had crime rates higher than the District. The District's crime rate is 10,019 per 100,000 residents (Table A-1).

Geographic Patterns of Crime

Crime in Wards

Ward 2 leads the District with the highest number (20,115) of reported violent and property crimes, constituting 32 percent of all Crime Index offenses, 35 percent of all property offenses and 23 percent of all violent offenses for 1989. Because Ward 2 comprises the urban core of the District and has a large commercial presence, the disproportionate amount of both property and violent offenses in this ward is predictable. Past research has always pinpointed the largest proportions of crime in business areas.

Ward 1, which has the second highest occurrence of total Crime Index, violent and property crimes had less than half as many as Ward 2. Wards 5, 6 and 7 had between 5,300 and 7,600 reported Crime Index offenses in 1989 and Wards 3, 4 and 8 had between 3,200 and 4,700. After Ward 2, Wards 1, 6 and 8 had the most violent crimes reported and Wards 1, 5 and 6 had the most property crimes reported in 1989 (Table 4).

Crime in Census Tracts

The distribution of Crime Index offenses across residential and non-residential census tracts is shown in Maps 1 and 2. It should be noted that in maps depicting crime in residential areas, the non-residential tracts are left white. Conversely, in maps of crime in non-residential sections, the predominantly residential tracts are white.

Residential census tracts are those areas where the majority (at least 51 percent) of the land is zoned for residential use. The residential census tracts with the lowest (1 to 225) Crime Index totals are located primarily in Ward 3. Census tracts with moderately high (226 to 774) Crime Index totals are in Wards 4 and 5. The highest (774 to 967) Crime Index totals are found in Wards 1 and 7 (Table A-2, Map 1).

Non-residential census tracts are those areas where at least 51 percent of the land is zoned for non-residential purposes, such as commercial or recreational. Of non-residential census tracts, the lowest Crime Index totals are found in Wards 7 and 8. Moderately high Crime Index totals are found in Wards 1 and 5. Crime is highest in Ward 2. Because research has shown that larger amounts of crime more often occur in commercial areas than in residential areas, the higher amount of Part I crimes in Ward 2, which is 59 percent commercially-zoned, is not surprising (Table A-2, Map 2).

Table 4

Reported Violent and Property Crime by Ward Calendar Year 1989

Ward	Crime Index Total	Violent Crime Total	Property Crime Total

Map 1
**Part I Offenses in
 Residential Areas**

Map 2
**Part I Offenses in
 Non-residential Areas**

Adult Arrests

Adult arrests for Part I and Part II offenses in 1989 were the highest in 10 years, increasing 34 percent from 33,332 in 1980 to 44,544 in 1989. This increase is primarily due to the 45 percent increase in Part II arrests for the same period. Although arrests for Part I offenses have changed less than 1 percent from 8,716 in 1980 to 8,801 in 1989, the proportion of Part I to Part II offenses reflects a greater change. While Part I offenses comprised 26 percent of the 33,332 arrests in 1980, only 20 percent of the 44,544 arrests were for the same in 1989 (Table 5, Figure 4).

Looking at adult arrests for the past five years shows less dramatic changes. Total adult arrests have increased 4 percent from 42,643 in 1985 to 44,544 in 1989. Part I adult arrests decreased 2 percent from 8,995 in 1985 to 8,801 in 1989. Part II arrests increased 6 percent from 33,648 in 1985 to 35,743 in 1989 (Tables 5, A-3 and A-4).

Adult Drug Arrests

Data for 1989 indicate that there has been an increase of 4 percent in the number of adult drug arrests since 1985 from 8,649 to 9,035. The majority (62 percent) of drug arrests continue to be for possession of illegal substances. Arrests for sale and possession of cocaine and opiates continue to increase, comprising 82 percent of all drug arrests (9,035) compared with 45 percent of all drug arrests (3,889) in 1985. Between 1985 and 1989,

there was some fluctuation in the number of drug arrests due to emphasis placed by the Metropolitan Police Department on street-level enforcement. Drug arrests peaked at 12,058 in 1986 at the height of Operation Clean Sweep, a police initiative aimed at street drug sales. From 1986 to 1989, drug arrests have gradually declined slowly by 25 percent, reflecting changes in resource availability and law enforcement strategies (Tables 6 and A-5, Figure 5).

Characteristics of Arrestees

Age and Gender

Of the 44,544 adults arrested in 1989, the majority (81 percent) were male. Men comprised 85 percent of those arrested for Part I offenses and 80 percent of those arrested for Part II offenses. Of those arrested for drug law violations, 81 percent were male (Table 7).

The age breakdown of those arrested shows that the majority of arrestees were below the age of thirty. Of all adults arrested, 24 percent (10,469) were ages 25 to 29 and 23 percent (10,414) were age 22 and younger. Of Part I arrestees, 23 percent (2,018) were ages 25 to 29 and 26 percent (2,323) were age 22 and younger. Of persons arrested for Part II crimes, 25 percent (8,451) were ages 25 to 29 and 24 percent (8,091) were ages 22 or younger. For adults arrested for drug offenses, 23 percent were ages 25 to 29 followed by adults ages 18 to 20 (19 percent) and ages 30 to 34 (17 percent) (Table 7, Figure 6).

The majority (74 percent or 33,094) of persons arrested in 1989 were District residents at the time of their apprehension. Fourteen (14) percent (6,097) of arrestees indicated Maryland as their place of resident and 7 percent (3,013) indicated Virginia residency.

Drug Use

Pretrial Services Agency has steadily increased the number of urinalysis tests administered to persons arrested in the District. In 1989, there were 18,388 drug tests administered, 16 percent more than in 1985. The percent of the adult arrestee

population testing positive for drug use declined in 1989 for the first time since the advent of drug testing in the District. Sixty-seven (67) percent (12,252) of those tested in 1989 tested positive for the presence of one or more drugs compared with 72 percent (11,351) in 1988. Of arrestees tested, 63 percent (11,497) tested positive for cocaine. PCP use among adult arrestees sharply declined since 1987 from 43 percent (6,725) to 17 percent (3,175) in 1989. Heroin continues to steadily decrease with 13 percent of arrestees testing positive in 1989 compared with 20 percent in 1985. As indicated by drug arrests and urinalysis test results, cocaine remains the drug of choice in the District (Table 8).

Trends and Issues

While the District's Crime Index offenses have fluctuated over the past 10 years, the overall crime index total has decreased 3 percent since 1980. In the past five years however, Crime Index offenses have consistently increased, rising to 10,050 per 100,000 residents in 1989. However, this rate remains below those experienced between 1980 and 1982.

Increases in Crime Index offenses are the result of increases in both violent and property crimes which increased 27 percent and 23 percent respectively from 1985 to 1989. While violent crime rose 9 percent from 1988 to 1989, however, property crime decreased 1 percent in the same time.

Adult arrests are the highest since 1980 due primarily to a 45 percent increase in Part II offenses from 1980 to 1989. In recent years, Part I adult arrests decreased from 1985 to 1989 while Part II arrests increased.

Adult drug arrests increased slightly since 1985. The vast majority of drug arrests continue to be for possession, and possession and sale of cocaine increasingly comprise the majority of drug arrests.

Adult arrestees testing positive for any drug use declined in 1989 for the first time since 1985. Cocaine remains the drug of choice in the District as indicated by drug arrests and urinalysis test findings.

Figure 6

Adult Drug Test Results Calendar Years 1985-1989

Percent Positive

Homicides and violent crimes continue to escalate and remain a major concern for the District as well as many major cities across the country. Due to the easy availability of lethal weapons and the burgeoning drug trade, many larger cities in the nation are experiencing patterns with homicide and violent crime similar to the District's. FBI data show that homicide rates for cities with populations greater than 500,000, including Dallas, Baltimore, New York, Chicago, Detroit, Memphis and Los Angeles, have been on the rise since 1985.

In the District, the homicide and violent crime rates have steadily increased over the past five years. The homicide rate escalated from 24 per 100,000 residents in 1985 to 70 per 100,000 in 1989. The overall violent crime rate has increased since 1986 from 1,502 per 100,000 residents to 2,086 per 100,000 in 1989. These increases have been attributed to a flourishing drug trade and the violent crime associated with it.

Violent crime data show that, while rape has steadily decreased from 421 in 1982 to 165 in 1988, with an increase to 186 in 1989; other violent offenses have steadily and dramatically increased in recent years. Robbery increased 56 percent from 4,179 in 1984 to 6,500 in 1989. Assault increased 38 percent from 4,181 in 1984 to 5,775 in 1989. Homicide most notably has increased 193 percent from 148 in 1985 to 434 in 1989 (Table 3).

Homicide motive data continue to show an increase in drug-related incidents. Drug-related homicides have ranked first among motives for the past several years. Forty-six (46) percent of all homicides were drug-related in 1987, increasing to 52 percent in 1989. Domestic disputes, arguments and robbery have ranked as the next three most frequent motives for murder in the same period (Table A-8).

Firearms are by far the homicide and assault weapons of choice. Shootings continue to be the most common method of homicide followed by stabbings. Data for assault weapons indicate the same pattern. As the number of homicides has increased over the past five years, so has the percentage indicating guns as the weapon used. Of the 148 homicides in 1985, 61 percent listed some type of gun as the fatal weapon. Of the 430 homicides in 1989, 77 percent resulted from the use of a gun. Knives or another type of sharp

instrument were the second most frequently used weapon. The percentage breakdown, however, shows that use of sharp instruments as fatal weapons decreased from 24 percent in 1985 to 13 percent in 1989 (Table A-9).

The weapon of choice has changed in recent years for aggravated assault. In 1985, 33 percent of assault cases involved knives or other sharp objects. Guns ranked second with 23 percent. By 1989, however, use of guns in assault cases increased to 35 percent with knives and other sharp instruments ranking second with 24 percent (Table A-10).

The profiles for homicide victims and assailants in the District are very similar. Homicide victims are overwhelmingly young, black males. While the proportion of white victims and black female victims has fluctuated over the past five years, the proportion of black males has consistently increased. In 1985, 69 percent of victims were black males compared with 83 percent in 1989. Black females comprised the next largest group of victims with 17 percent in 1985 and 8 percent in 1989 (Table A-11).

Black males constitute the largest percentage of persons arrested for homicide. More black males were arrested for murder in 1989 than in the past five years. In 1985, 79 percent of assailants were black males compared with 89 percent in 1989. Black females who comprise 7 percent of persons arrested for homicide rank as the next largest group (Table A-12).

When data for age is examined, opposite trends emerge for homicide victims and assailants. In 1985, 41 percent of victims were ages 18 to 30 compared with 35 percent in 1989. Among juvenile victims, 12 percent were ages 17 or less in 1985 compared with 7 percent in 1989 (Table A-13).

Among persons arrested for homicide, the proportion of adults ages 18 to 30 was relatively the same in 1985 and 1989, 49 percent and 52 percent respectively. For juvenile assailants, however, the increase is more notable from 12 percent in 1985 to 19 percent in 1989 (Table A-14).

As the number of homicides has increased, so has the number of persons arrested for murder. Homicide arrests rose 174 percent from 122 in 1985 to 334 in 1989 (Table A-15). Thus far, approximately 56 percent of homicides that occurred in 1989 have been closed.

Overview

After a person has been arrested and charged, the charge and any additional information about that person are forwarded by the police to the prosecutor's office. In the District, the Office of the Corporation Counsel prosecutes juvenile cases, traffic cases, some misdemeanor cases and civil suits to which the District of Columbia government is a party. The United States Attorney's Office handles the prosecution of all adult criminal cases. This section of the report provides prosecution and conviction data for adults.

Prosecutions

The number of adults prosecuted has declined in the past five years with the fewest adult prosecutions in 1989. This decline is partially due to a decline in misdemeanor prosecutions. In 1985, misdemeanor prosecutions outnumbered felony prosecutions by a ratio of almost 2 to 1. By 1989, however, there were about as many misdemeanor as felony prosecutions (Figure 7).

The number of felony prosecutions increased 37 percent from 7,480 in 1985 to 10,245 in 1989 (Table 9). The greatest increases were for homicide, drug offenses and arson. Homicide prosecutions increased 123 percent from 129 in 1985 to 288 in 1989. Prosecutions for drug offenses increased 75 percent from 2,968 in 1985 to 5,187 in 1989, constituting 51 percent of all felony prosecutions in 1989. Arson prosecutions numbered 23 in 1985 and went to 40 in 1989, an increase of 74 percent. Despite overall increases, felony prosecutions decreased for forcible rape, robbery and larceny. In

decreased from 897 in 1985 to 810 in 1989 and larceny decreased from 259 to 212 in the same period, declines of 10 percent and 18 percent respectively. While motor vehicle prosecutions increased 34 percent from 1985 to 1988, they decreased 19 percent from 1988 to 1989 (Table 10). In 1985 there were 180 rape prosecutions compared with 126 in 1989, a 30 percent decrease. Robbery

Figure 7

Adult Prosecutions, Calendar Years 1985-1989

Convictions

There were fewer convictions in calendar year 1989 than in the previous five years. In 1985, there were 13,188 convictions compared with 12,414 in 1989 — a decrease of 6 percent. As was the case with the number of adult prosecutions, this decline is partially due to a decrease in misdemeanor convictions. Though the number of felony convictions has increased 31 percent since 1985, misdemeanor convictions have fallen 28 percent in the same period (Table 11, Figure 8).

When felony convictions are examined by offense, the number of convictions has decreased for most categories. Most notably, convictions for rape decreased 74 percent, convictions for arson decreased 62 percent and convictions for burglary decreased 39 percent from 1985 to 1989. The overall increase in felony convictions is mostly due to the 66 percent increase in felony drug convictions and the 81 percent increase in other unspecified felony convictions which include kidnapping, perjury and others.

In 1985, 46 percent (2,250) of all convictions were for drug offenses, while drug offenses accounted for 58 percent (3,740) of all convictions in 1989. Drug offense convictions peaked in 1987, when offenses numbered 4,622 or 66 percent of all convictions (Table 12).

Trends and Issues

Judicial trends from 1985 to 1989 indicate increases in the number of overall felony prosecution and convictions and particularly those for homicide, drug offenses and arson. Prosecutions and convictions for these crimes increased dramatically in this time period. The data also show decreases in overall convictions, misdemeanor convictions prosecutions for rape, robbery and larceny.

The data clearly show that the focus of prosecutorial activity has shifted to drugs over the last five years and that beginning in 1986, the majority of drug cases were prosecuted as felonies rather than misdemeanors.

The shift to felony prosecutions over the last few years has resulted in increased felony convictions, which, in turn, has contributed greatly to sharp rises in admissions to the District's correctional system. Future prison population growth will be greatly affected by recent changes in the number of felony prosecutions and convictions.

Figure 8
Adult Convictions, Calendar Years 1985-1989

Overview

The District's Department of Corrections is responsible for the administration and operation of a detention facility (jail) and various prisons, community correctional centers and programs. The city's jail is located in the boundaries of the District and is primarily used to house men and women defendants awaiting trial and inmates with sentences of one year or less. The majority of men with longer sentences are housed at minimum, medium and maximum security facilities in Lorton, Virginia on a 3,600-acre site and in Occoquan, Virginia. To help alleviate prison overcrowding, the District also contracts with the Federal Bureau of Prisons to house male inmates at various facilities throughout the country. Women with sentences of more than one year are transferred to the federal prison system and placed at facilities in other states. Since September 1989, women inmates nearing their release date are also placed at a correctional annex established at the Lorton site.

Average Daily Correctional Population

The average population in the District's correctional facilities continues to increase. In 1989 there were 12,076 inmates housed in District, federal and other state facilities, an increase of 44 percent since 1985 when there were 8,368 inmates. The number of inmates serving time in other state facilities doubled between 1988 and 1989 from 407 to 824 inmates. As an alternative to Lorton, more inmates are being placed in halfway houses. Since 1985 there has been a 133 percent increase in this

form of sentencing. Between 1988 and 1989 alone, the population of inmates in halfway houses increased 54 percent. While District prisoners housed in Federal prisons has fluctuated over the last five years, there was a 2 percent decrease in this form of incarceration with only 1,982 inmates in 1989 compared with 2,031 in 1985 (Table 13).

Incarceration Rates

Although the District's population is decreasing, the number of people being incarcerated is increasing. The 1989 incarceration rate of 1,947.7 per 100,000 residents is 46 percent higher than the rate of 1,334.8 per 100,000 in 1985. Between 1988 and 1989, the prison population increased 11 percent (Table 14, Figure 9).

Table 13

Average Daily Population of District and Federal Facilities by Facility Calendar Years 1985-1989

Year	Jail	Lorton	Halfway Houses	Federal Prison	Other State Facilities	Total
1985	1,613	4,299	425	2,031	0	8,368

Figure 9

D.C. Incarceration Rate, Calendar Years 1985-1989

(Rate per 100,000 population)

Offenders Entering Lorton

Of the offenders in Lorton, 50 percent were convicted of either possession or sale of illegal drugs. Although the number of offenders is increasing, the proportion of offenders in Lorton for drug offenses has decreased since 1987 when 60 percent of all offenders were convicted on drug charges. The number of offenders committed to Lorton for violent crimes continues to increase. In 1987, there were 54 prisoners charged with homicide and by 1989, there were 198, an increase of 267 percent. There also have been significant increases in the same period in the number of inmates charged with robbery (90 percent), assault (77 percent) and rape (57 percent). Overall, the data show increases in the number of offenders in all categories, while the proportion of crimes represented in relation to total prison population has for the most part remained unchanged (Table 15).

Trends and Issues

The District's incarcerated population grew 46 percent since 1985. This increase in new commitments continues to reflect the dramatic increases in overall felony prosecutions and specifically homicide and drug prosecutions; and increases in overall felony convictions and felony drug convictions in particular.

Alternatives to incarceration are increasingly being used for the District's sentenced population. Since 1985, there has been a dramatic 133 percent rise in this form of sentencing.

Overview

The Board of Parole is an executive agency of the District of Columbia. The five board members and chairperson, who are appointed by the mayor, are supported by 103 employees under the direction of the chairperson.

Parole represents a bridge between incarceration and unconditional release. The board is responsible for determining whether or not offenders should be released on parole; establishing terms and conditions of release; supervising parolees in the community; and determining whether to modify conditions of parole or revoke parole.

Grants and Revocations

More defendants were granted parole during calendar year 1989 than within the previous three years. Although parole grants have steadily increased since 1986, parole revocations have also increased. The number of parole grants rose 61 percent over the number granted in 1986. Correspondingly, revocations rose 50 percent (Table 16).

Trends and Issues

The increase in parole grants is mostly a reflection of an increase in the number of parole hearings and a larger eligibility pool. The increase in parole revocations is in part due to the increased drug use among parolees over the past three years. The parole population may continue to grow in the coming year as a result of sustained prison population increases occurring over the past several years.

Table 16

Parole Grants and Revocations Calendar Years 1986-1989

Year	Grants	Revocations
1986	1,767	692
1987	2,244	825
1988	2,270	1,060
1989	2,839	1,039

Prepared by: Office of Criminal Justice Plans and Analysis.

Youth involved in delinquent or criminal activity may come to the attention of authorities by being apprehended at the scene of the crime or identified as suspects by witnesses; or reported for incorrigibility or other status offenses by school personnel, family, neighbors or others. The police officer who apprehends the youth may elect to reprimand him if no further action is necessary. Diverting a youth involves referring him to the Commission of Social Services for additional services. If the youth is to be referred to court, the Youth Division of the Metropolitan Police Department is notified.

The Youth Division first takes the youth for initial intake to the District of Columbia Courthouse or the Receiving Home for Children. The youth is, then, either released to the custody of his parents or guardian pending an initial hearing the next day or detained for an initial screening. Initial screenings are conducted by the Superior Court intake staff and involve a review of the youth's social and criminal history, family situation, and circumstances pertaining to the charge. Based on this information, the court staff may release the youth pending his initial hearing. Youth apprehended for homicide, forcible rape, armed robbery, attempts to commit such offenses, first degree burglary and leaving court-ordered secure placement are required to undergo judicial review prior to release from detention.

After initial screening, the probation officer assigned to the case reviews all information gathered during the initial screening, interviews the youth and the parents or guardians when possible, and contacts pertinent members of the community who may provide additional information. The probation officer then delivers a recommendation on whether or not to petition the case to the Office of the Corporation Counsel and prepares a report to be presented at the new referrals hearing. The probation officer's report also provides recommendations for pretrial status, which may include pretrial detention, shelter care, community-based placements, or release to the custody of parents pending trial.

The Assistant Corporation Counsel (ACC) conducts a screening and investigation of all cases recommended to the Superior Court concerning juveniles. The results of these screenings and investigations are considered jointly with the recommendations of Social Services Division (SSD) of the Superior Court before the final decision is made to file the petition with the court. The ACC reviews the detention decision made in cases of juveniles accused of committing serious crimes, and can make a recommendation to waive Juvenile Branch jurisdiction and have the case continue through the adult criminal justice system.

A case may be "no papered" if the SSD and the ACC determine that the case is not suitable for prosecution, whereby the case is closed and the youth is released without further court action. If the decision is made to file the petition, the case is forwarded for either

a new referrals hearing or an initial hearing. The ACC may file for a dismissal of petition papers at any time during the proceedings up to the trial.

The new referrals hearing is held before a judge for youth who have been detained pending an initial court appearance. This hearing involves a presentation of the petition and the substance of the charges to the youth, parents, and the attorney; the response to the charges; and the court determination of probable cause that the juvenile committed the offense. If the court determines that there was probable cause, the judge then sets the level of supervision or custody the youth will receive while awaiting a trial date. The judge reviews the recommendation of the SSD and the ACC and considers any previous court involvement in making his determination. If detention is warranted, the court specifies the level of detention or delegates that responsibility to the Department of Human Services (DHS). Youth detained pending trial must be scheduled for trial within a thirty day period.

Youth detained pending trial may be placed in either secure or non-secure settings. Youth held in maximum security are placed at Oak Hill, a facility operated by the DHS. Younger delinquents are held in maximum security, and youth held in medium and minimum security are placed at Oak Hill Annex or the Receiving Home for Children. Other alternatives include community-based shelter homes and home detention programs.

The initial hearing is held within seven days of their arrest for juveniles who were released to the custody of their parents or guardians. If probable cause is determined after a review of evidence by the hearing officer and the ACC, release conditions, a trial date and appointment of counsel are set.

When a case proceeds to trial, the case is heard before a judge. There is no right to jury trial for juveniles in the District of Columbia. If the allegations in the petition are determined to be true, the court orders preparation of an indepth social summary prior to the disposition of the case. If the verdict is acquittal, the juvenile is free from any further supervision of the court.

The pre-disposition investigation is conducted by the SSD. This investigation is the basis for the social summary and may include physical and mental health examinations. The purpose of this investigation is to determine the circumstances influencing the juvenile's behavior in order to arrive at an appropriate decision.

The judgement entered at the disposition includes the plea, the findings, the adjudication, and the dispositional order. Juveniles who are identified by the court as poor probation risks are committed to the Youth Services Administration of DHS and are institutionalized or placed in alternative care.

If the court decides in favor of probation, the youth continues his involvement with the SSD, which provides counseling and supervision for the youth until the court requests a case review or immediate court release.

Overview

Juvenile law enforcement is handled by the Youth Division of the Metropolitan Police Department. Adjudication of juvenile offenders is handled by the Family Division of the District of Columbia Superior Court. Prosecutorial functions are performed by the Juvenile Section of the Criminal Division of the Office of the Corporation Counsel. Legal defense of youth accused or adjudicated in the juvenile court is performed by the Public Defender Service, the Volunteer Attorney's Office, private counsel appointed by the court pursuant to the District of Columbia Court Reform and Criminal Procedure Act of 1970, privately retained defense attorneys and student attorneys from local law schools.

Juvenile Arrests

In 1987, the Metropolitan Police Department modified juvenile arrest reporting procedures to include as arrested juveniles who are released without being charged or referred to court. The 56 percent increase in juvenile arrests between 1986 and 1987 was, in part, a reflection of this change. In 1989, total juvenile arrests numbered 5,925, a 4 percent decrease from 1987. The decrease is most evident in Part I offenses, which decreased 1 percent since 1988, as well as Part II offenses, which declined for the first time since 1981 by 16 percent from 1988 (Tables 17, A-4 and A-6).

Table 17

**Juvenile Arrests for Part I and Part II Offenses
Calendar Years 1980-1989**

Year	Part I	Part II*	Total
1980	2,453	1,095	3,548
1981	2,428	1,011	3,439
1982	2,228	1,033	3,261
1983	2,250	1,085	3,335
1984	2,051	1,310	3,361
1985	2,443	1,506	3,949
1986	2,141	1,803	3,944
1987**	2,229	3,919	6,148
1988**	2,278	4,349	6,627
1989**	2,253	3,672	5,925

*Part II arrests include fugitives from justice, institutions, and parents.

**Includes juveniles released without being charged or referred to court.

Prepared by: Office of Criminal Justice Plans and Analysis.

Since 1985, the number of juveniles arrested for drug offenses has increased dramatically, beginning most notably in 1987. Juvenile drug arrests increased more than 50 percent from 1986 to 1987, but decreased 22 percent from 1987 to 1989. Unlike their adult counterparts, the majority of juvenile drug law violators were arrested for sales (93 percent) as opposed to possession (7 percent) of drugs (Table 18, Figure 10).

Table 18

**Juvenile Drug Arrests for Sales and Possession
Calendar Years 1985-1989**

Year	Percent Sales of total	Percent Possession of total	Total

Figure 10

**Juvenile Drug Arrests
Calendar Years 1987-1989**

Arrests

Of the 1,478 youths arrested for drug offenses, 88 percent were for cocaine-related charges. Cocaine was listed as the drug of possession in 85 percent of all arrests and the drug of sale in 88 percent of all cases. Marijuana was a far second, accounting for only 7 percent of all arrests (Table A-7).

Juvenile Prosecutions

In 1989, there were 4,639 juvenile cases of which 63 percent were petitioned to the Office of the Corporation Counsel. Drug offenses and motor vehicle theft accounted for the majority (42 percent and 21 percent respectively) of the 2,911 cases petitioned (Table 19).

Juvenile Dispositions

Over 2,500 juvenile cases received dispositions in 1989. Forty-four (44) percent of cases in 1989 resulted in guilty findings, a decline of 20 percent from 1985. An increase of 6 percent in the number of dispositions from 1985 to 1989 is primarily due to an increased percentage of dismissed and consent decree dispositions. Dismissed dispositions have increased 30 percent while consent decree dispositions have increased 44 percent (Table 20, Figure 11).

Juvenile Drug Use

Juvenile arrestee urinalysis test results show a decrease in the percent of persons testing positive for one or more drugs from 35 percent (1,239) in 1987 to 23 percent (930) in 1989. As with adults, the sharpest decline was in the percent of juveniles testing positive for PCP which declined from 25 percent (885) in 1987 to 5 percent (186) in 1989. Eighteen (18) percent (737) of all juveniles tested in 1989 indicated the presence of cocaine compared with 22 percent (994) in 1988. Heroin use continues to be minimal among juveniles, representing less than 1 percent of positive tests (Table 21, Figure 12).

Table 20

Juvenile Dispositions Calendar Years 1985-1989

Year	Guilty	Dismissed	Consent Decree	Total
1985	1,352	819	272	2,443

Trends and Issues

Total Part I juvenile arrests have shown little variance since 1985, averaging approximately 2,270 per year. Part II juvenile arrests have shown more fluctuation, rising sharply from 1985 to 1988, but decreasing 16 percent from 1988 to 1989. Total juvenile arrests have steadily increased since 1985, but declined slightly from 1988 to 1989. This decline is attributable to fewer drug arrests among juveniles.

The vast majority of juvenile arrests for drug offenses are cocaine-related and for sales rather than possession charges. Drug cases continue to comprise the majority of juvenile prosecutions. Cocaine continues to be the drug of choice among juveniles according to juvenile arrestee urinalysis test results. Data indicate however, that drug use among juvenile arrestees is declining for all drugs. This may portend further declines in juvenile arrests.

Figure 11
**Juvenile Dispositions
Calendar Year 1989**

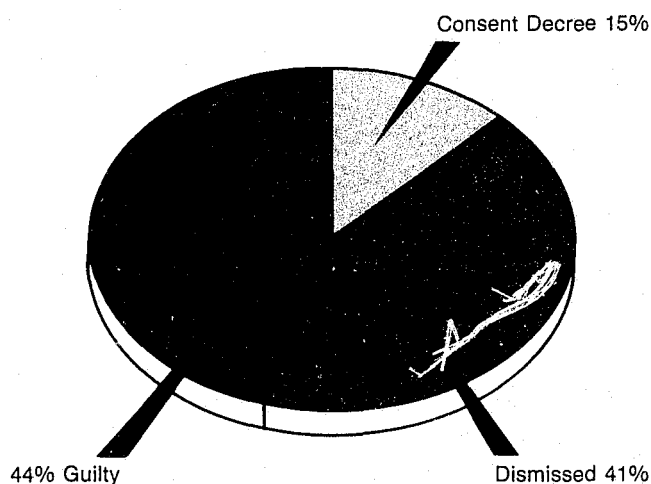

Figure 12

Positive Juvenile Drug Test Results, Calendar Years 1987-1989

Total expenditures for the District of Columbia government increased 38 percent from fiscal year 1985 to 1989, rising to more than \$3.3 billion. Nearly a quarter of the budget is earmarked for public safety and justice. Public safety and justice expenditures increased 43 percent between fiscal year 1985 and 1989. In 1989, 70 percent of the expenditures for public safety and justice was devoted to the Metropolitan Police Department and the Department of Corrections.

The District's crime rate was 10,050 per 100,000 residents in 1989. From 1988 to 1989, Crime Index offenses have increased 1 percent. Violent crime increased 9 percent primarily due to an 18 percent rise in homicide, a 13 percent rise in rape and a 15 percent increase in robbery. Property crime decreased by 1 percent primarily due to a 4 percent decline in burglaries and auto theft.

Total adult arrests in 1989 were the highest in ten years, increasing 34 percent from 1980 to 1989. This increase is primarily due to the 45 percent increase in Part II arrests for the same period.

Within the past five years, total adult arrests have increased 4 percent from 1985 to 1989. Part I adult arrests decreased 2 percent from 1985 to 1989. Part II arrests increased 6 percent in the same period.

In 1989, there was an increase of 4 percent in the number of adult drug arrests since 1985. The majority (62 percent) of drug arrests continue to be for possession of illegal substances. Eight-two (82) percent of all drug arrests are for cocaine-related charges compared with 45 percent in 1985.

Seventy-four (74) percent of persons arrested in 1989 were District residents at the time of their apprehension. Fourteen (14) percent of arrestees indicated Maryland residency and 7 percent indicated Virginia residency.

The percent of adult arrestees testing positive for drug use declined in 1989 for the first time since 1987. Sixty-seven (67) percent of those tested in 1989 tested positive for the presence of one or more drugs compared with 72 percent in 1988. Of arrestees tested, 63 percent tested positive for cocaine. PCP use among adult arrestees sharply declined since 1987 from 43 percent to 17 percent in 1989.

The number of felony prosecutions increased 37 percent from 1985 to 1989. This is a reflection of the 123 percent increase in homicide prosecutions, 75 percent increase in drug offense prosecutions and a 23 percent increase in arson prosecutions. Felony prosecutions decreased 30 percent for rape, 10 percent for robbery and 18 percent for larceny.

There were 6 percent fewer convictions in 1989 than in 1985 due to a decrease in misdemeanor convictions. Though the number of felony convictions has increased 31 percent since 1985, misdemeanor convictions have fallen 28 percent in the same period.

Most notably, convictions for rape decreased 74 percent, convictions for arson decreased 62 percent and convictions for burglary decreased 39 percent from 1985 to 1989. The overall increase in felony convictions is mostly due to the 66 percent increase in felony drug convictions and the 81 percent increase in other unspecified felony convictions.

In 1989, the District's inmate population increased 44 percent compared with 1985. Alternatives to incarceration are increasingly being used with a 133 percent rise in this form of sentencing since 1985. The 1989 incarceration rate of 1,947.7 per 100,000 is 44 percent higher than the 1985 rate.

Of offenders entering Lorton, 50 percent were convicted for drug offenses. Prisoners committed to Lorton for violent crimes continue to rise with a 267 percent increase in those convicted for homicide, a 90 percent increase in robbery convictions, a 77 percent increase in assault convictions and a 57 percent increase in those convicted for rape.

The number of parole grants rose 61 percent since 1986 and parole revocations rose 50 percent in the same period.

In 1989, total juvenile arrests numbered 5,925, a 4 percent decrease from 1987. Part I offenses decreased 1 percent since 1988 and Part II offenses declined for the first time since 1981 by 16 percent from 1988. Juvenile drug arrests increased more than 50 percent from 1986 to 1987, but decreased 22 percent from 1987 to 1989. The majority of juvenile drug law violators were arrested for sales (93 percent) as opposed to possession (7 percent) of drugs. Of the 1,478 youths arrested for drug offenses, 50 percent were for cocaine-related charges.

In 1989, there were 4,639 juvenile cases of which 63 percent were petitioned to the Office of the Corporation Counsel. Drug offenses and motor vehicle theft accounted for the majority (42 percent and 21 percent respectively) of the 2,911 cases petitioned.

Forty-four (44) percent of 2,500 cases receiving dispositions in 1989 resulted in guilty findings, a decline of 11 percent from 1985. The number of dispositions increased 6 percent from 1985 to 1989 primarily due to an increased percentage of dismissed and consent decree dispositions. Dismissed dispositions have increased 30 percent while consent decree dispositions have increased 44 percent.

Juvenile arrestee drug test results show a significant decrease in the percent of persons testing positive for one or more drugs from 1987 to 1989. The sharpest decline was in the percent of juveniles testing positive for PCP from 25 percent (885) in 1987 to 5 percent (186) in 1989. Eighteen (18) percent of all juveniles tested in 1989 indicated the presence of cocaine, a decrease from 22 percent in 1988.

Part I Offenses

1. Murder and Non-Negligent Manslaughter

All willful felonious homicides as distinguished from deaths caused by negligence, and excludes attempts to kill, assaults to kill, suicides, accidental deaths, or justifiable homicides. Justifiable homicides are limited to:

- (1) the killing of a felon by a law enforcement officer in the line of duty; and
- (2) the killing of a person in the act of committing a felony by a private citizen.

Manslaughter by Negligence*

Any death which the police investigation established was primarily attributable to gross negligence of some individual other than the victim.

2. Forcible Rape

The carnal knowledge of a female forcibly and against her will in the categories of rape by force and attempts of assaults to rape. Excludes statutory offenses (no force used—victim under age of consent).

3. Robbery

Stealing or taking anything of value from the care, custody, or control of a person by force or by violence or by putting in fear, such as strong-arm robbery, stickups, armed robbery, attempts or assaults to rob.

4. Aggravated Assault

Assault with intent to kill or for the purpose of inflicting severe bodily injury by shooting, cutting, stabbing, maiming, poisoning, scalding, or by the use of acids, explosives, or other means. Excludes simple assaults.

5. Burglary

Housebreaking or any breaking or unlawful entry of a structure with the intent to commit a felony or a theft. Includes attempted forcible entry.

6. Larceny-theft

The unlawful taking, carrying, leading or riding away of property from the possession or constructive possessions of another. Thefts of bicycles, automobile accessories, shoplifting, pocket-picking, or any stealing of property or article which is not taken by force and violence or by fraud. Excludes embezzlement, "con" games, forgery, worthless checks, etc.

7. Motor Vehicle Theft

Unlawful taking or attempted theft of a motor vehicle. A motor vehicle is self-propelled and travels on the surface rather than on rails. Specifically excluded from this category are motorboats, construction equipment, airplanes, and farming equipment.

8. Arson

Willful or malicious burning with or without intent to defraud. Includes attempts.

Part II Offenses

1. Other Assaults (Simple)

Assaults which are not of an aggravated nature and where no weapon is used.

2. Forgery and Counterfeiting

Making, altering, uttering or possessing, with intent to defraud, anything false which is made to appear true. Includes attempts.

3. Fraud

Fraudulent conversion and obtaining money or property by false pretenses. Includes bad checks except forgeries and counterfeiting. Also includes larceny by bailee.

4. Embezzlement

Misappropriation or misapplication of money or property entrusted to one's care, custody, or control.

- 5. Stolen property; buying, receiving, possessing**
Buying, receiving, and possessing stolen property.
- 6. Vandalism**
Willful or malicious destruction, injury, disfigurement, or defacement of property without consent of the owner or person having custody or control.
- 7. Weapon; carrying, possessing, etc.**
All violations of regulations or statutes controlling the carrying, using, possessing, furnishing, and manufacturing of deadly weapons or silencers. Includes attempts.
- 8. Prostitution and Commercialized Vice**
Sex offenses of a commercialized nature and attempts, such as prostitutes, keeping a bawdy house, procuring or transporting women for immoral purposes.
- 9. Sex Offenses**
(Except forcible rape, prostitution, and commercialized vice) Statutory rape, offenses against chastity, common decency, morals, and the like. Includes attempts.
- 10. Drug Abuse Violations**
Offenses relating to narcotic drugs, such as unlawful possession, sale, use, growing, and manufacturing of narcotic drugs.
- 11. Gambling**
Promoting, permitting, or engaging in illegal gambling.
- 12. Offenses Against the Family and Children**
Nonsupport, neglect, desertion, or abuse of family and children.
- 13. Driving Under the Influence**
Driving or operating any motor vehicle or common carrier while drunk or under the influence of liquor or narcotics.
- 14. Liquor Laws**
State or local liquor law violations, except "drunkenness" (class 23) and "driving under the influence" (class 21). Excludes federal violations.
- 15. Drunkenness**
Drunkenness or intoxication.
- 16. Disorderly Conduct**
Breach of the peace.
- 17. Vagrancy**
Breach of the peace.
- 18. All Other Offenses**
All violations of state or local laws, except classes I-25 and traffic.
- 19. Suspicion**
No specific offense, suspect released without formal charges being placed.
- 20. Curfew and loitering laws**
Offenses relating to violation of local curfew or loitering ordinances where such laws exist.
- 21. Runaway**
Limited to juveniles taken into protective custody under provisions of local statutes.

*While Manslaughter by Negligence is a Part I crime, it is not included in the Crime Index.

Source: U.S. Department of Justice, Federal Bureau of Investigation, Uniform Crime Reports for the United States.

Legal Terms

Accused - A person who has been charged with committing a crime but has not yet been tried.

Acquittal - A decision made by a judge or jury that the accused was not proven guilty of committing the crime.

Appeal - To take a case to a higher court for review or retrial.

Arraignment - The initial court hearing at which the accused is brought before a judge, told the charges against him/her, and asked to enter a plea of guilty or not guilty.

Arrest - To take a person suspected of committing a crime into legal custody so that he/she can be charged and tried for committing the crime.

Bail/Bond - The amount of money set by a judge which allows the accused to go free until the trial. The purpose of bail is to ensure that the accused shows-up at court. The type of bail the accused pays is referred to as bond (see personal recognizance).

Charge - An accusation made against the accused that he/she committed the crime.

Continuance - A delay or postponement of a court hearing to another date or time.

Conviction - A decision made by a judge or jury that the accused is guilty beyond a reasonable doubt of committing the crime for which he/she has been tried.

Court - An agency of the judicial branch of the government with constitutional authority to decide questions of law and disputes brought before it.

Defendant - A person who has been charged with committing a crime and is now on trial (see accused).

Defense Attorney - The lawyer for the defendant/accused.

Dismissal - A decision by a judge ending a criminal case before ordering a trial.

Disposition - The final outcome of a case.

Evidence - Testimony and objects presented in court by the prosecutor and the defense.

Felony - A serious crime punishable by one year or more in a prison and/or a fine. Felonies include crimes such as murder, rape, burglary, and robbery.

Grand Jury - A group of 23 D.C. citizens who hear evidence presented by the prosecutor and decide whether or not there is enough evidence to charge and try the accused.

Guilty - A decision of a judge or a jury in a criminal case that the accused committed the crime with which he/she was charged.

Guilty Plea - A statement by the accused that he/she committed the crime.

Indictment - A written accusation made by a grand jury charging a person with committing a crime.

Investigation - The gathering of evidence by police and prosecutors to prove the accused committed the crime.

Judge - In the District of Columbia, a person appointed by the President of the United States to preside over a court of law.

Jury - A group of citizens who hear the evidence presented in court and decide whether the accused is guilty or not guilty.

Misdemeanor - A crime that is less serious than a felony and is punishable by one year or less in jail and/or a fine. Misdemeanors include offenses such as petty theft, most traffic violations, and possession of marijuana.

Mistrial - A trial that ends when the jury cannot decide whether the accused is guilty or not guilty, or a legal procedure is violated.

Motion - An oral or written request to the judge asking the judge to make a decision or take a specific action.

Nolo Contendere - "I will not contest it"; a plea to a crime that does not admit guilt, but has the same result as a guilty plea.

Not Guilty Plea - A statement by the accused denying that he/she committed the crime.

Offender - A person who has been convicted of a crime.

Parole - The supervised release of an offender from jail or prison before the end of his/her sentence.

Papering - The decision made by the prosecutor on whether or not there is enough evidence to file charges against the accused.

Perjury - A lie told while a person is under oath to tell the truth.

Personal Recognizance - The written promise made by the accused to the judge that he/she will return to court when ordered to do so; a frequent form of pre-trial release in criminal cases in D.C.

Plea - A defendant's formal answer in court denying or admitting that he/she committed a crime.

Plea Bargaining - An agreement between the prosecutor and the accused that the accused will plead guilty.

Preliminary Hearing - A hearing to determine if there is enough evidence to hold the accused for a grand jury hearing.

Presentence Report - A report by the Social Services Division of the D.C. Superior Court describing the past behavior, family circumstances, and personality of the accused, as well as specifics about the crime committed. This report helps the judge determine the sentence (see Victim Impact Statement).

Probable Cause - The amount of proof needed by the police, the prosecutors, and the judge to believe that a crime was committed and that the accused committed it.

Probation - A court sentence allowing the accused to go free under the supervision of a probation officer.

Prosecutor - In a criminal case, the lawyer representing the government and the victim; in D.C., an Assistant U.S. Attorney or an Assistant Corporation Counsel.

Public Defender - An attorney employed by the D.C. government to represent defendants who cannot afford to pay for a lawyer.

Restitution - An order from the judge that requires the offender to pay the victim for damaged or stolen property or medical costs.

Sentence - The accused's punishment after being convicted of a crime.

Status Hearings - Court hearings to make sure that both the prosecution and defense are ready for trial.

Subpoena - A written order requiring a person to appear at a certain time to give testimony about the crime.

Suspect - A person who is thought to have committed a crime and is under investigation, but who has not been arrested or charged.

Testimony - Statements made in court by witnesses who are under oath to tell the truth.

Trial - A court proceeding before a judge or a jury at which evidence is presented to decide whether or not the accused committed the crime.

Verdict - The decision of the judge or jury at the end of a trial that the accused is either guilty or not guilty of the crime.

Victim - An individual against whom a crime, or an attempted crime, was committed. The family or close friend of an individual who was murdered.

Victim Impact Statement - A form used by the judge at the time of sentencing that allows victims to describe the physical, emotional, and financial impact of the crime on their lives and families.

Witness - A person who has seen or knows something about the crime. The victim is usually a witness too.

Witness Conference - A discussion between the victim, witness and the attorney to prepare for trial.

Table A-1

**Crime Rates (per 100,000 population) for U.S. cities with populations >400,000
Calendar Year 1989**

City	Population Estimate	Part I* Total	Part I Crime Rate
Atlanta, GA	426,482	88,241	20,690.4
Dallas, TX	996,320	166,451	16,706.6
Fort Worth, TX	430,481	67,538	15,689.0
Saint Louis, MO	405,066	62,082	15,326.4
