STATE OF GEORGIA
OFFICE OF THE GOVERNOR
ATLANTA 30334

Joe Frank Harris
GOVERNOR

My Fellow Georgians:

Either directly or indirectly, each of us will at one time or another feel the impact of crime. The challenge presented by this fact requires the participation and cooperation of all components of the criminal justice system working as allies to fulfill the task of protecting the citizens of Georgia.

The preparation and dissemination of timely, accurate criminal justice data which clearly portrays the operations of Georgia's entire system of justice are vital to this effort. This information can be used by the Governor, the General Assembly, local governments, the various components of the criminal justice system and private organizations in making crucial decisions regarding the resources, methods and responses to counter crime. Georgia Criminal Justice Data, 1988 provides a basis for more knowledgeable decisions, thus a more positive impact can be made on the operation of the criminal justice system and on reducing crime.

With kindest regards, I remain

Sincerely,

A handwritten signature in cursive script that reads "Joe Frank Harris".

Joe Frank Harris

INTRODUCTION

Georgia Criminal Justice Data, 1988 is published by the Georgia Bureau of Investigation. This publication represents the cooperation of many agencies and organizations within state government, as it is a compilation of information from multiple segments of Georgia's criminal justice system.

The reporting and analysis of the occurrence of specific crimes and subsequent arrests is the point of entrance for an individual into Georgia's criminal justice system. **Georgia Criminal Justice Data, 1988** is designed to reflect the totality of the system. It proposes to contribute to the basic understanding and knowledge of just what that system includes and what it does.

This publication provides a basic description of the functions of the criminal justice system, and portrays statistically through graphs, charts, and tables essential work load data. As more extensive and accurate reporting systems are developed, this publication will continue toward a more comprehensive effort, capable of tracking individuals through the entire justice system and communicating a clear picture of the system's collective efforts to control crime.

This publication is organized into four divisions: law enforcement, the courts, corrections, and pardons and paroles. The information is organized in a manner consistent with the movement of an offender through the criminal justice system. Analyses of data are made solely from data collected from each major component of the system and are confined to that component. In some instances, the amount of data is rather voluminous; in others it is minimal.

Each section of this publication begins with a brief description of the overall structure of a component, followed by the method by which its relevant data are collected and processed. Following this overview is a presentation of the compiled data and, where appropriate, an analysis of that data. Specific methodologies and formulas used in analyses are contained in the appendix. The concluding section contains statements of officials representing each major component, addressing critical topics relevant to Georgia's criminal justice system.

I LAW

ENFORCEMENT

INTRODUCTION

The law enforcement powers of the State of Georgia are a function of the Executive branch of government. In order to exercise enforcement powers, the State grants the power of arrest to some 740 active law enforcement agencies which can be grouped into seven major categories: (1) state agencies, (2) municipal agencies, (3) county police agencies, (4) county sheriff departments, (5) campus agencies, (6) state authorities' and institutions' agencies, and (7) other agencies. These agencies employ 17,196 certified officers.

The majority of law enforcement functions are delegated to the respective counties and municipalities by the State. Most law enforcement work is done at the local level; the bulk of money allocated, the majority of personnel employed, and the greatest portion of work load measures are generated locally. The state retains certain specialized responsibilities because a great deal of variation exists between counties and municipalities in the provision of police services, and because the type of services provided change over time.

State Law Enforcement Agencies

The primary roles of state level law enforcement agencies are to provide technical assistance to local agencies and to provide services in highly specialized operational areas. Examples of these services are: investigative assistance, laboratory analysis of physical evidence through the Division of Forensic Sciences, training, management consulting, and the collection and analyses of crime data and criminal history information through the Georgia Crime Information Center.

In addition, the state engages in operational law enforcement functions in specialized areas. Workload measures generated by the State's six major law enforcement agencies, employing 1,837 officers with arrest powers, are included with the data in this report. Those state agencies are:

1. **The Georgia State Patrol**, whose primary legal responsibility is traffic enforcement and highway safety. Its duties are performed by 830 certified officers assigned to 48 Patrol Posts located throughout Georgia. In addition to traffic enforcement the Georgia State Patrol has initiated a highly successful program to "look beyond the ticket" which has resulted in numerous arrests for narcotics trafficking and other felony violations.

2. **The Georgia Bureau of Investigation** whose primary focus is on general investigations and narcotics enforcement. Its duties are performed by 242 certified special agents and 48 narcotics agents. There are 13 regional offices and four regional drug enforcement offices located throughout Georgia and various special units working out of headquarters. Additionally, the G.B.I. operates the Division of Forensic Sciences, 5 branch laboratories and the Georgia Crime Information Center.

3. **The Department of Natural Resources, Game and Fish Division's Law Enforcement Unit** whose primary focus is on the enforcement of all laws relating to game and fish, boating, and water safety regulation. Its duties are performed by 406 certified conservation rangers assigned to the 159 counties in Georgia.

4. **The Department of Revenue, Alcohol, Tobacco Tax Unit** whose primary focus is on the enforcement of laws pertaining to the payment of any tax duties due the Department. The Unit shares concurrent jurisdiction with the Georgia Bureau of Investigation for the statewide enforcement of all laws related to the manufacture, sale, transportation, and possession of beverage alcohol and tobacco. Its duties are performed by 30 certified law enforcement agents.

5. **The Investigation Division, State Examining Boards, and the Securities Investigation Unit, Secretary of State**, whose primary focus is on the investigation of misdemeanor and felony violations of laws governing the licensing of certain professions (i.e., doctors, pharmacists, private detectives, etc.), verification and enforcement of provisions of the State Elections Code and the enforcement of securities regulation laws. Its duties are performed by 32 certified investigators based in Atlanta.

6. **The Permits and Enforcement Division, Department of Transportation** whose primary focus is on the enforcement of regulations governing the size and weight of vehicles operating on public roads, the enforcement of licensing and fuel tax registration requirements, and the enforcement of all state laws on properties owned or controlled by the Department of Transportation. Its duties are performed by 297 certified officers located in state highway districts.

In addition to the law enforcement agencies identified above, the state maintains a variety of other specialized agencies which are vested with arrest powers. These agencies are included in one of the other categories enumerated below (e.g., campus police, authority police, Georgia Drugs and Narcotics Agency, State Fire Marshal, Farmer's Market Police, etc.).

Local Law Enforcement Agencies

The primary role of local law enforcement departments is to provide police service to the citizens of an agency's geographically defined jurisdiction. These services are provided by one or more of the three types of local agencies: municipal police departments, county police departments, and county sheriffs' departments. In Georgia there are 539 local law enforcement agencies which employ 14,009 certified officers with arrest powers.

1. **Municipal Police Departments** - Municipal police departments derive law enforcement powers through delegation from the State under the constitutional principle of "home rule", or local autonomy. These agencies are generally responsible for the enforcement of all state criminal laws, traffic laws, and municipal ordinances. Municipal police departments employ more law enforcement officers than any other type of agency. Presently, 365 municipalities fund police departments which employ 7,233 certified officers. These departments range in size from 1 to 1,405 officers with the majority having 25 or fewer sworn officers.

2. **County Sheriffs' Departments** - The office of Sheriff in Georgia is considered to be both a constitutional and county office. Each sheriff derives his law enforcement powers from laws enacted by the General Assembly in accordance with the 1983 Constitution of the State of Georgia. Sworn

deputies derive arrest powers from the sheriff. Each of Georgia's 159 counties has a sheriff whose principal duties involve serving as: (1) the chief law enforcement officer of the county, (2) an officer of the county courts, and (3) the official jailer of the county. Georgia sheriffs' departments employ 4,802 certified officers authorized to enforce state criminal laws and county ordinances when authorized by the county commission or local acts of the General Assembly. In the 15 counties containing county police departments, the sheriff's department tends to focus on the duties of jail operations and service to the courts.

3. County Police Departments - County police agencies derive law enforcement powers under the constitutional principle of "home rule" and acts of the county commission. They are generally empowered to enforce all State criminal laws, traffic laws and county ordinances. There are currently 15 county police departments in the State which employ a total of 1,974 certified officers.

Campus Law Enforcement Agencies

Educational institutions within the State of Georgia have the authority to establish law enforcement agencies with powers similar to those of other state and local law enforcement agencies. These agencies are grouped as:

1. State operated colleges and universities, operating under the authority of the Board of Regents, employ police officers and other security personnel with arrest powers for criminal and traffic violations committed upon property under the jurisdiction of the Board of Regents and upon public or private property within 500 yards of property under the jurisdiction of the Board.

2. Private colleges and universities operate under the police powers of the State Board of Education. They employ police officers who have the power of arrest for state criminal and traffic violations committed on the grounds or buildings of the particular educational facility and upon any public or private property within 500 yards of the facility.

There are currently 37 campus police agencies within the State which employ a total of 529 certified police officers.

State Authorities' and Institutions' Law Enforcement Agencies

Various state statutes creating specific authorities (i.e., Stone Mountain Authority, Lake Lanier Islands Authority, Georgia Ports Authority, MARTA, etc.) and those statutes which govern certain types of institutions (i.e., Central State Hospital, Youth Development Centers, etc.) empower some of these agencies to employ police officers. These officers are empowered to enforce state criminal and traffic laws on the property of the institution or the authority's jurisdiction. There are currently 21 police agencies in Georgia under this category. These agencies employ a total of 437 certified police officers.

There are an additional 5,049 certified correctional officers who work in institutional settings, 909 certified probation officers, and 301 certified parole officers. These officers round out the population of Georgia's certified peace officers. These employees have not been included in the total number of police officers because they are included within the Corrections section of this publication.

Other Law Enforcement Agencies

Various independent statutes within the Official Code of Georgia grant degrees of arrest power to certain employees of state, local, and private agencies, which do not lend themselves to easy categorization. These employees range from county marshals to court officers, to investigators employed by district attorneys and solicitors, to railroad police officers, and others. There are currently 60 such agencies which employ 529 certified officers.

Law Enforcement, Crime Data Reporting, Collection and Interpretation

Georgia's crime reporting system is derived from the Federal Bureau of Investigation. Two types of crime data are collected from Georgia's law enforcement agencies utilizing standardized definitions and procedures. The first type of data collected represent offenses which include counts for the crimes of murder and non-negligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny-theft, motor vehicle theft, and arson. The first four offenses are violent crimes or crimes against persons; the remaining four are property crimes. Because of their seriousness, frequency of occurrence, and likelihood of being reported, these crimes are thought of as an index of the crime problem. Consequently, these offenses are often referred to as **Index crimes**. Counts for less serious crimes, often referred to as **Non-Index crimes**, are also collected and analyzed.

The law enforcement data in this publication are provided from two sources, the Georgia Crime Information Center and the Georgia Department of Public Safety. The primary responsibility for collecting and reporting data relating to criminal violations, traffic accidents and traffic violations falls upon the agency in whose jurisdiction the violations occur. A myriad of 740 law enforcement agencies collect and report data to the two state agencies responsible for collating and analyzing this information. This information is compiled and analyzed in publications such as **Georgia Criminal Justice Data**, as well as in specific reports used for policy decisions and research activities.

The Georgia crime statistics provided in this publication are derived from actual reports submitted to the Georgia Crime Information Center by law enforcement agencies statewide. The FBI provides statistical data on criminal activity nationwide. Those tables comparing criminal activity in Georgia with that of the South and the Nation use FBI statistical data for comparisons.

State law requires all criminal justice agencies to submit to the Georgia Crime Information Center information concerning crimes reported by the public and crimes otherwise processed by these agencies. Law enforcement agencies must also submit fingerprints and other identifying data on persons arrested within their jurisdictions. These reports are collected on forms or in a format prescribed by the Georgia Crime Information Center. The validity of this information is dependent upon the original sources of the information --the law enforcement agencies located throughout the state.

State law also requires the submission of certain types of data on traffic accidents and traffic law violations to the Department of Public Safety. All data concerning traffic accidents and violations contained in this report were obtained from the Department of Public Safety or the federal agencies to which it reports.

Crime Data Interpretation

Several precautions in interpreting crime data should be observed. First, it is well established that many more crimes occur than are reported. Thus, depending on the type of crime and type of victim, statistics based on the number of crimes reported to law enforcement agencies may underestimate the number of crimes that actually take place. Because the size and variation of this "hidden figure of crime" is not known, caution should be exercised in assuming that changes in crime trends reflect changes in criminal behavior.

Second, these reports of crime are submitted by the local and state agencies to the Georgia Crime Information Center. The reports are edited and screened for inclusion in the Uniform Crime Reporting statistics. The editing which standardizes the reports according to Uniform Crime Reporting specifications will sometimes result in variance between figures maintained in the Georgia Crime Information Center's statistical file and those maintained by the state or local agency.

Third, variance occurs between the Georgia crime Information Center's figures and those released by the FBI. The Georgia Crime Information Center does not include estimates for incidents or arrests that occur but are not reported. Such estimates are included in the FBI's Crime in the United States. Again, changes in the number of reported incidents and arrests may not necessarily reflect the actual level of change in law enforcement activity. Also, there is evidence that changes in the actual number of crimes committed normally coincide with changes in population demographics. Accordingly, historical comparisons of the number of crimes reported may be misleading if the accompanying demographic changes are not considered. The same is true for inter-jurisdictional comparisons; it is expected that communities with different populations will

have different crime problems. The use of crime rates in making comparisons minimizes these problems. Readers are cautioned that crime rates cited are reliable indications of crime only to the extent that population estimates are accurate, that crimes are reported by victims, and the Uniform Crime Reports are submitted to the Georgia Crime Information Center by law enforcement agencies.

Due to its uniformity and comprehensiveness, the State's crime statistics data base is the best available source when describing Georgia's crime problem over time and in making tentative comparisons of Georgia's data with data compiled in other states with comparable demographics.

SUMMARY OF CRIME IN GEORGIA

Crimes

In 1988, 397,129 Index and 367,991 Non-Index offenses were reported by Georgia law enforcement agencies. Table 1 and Figure 1 indicate the trends in both Index, Non-Index and combined offenses from 1984-1988. While Index offenses have increased in each of the last four years, the largest percentage increase (10.7%) occurred in 1988 when reported offenses jumped by 38,287 over 1987. Other yearly increases have averaged 10.3%. Non-Index offenses show a steady increase except for 1986 which is low because DUI offense totals are unavailable for that year. However, the 1988 total of 367,991 reported offenses is the highest of the five year period showing a 14.0% increase over 1987.

Arrests

In 1988, law enforcement agencies reported 67,002 arrests for Index offenses and 259,679 arrests for Non-Index offenses. Table 2 and Figure 2 display the trends in arrests for the two crime categories and the total for all crimes. Arrests for Index offenses have increased each year during the five year period. The largest percentage increase (19.3%) occurred in 1988 when reported arrests rose by 10,852. Arrests for Non-Index offenses remained fairly constant until 1988 when the total jumped by 25,861 (11.1%) over 1987. The 1986 Non-Index arrest totals are not valid for comparison purposes because they do not include DUI arrests which are unavailable.

CHARACTERISTICS, TRENDS, COMPARISONS**

Profile of Index Crime in Georgia

In 1988, Georgians reported 397,129 Index crimes to law enforcement agencies (See Table 3). Included were 705 murders, 3,029 forcible rapes, 15,443 robberies, 23,557 aggravated assaults, 99,711 burglaries, 219,367 larcenies, 34,071 motor vehicle thefts, and 1,246 arsons. Larcenies accounted for the highest percentage (55.2%) of the total number of Index crimes; burglaries made up the second highest category (25.1%). Overall, 10.8 percent of the Index crimes were violent crimes committed against persons; 89.2 percent were property offenses. Based on the 1988 population estimate for Georgia of 6,252,577, 683.5 violent crimes and 5,668.0 property crimes were reported for each 100,000 persons, producing an Index crime rate of 6,351.4 (See Appendix for the rate computation formula).

While counts for the eight Index crimes illustrate Georgia's crime problem, the nature of serious criminal behavior can be further identified by examining pertinent details of individual crimes (See Tables 4-11).

SUMMARY OF CRIME CHARACTERISTICS, 1988

The crimes of murder, forcible rape and aggravated assault typically involve people who know one another or have had previous contact (See Table 12). On the other hand, robberies, burglaries, larcenies, and motor vehicle thefts are usually committed by strangers.

Weapon type and crime can also be correlated. In crimes of murder and robbery, firearms are the most frequently used weapon (57.6% and 38.5%, respectively). Similarly, the weapon most used in the crime of forcible rape is hands/fists, etc. (48.6%). In the crime of aggravated assault, other dangerous weapons was the most frequent type used (34.0%).

In 1988, \$405,851,195 in property was reported stolen during the commission of Index crimes. Motor vehicle thefts accounted for the greatest loss (\$186,606,249) followed by larceny (\$128,626,614) burglary (\$83,253,307) and robbery (\$7,085,677). The average value of property stolen during each motor vehicle theft is \$5,477, compared to \$835 during each burglary, \$586 during each larceny, and \$459 during each robbery.

With the exception of robbery, which is more likely to take place in a street or alley, most Index crimes occur in residences or parks, public buildings and other places. Business establishments, chain stores, service stations, and banks were generally less likely places of occurrence for Index crimes.

Table 4

MURDER AND NON-NEGLIGENT MANSLAUGHTER

DEFINITION

Murder and non-negligent manslaughter are defined as the willful killing of one human being by another. Deaths caused by negligence, suicide, accident, or justifiable homicide are not included in the count for this offense classification. Attempts to murder or assaults to murder are scored as aggravated assaults and not as murder.

AGGRAVATED ASSAULT

DEFINITION

Aggravated assault is the unlawful attack by one person upon another for the purpose of inflicting severe bodily injury. This type of assault is usually accompanied by the use of a weapon or other means likely to produce death or serious bodily harm. Attempts are included since it is not necessary that an injury result when a gun, knife, or other weapon is used which could and probably would result in serious personal injury if the crime is successfully completed.

GEOGRAPHICAL DISTRIBUTION OF CRIME

Metropolitan Statistical Areas (MSA's) are geographical subdivisions composed of a core city with a population of at least 50,000 or an urbanized area of at least 50,000 and a total metropolitan area population of at least 100,000 combined with economically/socially related counties. MSA's experienced the highest crime rates in the state in all categories of Index crimes (See Table 14).

Georgia's eight MSA's currently account for 63.6 percent of the state's population yet they include only 38 of the 159

counties. In comparison of overall crime rates, MSA's more than double (7,860) the non-MSA rate (3,713) (See Table 13).

These tables indicate the importance of population density as one factor in the number of crimes committed in an area. Table 40 provides specific crime rates for the individual counties comprising MSA/non-MSA categories. Table 40 indicates that many MSA counties have high crime rates.

CRIME TRENDS AND COMPARISONS

The five year trend from 1984 - 1988 indicates that Index crimes have risen each year to a peak of 397,129 in 1988. Except for 1984, the last four years have seen an average increase of 11.3% in Index crimes (Table 15). Overall, reported Index crimes have risen by 53.3% since 1984 (Table 18). Examination of crime rates for individual Index crimes shows that seven of the eight crimes increased in 1988; murder dropped by 3.5% (Table 16).

Table 17 indicates that Georgia, the South, and the United States experienced an increase in Index crimes for 1988.

CHANGES IN CRIME RATES

Crime rates must be interpreted with the understanding that they are the product of changes in both the number of crimes reported and population. For this reason, analysis of crime rate is important since comparable groups, whether counties, states or specific groups of persons of a certain age range, race, or sex, can be compared to determine a rate per 100,000 persons. Table 19 relates crime and population from 1984 - 1988.

1984-1988**

Figure 14B

REPORTED INDEX CRIME RATES PER 100,000 PERSONS, 1984-1988

PROFILE OF NON-INDEX CRIMES IN GEORGIA

The number of Non-Index crimes reported to GCIC has increased every year from 1984 to 1988. DUI data for 1986 are not available, however, in comparing crime totals, excluding DUI, for 1984 through 1988 totals for other Non-Index crimes continue to reflect an upward trend (See Figure 15).

Non-Index crimes are beginning to follow the pattern for Index crimes formed during the last five years (See Table 20). Because of the seriousness of Index crimes, they have always been more likely to be reported; however, increased public and law enforcement awareness of certain Non-

Index crimes has brought about more frequent and accurate reporting. Narcotics offenses and crimes against children containing several categories including sex offenses, child neglect, and rape committed against juveniles are two areas where increased awareness has improved reporting. (Note: Rape is an Index offense).

This section contains analyses of reported arrests for all crimes by age, sex, and race and analyses for specific crimes such as crimes against children and drug law violations.

CRIMES AGAINST CHILDREN 1984 - 1988

Specific offense and arrest information for crimes against children can be analyzed to determine trends in the areas of rape, kidnapping, sex offenses, cruelty towards a child, contributing to the delinquency of a minor, and child neglect as these crimes apply to children and those arrested. (Note: data on the specific crime category murder of children are not available).

The pattern of total offenses within these categories for 1984-1988 varies from the pattern for total arrests reported during the same period. Reported offenses have increased each year, except for 1986, while reported arrests remained relatively the same, except for 1985 which was a peak year.

Increased public attention has been focused on crimes against children. Legislative attention at the state and federal level has mandated that these crimes be a primary focus for law enforcement agencies at all levels of government.

This increased awareness and large numbers of reported arrests for these crimes show a greater sensitivity to such crimes.

Total	5,187	6,882	5,581	5,341	5,390

* Rape committed against juveniles includes the specific charges of: sexual assault-sodomy-boy-gun, sexual assault-sodomy-girl-gun, sexual assault-sodomy-boy,sexual assault-sodomy-girl, sexual assault-sodomy-boy-strongarm, and sexual assault-sodomy-girl-strongarm.

** Kidnapping of juveniles includes the specific charges of: kidnap minor for ransom, kidnap minor to sexually assault, and kidnap minor.

***Sexual offenses against juveniles include the specific charges of: child fondling, homosexual act with girl, homosexual act with boy, and incest with minor.

ARRESTS FOR CRIMES

Trends, Characteristics, Comparisons

Numbers and rates of arrests are useful measurements of law enforcement activity and official responses to crime. Arrest statistics also provide some insight into the composition of the criminal population, particularly as regards age, sex, and race. The varied policies and emphasis of law enforcement agencies influence the volume and type of arrests made. However, arrest practices for crimes are relatively uniform, allowing comparisons over time. Furthermore, it must be understood that because an individual can be arrested more than once during a given year, annual arrest statistics more accurately reflect the number of arrests made, rather than the number of different persons taken into custody.

Arrest data reflect the actual number of arrests reported; the figures may not equal all arrests that took place.

Profile of Index Arrest Trends

During the period 1982-1986, the number of arrests made by Georgia law enforcement agencies for Index crimes decreased 0.8%. However, 1986 shows the largest increase in reported arrests since 1982. The number of arrests increased for all violent Index Crimes. Murder increased 0.4%, forcible rape 12.2%, robbery 1.0%, and aggravated assault by 3.8%. Total violent crime increased 3.6% from 1982 to 1986. Increases were also reported for larceny (2.3%) and motor vehicle theft (15.1%). Decreases were reported for burglary (-17.4%) and arson (-8.7%) (See Table 23). Arrests were made for only a small portion of reported crime incidents (See Table 24).

Figure 16

REPORTED INDEX ARRESTS FIVE YEAR TREND, 1984-1988

Figure 17A

INDEX CRIME ARRESTS BY AGE, 1984

Figure 17B

INDEX CRIME ARRESTS BY AGE, 1988

Profile of Persons Arrested

During 1988, young persons aged 17-21 were more frequently arrested for the crimes of robbery, burglary, larceny and motor vehicle theft. Those aged 22-26 were more frequently arrested for robbery. Arrests for murder, aggravated assault and arson more often involved those aged 37 and older. Population estimates reveal the percentage of persons aged 17-21 has fallen 1.3%; the percentage of persons aged 22-26 has risen 2.3%, those aged 37 and older has risen 10.8% from 1984-1988. Comparisons of arrest figures from 1984 to 1988 indicate a decrease in the percentage of persons arrested in age groups 0-16, 17-21 and 22-26 (the age groups 17-21 and 22-26 are still the highest in percentage arrested) and an increase in the percentage in age groups 27-31, 32-36 and 37+ (See Table 25) In addition, males were arrested more frequently than females, and non-whites were arrested more often than whites. Table 26 provides a profile of arrest data by age, sex and race.

Profile of Juvenile Arrests for Index Crimes

In Georgia, juveniles are persons 16 years of age and under. In 1988, juveniles accounted for 8.3% of all arrests for Index crimes. This represents a decrease of 1.6% from 9.9% in 1984 for the five year period.

In 1988, juveniles represented the lowest percentage of arrest rates for any index violent crime (See Tables 26 and 27). Table 27 indicates that juveniles are more likely to be arrested for property crimes such as burglary, larceny and motor vehicle theft.

Note: Population estimates are based upon projections provided by the Office of Planning and Budget.

Source: Georgia Crime Information Center; Office of Planning and Budget Population Estimate.

PROFILE OF NON-INDEX ARREST TRENDS

Arrests for Non-Index crimes from 1984 - 1988 do not follow the pattern exhibited by Index arrests. Non-Index arrests decreased in 1985 and 1986 but steadily increased through 1988, showing an increase for this five year period of 43.8 %. Index arrests increased steadily from 1984 - 1988, with an increase for this five year period of 9.0%. Figures for 1986 cannot be compared because DUI arrest totals are unavailable. They are comparable if the DUI arrest totals are omitted from the other four years (See Table 29).

PROFILE OF JUVENILE ARRESTS FOR NON-INDEX CRIMES

Table 30 indicates that the percentage of Non-Index crimes committed by juveniles remained low throughout the period 1984-1988. Considering population estimates, arrest rates for juveniles for each Non-Index crime were generally the lowest for each age group (See Table 32). Of all Non-Index crimes, other offense, public disturbance, and other assault ranked the highest of juvenile Non-Index arrests. Though juvenile Index arrests clearly demonstrated a tendency toward property crimes, Non-Index arrests did not show the same distinction. Other Assaults were higher in 1988 compared to arrests for stolen property (See Table 31).

DRUG VIOLATIONS 1984-1988

Though violations of drug laws are not Index offenses, drug offenses challenge the resources of law enforcement from street sales to the massive organizations which manufacture, import and distribute drugs in the United States.

In 1984, reported drug arrests were at a five year low (1984 - 1988). However, they have since risen steadily to a high of 32,497 in 1988. This represents a 67.8% increase during this period.

Each year from 1984 to 1987, persons were arrested for offenses related to marijuana more frequently than any other drug, although cocaine related arrests increased in 1988 with 2,745 more arrests than reported for marijuana.

During the same five year period, steady increases are noted in arrests for Cocaine (618.6%) and Narcotic Equipment (200.4%). Reported arrests for both drugs peaked in 1988.

Of particular interest is the fact that cocaine arrests have steadily increased from 1,822 to 13,093 in the five year period, while narcotic equipment arrests only show 561 more arrests.

PROFILE OF REPORTED CLEARANCES

According to the FBI/UCR handbook, reported offenses can be cleared by arrest or exceptional means (circumstances occur preventing arrest). For purposes of statistical reporting, the number of offenses, not the number of persons arrested, are counted in clearance reports.

Overall trends in clearances for Index and Non-Index crimes follow very similar patterns from 1984 to 1988. Clearances have risen steadily in 1984 and 1985 with a decrease in 1986 for both Index and Non-Index crimes (See Figure 20). However, in 1987, Index crime clearances rose only slightly while Non-Index clearances experienced a significant increase.

Clearance rate is defined as the number of clearances divided by the number of reported crimes. Tables 37 and 38 represent the actual clearance rates for 1984 - 1988. Due to variances in reporting practices, care should be exercised in comparing law enforcement agency clearance rates. Yearly totals, however, are useful for comparison. For some Non-Index crimes, the number of clearances reported is the same as the number of crimes reported. Law enforcement agencies do not report, for example, DUI offenses unless officers make DUI arrests.

*Weapons Violation, Public Disturbance and Curfew/Loitering are included in Other Offense.

** Data unavailable

COUNTY CRIME PROFILES

Index crime profiles for counties, shown in Table 41A, were developed from 1987 and 1988 incident reports submitted to the Georgia Crime Information Center by participating law enforcement agencies. Also included are Non-Index county crime profiles for 1987 and 1988 (See Table 41B). County totals are actual numbers reported; estimates for unreported crime are not included. In addition, some agencies did not consistently submit crime reports for these years which, in effect, lowered county totals.

County Rankings

Fulton, DeKalb, Cobb, Gwinnett and Chatham counties accounted for more than one-half of all the Index crimes reported in Georgia in 1988. Tables 39 and 40 list Georgia's 159 counties ranked by total Index crimes reported and Index crime rates, respectively. Care should be exercised in any effort to interpret these data, due to the existence of disparate reporting processes in some counties. However, in a majority of counties at least one law enforcement agency submitted reports to the Georgia Crime Information Center in accordance with established laws. Consequently, these data provide a useful ranking of Index crimes and Index crime rates for individual counties, to the extent that reporting and non-reporting practices of law enforcement agencies are consistent from year to year.

Table 39

RANKING OF COUNTIES BY NUMBER OF REPORTED INDEX CRIMES, 1988

County	Reported Index Crimes	County	Reported Index Crimes	County	Reported Index Crimes
Fulton	102,206	Stephens	784	Jenkins	215

LAW ENFORCEMENT EMPLOYEES

Profiles of the current law enforcement employee workforce are based on reports submitted to the Georgia Crime Information Center at the end of 1988. County totals are based upon a compilation of the submitting agencies' employment figures.

County Rankings

For comparative purposes, a law enforcement employee rate (employees per 100,000 persons) was calculated. Cam-

den County topped the rankings with 760 employees per 100,000 persons, well above the state average of 206. Care should be exercised in making detailed comparisons. However, these figures may be useful in making general manpower assessments.

Note: Data on file at the Georgia Criminal Justice Coordinating Council reflects the employment of 17,196 certified officers by Georgia law enforcement agencies. Tables 42 and 43 reflect only the data reported to GCIC in Annual Reports of Law Enforcement Agency Employees.

IN MEMORIAM

The Georgia Bureau of Investigation joins the criminal justice community of the state of Georgia in extending sincere sympathy to the families of the following law enforcement officers who gave their lives while protecting and serving the citizens of their community during 1988.

GREGORY L. DAVIS, OFFICER
Atlanta Bureau of Police Services

Shot by a suspect while answering a prowling call.

HERBERT LEE EVANS, JR., PRIVATE
Augusta Police Department

Accidentally shot by a fellow officer.

ROBERT M. (BOB) KIRK, SPECIAL AGENT
Georgia Bureau of Investigation

Shot with a handgun while attempting to question a suspect.

DOREEN E. McCUMBERS, SENIOR PATROL OFFICER
Chatham County Police Department

Struck by a vehicle while directing traffic.

OFFICERS KILLED AND ASSAULTED

Statistics compiled in Table 44 are taken from reports submitted to the Georgia Crime Information Center by law enforcement agencies.

The most serious assaults committed against officers resulted in 21 deaths during the period 1984 - 1988. The five year trend shows a peak of 6 deaths in 1986, followed by a sharp decrease in 1987. The 1988 total is again more consistent with the years 1984 - 1986.

Yearly changes in the total number of officers assaulted has remained fairly consistent showing an increase of only 6.0% during the five year period. Changes in the individual type of activities that define assaults on law enforcement officers are as varied as the activities themselves. They have not followed the same pattern as the total number over the last five

years. However, the ranking of activities by the number of assaults occurring has remained fairly constant. In 1988, "attempting other arrests" resulted in the highest number of assaults, but in 1987 the category of "all others" was reported for most of the assaults.

Another area of interest is the type of weapon used during assaults. In contrast to the weapon types most frequently used in the commission of aggravated assaults (See Figure 6B), officers were most frequently assaulted by hands, fists or feet.

The number of reported personal injuries sustained by law enforcement personnel during assaults over the five year period increased from 1984-1987 but decreased in 1988. Most of the injuries were sustained between the hours of 6:00 p.m. and 6:00 a.m.

Table 44

REPORTED LAW ENFORCEMENT OFFICERS KILLED AND ASSAULTED, 1984 - 1988

	1984	1985	1986	1987	1988

PROFILE OF TRAFFIC FATALITIES

Comprehensive data on traffic fatalities are available from the Georgia Department of Public Safety Accident Reporting data base. Figures indicate that in 1988 more traffic fatalities occurred than in any of the previous four years. Total fatalities increased by 250 over 1984 figures, while DUI related fatalities decreased by 17.

The effect of alcohol use while driving has received much media attention in recent years. Tables 45 and 46 provide

data on fatal accidents and fatalities caused by DUI (blood alcohol content of .10 or greater).

Additional data are provided for fatalities by month, location and type (Table 47) and holiday traffic deaths in 1987 and 1988 (Table 48). Holiday traffic deaths normally account for a large proportion of deaths on our highways. In 1988, Thanksgiving was the most costly with a total of 33 fatalities in 102 hours.

GEORGIA BUREAU OF INVESTIGATION

The Georgia Bureau of Investigation was created in 1937. The initial charter authorized the establishment of a State Bureau of Identification to maintain fingerprint and criminal history information and the employment of individuals trained as criminal investigators to assist local law enforcement officers throughout the State. Today, the G.B.I. provides a wide variety of law enforcement services statewide, with sufficient flexibility to adapt to changing crime patterns and needs of the law enforcement community in this State and in neighboring states.

The GBI has four operating divisions:

INVESTIGATIVE DIVISION

This division is charged with conducting investigations at the request of Superior Court Judges, District Attorneys, Chiefs of Police, Sheriffs, or at the direction of the Governor into violations of State laws. The division is heavily involved in the investigation of drug traffic and organized crime, in addition to its work with local law enforcement agencies in the investigation of traditional crimes, such as robbery, burglary, homicide, etc. The division is headed by a G.B.I. Deputy Director and is divided into three main sections: Special Operations, consisting of specialized squads based in Atlanta; Field Operations, consisting of 13 regional offices; and the Drug Enforcement Section consisting of four Regional Drug Enforcement Offices and specialized squads based in Atlanta.

GEORGIA CRIME INFORMATION CENTER

The Georgia Crime Information Center maintains the computerized repository of criminal history information, and

manages the statewide communications network used by criminal justice agencies throughout the state and is the interface with the National Crime Information Center. Reports of criminal investigations and crimes are forwarded to the Georgia Crime Information Center. GCIC computers enable law enforcement agencies to check for criminal reports on suspects, check for stolen items, such as guns, equipment, motor vehicles, etc., and to transmit lookouts and other important messages from agency to agency or to all agencies quickly.

GCIC assists both state and local law enforcement agencies in ongoing criminal investigations by developing suspect lists through access to computerized criminal justice data.

During fiscal year 1990, GCIC will fully implement the Georgia Automated Fingerprint Identification System (AFIS). AFIS technology will permit experts to search single latent fingerprints found at crime scenes against the master fingerprint file which contains all fingerprint and criminal history information for known criminal offenders in Georgia.

DIVISION OF FORENSIC SCIENCES

The Division of Forensic Sciences provides support for all law enforcement agencies in the areas of criminalistics, serology, drug identification, questioned documents, pathology, firearms identification, latent prints, implied consent, and toxicology. The division has branch laboratories in Augusta, Columbus, Macon, Moultrie, and Savannah.

ADMINISTRATIVE DIVISION

The Administrative Division furnishes financial, logistic, and personnel support services for the entire Bureau.

II COURTS

INTRODUCTION

The judicial powers of the State of Georgia are vested exclusively in seven classes of courts: magistrate, probate, juvenile, state, superior, the Court of Appeals and the Supreme Court. The magistrate, probate, juvenile and state courts are courts of limited jurisdiction. Additionally, the Constitution provides that the General Assembly may establish or authorize the establishment of municipal courts which have jurisdiction over ordinance violations and other offenses as may be provided by law. The courts of Georgia comprise a unified judicial system.

Superior Courts

The superior court is Georgia's court of general jurisdiction, having exclusive jurisdiction over felony cases and cases involving divorce, equity, and questions of land title. With the exception of certain probate and juvenile matters, the superior courts exercise concurrent jurisdiction in other cases with the limited jurisdiction courts located in the same county or circuit. Each of the state's 159 counties has a superior court, such courts being organized by single or multiple county judicial circuits. Currently there are 137 superior court judges serving in 45 circuits divided into ten administrative districts, with an Administrative Judge and Court Administrator for each. Prosecution of cases before a superior court is conducted by a District Attorney elected on a circuit-wide basis.

State Courts

State courts exercise jurisdiction over trials of misdemeanor criminal cases and have general civil jurisdiction over the trial of all general civil actions, regardless of the amount claimed, unless exclusive jurisdiction is vested in the superior courts. The state courts' jurisdiction also includes hearing applications for and issuing search and arrest warrants, holding courts of inquiry and punishing contempts by fine and/or imprisonment. As of July 1, 1988, 63 state courts operated in 62 counties (Cherokee and Forsyth counties are served by one court). Of the 86 judges presiding, 36 were full time state court judges; 2 were full time associate judges and 48 served part time. Prosecution of cases before a state court is conducted by a Solicitor elected on a county-wide basis.

Probate Courts

The probate courts exercise jurisdiction in the probate of wills, administration of estates, appointment of guardians and the involuntary hospitalization of incapacitated adults and other dependent individuals. Other duties for which the probate judges may be responsible, depending on the particular county, include holding habeas corpus hearings, acting as a court of inquiry, hearing traffic cases, and trying violations of state game and fish laws. There are 159 probate judges, each serving a single county.

Juvenile Courts

Juvenile courts have exclusive original jurisdiction in cases involving delinquent children alleged to have committed noncapital offenses, unruly children under the age of 17, deprived children under the age of 18, and juvenile traffic offenders under the age of 16. With the exception of the juvenile court judge in Floyd County, who is an elected official, juvenile court judges are generally appointed for six year terms by their counties' superior court judges. As of July 1, 1988, there were 11 full time juvenile court judges and 40 part time judges serving the state's 62 counties having separate juvenile courts. Where no separate juvenile court has been established, a judge of the superior court serves as judge of the juvenile court.

Magistrate Courts

The 1983 Constitution of the State of Georgia established magistrate courts to replace justice of the peace courts and small claims courts. A magistrate court exists in each county of the state and serves as a court of limited jurisdiction. They serve as courts of inquiry, may issue arrest and search warrants, try violations of county ordinances, punish for contempt, and grant bail in all cases where the granting of bail is not exclusively committed to some other court or officer. As of July 1, 1988 there were 159 chief magistrates and 267 magistrates: 36 also serve probate, juvenile, civil or municipal courts.

Court of Appeals

The Court of Appeals has appellate jurisdiction in all cases where exclusive jurisdiction does not rest with the Supreme Court. The Court of Appeals is composed of nine judges and is divided into three panels of three judges each. The Court of Appeals is authorized to correct errors in cases on appeal except where the Supreme Court has exclusive jurisdiction. Examples of cases appealable to the Court of Appeals include claims for damages, criminal cases other than capital felonies, and compensation and insurance claims. Caseload data are collected by the Court on an annual basis and include numbers of cases docketed; however, the numbers do not provide data on specific criminal appeals.

Supreme Court

The Supreme Court of Georgia has seven justices, who elect one of their number to be the Chief Justice. The Supreme Court is the final court of review in the State and has exclusive appellate jurisdiction in constitutional questions and contests. It has appellate jurisdiction in all habeas corpus cases, and all cases in which a sentence of death was imposed or could be imposed. It also has jurisdiction over a variety of civil matters.

Courts Data

The Administrative Office of the Courts, an arm of the Supreme Court and the staff of the Judicial Council of Georgia, collects, processes and maintains caseload information on the principal courts of the state. The data are critical in making decisions concerning the creation of judgeships and the boundaries of existing judicial circuits. Caseload data are collected by the Administrative Office of

the Courts for the superior, state, probate, juvenile, and magistrate courts. The Supreme Court and the Court of Appeals collect their own caseload data. With few exceptions, data collected and compiled for the courts reflect only workload factors and do not readily allow qualitative analysis of the functions of the courts.

Note: In 1985 AOC began compiling statistics according to calendar year. Some tables reflect this change.

III CORRECTIONS

INTRODUCTION

The administration of state correctional facilities and programs is a function of the Executive branch of government. All offenders sentenced by the courts to the custody of the state are either housed in facilities operated by, or under the authority of, the Department and the Board of Corrections, or are supervised by probation officers employed by the Department and the Board. As of November 30, 1988, the Department and the Board were responsible for the custody and care of 18,870 inmates institutionalized in facilities under the authority of the Department and the Board. The Department and the Board also were responsible for the supervision of 107,610 active probationers as of December 1988. The Department and the Board of Corrections have no authority over inmates released on parole. These offenders are supervised by the State Board of Pardons and Paroles and are addressed in a separate section of this publication.

Department of Corrections Facilities

The Department of Corrections is responsible for carrying out judicial sentences. In order to do so, the Department maintains four different types of facilities, has regulatory authority over another type of facility, and operates a separate division for the probation function. The Department has authority over 25 correctional institutions, 10 probation district offices and 19 diversion centers. It is authorized to employ 7,748 persons to carry out its assigned functions. It is by far the largest state criminal justice agency and one of the largest agencies in all of State government. The various programs for which the Department is responsible include:

1. **Probation Supervision** is a program operated by the Department as an alternative to incarceration. The judge may require a probationer to report to his probation supervisor on a routine basis, require community service work, require the payment of restitution to the victim, and may impose a variety of other special conditions upon the probationer's freedom. The Department employs 713 probation program employees who actually supervise offenders sentenced to state probation by the courts. As of December 1988, 107,610 active probationers were under the supervision of the Probation Division.

2. **Diversion Centers** are operated by the Department as short term residential facilities for offenders sentenced to a term of probation which includes conditions requiring confinement in a diversion center. The average stay in a diversion center is 120 days. The diversion program is designed to allow a sentencing judge to impose a more rigorous sentence than regular "street" probation, yet not as restrictive as incarceration in a prison facility. A diversion center offers a variety of educational, job training, counseling, treatment and other socialization programs to the offender. Residents of diversion centers are allowed to maintain their employment and must pay taxes, room and board, and any fines or restitution imposed by the judge. They also continue to pay for the support of their families. These centers are often referred to as "halfway-in houses". The Department is authorized to employ 285 employees to supervise offenders placed in 19 diversion centers. The current capacity of the diversion centers allows for custody of a minimum of 3,451 residents per year.

3. **Detention Centers** are operated by the Department as short term confinement facilities for certain offenders sentenced to a term of probation. These offenders include probationers whose terms of probation are revoked for technical violations; probationers convicted as habitual violators of Driving Under the Influence (DUI) laws and probationers convicted of non-violent offenses. The average stay in a detention center is 90 to 120 days. The detention program is designed for offenders to perform public works and places less emphasis on treatment programs than diversion centers although drug and alcohol treatment programs are available. The Department is authorized to employ 285 individuals to staff 5 detention centers which are to be fully operational by the middle of 1989. The capacity (220) of these centers will allow them to serve 2,450 residents per year.

4. **County Correctional Institutions** are operated by 27 counties within the state. Although the county government operates, maintains, and employs the personnel who operate these facilities, they are under the regulatory authority of the Department of Corrections. They house inmates who are sentenced to the custody of the Department for terms of confinement. These inmates are required to work in various county maintenance programs such as road repair and other public works. As of November 30, 1988, the 27 county correctional institutions housed 2,924 inmates.

5. **State Prisons** are operated by employees of the Department. These facilities offer a variety of educational, job-training, counseling, treatment, and other socialization programs to the inmates, but their primary emphasis is on maintaining custody of the inmates and security of the institution. As of November 30, 1988, there were 15,525 inmates housed in 25 state institutions. The Department is authorized to employ 5,744 individuals to staff these institutions.

6. **Transition Centers** are operated by the Department to provide an easier transition back into community life for inmates who are scheduled for release from prison in the near future. The program is designed to lessen the personal shock of going from a totally controlled and disciplined institutional setting to the free environment the average citizen enjoys. It is also directed at helping the residents secure and maintain meaningful employment. These centers are referred to as "halfway-out houses". As of November 30, 1988, there were 468 residents housed in these centers. The Department is authorized to employ 133 individuals to staff these centers.

County Jails

In Georgia, the sheriff of each county retains the English common law duty as chief jailer. He is responsible for the care, maintenance and security of all prisoners lawfully detained and awaiting trial and of all inmates sentenced to his custody by the courts. Generally, inmates confined in county jails have received sentences of 12 months or less, are awaiting transfer to a state prison facility, are awaiting trial on criminal charges, or are temporarily assigned to the county jail subject to the agreement of both the sheriff and the commissioner of the Department of Corrections, while they are working on a state Department of Corrections approved work project.

they are working on a state Department of Corrections approved work project.

Currently, there are 146 county jails funded for operation in the state's 159 counties.

Corrections Data

The data collected and published in this report are provided by the Department of Corrections Statistics Unit within the Department's evaluation and statistics component. This unit is responsible for maintaining all relevant statistical data on inmates and probationers assigned to the custody of the state. Since much of these data are critical to internal decision-making within the Department of Corrections, they are maintained primarily for such internal purposes. The Department of Corrections is, however, required by law to submit certain criminal history record information to the Georgia Crime Information Center and also provides to the State Board of Pardons and Paroles data on offender status and on offender conduct while in prison. The improved computer capabilities of this unit currently provide in-depth analyses of offender information and feedback to other criminal justice system components, especially to the judiciary.

Statistical data on inmate populations at the local level (i.e., county and city jails) are extremely difficult to maintain, since there is no central repository. The Department of Community Affairs, with the assistance of the computerized

reporting capabilities of the Georgia Crime Information Center, has been collecting limited data on local jail populations since mid-1982, as noted in the narrative portion of this report.

PRISON PROFILE

Table 57 outlines population trends in the major categories of prisons from 1984 to 1988. The figures represent inmate counts taken in December of each year. During that period, the overall inmate population increased from 15,731 to 18,870.

More specific data on individual institutions within the state system are available (See Table 58). Those prisons with the greatest population include the Georgia Diagnostic Classification Center (GDCC) at Jackson (1,817), Georgia Industrial Institute (GII) at Alto (1,665), Middle Ga. C.I. - Y.O. (985), Georgia State Prison (GSP) at Reidsville (976) and the Middle Georgia Correctional Institute - Rivers (950).

Note: The GDCC is operated primarily for the classification of prisoners to be reassigned to other correctional institutions. Also, Middle Ga. C.I. - Y.O. no longer houses just youthful offenders.

Table 57

CORRECTIONAL INSTITUTION POPULATIONS BY TYPE, 1984 - 1988

INMATE PROFILE

In analyzing the inmate population from 1984 to 1988, sex and race variables remain constant (See Table 59). Table 60 provides more specific data concerning age, sex, and race of the 1988 inmate population.

Of frequent interest in discussing offenders is the individual prisoner's actual length of sentence. Table 62 breaks down the numbers of persons assigned each specific sentence length. Percentage changes in sentence lengths are due to the Department of Corrections changing to a new computer system in July 1987. The

Offender Tracking Information System (OTIS) provides more detail on sentences and, as a result, will show an increase in the percentage of longer sentences. Also, the category of youthful offender will continue to decline due to the discontinuation of the Youthful Offender Act. There remain a few inmates still classified as youthful offenders who have not processed out of the system.

A final important area is the number of offenders awaiting execution. Though the percentages have remained constant, the actual numbers on death row have decreased from 117 in 1984 to 114 in 1988. One execution took place in 1988.

Table 59

INMATE POPULATION BY RACE AND SEX, 1984 - 1988

Note: Due to rounding, percentages do not always total 100%.

These figures represent inmate counts taken in December of each year.

*Beginning in 1985, a new crime type "Alcohol" was added and the crime type "Victimless" was deleted.

** Beginning in 1987, "HTV & DUI" were taken from the crime type "Alcohol" and categorized separately, also the crime type "Sex Offender" was added.

***Beginning in 1988, the category of "Not Reported" was added.

PROBATIONER PROFILE

Except for 1984, probation data are available for each of the last four years. The trend clearly indicates an increase in probationers since 1985 with a slight decrease shown in 1987 (See Table 65).

Analysis of the most serious crimes committed by probationers indicates that the greatest number of

probationers were involved in property crimes rather than violent crimes (See Table 67).

As the number of probationers increased, the number of probationers on first offender status also increased. In 1988 more probationers were on first offender status than at any other time (See Table 70).

Being sentenced under the First Offender Act does not necessarily imply that a probationer is a first time offender.
 Any violator may ask to be sentenced under the First Offender Act as one of several different options open to them.
 Occasionally, persons with one or more prior convictions will be sentenced under this act.
 These data should be viewed as only an estimation of the number of first time violators of first offenders on active probation caseloads.

IV PARDONS AND PAROLES

Parole Decision Guidelines Make a Better Parole System

Parole Board Creates Decision-Making Guidelines For the Purpose of

- Protecting Society
- Basing Decisions on Sound, Pertinent Facts
- Arriving at More Consistent Decisions
- Making Parole More Understandable
- Preventing Prison and Jail Overcrowding
- Making Punishment More Equitable Statewide

INTRODUCTION

The executive clemency powers of the State of Georgia are vested exclusively in the State Board of Pardons and Paroles. The Board is composed of five members appointed by the Governor for seven-year terms, subject to confirmation by the State Senate. Each year the Board elects one of its members to serve as Chairman.

The Board was established in 1943 with its authority established in the Georgia Constitution. Its existence ensures that the Executive Branch of government has a discretionary role in criminal justice. Thus in Georgia's justice system, the Board provides some of the checks and balances deemed necessary by the framers of the Constitution.

The Board is empowered to grant or deny clemency to inmates incarcerated for violation of the state's criminal laws. It has Constitutional authority to grant paroles, pardons, and reprieves; to commute and remit sentences; and to restore civil and political rights. It has authority and staff to investigate cases and to supervise persons granted conditional clemency.

Before the Board considers an inmate for parole, it conducts investigations. Detailed investigative reports become a part of the Board's case file, which is separate from files maintained by the Department of Corrections.

Initially, a parole officer studies arrest and court records and may talk with arresting officers, court officials, victims, and witnesses to prepare a legal investigation report on the details of an inmate's current offense and a summary of any prior offenses in the same county.

Subsequently, a parole officer interviews the inmate and completes a personal history statement questionnaire. The inmate is asked, among other things, where he has resided, attended school, names and locations of family members, whom he has chosen as references, where he plans to live and work, and what his own account is of his crime. A social investigation is also conducted which includes interviews with persons mentioned in the personal history statement.

Before any inmate is paroled, the Board reviews a Parole Review Summary from the Department of Corrections. The summary provides data on the inmate's behavior, attitude, physical status, mental and emotional condition, participation in activities, and performance in work and training programs while incarcerated. At its discretion, the Board may request detailed psychological and/or psychiatric opinions before considering a case. All information generated by parole officers and other officials, which become a matter of record within the Board of Pardons and Paroles, are used to prepare summaries of Board actions.

Paroles are granted based on Parole Decision Guidelines that were established to assist the Board in making consistent and accurate assessments of the factors that will affect each prospective parolee's chances for success upon release. Excluded from guideline decisions are life sentences and sentences for armed robbery.

The Board initially identifies the crime severity level of the individual. The crime committed is ranked from Level I to VII, with VII being the most severe. Those ranked in the higher severity categories will serve longer. The next area of consideration is parole success factors. These include age at first commitment, prior convictions (juvenile and adult), prior incarceration since age 17, parole or probation failure, use, possession, or attempt to obtain heroin or opiates, whether current offenses involved burglary or forgery, whether fully employed during six months prior to current offense, and other factors.

From these weighted factors, along with the severity level, the Board calculates the individual's parole success likelihood score. This score, along with the crime severity level, is inserted into a guidelines chart which indicates the actual time the inmate should serve. The Board reviews these data, and if approved, the inmate is advised of an expected release date. The inmate is released on this date provided the Board receives no serious disciplinary reports on the individual prior to the release date. If the length of time to be served, as determined by the Board, is greater than the actual sentence length, the inmate will serve the sentence issued by the court. In no case will the Board add time to an inmate's sentence. As of November 1988 the Board employed 539 individuals with 211 of these employees engaged in actual investigation and/or supervision of 10,101 parolees. During Fiscal Year 1988, the Board released a total of 12,398 state inmates from confinement through its actions.

Board of Pardons and Paroles Data

The Board of Pardons and Paroles collects its own data, compiling it for internal function requirements, as well as making it available to the criminal justice community as needed. It reflects not only workload, but certain qualitative factors concerning the activity of the Board.

PROFILE OF PARDONS AND PAROLES

Pardon and parole data were compiled on a fiscal year basis at the end of June rather than at the end of December for 1984 through 1986. Beginning with 1987, the figures are compiled on a calendar year basis. Table 72 provides all available pardon and parole data from 1984 to 1988.

1987 and 1988 are peak years for Parole Board activity. There were 11,024 parole releases in 1987 and 11,353 in 1988, while there were 2,702 returns to prison in 1987 and 2,896 in 1988.

1984 and 1988 are peak years for pardons, with 129 and 161 pardons issued respectively.

Most of the data indicate considerable variance in the amount of activity during the five year period. One noticeable trend is the increase in the number of commutations to time served. A major factor is the increasing inmate population forcing fewer denials of parole and the release of more prisoners.

Table 72

**V STATEMENTS
FROM
SENIOR
OFFICIALS**

MICHAEL J. BOWERS

Attorney General, State of Georgia

Attorney General Bowers was educated at the U.S. Military Academy, Stanford University and the University of Utah. After service in the Air Force, he attended the University of Georgia Law School. A member of the State Law Department since 1974, he became Georgia's fifty-first Attorney General in 1981.

Maintaining an effective criminal justice system and sustaining the public's confidence in it must remain among the highest priorities of government. To do so requires a commitment of the public will and the public treasury: there can be no cheap justice.

Combating crime, particularly the drug plague, requires a commitment of resources to law enforcement. Swift and sure dispensation of justice requires a commitment of resources to the judiciary. Effective punishment requires a commitment of resources to the prison system. A serious desire to rehabilitate requires a commitment of resources to probation and parole services as well as to the prison system.

The engine driving the criminal justice system today is space in the prison system. Because we have not built adequately to meet increasing demands we are unable to confine as many as should be confined for as long as needed. Punishment, in reality, is based on how badly the space is needed for the next felon in the pipeline rather than on a judge's conscious decision of what punishment is appropriate for the offense committed.

We must break that cycle of overcrowding the prisons, seeking short term solutions to reduce the inmate population, then overfilling the prisons again. We must commit the money to build adequate prison space, and we must do it for the long term. Appropriations for new prisons by the General Assembly in its 1989 session are a significant step forward.

THOMAS O. MARSHALL

Chief Justice, Supreme Court of Georgia

Thomas O. Marshall received his Bachelor of Arts degree from the United States Naval Academy and earned his law degree at the University of Georgia. He was appointed a member of the Supreme Court of Georgia in 1977 and now serves as Chief Justice of that court.

The work of the Supreme Court of Georgia is reflected accurately, I believe, in our annual analysis of criminal case dispositions. Nine out of ten criminal appeals were affirmed -- with no alteration whatever. In 4% of appeals, the conviction was affirmed, with some modification to the sentence. In 5%, new trials were ordered upon reversals.

In one case (out of a total of 146 appeals) the conviction was vacated and the defendant discharged. This case involved the violation of a statute which had been repealed when the case was tried.

The courts's actions on petitions to review judgments of the Court of Appeals, and on habeas corpus applications, is reflected in the attached report.

What these figures indicate is that the judges and juries of Georgia are conducting criminal prosecutions with a high degree of competence, and in that, the whole community can take comfort.

What is not in a proper order is our system (or our non-system) of indigent defense. Year after year, the General Assembly has refused to provide any funding, casting the burden upon counties, many of whom are sorely strapped for funds. The result of that is that the quality of justice is diminished, and that the final validity of criminal convictions are placed in doubt.

An adequate system of indigent defense serves two goals; that no one should be convicted of a crime without the constitutional protection of the right of counsel; and that convictions, once returned, should not be upset because of a want of this constitutional guarantee.

**SUPREME COURT OF GEORGIA
Criminal Case Dispositions January - December, 1988**

1. Cases filed by criminal defendants, including direct appeals and granted petitions for certiorari and habeas corpus:		
(a) Convicted affirmed (includes dismissals)	146	(90%)
(b) Conviction affirmed, sentence modified	6	(4%)
(c) Conviction reversed, new trial ordered	8	(5%)
(d) Conviction vacated and defendant discharged	1	(1%)
2. Petitions for certiorari to review judgment of Court of Appeals, filed by criminal defendants:		
(a) Granted	11	(8%)
(b) Denied or dismissed	122	(92%)
3. Applications for certificate of probable cause to review the denial of habeas corpus, filed by criminal defendants:		
(a) Granted	13	(8%)
(b) Denied or dismissed	147	(92%)

• Please note: The foregoing reflects all dispositions relative to the review of final convictions in criminal cases. It does not include review of certain interlocutory matters,

JAMES ROBERT (Robbie) HAMRICK

Director, Georgia Bureau of Investigation

Mr. Hamrick received his Bachelor of Science degree in Criminal Justice from Georgia State University. He is a graduate of the FBI National Academy and a past president of the FBI Academy Associates.

Mr. Hamrick has been actively employed in law enforcement since 1959, when he began his career with the Department of Public Safety. He was appointed as Special Agent with the Georgia Bureau of Investigation in 1969. On September 4, 1985 Mr. Hamrick was appointed by the Governor and the State Board of Public Safety as Director of the Georgia Bureau of Investigation

Since January 1988, the GBI and its Crime Information Center (GCIC) have seen five years of planning and research pay off with the installation of the multi-million dollar Automated Fingerprint Identification System (AFIS). During the past year, great progress has been made toward realizing the full capabilities of this technologically advanced crime-fighting tool.

AFIS processing of incoming fingerprint cards has begun. The system is designed to process 1,600 cards and 1,000 final disposition reports per day. Whenever fewer than 1,600 cards are received, cards from GCIC's 1986 backlog will be added to that day's processing work load. The backlog should disappear, processed into the AFIS and Computerized Criminal History (CCH) data bases, in less than 24 months of full AFIS operations.

By late 1989, the NEC AFIS computers and GCIC's new Unisys mainframe computer will work together to process incoming cards and send new or updated rapsheets to computer terminals of the agencies that submitted the cards to GCIC. The system has been designed to send rapsheets eight hours after processing of cards begins at GCIC. Rapsheets for non-terminal agencies will be mailed out the next day.

The GCIC master fingerprint file now has more than a million criminal cards and all have been converted for AFIS operations and loaded into the AFIS computers and onto optical disks. The Latent Cognizant File, the data base used in matching latent prints from crime scenes, has digitized print images from more than 360,000 of those of-

fenders likely to be involved in future criminal acts. Age and previous criminal record were the principal factors in deciding which were selected for the Latent Cognizant File.

When a latent print from a crime scene is submitted to the Bureau's Division of Forensic Sciences by local law enforcement, it will be searched against the Latent Cognizant File. If no match or "hit" is made, the latent print will be stored and will be compared with each of the incoming 1600 cards processed each day by AFIS.

Until February 15th, 1989, all of the sixty matches of latent prints where no suspect identification data were available beforehand involved armed robbery or burglary cases. On that date, AFIS processing of a partial latent print found at a murder scene in Cartersville, led to the identification of the Bartow County man who was charged with the murder of Mrs. Allie Roper, Governor Harris' aunt. This first major case success for AFIS was based on solid professionalism demonstrated by a sheriff's department, a municipal police department, and all three GBI Divisions.

AFIS is the most promising crime-fighting tool developed during the past quarter-century. With the addition of a few more Division of Forensic Sciences personnel to process latent prints for AFIS searches, law enforcement agencies throughout Georgia will be able to take complete advantage of the new GBI services that AFIS technology will provide, 24 hours a day and seven days a week.

COLONEL CURTIS D. EARP, JR.

**Commissioner,
Georgia Department of Public Safety**

A Distinguished Military Graduate of the ROTC Program at Florida State University, he was commissioned as a Regular Army Officer, Military Police, in August 1960. Colonel Earp is a graduate of the Infantry Officer Basic Course; Airborne, Ranger, and Pathfinder Schools; the Military Police Officer Familiarization Course; the Military Police Officer Advanced Course; and the US Army Command and General Staff College. His civilian education includes both Bachelor and Master of Science degrees in criminology from Florida State University.

Colonel Earp assumed duties as Commissioner and Commander, Georgia State Patrol on 3 October 1986.

During the year covered by this report Georgia Law Enforcement Agencies were confronted with several major challenges and, through professionalism and teamwork, met them with great success. These joint operations occupied a substantial portion of time and budget and were subjected to intense public scrutiny.

In January the Georgia State Patrol contributed 350 Troopers to the security detail for the so-called "Freedom Marchers" in Forsyth County. There, the combination of GBI agents, Department of Natural Resources Rangers, Forsyth County Sheriff's Deputies and Georgia State Troopers insured that the peace was kept intact.

But an even bigger challenge loomed in July. The first ever national nominating convention was coming to Atlanta and the Security problems were manifest. But once again, careful, detailed planning and meticulous execution prevailed. The security details for the Democratic National Convention required the presence of 420 Troopers for more than two weeks in July. Other members of the Department of Public Safety also were committed to the Convention and when the last politician boarded a plane out of Atlanta the tally of man hours expended by DPS totalled 72,657.

The primary mission of the Georgia State Patrol was to provide security for the Georgia World Congress Center. The actual convention site was the Omni Colliseum, but since the Omni was only large enough to hold the general sessions, the GWCC, directly across International Boulevard, was designated to handle all other activities associated with

the convention--parties, caucuses, meetings and the working quarters for the 15,000 members of the news media that gathered to cover the convention.

The majority of the Trooper security force was employed within and immediately around the GWCC, with an average of 113 Troopers working on three eight-hour shifts. All shifts had a four-hour quick-alert standby shift at their motels, which provided GSP with a ready reaction force if needed. An additional 50 Troopers were brought to Atlanta and made a part of a riot control force under the control of the Atlanta Police Department.

With commensurate commitments from other state law enforcement agencies and the metro Atlanta forces, an absolutely solid security blanket was thrown over the convention. Only a few scattered and insignificant incidents occurred around the periphery and nothing disrupted the convention itself. The performance was a remarkable testament to the professionalism of Georgia Law Enforcement.

During 1988 GSP also met the challenge of drugs. By continuing our Aggressive Criminal Enforcement program, our Troopers are making traffic stops that ultimately lead to confiscation of narcotics and contraband cash. In 1988 GSP seized 336 kilos of cocaine, 491 kilos of marijuana, 11 kilos of crack cocaine, and \$ 1,654,555 in contraband cash.

In 1987 nearly every statement from senior law enforcement officials in this publication carried some

mention of the threat posed by the drug traffic. I have little doubt that most will also see drugs as the major problem that will face us in 1989. But looming on the horizon is another threat; one that all of us in Georgia need to be particularly cognizant of.

What is this threat? International terrorism. The unrest over the chain of succession in Iran does little to mitigate the threat that once was articulated by Hashemi Rafsanjani, speaker of the Iranian Parliament. This was a call for Palestinians to commit terrorist acts against the United States, Great Britain and France. While Palestinians loyal to Yasser Arafat publicly rejected Rafsanjani's call to murder, other terrorist organizations have remained silent. Equally dangerous, however, is the probability that non-Palestinian groups, supported directly or indirectly by Iran, Syria or Libya, will initiate a terrorist campaign against the United States that can result in murder, the destruction of property and widespread intimidation.

The infrastructure of terrorism---recruits, funds, weapons, target intelligence, forged documents and safe houses--is already solidly in place in Western Europe and there is evidence that it also in the United States. Within U.S. borders, the U.S. intelligence community and law-enforcement authorities have long been aware of the existence of a loosely organized group of terrorists awaiting orders from Iran to move ahead.

The March, 1989 bombing in San Diego of the car belonging to the captain of the Vincennes, the U.S. warship responsible for downing the Iranian airliner in the Persian Gulf in the summer of 1988,

was a bold move that illustrates the viability of the terrorist threat. There is good reason for the boldness of these sponsors of international terrorism. In the past decade, more than 90 percent of all terrorist incidents worldwide have been at least partly successful. This permits the Irans, Syrias and Libyas of this world to wage a low-cost, low-risk form of warfare that is difficult to counter.

Nor is the middle east terrorist all that we must be vigilant against. In 1988 a New Jersey State Trooper made a routine traffic stop and discovered a Japanese terrorist, with materials for a bomb in his trunk, bound for Fort Dix, New Jersey.

Just think about the array of tempting targets in Georgia. Start with Hartsfield International Airport, or the downtown area with its impressive number of consulates and foreign trade offices. Look at the military objectives--Dobbins Air Force Base; Warner Robbins Air Force Base; Kings Bay Naval Base; and Forts Benning, Gordon and Stewart.

The only way to deal with terrorism is to stop it before it happens. And that's why I say that this growing threat is one that must concern every law enforcement officer in Georgia.

JOHN PERRY

President, Georgia Association of Chiefs of Police

Chief John Perry of Thomasville is currently serving as President of the Georgia Association of Chiefs of Police. A graduate of the FBI Academy in Quantico, Virginia, he has been in law enforcement for over 25 years. His career began with the Atlanta Police Department where he was employed in sworn positions until January 1975 when he was hired as Chief of Police, Thomasville, Georgia

Criminal Justice in Georgia is like good goat cheese. At first, the smell is not too bad; in fact, it looks and smells pretty good. The more it stands, the more it smells. If left unattended, it gets down right offensive!

Criminal Justice is a three-legged animal. We know it as Law Enforcement, Court and Corrections. When one part of that animal is not functioning properly, it effects the other two parts proportionally. In the past, rising crime rates were attributed to poor performance by law enforcement. We just were not smart enough to handle the new requirements being placed upon us by the Courts. We had to readjust by being more informed; i.e. - specialized training and formalized education. We did this all too well. Law enforcement now does such a good job of catching and prosecuting criminals, that we have backlogged the Courts and Corrections. Law enforcement in Georgia is too effective!

The Court System in Georgia is in need of a more professional approach to managing their workload. It has worked well in the past due to the quality of our judges, but their workload has gotten to the point whereby they can not manage it alone anymore. The State must spend more money to assist our local judges to manage their increased workload. We also need more judges and prosecutors.

Our prosecutors do such good work, that our jails and prisons are continuously overcrowded. Corrections must now stand up and be heard! People are reluctant to put their hard earned taxes into prisons now being mandated by Federal Courts.

Prisons that are better built and maintained than their own homes tend to turn folks off.

Do we really need to warehouse all our prisoners? I think not. We most certainly need to punish them and keep them away from our law abiding citizens. This can be accomplished by the State (translated to mean our elected officials) spending our money to protect us from the criminals that law enforcement catches, courts convict and corrections receives.

I am not a Corrections trained person. I know very little about their internal needs or problems. I am a well informed, educated law enforcement person that recognizes, along with a host of others, that something must be done now to keep criminals away from their victims long enough to exert some punishment upon them for their misdeeds!

We can no longer turn criminals loose just to make room for more. There must be a sincere move by our elected officials to address the problem of prison overcrowding. The answer is not turning them loose, but in finding workable alternatives. The only message being sent to our criminals and their friends now is "Crime Pays". The time has now arrived for us to attend to our cheese!

SHERIFF GREGORY T. COURSEY

President, Georgia Sheriffs' Association

Sheriff Gregory Coursey of Burke County is President of the Georgia Sheriffs' Association for 1988-89. He is a graduate of Waynesboro High School and attended both Valdosta State College and Augusta College.

He is currently serving as chairman of the C.S.R.A. Law Enforcement Training Center Advisory Board, is a member of the National Sheriffs' Association and is active in the Peace Officers Association of Georgia.

Working together is the key to solving the problems faced by all branches of law enforcement. I think it is important that all law enforcement agencies cooperate. City, county, state and federal agencies are fighting the same battle, but in many instances, we don't join forces.

Our number one problem today is drugs and it is definitely a war that one agency cannot win. It will take law enforcement as a whole to make any impact in stopping this crime that is ruining our society.

It is my belief that not until we eradicate the illegal use of drugs will the immense pressure on our jails be substantially eased. Until we achieve a drug-free country, agencies involved in the criminal justice system have the moral responsibility to help resolve the crises in our jails.

Jail overcrowding is a serious problem facing Georgia sheriffs today. Georgia's county jails are holding more than 14,000 inmates in facilities that were designed to hold less than 10,000. Approximately 4,000 of these inmates are sentenced and belong in state institutions. Our county jails are pre-trial detention facilities. They are not now nor have they ever been designed for long term care. The overcrowding of our county jails is creating a tremendous hardship on the sheriffs in this state and the tax payers at the local level. It is costing local governments millions of dollars in room and board, medical and dental expenses to house state prisoners.

Because of the serious overcrowding, sheriffs are also being bombarded with law suits. Every day we are concerned about injuries, hygiene, and riots occurring in our jails. We have already had several riots in local jails since the first of the year and, as overcrowding continues to increase, the threat of riots causing damage, bodily injury and harm to prisoners in our custody and our own personnel becomes even more real.

Today, the criminal justice system is no longer effective. Because the state has run out of prison space, there are now roughly 120,000 individuals in Georgia on probation and about 11,000 on parole. Inmates are spending only a fraction of their sentences in confinement, generally serving one month of incarceration for each year of sentence.

With offenders serving only a small portion of their sentences, behavior modification programs have become ineffective. Recent U. S. Justice Department studies confirm that large numbers of inmates who are released early simply return to their home communities and commit new offenses. Georgia's criminals who once feared incarceration, now only consider it a minor inconvenience.

The state of Georgia must assume their responsibility of their state inmates and get this unfair burden off local government and local taxpayers. This is a tax burden that should be spread out over the entire state. The state of Georgia has the resources or at least the taxing authority through sales tax or income tax to generate the revenue to solve this problem.

Next, we must begin incarcerating low-risk, repeat offenders in minimum security beds. More than half of the prison population are property, DUI, or other non-violent criminals who stay in prison for very short periods of time, typically only a few months. A minimum security facility can be built relatively inexpensively and can become operational in a short period of time.

Finally, we must restore confidence in our criminal justice system. Both the tax payer and offender alike need to know that the sentences handed down will be meaningful and that crime will be punished to the full extent.

It is time for the people of the state of Georgia to call for an end to the tolerance of criminal behavior. We need to demand a stop to drugs in our community. We must put an end to violence. We must protect our children. If we all agree that these are goals worth pursuing, we must also agree that they are worth paying for, whether that be money to build more jail and prison space or becoming more supportive of law enforcement.

ROBERT L. DOSS, JR.

Director, Administrative Office of the Courts

Mr. Doss received a Bachelor of Business Administration degree in Economics and a Master of Science degree in Criminal Justice and Urban Affairs from Georgia State University. He is also a Certified Graduate Fellow of the Institute for Court Management.

He came to the Administrative Office of the Courts in July 1973, as Assistant Director and has served as Director since September 1975.

Recent trends in caseload signify major achievements by Georgia's superior courts. In the ten-year period from 1978 to 1987, superior court judges were able to reduce the average time required to dispose of a case by 50%. This accomplishment was made despite a 30% increase in the number of cases filed in these courts.

During this period, there has been a marked reduction in the estimated average case processing time (the estimated time from filing to disposition of all types of cases) from 10.6 months to 5.4 months. The greatest decrease occurred from 1982 through 1987, when case processing time fell from 10.7 months (a slight increase from 1978) to 5.4 months. Improvement in these figures has been especially significant when considered along with a 39% increase in total filings during this five-year period.

Researchers at the Administrative Office of the Courts investigated a number of topics other than processing times for various types of cases in a 1988 study, including judicial workload, open cases, and case backlog. The analysis also disclosed that the number of open cases decreased by 37% during the five-year period. Percentages of case backlog (criminal cases over four months old and civil cases older than six months) fell from 70% in 1982 to 59% in 1987.

Estimated time for processing domestic relations cases, which fell by almost 60%, decreased the most substantially of the three major types of cases handled in superior courts. Average times for processing felony, general civil, and domestic relations cases are now generally within the time

guidelines proposed by national court management organizations.

The decline in open caseload has been attributed to the determination and special efforts of our superior court judges. The Chief Justice of the Georgia Supreme Court has commended them for taking the initiative in introducing techniques for more effective case management. Among the reasons cited for the decline in estimated case processing time are expanded use of computers by courts, more productive procedures for court administration, effective methods of case management, efficient calendaring techniques, and the positive benefit of the 21 additional superior court judgeships created by the General Assembly that became effective from 1982 through 1987.

The reality of increasing caseloads confronts our judges every day. In a single year, 1986-1987, felonies filed in superior courts rose by 12%. With no automatic increases in funding or staff, the courts must somehow deal with significant growth in caseload over a short period. So far they have shown that they have been successful in case management and in reducing the number of open cases.

DAVID C. EVANS, COMMISSIONER

Georgia Department of Corrections

Commissioner Evans was educated at Georgia State University and East Tennessee State University. He began his career with the State of Georgia in 1965 working in key positions with the Georgia State Budget Bureau, Department of Human Resources. Mr. Evans has served as Commissioner for the Department of Corrections since 1976.

During the past year, as in preceding years, the Georgia Department of Corrections has been faced with an ever increasing number of offenders. We continue to operate our facilities over design capacity and at the same time the caseload of our Probation offenders continues to grow. And we are not alone, this problem of the increase in the number of offenders impacts the entire criminal justice community -- from the judge, to the county jails who are also operating over capacity (and many under court order), to the state institutions, to the staff charged with supervising the offenders.

To further complicate the situation, changing social attitudes bring new groups into the corrections system. Persons convicted of driving under the influence now receive prison or community service sentences rather than suspended sentences or fines. The number of sex offenders has steadily increased as a result of changes in the public's awareness of rape and child abuse. And there is AIDS, a plague of medieval proportions with its frightening implications for society in general and prisons in particular.

Discussions with members of the criminal justice community center around the problems of growth and crowding. How do we keep up with the pressure of sheer numbers of offenders flooding into our prisons and onto our probation caseloads? How do we provide quality corrections and help to protect the citizens of our state while at the same time recognizing that no budget can stretch to cover all of the competing priorities that face us?

We continue to maintain that a balanced approach is the most effective response. We have pressed for increased bedspace while emphasizing a continuum of front end community alternatives.

Georgia continues to lead the nation in alternatives to incarceration. Home confinement, intensive supervision, special alternative incarceration, diversion centers, and community services programs augment basic probation supervision. Several detention centers to house low security and alcohol related traffic offenders have come on line this year. Electronic surveillance monitoring technology is being piloted and may be yet another effective tool in our arsenal of alternatives.

The support of the Governor and the General Assembly is vital to implement any of these programs. The Department of Corrections has been fortunate to have their continued recognition of the problems created by the increased number of offenders. With their support and interest, and that of other members of the criminal justice community, the immediate problems that we face can be solved. However, without sweeping changes in society as a whole, the long-range questions of crime and punishment that we face today will continue to trouble us as we move into the 21st Century.

WAYNE SNOW, JR.

Chairman, State Board of Pardons and Paroles

Mr. Snow received an A.B. degree from the University of Georgia in 1958 and earned his L.L.B. degree there in 1960.

He served 21 years in the General Assembly; for 11 years he was Chairman of the House Judiciary Committee.

Mr. Snow was appointed to a full seven-year term on the five-member Board of Pardons and Paroles by the Governor in 1983 and elected Chairman in 1985.

Every Governor of Georgia for the past 22 years has encouraged the State Board of Pardons and Paroles to start special releases to relieve prison and jail overcrowding. Each time the Board has responded positively and each time for the sake of reducing a dangerous and inhumane confinement situation, which could have become very expensive.

Governor Joe Frank Harris on March 7, 1989, asked the Parole Board to begin emergency releases. He had no choice. More than four thousand sentenced state inmates were backed up in county jails, and the state was faced with the threat of a federal court suit against the entire prison system. How long drawn out and expensive such lawsuits can be was shown by the Guthrie suit against Georgia State Prison during the last decade. Georgia cannot afford a repeat of that.

This time the Governor specified the types of inmates he wanted considered. They are those serving for misdemeanor offenses, damage to property, habitual traffic violator, forgery, theft by taking, motor vehicle theft, burglary and revoked parole and probation when the reasons for revocation were low-level offenses or technical violations.

Many of those being released under the Governor's Emergency Release Program had already been approved for parole during the last half of 1989 or during 1990. The Board simply made a new decision to release them some months earlier than planned.

To supervise these additional parolees, the Board received funds to employ 67 new parole officers

plus other staff during the spring of 1989 and 72 more parole officers and more support staff during Fiscal Year 1990.

I am glad the Parole Board is not being relied on alone to handle the overcrowding problem. Governor Harris called for fast-track construction and operating procedures to provide several thousand additional bedspaces within one year.

As a member of the Governor's Commission on Criminal Sanctions and Correctional Facilities, I look forward to submitting certain important recommendations to the Governor before the end of 1989. Governor Harris has said he intends to include the Commission's sentencing-reform proposals in his legislative package for the 1990 General Assembly. This should provide our best hope for even-handed criminal justice and long-term control of inmate overpopulation.

MINUARD C. (Mickey) McGUIRE

Director, Governor's Office of Highway Safety

Mr. McGuire received his Bachelor of Arts Degree from Talladega College in Alabama and his Master of Science Degree in Urban and Regional Planning from Florida State University in Tallahassee.

Mr. McGuire began his career with the State of Georgia in 1973 and was appointed by the Governor as Director of the Governor's Office of Highway Safety in 1983.

Jail and prison overcrowding continues to be a critical issue for Georgia's criminal justice community. Increased sanctions for DUI offenders during the early years of this decade resulted in the increased incarceration of alcohol related traffic offenders and habitual traffic violators. These offenders represent a significant portion of the jail and prison population, requiring the use of detention centers or other alternatives to incarceration for these and other low-security offenders.

Recognition of the resources required to address the traffic related component of the offender population led to an exploration of ways to prevent potential offenders from entering the criminal justice system.

Two years ago, in this publication, I indicated research had been initiated to determine the number of problem drinkers (or those whose drinking habits exceed the "social drinker" category) in Georgia's driving population, including whether a judicially sanctioned assessment/intervention program for DUI first offenders impacts the DUI problem, and whether these programs could be supported by fees paid by the offender.

Pilot programs, dependent on the cooperation of local judges and law enforcement personnel, were initiated in different areas of the State, representing a mix of urban and rural locations.

Results of the research indicated that 64%, or more than six of every ten DUI first offenders were found to be "problem" rather than social drinkers; that marked reductions in drinking and driving be-

havior were exhibited by the pilot program participants; and, after 24 months of the pilot project, eight different programs had achieved financial self sufficiency and were operating on offender fees alone.

This research effort represents a new step in determining future policy decisions regarding DUI offenders. It is an example of the coordination exhibited by members of the criminal justice community to find solutions to problems that affect all Georgia citizens.

VI APPENDIX

DATA ANALYSIS TECHNIQUES

In order to control for population differences, and thus make descriptions and comparisons between jurisdictions and over time more accurate and meaningful, Index crimes and arrests are often expressed as a rate, i.e., specifically, the number of crimes or arrests reported for each 100,000 people.

Formula for calculating crime and arrest rates for a jurisdiction or group:

$$\frac{\text{Number of crimes (arrests)}}{\text{Total population of jurisdiction or group}} \times 100,000$$

The necessity of controlling for population differences can be seen in the following example. In 1983, Any County reported 95 murders, while Other County had 53. On the basis of this fact alone, a casual observer would probably conclude that murder is much more of a problem in Any County than Other County, there being twice as many. Such a conclusion would not be accurate, however, because the populations of the two counties were not considered. Suppose that Any County has 150,000 people, yielding a murder rate per 100,000 people of 63.3, while Other County's population is only 40,000, producing a murder rate per 100,000 people of 132.5. Clearly, other factors must be considered; however, the rate allows for general comparisons between jurisdictions.

Another measure, the annual percent change in the number or rate of Index crimes or arrests, is a comparative statistic useful for identifying trends in yearly data.

Formula for calculating percent change:

$$\frac{X_2 - X_1}{X_1}$$

Where: X_1 = number, rate of crimes, arrests in previous year.
 X_2 = number, rate of crimes, arrests in present year.

POPULATION PROJECTIONS

County and statewide population figures used in Georgia Criminal Justice Data are based on projections for 1990 population made by the Georgia Office of Planning and Budget (OPB). Population estimates for 1984-1988 are based upon the 1990 projection and the 1980 U. S. Census figures.

Formula for calculating population estimates:

$$1988 \text{ Population} = [(1990 \text{ Estimate} - 1980 \text{ Census Population}) \times Y] + 1980 \text{ population}$$

Where: $Y = 0.8$ for 1988 (.7 for 1987 etc.)

The following population estimates were used for each county in 1988:

COUNTY POPULATION PROJECTION - 1988

COUNTY	1988 POPULATION ESTIMATE	COUNTY	1988 POPULATION ESTIMATE	COUNTY	1988 POPULATION ESTIMATE
Appling	17,403	Evans	9,170	Newton	40,333
