U.S. Department of Justice Office of Justice Programs Bureau of Justice Statistics

OF CRIMINAL JUSTICE STATISTICS — 1990

Bureau of Justice Statistics reports

(Revised July 1991)

Call toll-free 800-732-3277 (local 301-251-5500) to order BJS reports, to be added to one of the BJS mailing lists, or to speak to a reference specialist in statistics at the Justice Statistics Clearinghouse, National Criminal Justice Reference Service, Box 6000, Rockville, MD 20850.

BJS maintains the following mailing lists:

- Law enforcement reports (new)
- Drugs and crime data (new)
- Justice spending & employment
- White-collar crime National Crime Survey (annual)
- Corrections (annual) Courts (annual)
- Privacy and security of criminal history information and information policy
- Federal statistics (annual)
 BJS bulletins and special reports
 (approximately twice a month)
 Sourcebook of Criminal Justice
- Statistics (annual)

Single copies of reports are free; use NCJ number to order. Postage and handling are charged for bulk orders of single reports. For single copies of multiple titles, up to 10 titles are free; 11-40 titles \$10; more than 40, \$20; libraries call for special rates.

Public-use tapes of BJS data sets and other criminal justice data are available from the National Archive of Criminal Justice Data (formerly CJAIN), P.O. Box 1248, Ann Arbor, MI 48106 (toll-free 1-800-999-0960).

National Crime Survey

The Nation's two crime measures: Uniform Crime Reports and the National Crime Survey, NCJ-122705, 4/90

Survey, NG2-122703, 4190 Criminal victimization in the U.S.: 1973-88 trends, NCJ-129392, 7/91 1989 (final), NCJ-129391, 6/91 1988 (final), NCJ-122024, 10/90 1987 (final report), NCJ-115524, 6/89

BJS special reports

SUGGESTED CITATION

Kathleen Maguire and Timothy J. Flanagan, eds., *Sourcebook of Criminal Justice Statistics 1990.* U.S. Department of Justice, Bureau of Justice Statistics. Washington, DC: USGPO, 1991.

Library of Congress Cataloging in Publication Data

United States. Department of Justice, Bureau of Justice Statistics.

Sourcebook of Criminal Justice Statistics 1990, by Kathleen Maguire (and others).

"NCJ-130580"

1. Criminal statistics--United States. 2. Criminal justice, administration of--United States--Statistics. 3. Corrections--United States--Statistics.

I. Author. II. Title.

The Assistant Attorney General, Office of Justice Programs, coordinates the activities of the following program offices and bureaus: the Bureau of Justice Statistics, National Institute of Justice, Bureau of Justice Assistance, Office of Juvenile Justice and Delinquency Prevention, and the Office for Victims of Crime.

Foreword

This volume represents a long-term commitment to four critical standards--comprehensiveness, accuracy, completeness, and usefulness. The Bureau of Justice Statistics, which publishes this reference tool, and the Hindelang Criminal Justice Research Center, which produces it, have undertaken every year for almost two decades to improve a resource that from the beginning has served as an essential reference work.

Only here can readers turn directly from American public opinion on criminal justice matters to the number of Federal criminal defendants to drug use by high school students. Whether the user wants to know about local institutions, such as jails, or about Federal questions, such as national expenditures for justice, this single book meets those diverse needs. This book reflects the reality that criminal justice issues in the United States concern every citizen and are the responsibility of every jurisdiction and community.

All information is presented as it was originally published, so that while the form may change somewhat, the content is the same. Interested readers can refer to the sources for more detail, but they have at their fingertips all the notes and explanatory materials necessary to understand fully the words and numbers presented.

Even in selecting material for a book as large as this one, the editors have had to leave out more than they included. We are confident that users of this reference volume will find that the material selected has met exacting standards and is of research and operational significance.

Steven D. Dillingham, Ph.D.

Heven V. Vally C

Director

Bureau of Justice Statistics

For your information

This is the 18th annual Sourcebook of Criminal Justice Statistics. It brings together in a single volume nationwide data of interest to the criminal justice community.

Almost all its data are nationwide in scope and, where possible, they are displayed by regions, States, and cities to increase their value for local decisionmakers and for comparative analyses.

Data available for limited groups of cities, States, or jurisdictions are included if they pertain to a topic of major concern.

Overview of the availability of nationwide data

Statistical information about crime and criminal justice in the United States is published by hundreds of public and private agencies, academic institutions, research organizations, public opinion polling firms, and other groups. All levels of government collect and disseminate such data.

Organization of the Sourcebook

This book has six sections:

- (1) <u>Characteristics of the Criminal Justice</u>
 <u>Systems</u> presents data on the number and types of criminal justice agencies and employees, criminal justice expenditures, workload of agency personnel, and so on. It also includes tables that summarize, State by State, the statutory, regulatory, or administrative characteristics and practices of criminal justice agencies.
- (2) <u>Public Attitudes Toward Crime and Criminal Justice-related Topics</u> presents the results of nationwide public opinion polls on such matters as fear of victimization; the death penalty; prison reform; gun control; drug use; and evaluation of law enforcement, judicial, and correctional agency performance.
- (3) Nature and Distribution of Known Offenses presents data on several indicators of the extent of illegal activities. They include proportions of persons reporting that they have used various drugs or participated in other illegal activities; surveys of individuals and households that may have been victims of crimes; and law enforcement agency counts of offenses reported to them.

- (4) Characteristics and Distribution of Persons Arrested includes counts of arrestees by age, sex, race, and area; proportions of known crimes cleared by arrests; and counts of illegal goods seized.
- (5) <u>Judicial Processing of Defendants</u> presents data on the number of juveniles and adults processed through the courts and on the characteristics, dispositions, and sentences of defendants.
- (6) Persons Under Correctional Supervision presents data about persons on probation and parole, population and movement of inmates of State and Federal prisons, and characteristics of State prison inmates. It also presents data on offenders executed and offenders currently under sentence of death.

Each of the six sections opens with an overview of its contents.

Annotated sources and list of publishers

Publications from which tables or figures have been taken for presentation in *Sourcebook* are described in annotations that precede the Appendices. The annotations include standard bibliographic information, periodicity of publication, dates of tabular information appearing in the publication (many sources, even some annual reports, contain data for a number of years), a brief summary of the publication's contents, and a list of *Sourcebook* tables and figures taken from the sources. Addresses of the publishers follow the annotations.

Explanatory appendices

For sources that use complex survey methods or that require a long list of definitions of terms, an explanatory text is presented in the *Sourcebook*. These appendices add information or clarify the data presented, but readers should consult the original sources for even more detailed and complete explanations.

Reliability of the data

Data in this book are no more reliable or complete than the sources from which they are taken. Responsibility for the quality of data is borne by the original source; responsibility for its selection and presentation rests with the *Sourcebook* staff.

Reporting periods

The aim for each edition of the *Sourcebook* is to combine the most recent data available with earlier data to show trends. Unfortunately, many reports are based on data already several years old at the time of publication.

It is sometimes impossible or imprecise to compare data from different sources. For example, data in one source may be expressed only in full fiscal years while those in another are expressed only in full calendar years. Until June 30, 1976, the fiscal year for Federal agencies ran from July 1 through June 30, but it now runs from October 1 through September 30. The period July 1-September 30, 1976, is called the "transition quarter." Because various data sources treat this change in different ways, it is best to check a table's explanatory note to verify of the precise periods covered by its data. Readers should be extremely cautious in combining or comparing data from different sources or in examining data from the same source over time.

Table and figure preparation

<u>Updating</u>. For tables and figures from annual publications, such as the FBI's *Crime in the United States* and *Criminal Victimization in the United States* of the U.S. Department of Justice, updating involves replacing older with newer data, taking care to note any changes in methodology or reporting procedures that should be brought to the reader's attention.

For tables and figures from nonannual and special publications (such as surveys, research reports, and public opinion polls), updating and expansion involves searches for new or more recent data. Sometimes, data from previous editions of the *Sourcebook* are retained, either alone or along with more recent data.

Bodies of tables. The bodies of most Sourcebook tables appear exactly as in the original sources. This presentation is consistent with the Sourcebook's main function-to bring together data from diverse sources for presentation as originally published, rather than to transform or recompute the original data.

However, the Sourcebook staff has:

- (a) constructed some tables based on printed narrative or machine-readable data from the source; and
- (b) <u>adapted</u> some tables with only nonsubstantive changes from the source.

Notes. **Sourcebook** tables carry three types of explanatory and cautionary notes:

- (1) Notes that follow tables and begin with "Note:" are written by the **Sourcebook** staff from information in the original source.
- (2) Some are brief notes in parentheses "()" just above the table body. Most of these notes repeat information from the source table, but a few are added by the *Source-book* staff.

(3) Some are footnotes reprinted as they appeared in the original source. Most of these footnotes are keyed to specific table entries or to variables that require explanation.

A note on definitions of terms

Because the *Sourcebook* includes data from so many sources, similar or identical terms sometimes have different referents when used in different sources. For example, the precise meaning of terms such as "case," "caseload," "rate," and "race/ethnicity," differs among sources. To clarify the meaning of terms as they are used by various sources, many definitions are given in notes on tables and in appendices to which table notes refer.

However, in a compliation such as this it is impossible to provide an exhaustive list of definitions and explanations for each table that will satisfy the needs of all readers. Users with strong interest in particular tables--especially those not familiar with the substantive area to which a table refers--are advised to consult the original source for a fuller explanation of subtleties with respect to data collection procedures, data exclusions. definitions of terms, and so on.

Cross-references to last year's edition

For each table and figure in this edition, the figure and table list (which follows the table of contents) indicates whether last year's edition contained exactly the same table or an equivalent table with data from an earlier year.

Your input requested

Your critical comments and suggested changes will help us to improve future editions of the *Sourcebook*.

Please tell us about appropriate sources of criminal justice statistics you believe we have overlooked. Of special interest are sources of data--prefercibly, but not necessarily, national in scope--that have not been drawn upon for this edition.

It would help us to know for what purposes you have used the *Sourcebook* and how much it has helped in achieving those purposes.

A special page for your comments and suggestions appears at the end of the book, just after the index. Please use this self-mailer to give us the benefit of your comments and suggestions for a more useful Scurcebook.

Guide to symbols used in tables

The following symbols have been used uniformly, unless otherwise noted in specific tables:

- Represents the quantity zero or rounds to less than half the unit of measurement shown.
- NA Data not separately enumerated, tabulated, or otherwise available.
- X Figure not applicable because column heading, stub line, or other contingencies make an entry impossible, absurd, or meaningless.
- B Not computed because the base figure is too small from which to generate a derived figure that meets statistical standards for reliability.
- Figure in parentheses is the base on which percentages or other statistics in the table column or row have been calculated. A lower case letter in parentheses in a table cell is a footnote entry.
- -- No entry in original source; reason not differentiated in original source.
- Y Indicates that the relevant attribute is present.

Where a different symbol meaning is used in order to maintain clarity within the context of a given table, this is noted for that particular table.

Acknowledgments

This 18th edition of the *Sourcebook of Criminal Justice Statistics* is the result of a collaboration involving many people throughout the United States.

Ann Pastore, Associate Director of the project and Managing Editor of the *Sourcebook of Criminal Justice Statistics* has been involved in all facets of the production of the *Sourcebook* since the first edition in 1973. Ann deserves credit for the clarity, readability, and utility of the design of *Sourcebook*. Her talent, expertise, and unrivaled attention to detail are reflected in each page of this volume; and we deeply appreciate her many efforts.

Editorial Assistant Kim Schoonmaker contributed her experience and diligence in all aspects of the production of the manuscript. Marcy Callahan and Sarah Perrotte, the project's Statistical Typists, diligently prepared the copy and updated numerous tables with efficiency and care. Kim, Marcy, and Sarah also devote countless hours to careful proofreading, updating and maintenance of computer files, correspondence with data providers, and many other tasks which contribute to the finished *Sourcebook*. We deeply appreciate the efforts of our production team.

Our Assistant Editors help to define the Sourcebook in many ways. We rely on their judgment, methodological expertise, writing skills and sense of humor on a daily basis. We appreciate the work of Pauline Gasdow Brennan, John Hoffmann, Sue Laporta, Eric Riksheim, and Barbara K. Luntz. In Washington, Sue A. Lindgren, Associate Deputy Director of the Bureau of Justice Statistics, contributed her sharp eye and experience in criminal justice statistics in reviewing the manuscript. We are deeply grateful for the time and care that Sue devotes to the Sourcebook each year. Her many suggestions have greatly improved the final product. Sue works under the direction of Benjamin H. Renshaw III, Deputy Director for Management and Intergovernmental Programs, Marilyn Marbrook, Publications Chief at the Bureau of Justice Statistics, also lent her expertise and talent to the project. Marilyn Marbrook administered publication under the direction of Michael W. Agopian, Ph.D., Deputy Director for Data Analysis.

The **Sourcebook** staff also relies on many individuals in State and Federal justice agencies, research centers, and universities who produce criminal justice statistical information. These people assist us in many ways,

Including advising us of new sources of criminal justice statistical data, providing prepublication copies of materials, and answering myriad questions from our Assistant Editors about terminology and data collection procedures. This year, the following individuals were particularly helpful and we acknowledge their generous assistance: Thomas Hester, Joan Johnson, and Lou Jankowski of the Bureau of Justice Statistics; Pat Richards of the Administrative Office of the United States Courts; Barbara Allen-Hagen, Office of Juvenile Justice and Deliquency Prevention; Lloyd Johnston, Jerald Bachman, Patrick O'Malley, and Ginger Maggio, Institute for Social Research; Michael J. Karter, Jr., National Fire Prevention Association; Kathleen Sampson and Steve Berlin, American Judicature Society; Joseph P. Briggs, U.S. Marshals Service; Leslie C. McAneny, The Gallup Organization; Dorothy Cook, Media General, Inc.; Penny Wakefield and Rick Rogers, National Criminal Justice Association; David Sanchez, National Institute on Alcohol Abuse and Alcoholism; Christopher Innes and Sue Kline, Federal Bureau of Prisons; Butch Farabee, National Park Service; Norma Coleman, Drug Enforcement Administration; G. Thomas Munsterman, National Center for State Courts; Diana Travisono, American Correctional Association; Marjorie Marlette, CEGA Publishing: James Alan Fox, Northeastern University; Thomas Castellano, Southern Illinois University; Candy Johnson, U.S. Sentencing Commission; Allen R. Hodgkins III, National Rifle Association; Kenneth Carlson, Abt Associates: Gall Wilkes, Federal Bureau of Investigation: Blanche Shanks, Immigration and Naturalization Service; and Jane Schoefer, U.S. Postal Inspection Service.

Finally, we wish to thank the many Sourcebook users who provide information about new sources of data, comments on Sourcebook, and suggestions for improvement. We receive these comments from colleagues at professional meetings, through telephone calls, and by mail, and we follow up on all inquiries, suggestions and comments. Suggestions of additional materials for possible inclusion in subsequent editions are especially appreciated, and can be made either by using the questionnaire at the end of this book or by contacting the Editors at the Hindelang Criminal Justice Research Center, State University of New York, University at Albany, 135 Western Avenue, Albany, New York 12222.

Public attitudes toward crime and criminal justice-related topics 151

Country's most important problem 152 Teenage violence 157

Public confidence in institutions 157: Confidence in the police 159

Confidence in the courts 161

Confidence in the U.S. Supreme Court 161

Ethics of lawyers 164 Ethics of police 165

Respect for police and knowledge of police brutality 167

Police use of force 168

Level of crime 171

Factors responsible for crime 174

Crime reduction measures 175 Level of spending for the problems of

crime and drugs 176
Fear of crime and perceived safety 181

Dealing with crime and criminals 188

Crime deterrence and punishment 190

Severity of local courts 191

Judges' attitudes toward the court process 194

Womens' right to abortion 195

Use of wiretaps 196

Purpose of prisons 198

Capital punishment 199

Gun ownership 202

Gun control policies 203

High school seniors' attitudes:

Selected social problems 206

Honesty and ethics of selected institutions 208

Performance of selected institutions 212 Drug and alcohol use and drug legalization 217

College freshmen attitudes:

Legalization of marihuana 223

Abortion 223

The courts 224

Capital punishment 224

Homosexual relationships 225

AIDS testing 225

Gun control 225

Fifth and sixth graders:

Drug use and availability 226

Drug legalization and its effects 228

Drug abuse as a community problem, and

knowledge of others' use 230

Drug use, public policies, and funding 232 Punishment for drug use or possession 236

Frequency of selecting a designated driver 239

Pornography and public policies 240 Knowledge of child abuse 244

Gambling 245

Homosexual relations 248

Section 3

Nature and distribution of known offenses

Personal and household victimization 251 Reasons for reporting and not reporting

victimization to police 255 Police response time 257

Economic loss in personal and household

victimizations 258

Rates of personal victimization 260

Victim-offender relationship in personal victimization 265

Self-protective measures employed by victims 267

Female and rape victimization 269

Rate of household victimizations 272 Rate of motor vehicle theft 276

Characteristics of lone-offender victimizations

Characteristics of multiple-offender victimizations 279

Time and place of occurrence of personal and household victimizations 283

Weapon use in personal victimizations 287
Respondents reporting whether they have

been hit or had something taken by force 290 Households touched by crime 294

High school seniors' victimization experiences 297

High school seniors' self-reported delinquency 308

High school seniors' involvement in traffic violations 318

High school seniors' involvement in traffic violations while under the influence of drugs

High school seniors' involvement in traffic accidents 324

High school seniors' self-reported drug and alcohol use 325

College students' and young adults' selfreported drug and alcohol use 330

Prevalence of drug and alcohol use 334
Problems resulting from alcohol or drug use
343

Drug thefts 346

Alcohol use and frequency of use 347
Blood alcohol concentration levels of fatally-

injured motor vehicle drivers 350

Involvement of alcohol in automobile crashes 352

Offenses known to police 353

Gun-related violent crime 366
Average loss incurred for selected offenses 376
Offenses in Federal parks 377
Murders 378
Robberies 384
Aggravated assaults 386

Aggravated assaults 386 Burglaries 386 Larceny-thefts 387 Motor-vehicle thefts 387

Bank fraud and embezzlement investigations 387

Violations of Federal bank robbery statues 388

Law enforcement officers killed and assaulted 390

Prison staff killed by inmates 402
Bombing incidents 403
Deaths and property loss due to fires 406
Arson and suspicious structure fires 407
International terrorist incidents 408
Criminal acts related to air transportation 408
Crime insurance policies, claims, and losses

Section 4 Characteristics and distribution of persons arrested 411

counties 427

Number of arrests, national estimates 412
Offense charged and characteristics of
persons arrested 415
Arrests in cities, suburban areas, and rural

Felony arrests in the 75 largest counties 439
Felony arrests in twelve States 442
Arrest rates for violent crimes 443
Arrest rates for property crimes 444
Offenses cleared by arrest 445
Clearances from arrest of persons under 18
years old 448
Juveniles taken into police custody 450
Alcohol-related arrests 451
Drug-related arrests 452
Drug use by arrestees in 21 U.S. cities 457
Seizures by U.S. Customs Service 462
Drug seizures and removals 464

Counterfeiting enforcement activities by U.S.

Secret Service 468 Aliens deported from the U.S. 470

Seizures by U.S. Coast Guards 468

Section 5 Judicial processing of defendants 471

Requests for immunity by Federal prosecutors 472

Court-authorized interception of wire or oral communication 472

Cases argued and pending in U.S. Attorneys' offices 474

Criminal matters concluded in U.S. District Courts or by U.S. magistrates 475

Suspects declined for prosecution by U.S. Attorneys 476

Suspects referred to U.S. magistrates 477 Defendants prosecuted, convicted, and sentenced in U.S. District Courts 478 Cases filed, terminated, and pending in U.S.
District Courts 482

Length of time to disposition of cases in U.S. District Courts 488

Defendants detained by U.S. District Courts 492

Dispositions and sentences of drug law violators in U.S. District Courts 494

Defendants disposed of and sentenced in U.S. District Courts 497

Application of U.S. Sentencing Commission guidelines 508

Felony convictions in State courts 516 Type and length of sentences imposed by State courts 517

Case processing in seven States 519
Disposition, likelihood of conviction, and
sentences received in 12 States 520

Case processing and defendant characteristics in the 75 largest counties 522

Prisoner petitions filed in U.S. District Courts 528

Appeals filed in U.S. Courts of Appeals 528 Activities of the U.S. Supreme Court 530 Cases filed, disposed of, and pending in the U.S. Supreme Court 531

Writ of certiorari petitions to the U.S. Supreme Court 532

Executive clemency applications 534 Commutations and pardons granted 535 Criminal tax fraud cases 536

Arrests and convictions handled by the U.S. Postal Inspection Service 537

Antitrust cases filed in U.S. District Courts 538

Prosecutions and convictions for violations of immigration and nationality laws 538 Investigative activity and dispositions of arrests by the U.S. Secret Service 542 Forged check and bond cases 544

Delinquency and status offense cases processed by juvenile courts 544

Abuse of public office cases 553 Judicial misconduct cases 554 U.S. Army Courts-Martial cases 556

U.S. Air Force Courts-Martial cases 557 U.S. Coast Guard Courts-Martial cases 560

Section 6

Persons under correctional supervision 563

Persons under community supervision 564 Movement of the probation population 565 Persons under supervision of the Federal Probation System 566

Population and characteristics of residents of public and private juvenile custody facilities 567

Problems reported and characteristics of youth served by runaway and homeless centers 577

Characteristics of jails and jail inmates 578
Prior drug use of jail inmates 594
Deaths of jail inmates 599
Jails testing inmates for AIDS 600
Jails under court order 600

Prisoners in jails due to overcrowded State facilities 600

Population and characteristics of prisoners in State and Federal institutions 602

Characteristics, current offense, and criminal histories of State prison inmates 612

Female offenders in correctional facilities 616 Violent offenders in State prisons 620

State prison inmates involvement in prison rule violations 623

Prisoners serving life sentences 625
Drug treatment programs for prison inmates
626

Shock incarceration programs 634
Sex offenders; housing, treatment programs, and parole provisions 638

AIDS cases among prison inmates 643 Population and characteristics of prisoners in Federal institutions 644

Drug and alcohol treatment units and number of clients 648

Population and capacity of military correctional facilities 659

Escapes from correctional facilities 660 Electronic monitoring of offenders 662 Releases from State and Federal Institutions 663

Movement of the parole population 666
Prisoners admitted to State and Federal institutions for violations of conditional release
667

Entries to and discharges from State parole supervision 668

Prisoners granted parole by the U.S. Parole Commission 671

Federal parole discharges 671
Deaths among sentenced prisoners 673
Prisoners under sentence of death 674
Movement of prisoners under sentence of death 677

State and Federal prisoners executed 682 Methods of execution in States 686

Figures and tables

For users who wish to compare data in this book with that in the 1989 Sourcebook, the number of equivalent tables and figures in the Tables 1989 Sourcebook are shown in parentheses. Table and figure numbers marked with an asterick (*) contain identical data in the 1989 and 1990 editions; these tables have been repeated from 1989 to 1990, with possible changes in titles and notation for accuracy and consistency within this edition. The table and figure numbers within parentheses and without asterisks are those for which the most recent data are presented in (generally) the same format as the one in the 1989 edition. Tables for which dashes (--) appear have no comparable table in the 1989 edition.

- 6.99 Estimated number of clients in drug abuse treatment units, by age and jurisdiction, as of Sept. 30, 1989 (6.65) 653
- 6.100 Estimated number of clients in drug abuse treatment units, by sex and jurisdiction, as of Sept. 30, 1989 (6.66) 654

- 6.101 Estimated number of clients in drug abuse treatment units, by race, ethnicity, and jurisdiction, as of Sept. 30, 1989 (6.67) 655
- 6.102 Estimated number of alcohol abuse treatment units, clients in treatment, budgeted capacity, and utilization rate, by jurisdiction, as of Sept. 30, 1989 (6.68) 655
- 6.103 Estimated number of clients in alcohol abuse treatment units, by age and jurisdiction, as of Sept, 30, 1989 (6.69) 656
- 6.104 Estimated number of clients in alcohol abuse treatment units, by sex and jurisdiction, as of Sept. 30, 1989 (6.70) 657
- 6.105 Estimated number of clients in alcohol abuse treatment units, by race, ethnicity, and jurisdiction, as of Sept. 30, 1989 (6.71) 657
- 6.106 Estimated number of treatment units providing services, by type of treatment unit and type of service, as of Sept. 30, 1989 (6.72) 658
- 6.107 Normal capacity and average population of U.S. Navy correctional centers, by location, 1990 (6.73) 659
- 6.108 Normal capacity and average population of U.S. Marine Corps correctional centers, by location, 1990 (6.74) 659
- 6.109 Number of escapes from correctional facilities and number of inmates returned, by type of facility and jurisdiction, 1985-88 (6.59*) 660
- 6.110 Electronic monitoring of offenders, by State, Feb. 14, 1988 (--) 662
- 6.111 Electronic monitoring of offenders, by offense, United States, 1987 and 1988 (--) 662
- 6.112 Conditional and unconditional releases of sentenced prisoners from State and Federal jurisdiction, by type of release, region, and jurisdiction, 1989 (6.75) 663
- 6.113 First releases from prisons in 36 States, by offense, race, ethnicity, and time served in prison, United States, 1985 (--)664
- 6.114 First releases from prisons in 36 States, by offense, sentence length, minimum 6.130 Prisoners received from court under time to be served, and time served in prison, United States, 1985 (--) 665
- 6.115 Movement of the parole population under State and Federal jurisdiction, by region and jurisdiction, 1989 (6.76) 666
- 6.116 Rate (per 100,000 adult residents) of persons in the parole population. United States, 1979-89 (6.77) 666

- 6.117 Sentenced prisoners admitted to State and Federal institutions for violations of parole or other conditional release, by whether a new sentence was imposed, sex, region, and jurisdiction, 1989 (6.78) 667
- 6.118 Entries to parole supervision from prisons in 36 States, by offense, sex, race, and ethnicity, United States, 1985 (--) 668
- 6.119 Parole discharges in 36 States, by method of parole discharge, sex, and race, United States, 1985 (--) 669
- 6.120 Successful parole discharges in 36 States, by offense, sex, and race, United States, 1985 (--) 669
- 6.121 Unsuccessful parole discharges in 36 States, by offense, sex, and race, United States, 1985 (--) 670
- 6.122 Prisoners granted parole by U.S. Parole Commission, by region, fiscal year 1977-89 (6.79*) 671
- 6.123 Federal parole discharges, by method of parole discharge, sex, and race, United States, 1985 (--) 671
- 6.124 Successful Federal parole discharges. by offense, sex, and race, United States, 1985 (--) 672
- 6.125 Unsuccessful Federal parole discharges, by offense, sex, and race, United States, 1985 (--) 672
- 6.126 Deaths among sentenced prisoners under the jurisdiction of State and Federal correctional authorities, by cause of death, sex, region, and jurisdiction, 1989 (6.83) 673
- 6.127 Prisoners under sentence of death, by race or ethnicity and jurisdiction, on Apr. 24, 1991 (6.84) 674
- 6.128 Prisoners under sentence of death, by region and jurisdiction, on Dec. 31, 1988 and 1989 (6.85) 675
- 6.129 Prisoners under sentence of death, by demographic characteristics, prior felony conviction history, and legal status, United States, on Dec. 31, 1989 (6.86) 676
- sentence of death, by race, region, and jurisdiction, 1989 (6.87) 676
- 6.131 Prisoners received from court under sentence of death, by age, legal status at time of arrest, and region. United States, 1989 (6.88) 677
- 6.132 Movement of prisoners under sentence of death, United States, 1968-89 (6.89) 677

- 6.133 Movement of prisoners under sentence of death, by race, ethnicity, region, and jurisdiction, United States, 1989 (6.90) 678
- 6.134 Prisoners removed from death row, by current status, region, and jurisdiction, 1989 (6.91) 680
- 6.135 Prisoners removed from death row, by method of removal, region, and jurisdiction, 1989 (6.92) 681
- 6.136 Prisoners executed, by jurisdiction, 1930-Dec. 31, 1989 (aggregate) (6.93) 682
- 6.137 Prisoners executed under civil authority, by region and jurisdiction, 1930-89 (6.94)
- 6.138 Prisoners executed under civil authority, by race and offense, United States, 1930-89 (6.95) 684
- 6.139 Female prisoners executed under civil authority, by offense, race, and jurisdiction, United States, 1930-89 (6.96) 685
- 6.140 Methods of execution in States authorizing the death penalty, by State, 1989 (6.97) 686

Section 1

Characteristics of the criminal justice systems

The data presented in this section describe the organization, structure, financial expenditures, and employment of criminal justice systems in the United States. This section includes information on the functioning of criminal justice systems at the local, county, State, and Federal levels. Selected legislation relating to criminal justice matters is also included.

The initial portion of the section presents data from surveys conducted by the U.S. Bureau of the Census for the Bureau of Justice Statistics (BJS). Tables provide detailed information on justice system expenditures at the Federal, State, and local levels. Data on expenditures for police functions, judicial activities, and corrections activities are presented. The cost of correctional health services is included as are trends for expenditures for the Federal drug control budget. A number of tables also focus on the number of persons employed in the justice system.

The second segment of the section provides Information on the characteristics of police agencies. In particular, data from the Law Enforcement Management and Administrative Statistics survey describe the employment and expenditures practices of city and municipal police departments. A survey conducted by the Police Foundation focusing on female police officers provides further details on police employment including the number of female officers in municipal and State police agencies. Data based on a survey conducted by the International City Management Association also provide information on police personnel and expenditures. Furthermore, data from the Federal Bureau of Investigation's Uniform Crime Reporting program provide the number and rate of law enforcement employees for various regions of the country. Finally, information on minority representation and salaries In police agencies is presented.

The next portion presents information relating to the court process. Information on appropriations for the Federal Judiciary, salaries, and personnel are presented. Data on criminal cases filed in U.S. District Courts and duties performed by U.S. magistrates are presented. Characteristics of State court judges such as qualifications, salaries, and length of term are included. In addition, information on the duties of the U.S. Marshals Service is provided; these include property seizures, the execution of warrants and court orders, witness security, and the transportation of Federal prisoners. A number of tables describe judicial conduct

commissions, juror expenditures and utilization, and characteristics and responsibilities of Federal and State probation officers.

The fourth segment of the section presents a series of tables involving Jails in the United States. Data on the number of jail inmates, space allocation, jails under court order, expenditures, employment and payroll, and the number of officers per inmate are provided, Information is also presented on correctional personnel in adult and juvenile systems. This includes details on State and Federal correctional officers, such as salaries, training requirements, and other characteristics. Additionally, allocation of good time credits, furlough programs, and the use of inmate labor are described. Finally, data on the workload and decisions made by the U.S. Parole Commission are displayed.

The final set of tables presents statutory provisions relating to a number of issues such as dispositional options for delinquents, sex offender programs, crime victim legislation, enhancement statutes for crimes against the elderly, and civil protection statutes. Information is also provided on alcohol use and driving, characteristics of controlled substances acts, asset forfeiture, and statutes pertaining to drug paraphernalia.

Justice system expenditures

By type of activity and level of government, United States, fiscal year 1988

(Dollar amounts in thousands)

				Judicial and le				
Level of government	Total	Police protection	Total	Courts only	Prosecution and legal services	Public defense	Correc- tions	Other justice activities
All expenditures	\$60,980,334	\$27,955,660	\$13,314,937	\$7,617,712	\$4,299,275	\$1,397,951	\$19,118,734	\$591,008

Total, local	33,535,433	20,332,648	6,542,049	3,687,505	2,236,634	617,910	6,529,785	130,955
Direct	33,288,885	20,323,276	6,513,647	3,659,698	2,236,481	617,469	6,321,176	130,789
Intergovernmental	246,548	9,372	28,401	27,807	153	441	208,609	166
County	14,373,111	4,715,310	4.757.878	2,957,413	1,319,950	480,515	4,808,434	91,492
Direct	14,255,757	4,700,735	4,726,272	2,928,041	1,319,430	478,801	4,738,663	90,087
Intergovernmental	117,357	14,575	31,606	29,372	520	1,714	69,771	1,405
Municipal	19,533,908	15,884,661	1,821,610	760,522	918,142	142,946	1,786,647	40,991
Direct	19,033,132	15,622,542	1,787,377	731,657	917,052	138,668	1,582,513	40,702
Intergovernmental	500,776	262,119	34,233	28,865	1,090	4,278	204,134	289

Note: These data were collected by the U.S. Bureau of the Census for the Bureau of Justice Statistics. The Federal government, all State governments, and a sample of county, municipal, and township governments were included in the survey. Since not all local governments were included in the survey, these data are subject to sampling error (i.e., variations that might result if a different sample were used). The category "Other justice activities" includes data not elsewhere classified, that cut across more than one category, or that are not allocable to separate categories (e.g., crime commissions, neighborhood crime councils, and State criminal justice coordinating councils).

Intergovernmental expenditure consists of payments from one government to another. Such expenditure eventually will show up as a direct expenditure of a recipient government. Duplicative transactions between levels of governments are excluded from the totals for all governments, all State and local governments, and total local governments. For survey methodology and definitions of terms, see Appendix 1.

Note: See Note, table 1.1. Data for the Federal government were extracted from *Budget of the United States Government, FY 1990, Appendix.* For 1985 and 1988, that document allowed the classification of appropriate expenditure and employment amounts for the Immigration and Naturalization Service, the U.S. Customs Service, and the Internal Revenue Service as "prosecution and legal services." In earlier years, those amounts could not be broken out of the "police protection" category. (Source, p. 12.) For survey methodology and definitions of terms, see Appendix 1.

Note: See Note, table 1.1. For survey methodology and definitions of terms, see Appendix 1.

^CData for municipalities, and the local government totals that include municipal data, are estimates subject to sampling variability. Data for counties (boroughs, parishes) are based on a canvass of all county governments and therefore are not subject to sampling variability.

Source: U.S. Department of Justice, Bureau of Justice Statistics, Justice Expenditure and Employment In the U.S., 1988, NCJ-125619 (Washington, USGPO, 1991), Table 41.

^aDetail may not add to total due to rounding.
^bData for "other" corrections are for State governments only.

Nyoming	13,961,191	1,122,205	8,0	1,695 1,264	6,373 888
Federal Bureau of Prisons	960,490,600	114,345,162	11.9	2,392	47,804

Note: These data were collected through a survey of the 50 State correctional systems and the Federal Bureau of Prisons (FBP) conducted by the National Commission on Correctional Health Care in the Spring of 1990. Usable responses were obtained from 46 States and the Federal Bureau of Prisons. Data were not available for Hawaii, Indiana, Mississippi, and North Dakota. Responses to the mailed questionnaire were supplemented with telephone inquiries whenever questions arose as to the inclusion or exclusion of specific cost items. The figures reported include mental health services as well as medical and dental care. Where mental health services were provided by a different section of the department of corrections or by an outside agency with a separate budget, adjustments were made to the appropriate cost figure. Adjustments were made for non-agency hospitalization costs if these were not included in the totals reported. Health care staffing was included in all of the figures reported and hospitalization, specialty care, equipment and pharmaceuticals were included in virtually all instances.

Care should be taken in the interpretation of the cost survey results because it is not known to what extent budgetary line items included in the "Total department of corrections expenditure" figure vary across jurisdictions. For instance, some jurisdictions may have included new construction costs and these costs may vary significantly.

Also, no attempt was made to control for differences in the cost of living among the States, so some of the variation in health care expenditures may be attributable simply to differences in the cost of care.

^aThe respondents were asked specifically to exclude new construction costs and to include mental health costs even if the latter service was provided by a different section of the department of corrections or an outside agency. Based on average daily population.

Data are for fiscal year 1990.

dincludes \$1,226,987 in non-department of corrections

Adjusted for special hospitalization costs.

Includes mental health security costs.

9Includes \$30,000,000 from mental health agency. hincludes \$1,850,000 from outside mental health agency. Adult population only.

includes \$16,250,000 for outside agency hospitalization. includes \$2,900,000 for mental health services.

Note: These data are from the budget submitted by the President to Congress in February 1991. The budget authority (actual or estimated) for each fiscal year includes appropriations for that year, as well as for future years, that have been approved by Congress. The outlays (actual or estimated) for the corresponding year are funded partially by the budget authority and partially through unspent funds allocated in previous years. "Outlays" are defined as values of checks issued, interest accrued on public debt, or other payments made, and net of refunds and relmbursements.

^aIncludes proposed legislation.

Note: The Justice Assistance Act of 1984 authorized the establishment of the Office of Justice Programs as the successor agency to the Office of Justice Assistance, Research, and Statistics (OJARS) and the Law Enforcement Assistance Administration (LEAA). This new body is responsible for coordinating the activities of its component bureaus. Research and statistical activities are to be conducted by the National Institute of Justice (NIJ) and the Bureau of Justice Statistics (BJS), respectively. The new Bureau of Justice Assistance is responsible for the State and Local Assistance Program and the Anti-Drug Abuse Program.

State technical assistance.

⁸Includes effect of Gramm-Rudman-Hollings reductions, bAuthorization for program not provided until fiscal year 1985, 1984 funds were added to

¹⁹⁸⁵ funds for award in 1985.

Reflects the total program level, which includes unused carryover earmarked by Congress for addition to appropriated amount.

^dRepresents amount deposited in previous year.

A program authorized to provide funds, equipment, intelligence information, and/or person-

nel to a requesting State in the event of a law enforcement emergency.

9A program to aid State and local law enforcement agencies in the exchange of intelligence information.

Maries to an appropriation to be allocated to States housing Mariel Cuban refugees in State correctional facilities.

Note See Note, table 1.1. For survey methodology and definitions of terms, see Appendix 1.

Source: U.S. Department of Justice, Bureau of Justice Statistics, Justice Expenditure and Employment In the U.S., 1988, NCJ-125619 (Washington, DC: USGPO, 1991), Table 7.

Table adapted by SOURCEBOOK staff.

a Detail may not add to total due to rounding.
b Data for municipalities, and the local government totals that include municipal data, are estimates subject to sampling variability; data for countles (boroughs, parishes) are based on a canvass of all county governments and therefore are not subject to sampling variability.

Note: The Law Enforcement Management and Administrative Statistics survey (LEMAS) was conducted by the U.S. Bureau of the Census for the U.S. Department of Justice, Bureau of Justice Statistics (BJS). All municipal police agencies serving 250,000 or more residents were included in the 1987 nationwide LEMAS sample. The response rate for these agencies was 100 percent. A total of 59 departments provided information. The Honolulu Police Department was not included because of its classification as a county police department.

For analytical purposes, the 59 departments were divided into 4 groups based on the size of the population they were serving in 1987. The corresponding number of agencies within each group are as follows: 1 million or more (8 departments), 500,000 to 999,999 (15), 350,000 to 499,999 (21), 250,000 to 349,999 (15). "High" and "low" refer to the highest and lowest values for the cities in each category.

UCR violent crime totals include the following: murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. UCR index crime totals include these four violent crime categories plus the property crimes of burglary, larcenytheft, and motor vehicle theft. All UCR totals include only those offenses known to

Source: U.S. Department of Justice, Bureau of Justice Statistics, Police Depart-

^aDetail may not add to total due to rounding.

bData for "other" corrections are for State governments only. ^CData for municipalities, and the local government totals that include municipal data, are estimates subject to sampling variability; data for counties (boroughs, parishes) are based on a canvass of all

Note: See Note, table 1.19. Minority representation figures for individual departments are not directly comparable unless the minority representation in the general population of each city and recent hiring practices of each department are considered. To account for differences between cities in the percentage of minorithe in the population, an officer-to-population index that represents the percentage of minority officers employed relative to the percentage of minorities in the local population has been calculated. The officer-to-population index is computed by dividing the

percentage of sworn officers who belong to a given group by the

percentage of the general population belonging to that group, as reported in the 1980 census. For example, if Hispanics comprised 12 percent of all sworn officers and 24 percent of the city's residents, the officer-to-population index number would be .50 (12 divided by 24). Black percentage figures do not include Hispanics.

Table 1.26

Percent of female police in municipal police departments

By ethnicity and region, United States, 1978 and 1986

		1978			1986	
Region	Total	White	Minority	Total	White	Minority
Total	4.2 %	2,6 %	1.6 %	8.8 %	5.3 %	3.5 %
Northeast	1.8	1.3	0.6	8.7	5.1	3.6
North Central	5.8	3.0	2.7	9.2	5,3	3.9
South	4.7	2.8	1.8	9.4	5,5	4.0
West	3.6	2.9	0.7	7.6	5.4	2.2

Note: These data were collected by the Police Foundation through a curvey of all municipal police departments serving populations of 50,000 or more and all State police departments in the United States. Questionnaires were mailed to 446 municipal and 49 State police departments. Hawaii does not have a State police agency. The response rate was 72 percent (N=319) for municipal police departments and 78 percent for State police agencies (N=38). The 1986 eample included all departments participating in the 1978 Police Foundation survey, as well as 50 departments that were not included in the earlier study. The list of police agencies was provided by the Federal Bureau of investigation (FBI) and derived from the Uniform Crime Reporting Program database. Agencies were classified according to region based on the FBI's classification system. The Northeast region includes the following States: Connecticut, Maine, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, and Vermont. Agencies in the following States are included in the North Central region: Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, and Wisconsin. The South Includes agencies in the following States: Alabama, Arkansas, Delaware, Florida, Georgia, Kentucky, Louislana, Maryland, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, West Virginia, and Virginia, as well as the District of Columbia. The Western region includes agencies in Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming. The data have been weighted to reflect the actual number of persons in each of the region and city size categories.

The 1978 ligures are based on data from 290 responding departments and the 1986 ligures are based on data from 316 responding departments.

Table 1.27

Percent of female police in municipal police departments

By rank and city size, United States, 1978 and 1986

City size	Offic	er ^a	Serge	eant	Lieute	nant	Above lie	outenant
(by population)	1978	1986	1978	1986	1978	1986	1978	1986
Total	5.0 %	10,0 %	1,0 %	3.7 %	0.7 %	2.5 %	0.5 %	1,4 %
1,000,000 or more	6.6	11.6	1.7	4.2	3.1	2.9	1.6	1,4
500 to 1,000,000	5.1	10,5	0.7	3,7	0,5	3.8	0.4	2,5
250 to 500,000	5.3	10.3	1.4	5.0	1.8	3.3	0.5	2.8
100 to 250,000	5.0	8.1	8.0	3.2	0.3	1.6	0.2	0.4
50 to 100,000	3.3	6.0	0.6	1.6	0,3	0,6	0.3	0.5

Note: See Note, table 1.26. There is no uniform rank system across American police agencies nor a clear demarcation between supervisory and other assignments. For example, the rank of corporal is used in about 15 percent of agencies. In some instances, a corporal is a first line supervisor; in others, after a certain period of police service, all officers are "promoted" to corporal. Sergeant is a rank found in nearly all agencies and generally is a first line supervisor. Although in a number of departments, sergeants may be assigned either to supervisory or investigative responsibilities, in this study sergeants are counted as supervisors; corporals and persons with the rank of detective are classified as officers unless otherwise specified. (Source, p. 54.)

Data for "officer" are based on 290 responding departments in 1978 and 315 responding departments in 1986; "sergeant," 284 in 1978 and 301 in 1986; "lieutenant," 278 in 1978 and 302 in 1986; "above lieutenant," 285 in 1978 and 315 in 1986.

Source: Police Foundation, On the Move: The Status of Women in Policing (Washington, DC: Police Foundation, 1990), p. 31. Reprinted by permission.

^aIncludes officers, detectives, and corporals.

Table 1.28

Percent of female police in municipal police departments

By type of assignment and city size, United States, 1986

	Total		Тур	e of assigi	nment	
Region	female police officers	Field ^a	Investi- gation	Vice	Admini- stration	Other
Total	8.4 %	9,2 %	6.6 %	7.5 %	10.2 %	9.1 %
1,000,000 or more	9.9	10.9	7.9	9.6	17.5	12.4
500 to 1,000,000	9.9	10.3	6.7	7.4	11.6	10.9
250 to 500,000	8.8	8,9	7.0	7.2	10.8	10.2
100 to 250,000	6.6	7.1	5,0	6.7	5.7	6.3
50 to 100,000	5.1	5.3	5.3	3,6	4.1	4.5

Note: See Note, table 1,26. "Some caution is necessary in interpreting this table. First, in the assignment data provided by respondents, women made up only 8.4 percent of all sworn police, thus they are slightly underrepresented. Second, in many departments an unknown proportion of the officers who are assigned to patrol or field operations units, in fact, serve in clerical or staff support capacities in precinct or district stations. Third, an unexpectedly large proportion of officers appear to be assigned to 'other' units, What functions these individuals perform appears to vary across agencies but were not specified by the responding departments." (Source, p. 54.)

Data for "total female police officers" are from 293 responding departments; "field," 292 departments; "investigation," 293 departments; "vice," 250 departments; "administration," 283 departments; and "other," 196 departments.

Table 1.29

Percent turnover in municipal police departments

By type of termination, officer sex, and city size, United States, 1986

City size		Total turnover		ability	Volui sepai	ntary ations		untary nations	De	ath -
(by population)	Male	Female	Male	Female	Male	Female	Male	Female	Male	Female
Total (N=303)	4.6 %	6.3 %	0.8 %	0.7 %	3.0 %	4.3 %	0.6 %	1,2 %	0.2 %	0.1 %
1,000,000 or more (N=5)	5,1	4.2	1.7	0.9	2.7	3.0	0.4	0,3	0.2	0.1
500 to 1,000,000 (N=15)	3,8	7.4	0.6	0.7	2,4	4.4	0.6	2.2 ^a	0,2	0.2
250 to 500,000 (N=32)	5.3	7.0	0.5	0.2	3.8	5,0	0.8	1.7	0.2	0.1
100 to 250,000 (N=83)	4.3	9,3	0.5	0,7	3.1	6.7	0.6	1.9	0.1	0.1
50 to 100,000 (N=168)	4,5	7,8	0.7	8.0	3.2	5.2	0.6	1.7	0,2	0.1

Note: See Note, table 1,26. A few departments may have included normal retirements in the voluntary separation category. To the extent that this occurred, the figures for the male separation rate may be inflated. Figures are based on data from 303 responding departments.

^aIn one department, 21 of 126 females (17 percent) and 28 of 1,820 males (1.5 percent) were involuntarily terminated in 1986. Excluding

this department, the mean involuntary turnover rate for departments in this size group would be 1.4 percent for females and 0.5 percent for males.

Note: These data are collected annually by the FBI Uniform Crime Reporting Program. "Full-time law enforcement employees" includes both law enforcement officers and civilian employees. Police officers include all "full-time, sworn personnel with full arrest powers." This excludes persons performing guard or protection duties (e.g., school crossing guards) who are not paid from police funds. "Civilian employees include persons such as clerks, radio dispatchers, meter attendants, stenographers, and mechanics." Persons not paid from police funds are excluded. Employees on leave with pay are also excluded. (U.S. Department of Justice, Federal Bureau of Investigation, *Uniform Crime Reporting Handbook* (Washington, DC: USGPO, 1984), pp. 71-72.) These data are for employees who were on the payroll on Oct. 31, 1989. For a list of States in geographic divisions, see Appendix 3.

a Includes civilians.

b The New England Division's law enforcement employee volumes are lower than those published in previous years, because limited 1989 data were available from Massachusetts agencies.

Conly one city with a population of 250,000 and over is located in the New Eng-

land geographic division. The 1989 data were not available for this agency. Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.

Note: Data for 1983 were obtained through a questionnaire mailed to the office of the chief of police and the office of the municipal director of personnel (or equivalent position) in the 50 largest cities in the United States. The data for 1988 are the result of a 5-year follow-up to the 1983 study. For both surveys, 47 cities returned completed questionnaires. Cities are listed in rank order of size based on the 1980 Census of the population.

The index of Black representation is calculated by dividing the percent of Black police officers in a department by the percent of Blacks in the local population. An index approaching 1.0 indicates that a city is closer to achieving a representation of Black police officers equal to their proportion in the local population. The Black population of a city is derived from the 1980 census of the population.

A "yes" in the table indicates the presence of an affirmative action plan for Blacks operating at some point during 1983-88.

aVoluntary plan. All others are court-ordered.

bData for 1983 are based on 1980-81 information from the Police Executive
Research Forum, Survey of Police Operational and Administrative Practices
1981 (Washington, DC: Police Executive Research Forum, 1981).

Note: See Note, table 1.39. The Index of Hispanic representation is calculated by dividing the percent of Hispanic police officers in a department by the percent of Hispanics In the local population. An index approaching 1.0 indicates that a city is closer to achieving a representation of Hispanic police officers equal to their proportion in the local population. The Hispanic population of a city is derived from the 1980 census of the population.

A "yes" in the table indicates the presence of an affirmative action plan for Hispanics operating at some point during 1983-88.

^aVoluntary plan. All others are court-ordered.

^bData for 1983 are based on 1980-81 information from the Police Executive Research Forum, *Survey of Operational and Administrative Practices 1981* (Washington, DC: Police Executive Research Forum, 1981).

Source: Samuel Walker, "Employment of Black and Hispanic Police Officers," Review of Applied Urban Research XI (October 1983), p. 3; and Samuel Walker, "Employment of Black and Hispanic Police Officers, 1983-1988: A Follow-up Study," Center for Applied Urban Research (Omaha: University of Nebraska at Omaha, 1989). Table adapted by SOURCEBOOK staff.

Note: See Note, table 1.34. The "entrance salary" refers to salary paid during the first 12 months of employment with the department as a sworn police officer (excluding uniform allowance, holiday pay, hazard pay, and other additional compensation). The "maximum salary" refers to salary paid to personnel who do not hold any promotional rank (excluding uniform allowance, holiday pay, hazard pay, or any other additional compensation). The mean is calculated by dividing the total number of salaries into the total amount paid in salaries. The median is the salary that marks the point below which and above which 50 percent of all the salaries fall. The first quartile salary is the salary below which 25 percent of all

salaries fall; the third quartile salary is the salary below which 75 percent of all the salaries fall. For definitions of terms, a list of States in regions, and detail of survey response rates, see Appendix 2.

Note: These data are from a mail survey of municipal officials conducted by the international City Management Association in the Summer of 1989. Of the 7,106 cities surveyed, 5,157 responded for a rate of 72.6 percent. The mean salary level is calculated by dividing the total number of salaries by the total amount paid in salaries. The median salary level is the salary that marks the point below which and above which 50 percent of all salaries fall. Classifications having less than three cities reporting were excluded because meaningful statistics cannot be computed. Consequently, the number reporting in some subcategories does not always equal the total reporting. For definitions of terms, a list of States in regions, and detail of survey response rates, see Appendix 2.

Note: These data were collected from the 1989 County Salary Survey conducted by the International City Management Association and mailed during the summer of 1989. Of the 3,109 counties surveyed, 1,913 returned the questionnaires for a response rate of 61.5 percent. Classifications having less than three counties reporting were excluded because meaningful statistics cannot be computed. Consequently, the number reporting in some subcategories does not always equal the total reporting. For definitions of terms, a list of State3 in regions, and detail of survey response rates, see Appendix 2.

Table 1.45

Annual	salarles	of Federal	ludges

By judicial office, as of Jan. 1, 1991

Judicial office	Annual salary
Chief Justice of the United States	\$160,600
Associate Justices of the Supreme Court of the United States	153,600
United States Circuit Judges	132,700
United States District Judges	125,100
Judges, United States Court of International Trade	125,100
Judges, United States Claims Court	125,100
United States Bankruptcy Judges	115,092
United States Magistrates (full-time)	115,092

Note: The former U.S. Court of Claims and U.S. Court of Customs and Patent Appeals have been reorganized into the U.S. Court of Appeals for the Federal Circuit. The Federal Circuit has the same legal status as the 12 Courts of Appeals which are organized on geographical lines. The Federal Courts Improvement Act of 1992 also established a U.S. Claims Court as an Article 1 court within the Judicial Branch.

Source: Table adapted by SOURCEBOOK staff from table provided by the Administrative Office of the United States Courts,

^aIncludes unobligated balances of \$2,500,000 and \$14,600,000 in civil filing and bankruptcy noticing fees.

Includes no-year funds in the amount of \$3,400,000 for Defender Services and \$1,000,000

tor fees of juriors and commissioners.

Chese appropriations will be transferred to other judiciary accounts through a change in accounting procedures.

No report requested	2.5	0.0	0,0	0.0	0.0	0.0	0,0

Note: These data were compiled from a variety of sources. Primarily used were questionnaires completed by judicial nominees for the Senate Judiciary Committee, transcripts of the contimation hearing conducted by the Committee, and personal interviews. In addition, an investigation was made of various biographical directories including *The American Bench* (Sacramento: R.B. Forster), Who's Who In American Politics (New York: Bowker), Martindale-Hubbell Law Directory (Summit, NJ: Martindale-Hubbell, Inc.), various regional editions of Who's Who, State legislative handouts, and relevant newspaper articles from the home State of nominees or appointees.

Law firms are categorized according to the number of partners/associates: 25 or more associates for a large firm, 5 to 24 associates for a moderate firm; and 4 or less for a small firm. Percent subtotals for occupational experience sum to more than 100 because some appointees have had both judicial and prosecutorial experience.

The American Bar Association's (ABA) ratings are assigned to candidates after investigation and evaluation by the ABA's Standing Committee on Federal Judiciary, which considers prospective Federal judicial nominees only upon referral by the U.S. Attorney General or at the request of the United States Senate. The ABA's Committee evaluation is directed primarily to professional qualifications—competence, integrity, and judicial temperament. Factors including intellectual capacity, judgment, writing and analytical ability, industry, knowledge of the law, and professional experience are assessed. To be rated "excep-

tionally well qualified," the prospective nominee has to stand at the top of the legal profession in the community involved and have outstanding legal ability, wide experience, and the highest reputation for integrity and temperament. Similar high standing in the community is also required. To be rated "well qualified," the nominee has to have the Committee's strong affirmative endorsement and be regarded one of the best available for the vacancy from the standpoint of competence, integrity, and temperament. The evaluation of "qualified" indicates that it appears the prospective nominee would be able to perform satisfactorily as a Federal judge with respect to competence, integrity, and temperament. When a nominee is found "not qualified," it means that the Committee's Investigation indicates that the prospective nominee is not adequate from the standpoint of competence, integrity, or temperament (American Bar Association, 1980), pp. 3-5).

Note: The Federal courts are organized into 11 geographic circuits. Each circuit consists of a number of District Courts, which are the trial courts, and a Court of Appeals, which hears appeals taken from other courts. There is also a separate District Court and Court of Appeals for the District of Columbia.

On Oct. 1, 1981 the number of U.S. District Court Circuits was increased from 10 to 11. The new circuit was created by the removal of Alabama, Florida, and Georgia from the Fifth Circuit and the reorganization of these courts into the Eleventh Circuit.

Beginning with the year ending June 30, 1976, U.S. District Courts have reported the number of minor offense cases filed in the Federal courts in addition to the number of felonies

Beginning with the year ending June 30, 1976, U.S. District Courts have reported the number of minor offense cases filed in the Federal courts in addition to the number of felonies and misdemeanors above the minor offense level (offenses involving penalties that do not exceed 1 year imprisonment or a fine of more than \$1,000). This additional reporting resulted from the Speedy Trial Act of 1974 (Public Law 93-619), which required the courts to maintain records on all offenses above the petty offense level (offenses involving penalties that do not exceed 6 months incarceration and/or a fine of not more than \$500). Because the majority of minor offense cases are handled by magistrates in Federal courts and because this report is primarily a statistical statement reflecting the workload per authorized judgeship, the minor offense cases have been excluded from the 1976-79 data by the Administrative Office of the United States Courts. The exclusion of these cases from the workload statistics has been done in an effort to make the 1976-79 data more comparable to previous years' data that did not include most minor offense cases. In 1979, the Federal Magistrates Act (Public Law 96-82) expanded the authority of magistrates to dispose of all misdemeanors. To reflect the workload per authorized judgeship, the 1980-89 data exclude all cases below the felony level. Data for 1979 are provided in two columns in order to reflect the efforts of individual judges before and after the enactment of the Omnibus Judgeship Act (Public Law 95-486), which

became effective Oct. 20, 1978. Because the increase in authorized judgeships became effective midway through the year and most of the newly authorized positions were not filled by June 30, 1979, computations based only on the newly authorized judgeships do not give an accurate indication of the efforts of individual judges.

The sharp decline in criminal cases filed in the Canal Zone after 1979 resulted from the passage of the Panama Canal Act of 1979 (Public Law 96-70), signed Sept. 27, 1979, This Information was provided to SOURCEBOOK staff by the Administrative Office of the United States Courts, Statistical Analysis and Reports Division.

^aOn Apr. 1, 1979, as a result of the enactment of Public Law 95-409, the Central District Court of Illinois was established, the Eastern District Court of Illinois was eliminated, and the Southern District Court of Illinois underwent extensive reorganization. Consequently, data collected for the Southern District Court after this date are not comparable with data collected prior to this date.

prior to this date.

Included in the criminal statistics for this district are numerous traffic offense cases that are classified as misdemeanors above the minor offense level. In most districts similar cases are classified as minor offenses and are excluded from this report.

classified as minor offenses and are excluded from this report.

CPublic Law 95-157 established the District Court of the Northern Mariana Islands on Nov. 8, 1977. Court was convened on Jan. 9, 1978.

Table 1.50

Percent distribution of duties performed by magistrates in U.S. District Courts

Years ending June 30, 1988 and 1989

	1988	1989	,
Total all matters	471,085	418,711	
Trial jurisdiction	19.1 %	21.3 %	
Petty offenses	16,3	18.0	
Misdemeanors (other than petty)	2.8	3.3	
Preliminary proceedings in criminal cases	30.5	37.0	
Initial appearances	10.2	11.1	
Arralgnments	6.3	7.4	
Other	6.1	8.1	
Warrants	6.5	8.7	
Ball review	1.4	1.7	
Civil consent cases	1.3	1.3	
Additional duties	49.2	40.4	
Motions ^a	28.8	19.7	
Pretrial conference	11.0	11.8	
Prisoner ittigation	5.4	4.9	
Other	2.5	2.5	
Social Security	1.5	1.6	

Note: The Federal Magistrates Act (28 U.S.C. 636(b)) provides the authority under which magistrates assist courts in the performance of "additional duties." This suthority was both broadened and clarified by Public Law 94-577, Oct. 21, 1976, and by new procedural rules governing most habeas corpus proceedings in the District Courts, effective Feb. 1, 1977. The changes make clear the ability of the parties of a civil case to consent to have the case referred to a magistrate for trial as a special master; the changes also empower magistrates to conduct evidentiary hearings in prisoner petition cases. Additionally, the role of magistrates in providing pretrial assistance to district judges in both dispositive and non-dispositive matters has been clarified. A magistrate's authority to conduct arraignments following indictment in a criminal case is provided under Rule 10 of the Federal Rules of Criminal Procedure in 86 Districts.

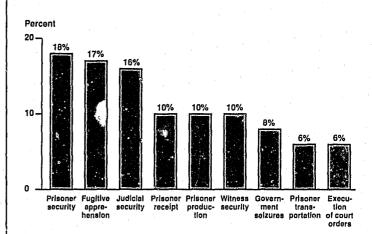

^aincludes evidentiary hearings.

Figure 1.1

Duties performed by Deputy U.S. Marshals

By type of activity, fiscal year 1990

Note: The U.S. Marshals Service (USMS) is a law enforcement agency performing duties for the Executive Branch of the Federal government. The agency executes all warrante issued by the Federal courts, conducts fugitive investigations, and maintains custody of all Federal pre-trial detainees. In addition the USMS is responsible for prisoner processing and detention, transportation and production of prisoners, protection of Federal judiciary, Federal witness security, the execution of court orders, and management of related Federal government selzures. Further responsibilities include escorting missile convoys, suppressing prison disturbances in Federal prisons, and arresting extremely dangerous fugitives. Data on workload, accomplishments, and time utilization are collected on a regular basis from the 94 district of-fices.

A fugitive is an individual who has been convicted or is suspected of criminal activity and attempts to avoid legal sanctions by fleeling from the justice system. Fugitive warrants are issued for a variety of violations, e.g., escape, bond default, parole or probation violations, and felony violations in cases where the originating agency does not have arrest authority.

Note: See Note, figure 1.1. "U.S. Marshals Service felony fugitive" refers to warrants that the USMS maintains primary control over and includes probation and parole violators, escapees, and bond defaulters, "Other felony" refers to felony warrants originated by other Federal agencies (such as the Drug Enforcement Administration), for which the USMS also assumes responsibility.

^aData have been revised by the Source.

Source: U.S. Department of Justice, U.S. Marshals Service, *The Director's Report: A Review of the United States Marshals Service in FY 1987*, p. 6; *1988*, p. 8; *1989*, p. 9; *1990*, p. 8 (Washington, DC: U.S. Department of Justice).

By type of property, fiscal years 1987-90

Note: See Note, figure 1.1. The U.S. Marshals Service administers the U.S. Department of Justice's program for the management and disposal of property subject to judicial and administrative forfeiture. Asset selzure and forfeiture is used to dismantle drug trafficking rings and other continuing criminal enterprises, not only by prosecuting and imprisoning major drug suppliers, money launderers, and drug financiers, but also by stripping away the criminal assets of the illegal organization. (Source, 1990, p. 57.)

^aFor 1990, the category was labeled "currency." bFor 1990, the category was labeled "vehicles." C"Other" includes all property excluded from the other three categories, including antiques, livestock, jewelry, laboratory equipment and chemicals, and electronic equipment.

reactivated during fiscal year	97	109	115	81	

Note: See Note, figure 1.1. For the Witness Security Program, the U.S. Marshals Service "provides protection to government witnesses when their lives become endangered because they have agreed to provide critical information to the government and the courts about organized crime and other serious criminal enterprises. This protection is provided 24 hours a day to all such witnesses while they are in a 'threat' environment and upon their return to a danger area for trials or other court appearances. The witnesses and authorized dependents are given new identities, moved to another city, and provided services necessary to assist them in becoming self-sustaining and acclimated to their new community as quickly as possible." (Source, 1990, p. 47.)

Source: U.S. Department of Justice, U.S. Marshals Service, *The Director's Report: A Review of the U.S. Marshals Service in FY 1988*, p. 46; *1990*, p. 50 (Washington, DC: U.S. Department of Justice).

Selected qualification requirements of judges of appellate and trial courts of general jurisdiction

By type of court and jurisdiction, as of Jan. 1, 1989--Continued

Note: See :Note, table 1.55. "Appellate" refers to judges of courts of last resort and intermediate appellate courts. "Trial" refers to judges of courts of general trial jurisdiction. In some instances, information on the length of time for residency and legal experience requirements was not supplied. There are no qualification requirements for judges in Massachusetts and Rhode Island.

^aCitizen of the United States. Alabama--5 years, Georgia--3 years. Missouri--15 years for appellate court, 10 years for trial courts. Citizen of the State.

CLength of time not specified.

Length of time as member of State bar not specified but must have been engaged in active practice of law for a specific number of years: 8 years for appellate court, 5 years for trial

count. For court of appeals, 5 years.

For court of appeals judges only.

Qualified elector. For Arizona court of appeals, must be elector of county of residence. For Michigan Supreme Court, elector in State; court of appeals, elector of appellate circuit. For Missouri Supreme and appellate courts, electors for 9 years; for circuit courts, electors for 3 years. For Oklahoma Supreme Court and Court of Criminal Appeals, elector for 1 year; court of appeals and district courts, elector for 6 months. For Oregon court of appeals, qualified

elector in county.

Specific personal characteristics. Arizona, Arkansas--good moral character. Maine--sobriety of manners. Maryland--integrity, wisdom and sound legal knowledge.

Nominee must be under certain age to be eligible. Arizona--under 65 years. Colorado--under 72 years, except when name is submitted for vacancy. Florida--under 70 years, except upon temporary assignment or to complete a term. Michigan, Ohio--under 70 years.

Learned in law.

Kyears as a practicing lawyer and/or service on bench of court of record in State may satisfy requirement. Arkansas--appellate: 8 years; trial: 6 years. Indiana--10 years admitted to practice or must have served as a circuit, superior or criminal court judge in the State for at least 5 years. Kansas-appellate: 10 years; trial; 5 years (must have served as an associate district judge in State for 2 years). Texas--appellate: 10 years; trial: 4 years. Vermont--5 of 10 years preceding appointment. West Virginla--appellate: 10 years; trial: 5 years. Puerto Rico--appellate: 10 years; trial: 5 years.

ISIX months.

MA person convicted of a felony or breach of public trust is not eligible to the office for a period of 20 years after conviction.

May not have been previously removed from judicial office.

^oExcept that record of birth is required.

PThirty years for judges of court of appeals and court of criminal appeals.

^qFor court of appeals, admitted to practice for 5 years.

¹90 days.

Note: The salaries reported for the highest appellate courts refer to salaries paid to associate justices, not chief justices. National averages for the highest appellate and general trial courts are based on figures for the 50 States. For Intermediate appellate courts, the average is based on the 37 States that have such courts. Two figures are shown for States where localities supplement State-paid salaries. The first is the sum of the State pay plus the lowest supplement paid by the localities. The second figure (shown in parentheses) is the sum of the State pay plus the highest possible supplement paid by the localities. Supplements may in-

Method of selection and length of initial and retention terms of the highest appellate court justices

By State, as of May 1991--Continued

Note: These data were compiled through a survey of State statutes; they were then verified

Note: These data were compiled through a survey of State statutes; they were then verified by personnel of the American Judicature Society.

"Partisan election" refers to elections in which the judicial candidates' names appear on the ballot with their respective party labels; "nonpartisan election" refers to the situation when no party labels are attached to judicial candidates' names on the ballot. "Retention election" refers to an election in which a judge runs unopposed on the ballot and the electorate votes solely on the question of his continuation in office. In the retention election, the refer to the particular that the control with the medicine which the control that the control with the medicine which the control that the control with the medicine which the control that the control with the medicine which the control that the control with the medicine which the control that the control with the medicine which the control that the control with the medicine which the control that the co judge must win a majority of the vote in order to serve a full term except in Illinois which requires 60 percent, "Nominating commission" is a merit selection procedure that refers to the nonpartisan body, composed of lawyers and nonlawyers, which actively recruits, screens, and nominates prospective judicial candidates to the executive for appointment. The nominating commission method of selection was established by executive order in Delaware, Maryland, and Massachusetts and by constitutional or statutory authority in all other jurisdictions. "Initial selection" is defined as the constitutional or statutory method by which judges are selected for a full term of office. "Retention" refers to the method used to select judges for subsequent terms of office.

aln States that use nominating commissions, the governor generally makes the appoint-

ment.

The Judicial selection commission submits a list of prospective judges to the governor who nominates one to fill a vacancy. The legislature then votes to approve or disapprove that

nomination.

Cinitial appointment is made by the President of the United States and confirmed by the Senate. If the President does not wish to reappoint the judge, the District of Columbia Nomination Commission compiles a new list of candidates, The highest State court is named the Court of Appeals.

The ingress state court's named the court of rejected executive council.

The appointment requires the approval of the elected executive council.

Oklahoma and Texas have two courts of final jurisdiction; the supreme court, which has final civil jurisdiction; and the court of criminal appeals, which has final criminal jurisdiction.

Note: See Note, table 1.58. States not listed do not have intermediate appellate courts.

Source: Table provided to SOURCEBOOK staff by the American Judicature Society. Reprinted by permission.

 $^{^{\}rm a}$ In States that use nominating commissions, the governor makes the appointment. $^{\rm b}$ Alabama and Tennessee have two intermediate appellate courts: the court of civil appeals, which has civil jurisdiction; and the court of criminal appeals, which has criminal jurisdiction. The selection process is the same for both.

^CAppeals court judges are initially chosen in nonpartisan elections and midterm vacancies

are filled from a list submitted by a judicial nominating commission.

Pennsylvania has two intermediate appellate courts; the superior court and the commonwealth court. The selection process is the same for both.

Note: See Note, table 1.58. Courts of general jurisdiction are defined as having unlimited civil and criminal jurisdiction (Larry C. Berkson, "Judicial Selection in the United States: A Special Report," Judicature 64 (October 1980) p. 178).

an States that use nominating commissions, the governor makes the appointment, bCounties with populations less than 150,000 select and retain superior court judges in

Countes with populations less than 150,000 select and retain superior court judges in nonpartisan elections for 4-year terms.

C.coal electors can choose either nonpartisan elections or gubernatorial appointment.

Inilial appointment is made by the President of the United States and confirmed by the Senate. If the President does not wish to reappoint the judge, the District of Columbia Nomination Commission compiles a new list of candidates.

Circuit court associate judges are appointed by the circuit judges in each circuit for 4-year

ferms, as provided by supreme court rule.

In Vanderburgh County, the two candidates for the nonpanisan election are chosen by the

judicial nominating commission.

Retention elections are used in Vanderburgh County.

A nominating commission is used for the superior court judges of Lake, St. Joseph, and Vanderburgh Counties.

Twenty-two of 29 districts use a nominating commission for district judge selection; the remaining 7 select district judges in partisan elections, Seven of 29 districts use partisan elections, Knominating commissions are used for selecting circuit court judges in Jackson, Clay, and

Platte Countles, and the City and County of St. Louis.

An associate circuit court judge's term is 4 years; also in counties that use nominating commissions the appointed judge serves until the next general election but not less than 1

year. $^{\rm III}$ Retention elections are used in Jackson, Clay, and Platte Counties, and the City and

County of St. Lcuis.

County of St. Lcuis.

Subject to approval by an elected five-member executive council.

Special judges of the superior court are appointed by the governor and serve 4-year terms.

Special judges of the superior court are reappointed by the governor and serve 4-year

Note: The Center for Judicial Conduct Organizations conducts annual surveys of judicial conduct commissions. These commissions are typically State agencles created by statute or constitutional amendment with the mandate to receive, investigate, and dispose of complaints regarding judicial misconduct. Information was not available for Arkansas, Georgia, Iowa, Maryland, Massachusetts, Rhode Island, South Dakota, Tennessee, Vermont, and West Virginia.

^aStates do not maintain uniform reporting periods. Most States reported data for the calendar year 1988. However, the following States reported data for calendar year 1989: Illinois, Kansas, Louislana, Michigan, Nebraska, North Dakota, and South Carolina. The following jurisdictions reported on a fiscal year basis: Alabama, District of Columbia, (10/1/88 through 9/30/89); Florida, Hawaii, Kentucky, Missouri, Nevada, New Mexico, North Carolina, Utah, Virginia, Wyoming (7/1/88 through 6/30/89); New Jersey, (9/22/88 through 9/21/89); Texas, (9/1/88 through 8/31/89). One part-time, one full-time.

^CIn 1990, Alaska had a full-time executive director and a full-time Secretary. As of July 6, 1990, a full-time investigator was added. Its two attorneys are on contract. Part-time.

^eThe Commission has access to attorneys and investigators as needed.

Employs one full-time data processing analyst.

⁹The Court on the Judiciary has no budget or staff. By Court rule, the Clerk of

the Delaware Supreme Court is the Clerk of the Court on the Judiciary.

As part of its duties, the Commission evaluates active judges who seek reappointment, and reviews retired judges who wish to continue their judicial service as senior judges.

The Commission's funds come from the general Supreme Court budget; it has

no separate appropriation.

The Clerk of the Appellate Court serves as the Commission's Secretary or Administrator. The Commission has access to an administrator from the Court

system.

Retains only one attorney, who is the executive secretary of the Judicial Council; one investigator who takes specific assignments on a contract basis,

and one secretary-administrative assistant.
The exact title of the Administrative Assistant is Executive Secretary.

mClerk/typist.

ⁿThe Judicial Standards Commission comprises two district judges who are elected by all district judges; one attorney who is appointed by the Supreme Court; and two private citizens, nonattorneys, who are appointed by the Gover-

nor. OThe Commission has attorneys and investigators available through the Attorney General's office.

PFive full-time, two part-time.

^QEight full-time, one part-time.

Four full-time, one part-time.

Sincludes a full-time Finance/Personnel Officer, a law clerk, a Budget Assistant,

and clerk; and one part-time librarian.

The Commission combines its budget with that of the Disciplinary Board.

^USix full-time, one part-time.

VUses the Oklahoma State Bureau of Investigation.

WPart-time Court Reporter.

^XThe Council's Executive Director serves also as general council. y Paralegal.

²Three full-time, one part-time.

aaOf the total budget figure, \$78,888 is provided by a grant from the Governor's office, abpart-time executive director is also part-time attorney.

ac Executive director also serves as legal counsel.

ad The administrative assistant is referred to as a "Confidential Secretary." ae Database coordinator/receptionist.

af The Commission's Budget figure comprises two years, from July 1, 1987 through June 30, 1989, It includes a supplemental Budget Appropriation, and emergency funds from the Governor's fund.

agThe Executive Director of the Commission must be an attorney.

ah The duties of the Commission's Director are considered part-time, and the Director does not receive a salary separate from the Commission budget.

Table 1.62

Percent distribution of juror expenditures in U.S. District Courts

By type of juror and expenditure, year ending June 30, 1989

(Total juror expenditures: \$50,789,100)

	Percent	
Petit juror expenditures	77.6%	
Attendance	47.0	
Mileage	17,9	
Subsistence	5.6	
Other	7.1	
Grand juror expenditures	22,4	
Attendance	13.0	
Mileage	5.4	
Subsistence	3.1	
Other	0.9	

Note: Grand Jurors hear "...evidence of criminal activity presented by the prosecution and

Note: Grand juris hear ... evidence of criminal activity presented by the prosection and determine whether the government's evidence is sufficient to justify the bringing of formal criminal charges." Petit jurors ... determine questions of fact, in any civil or criminal action, through hearing the evidence presented at trial." (Source, p. A-127.)

Attendance fees are paid to these jurors in compensation for their services. Federal petit jurors are selected from a group of those available to serve--the jury venire--for a given day. Of those selected from this initial group, some will be excluded after the voir dire process--questioning under oath by the judge. Individuals who are excused after the voir dire process are still paid an attendance fee. "Other" expenditures included miscellaneous payments for the comfort and convenience of both petit and grand jurors.

Note: See Note, table 1.62. In this table, 1977 data are for 94 District Courts; 1978 through 1982 data are for 95 District Courts; and 1983 through 1989 data are for 94 District Courts.

"Travel status" refers to jurors who are in transit. The "Juror Usage Index" is the average number of jurors on hand for each jury trial day; it is calculated by dividing the total number of available jurors by the total number of jury trial days.

^bThe jurors in travel status are included in the category of jurors not selected, serving or challenged.

Note: Persons under supervision of the Federal Probation System include persons placed on probation--either by U.S. District Courts, U.S. magistrates, or at the request of U.S. attorneys (deferred prosecution)--and Federal oftenders released from confinement on parole or mandatory release. A Federal prisoner is eligible for mandatory release when the prisoner has served the full term of imprisonment less "good-time" allowances. If the offender has earned more than 180 days of "good-time" credit, supervision (as if on parole) is for that period in excess of 180 days. If "good-time" is less than 180 days, release occurs without supervision. As of 1987 the total figure no longer includes ball interviews because this function was transferred from the probation offices to the pretrial services offices. The 1987 data have been revised by the Source and may differ slightly from previous editions of SOURCEBOOK.

^aTwelve-month period ended Mar. 31, 1989.

Note: This information was collected through a survey of the 50 States and the District of Columbia conducted at the end of 1989. The following States did not respond to the survey: California, Kentucky, New York, Pennsylvania, and Wisconsin. In some States, probation is handled locally and central statistics were not available. The Source presents the information as submitted by the responding agency. No attempt is made by the Source to verify the information received.

Note: These data are from the 1983 and 1988 Censuses of Local Jails, conducted by the U.S. Bureau of the Census for the U.S. Department of Justice, Bureau of Justice Statistics. The 1983 Census collected information from 3,358 jails for a response rate of 99 percent and the 1988 Census gathered information from 3,316 jails for a response rate of 100 percent. For additional information on the Census methodology, see Note, table 1.71.

The number of Inmates is that number for which housing Information was available, Floorspace includes all areas where inmates slept at night and in use on June 30. Excluded from housing were areas used only for recreation, services, or administration.

Source: U.S. Department of Justice, Bureau of Justice Statistics, *Population Density In Local Jalls*, 1988, Special Report NCJ-122299 (Washington, DC: U.S. Department of Justice, March 1990), p. 2.

Note: The 1988 Census of Local Jalis was conducted by the U.S. Bureau of the Census for the U.S. Department of Justice, Bureau of Justice Statistics, Questionnaires were mailed to 3,448 locally-administered jails in the Nation during the week of Aug. 1, 1988. Forty-four jails were added to the initial mailing, and 176 were deieted, leaving a final count of 3,316 facilities. Through the use of various follow-up procedures a response rate of 100 percent was achieved.

The 1988 Census included all locally-administered jails that held inmates beyond arraignment (usually more than 48 hours) and that were staffed by municipal or county employees. Eight jails that were privately operated under contract for local governments were also included. Excluded from the Census were physically separate drunk tanks, lockups, and other holding facilities that did not hold persons after they had been formally charged, as well as all Federal and State-adminis-

tered facilities, including the combined jail-prison systems in Alaska, Connecticut, Delaware, Hawali, Rhode Island, and Vermont. Five locally-operated jails in Alaska were included. (Source p. xiv.)

^aDetail adds to more than total number of jails under court order for specific conditions because some jails were under judicial mandate for more than one reason. ^bFood service, disciplinary policies, grievance procedures, fire hazards, the totality of conditions, and other reasons.

Source: U.S. Department of Justice, Bureau of Justice Statistics, *Census of Local Jalls*, 1988, NCJ-127992 (Washington, DC: U.S. Department of Justice, 1991), p. 2

Black (non-Hispanic)	22,101	17,637	
Hispanic ^c	6,633	5,220	
Other race ^d	725	465	

Note: See Note, table 1.71.

Scurce: U.S. Department of Justice, Bureau of Justice Statistics, *Census of Local Jalis* 1988, Bulletin NCJ-121101 (Washington, DC: U.S. Department of Justice, February 1990), p. 8, Table 18.

^aExcludes employees not on duty during the 24 hours of June 30, 1988. ^bA majority of the race and ethnicity data were estimated by respondents. ^cAny race. ^dAmerican Indians, Alaska Natives, Asians, and Pacific Islanders.

Table 1.77

Jail payroll and nonpayroll staff and number of inmates per employee

By occupational category, United States, June 30, 1983 and 1988

Occupational	Number of	employees		of Inmates
category	1983	1988	1983	1988
Total	64,560	99,631	3.5	3.4
Administrators	6,091	6,727	37.4	50.0
Correctional officers	44,454	73,280	5.1	4.6
Clerical and maintenance staff	8,415	11,711	27.0	28,7
Educational staff	893	1,216	254,8	276.3
Professional and technical staff	4,524	6,177	50.3	54.4
Other staff	183	520	1,243,4	646.2

Note: See Note, table 1.71. Part-time and nonpayroll jall employees accounted for 9 percent of all jall staff in 1988, excluding community volunteers. The ratio of jall inmates to staft, therefore, is based on full-time and part-time, and payroll and nonpayroll employees. By contrast, in State correctional facilities where part-time and nonpayroll employees accounted for less than 4 percent of all staff in 1984, the ratio of inmates to staff was based on full-time payroll employees only. The inmates per employee ratio was obtained by dividing the average daily inmate population by the number of employees (excluding community volunteers).

Note: Accreditation status indicates whether an institution is accredited by the Commission on Accreditation for Corrections. The process of accreditation provides an additional level of assurance that Federal prisons offer decent living conditions, provide adequate programs and services, and safeguard inmate rights by ensuring compliance with the more than 400 standards developed by the Commission (Source, p. 5).

^eScheduled to open in late 1990.

Yes; before Nov. 1, 1987; 3 to 5 days par month.		Y		Y	No since Nov. 1, 1987; yes before for statutory time; no for earned.	Yes; director, warden o superintendent

Note: This information was collected through a survey of the 50 States, the Federal Bureau of Prisons, and the District of Columbia. Kansas, Maryland, and Tennessee did not respond to the survey. Five States did not have statutes which provided good time reductions from sentence length; Georgia, Hawaii, Idaho, Pennsylvania, and Utah. The Source presents the information as submitted by the responding agencies. No attempt is made by the Source to verify the information received.

Note: This information was collected through a survey of the 50 States, the Federal Bureau of Prisons, and the District of Columbia. California, Tennessee, and Vermont reported having a furlough program, however, detailed data were not available. Nevada and New Hampshire did not have furlough programs in 1988. As of August, 1988 Louisiana placed a hold on all furloughs, except medical and emergency leaves with an escort. Furloughs in Louislana were reinstated as of October 1989.

A furlough is a temporary leave from prison and can be granted for the following reasons: home visits, funerals, emergencies, treatment programs, religious programs, shopping or recreation, to search for employment, and reintegration into community prior to parole. The Source presents the Information as submitted by the responding agencies. No attempt is made by the Source to verify the information received.

^aComputerized records not maintained.

Computerized records not maintained.

Inmates did not return.

Meritorious.

Includes 1 escape, 1 driving while intoxicated, and 1 possession of a controlled substance.

Includes late returns, alcohol/drug use, and not at location agreed upon, or other reasons.

including late returns and alcohol/drug use.

Escapes not classified as revocations

h Inmates can participate in 3 or 4 la Property offenses.

| Froberty offenses. | Flaturned late. | Flaturn

n Information is not compiled. ^oEstimated.

Poes not include those in Work Release or Community Centers.

Several had more than one during the year.

Including late returns, alcohol/drug use, not at location agreed upon, driving, associating with convicted felons, new misdemeanant or felony offenses. Includes alcohol/drug use, not at location agreed upon, and administrative.

Those granted in 1987.

^URevocation records not kept.

Never had any problems, insignificant number caused any problem. Due to change in stat-ute/policy "family escort" furloughs were discontinued. 200-300 furloughs dropped to 1-2

W370 on Christmas leave and 2,032 with Community Work Center passes.

Xincludes alcohol/drug use, not at location agreed upon, stolen vehicle, and absconding.

^y30 percent were given a 10 day extension to complete furlough.

²Including 7 escapes, 2 for property offenses, and 1 for assaultive offense.

^{aa}Including 32 late returns, 7 for alcohol/drug use, 8 for not at location agreed upon, and 3 for

other reasons, ab Statistics record the number of individuals. ac 380,900 in work release; 18,500 in study release; 21,816 family visits; and 10,236 in a Community Volunteer Program. ad 1,465 in work release; 74 in study release; 606 family visits; and 853 in a Community

Volunteer Program.

Community Corrections only. af Long term.

agincludes escapes, property, and assaultive offenses.

ah Unknown, but very small, al including 6 late returns, 24 for alcohol/drug use, 1 for not at location agreed upon, and 17 for failure to call or calling late.

all including 12 late returns, 4 for alcohol/drug use, 1 for possession of contraband.

all lokpown and molecule records for the contraband.

Unknown, only maintain records for those who escape from furlough

al Including 1 escape, 1 property offense, 1 habitual traffic offender, and 1 for being drunk in

public, amincluding 4 for alcohol/drug use and 1 for not at location agreed upon. an Including 11 for alcohol/drug use and 1 for not at location agreed upon. a0 4,610 are social, 9,534 transfers, and 440 medical/legal.

Note: This information was collected through a survey of the 50 States, the Federal Bureau of Prisons, and the District of Columbia. The following jurisdictions do not use inmate labor for prison construction: Alaska, Connecticut, the District of Columbia, Illinois, Maryland, for prison construction: Alaska, Connecticut, the District of Columbia, Illinois, Maryland, Minnesota, Nevada, New Jersey, New York, North Dakota, Ohio, Pennsylvania, Tennessee, Utah, Vermont, Virginia, and the Federal Bureau of Prisons. Mississippi uses inmate labor to build support facilities and Missouri uses inmate labor for routine repair and maintenance of facilities but no additional information was available for these States. The Source presents the information as submitted by the responding agencies. No attempt is made by the Source to verify the information received.

h Inmates are used to do finish work. Not paid; may be awarded meritorious gain time.

Not paid.

KLimited.

if cost is under \$100,000. Minor projects.

n General laborers earn \$3.00 per day and bricklayers earn \$4.00 per day.

Excluding new facilities.

Support buildings.

9Some.

Finish work, some carpentry.

Sinmates are not paid a wage, they receive additional good conduct time for working.

But some are used to do building demolition, building maintenance, and energy conservation measures.

^aThree full-time, four part-time.

Accredited by Commission on Accreditation for Corrections.

^{*}Accredited by Commission on Accreditation for Confedence.

The chairman serves full-time; members serve part-time.

Parole Board hears pre-1976 cases of parole. Flat sentences with no parole under criminal code effective May 1, 1976.

The Executive Officer and two Deputy Executive Officers serve full-time, other staff serve

part-time.

Eleven hearing officers expand the functions of the Parole Board.

The Board of Probation and Parole provides services when the sentence is over 2 years; the County Courts provide services when the sentence is 2 years or less.

Under State statute, parole is considered probation.

U.S. Parole Commission hearing examiner workload

1986	24,264	12,519	· X	5,057	2,680	. X	880	X	319	2,035	471
1987	26,149	13,070	X.	5,516	2,812	X	811	X	348	2,171	390
1988	27,118	12,860	X	5,932	3,357	X	887	X	385	2,458	359
1989	23,397	9,009	, X	6,162	3,409	X	755	X	371	2,449	519

Note: The hearing examiner's workload consists of in-person hearings and record reviews. At an in-person hearing, the offender appears before the cxaminer and can introduce additional information for consideration. At a record review, only information contained in the prisoner's case file is considered. Some data reported as hearings were actually record reviews because the prisoner was serving concurrent Federal and State sentences in a State institution. With implementation of presumptive parole date procedures, "one-third hearings" and "review hearings" have been phased out.

hearings" and "review hearings" have been phased out.

For definitions of initial hearing, one-third hearing, statutory review/interim hearing, and other terms, and a list of States in regions, see Appendix 4.

Note: See Note, table 1.95. If probable cause for revocation is established at the local hearing, the parotee may be returned to the institution to await the institutional hearing. A local hearing is not necessary if the parotee has been convicted of a crime committed while under supervision. Data for 1978 have been revised from earlier reports by the Source. For definitions of terms and a list of States in regions, see Appendix 4.

Note: See Note, table 1.95. In 1978, the U.S. Parole Commission adopted a system of guide-lines, based on a calculation of parole risk, to aid in the determination of an optimal parole release date. Release decisions may be made either above or below the designated guideline range if warranted by discretionary, statutory, or policy considerations. For this table, only discretionary decisions outside the guideline structure are counted as "above" or "below." Thus, decisions to deny parole where the mandatory release date is below the guideline range, and decisions to grant an effective parole date above the guideline range, due to time needed to develop a suitable release plan or because the minimum sentence is beyond the guideline range, are counted as "within" the parole policy guidelines. Decisions below the guideline range because of policy limitations are excluded from this table (Source, 1981, p. 22). Guidelines are used in revocation hearings in order to establish an eligibility date for "reparole." In addition, cases in which the guidelines developed by the District of Columbia Parole Board were used as the result of a court order are excluded from this table in 1988.

For definitions of terms, see Appendix 4.

Note: These data were gathered through a 50-State survey of legislative personnel conducted by the National Conference of State Legislatures. Legislative staff in each State responded to questions about statutory provisions and administrative practices regarding Juvenile Justice.

^aCertain first-time offenders and misdemeanants may be eligible for an accelerated retrial release program.

Court may revoke, suspend or postpone driver's license.

Cluvenile may be emancipated or released from compulsory education requirements.

Youth may also be placed in detention or admitted for treatment of addiction,

Court may order weekend or intermittent detention.

Court may order parents to participate in rehabilitative services.

⁹Court may order special care for physical or mental health.

hStatute provides for an informal adjustment procedure,

Court may order a specific placement subject to the approval of the Department of

Family Services.

Court may suspend disposition for 1 year then dismiss complaint; order vocational training or order parents to participate in programs.

Statute contains broad language authorizing any other disposition the court finds

proper.
A youth may be ordered held for observation and assessment prior to determining the specific placement.

The Washington code recognizes only two dispositions: community supervision and confinement. Community supervision is generally reserved for minor or first time offenders.

Note: This information was collected by the Safer Society Program through a questionnaire mailed to 1,167 Juvenile and adult sex-offender treatment programs and service providers. These programs were identified through telephone and mail surveys; contacts with local, county, and State sex-offender treatment networks; and consultations.

The information above does not include; services provided for the incest offender when treated only within the context of the incest family, services that treat the sex offender with other types of offenders, or adult sex-offender self-help programs (Source, p. 5).

The categories labeled "court" are those existing in conjunction with the court such as

probation or parole offices or school districts. Categories labeled "private" refer to private

nonprofit or private-for-profit agencies or professional service. "Community based, prisonrelated" programs are those that are located in halfway houses operated by prison authori-

At the time of this survey, Mississippi was found not to provide service to either juvenile or adult sex offenders.

Note: This information is current as of the 1988/1989 legislative session for each State. Provisions in some States may be both legislatively enacted and included in the victim bill

^aSometimes called standards of fair treatment of victims and witnesses as there are no specific remedies provided if a criminal justice agency falls to live up to its standards. The bill of rights varies from State to State and may include issues such as: notification of proceedings, secure waiting areas, protection from Intimidation, speedy disposition, court

attendance, and property return.

Delaware's victim bill of rights was passed in the form of a resolution with a one year life, which has since expired.

Introduced into legislation.

d Money allocated for victims of general crimes not only the special cases of domestic violence, sexual assaults, and child abuse and neglect.

By appropriation only, no legislation.

9 Sexual Assault Service Funding: money is designated for sexual assault services but has not been used. hFinancial assistance to victims of certain crimes to reimburse for actual losses due to the

crime. Can include among other things medical treatments, psychiatric care, and physical and occupational rehabilitation.

Georgia has passed an amendment to the Constitution that provides for victim compensa-

tion but funding for the program has not yet become available.

Some States have broadened the definition of witness to include more people and some States have made laws regarding the intimidation of victims and witnesses more strict.

kInvolves a written, objective description of the medical, financial and emotional injuries caused by the soon-to-be sentenced offender. It is a fact-based document usually prepared by the probation department as part of the presentence investigation report.

Victim impact statements in drunk driving cases only.

**Courts in all 50 States and the District of Columbia have the authority to order restitution

to the victim at least in certain cases. Some States require judges to order restitution unless the judge provides a written statement as to why this was not so ordered.

In felony cases only.

Offender is not allowed to receive profits from sales of books, magazine articles, or movies about the offense. Victims receive some compensation from these profits. After court costs and attorney fees are paid, extra funds may go to a victim compensation fund or to the offender where no victim claims are made. PChildren's Bill of Rights.

^qFor sexual assault only.

Statements made by young children who are suspected sexual abuse victims may be ex-

duded from the hearsay rule and be admitted into evidence.

Sprotection from family/household member abuse. May include the description of the circumstances when an arrest for domestic violence should be made.

Table 1.101

Statutory provisions pertaining to crimes against the elderly and handicapped

	ta.		

State	Crime	Penalty enhancement
rizona	Class 4, 5, or 6 felony	Sentence may be increased by up to 25 percent when the victim is age 65 or older or handicapped.
	Class 2 or 3 felony	Sentence may be increased up to 100 percent when the victim is age 65 or older.
alitornia	Prior conviction for burglary; robbery; kldnaping; kldnaping for ransom, extortion, or robbery; rape; sodomy; mayhem; and committed against person age 65 or older or one who is blind, paraplegic, quadriplegic, or under 14 years.	2 year enhancement
	Assault, battery or assault with a deadly weapon, against person age 65 or older.	Restitution may be ordered as a condition of probation.
plorado	On victim age 60 or older or disabled: 2nd Degree assault becomes Class 5 felony;	4 to 6 years
	3rd Degree assault becomes Class 5 felony;	1 to 5 years. Restitution also may be ordered and probation revoked for nonpayment.
	Robbery of elderly (age 60 or older) or disabled becomes Class 3 felony;	4 to 6 years
	Theft from elderly or handicapped becomes Class 3, or	4 to 6 years
	Class 5 felony (depending on value of items).	1 to 5 years. Restitution also may be ordered and probation revoked for nonpayment.
	Theft by means other than force, threat, or intlmidation: Class 4 felony regardless of value of things taken.	2 to 8 years.
ennecticut	Assault of victim age 60 or older; 1st Degree assault, a Class B felony.	5 year sentence may not be suspended or reduced by the court.
elaware	2nd Degree robbery of persons age 65 or older by repeat offender: Class D felony.	Mandatory 1 year minimum during which no furlough, work release, or other supervised release allowed.
orida	When committed against person age 65 or older: Aggravated battery goes from 2nd Degree felony to 1st Degree felony;	
	Aggravated assault goes from 3rd Degree felony to 2nd Degree felony; Battery goes from 1st Degree misdemeanor to 3rd Degree	For all crimes: Mandatory minimum term of 3 years, plus fine of not more than \$10,000, and restitution and community service ordered.
	felony; Assault goes from 2nd Degree misdemeanor to 1st Degree misdemeanor.	Solvice district.
awaii	In committing or attempting to commit felony, causes death or serious or substantial injury to person age 60 or older, blind, paraplegic, quadriplegic, age 8 or younger.	Mandatory minimums, no parole, apply as such:
	2nd Degree murder	15 years
	Class A felony	6 years, 8 months
	Class B fel/uny	3 years, 4 months. However, law also provides "authority to withhold sentence of imprisonment" and grant probation except for Class A felony, repeat offender, felony firearm offender, double or correct the provider of the
nois	Sexual assault of person age 60 or older, or handicapped, becomes "aggravated" Class X felony.	death, or serious or substantial bodily injury. 6 to 30 years
	Sexual abuse of person age 60 or older, or handlcapped, becomes "aggravated" Class 2 felony.	3 to 7 years
diana	Battery against elderly person becomes Class D felony.	Fixed term 2 years
	Home improvement fraud is Class D felony when committed against	

See note at end of table.

Statutory provisions pertaining to crimes against the elderly and handicapped

By State, 1989--Continued

State	Crime	Penalty enhancement
lassachusetts	Assault, battery with dangerous weapon on person age 65 or older.	Not more than 10 years in State prison, \$1,000, or jail more than 2-1/2 years.
	Repeat offense	Mandatory minimum of 2 years, during which no probation, parole, turlough, work release, or good time allowed.
	Assault with dangerous weapon on person age 65 or older.	Not more than 5 years in State prison, \$1,000, or jail more than 2-1/2 years.
	Repeat offense	Mandatory minimum of 2 years, during which no probation, parole, furlough, work release, or good time allowed.
	Assault with Intent to rob or murder with dangerous weapon on person age 65 or older.	Not more than 20 years in State prison.
	Repeat offense	Mandatory minimum of 2 years, during which no probation, parole, furlough, work release, or good time allowed.
w Mexico	Noncapital felonies	1 year sentence enhancement that can't be suspended or deferred. 2 year enhancement if serious bodily injury.
klahoma	1) Assault, battery, or assault and battery with dangerous weapon; 2) Aggravated assault and battery; 3) Burglary in 2nd Degree; 4) Use of firearm or offensive weapon; 5) Grand larceny; 6)Extorlion; 7) Fraud; 8) Embezzlement against elderly (age 62 or older) or incapacitated persons.	30-day mandatory minimum jail term in addition to subsequent probation; restitution and community service required; fine also may be imposed. Repeat offense against elderly results in 10-year mandatory minimum for crime with sentence normally exceeding 5 years. Third offense enhancement also created in statute.
nnsylvania	Sets mandatory minimums. Crimes committed by persons under age 60 against person over age 60:	
	Aggravated assault	Not less than 2 years
	Rape	Not less than 5 years
	Involuntary deviate sexual intercourse	Not less than 5 years
	Theft by deception	Not less than 12 months (minimum sentence discretion where the court finds justifiable cause and explains in writing). Parole should not be granted until minimum term of imprisonment has been served.
hode Island	Assault/battery of person age 60 or older causing serious bodily injury becomes felony.	Imprisonment not less than 3 years but not more than 20 years, or fine not more than \$10,000, or both. Mandatory restitution and/or community service.
	Assault/battery by person responsible for Jare of person age 60 or older causing bodily injury becomes felony.	Imprisonment not exceeding 5 years, or fine not exceeding \$2,500 or both.
		Health care facility also may be fined, not exceeding \$5,000.
	Assault/battery by person responsible for care of person age 60 or older causing serious bodily injury becomes felony.	Imprisonment mandatory 2 years but not more than 20 years, or fine not more than \$10,000. Health care facility also may be fined not more than \$15,000.
exas	Aggravated robbery of person age 65 or older or disabled person that causes bodily injury or places person in lear of imminent bodily injury or death becomes 1st degree felony.	5 years to life
est Virginia	Assault, battery, or assault during commission of or attempt to commit felony against person age 65 or older.	Sentence mandatory, not subject to probation or suspension.

Note: This information was collected through a search of State statutes conducted during October and November of 1989 by the National Conference of State Legislatures. States not listed in the table had no enhancement statute at the time of data collection,

Note: This research was conducted by Abt Associates, Inc. for the U.S. Department of Justice, National Institute of Justice. The information is based on an analysis of statutes from the 50 States and the District of Columbia. The analysis was verified by an attorney in every State except Minnesota and North Carolina in the Spring of 1988. A civil order of protection is a legally binding court order that prohibits an individual who has committed an act of domestic violence from further abusing the victim. Depending on the provisions of the applicable State statute, the order may also forbid the offender from engaging in other behavior (e.g., having any contact with the victim) or specify the conditions of certain activity by the offender (e.g., visitation rights), Civil protection orders are issued in a civil proceeding (although not necessarily in civil court) in response to a written petition from the victim requesting an order (Source, p. v). Arkansas and Delaware do not currently have

^aFeatures of the law are recorded only if they are explicitly mentioned--that is, required, authorized, or prohibited--in the civil protection order statute or in other applicable legisla-

tion.

D"Household members related by blood or marriage" is often stated in the law as "persons

States as "relatives." Consanguinity refers related by consanguinity or affinity," or in some States as "relatives." Consanguinity refers to blood relatives and affinity includes spouses and in-laws. Many States do not require that persons in this category be living together.

Persons qualify as long as they are adult members of the same household.

dThe statute states that a victim need not be living in the home to apply for a protection

order; however, the victim must have been living with the abuser at the time the abuse ccurred.

If parties are spouses, a petition for relief must state that no suit for divorce is pending. ¹If the petitioner is a former spouse of the respondent, a copy of the decree of divorce must be attached to the petition.

Former household members are covered if they are related.

hCoverage is for unrelated household members only of the opposite sex.

The Domestic Violence Act of New Jersey makes no mention of self defense. However, domestic violence in the State is defined with reference to sections of the penal code for such offenses as assault, kidnaping, murder, rape, etcetera. Thus since those criminal statutes, which are incorporated into the Domestic Violence Act by reference, permit self defense, the Domestic Violence Act may permit self defense. There is no case law in this area, however.

Family members are adults related by blood or marriage, according to Oregon statute.

Refers to adults only.
Unrelated household members are eligible for a restraining order if they have lived together within the past twelve months.

MA prosecuting attorney may petition for a civil protection order on behalf of a victim.

^aFeatures of the law are recorded only if they are explicitly mentioned--that is, required, authorized, or prohibited—in the civil protection order statute or in other applicable legislation. Relief is available only if the parties are married and a dissolution or legal separation is not

pending.

Although the Maryland statute permits ordering the respondent to stay away from the residence, there is no provision to order the abuser to stay away from the victim's place of employment.

dThe court must include visitation rights in a prefection order unless they are not in the best interests of the child.

Gosts and attorney's fees are ordered only after a contested hearing.

Visitation is limited to supervised visitation only.

Note: These data were compiled by the National Rifle Association's Institute for Legislative Action. In addition to State laws, the purchase, sale, and in certain circumstances, the possession and interstate transportation of firearms are regulated by the Federal Gun Control Act of 1968 and Title VII of the Omnibus Crime Control and Safe Streets Act. Also, cities and localities may have their own firearms ordinances in addition to Federal and State laws. The Source notes that State firearms laws are subject to frequent change. State and local statutes and ordinances, as well as local law enforcement authorities. should be consulted for full text and meaning of statutory provisions.

The Source defines "constitutional provision" by citing Article 1, Section 15 of the Connecticut State constitution as an example of the basic feature contained in the constitutions of many States. It reads: "Every citizen has a right to bear arms in defense of himself and the State."

dApplies only to pre-registered firearms. No new handguns can be brought into the city. eHandguns prohibited in Evanston, Oak Park, Morton Grove, Winnetka, Willmette, and Highland Park. Certain cities or counties.

PHAndguns must be presented to the city chief of police or county sheriff to obtain a certifi-cate of inspection.

Permission to carry concealed may be granted by county sheriff on written application.

Some municipalities control the possession, sale, transfer, or carrying of handguns, e.g., Cleveland and Columbus require a police permit for purchase; Toledo requires a handgun owner's identification; Cincinnati requires application for purchase. In addition, some forbid the possession and sale of handguns with a certain magazine capacity, usually 20 rounds

or more.

KProhibits carrying a firearm "with the intent or purpose of injuring another."

Source: Table provided to SOURCEBOOK staff by the National Rifle Association of America, Institute for Legislative Action.

^aLicense to carry in a vehicle either openly or concealed. bArkansas prohibits carrying "with a purpose to employ it as a weapon against a person." Tennessee prohibits carrying "with the Intent to go armed." Chicago only.

Note: These data were collected through a review of the statutory provisions of the 50 States, the District of Columbia, and Puerto Rico.

The evidentiary weight given to blood alcohol concentration levels generally falls into one of two categories.
"Presumption at 0.10 percent" indicates that such a level of blood alcohol concentration creates a presumption of intoxication in a court of law. "Illegal per se at 0.10 percent" indicates that such a level of blood alcohol concentration is considered conclusive evidence of intoxication in a court of law. Statutory provisions of several jurisdictions treat the 0.10 percent level as both presumptive and illegal per se evidence of driving under the influence. This appears to be the result of States having adopted one of the standards without amending statutes which had previously authorized the other standard. In such cases, the actual

statutes should be consulted for clarification, "Open container laws" refer to laws prohibiting the possession of open containers of alcoholic beverages in the passenger compartment of a motor vehicle. "Anti-consumption laws" refer to laws prohibiting the consumption of alcoholic beverages in the passenger compartment of a motor vehicle. "Dram shop laws" refer to laws which make owners of drinking establishments civiliy liable for serving alcohol to an intoxicated patron who then goes out and injures another individual in a motor vehicle accident. In the table, "S" indicates that such a provision is provided expressly by statute. In all jurisdictions, use of a controlled substance or use of a controlled substance in conjunction with alcohol also constitutes the basis for a driving while intoxicated charge. Statutes should be consulted for the full text and meaning of specific provisions.

Statutory provisions related to alcohol use and driving

By jurisdiction, as of Jan. 1, 1991--Continued

Applies to drivers only.

b0.08 percent.

Applies only to actions of intoxicated minors, depresumption of driving while impaired at 0.05 percent; presumption of driving while under the influence at 0.10

Percent.

This State has a statute that places a monetary limit on the amount of damages that can be awarded in dram shop liability actions.

Constitutes prima facle evidence.

⁹Prima facle evidence at greater than 0.05 blood alcohol concentration.
Adopted via case law decisions.

Applies only to the actions of intoxicated minors or persons known to be habitually addicted to alcohol. 0.12 percent.

Competent evidence of driving while intoxicated. Has both prima facle and presumptive evidence laws with blood alcchol concentration levels at 0.10 percent. MUnclear, possible via case law based upon the actions of

minors.

**Presumption of driving under the influence at 0.07 percent; presumption of driving while intoxicated at 0.10 percent. Both constitute prima facie evidence.

Limited application.

Presumption of driving while impaired at 0.07 percent; presumption of driving under the influence at 0.10 percent.

Cause of action limited to licensees who have been convicted of selling alcoholic beverages to minors or intoxlcated individuals.

0.07-0.10 constitutes prima facie evidence of impairment. SApplies specifically to the actions of intoxicated minors, but the law does not foreclose developing case law as to other types of dram shop action.

Presumption of driving while impaired at greater than 0.05

percent; prima facie evidence of driving while under the

Influence at 0.10 percent.

Not less than 0.08 percent constitutes being under the influence of intoxicating liquor.

Yo.05 for persons who operate buses, trucks, or other

large motor vehicles,

WThis blood alcohol level is an inference of driving while

Intoxicated.

XUnclear, possible via case law.

YStatutory law has limited dram shop actions.

Civil offense at blood alcohol level of 0,08,

aaPermissive inference of a driving while intoxicated

offense. abApplies only to the actions of intoxicated minors, and/or adults who have lost their will to stop drinking, acLiability limited only to the actions of persons who are under 21 years old.

Statutory provisions authorizing blood alcohol concentration tests for persons suspected of driving while intoxicated, and sanctions for refusal to take such tests

By jurisdiction, as of Jan. 1, 1991--Continued

Note: See Note, table 1.105. The blood alcohol concentration level of persons suspected of driving while intoxicated is generally determined through the administration of either preliminary breath tests or chemical blood, breath, or urine tests. "Preliminary breath tests" are administered at the site of a traffic stop and are used for screening purposes in determining the need to arrest and the need to conduct further blood alcohol concentration tests. "Chemical tests," authorized under "implied consent laws," are typically administered after arrest (see table for exceptions) and are used to obtain admissible evidence of intoxication (U.S. Department of Transportation, National Highway Traffic Safety Administration, Alcohol and Safety Laws: A National Overview, 1981 (Washington, DC: USGPO, 1982). pp. 1. 3, 9). "Implied consent laws" provide that "any person who operates a motor vehicle upon a public highway is deemed to have given consent to a chemical test or tests of his or her blood, breath, or urine for the purpose of determining the blood alcohol content" (U.S. Department of Transportation, National Highway Traffic Safety Administration, Alcohol and Highway Safety Laws: A National Overview, 1981 (Washington, DC: USGPO, 1982), p. 9). "Criminal" sanctions refers to fines and/or jail sentences whereas "administrative licensing action" refers to suspension or revocation of license. In the table, "S" indicates that such a provision is provided expressly by statute. Statutes should be consulted for the full text and meaning of specific provisions

⁸A law enforcement officer can request a driver to submit to a chemical test if the driver has been arrested for a driving while intoxicated offense, if the driver has been involved in a fetal accident, or if there is "reasonable cause to believe" that the driver is intoxicated or has a blood alcohol concentration level of 0.10 or more. Unclear, but probably not.

CAn arrest is not required if there is "reasonable grounds" to believe that a person was driving while intoxicated and they were involved in an accident that resulted in either serious injury

or death.

The police need only "reasonable grounds" of driving while intoxicated offense before the implied consent law is applicable. Before the preliminary breath test can be given, a law enforcement officer must have probable cause to believe that the driver is violating the Driving While Intoxicated law. The test is given prior to an actual Driving While Intoxicated arrest for the purpose of assisting the officer in determining whether to require a chemical (evidentiary) test under the implied consent

law.
A law enforcement officer only needs "reasonable grounds" and any one of the following: (1) a Driving While Intoxicated arrest; (2) an accident resulting in Injury or death; (3) a preliminary breath test redusal; (4) a preliminary breath test reading of 0.10 percent; or (5) a preliminary breath test reading of less than 0.10 percent but the officer has reasonable grounds that the driver was under the influence of drugs or drugs and alcohol.

No arrest is required if the person has been involved in a

motor vehicle accident resulting in property damage, injury, or

death. hAlthough arrest is not required, police must have "probable

The law uses the term "detained" instead of "arrested." A restricted/hardship license may be issued.

A driver commits a gross misdemeanor if they refuse to submit to a chemical test and they have had a previous license revocation (either once in 5 years or twice in 10 years) for either: (1) refusal to submit to an implied consent test; (2) an administra-tive per se violation; (3) a driving white intoxicated offense conviction; or (4) a conviction for vehicle homicide.

A person may give their consent to tests of either blood or urine

for the purpose of determining if they have any other impairing

substance in their body.

"Only "reasonable grounds" are needed not an arrest.

nOnly "reasonable grounds" seem to be required.

OThe law only authorizes these tests in those situations where a driver has been involved in an accident and has committed a traffic law violation. A violation could include other offenses as

well as driving while intoxicated. PAn arrest is not required in all situations. If a preliminary breath test Indicates that alcohol has been consumed, a request to submit to a chemical test under the implied consent law may be made without the need of a formal arrest.

^qThe implied consent law would seem to indicate that an arrest is necessary before licensing sanctions for refusal could be imposed. However, a recent court decision appears to hold that only "reasonable grounds" not an actual arrest is all that is needed. See Magill v. Com., 522 A. 2d 172 (Pa. Cmwith. 1987). For first offenders, no suspension of license will be imposed for a refusal if they plead guilty to a Driving While Intoxicated offense within 30 days of arrest. SA driver's license is not subject to revocation for refusal to

submit to a chemical test under the implied consent law if the driver pleads guilty to a driving while intoxicated offense and such plea occurs either (1) prior to a licensing agency hearing on the refusal issue, or (2) if a hearing is not requested, prior to u revocation order being issued.

Il a driver refuses to submit to a chemical test and the police officer had "reasonable grounds to believe" that the driver was driving while intoxicated, the State may proceed to

suspend/revoke the driver's license.

^{UA} blood sample may be requested (1) if breath testing equipment is not available to determine alcohol content; or (2) if the law enforcement officer believes that the driver was under the influence of drugs.

If there is an injury likely to cause death, a person may be compelled to submit to a test for drugs as well as alcohol.

Note: See Note, table 1.105. "The sanctions listed for convictions of alcohol driving oflenses. . are those specified by statute. If a sanction is not specified by law. . ., it is not listed." (U.S. Department of Transportation, National Highway Traffic Safety Administration, Digest of State Alcohol-Highway Safety Related Legislation, January 1983 (Washington, DC: U.S. Department of Transportation, 1983), pp. 1, 2.) Imprisonment refers to both jail sentences and prison sentences. "The term 'mandatory sanction' means either a criminal sanction or an administrative licensing action which must be imposed by either a court or administrative agency" (Source, p. 1-2). Because of variation among the jurisdictions within categories of sanctions, e.g., terms of imprisonment or amounts of fines, the Source document as well as individual jurisdictions' statutes should be consulted. Statutes should be consulted for the full text and meaning of specific provisions. Unless otherwise stated, the sanctions are the same for all alcohol and drug driving offenses (e.g., driving while under the influence of either alcohol or drugs, illegal per se, etc.).

Not necessarily served consecutively, the sanctions are for non-injury offenses.

h48 consecutive hours or 10 days of community service became mandatory when the Department of Motor Vehicles certified that an application for 23 USC 408 grant funds had been submitted to the U.S. Department of Transportation.

Applies only to first illegal per se conviction

Mandatory community service regardless of whether there is a mandatory imprisonment

sanction.

"House arrest" or the use of an "ignition interlock" device may be ordered in lieu of a jail sentence.

It appears that a court may order the use of an "ignition interlock" device in lieu of manda-

tory licensing action.

The court must sentence defendants to at least one of these sanctions but may sentence them to more than one such sanction.

Must serve at least 48 consecutive hours.

Not more than 200 hours of community service in lieu of the line.

PThis sentence may not be suspended; however, the statute is slient as to probation. ^qA person may be issued a restricted license not withstanding this revocation if certain

conditions are met.
Followed by work release for 3 days.

an lieu of fail for a driving while intoxicated conviction. Consecutively.

Suspended. dRevoked.

⁶48 hours must be served consecutively.

May not apply to certain offenders who have been suspended pursuant to the administrative per se law.

SFollowed by work release for 88 days,

Home incarceration is possible.

^UProvided the defendant either (1) had a Blood Alcohol Content (BAC) level of 0.15 or more; (2) was driving 30 MPH over the speed limit and had a BAC level of 0.10 or more; (3) was eluding a police officer and had a BAC level of 0,08 or more; or (4) refused to

Van addition a chemical test.

Temporary restricted license may be issued only for the purpose of attending either an alcohol education or treatment program.

Or 14 days in a treatment facility.

XWork release is available for this period of time.

²In lieu of imprisonment for 30 days, 8 hours of community service may be substituted for each day less than 30 days that the person would have served in Juli. ^{aa}involving at least 40 hours. ah.

ab Applies to subsequent offenses of violating the laws related to driving while intoxicated. ac Does not apply to illegal per se offense; this sanction only applies to "regular" driving

while intoxicated offenses.

ad Must serve 48 consecutive hours; does not apply to illegal per se offenses.

aeThis revocation may not be mandatory if the defendant meets, certain eligibility requirements for and does participate in a driver rehabilitation or improvement program.

al One day imprisonment or 24 hours of community service if rehabilitation is taken.

^{ag}5 days if rehabilitation is taken; 48 hours must be served consecutively, ah Three consecutive 24 hour periods in a house of correction and seven consecutive 24 hour periods in a driving while intoxicated detention center.

A Mandatory treatment of not less than 12 or more than 48 hours; this time is to be spent in

an intoxicated driver resource center,

al Not more than 90 days as an alternative to imprisonment,

The law states that the right to operate a motor vehicle is "forfeited."

all there is no imprisonment sanction, the defendant must serve either 48 consecutive hours of inpatient rehabilitation/reatment or 10 days of community service.

am Plus the following mandatory surcharges: first offense--\$50; second offense--\$100; and

third offense-\$200.

an Could be 5 years under the habitual offender law.

ao As a part of probation.

ap Applies to driving while intoxicated offenses that are not related to injury or death.

Note: State and Federal controlled substances acts (CSA's) regulate the possession, use, sale, distribution, and manufacture of specified drugs or categories of drugs and establish penalties for CSA violations. The information in this table summarizes the major elements of each State CSA. The data are derived from published State codes and the most recent code supplements available as of December 1990. CSA amendments that took effect after that time and clarifications of statutory provisions obtained through conversations with State officials also comprise this summary information. The information presented is pre-liminary and subject to revision by the Source.

"Forfeiture" may involve civil proceedings against property, criminal proceedings that require prosecutors to prove their cases beyond a reasonable doubt, and administrative proceedings not judicial in nature that occur when no one claims an interest in property valued under a specified amount.

"Paraphernalia" includes any equipment, product, or material intended for use in manufacturing, converting, preparing, injecting, inhaling, or otherwise introducing into the human body a controlled substance. "Imitation drugs" are non-controlled substances which, by

appearance and representations made, would lead a reasonable person to believe that the substance is a controlled substance. These are also called "look-alike" drugs, "Analogs" refer to substances having a chemical structure substantially similar to that of a controlled substance, but which have a similar or substantially greater effect on the central nervous system than the represented controlled substance. Analogs are also called "designer drugs," "Safehouses" are structures used primarily for the manufacture, storage, distribution, and use of controlled substances. "Schoolyards" refers to provisions relating to controlled substance violations on or within a specified distance from schoolyards. "Triplicate prescriptions" indicates that a State has provisions requiring the use of triplicate prescription forms for certain drugs. "Precursor chemicals" are compounds essential to the manufacture of controlled substances.

	Delivery to minor	Crime	Imprisonment not less than 5 years, or fine not more than \$2,500, or both

Note: This research was conducted by Abt Associates Inc., for the U.S. Department of Justice, National Institute of Justice. The statutory information was gathered primarily from responses to a national survey of criminal justice professionals and a review of recent legislation and case law. Alaska, Hawaii, Iowa, Michigan, and Wisconsin have recent legislation and case law. Alaska, Hawaii, lowa, Michigan, and Wisconsin have no statutes pertaining to drug paraphernalla. Drug paraphernalia generally refers to "equipment, products, and materials of any kind which are used, intended for use, or designed for use, in planning, propagating, cultivating, growing, harvesting, manufac-turing, compounding, converting, producing, processing, preparing, testing, analyzing, packaging, repackaging, storing, containing, concealing, injecting, inpesting, inhaling, or otherwise introducing into the human body a controlled substance. . ." (excerpted from the Model Drug Paraphernalia Act 1979 (Source, pp. 69, 70)).

 $^{ extsf{C}}$ State statute is not patterned on the Drug Enforcement Administration's Model Drug State statute is not patterned on the Drug Enforcement Administration's Model D Paraphernalia Act.

Criminally using drug paraphernalia in the first degree.

Criminally using drug paraphernalia in the second degree.

Without permission of parent or custodian, or a document purporting to show the

minor's age to be 18 or older. ⁹Endangering the welfare of a minor.

Source: Kerry Murphy Healy, State and Local Experience with Drug Paraphernalia Laws, U.S. Department of Justice, National institute of Justice (Washington, DC: U.S. Department of Justice, 1988), pp. 111-136. Table adapted by SOURCEBOOK staff.

a bt least three years younger. bUnless minors are excluded from store or room with drug paraphernalia.

Public attitudes toward crime and criminal justice-related topics

Surveys of public opinion focusing on criminal justice topics are conducted periodically in the United States. These surveys are conducted by public opinion research organizations for political campaigns or in general social surveys; others are conducted for governmental agencies or commissions concerned with specific problems. Selected populations such as high school seniors or college students have been the focus of some opinion surveys. In this edition, the results of a drug survey of fifth and sixth graders and a survey of State and Federal judges are also featured. Results from a variety of public opinion polls, examining attitudes toward particular social problems are presented in this section.

Public attitudes about problems facing the country and the public schools; public confidence in selected institutions such as the police, courts, and the U.S. Supreme Court; and attitudes toward the honesty and ethics of lawyers and police officers are presented in this section. Knowledge of police brutality and public attitudes regarding police use of force have been examined. Also examined through recent public opinion surveys are attitudes about teenage violence and public support for Federal anti-drug efforts. Perceptions of changes in the level of crime in one's own area and the country as a whole are presented as are attitudes toward crime reduction measures and perceived personal safety. Also presented are opinions on the severity of courts and the level of spending on crime reduction efforts and the drug problem. Attitudes regarding punishment responses, including the death penalty and other punishments are provided. Issues surrounding firearms, e.g., possession, sale, and registration, have been examined through opinion surveys and are presented as well. In addition, judges' attitudes regarding the jury system, and their perceptions of the causes of delay in litigation are examined. High school seniors' attitudes and beliefs about social problems, honesty and performance of the police and courts, harmfulness of drug use, and the legalization of marihuana are provided. Attitudes of college freshmen regarding marihuana legalization are included; as are their beliefs about criminals' rights, capital punishment, and AIDS testing. Attitudes of fifth and sixth graders have been examined in terms of knowledge about drugs, perceived prevalence of drugs, and respondents' intentions to try drugs in the future. Finally, public attitudes about designated drivers, pornography, child abuse, and gambling are examined.

When available, survey results are broken down by demographic characteristics of respondents--such as age, sex, race, income, and occupation--enabling comparisons across important social dimensions. Finally, because some questions have been asked repeatedly, many trend tables have been constructed by *Sourcebook* staff and are presented.

Two appendices are included which outline survey sampling procedures, methodology, and definitions of terms used in the surveys. Appendix 5 describes procedures used in The Gallup Poll, The Harris Survey, the Yankelovich Clancy Shulman Poll, and the Media General/Associated Press Poll. Also included in Appendix 5 is a description of the General Social Survey (GSS) conducted by the National Opinion Research Center. The GSS is an annual survey of a national probability sample that has been conducted each year since 1972 (with the exception of 1979 and 1981). Appendix 6 describes two surveys focusing on the behaviors and attitudes of high school seniors and young adults. The Monitoring the Future Project provides data from nationwide surveys of high school seniors conducted annually since 1975 by the Institute for Social Research at the University of Michigan. The second survey, also conducted by the Institute for Social Research for the National Institute on Drug Abuse. focuses on the attitudes of high school seniors and young adults toward drinking and drug use.

Readers should be aware that many factors, including slight differences in the wording of survey questions, may have significant effects on survey responses. In addition, the margin of error for survey results, presented in Appendix 5, may vary slightly between surveys. Thus, attention to the exact wording of questions and the appropriate estimate of error, should always accompany comparisons between tables.

Table 2.19

Reported knowledge of police brutality

United States, 1965 and 1991

Questions

A. "In some places in the nation, there have been charges of police brutality. Do you think there is any police brutality in your area, or not?"

	1965	1991
Yes	9 %	35 %
No	78	60
Don't know	13	5

1991

B. "How frequently do you think incidents like this happen in police departments across the country? Do you think they happen very frequently, somewhat frequently, not very frequently, or not at all?"

Very frequently	22 %
Somewhat frequently	46
Not very frequently	27
Not at all	2
Don't know	3

C. "How frequently do you think incidents like this happen in your local police department in your area? Do you think they happen very frequently, somewhat frequently, not very frequently, or not at all?"

	1991				
Very frequently	5 %				
Somewhat frequently	15				
Not very frequently	45				
Not at all	32				
Don't know	3				

D. "Do you happen to know anyone who has been physir-ally mistreated or abused by the police?"

1551
20 %
80
(a)

E. "How about yourself, have you ever been physically mistreated or abused by the police?"

	1991
Yes	5 %
No	95
Don't know	(a)

Note: See Note, table 2.18. For a discussion of survey sampling procedures, see Appendix 5.

Attitudes toward the level of spending to deal with drug addiction

By demographic characteristics, United States, selected years 1978-90^a

Question: "We are faced with many problems in this country, none of which can be solved easily or inexpensively. I'm going to name some of these problems, and for each one I'd like you to tell me whether you think we're spending too much money on it, too little money, or about the right amount. First (dealing with drug addiction) are we spending too much, too little, or about the right amount on (dealing with drug addiction)?"

Respondents agreeing too little is spent on selected problems in the country

United States, selected years 1973-90

Question: "We are faced with many problems in this country, none of which can be solved easily or inexpensively. I'm going to name some of the problems, and for each one I'd like you to tell me whether you think we're spending too much money on it, too little money, or about the right amount. First (problem) are we spending too much, too little, or about the right amount on (problem)?"

(Percent agreeing too little)

	1973	1974	1975	1976	1977	1978	1981	1982	1983	1984	1985	1986	1987	1988	1989	1990

Attitudes toward crime deterrence

By demographic characteristics, United States, 1989

Question: "To lower the crime rate in the U.S., some people think additional money and effort should go to attacking the social and aconomic problems that lead to crime, through better education and job training. Others feel more money and effort should go to deterring crime by improving law enforcement with more prisons, police and judges. Which comes closer to your view?"

	Attack social problems	Improve law enforcement	No opinion	
National	61 %	32 %	7 %

Table 2.45

Judges' perceptions of the most serious causes of delay in litigation⁸

By type of judge United States, 1987

Ouestion: "Which of the following would you say are the most serious causes of delays in your jurisdiction?"

Reported causes of delay	Federal judges (N=199)	State judges (N=797)	
Abuse of the discovery process	45 %	34 %	
Too few judges for the caseload	21	27	
Inadequate staff and administrative support for judges	4	14	
The way the calendar is set and managed	4	6	
Incompetence of counsel	. 14	10 .	
Deliberate abuse of the litigation process by lawyers	7	5	
Insufficient discretion given to judges	1.	2	
The number of frivolous suits and frivolous defenses without merit	18	9	
Unavailability of counsel	8	13	
Lack of alternatives to the use of the the court system	2	4	
The unwritten rules and common practices of how cases are managed in the courts	1	,4	
Lawyers who take more cases than they can handle effectively	13	26	
Deliberate abuse of the litigation process by plaintiffs or defendants	2	3	
Judges who don't pull their weight	. 2	2	
Not sure	5	5	

Note: These data are from a telephone survey of nationwide cross-sections of State and Federal trial judges conducted by Louis Harris and Associates, Inc. for Aeina Life and Casualty. The survey was limited to judges who spend more than half of their time on general civil cases, including torts, contracts and personal injury cases. Excluded from the survey were all administrative and appellate judges, and all trial judges who spend more than half their time on criminal, family, probate, admiralty, tax, customs, bankruptcy, or small claims cases. Of those judges who were eligible and who were approached, 62 percent agreed to be Interviewed. The survey was conducted from October through December 1987. Federal judges were interviewed in all States except Maine, Vermont, North Dakota, Idaho, Nevada, Alaska, and Hawaii. State judges were interviewed in every State except Delaware, Hawaii, and Alaska. A total of 200 Federal and 800 State judges participated in the survey. These data are estimates derived from a sample and therefore subject to sampling variation.

Table 2.46

Federal judges' attitudes toward various statements about the jury system

United States, 1987

Question: "Let me read you some statements about jurors and juries. Please say for each one if you agree or disagree."

	Agree	Disagree	Not sure	Depends/ neither
Jurors usually make a serious effort to apply the law as they are instructed	99 %	0 %	0 %	1 %
A serious study should be made of aiternatives to trial by jury for certain types of cases	63	36	. 1	1
The feelings jurors have about the parties often cause them to make inappropriate decisions	18	80	2	. 1
For routine civil cases, the right to trial by jury is an essential safeguard which must be retained	77	22	. 1	1,
Too often jurors fall to apply the law because they are not able to understand the law	24	73		3

Note: See Note, table 2.45.

Attitudes toward the purpose of prisons

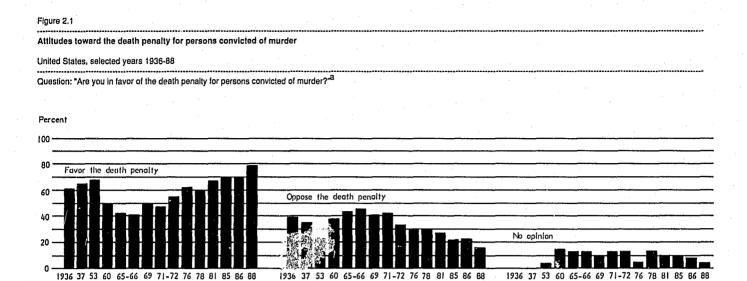

By demographic characteristics, United States, 1989

Question: "In dealing with those who are in prison, do you think it is more important to punish them for their crimes, or more important to get them started 'on the right road'?"

Note: These data are from a series of nationwide surveys of high school seniors conducted by the Survey Research Center of the Institute for Social Research from 1975 through 1990. The survey design is a multistage random sample of high school seniors in public and private schools throughout the continental United States. All percentages reported are based on weighted cases; the N's that are shown in the tables refer to the number of weighted cases.

based on weighted cases; the N's that are shown in the tables refer to the number of weighted cases.

Response categories were "never," "seldom," "sometimes," and "often." Readers interested in responses to this question for 1975 through 1977 should consult previous editions of SOURCEBOOK. For survey methodology and definitions of terms, see Appendix 6.

Note: See Note, table 2.57. Data are given for those who identify themselves as White or Caucasian and those who identify themselves as Black or Afro-American because these are the two largest racial/ethnic subgroups in the population. Data are not given for the other ethnic categories because these groups comprise less than 3 percent of the sample in any given year (Source, 1982, p. 9). "College plans" distinguishes those seniors who expect to graduate from a 4-year college from those who expect to receive some college training or none. The four drug use categories are based on an index of seriousness of involvement. The "pills" category indicates use of any of a number of drug including some that usually are not taken in pill form. Respondents indicating the use of one or more ocasions and did not use heroin at all fall into the "few pills" category. Respondents indicating such use on three or more occasions and did not use heroin at all fall into the "few pills" category. Respondents indicating such use on three due to the small number of respondents indicating such use. (Source, 1982, pp. 8, 9, 14.)

Response categories were "never," "seldom," "sometimes," and "often." Readers Interested in responses to this question for 1975 through 1977 should consult previous editions of SOURCEBOOK. For survey methodology and definitions of terms, see Appendix 6.

Note: These data are from a series of nationwide surveys of high school seniors conducted by the University of Michigan's Institute for Social Research for the National Institute on Drug Abuse from 1975 through 1990. The survey design is a multistage random sample of high school seniors in public and private schools. Depending on the survey year, from 66 to 80 percent of the schools initially invited to participate agreed to do so. Completed questionnaires were obtained from 77 to 84 percent of all sampled students in participating schools each year. All percentages reported are based on weighted cases; the N's that are shown in the tables also refer to the number of weighted cases. "Crack" is a highly potent and addictive form of cocaine. Alcohol and cigarette use are included in selected tables. Readers interested in responses to this question for 1975 through 1977 should consult previous editions of SOURCEBOOK. For survey methodology and definitions of terms, see Appendix 6.

^aAnswer alternatives were: (1) no risk, (2) slight risk, (3) moderate risk, (4) great risk, and (5) can't say, drug unfamiliar.

1990	18.6	21,7	16,0			

Note: The American Freshman Survey is conducted annually by the Cooperative Institutional Research Program (CIRP) of the Higher Education Research Institute at the University of California, Los Angeles. Each fall, the CIRP surveys approximately 200,000 full-time students entering the freshman classes from a nationally-representative sample of two-year and four-year colleges and universities in the United States. From 1968 to 1970, approximately 15 percent of the Nation's institutions of higher education were selected by sampling procedures to participate in the program. Beginning in 1971, a stratified sample was selected from all institutions that have entering freshman classes and that respond to the U.S. Department of Education's Higher Education General Information Survey. An institution is considered eligible if it was operating at the time of the survey and if it had a freshman class of at least 25 students. The data presented above are weighted estimates of all first-time, full-time students entering higher education institutions in the fall of each year. Response categories were "agree strongly," "agree somewhat," "disagree somewhat," and "disagree strongly." The text or format of the questions or responses may differ slightly in different years.

Table 2.81

Fifth and sixth graders' knowledge of drug use

By type of drug, United States, 1990

Questions: "Do you know any adults or older kids who have tried or who use...? Do you know any kids your own age who have tried or who use...?"

Type of drug	Adults cr older klas	Kids your own age	
Beer	77 %	34 %	
Wine or liquor	64	26	
Marihuana	15	5	
Cocaine or crack	10	2	
lce ⁸ .	3	2	
Ecstasy ^b	1	1	

Note: These data are from a national telephone survey conducted by NFO Research, Inc. for Edelman Public Relations. Households were selected from NFO's nationally-representative panel of 250,000 households. This panel was selected to be comparable to U.S. Bure of the Census data in its distribution of geographic region, market size, age of household nead, household size, and household income. A total of 500 interviews were conducted with fifth or sixth grade children in NFO panel households. Prior to telephoning, a letter was malled to 1,700 panel members with children between the ages of 10 and 12. The letter explained the purpose of the study and the areas of questioning and asked for cooperation with the study. Five hundred interviews, evenly divided between fifth and sixth graders, were conducted between Apr. 20 and May 2, 1990. Students who had participated in the Drug Abuse Resistance Education (DARE) program, a preventive education program for school children, were not interviewed, interviewed households were regionally and demographically comparable to total U.S. households with children between the ages of 10 and 12. These data are estimates derived from a sample and therefore subject to sampling variation.

alce is a smokable form of methamphetamine.

bEcstasy is the street name for MDMA, an illegal stimulant with hallucinogenic properties.

Table 2.96

Attitudes toward allocation of government resources for the fight against drugs

By demographic characteristics, United States, 1990

Question: "There are many things our government is doing to fight drug use. Which one of the following activities in the government's fight against drugs do you think deserves the most money and effort: Teaching young people about the dangers of drugs; helping drug users overcome their addiction to drugs; working with foreign governments to stop the export of drugs to this country; arresting people in this country who sell drugs; or arresting the people who use drugs?"

	Teach the young	Help to overcome addiction	Work with foreign gov- ernments	Arrest sellers	Arrest users	No opinion

Reported frequency of selecting a designated driver

By demographic characteristics, United States, 1989^a

Question: "Some U.S. communities are promoting a "designated driver" concept as a way to prevent highway deaths. At places or in situations where alcohol is served, a person is selected, on a voluntary basis, to be the designated driver. This person refrains from drinking any alcoholic beverages and takes responsibility for driving his or her companions home safely. At social occasions like this, do you and your friends select a "designated driver" all of the time, most of the time, not very often, or payer?" or never?"

Attitudes toward pornographic material leading to rape

By demographic characteristics, United States, selected years 1973-90^a

Question: "The next questions are about pornography--books, movies, magazines, and photographs that show or describe sex activities. I'm going to read some opinions about the effects of looking at or reading such sexual materials. As I read each one, please tell me if you think sexual materials do or do not have that effect:

Sexual materials lead people to commit rape."

Nature and distribution of known offenses

The data presented in this section describe the nature and extent of criminal activity. There are essentially three ways in which the level of crime is measured--through officially recorded data, victimization surveys, and through self-reports of criminal involvement. Because It is well-known that many crimes are not reported to the police, surveys of the population and selected subgroups have been utilized to provide an additional perspective on the extent of criminal activity. Two methods have been most commonly used: (1) surveys of households and businesses to determine the rate of victimizations and characteristics of victims of criminal acts and (2) surveys of the general population to determine the proportion and characteristics of persons who have committed criminal offenses. The former are known as victimization surveys, while the latter involve selfreported criminal activity.

This section begins with Information presented from the National Crime Survey (NCS), which is conducted for the Bureau of Justice Statistics by the U.S. Bureau of the Census. The NCS is a national probability survey of households in the United States. Detailed information is provided on the extent and nature of completed and attempted crimes, frequency of occurrence, characteristics of victims and offenders, victim-offender relationships, the circumstances surrounding criminal incidents and their impact, associated economic costs, and reasons for reporting and not reporting crimes to the police.

In addition to the presentation of general NCS findings, this section presents specific data on female victims, based on victimizations reported to the NCS over a number of years. Information is presented on selected victim characteristics and victim-offender relationships. Also provided are more detailed data on rape victimizations, including time and place of occurrence, self-protective measures taken, injuries sustained by the victim, and reasons for reporting or not reporting the rape to the police. Detailed data on handgun crimes reported to the NCS are also presented.

The next segment contains information from the Monitoring the Future Project. This project conducts a series of nationwide surveys of high school seniors. Information on victimization experiences and involvement in delinquent activities is gathered annually. This segment also contains information derived from a survey on drug use and related attitudes of high school seniors, college students, and young adults in the United States. Data are presented on most recent use of alcohol, cigarettes, and drugs. Drugs

examined include marihuana, cocaine, crack, heroin, inhalants, sedatives, stimulants, tranquilizers, hallucinogens, and steroids.

Also included in this section are data derived from the 1988 and 1990 National Household Survey on Drug Abuse. Information is presented on drug use among the Nation's population age 12 and older. Prevalence and recency of use figures are presented for various types of drugs as well as needle use. Data are also presented on reported problems resulting from alcohol, drug, and cigarette use. In addition, data derived from the Gallup Poll on alcohol use and related problems are included.

The final part of this section presents data on officially recorded crime figures. The Federal Bureau of Investigation collects information on crimes known to the police through its Uniform Crime Reporting (UCR) Program. Nationwide data on crimes are collected and tabulated by city, county, Metropolitan Statistical Area, population group, and geographic division. Offense characteristics and situational factors of violent crime, property crime, and the eight index offenses are presented. Included among the situational factors are type of target, type of weapon used, victimoffender relationship, circumstances of the offense, selected demographic characteristics of the victim (i.e. sex, race, age), offender characteristics, and place and time of occurrence. Also, data are presented on the involvement of guns in violent crime for States and large U.S. cities.

Also included in this section is information on alcohol involvement in automobile crashes as well as data on motor vehicle thefts and Federal bank robberies. In addition, this section contains information on the number of law enforcement officers who were assaulted and killed in the United States. Data are presented on the circumstances at the scene of the incident, type of assignment, selected characteristics of officers (i.e. race, sex, age, length of service), persons identified in the killing of law enforcement officers, and the type of weapon used. Information is also provided on prison staff killed by inmates.

This section concludes with information presented on bombing incidents, loss due to incendiary or suspicious fires, casualties resulting from international terrorism, criminal acts involving aviation, and Federal Crime Insurance policies.

Note: The National Crime Survey (NCS) is conducted for the Bureau of Justice Statistics by the U.S. Bureau of the Census. These estimates are based on data derived from a continuous survey of a representative sample of housing units in the United States. Approximately 48,000 housing units, inhabited by 97,000 individuals age 12 and over, participated in the survey. For 1989, 96 percent of all eligible housing units took part in the NCS. For survey methodology and definitions of terms, see Appendix 7.

^aSubcategories may not sum to total because of rounding.

Note: See Note, table 3.1. Slight changes in the classification of the personal crimes of robbery and assault occurring in commercial establishments were made beginning in 1985. Data for 1984 have been adjusted to account for this change and will differ slightly from previous years' presentations. Data for 1987 have been revised by the Source and therefore will differ from figures provided in the 1988 SOURCEBOOK. For survey methodology and definitions of terms, see Appendix 7.

Unspecified	0,9	0.7	
Other person whom victim knew	27.3	26.8	
Stranger	44.4	65.3	
Unknown relationship	3.7	4.0	

Note: These data are based on victimizations reported to the National Crime Survey (NCS) from 1979 to 1987. The NCS is conducted for the U.S. Department of Justice, Bureau of Justice Statistics by the U.S. Bureau of the Census, and is an ongoing survey begun in 1973. Data for the National Crime Survey are drawn from a nationally-representative sample of the United States population. Sample size over the period 1973 to 1987 ranged from 49,000 to 62,000 households and 100,000 to 137,000 individuals age 12 and over interviewed from those housing units. These data are estimates derived from a sample and therefore subject to sampling variation. References to women include female adolescents but not children under age 12. For victimizations with multiple offenders (4 percent of all victimizations by intimates), the victimization was classified as being committed by the closest relative involved -- first spouse or ex-spouse and then parent, child, brother or sister, other relatives, and boyfriends. Any group of offenders that had at least one related person was included. "Ex-spouse" includes separated and divorced spouses. For survey methodology and definitions of terms used in the National Crime Survey, see Appendix 7.

Table 3.36

Estimated number and rate (per 1,000 households and per 1,000 vehicles owned) of motor vehicle theft

By age, race of head of household, and form of tenure, United States, 1989

		Household		Ve	hicles owned	
	Number	Number of thefts	Rate per 1,000	Number	Number of thefts	Rate per 1,000
Race of head of household		**************	***********			***********
All races	94.899.080	1,820,120	19.2	171,381,950	1,867,090	10.9
White	81,770,800	1,419,940	17.4	153,927,920	1,461,820	9,5
Black	10.837,100	334.050	30.8	13,571,740	339,140	25.0
Other	2,291,170	66,120	28,9	3,882,280	66 120	17.0
Age of head of household						
12 to 19 years	1.026.590	29,820	29.0	1,185,460	29,820	25,2
20 to 34 years	26,412,700	712,090	27.0	46,135,890	734,460	15.9
35 to 49 years	28,374,670	601,210	21.2	59,689,200	608,680	10.2
50 to 64 years	19,047,900	349,150	18,3	39,259,260	364,380	9.3
65 years and older	20,037,200	127,820	6.4	25,112,130	129,730	5.2
Form of tenure						
Owned or being bought	61,031,410	898,720	14.7	126,998,870	924,090	7.3
Rented	33,867,670	921,390	27.2	44,383,070	942,990	21,2

Note: See Notes, tables 3.1 and 3.11. The number of thefts based on vehicles owned is equal to or higher than the corresponding figure based on households because the former includes all completed or attempted vehicle thefts, regardless of the final classification of the event; personal crimes of contact and burglary occurring in conjunction with motor vehicle thefts take precedence in determining the final classification based on the number of households. For survey methodology and definitions of terms, see Appendix 7.

Note: See Note, table 3.1. An incident is a specific criminal act involving one or more victims. The number of incidents of personal crime is lower than the number of victimizations because some crimes are simultaneously committed against more than one individual. For survey methodology and definitions of terms, see Appendix 7.

^bEstimate is based on about 10 or fewer sample cases.

Scurce: U.S. Department of Justice, Bureau of Justice Statistics, Criminal Victimization in the United States, 1939, National Crime Survey Report NCJ-129391 (Washington, DC: U.S. Department of Justice, 1991), Table 59.

^aSubcategories may not sum to total because of rounding.

Victim-offender relationship				
Relative	32,100	5.1		
Acquaintance	107,400	17.1		
Stranger	453,100	72.0		
Unknown or unreported relationship	37,000	5.9		
Place of occurrence				
At home, in a vacation home,				
hotel, or motel	000,08	12.7		
Near home	67,100	10.7		
At a business	127,300	20.2		
In an office	В	1.3		
On the street	263,000	41.8		
In school	В	0.3		
Other locations	82,300	13.1		

Note: These data are based on victimizations involving handguns reported to the National Crime Survey (NCS) from 1979 to 1987. The NCS, conducted for the U.S. Department of Justice, Bureau of Justice, Bureau of Justice, Bureau of the Census, is an ongoing survey of approximately 114,000 persons age 12 and older, interviewed twice a year in about 52,000 households. These data are estimates derived from a sample and therefore subject to sampling variation. The crimes measured are those in which the victim reported that the offender used a handgun to threaten, to shoot at, or to shoot the victim. To threaten includes displaying the gun, waving or pointing it, and verbally threatening to use the weapon. For survey methodology and definitions of terms used in the National Crime Survey, see Appendix 7.

Note: See Note, table 3.1. The data presented for the years 1975-80 are weighted estimates based on 1970 population figures from the U.S. Bureau of the Census. Data for 1981 are weighted estimates based on a composite figure developed from 1970 and 1980 population figures. Data for the years 1982-89 are weighted estimates based on 1980 population figures, Households experiencing crime includes households experiencing burglary or theft, or those in which a household member was a victim of personal crimes of violence or theft. For survey methodology and definitions of terms, see Appendix 7.

^aDetail does not add to total because of overlap in households experiencing different crimes.

Note: See Notes, tables 3.1 and 3.56. The entries for white households experiencing crime are computed as a percent of the total number of white households, the entries for black households experiencing crime are computed as a percent of the total number of black households, and the entries for other households experiencing crime are computed as a percent of the total number of other households. "Other" households refer to those headed by an individual whose racial identification is other than white or black. For survey methodology and definitions of terms, see Appendix 7.

^bEstimates of households in urban, suburban, and rural areas for 1986-89 are not comparable to those of previous years. Geographic codes for 1986 through 1989 estimates are based upon 1980 U.S. Bureau of the Census definitions, and estimates for earlier years are based upon 1970 U.S. Bureau of the Census delinitions.

Chape, robbery, or aggravated assault.

dRape, robbery, assault by stranger, or burglary.

Note: These data are from a series of nationwide surveys of high school seniors conducted from 1975 through 1990 by the Survey Research Center of the Institute for Social Research. The survey design is a multistage random sample of high school seniors in public and private schools throughout the continental United States. All percentages reported are based on weighted cases; the N's that are shown in the tables also refer to the number of weighted cases. Readers interested in responses to this question for 1976 and 1977 should consult previous editions of SOURCEBOOK. For survey methodology and definitions of terms, see Appendix 6.

Note: See Note, table 3.58. Data are given for those who identify themselves as White or Caucasian and those who identify themselves as Black or Afro-American because these are the two largest racial/ethnic subgroups in the population. Data are not given for the other ethnic categories because these groups comprise less than 3 percent of the sample in any given year (Source, 1982, p. 9). Readers interested in responses to this question for 1976 through 1978 should consult previous editions of SOURCEBOOK. For survey methodology and definitions of terms, see Appendix 6.

^aLess than .05 percent.

Four or more	0.5	0.6	0.4	0.5	0.4	0.3	0.3	0.5	0.4	0.4	0.4	0.5	0.6

Note: See Note, table 3.58. Respondents were informed that "accident" refers to "a collision involving property damage or personal injury - not bumps or scratches in parking lots" (Source, 1982, p. 22). Readers interested in responses to this question for 1976 and 1977 should consult previous editions of SOURCEBOOK. For survey methodology and definitions of terms, see Appendix 6.

Note: These data are from a series of nationwide surveys of high school seniors conducted by the University of Michigan's Institute for Social Research for the National Institute on Drug Abuse from 1975 through 1990. The survey design is a multistage random sample of high school seniors in public and private schools. Depending on the survey year, from 66 to 80 percent of the schools initially invited to participate agreed to do so. Completed questionnaires were obtained from 77 to 84 percent of all sampled students in participating schools each year. All percentages reported are based on weighted cases; the N's that are shown in the tables also refer to the approximate number (i.e., rounded to

the nearest hundred) of weighted cases. The number of respondents for 1989 was approximately 16,700 and for 1990, 15,200 excluding cases with missing data. These data were derived from the questions indicated above. For survey methodology and definitions of terms, see Appendix 6.

Note: See Note, table 3.75. Data for the categories "inhalants" and "hallucinogens" are underestimated because some users of amyl and butyl nitrites, and PCP fail to report in these drug categories. Since 1978, the survey addresses this issue by asking specific questions about amyl and butyl nitrites (inhalants) and PCP (a hallucinogen) on one survey alternate form. The results of "his survey are used to adjust for underreporting in these drug categories. Since 1982, new questions were introduced on the use of controlled and non-controlled stimulants in order to exclude over-the-counter amphetamines, which were believed to have been inflating the statistic during 1980 and 1981. "Crack" is a highly potent and addictive form of cocaine. "Other cocaine" refers to noncrack forms of this drug. Readers interested in responses to this question for 1975 through 1977 should consult previous editions of SOURCEBOOK. For survey methodology and definitions of terms, see Appendix 6.

^aData based on four questionnaire forms in 1976-88. N is four-fitths of N indicated. Data based on five questionnaire forms in 1989 and 1990; N is five-sixths of N indicated.

Data based on a single questionnaire form. N is one-fifth of N indicated in 1979-88 and one-sixth of N indicated in 1989 and 1990.

CQuestion text changed slightly in 1987.

Data based on a single questionnaire form in 1986 (N is one-fifth of N indicated). Data based on two questionnaire forms in 1987-89; N is two-fifths of N indicated in 1987-88 and two-sixths of N indicated in 1989. Data based on six questionnaire forms in 1990.

The property of N indicated in 1989, N is one-fifth of N indicated in 1987 and 1988 and one-sixth of N indicated in 1989. Data based on four questionnaire forms in 1990; N is four-sixths of N indicated.

Only drug use which was not under a doctor's orders is included here, Data based on two questionnaire forms; N is two-sixths of N indicated,

Data based on five questionnaire forms in 1975-88, six questionnaire forms in 1989, and one questionnaire form in 1990. N is one-sixth of N indicated in 1990.

Note: See Note, table 3.75. These data are from a follow-up survey of respondents 1 to 4 years past high school who are presently enrolled in college, included are those registered years past night school with all pressing minutes in conteger, included are those registed as full-time students in March of the year in question and who report that they are enrolled in a two- or four-year college, Those individuals previously in college and those who have already completed college are excluded. The number of respondents for each year is as follows: 1980, 1,040; 1981, 1,130; 1982, 1,150; 1983, 1,170; 1984, 1,110; 1985, 1,080; 1986, 1,190; 1987, 1,220; 1988, 1,310; 1989, 1,300; 1990, 1,400.

Since 1982, new questions were introduced on the use of controlled and non-controlled stimulants in order to exclude over-the-counter amphetamines, which were believed to have been inflating the statistic during 1980 and 1981. "Stimulants adjusted" is based on the data obtained from these new questions. "Crack" is a nighly potent and addictive form of cocalne. For survey methodology and definitions of terms, see Appendix 6. ^aThis drug was asked about in four of the five questionnaire forms in 1980-89, and in five of

the six questionnaire forms in 1990.

This drug was asked about in one of the five questionnaire forms in 1986, in two of the five questionnaire forms in 1987-89, and in all six forms in 1990.

Conly drug use which was not under a doctor's orders is included here.

This drug was asked about in two of the six questionnaire forms. N is two-sixths of N indi-

Note: See Notes, tables 3.75 and 3.79. "Young adults" includes high school graduates 1 to 12 years beyond high school. These data present the prevalence for young adults combined. The number of respondents for each year is as follows: 1986, 6,900; 1987, 6,800; 1988, 6,700; 1989, 6,600; 1990, 6,700. For survey methodology and definitions of terms, see Appendix 6.

^aThis drug was asked about in four of the five questionnaire forms in 1986-89 (N was four-fifths of N indicated), and five of the six questionnaire forms in 1990 (N is five-sixths of N indicated).

This drug was asked about in one questionnaire form. N is one-fifth of N indicated for 1986-89, and one-sixth of N indicated for 1990.

1990. ^CThis drug was asked about in one of the five questionnaire forms in 1986, two of the five questionnaire forms in 1987-89, and in all six questionnaire forms in 1990. $^{
m d}$ This drug was asked about in one of the five questionnaire forms in 1987-89, and in four of the six questionnaire forms in 1990.

1990, Only drug use which was not under a doctor's orders in included

here.
Based on the data from the revised question, which attempts to exclude the inappropriate reporting of nonprescription stimulants.
This drug was asked about in two of the five questionnaire forms in 1989, and in two of the six questionnaire forms in 1990.

Note: These data are from the 1988 National Household Survey on Drug Abuse sponsored by the National Institute on Drug Abuse, the National Institute on Alcohol Abuse and Alcoholism, and the U.S. Department of Education. Households were randomly sampled from all households in the contiguous United States from September to February 1988. The 1988 Survey is the ninth in a series of surveys measuring the prevalence of drug use among the American household population aged 12 and older. For survey methodology see Appendix 8.

bNonmedical use of any prescription-type stimulant, sedative, tranquilizer, or analgesic; does not include over-the-counter drugs.

Estimates prior to 1982 for psychotherapeutics may not be comparable to those for later years due to a change in the methodology.

dEstimates prior to 1979 for alcohol may not be comparable to those for later years due to a change in methodology.

Note: These data are from the 1990 National Household Survey on Drug Abuse sponsored by the National Institute on Drug Abuse. Households were randomly sampled from all households in the contiguous United States from Mar. 12 to June 30, 1990. The 1990 Survey is the tenth in a series of surveys measuring the prevalence of drug use among the American household population aged 12 and older. For survey methodology, see Appendix 9.

Note: See Note, table 3.89. Needle use is derived from specific questions about use of cocaine, heroin, or amphetamines with a needle, and from general questions about needle use with other drugs. 1990 estimates of needle use are not comparable to those published in the 1988 Population Estimates because the 1990 estimates are based upon a more extensive set of questions about needle use. For survey methodology, see Appendix 9.

Respondents reporting problems resulting from alcohol use during the past year

By age group and type of problem, United States, 1988

			Age group						
	Totāl all ages ^a (N=5,326)	12 to 17 years (N=1,300)	18 to 25 years (N=1,161)	26 to 34 years (N=1,555)	35 years and older (N=1,310)				
Aggressive or cross while drinking	14.2 %	19.1 %	25.9 %	18.8 %	7,5 %				
Heated argument while drinking	9.4	12.7	19.8	11.4	4,6				
Stayed away from work or school	4.4	4,5	12.2	5.0	1.4				
High or tight on job or at school	4.9	9.5	12.4	5.3	1.6				
Lost or nearly lost job	1,2	(b)	2,2	. 1.4	8.0				
Partner told me I should cut down	9,3	10.6	12.5	10.3	7.5				
Relative told me I should cut down	5.8	7.4	9.8	5.5	4.3				
Friend told me I should cut down	3.7	8.4	5.5	3.9	2.3				
Tossed down drinks fast to get effect	11.0	25.0	24.6	12.1	4,1				
Afraid I might be or become alcoholic	8.0	15.5	11.0	8.0	5.9				
Stayed drunk for more than one day	3.2	4.6	6.4	3.7	1.6				
Difficult for me to stop drinking	5.6	10.1	9.0	7.8	3.0				
Unable to remember what happened	11.8	23.9	23.9	13.6	5.3				
Quick drink when no one was looking	4.4	16.6	5.9	3.1	2,8				
Drink first thing in morning	1.8	2.3	2.0	1.5	1.8				
Hands shook after drinking day before	3.4	3.7	5.8	4.2	2.2				
Got high or tight while drinking alone	12.4	12.2	16.9	16.8	9.0				
Kept on drinking after promising myself not		10.7	9.1	7.5	3.7				

Note: See Note, table 3.83. Respondents with missing data on problems are coded as not having problems. Compared with estimates based on coding missing data for nonusers or light users of alcohol as not having problems, the figures are somewhat conservative estimates of the prevalence of problems. For survey methodology and definitions of terms, see Appendix 8.

^aOnly respondents who report having had at least one drink in the past 12 months are included. bEstimates based on only a few respondents are omitted because one cannot place a high degree of confidence in their statistical accuracy.

Table 3.94

Respondents reporting problems resulting from alcohol use during the past year

By type of alcohol use and type of problem, United States, 1988^a

	Type of alcohol use						
	Drunk more than	Drunk about twice a month	Not drunk				
	twice a month	or less often	in past year				
Type of problem	(N=470)	(N=1,775)	(N=2,834)				
Aggressive or cross while drinking	53.5 %	24.6 %	4.9 %				
Heated argument while drinking	44.5	16.4	2,0				
Stayed away from work or school	23.6	7.0	0,9				
High or tight on Job or at school	30.7	7.6	0.9				
Lost or nearly lost job	9.1	0.9	0.3				
Partner told me I should cut down	42.4	14,5	3,1				
Relative told me I should cut down	32.1	7.4	2.1				
Friend told me I should cut down	23.9	4.4	٠.٥				
Tossed down drinks fast to get effect	47,7	19.8	2.7				
Afraid I might be or become alcoholic	31.8	11.1	4.1				
Stayed drunk for more than one day	27.9	3.3	0,3				
Difficult for me to stop drinking	35.6	7.6	1.2				
Unable to remember what happened	53.5	21.3	2.4				
Quick drink when no one was looking	20.0	5.0	2,4				
Drink first thing in morning	13.7	1,3	0.6				
Hands shook after drinking day before	20.5	5.1	0.5				
Got high or tight while drinking alone	47.9	22.7	3.3				
Keep on drinking after promising myself not	to 30.4	8.5	2.0				

Note: See Notes, tables 3.83 and 3.93. "Drunk more than twice a month" includes respondents who reported getting very high or drunk on alcohol 25 or more days in the past 12 months. "Drunk twice a month or less often" includes respondents who reported getting very high or drunk on alcohol at least once but no more than 24 days in the past 12 months. For survey methodology and definitions of terms, see Appendix 8.

Source: U.S. Department of Health and Human Services, National Institute on Drug Abuse, *National Household Survey on Drug Abuse: Main Findings 1988* (Washington, DC: USGPO, 1990), p. 125. Table adapted by SOURCEBOOK staff.

 $^{^{\}rm a}$ Only respondents who reported having at least one drink in the past 12 months and who reported their frequency of being drunk in the past year are included.

Table 3.95

Respondents reporting problems resulting from alcohol, drug, or cigarette use during the past year

By age group and type of problem, United States, 1988

		Age group					
Type of problem	Total all ages	12 to 17 years	18 to 25 years	26 to 34 years	35 years and older		
Became depressed or lost interest in things Had arguments and lights with family or	4,0 %	5.4%	7.4 %	6.1 %	2.0 %		
friends	4.9	6.1	9.8	8.4	2,1		
Felt completely alone and isolated	2.3	3.3	4.5	3.4	1,2		
Felt very nervous and anxious	4.9	6.0	7.9	7.8	2,8		
lad health problems	3.1	2.5	3.4	4.3	2.7		
Found it difficult to think clearly	4.8	7.1	11.3	7.0	1.8		
Felt Irritable and upset	4.6	4.2	8.6	6.8	2.9		
Got less work done than usual at school or on the lob	2.4	3.3	5.9	4.0	8.0		
Felt suspicious/mistrustful of people	2.0	3.2	4.9	2.8	0.8		
ound it harder to handle my problems	2.0	2.6	3.8	2.9	1.0		
lad to get emergency medical help	0.3	0.4	0,5	0.6	(a)		

Note: See Note, table 3.83. Respondents with missing data on problems are coded as not having problems. Compared with estimates based on coding missing data for nonusers or light users of these substances as not having problems while leaving the missing data for other users, the figures reported in this table are underestimates of the prevalence of perceived problems. The differences are small for most Individual problems, less than 1 percent. For survey methodology and definitions of terms, see Appendix 8.

Respondents reporting problems resulting from use of marihuana and cocaine during the past year

By type of use, age group, and type of problem, United States, 1988

Questions: "Have you ever tried to cut down on your use of any of these drugs? Circle the number next to each drug for which you need larger amounts to get the same effect or for which you can no longer get high on the amount you used to use before. Circle the number next to each drug you have ever used every day or almost daily for two or more weeks in a row. Circle the number next to each drug you felt you needed or were dependent on. Circle the number next to each drug for which you've had withdrawal symptoms, that is, you felt sick because you stopped or cut down on your use of it."

		Needed			
Type of use	Tried to	larger	Used	Needed;	Withdrawal
and age group	cut down	amounts	every day	dependent	symptoms
Used marihuana at				•••••••••••	
least once in past year					
Total all ages (N=1,173)	34.1 %	10.8 %	21.2 %	9.0 %	3.9 %
12 to 17 years	35.2	18,9	20.0	12.4	6.1
18 to 25 years	38.0	12.1	22.1	9.5	5.1
26 to 34 years	34.0	7.9	22.9	9.5	3.1
35 years and older	24.4	7.3	16.8	(a)	(a)
Used marihuana once a mon	th .				
or more often in past year					
Total all ages (N=1,612)	44.1	18.6	38.7	15.6	6.0
12 to 17 years	52.6	33.6	38.1	22.2	10.1

Note: These data are based on information submitted by all 50 States, the District of Columbia, and Puerto Rico to the National Center for Statistics and Analysis maintained by the National Highway Traffic Safety Administration. The National Highway Traffic Safety Administration uses an estimation procedure to derive national statistics on blood alcohol levels of motor vehicle drivers involved in fatal accidents, who were not tested or for whom blood alcohol concentration (BAC) test results are unknown. The probability of alcohol involvement of each driver for whom there is no BAC data is calculated based on known test results for people in similar accidents using specific driver and crash parameters. This procedure allows national estimates of alcohol-related motor vehicle fatalities.

Note: These data are from the first and second annual reports of overall crash statistics produced from data collected by the General Estimates System (GES) for the National Highway Traffic Safety Administration (NHTSA). The GES obtained its data from a nationally representative probability sample selected from an estimated 6.9 million police-roported traffic crashes that occurred in the United States in 1988 and from approximately 6.6 million crashes in 1989. The GES obtained a sample of approximately 49,000 police accident reports in 1988 and 44,000 reports in 1989 from 400 police agencies within 60 geographic sites across the United States. Alcohol involvement was coded by police officers when

evidence of alcohol was present. The code does not necessarily mean that a driver, passenger, or nonoccupant was tested for alcohol. These data are estimates derived from a sample and therefore subject to sampling variation.

Note: These data were compiled by the Federal Bureau of Investigation through the Uniform Crime Reporting Program. On a monthly basis, taw enforcement agencies (police, sherilfs, and State police) report the number of offenses that become known to them in the following crime categories: murder and nonnegligent manslaughter, manslaughter by negligence, forcible rape, robbery, assault, burglary, larceny-theft, motor vehicle theft, and arson. A count of these crimes, which are known as Part I offenses, is taken from records of all complaints of crime received by law enforcement agencies from victims or other sources and/or from officers who discovered the offenses. Whenever complaints of crime are determined through investigation to be unfounded or false, they are eliminated from an agency's count (Source, 1989, p. 2).

The Uniform Crime Reporting Program uses seven crime categories to establish a "crime index" in order to measure the trend and distribution of crime in the United States. Crime index offenses include murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny-theft, and motor vehicle theft; the "Total Crime Index" is a simple sum of the Index offenses. Arson was designated as a Part I Index offense in October 1978; data collection wa. hegun in 1979. However, due to the incompleteness of arson reporting by police in 1979-89, arson data are not displayed nor are they included in the Total Crime Index of the offenses known to the police.

The figures in this table are subject to updating by the Uniform Crime Reporting Program. The number of agencies reporting and populations represented may vary from year to year. This table and tables 3.109 and 3.110 present estimates for the United States or particular areas based on agencies reporting. For definitions of offenses, see Appendix 3.

^aPopulations are U.S. Bureau of the Census provisional estimates as of July 1, except for the Apr. 1, 1980 preliminary census counts, and are subject to change.

Because of rounding, the offenses may not add to totals.

Cylolent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

Data for 1988 were not available for Florida and Kentucky; therefore, it was necessary that their crime counts be estimated by the Source.

All rates were calculated on the offenses before rounding.

Note: See Note, table 3.108. These figures are aggregated from individual State statistics presented in table 3.110. These data include estimated offense totals for agencies submitting less than 12 months of offense reports (Source, p. 321). For definitions of offenses and areas, see Appendix 3.

^CThe percentage representing area actually reporting will not coincide with the ratio between reported and estimated crime totals, since these data represent the sum of the calculations for individual States that have varying populations, portions reporting, and crime rates.

Source: U.S. Department of Justice, Federal Bureau of Investigation, Crime in the United States, 1989 (Washington, DC: USGPO, 1990), p. 49, Table 2. Table adapted by SOURCEBOOK staff.

^aPopulations are U.S. Bureau of the Census provisional estimates as of July 1, 1989,

and are subject to change.

Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

Properly crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

Note: See Note, table 3.108. These data include estimated offense totals for agencies submitting less than 12 but more than 2 months of offense reports (Source, p. 321). For definitions of offenses and areas, see Appendix 3.

dForcible rape figures (urnished by the State-level Uniform Crime Reporting (UCR)
Program administered by the Illinois Department of State Police were not in accordance
with national UCR guidelines. The 1989 forcible rape totals for Illinois were estimated by
the Source using the national rate of forcible rapes when grouped by like agencies,
Therefore, only the State total is shown.

Source: U.S. Department of Justice, Federal Bureau of Investigation, *Crime in the United States*, 1989 (Washington, DC: USGPO, 1990), pp. 58-68. Table adapted by SOURCE-BOOK staff.

a Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. b Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

are not included for the property crime of arson.

Cincludes offenses reported by the Zoological Police.

Note: See Note, table 3.108. These data represent all law enforcement agencies submitting complete reports for at least 6 common months in 1988 and 1989 (Source, p. 322). Forcible rape figures furnished by the State-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines and were excluded by the Source from the forcible rape, violent crime, and Total Crime Index categories. Data for 1988 were not available for Florida and Kentucky; therefore, these States were omitted by the Source. For definitions of offenses, suburban and rural areas, see Appendix 3.

^bProperty crimes are offenses of burglary, larceny-theft, and motor vehicle theft.

Data are not included for the property crime of arson.

Cincludes State police agencies with no county breakdown.

Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.

Source: U.S. Department of Justice, Federal Bureau of Investigation, *Crime in the United States*, 1989 (Washington, DC: USGPO, 1990), pp. 148, 149. Table adapted by SOURCEBOOK staff.

^aViolent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

Note: These data were compiled by the National Rifle Association of America, Institute for Legislative Action from data provided by the Federal Bureau of Investigation's Uniform Crime Reporting Program and the Supplementary Homicide Report for 1989. The gun-related calculations for the "United States, total" are projections based on incomplete reports from 49 States. Florida was excluded by the Source due to reporting problems. In addition, some data for the "United States, total" will differ from presentations elsewhere in SOURCEBOOK due to the exclusion of Florida.

alincludes murder and nonnegligent manslaughter.

Source: Table provided to SOURCEBOOK staff by the National Rifle Association of America, Institute for Legislative Action; data were made available through the Federal Bureau of Investigation's Uniform Crime Reporting Program.

Excludes Florida.

Che Uniform Crime Reporting Program estimates the percentage of gun-related crime. These percentages are used to estimate the rate.

Note: See Note, table 3.108. Arson is shown only if 12 months of arson data were received. The Modified Crime Index is the sum of the Crime Index oftenses, including arson. For definitions of offenses, see Appendix 3.

^aForcible rape figures furnished by the State-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. Therefore, the figures were excluded from the forcible rape, Total Crime Index, and Modified Crime Index categories.

^bData for 1988 were not available for Florida and Kentucky. ^cAggravated assault figures for 1988 are not comparable with previous years.

990	7,009	337,900	24	92	184	448	1,180	4,643	310	128

Note: The National Park Service is responsible for the administration of 335 park areas that are owned by the Federal Government. Three urban park areas are policed by the U.S. Park Police, whereas other park areas are policed by the U.S. Park Rangers. The offense categories listed above are the Uniform Crime Reports Part I offenses; see Appendix 3 for definitions. Note, however, that these offenses are not counted in the Federal Bureau of Investigation figures. Beginning in 1985, total annual visitation figures are rounded by the Source. In 1975, the "Human Kindness Day"

activities held in Washington, DC accounted for approximately 500 robbery incidents in that year.

Source: Table provided to SOURCEBOOK staff by the U.S. Department of the Interior, National Park Service.

^aIncluded in tabulations as a Part I offense beginning in 1981.

Note: See Note, table 3.108. In trend tables "constructed" or "adapted" by SOURCEBOOK staff from Crime in the United States, the data were taken from the first year in which the data were reported. It should be noted that the number of agencies reporting and the populations represented vary from year to year.

The Uniform Crime Reporting Program requests that additional information be transmitted to the FBI when a murder has been committed. The actual number of offenses presented in the tables displaying characteristics of murders known to the police may differ from figures in other tables that reflect data from only the initial report on the offense.

Source: U.S. Department of Justice, Federal Bureau of Investigation, *Crime In the United States*, 1964, p. 104, Table 16; 1965, p. 106, Table 16; 1966, p. 107, Table 20; 1967, p. 112, Table 20; 1968, p. 108, Table 20; 1969, p. 106, Table 21; 1970, p. 188, Table 21; 1971, p. 114, Table 21; 1972, p. 188, Table 24; 1973, p. 8; 1974, p. 18; 1975, p. 18; 1976, p. 10; 1977, p. 11; 1978, p. 12; 1979, p. 11; 1978, p. 12; 1979, p. 11; 1980, p. 12; 1981, p. 11; 1983, p. 10; 1984, p. 10; 1985, p. 10; 1986, p. 10; 1986, p. 10; 1988, p. 12; 1989, p. 11 (Washington, DC: USGPO). Table constructed by SOURCEBOOK staff.

Percent distribution of murders and nonnegligent manslaughters known to police

By type of weapon used and region, 1989

				Type of	weapon	
Region		Total ^a	Firearm	Knite or other cutting instrument	Unknown or other dangerous weapon	Personal weapons (hands, fists, feet, etc.)
Northeast	******	100.0 %	60.1 %	19.9 %	13.2 %	6.8 %
Midwest		100.0	58.8	18.6	15.7	6.9
South		100.0	65.8	17.5	12.3	4.4
West		100.0	61.6	17.9	15.2	5,3
Total		100.0	62.4	18.2	13.8	5.5

Note: See Notes, tables 3.108 and 3.118. In this table, strangulations are classified in the "unknown or other dangerous weapon" category rather than in the category "personal weapons," as was done in table 3.118. For a list of States in regions, see Appendix 3.

^aBecause of rounding, percents may not add to total.

Source: U.S. Department of Justice, Federal Bureau of Investigation, Crime in the United States, 1989 (Washington, DC: USGPO, 1990), p. 11.

^aThis category includes beatings and strangulations. Pushed is also included in personal

weapons.

This category includes drownings, arson, poison, explosives, narcotics, asphyxiation, etc.

Because of rounding, percents may not add to total.

Data for 1988 were not available for the States of Florida and Kentucky; therefore, these States were omitted by the Source,

Note: These bank crime statistics were compiled by the Federal Bureau of Investigation.
Violations of the Federal Bank Robbery and Incidental Crimes Statute include robbery, burglary (entry of bank and/or theft from bank during non-business hours), and larceny (theft not involving direct confrontation between offender and bank personnel or customers) of commercial banks, savings and loan institutions, and credit unions. Violations of the Hobbs Act involve extortion and kidnaping of bank officials or their families.

Note: These data were compiled from reports of investigations conducted by the Federal Bureau of Investigation, the U.S. Department of the Treasury, the U.S. Postal Service, and the U.S. Capitol Police. The Federal Bureau of Investigation is responsible for the Investigation of assaults on personnel of the U.S. Department of the Interior, the U.S. Department of Justice, and the Federal judiciary. Customarily, the U.S. Department of the Treasury, the U.S. Postal Service, and the U.S. Capitol Police Investigate assaults against officers assigned to their agencies. All assaults and threats of assault are included in the analysis even though no injury to an officer may have resulted, as are assaults that resulted in the death of an officer.

^aNumber of offenders not reported for Bureau of Prisons during 1988. ^bIncrease in immigration and Naturalization Service figures due to changes in reporting procedures, ^CDecrease in Internal Revenue Service figures due to change in reporting procedures.

Note: These data are based upon the number of agencies reporting assaults to the Uniform Crime Reporting Program during the particular year. Data for 1989 are based on 9,213 agencies covering approximately 76 percent of the total population; 1988 are based on 8,866 agencies covering approximately 76 percent of the total population; 1987 are based on 8,957 agencies covering approximately 78 percent of the total population; 1986 are based on 9,755 agencies covering approximately 81 percent of the total population; 1985 data are based on 9,906 agencies covering approximately 83 percent of the total population; 1984 data are based on 10,002 agencies covering approximately 83 percent of the total population; 1983 data are based on 9,908 agencies covering approximately 85

percent of the total population; 1982 data are based on 8,829 agencies covering approximately 76 percent of the total population; 1981 data are based on 9,020 agencies covering approximately 78 percent of the total population; 1980 data are based on 9,235 agencies covering approximately 81 percent of the total population.

Note: This information was collected through a survey of the 50 States, the District of Columbia, and the Federal Bureau of Prisons, conducted during the Summer and Fall of 1990. Utah did not respond to the survey. Colorado reported that information on the number of staff killed was not available, information was incomplete for Louisiana. All other States reported no staff homicides during the period surveyed.

The Source presents the information as submitted by the responding agencies. No at-

tempt was made by the Source to verify the information received

Capital murder, robbery I, escape I.

The inmate was also placed in protective custody.

h_{Murder}.

The inmate lost an unspecified amount of good time.
Assault less than murder and murder 2nd degree.
Maximum security.

Voluntary manslaughter.

Inmate was sentenced to solitary confinement; length of time unknown.

Source: CEGA Publishing, *Corrections Compendium* (Lincoln, NE: CEGA Publishing, November 1990), pp. 8, 9. Table adapted by SOURCEBOOK staff. Reprinted by permission.

a Former inmate's friends were also charged, b Capital murder, armed violence, and armed robbery. Capital murder. d Felony murder.

^eJuvenile segregation until transfer to adult facility.

ⁿAssailant was a civilian who was assisting an inmate in an escape.

Threats to U.S. Department of the														
Treasury facilities	44	- 33	22	35	22	24	10	9	.7	8	6	10	7	5

Note: These figures are from reports to the Bureau of Alcohol, Tobacco and Firearms (ATF) and other law enforcement agencies; these reports may not include all explosives incidents. "Explosives incidents" are any explosives-involved situation impacting on ATF jurisdiction "Bombings" are any incident in which a device constructed with criminal intent and using high explosives, low explosives, or blasting agents explodes. "Attempted bombings" are incidents in which a device designed or purposely contrived to detonate/ignite fails to function, intent of activity was criminal in nature. This pertains to malfunctioning, recovered, and/or disarmed devices, "Incendiary bombings" are criminally-motivated bombing incidents in which an incendiary/chemical device that induces burning is used. "Hoax devices" are

inactive or "dummy" devices designed to appear as bombs or explosive materials. (Source, 1989, pp. 69, 70.)

Bombing figures for the years 1976 and 1977 include 30 and 21 criminal accidents, respectively, that were separately enumerated by the Source.

Note: Detailed Information concerning each bombing incident reported as occurring in the United States, Puerto Rico, Guam, and the Virgin Islands is submitted by FBI field offices to the Uniform Crime Fleporting Program. Local and State public safety agencies bring incidents within their jurisdictions to the attention of the field offices. Because not all bombing incidents constitute Federal violations within the FBI's investigative purview, these other law enforcement agencies facilitate the reporting of occurrences and details of the incidents.

Bombing incidents refer to actual and attempted detonations of explosive or incendiary devices in violation of a State, local, or Federal law. Excluded from the tabulations are threats to bomb, hoax bomb devices, accidental explosions, recoveries of explosive or incendiary devices, and such misdemeanor offenses as the illegal use of fireworks. (Source, 1989, p. 4.)

a Figures may not add to total because of rounding.
b Includes major bombing incidents resulting in an unusually high number of personal injuries and deaths, or substantial damage to property.
c Includes 27 incidents involving combination devices.
d Includes 30 incidents involving combination devices.

⁶The Source began reporting by millions of dollars in 1989. Previous editions reported by thousands of dollars.

^aincludes only those incidents for which a target was clearly designated.

Note: See Note, table 3.152. "Blasting agents" refers to a specific type of explosive that can be classified as either a low or high explosive depending on how it is used. For this reason, it is separately enumerated. "RDX" refers to an extremely powerful explosive manufactured by the U.S. Army and found, in small quantities, in blasting caps, shells, and bombs.

^COther specific types of explosives were identified and combined in this category due to the small quantities involved.

Table 3.157

Deaths, injuries, and property damage resulting from criminal bombings and accidental explosions

Reported to the Bureau of Alcohol, Tobacco and Firearms, United States, 1976-89

	Deaths	Injuries	Property damage (in millions)		
1976	73	272	\$12,1	************	
1977	127	374	61.3		
1978	68	707	27.5		
1979	54	328	16.0		
1980	91	483	31,2		
1981	75	262	105.6		
1982	56	221	12.3		
1983	71	400	34,3		
1984	47	288	74.9		
1985	104	477	26.5		
1986	64	373	29.3		
1987	57	384	45.6		
1988	60	691	165.9		
1989	74	495	48.9		

Note: See Note, table 3.152. These data include detonated and incendiary bombings, and criminal and noncriminal explosives incidents. The 1977 property damage figure includes approximately \$50 million resulting from grain elevator explosions. The dramatic increase in the 1978 injury figure is due to two major incidents; 150 people in New York City were injured in the accidental, noncriminal explosion of an ice cream truck; 250 people in Kentucky and West Virginia were injured by illegal fireworks.

Source: U.S. Department of the Treasury, Bureau of Alcohol, Tobacco and Firearms, *Explosives Incidents Report 1985*, p. 9; and *1989*, p. 11 (Washington, DC: U.S. Department of the Treasury). Table adapted by SOURCEBOOK staff.

Table 3.158

Estimated number of fires, civilian fire deaths, and value of property loss due to incendiary or suspicious structure fires

United States, 1989

	Estimated number of fires	Estimated number of civilian fire deaths	Estimated value of property loss (in thousands)
Total, all fires in structures	688,000	4,655	\$7,518,000
Total, incendlary and			
suspicious fires	97,000	615	1,588,000
Incendiary fires	59,500	460	1,057,000
Suspicious fires	37,500	155	501,000

Note: The data above are weighted estimates from a survey conducted annually of fire departments drawn from the Fire Service Inventory File of the National Fire Protection Association, All U.S. fire departments that protect communities of 100,000 or more are included in the sample. For departments that protect less than 100,000 population, the sample is stratified by community size. Survey returns range from 2,600 to 3,100 departments annually. Readers are advised to see the Source for more detailed information on methodology and weighting procedures,

"Incendiary fires" are fires in which "legal decision or physical evidence indic. ... is that the fire was deliberately set." "Suspicious fires" are fires in which "circumstances indicate the possibility that a fire may have been deliberately set." "Suspicious circumstances" include multiple ignitions or a lack of accidental or natural ignition factors. "Civilians" include "anyone other than a fire fighter, and covers public service personnel such as police officers, civil defense staff, non-fire service medical personnel, and utility company employees." (Michael J. Karter, Jr., "Fire Loss in the United States During 1985," Fire Journal 80 (September 1986), p. 36.)

Other mobile	1,669	2,1			
Other	15,277	19.0			

Note: Arson was designated as a Part 1 Index offense in October 1978; data collection began in 1979, in 1989, 12,562 agencies furnished detailed reports to the Uniform Crime Reporting Program. These data are from those 12,562 agencies. Users should be aware that these data do not represent the Nation's total arson experience. For definition of arson, see Appendix 3.

^aBecause of rounding, percents may not add to total.

1990	44	10	34	

Note: Terrorism is defined as premeditated, politically motivated violence perpetrated against noncombatant targets by subnational groups or clandestine State agents, usually intended to Influence an audience. International terrorism is astrorism involving citizens or territory of more than one country (Source, 1990). Data have been revised from previous presentations by the Source.

^aincludes scheduled air carrier and general aviation aircraft hijackings. ^bincidents in which it appeared the individuals involved intended to hijack an aircraft but were

prevented from doing so by security procedures.

An analysis of the period from June 1, 1985 through Apr. 30, 1986, reveals that this increase may be attributed, in part, to extensive publicity given to aviation explosive incidents (U.S. Department of Transportation, Federal Aviation Administration, Semiannual Report to Congress on the Effectiveness of the Civil Aviation Security Program, July 1 to December 31, 1988 (Washington, DC: U.S. Department of Transportation, 1989), Exhibit 11).

Total	22,537	211,101	6,746,749	1,540	7,046,426.18		

Note: The Federal Crime Insurance Program was established by Congress in 1970. It is administered by the Federal Emergency Management Agency through its Federal Insurance Administration, which is authorized to offer Federal Crime Insurance policies in States in which it is concluded that there exists a critical problem in the availability of crime insurance. In 1989, 14 States, the District of Columbia, Puerto Rico, and the Virgin Islands were participating in the program. Policies, offered both to individuals and businesses, cover losses due to robbery and burglary.

"Annual written premiums" are the payments that would be received if all policies were in effect for the entire year. A "combination" policy provides different coverage limits for robbery and burglary.

Section 4

Characteristics and distribution of persons arrested

This section begins with a series of tables from the Federal Bureau of Investigation's Uniform Crime Reporting (UCR) Program. The UCR obtains information on offenses known and arrests made by participating law enforcement agencies across the country. Included in this section are data on total arrests, arrests in cities, suburban areas, and rural counties. An arrest is reported to the UCR program "each time a person is taken into custody, notified, or cited for criminal infractions other than traffic violations." The arrest data are presented by type of offense; and the age, race, and sex of persons arrested. Trend data for both violent and property crime arrests, and arrest rates by offense charged and region, are also displayed.

The number of offenses "cleared by arrest" is presented. An offense is cleared by arrest when at least one person is arrested, charged, and turned over to the court for prosecution. These tables include type of offense, geographic area, number of police agencies, population served, and offenses cleared by arrest of juveniles. Additionally, information on juveniles taken into police custody and arrests for alcohol and drugrelated violations is presented.

Also included in this section are data on the arrests of felony offenders in the Nation's 75 largest counties. These data are derived from a sample of felons representing these counties and are presented by age, sex, arrest offense, criminal history, and criminal justice status of defendants. Additionally, data concerning rearrests while on pretrial release are provided. Felony arrest data from 12 States, collected through the Offender-Based Transaction Statistics (OBTS) program, are provided as well.

This section also includes information pertaining to the drug use of persons arrested in 21 U.S. cities. The tables include data on drug use at the time of arrest; drug use history; frequency of use; and age, sex, race, and ethnicity of arrestees. Finally, data for law enforcement activities under the jurisdiction of other Federal agencies are provided. These agencies include the U.S. Coast Guard, the U.S. Customs Service, the Immigration and Naturalization Service, the Secret Service, and the Drug Enforcement Administration.

Table 4.1

Estimated number of arrests^a

By offense charged, United States, 1989

Offense charged	
Tolai ^b	14,340,900
Murder and nonnegligent manslaughter	22,300
Forcible rape	39,110
Robbery	165,060
Aggravated assault	459,000
Burglary	468,900
Larceny-theft	1,604,400
Motor vehicle theft	228,500
Arson	18,600
Violent crime ^C	685,500
Violent crime ^C Property crime ^d	2,320,400
Total Crime Index ⁶	3,005,800
Other assaults	978,900
Forgery and counterfeiting	105,400
Fraud	376,600
Embezzlement	18,200
Stolen property; buying, receiving, possessing	176,800
Vandalism	307,800
Weapons; carrying, possessing, etc.	225,200
Prostitution and commercialized vice	107,400
Sex offenses (except forcible rape and prostitution)	104,800
Drug abuse violations	1,361,700
Gambling	20,600
Offenses against family and children	74,200
Driving under the influence	1,736,200
Liquor laws	657,300
Drunkenness	822,500
Disorderly conduct	776,600
Vagrancy	33,800
All other offenses (except traffic)	3,214,700
Suspicion (not included in total)	16,000
Currew and loitering law violations	77,400
Runaways	159,200

Note: These data were compiled by the Federal Bureau of Investigation through the Uniform Crime Reporting Program. On a monthly basis, law enforcement agencies report the number of offenses that become known to them in the following crime categories: murder and nonnegligent manslaughter, manslaughter by negligence, forcible rape, robbery, assault, burglary, larceny-theft, motor vehicle theft, and arson. All of these crime categories, except manslaughter by negligence, are used to establish a crime Index in order to measure the trend and distribution of crime in the United States. The "Total Crime Index" is a simple sum of the Index offenses. Arson was designated as a Part I Index offense in October 1978. Unlike the tables from *Crime in the United States* presented in Section 3, arrest statistics for the crime of arson are complete and appear in the "Total Crime Index" and "Property crime" total.

Arrest statistics are compiled as part of this monthly data collection effort. Participating law enforcement agencies are instructed to count one arrest each time a person is taken into custody, notified, or cited for criminal infractions other than traffic violations. Annual arrest figures do not measure the number of individuals taken into custody because one person may be arrested several times during the year for the same type of offense or for different offenses. A juvenile is counted as a person arrested when he/she commits an act that would be a criminal offense if committed by an adult. Two offense categories, "curfew and loitering" and "runaway," are tabulated only for juveniles. Violations of local juvenile acts other than runaway and curfew and loitering law violations are included in the "all other" classification (U.S. Department of Justice, Federal Bureau of Investigation, Uniform Crime Reporting Handbook (Washington, DC: USGPO, 1984), p. 60).

Data in this table are estimates based on arrest stallstics for all law enforcement agencies in the Uniform Crime Reporting Program, including those submitting reports for less than 12 months in 1989 (Source, p. 322).

Due to reporting problems, only State arrest totals, by offense, were received from Florida for 1989. Florida data are included only in the above table and in table 4.4. For tables presenting arrests by age, sex, race, or population group, Florida has been omitted by the Source.

For definitions of offenses, see Appendix 3.

Source: U.S. Department of Justice, Federal Bureau of Investigation, *Crime In the United States*, 1989 (Washington, DC: USGPO, 1990), p. 172.

^aArrest totals based on all reporting agencies and estimates for unreported areas. ^bBecause of rounding, items may not add to totals.

CViolent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

d Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

eincludes arson.

Table 4.2

Number and rate (per 100,000 inhabitants) of arrests

By offense charged and size of place, 1989

See notes at end of table.

(Population figures rounded to the nearest thousand. All rates were calculated on the population before rounding. Rate per 100,000 inhabitants.)

Note: See Note, table 4.1. This table presents data from all law enforcement agencies submitting complete reports for 12 months in 1989 (Source, p. 323). Direct comparisons of arrest totals listed in this table should not be made with prior years. For definitions of offenses, see Appendix 3.

Source: U.S. Department of Justice, Federal Bureau of Investigation, *Crime In the United States, 1989* (Washington, DC: USGPO, 1990), pp. 229-232.

^CViolent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

ed assault.

dProperty crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

 $^{^{\}mbox{a}}\mbox{Does not include traffic arrests.}$ For a list of included offenses, see table 4.1. $^{\mbox{b}}\mbox{Includes arson.}$

Note: See Notes, tables 4.1 and 4.6. Estimates by the U.S. Bureau of the Census indicate that on July 1, 1989, males comprised 48.7 percent and females 51.3 percent of the total U.S. resident population (U.S. Department of Commerce, Bureau of the Census, U.S. Population Estimates, by Age, Sex, Race, and Hispanic Orl gin: 1989, Series P-25, No. 1057 (Washington, DC: USGPO, 1990), p. 12). For definitions of offenses, see Appendix 3.

 $^{\mathbf{c}}$ Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

Oroperty crimes are offenses of burglary, larceny-theft, motor

vehicle theft, and arson. eIncludes arson.

Note: See Note, table 4.1. This table presents data from all suburban law enforcement agencies submitting complete reports for 12 months in 1989 (Source, p. 323). Population figures are July 1, 1989 preliminary counts by the U.S. Bureau of the Census. For definitions of offenses and suburban areas, see Appendix 3.

CLess than one-tenth of 1 percent. dViolent crimes are offenses of murder, forcible rape, robbery,

and aggravated assault.

Property crimes are offenses of burglary, larceny-theft, motor yehicle theft, and arson.
Includes arson.

Source: U.S. Department of Justice, Federal Bureau of Investigation, *Crime in the United States, 1989* (Washington, DC: USGPO, 1990), p. 225. Table adapted by SOURCEBOOK staff.

^aIncludes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and countles are also included in other groups. Because of rounding, percents may not add to total.

Note: See Note, table 4.1. This table presents data from all rural county law enforcement agencies submitting complete reports for 12 months in 1989 (Source, p. 323). Population figures are July 1, 1989 population estimates. For definitions of offenses and rural counties, see Appendix 3.

Source: U.S. Department of Justice, Federal Bureau of Investigation, *Crime in the United States, 1989* (Washington, DC: USGPO, 1990), p. 216. Table adapted by SOURCEBOOK staff.

^aBecause of rounding, percents may not add to total, ^bLess than one-tenth of 1 percent. ^cViolent crimes are offenses of murder, forcible rape, rob-

bery, and aggravated assault.

^dProperty crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.
^eIncludes arson.

Note: The data were collected through the National Pretrial Reporting Program initiated by the U.S. Department of Justice, Bureau of Justice Statistics in 1988. The data are based on a sample of 39 of the 75 most populous counties in the United States and a sample of felony defendants in each of the 39 counties. The sample was designed and selected by the U.S. Bureau of the Census, Information is based on 11,063 sample felony cases processed in the 39 jurisdictions in February 1988. Data for arrest charge, sex, and age of defendants were available for 99.2 percent, 96.0 percent, and 99.7 percent of sample cases respectively. percent, and 99.7 percent of sample cases respectively.

These data are derived from a sample and therefore subject

For survey methodology, definitions of terms, and crimes within offense categories, see Appendix 10,

None	15,105	100	85	15	3	4	5	. 3		
Most serious										
prior conviction										
Felony	6,989	100	77	23	4	8	8	3		
Misdemeanor	4,933	100	80	20	4	5	6	5		
None	15,105	100	85	15	3	4	5	3		

Note: See Note, table 4.16. Rearrest data were collected for 1 year. Rearrests occurring after the end of this study period are not included in the table. Information on rearrests in jurisdictions other than the one granting the pretrial release was usually not available. If a jurisdiction did not know whether or not a defendant had been rearrested, a presumption was made that the defendant had not been rearrested. One jurisdiction that could not provide access to any rearrest data was excluded from the table. For survey methodology, definitions of terms, and crimes within offense categories, see Appendix 10.

Source: U.S. Department of Justice, Bureau of Justice Statistics, *Pretrial Release of Felony Defendants*, 1988, Bulletin NCJ-127202 (Washington, DC: U.S. Department of Justice, February 1991), p. 6.

^aDetail may not sum to total because of rounding.

Table 4.20

Time from pretrial release to rearrest for a felony among defendants in the 75 largest countles

By original arrest charge, United States, 1988a

Most serious	Number of	Median num-	Released and rearrested felony defendants who were rearrested within:							
original arrest charge	defendants	ber of days	1 week	1 month	3 months	6 months	1 yearb			
All offenses	4,213	64 days	9 %	32 %	65 %	89 %	100 %			
Violent offenses	767	77	10	31	59	87	100			
Property offenses	1,415	61	9	32	67	91	100			
Drug offenses	1,825	61	7	32	67	89	100			
Public-order offenses	205	47	28	45	67	92	100			

Note: See Note, table 4.16. Data on time from pretrial release to rearrest for a felony were available for 88 percent of all cases involving a defendant who was rearrested for a felony while on pretrial release. Information on rearrests in jurisdictions other than the one granting the pretrial release was usually not available. One jurisdiction that could not provide access to any rearrest data was excluded from the table. The median number of days is the number that marks the point below which and above which 50 percent of all cases fall. For survey methodology, definitions of terms, and crimes within offense categories, see Appendix 10.

^aDetail may not sum to total because of rounding.

^bRearrest data were collected for 1 year, Defendants who were rearrested for a felony after the study period are excluded from the table.

Note: These data were collected through the Offender-Based Transaction Statistics (OBTS) program maintained by the U.S. Department of Justice, Bureau of Justice Statistics. The OBTS program provides detailed data on the criminal justice processing of persons arrested for felonles in participating States. These data were drawn from 12 States that voluntarily participated in 1987. These States are Alaska, California, Delaware, Minnesota, Missouri, New York, Pennsylvania, Alabama, Georgia, Nebraska, Vermont, and Virginia. Public-order offenses include weapons, driving while intoxicated, disturbing the peace, obstructing police, vice, bribery, sex offenses not involving assault, and parole violations. The

sex, race, and age of persons arrested for felonies were reported in 93 percent, 91 percent, and 98 percent of the cases, respectively. For survey methodology and definitions of terms, see Appendix 11.

 $^{\rm a}_{\rm Detail}$ may not add to total because of rounding. $^{\rm b}_{\rm Less}$ than 0.5 percent.

Note: See Note, table 4.1. The number of agencies reporting and the populations represented vary from year to year. Due to reporting problems, complete arrest data were not available for Kentucky in 1988 and Florida in 1988 and 1989; therefore, these States were omitted by the Source. For a list of States in regions and definitions of offenses, see Appendix 3.

SUBURBAN AREAS ^d 5,934 agencies; population 86,223,000:										
Offenses known	3,580,616	301,313	3,279,303	3,669	21,185	72,858	203,601	787,077	2,164,083	328,143
Percent cleared by arrest	21.4	51.3	18.7	69.4	51.7	29.0	58.9	14.1	20.4	17.8

Note: See Note, table 4.1. "An offense is 'cleared by arrest' or solved for crime reporting purposes when at least one person is; (1) arrested; (2) charged with the commission of the offense; and (3) turned over to the court for prosecution. The prosecution can follow arrest, court summons, or police notice." An offense is also counted as cleared by arrest if any of the following "exceptional" conditions pertain: (1) suicide of the offender; (2) double murder; (3) deathbed confession; (4) offender killed by police or citizen; (5) confession by offender already in custody or serving a sentence; (6) an offender prosecuted in another jurisdiction for a different offense and that jurisdiction does not release offender to first jurisdiction; (7) extradition denled; (8) victim refuses to cooperate in prosecution; (9) warrant is outstanding for felon but before arrest the offender dies of natural causes or as a result of an accident, or is killed in the commission of another offense; or, (10) handling of a juvenile offender either orally or by written notics to parents in instances involving minor offenses where no referral to juvenile court is made as a matter of publicly accepted police policy. (U.S. Department of Justice, Federal Bureau of Investigation, Uniform Crime Reporting Handbook (Washington, DC: USGPO, 1984), pp. 41, 42.) It should be noted that the arrest of one person can clear several crimes or several persons may be arrested to clear one crime, Arson was designated an Index property crime in October 1978. Due to the Incompleteness of arson reporting by police for offenses known, arson data are not included in this table. Forcible rape figures furnished by the State-level Uniform Crime

Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines and were excluded by the Source from the forcible rape, violent crime, and Total Crime Index categories. This table presents data from all law enforcement agencies submitting complete reports for at least 6 months in 1989 (Source, p. 322). Population figures are July 1, 1989 population estimates. For definitions of offenses, city and suburban areas, and rural counties, see Appendix 3.

ancludes offenses cleared by exceptional means.

bViolent crimes are offenses of murder, forcible rape, robbery, and aggravated assault,

assault.

CProperty crimes are offenses of burglary, larceny-theft, and motor vehicle theft.

Data are not included for the property crime of arson.

Data are not included for the property crime of arson.

Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.

Note: See Notes, tables 4.1 and 4.24. In 1989, 12,562 agencies furnished detailed reports to the Uniform Crime Reporting Program. The above data are from these 12,562 agencies. Users should be aware that these data do not represent the Nation's total arson experience and differ from those reported in other arrest tables displaying arson. For definition of arson, see Appendix 3.

Source: U.S. Department of Justice, Federal Bureau of Investigation, *Crime in the United States*, 1989 (Washington, DC: USGPO, 1990), p. 43. Table adapted by SOURCEBOOK staff.

^aincludes offenses cleared by exceptional means.

bViolent crimes are offenses of murder, forcible rape, tobbery, and aggravated assault.

Data are not included for the property crime of arson.

dincludes suburban city and county are enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities are also included in other city groups.

Note: These data were commiled from the Federal Bureau of investigation's Uniform Crime Reporting Program. The data presented in this table differ from those presented in the U.S. Department of Justice, Federal Bureau of Investigation, Crime In the United States, 1989 (Washington, DC: USGPO, 1990). This is because this table includes data processed by the Federal Bureau of Investigation after the cut off date for that publication. "In many States where drunkenness and/or vagrancy are not treated as criminal actions, these categories are not permissible causes of arrest. In one respect, these data may be considered conservative estimates of alcohol-related arrests. Arrests are classified by a single offense, using a hierarchical rule. Consequently, crimes committed while intoxicated are categorized under the primary offense. On the other hand, 'driving under the influence' includes impairment due to any type of drug; it is not limited to impairment due to alcohol. The State of Florida does not collect data in this format." (Source.)

Note: These data were compiled by the Federal Bureau of Investigation through the Uniform Crime Reporting Program. This table includes data from all law enforcement agencies submitting complete reports for 12 months in 1980, 1985, and 1989. Data were excluded if a city reported less than 12 months of data or if the population fell below 100,000 in either 1980, 1985, or 1989, For a description of the Uniform Crime Reporting Program, see Appendix 3.

^aSubcategories may not sum to total due to rounding.

Source: Table provided to SOURCEBOOK staff by Thomas C, Castellano and James L. Lebeau, Center for the Study of Crime, Delinquency, and Corrections, Southern Illinois University at Carbondale; data were made available through the Federal Bureau of Investigation's Uniform Crime Reporting Program.

Drug use by arrestees in 21 U.S. cities

Stolen property Traffic offense Weapons Other	356 106 675 745	70 37 63 56	80 316 73 437	59 45 62 59

Note: These data are from the Drug Use Forecasting (DUF) program sponsored by the National Institute of Justice. DUF data are collected in central booking facilities in participating cities throughout the United States. For approximately 14 consecutive evenings each quarter, trained local staff obtain voluntary and anonymous urine specimens and interviews from a new sample of arrestees (Source, p. 2).

For methodology, survey sampling information, and a list of participating cities, see Appendix 12.

^aIncludes cocaine, oplates, marihuana, phencyclidine (PCP), methadone, benzodiazepine (Valium), methaqualone (Quaalude), propoxyphene (Darvon), barbiturates, and amphetamines. bLess than 20 cases.

Note: The data presented for 1975 and 1976 coincide with the former Federal fiscal year, the period July 1 to June 30. The transition quarter refers to the period July 1, 1976 to Sept. 30, 1976. The Federal fiscal year is now Oct. 1 to Sept. 30. Some data have been revised by the Source and therefore will differ from previous editions of SOURCEBOOK.

The drug value is computed using the Drug Enforcement Administration (DEA) retail value lists. The illegal market retail drug prices for heroin and cocalne are based on evidence exhibits purchased by DEA; other dangerous drug prices are derived from monthly availability reports submitted by DEA field offices.

a Value data were computed using retail values as of the fourth quarter of fiscal year 1976. bValue data were computed using retail values as of the third quarter of the fiscal year.

^CValue data were computed using the most recent retail values available at the time of publication. Values for heroin, cocaine, marihuana, and total have been recalculated to reflect updated retail price data from the National Narcotics Intelligence Consumers Committee and the DEA.

reflect updated retail price data from the National Narcotics intelligence Consumers Committee and the DEA.

dValues for heroin, cocaine, and marihuana were estimated from the DEA national retail price data for the period July to September 1988. The value of hashish was estimated from the Royal Canadian Mounted Police retail price data for the month of August 1988. Values for oplum, morphine, and other drugs cannot be estimated because of a lack of U.S. price data. Estimated values of "other drugs" for the years prior to fiscal year 1988 were based on an estimated mix of drugs that is no longer considered valid.

^eFor 1975 through 1982 heroin value was computed for 60 percent purity. In fiscal year 1983, DEA revised the method of calculating and reporting price values and no longer base prices on the 60 percent purity factor.

Note: These data were collected by the Drug Enforcement Administration (DEA) in conjunction with the Domestic Cannabis Eradication/Suppression Program. This program is a Joint Federal and State effort in which DEA contributes funding, training, equipment, investigative, and aircraft resources to the participating States in the effort to eradicate domestically-cultivated marihuana.

Data for sightings were compiled from individual State reports and information provided by the U.S. Forest Service and the Bureau of Land Management. "Plots" are defined by the presence of marihuana plants and vary in size. "Plots eradicated" refer to those plots in which the marihuana plants were destroyed,

Note: The data presented for years prior to and including 1976 coincide with the former Federal fiscal year, the period July 1 to June 30. The transition quarter refers to the period July 1, 1976 to Sept. 30, 1976. The fiscal year for the Federal Government is now from Oct. 1 to Sept. 30. "Aliens deported" refers to those aliens required to leave the country under formal orders of deportation. "Public charge" refers to persons deported for vagrancy and similar reasons. "Other" includes persons who, at the time of their entry, were excludable as: polygamists, draft evaders, illiterates over 16 years of age, children under 16 years of age unaccompanied by parent(s), smugglers, and those deported for unknown reasons. Data for 1980-88 have been revised by the Source and therefore will differ from previous editions of SOURCEBOOK.

^aData are preliminary.

Source: Table provided to SOURCEBOOK staff by the U.S. Department of Justice, Immigration and Naturalization Service.

Section 5

Judicial processing of defendants

This section provides information on the judicial processing of adult and juvenile defendants in the United States. The data present information on State, Federal, and military courts.

The initial tables involve requests for immunity by Federal prosecutors and court orders for interception of wire, oral, or electronic communication. In addition, information concerning the activities of the U.S. Attorneys' offices is presented.

The next segment presents data from the Federal Justice Statistics database. Tables provide information on matters concluded in U.S. District Courts, suspects declined for prosecution and referred to U.S. magistrates, and defendants prosecuted, convicted, and sentenced in U.S. District Courts. Additional tables present data on cases filed, terminated, and pending, and the length of trails in U.S. District Courts. Finally, a number of tables display defendants detained, disposed, and sentenced in U.S. District Courts.

The third portion of the section begins with an assessment of the application of the U.S. Sentencing Commission's guidelines to defendants in U.S. District Courts. This information includes the number of defendants, the types of sentences imposed, and the reasons for upward and downward departure from the Commission's guidelines.

Information on case processing in State courts comprises the next section. The data are from the National Judicial Reporting Program, the Offender Based Transaction Statistics program, and the National Pretrial Reporting Program. Information is provided on felony convictions and sentences in State courts as well as case processing in a number of States. In addition, release status, bail, disposition, adjudication outcome, and sentencing information for defendants in the 75 largest counties is presented.

The next portion of the section includes information on petitions filed in U.S. District Courts, appeals to the U.S. Courts of Appeal, and activities of the U.S. Supreme Court. Data on requests for executive clemency, commutations of sentences, and pardons are also presented.

Information on criminal tax fraud cases, arrests and convictions by the U.S. Postal Inspection Service, and antitrust violations is provided. Furthermore, a series of tables present data on violations of immigration laws. These include suspects investigated and prosecuted by U.S. Attorneys, and disposition, conviction, and sentencing infor-

mation on immigration law violators in U.S. District Courts. Information on the investigative activities of the U.S. Secret Service is also provided.

The final segment of the section presents data on delinquency and status offense cases processed by juvenile courts in a number of States. Tables involving offenses, detention, probation, and placement are presented for those adjudicated delinquent and for status offenders. In addition, information on abuses of public office and judicial misconduct inquiries is provided. Finally, military court martial activities of the Army, Air Force, and Coast Guard are displayed.

Requests for immunity by Federal prosecutors to the U.S. Attorney General and witnesses involved in these requests

By origin of request, fiscal years 1973-90

		Requests			Witnesses	
		Perc	ent		Perc	ent

1975	1,632	77	23	3,733	58	42
1976	1,789	76	24	3,923	60	40
1977	1,798	70	30	4,413	44	56
1978	1,445	66	34	2,997	47	53
1979	1,596	73	27	3,204	57	43
1980	1,653	. 73	27	3,530	54	46
1981	1,686	74	26	3,271	62	38
1982	1,836	75	25	3,810	58	42
1983	1,986	72	28	4,226	53	47
1984	2,378	77	23	4,784	59	41
1985	2,451	77	23	5,146	65	35
1986	2,550	76	24	5,013	65	35
1987	2,359	79	21	4,603	71	29
1988	2,357	77	23	4,699	68	32
1989	2,301	79	21	4,496	72	28
1990	2,049	83	17	3,735	78	22

Note: These data reflect requests received from Federal prosecutors under 18 U.S.C. 6001-6005, the statute that now governs the granting of use immunity. 18 U.S.C. 6003 requires all Federal prosecuting attorneys to receive authorization from the U.S. Attorney General (or representative) before seeking a court order for witness immunity. It should be noted that in some cases in which the authorization is obtained, the prosecutor may decide not to seek the immunity order from the courts. Therefore, the number of witnesses actually granted immunity is probably lower than the data in the table indicate. It should also be noted that data for 1973 and 1974 include a total of 11 requests and 27 witnesses, and 7 requests and 11 witnesses, respectively, falling under an older statute, 18 U.S.C. 2514, which has since been repealed. "Criminal Division" refers to the Criminal Division of the U.S. Department of Justice and the U.S. Attorneys. "Other" refers to the remaind divisions of the U.S. Department of Justice (e.g., Antitrust, Tax, Civil Division, Civil Rights, and Lands and Natural Resources), as well as to the other Federal agencies (e.g., Interstate Commerce Commission, Federal Trade Commission, Securities and Exchange Commission, and Department of the Army) and to the Congress, all of which may request immunity for witnesses.

1989	453	310				

Note: The Director of the Administrative Office of the United States Courts is required, in accordance with provisions of 18 U.S.C. 2519(1), to transmit to Congress a report regarding applications for orders authorizing or approving the interception of wire, oral, or electronic communications. This report is required to contain information about the number of such orders and any extensions granted. Every State and Federal judge is required to file a written report on each application made. This report is required to contain information on the grants and denials, name of applicant, offense involved, and duration of authorized intercept. Prosecuting officials who have applied for intercept orders are required to file reports containing information on the cost of the intercepts and the results of the intercepts in terms of arrests, trials, convictions, and the number of molions to suppress the use of the intercepts (Source 1989, p. 1). A total of 37 jurisdictions had statutes authorizing the interception of wire, oral, or electronic communications during 1989. Twelve of these jurisdictions did not have any court-authorized orders for interception during 1989.

^aFor 1968, the reporting period was from June to December.

Note: The U.S, Attorney is the highest ranking law enforcement representative in each of the Federal judicial districts. The Attorney and staff members assist the U.S. Attorney General in the enforcement of Federal criminal laws, the investigation and prosecution of corrupt public officials and organized crime figures, and the initiation of environmental litigation. In addition, the U.S. Attorney is responsible for the enforcement of laws pertaining to Federal programs. These include violations involving Medicaid and Medicare, U.S. Government contracts, the use of labor union funds, educational benefits for war veterans, and the food stamp program. In the civil law area, U.S. Attorneys are involved in tort claim and civil fraud cases, actions filled against the U.S. Government, Freedom of Information Act cases, and other civil matters. U.S. Attorneys are responsible for collecting criminal fines, civil judgments, prejudgment claims, forfeitures, penalties, and other monies owed to the Federal Government.

Percent change						
1989 over						
1988	9.7 %	3.1 %	2.0 %	1.7 %	11.4 %	

Note: There are two reporting changes during fiscal year 1976 that have affected the data base. Beginning Oct. 1, 1975, all minor offenses (offenses involving penalties that do not exceed 1 year imprisonment or a fine of more than \$1,000), with the exception of most petty offenses (offenses involving penalties that do not exceed 6 months incarceration and/or a fine of not more than \$500), are included. Minor offenses are generally disposed of by the magistrates and, in past years, most of these minor offenses would not have been counted in the workload of the district courts. Second, when the Federal Government's motion to dismiss an original indictment or information is granted, the superseding indictment or information does not become a new case as in the years prior to 1976, but remains the same case. (An indictment is the charging document of the grand jury, and an information is the charging document of the U.S. Attorney.)

"Received by transfer" includes defendants transferred by Rule 20, Federal Rules of Criminal Procedure, which provides that defendants who (1) are arrested or held in a district other than that in which an indictment or information is pending against them or in which the warrant for their arrest was issued and (2) state in writing that they wish to plead guilty or noto contendere, may consent to disposition of the case in the district in which they are arrested or are held, subject to the approval of the U.S. Attorney for both districts.

^aDoes not include 362 cases that were reopened during the reporting period.

Note: See Note, table 5.16. These data represent defendants charged with Federal offenses under the following statutes: Title 21 U.S.C. 176(a) (the Marihuana Tax Act); Title 26 U.S.C. 1407 (Customs laws governing border crossings by narcotic addicts or violators); Title 18 U.S.C. 4741-62 (imposition of tax and affixing of tax stamps); 18 U.S.C. 494 (making false statements with intent to defraud the United States); 18 U.S.C. 1403 (conspiracy to commit an offense under the Narcotic Drug Import and Export Act); 18 U.S.C. 1406 (immunity from prosecution for grand jury testimony concerning violations of the Narcotic Drug Import and Export Act); other provisions of the Narcotic Drug Import and Export Act); other provisions of the Narcotic Drug Import and Export Act); other provisions of the Narcotic Drug Import and Export Act); and other narcotic drug laws (26 U.S.C. 4701-4736, 7237).

The District of Columbia is excluded from these data through 1973. The territorial courts of the Virgin Islands, Canal Zone, and Guam are excluded through 1976.

Prior to 1977, the periods reported for lengths of sentences of imprisonment are 1 year and 1 day and under, over 1 year and 1 day to 3 years, 3 to 5 years, and 5 years and over.

^aFrom 1968 through 1981, defendants who were committed pursuant to Title 28 U.S.C. 2902(b) of the Narcotic Addict Rehabilitation Act are included in the dismissed column. ^bIncludes sentences of more than 6 months that are to be followed by a term of probation (mixed sentences). ^cThe split sentence is a sentence on a one-count indictment of 6 months or less in a jall type

CThe split sentence is a sentence on a one-count indictment of 6 months or less in a jail type institution followed by a term of probation. Included in these figures are mixed sentences involving confinement for 6 months or less on one count, to be followed by a term of probation on one or more counts.

tion on one or more counts.

Title 18 U.S.C. 4205b(1) and (2). Included in total imprisonment prior to 1978.

Note: These data are computed only for the respective time intervals actually begun and terminated during the year ending June 30, 1989. The Speedy Trial Act of 1974 (U.S.C. 3152-3156 and 3161-3174) required each U.S. District Court to adopt a plan for the prompt disposition of criminal cases in accordance with statutory time limits. The time interval from arrest to indictment or information is 30 days (18 U.S.C. 3161(b)). Defendants entering a plea of not guilty must be brought to trial not more than 70 days after a filing of an information or indictment, or after an appearance before a judicial officer of the court in which the charge is pending, whichever comes last (18 U.S.C. 3161(c)(1)). The trial may not commence sooner than 30 days from the date the defendant first appears unless

written waiver is given (18 U.S.C. 3161(c)(2)). See Note, table 5.14 for definitions of indictment and information.

The Speedy Trial Act does not establish time ilmits governing the period between conviction and sentencing, but does require that statistics be furnished regarding the time span of this interval. The Committee on Administration of the Criminal Law of the Judicial Conference has recommended a 45-day time limit for the interval from conviction to sentencing.

Note: See Note, table 5.16. The District of Columbia is excluded from these data through 1973. The territorial courts of the Virgin Islands, Canal Zone, and Guarn are excluded through 1976, Data provided for the year ending June 30, 1977 have been revised by the Source.

Beginning in 1977, the periods reported for lengths of sentences of imprisonment are 1 through 12 months, 13 through 35 months, 36 through 59 months, and 60 months and over. Included with sentences of probation.

9Not computed where the number of defendants is less than 25. Split sentences, indeterminate sentences, Youth Corrections Act and youthful offender sentences are not included in computing the average sentence.

Includes Federal Juvenile Delinquency Act sentences.

Includes deportation, suspended sentences, imprisonment for 4 days or less or for time already served, remitted and suspended fines, and life sentences.

Table adapted by SOURCEBOOK staff.

^aIncludes sentences of more than 6 months that are to be followed by a term of probation

⁽mixed sentences).

Includes defendants who were committed pursuant to 28 U.S.C. 2902(b) of the Narcotic Addict Rehabilitation Act.

^CA split sentence is a sentence on a one-count indictment of 6 months or less in a jail-type

institution followed by a term of probation, 18 U.S.C. 3651 approved Aug. 23, 1958 (72 Stat. 834). Included are mixed sentences involving confinement for 6 months or less on one count to be followed by a term of probation on one or more counts. For years 1959 through 1962, split sentences are included in prison terms less than 1 year and 1 day. 

18 U.S.C. 4205B(1) and (2),

18 U.S.C. 5010(b) and (c).

^aIncludes sentences of more than 6 months that are to be followed by a term of probation

Source: Administrative Office of the United States Courts, *Annual Report of the Director*, 1989 (Washington, DC: USGPO, 1990), pp. 283-290.

[&]quot;Includes sentences of more than 6 months that are to be followed by a term of probation (mixed sentences).

DExcludes split sentences, indeterminate sentences, Youth Corrections Act/youthful offender sentences, and life sentences included in "other" category.

A split sentence is a sentence on a one-count indictment of 6 months or less in a jail-type institution followed by a term of probation, 18 U.S.C. 3651. Included in these figures are mixed sentences involving conlinement for 6 months or less on one count, to be followed by a term of probation on one or more counts.

dTitle 18 U.S.C. 4205b(1) and (2).

Title 18 U.S.C. 5010(b) and (c).

Includes deportation, suspended sentences, imprisonment for 4 days or less or for time already served, remitted and suspended fines, and life sentences.

Application of the U.S. Sentencing Commission's guidelines to defendants in U.S. District Courts

By circuit and district, Oct. 1, 1989 through Aug. 31, 1990--Continued

Note: These data are derived from the Administrative Office of the United States Courts' Federal Probation Sentencing and Supervision Information System (FPSSIS) data file. The sentencing reform provisions of the Comprehensive Crime Control Act, Public Law No. 98-473 (1984), created the United States Sentencing Commission. The Commission's primary function is to develop sentencing policies and practices for the Federal courts. On Apr. 13, 1987, the Commission submitted its initial Sentencing Guidelines and Policy Statements to Congress. The guidelines became effective on Nov. 1, 1987, and apply to all offenses committed on or after that date. The Commission received documentation on 29,011 cases sentenced between Oct. 1, 1989, and Sept. 30, 1990. From Oct. 1, 1989 through Aug. 31, 1990, probation offices nationally reported a total of 26,183 guideline cases to the Administrative Office of the United States Courts, through its FPSSIS data entry system. Ninety-one percent of the Commission's cases have been matched with corresponding FPSSIS cases. The remaining 9 percent reported to the Commission were not reported to the FPSSIS or were reported in an inconsistent manner. Due to these inconsistencies, generalizing from these data to the national population of defendants sentenced may be inappropriate. These data exclude cases involving solely petty offenses, corporate offenders, or discretionary sentences.

Multiple count cases involving both guideline counts and pre-guideline counts have been included in the "guideline" category.

Note: See Note, table 5.27. These data are the result of a study based on a 25 percent random sample of all cases sentenced between Oct. 1, 1989 and Sept. 30, 1990. The sample involves 7,364 guideline defendants. The case files were analyzed and sentences were classified as within or outside of Commission guidelines. The statement of reasons for departure was reviewed. If not available, phone calls were made to determine reasons for departure. An upward departure involves applying a more serious sentence than the guidelines recommend. A downward departure involves applying a less serious sentence than the guidelines recom-

^aBased on 156 upward departure cases for which Reports on the Sentencing Hearing were available or reasons for departure were obtained through a telephone call to the field. Information on reasons was unavailable in six cases involving upward departures. Courts often provided more than one reason for departure; consequently, the percentage across all reasons for departure adds up to more than 100 percent.

The defendant's criminal background warrants a more or less severe sentence than the

guidelines dictate.

Cincludes cases in which the defendant committed the offense to facilitate or cover up another offense (e.g., firearms violation to commit a robbery),

2

2 74

0.2 0.2

0.2

0.2

7.5

dRefers to economic loss which exceeds maximum listed in the guideline's tables. elncludes all reasons given only one time among relevant cases.

[†]Based on 990 downward departure cases for which Reports on the Sentencing Hearing were available or reasons for departure were obtained through a telephone call to the field. Information on reasons was unavailable in 43 cases involving downward departures. Courts often provided more than one reason for departure; consequently, the percentage across all reasons for departure adds up to more than 100 percent.

9Includes cases in which the judge believes the defendant provided substantial assistance but the prosecution does not submit a motion for downward departure. ^hDefendant is to be deported.

The circumstances surrounding the offense mitigate the ultimate harm caused by its commission (e.g., mercy killing).

#### Felony convictions in State courts

By most serious conviction offense, United States, 1988

		Felony o	convictions		
Most serious	United	States	75 larges	t counties	
conviction offense	Number	Percent	Number	Percent	
Tctal	667,366	100 %	310,547	100 %	******
Murder ^a	9,340	1.4	4,859	1.6	
Rape	15,562	2.3	6,723	2.2	
Robbery	37,432	5.6	24,436	7.9	
Aggravated assault	37,566	5.6	18,131	5.8	
Burglary	101,050	15.2	42,976	13.8	
Larcenyb	95,258	14.3	44,493	14.3	
Drug trafficking	111,950	16.8	64,160	20.7	
Other felonies	259,208	38.8	104,769	33.7	

Note: These data are based on the results of the second survey of State felony courts from the National Judicial Reporting Program (NJRP). Data were collected by the U.S. Bureau of the Census and the National Association of Criminal Justice Planners for the U.S. Department of Justice, Bureau of Justice Statistics. The first survey, conducted in 1986, reported on felony case processing in State courts in a sample of 100 counties. The 1988 NJRP expanded the sample to 300 counties selected to be nationally representative. The sample includes 54 counties representative of the Nation's 75 largest. The 75 largest counties in the United States comprise about 37 percent of the U.S. population but in 1988 accounted for over half of all crime reported to police and nearly half of all felony convictions in State courts. Only offenses that State penal codes define as felonies are included. Excluded are Federal courts and State courts or local courts that did not try felony cases. Any person convicted of multiple offenses that included any of the FBI Index crimes received the offense designation of the most serious index crime. Drug trafficking was the designation only if the person was not also convicted of one of the Index crimes, Sentencing data specifying the conviction offense were available for 100 percent of the estimated total. These data are estimates derived from a sample and therefore subject to sampling variation. Note: These data are based on the results of the second survey of State felony courts from sample and therefore subject to sampling variation.

For definitions of terms and survey sampling procedures, see Appendix 14.

Weapons	19,641	81	57	29	7
Other public-order	61,335	85	73	32	3

Note: These data were collected through the Offender-Based Transaction Statistics (OBTS) program maintained by the U.S. Department of Justice, Bureau of Justice Statistics. The OBTS program provides detailed data on the criminal justice processing of persons arrested for felonies in participating States. These data are from seven States that voluntarily participated in 1987. The seven States are Alaska, California, Delaware, Minnesota, Missouri, New York, and Pennsylvania. Public-order offenses include weapons, driving while intoxicated, disturbing the peace, obstructing police, vice, bribery, sex offenses not involving assault, and parole violations. For methodology and definitions of terms, see Appendix 11.

alincludes only arrest reports containing readable lingerprints and excludes 128 incidents for which the FBI's National Crime Information Center (NCIC) codes are not known. Alaska, Delaware, New York, and Pennsylvania do not report the number of persons who may have been released by the police.

Note: The data were collected through the National Pretrial Reporting Program initiated by the U.S. Department of Justice, Bureau of Justice Statistics in 1988. The data are based on a sample of 39 of the 75 most populous counties in the United States and a sample of felony defendants in each of the 39 counties. The sample was designed and selected by the U.S. Bureau of the Census. Information is based on 11,063 sample felony cases processed in the 39 jurisdictions in February 1988. Data on detention-release outcome were available for 95.3 percent of sample cases. These data are derived from a sample and therefore subject to sampling variation. För survey methodology, defi-

nitions of terms, and crimes within offense categories, see Appendix 10.

 $^{\mathrm{a}}$ Detail may not add to total because of rounding.  $^{\mathrm{b}}$ Less than 0.5 percent.

Note: Petitions by Federal prisoners are suits brought against the Federal Government. Petitions by State prisoners are those petitions in which the State or its representative(s) is named as the defendant(s). "Habeas corpus" is a writ whose object is to bring a party before a court or a judge. "Mandamus" is a writ from a superior court to an interior court or to a public official, a corporation, etc., commanding that a specified action be taken.

Note: See Note, table 5.55. "Private cases" brought in U.S. District Courts include suits wherein litigation is between States and/or private citizens. Prisoner petitions included in this category are those filed by State prisoners naming a State or its representative(s) as the defendant(s). "Diversity of citizenship" refers to lawsuits between residents of different States.

Administrative appeals	1	16	2	11	0	4	1						

Note: "Writ of certiorari" is an order by the appellate court that is used when the court has discretion on whether or not to hear an appeal. If the appellate court grants the writ, it has the effect of ordering the lower court to certify the record and send it up to the higher court which will then hear the appeal. "U.S. civil" filings involve suits against the Federal Government brought in U.S. District Courts. "Private civil" filings involve suits wherein litigation is between States and/or private citizens. Administrative appeals include applications for enforcement or petitions for review of orders of an administrative board or agency. For a list of U.S. District Courts in each circulit, see table 5.18.

Note: The data above represent actions taken during the annual terms of the U.S. Supreme Court. "Amicus" refers to a party who is not involved directly in the suit, but who demonstrates an interest in the case by filling a supportive brief. "Decided on merits" refers to a reassessment and resolution of the substantive issues presented in the case, but that does not involve active participation of the litigants through the filling of written and oral arguments.

 $^{\mathbf{c}}$ includes cases in which the Government filed briefs as amicus curiae but did not particlpate in the argument.

Includes cases summarily affirmed, reversed, or vacated on the in forma pauperis

Source: Table adapted from data provided to SOURCEBOOK staff by the U.S. Department of Justice, Office of the Solicitor General.

a includes cases set for reargument in succeeding terms.

b Percent is based on the total cases in which the Government participated.

Note: Article II, Section 2 of the U.S. Constitution authorizes the President to grant executive clemency for Federal offenses. The U.S. Pardon Attorney, in consultation with the Deputy Attorney General, receives and reviews all petitions for executive elemency, initiates the necessary investigations, and prepares the recommendations of the Deputy Attorney General to the President (Source, p. 35). Clemency may be a reprieve, remission of fine, commutation, or pardon. A "pardon," which is generally considered only after sentence completion, restores basic civil rights and may ald in the reinstatement of professional or trade licenses that may have been lost as a result of the conviction. A "commutation" is a reduction of sentence. Petitions denied also include those that are closed administratively. The figures presented in this table do not include elemency actions on draft resisters, or military deserters and absentees during the Vietnam era.

Federal ^k	3 ,	32	President of the United States after recommendation of deputy attorney general.

Note: This information was collected through a survey malled to the 50 States, the District of Columbia, and the U.S. Department of Justice. Arkansas and Colorado did not respond to the survey. Because policies and procedures regarding commutations and pardons vary widely across jurisdictions, the reader is encouraged to consult the Source or the State authorities responsible for pardons/commutations for further explanation of the data pre-

A "commutation" changes a sentence or punishment to one that is less severe. A "pardon" forgives and releases a person from further punishment.

The Source presents the information as submitted by the responding agencies. No attempt is made by the Source to verify the information received.

b Restoration of civil rights and firearm authority constitute a large number of cases, often

separate from pardon. Cincludes 25 lifers and 7 others commuted to parole eligibility with no reduction in sen-

tence.

Clincludes pardons and/or restoration of rights. Does not include automatic first offender pardons or first offender pardons not processed by pardon board.

^eAtl commutations granted in recent years have been to relieve overcrowding, except for

those granted to persons & lready released on parole.

One conditioned pardon was granted to an inmate and 10 pardons to community cases (discharged from prison or supervision; in community for 5 years with no criminal involve-

ment), 9Request opinions of district attorney, law enforcement, and judges before any action is

taken,
In order to reduce prison crowding, Oklahoma granted 615 commutations to prisoners nearing the end of their terms. Life sentences are rarely commuted and there have been no commutations from death sentences since the mid-1960's. Fiscal year 1987.

Utah has a totally indeterminate sentencing system that gives the pardon board very broad latitude to make release decisions without the necessity of granting commutations or pardons. KFIscal year 1985.

Note: The Criminal Investigation Division of the Internal Revenue Service is responsible for enforcing the criminal provisions of the tax laws, investigating evidence of tax evasion or tax fraud, identifying and investigating persons who derive substantial income from illegal activities and who violate tax laws, investigating money laundering violations under the Bank Secrecy Act (Title 31) and recommending prosecution (Source, 1978, p. 30).

The Criminal Tax Division of the Office of Chief Counsel handles criminal tax legal matters for the Internal Revenue Service, reviews criminal cases and decides if cases warrant prosecution, coordinates criminal tax prosecutions with the U.S. Department of Justice, and provides assistance to U.S. Attorneys in criminal tax trials upon request (Source,

1978, p. 53). Some cases referred by the Criminal Investigation Division may not go through the Office of Chief Courisel. For example, recommendations to prosecute money laundering violations are referred directly to U.S. Attorneys.

1990	12,060	9,614	1,699	1,486	

Note: The U.S. Postal Inspection Service is the law enforcement arm of the U.S. Postal Service and is responsible for protecting the mail, postal facilities and employees from criminal attack, and protecting the American public from mail fraud schemes, porn-graphy, and other postal-related crimes. The number of convictions may be greater than the number of arrests in a given year because convictions may occur in a year subsequent to an arrest.

Source: U.S. Postal Service, U.S. Postal Inspection Service, *Semiannual Report*, *April 1 - September 30, 1990* (Washington, DC: U.S. Postal Inspection Service, 1990), p. 59; and data provided by the U.S. Postal Service, U.S. Postal Inspection Service. Table constructed by SOURCEBOOK staff.

Table 5.67

Arrests and convictions handled by the U.S. Postal Inspection Service

By type of offense, fiscal year 1990

Type of offense	Arrests	Convictions		
National, total	12,060	9,614	 	
Internal crime				
Mail theft	1,172	1,044		
Embezzlement	411	352		
Workers' compensation fraud	40	33

Controlled substances	1,286	657		
Bombs/explosive devices	103	76		
Miscellaneous	63	30		
Mail fraud	1,699	1,486		
Fraud against U.S. Postal Service	40	31		

Note: See Note, table 5.66. Internal crimes are those involving employees of the U.S. Postal Service and external crimes are those committed by individuals or groups outside the organization. Internal mail theft includes contractors and some non-employees engaged in mail related work such as mailroom employees. Embezzlement includes theft of funds and falsification of records. Narcotics cases include both employees and non-employees selling narcetics on postal property. Miscellaneous internal crimes include theft of propenty and sabotage of equipment. External mail theft includes theft and possession of stolen mail. Assault includes threats and assaults against on-duty postal employees. Miscellaneous external crimes include counterfeit and contraband postage, money order offenses, vandalism, and arson. Pornography/obscenity includes sexually-oriented advertisements, and scurriious and defamatory matter. Controlled substances include narcotics, steroids, drug-related proceeds, and drug paraphernalia. Miscellaneous prohibited mailings include hazardous material, firearms and weapons, intoxicants, explosives other than bombs, extortion, and false documents.

offenses	120	345	265	257	239	242	447	175
Nonimmigration offenses ^b	60,886	61,349	71,391	68,832	71,126	71,391	77,799	83,886

Note: These data were analyzed by Abt Associates, Inc. for the Federal Justice Statistics Program sponsored by the U.S. Department of Justice, Bureau of Justice Statistics. The data were provided by the Executive Office for U.S. Attorneys and the Administrative Office of the U.S. Courts and describe matters terminated in 1987. Immigration offenses include both public-order offenses (primarily illegal entry and reentry, and harboring and bringing in aliens) and traudulent offenses (primarily falsifications involving passports, naturalization papers and alien registration documents). While some immigration offenses can be committed only by aliens, residents and aliens alike may be charged with bringing in or harboring aliens, an offense category that since 1986 has included knowingly employing

allens who have no authorization to work in the United States (Source, p.3).

^aFigures for total immigration offenses differ from those presented in table 5.72 because in order to obtain a consistent trend from 1980-87, a portion of the alien and naturalization offenses for 1987 were classified as nonimmigration offenses. Uncludes unknown offense types.

Note: These data were collected by the National Center for Juvenile Justice for the U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention. The data are gathered from courts with juvenile jurisdiction in participating States. States included in this table are Alabama, Arizona, California, Florida, Hawaii, Iowa, Maryland, Mississippi, Nebraska, New Jersey, North Dakota, Pennsylvania, South Dakota, Utah, and Virginia. These States represent 36.1 percent of the U.S. youth population at risk. For methodology, definitions of terms, and offenses within categories, see Appendix 15.

Note: Questionnaires are sent annually to the U.S. Attorneys' offices in each of the Federal judicial districts eliciting data concerning indictments and convictions during the year as well as prosecutions awaiting trial on December 31 of each year. These data cover persons elected or appointed to office and career (staff) government employees; "acthers involved" include individuals who hold no official position, but who participated in an offense almed at corrupting another's public office. "Abuse of public office" includes offenses such as extortion, bribery, and conflict of interest.

also appears to have been more consistent reporting of lower-level employees who abused their office, cases that may have been overlooked in the past. For reference, the U.S. Attorneys' offices were told: "For purposes of this questionnaire, a public corruption case includes any case involving abuse of office by a public employee. We are not excluding low-level employees or minor crimes, but rather focusing on the job-relatedness of the offense and whether the offense involves abuse of the public trust placed in the employee."

^aThe 1933 figures were reviewed to attempt to Identify the reason for the substantial jump in prosecutions of Federal officials. The explanation appears to be two-fold; there clearly has been a greater focus on Federal corruption nationwide, but there

Note: The Center for Judicial Conduct Organizations conducts annual surveys of judicial conduct commissions. These commissions are typically State agencies created by statute or constitutional amendment with the mandate to receive, investigate, and dispose of complaints regarding judicial misconduct. The judicial conduct commissions handle complaints such as judicial prejudice or bias, slow processing of orders, procedural or adminis-trative irregularity, countroom demeanor, and conflict of interest. (The Center for Judicial Conduct Organizations, Judicial Conduct Reporter 3(Fall 1981), p. 2.) A confidentiality provision prohibits revealing disposition of complaints in Virginia and Wyoming. Information was not available for Arkansas, Georgia, Iowa, Maryland, Massachusetts, Rhode Island, South Dakota, Tennessee, Vermont, and West Virginia. The data presented are for 1988 and 1989; however reporting periods vary across jurisdictions, with some States reporting by calendar year and others by fiscal year. Cross jurisdiction comparisons should be done cautiously due to differences among the States in definitions of complaints and recording practices (The Center for Judicial Conduct Organizations, Judicial Conduct Reporter 7(Fall 1985) p. 1.) For the States of Idaho, Kansas, Louisiana, Michigan, and Oregon any discrepancies in totals usually are due to multiple or consolidated complaints and/or dispositions.

^aStates do not maintain uniform reporting periods. Most States reported complaints received for the calendar year 1988. However, the following States reported complaints received for calendar year 1989: Illinois, Kansas, Louislana, Michigan, Nebraska, North Dakota, and South Carolina. The following jurisdictions reported on a fiscal year basis: Alabama, District of Columbia, (10/1/88 through 9/30/89); Florida, Hawaii, Kentucky, Missouri, New Mexico, North Carolina, Utah, (7/1/88 through 6/30/89); New Jersey,

9/22/88 through 9/21/89); Texas, (9/1/88 through 8/31/89).

Category includes complaints dismissed after no investigation, minimal or initial investigation, or substantial investigation.

Remedy is not available in the jurisdiction.

dCase remanded to Commission from Supreme Court regarding appropriate recommended sanction.

Fines are not available, but costs and fees may be imposed.

Judge retired for medical disability.

9345 concerned the same case, issues, and judge, and all were investigated as one mat-

ter. Figure represents complaints filed in 1989 pending as of May 1, 1990.

Case dismissed by Court after formal charges brought due to statute of limitations

Commission can confidentially caution or reprimand. This is an informal resolution. A court can privately reprimand after formal charges are brought.
Remedy can be imposed or approved by court only.
This figure comprises 135 inquiries and 28 docketed complaints.
These cases resulted in letters to cease and desist and an admonishment.

ⁿKentucky commission cannot impose a fine, but may suspend a judge without pay.

^oThis figure represents a separate category of complaints not included in the "complaints received" category.

PMatter referred to Supreme Court with a recommendation for disciplinary action.

Cases dismissed for lack of jurisdiction.

These figures represent the same case within the State in which the judge was publicly censured, suspended for 30 days, and fined \$500.

Formal complaints were initiated

^tJudge resigned after pleading guilty to a gross misdemeanor, criminal charges were filed by the attorney general.

Only private reprimand is available.

Case referred to another committee.

WOne judge given one year probation.

XOne judge referred to higher court for counseling; one complaint withdrawn.

YIncludes all matters closed upon vacancy of office due to reasons other than resignation,

- Includes ain naters closed open vacancy of olice due to reasons offer than resignation, e.g., Judge's retirement and failure to win re-election.
 - Does not include letters and phone calls, and Judge retired prior to hearing in the Court on the Judiclary, ab-Judge resigned after public hearing by commission and recommendation of removal to

Supreme Court.

acCourt decision in 1989 removed the Commission's power to impose private censure, reprimand, or admonition.

ad One judge died while investigation pending; 5 cases administratively closed.

ae Two judges suspended from office while investigations pending; one judge resigned after

investigation initiated.

al Texas does not distinguish between types of investigations prior to dismissals and its

Commission often expends considerable resources in reaching its decisions.

ag Dismissals granted upon condition that judge take corrective action.

ah Complaint dismissed; withdrawn after Investigation.

ai The remedy of private censure, admonition, or reprimand became unavailable on May 5,

1989.

al One complaint pending as of Dec. 31, 1988.

ak Judge privately cautioned, told of Commission's concerns. Private admonition is available not as a sanction, but only as an informal action in the pre-complaint stage.

al One judge waived confidentiality, so the commission made the admonition public,

Note: In the military justice system, a General Court-Martial consists of a military judge and not less than five members (jurors), although a trial may be heard by a military judge alone, if requested by the accused (10 U.S.C. 815). A Special Court-Martial consists of not less than three members, or a military judge and not less than three members, or trial by military judge alone, if requested by the accused (10 U.S.C. 815). The jurisdiction of the Special Court-Martial is limited to non-capital offenses. In addition, a Special Court-Martial cannot adjudge a dishonorable discharge, dismissal, confinement longer than 6 months, hard labor without confinement for longer than 3 months, forfeiture of more than two-thirds pay, or any forfeiture of pay for longer than 6 months. If a bad conduct discharge (BCD) is adjudged, the Special Court-Martial must have included a verbatim record of the proceeding, counsel for the accused, and a military judge (10 U.S.C. 819). This is referred to as a Special (BCD) Court-Martial

These data reflect the combined activity of both General and Special (BCD) Courts-Martial. The data presented for years prior to and including 1976 coincide with former Federal fiscal years. The transition quarter refers to the period July 1, 1976 to Sept. 30, 1976. The fiscal year for the Federal Government is now from October 1 to September 30.

Source: Table constructed by SOURCEBOOK staff from data provided by the U.S. Department of Defense, Department of the Army.

²Includes one cadet.

bincludes one civilian.

cincludes two prisoners.

Note: See Note, table 5.92. A Summary Court-Martial is a military trial by one commissioned officer who need not be a lawyer. Punishment may not exceed 30 days in confinement, and may include reduction and forfeitures of not more than two-thirds of 1 month's pay. No counsel is turnished for prosecution or defense. Accused personnel have the option to refuse trial by Summary Court-Martial, but refusal may result in the charges being referred to a higher level court-martial. The data presented for years prior to and including 1976 coincide with former Federal fiscal years July 1 to June 30. The transition quarter refers to the period July 1, 1976 to Sept. 30, 1976. The fiscal year for the Federal Government is now from October 1 to September 30.

 $^{\rm a}{\rm Disposition}$  totals are greater than the conviction totals shown because more than one disposition may be imposed in each case.

## Section 6

## Persons under correctional supervision

Information presented in this section focuses on persons under community supervision, juveniles in public and private confinement facilities, the number and characteristics of jalls and jall inmates, and myrlad characteristics of State and Federal prison populations. In addition, information is provided on clients in drug and alcohol treatment units as well as prisoners executed and under sentence of death.

The U.S. Bureau of the Census conducts an annual survey for the Bureau of Justice Statistics examining parole and probation in the United States. The results of this survey provide data on the number, rate, and movement of persons under parole and probation supervision. When available, these data are presented for each of the 50 States.

A series of tables on juveniles confined in State and local facilities is derived from a national census of public and private juvenile facilities conducted periodically by the U.S. Bureau of the Census. Data presented include the number and confinement rate of juveniles, annual admissions and discharges, characteristics of juveniles detained, average length of stay, and average cost per resident. Trend tables based on data from the past seven censuses provide comparisons for the years 1975 through 1989. Also presented are tables reflecting demographic characteristics and problems reported by youth seeking services and shelter from runaway and homeless youth centers.

The next section presents data on local jails. This information is from the National Jail Census, conducted every five years, and the Annual Survey of Jalls which is conducted in noncensus years. Information provided includes: the number of jalls and jall inmates, average daily population, juveniles held in jails, age and capacity of jails, annual admissions and releases, inmate to staff ratios, and causes of inmate deaths. Also provided are data on AIDS testing of inmates and jails under court order. Data from the 1989 Survey of Inmates in Local Jails provide characteristics of jail inmates such as gender, race, ethnicity, offense, prior drug use, and involvement in drug treatment. Trend tables are provided when available, allowing comparisons for the years 1983 through 1989.

Information on State and Federal prisoners is derived from an annual census of all State correctional departments and the Federal Bureau of Prisons. These tables present the number and rate of prisoners under State and Federal jurisdiction at yearend, admissions and releases during the year, type of

release, and selected prisoner characteristics. A number of trend comparisons are also provided. The Survey of Inmates of State Correctional Facilities, conducted in 1986, provides additional descriptive information; this includes inmate characteristics, criminal history, characteristics of violent offenders, and involvement in prison rule violations.

A series of tables display information on female prison inmates. These data are also derived from the 1986 Survey of inmates of State Correctional Facilities as well as a survey of female State and Federal prisoners conducted by the American Correctional Association. These tables provide demographic characteristics of female inmates, criminal history, offense, alcohol and drug use, and victim-offender relationship.

This section also presents data on life term inmates, drug treatment programs for inmates, shock incarceration, AIDS cases in prison, and sex offender treatment programs in State prisons. The number of escapes from State prisons and escapees returned; and population and capacity data for U.S. Navy and U.S. Marine Corps correctional centers are also displayed.

A series of tables dealing with clients in drug and alcohol treatment units are also presented in this section. This information includes the number of drug and alcohol treatment units in the United States, clients in treatment, client characteristics (sex, age, race, ethnicity, and jurisdictional location), budgeted capacity, and utilization rate.

A section on post release supervision focuses on conditional and unconditional releases from State and Federal correctional facilities, rates of persons on parole, movement of the parole population, and persons released from parole supervision. Data derived from the National Corrections Reporting Program provide information on successful and unsuccessful Federal and State parole discharges.

The final portion of this section presents data on inmate deaths, death sentences, and executions. State and Federal prisoners sentenced to death, movement of prisoners on death row, and persons executed or otherwise removed from death row are provided. Selected characteristics of persons sentenced to death and executed are included. In addition, methods of execution used in death penalty States and execution trends are provided for each State.

Note: These data are from a survey of probation and parole agencies of the 50 States, the District of Columbia, and the Federal system on 1988 and 1989 probation and parole populations. The survey was conducted by the U.S. Bureau of the Census for the U.S. Department of Justice, Bureau of Justice Statistics. Persons on probation are defined as offenders who have been placed under the supervision of a probation agency resulting from a court order. Excluded under this definition are persons placed on bench probation, court probation, summary probation, or any status not requiring supervision by a probation agency. Parolees are offenders conditionally released from prison to parole supervision either by a discretionary parole board decision or by fulfilling the conditions for a mandatory release. Many States update their population counts, so that the Jan. 1, 1989, numbers may differ from those previously published for Dec. 31, 1988. For a discussion of survey methodology, definitions of terms, and jurisdictional explanatory notes, see Appendix 16.

^aUnpublished U.S. Bureau of the Census estimates of the adult population age 18 and plder for July 1, 1988, and July 1, 1989, were used to calculate rates.

Maine eliminated parole in 1976. See Appendix 16 for additional information.

Note: Persons under supervision of the Federal Probation System include persons placed on probation-either by U.S. District Courts, U.S. magistrates, or at the request of U.S. Attorneys (deferred prosecution)--and Federal offenders released from confinement on parole or mandatory release. A Federal prisoner is eligible for mandatory release when the prisoner has served the full term of imprisonment less "good-time" allowances. If the offender has earned more than 180 days of "good-time" credit, supervision (as if on parole) is for that period in excess of 180 days. If "good-time" is less than 180 days, release occurs without supervision.

These data represent persons who began supervision in the 12-month period prior to June 30 of the year noted. The Canal Zone, Guam, and the Virgin Islands began reporting data in 1977.

"Pretrial diversion" was called "deferred prosecution" in years prior to 1977.

"Special parole" refers to a specified period of parole attached to a term of imprisonment at sentencing. This provision is applicable to violations of certain drug laws (see Drug Abuse Prevention and Control Act of 1970, Public Law 91-513, Oct. 27, 1970, 84 Stat. 1260). "Supervised release" refers to a specified term of post-release supervision enacted in November 1987 under the Federal Sentencing Guidelines.

Note: See Note, table 6.6. Juvenile custody rates are calculated by dividing the number of juveniles in public facilities on the census date by the number of persons from 10 years of age up to the statutorily defined maximum age of original juvenile court jurisdiction in each State. For survey methodology and definitions of terms, see Appendix 17.

Prostitution	1.2	1.8	0.4	
Venereal disease	0.5	0.8	0.1	
None of the above	16.5	16.2	16.8	

Note: These data were collected by the U.S. Department of Health and Human Services and are for the period Oct. 1, 1988 to Sept. 30, 1989. The data were collected in response to Section 361 of the Runaway and Homeless Youth Act, Title III of the Juvenile Justice and Delinquency Prevention Act of 1974, as amended, including amendments and renumbering under the Anti-Drug Abuse Act of 1988 (P.L. 100-690). The Runaway and Homeless Youth Act is administered by the Family and Youth Services Bureau, within the Administration for Children, Youth and Families, Office of Human Development Services, Department of Health and Human Services.

These data are derived, in large part, from the Youth Information Forms which are filled out by basic center staff for each youth receiving shelter or ongoing services. In fiscal year 1989, there were 343 basic centers located in the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, the Northern Mariana Islands, and Palau. It is important to note that center submission of the data to the U.S. Department of Health and Human Services was voluntary. Approximately 60 percent of the centers reported at least partial data. Both the response rate and the nonrandom nature of the sample should be kept in mind when interpreting these data. The U.S. Department of Health and Human Services defines a runaway youth as a "person under 18 years of age who absents himself or herself from home or place of legal residence without the permission of parents or legal guardian." A homeless youth is defined as a "person under 18 years of age who is in need of services and without a place of shelter where he or she receives supervision and care." (Source, pp. 2, 3.)

Note: Data for 1983 and 1988 are from the National Jail Census. taken every 5 years and conducted for the Bureau of Justice Statistics by the U.S. Bureau of the Census. Questionnaires were mailed to all (N=3,358) locally-administered jalls in the Nation in January 1983. Through the use of various follow-up procedures a response rate of 99 percent was achieved. In 1988, questionnaires were mailed to 3,448 locally-administered jalls in the Nation during the week of August 1. Forty-four jalls were added to the initial mallout, and 176 were deleted, leaving a final count of 3,316 facilities. Through the use of various follow-up procedures a response rate of 100 percent was achieved.

Data for 1984, 1985, 1986, 1987, 1989, and 1990 are from the Annual Survey of Jalls that is taken during noncensus years. Data for 1984-87 and 1989 are based on figures reported for June 30. Data for 1990 are based on figures reported for June 29. The survey is based on all jails in jurisdictions with 100 or more jail inmates and a stratified random sample of jurisdictions with an average daily population of less than 100 inmates. For 1984, 1,164 jalls representing 893 jurisdictions were surveyed; in 1985, 1,142 jalls in 874 jurisdictions were represented in the survey; in 1986, 1,137 jalls in 868 jurisdictions were included; in 1987, 1,135 jalls in 866 jurisdictions were included; in 1989, 1,128 jails in 809 jurisdictions were included and in 1990 1,135 jails in 804 jurisdictions were included. Data for these survey years are estimates and therefore subject to sampling error.

A local jall is defined as a facility that holds inmates beyond arraignment, usually for more than 48 hours, and is administered by local officials. Specifically, excluded from the count were temporary lockups that house persons for less than 48 hours, physically separate drunk tanks, other holding facilities that did not hold persons after they had been formally charged, and Federal or State administered facilities, (Source, 1990, p. 5.) Connecticut, Delaware, Hawali, Rhode Island, and Vermont have combined jailprison systems and therefore were excluded in 1984-90. Alaska was also excluded as a combined system in 1987-90. In 1988, 1989, and 1990 five locally-operated jails in Alaska and eight jails that were privately-operated under contract for local governments were included.

For 1988 data, a number of items were incompletely reported. Where the number of inmates convicted and awaiting sentence was not available, estimates were accepted. In some cases data for inmates convicted and awaiting sentence may have been reported as awaiting arraignment/trial or being tried. The race of Hispanic inmates and Hispanic staff was incompletely reported. Respondents estimated approximately 20 percent of the data on time spent in jail prior to discharge.

^aJuveniles are persons of an age specified by State statute (usually under 18) initially subject to juvenile court authority even if tried as adults in criminal court. Because fewer than 1 percent of the jail population were juveniles, caution must be used in interpreting any changes over time.

Percent of rated capacity occupied is based on the 1-day count of

Note: See Note, table 6.23.

Census of Local Jalls 1988 due to revised numbers for the District of Columbia.

The number of inmates per 100,000 population could not be calculated because most jall inmates in Alaska were housed in combined jall/prison facilities operated by the State.

Source: U.S. Department of Justice, Bureau of Justice Statistics, Census of Local Jalls, 1988, NCJ-127992 (Washington, DC: U.S. Department of Justice, 1991), p. 2.

Note: See Note, table 6.23. A variety of capacity measures are used by correctional reporting authorities that reflect both available space to house inmates and the ability to staff and operate an institution. The measure reported here, rated capacity, is the number of beds or inmates assigned by a rating official to institutions within a jurisdiction. Data are for the annual periods ending Feb. 15, 1978, and June 30, 1983, and 1988.

Note: The 1989 Survey of Inmates in Local Jalls was conducted for the U.S. Department of Justice, Bureau of Justice Statistics by the U.S. Bureau of the Census. The survey was based on personal interviews with a nationally-representative sample of 5,675 inmates in 424 local jails during July, August, and September 1989. An overall response rate of 92.3 percent was achieved. A jall was defined as a locally administered confinement facility that holds persons pending adjudication or persons committed after adjudication, usually for sentences of a year or less. (Source, p. 2.) The data presented above excludes an estimated 15,393 jail inmates whose conviction status or offense was unknown. These data are estimates derived from a sample and therefore subject to sampling variation.

For information on methodology and survey sampling procedures, see Appendix 18,

Source: U.S. Department of Justice, Bureau of Justice Statistics, *Profile of Jall Inmates*, 1989, Special Report NCJ-129097 (Washington, DC: U.S. Department of Justice, April 1991), p. 5, Table 6.

^aIncludes Asians, Pacific Islanders, American Indians, Aleuts, Eskimos, and other racial

groups.

Includes nonnegligent mansiaughter.

Cincludes blackmail, extortion, hit-and-run driving with bodily injury, child abuse, and criminal endangerment.

Includes destruction of property, vandalism, hit-and-run driving without bodily injury, tres-

passing, and possession of burglary tools.

includes driving while intoxicated and driving under the influence of drugs or alcohol. Includes drunkenness, vagrancy, disorderly conduct, unlawful assembly, morals, and commercialized vice.

binicitides parole or probation violations, escape, AWOL, and flight to avoid prosecution, includes rioting, abandonment, non-support, immigration violations, invasion of privacy, liquor law violations, tax evasion, and bribery.
Includes juvenile offenses and unspecified offenses.

### Conviction status of adult jall inmates

By sex, United States, 1983-90

				Number of	jall inmates			
	National Jail Census		Annual Sun	ey of Jalls	,	National Jail Census	Annual Surv	vey of Jalls
	1983	1984	1985	1986	1987	1988	1989	1990
Total number of adults with known	******************			************				
conviction status	221,644	229,822	250,468	269,179	289,495	341,893	393,303	403,019
Convicted	107,660	113,491	123,409	127,067	139,394	166,224	189,012	195,661
Male	100,557	105,529	114,131	117,100	128,818	151,810	171,181	177,619
Female	7,103	7,962	9,278	9,967	10,576	14,414	17,831	18,042
Unconvicted	113,984	116,331	127,059	142,112	150,101	175,669	204,291	207,358
Male	105,459	107,901	117,560	130,806	137,213	159,784	184,869	188,202
Female	8,525	8,430	9,499	11,306	12,888	15,855	19,422	19, 156

Note: See Note, table 6.23. Annual Survey of Jails data may underestimate the number of convicted inmates and overestimate the number of unconvicted inmates. Some facility records do not distinguish inmates awalting sentence (or other convicted persons) from unconvicted inmates. The 1989 Survey of Inmates of Local Jails indicated that 43 percent of the Inmates were unconvicted and 57 percent were convicted. (Source, 1990, p. 2, Table 2)

### Criminal history of jail inmates

By sex, race, and Hispanic origin, United States, 1989^a

			Percent o	f jall inmates			
				Race and Hispanic origin			
	Sex		White non-	Black non-			
Criminal history	Male	Female	Hispanic	Hispanic	Hispanic	Other ^b	
Total	340,249	35,333	144,889	157,110	64,676	8,907	
No previous sentence	21.5 %	31.3 %	19.1 %	23.0 %	29.2 %	19.2 %	
Current violent offense	6.7	6.2	6.0	7.4	6.3	6.9	
Current nonviolent offense	14.8	25.1	13.1	15.6	22.9	12.3	
Violent recidivists ^C	31.4	16.2	27.3	33.7	25.5	35.7	
Current and prior violent	8.1	2.2	6,3	8.9	6.0	13.0	
Current violent only	10.9	6.2	11.1	11.0	7.7	10.0	
Prior violent only	12.4	7.8	9.9	13.8	11.8	12.7	
Nonviolent recidivists ^d	47.1	52,4	53.6	43.2	45.2	45.1	
Prior minor public-order offenses only	3.4	4.1	3.9	3.2	3.0	3.7	
Other prior offenses	43.7	48.3	49.7	40.0	42.2	41.4	

Note: See Note, table 6.35. A recidivist was defined as an inmate who reported a sentence to probation or incarceration at any time in the past. The data presented above exclude an estimated 19,971 inmates in 1989 for whom current offense and prior probation or incarceration offenses were unknown. For information on methodology and survey sampling procedures, see Appendix 18.

aPercents may not add to 100 because of rounding.
blincludes Asians, Pacific Islanders. American Indians, Aleuts, Eskimos, and other racial groups.

CViolent recidivists were convicted in the past, and at least either the current charge or a

reviolent reconvicts were convicted in the past, and at least either the current charge or a previous conviction was for a violent offense.

dNonviolent recidivists were convicted of only nonviolent offenses in the past, and their current charge or conviction was for a nonviolent offense.

elincludes drunkenness, vagrancy, loitering, disorderly conduct, minor traffic offenses, commercialized vice, invasion of privacy, contributing to the delinquency of a minor, liquor law violations, and juvenile-status offenses.

Note: See Note, table 6.23. The ratio of jall inmates to correctional officers is determined by dividing the average daily inmate population by all correctional officers except community volunteers, Jali size is based on average daily population. - indicates that there are no jalls of that size in the State.

 $^{^{}m a}$ The immediate cause of death in AIDS mortalities may have been pneumocystis carinii pneumonia, Kaposi's sarcoma, or other AIDS-related diseases.

Table 6.50

Jails testing inmates for acquired immune deficiency syndrome (AIDS)

By region and size of jail, United States, 1988

			Numb	er of jalls	that tested	;	:
Characteristic	Total ^a	No inmates for AIDS	All inmates	High risk popula- tion	Upon inmate request	Upon clinical indications for need	Upon court order
United States, total	3,316	1,655	90	203	818	1,108	547
Region							
Northeast	223	41	8	19	104	123	52
Midwest	964	527	13	51	206	287	175
South	1,599	844	64	95	335	532	236
West	530	243	5	38	173	166	84
Size of jail ^b							
Fewer than 50 inmates	2,219	1,413	51	82	366	495	286
50 to 249	798	214	32	73	284	410	169
250 to 499	159	12	3	26	86	111	51
500 to 999	89	8	3	16	51	58	28
1,000 or more inmates	51	8	1	6	31	34	13

Note: See Note, table 6.23.

aDetail adds to more than total because some jails tested inmates for more than one reason.

bBased on average daily population.

Source: U.S. Department of Justice, Bureau of Justice Statistics, *Census of Local Jalis* 1988, Bulletin NCJ-121101 (Washington, DC: U.S. Department of Justice, February 1990), p. 10, Appendix table 2.

Table 6.51

Jalls under court order or consent decree

By reason, United States, on June 30, 1988

Whether under court order and reason	Total	Ordered to limit population	Not ordered to limit population
Total number of Jalls	3,316	404	2,912
Not under court order or consent decree for specific conditions	2,904	. 84	2,820
Under court order or consent decree for:	412 ^a	320 ^a	92 ^a
Crowded living units Recreation facilities Medical facilities or services Staffing patterns Visiting practices or policies Library services Inmate classification Food service (quantity or quality) Disciplinary procedures or policies Grievance procedures or policies Totality of conditions Fire hazards	306 190 161 137 132 137 123 122 111 106 92 90	278 147 128 102 103 111 102 97 85 83 74 69	28 43 33 35 29 26 21 25 26 23 18
Other reasons	242	183	59

Note: See Note, table 6.23.

^aDetail adds to more than total number of jails under court order for specific conditions because some jails were under judicial mandate for more than one reason.

Source: U.S. Department of Justice, Bureau of Justice Statistics, *Census of Local Jalls* 1988, Bulletin NCJ-121101 (Washington, DC: U.S. Department of Justice, February 1990), p. 7, Table 16.

**Table 6.52** 

Number of Jalls holding inmates for Federal, State, or other local authorities and number being held

By region, United States, June 30, 1988⁸

Characteristic	United States, total	North- east	Midwest	South	West	
Jails	3,316	223	964	1,599	530	*** *******
Number holding inmates	•			•		
for other authorities	1,778	155	371	978	274	
Federal	550	64	113	247	126	
State	1,205	103	169	748	185	
Other local	658	66	208	285	99	
Number holding inmates because of crowding						
elsewhere	978	77	186	606	109	
Inmates	343,569	57,613	50,646	143,751	91,559	
Number being held for						
other authorities	42,046	6,014	3,466	26,875	5,691	
Federal	8,256	665	843	4,854	1,894	
State	28,481	4,602	1,202	19,683	2,994	
Other local	5,309	747	1,421	2,338	803	
Number being held						
because of crowding						
elsewhere	26,513	2,582	1,945	20,042	1,944	
			***********		******	

Note: See Note, table 6.23.

 $^{
m a}{
m Detail}$  adds to more than total because some jalls held inmates for more than one type of jurisidiction.

Source: U.S. Department of Justice, Bureau of Justice Statistics, *Census of Local Jails* 1988, Bulletin NCJ-121101 (Washington, DC: U.S. Department of Justice, February 1990), p. 7, Table 14.

Source: U.S. Department of Justice, Bureau of Justice Statistics, *Census of Local Jalls 1988*, Bulletin NCJ-121101 (Washington, DC: U.S. Department of Justice, February 1990), p. 7, Table 15.

^aColorado, Idaho, and Massachusetts, did not include the inmates in jails in their jurisdiction counts; however, the percent of jurisdiction population was calculated for all persons serving sentences to prison, whether in prison or in jail.

Sentenced prisoners in State and Federal institutions on Dec. 31

United States, 1925-89

Note: Prison population data were compiled by a yearend census of prisoners held in custody in State and Federal institutions. Data for 1925 through 1939 include sentenced prisoners in State and Federal prisons and reformatories whether committed for felonies or misdemeanors. Data for 1940 through 1970 include all adult felons serving sentences in State and Federal institutions. Since 1971, the census has included all adults or youthful offenders sentenced to a State or Federal correctional institution with maximum sentences of over 1

Beginning on Dec. 31, 1978, a distinction was made between prisoners "in custody" and prisoners "under jurisdiction." As defined in a 1978 report (U.S. Department of Justice, Bureau of Justice Statistics, Prisoners in State and Federal Institutions on December 31, 1978, NPS Bulletin SD-NPS-PSF-6 (Washington, DC: USGPO, 1980)), "in custody" refers to the direct physical control and responsibility for the body of a confined person. "Under jurisdiction" is defined as follows: A State or Federal prison system has jurisdiction over a person if it retains the legal power to incarcerate the person in one of its own prisons. Jurisdiction is not determined by the inmate's physical location; jurisdiction is determined by the legal authority holding the inmate. Examples of prisoners under the jurisdiction of a given system, but not in its custody, are those housed in local jails, in other States, or in hospitals (including mental health facilities) outside the correctional system; inmates on work release, furlough, or ball; and State prisoners held in Federal prisons or vice versa.

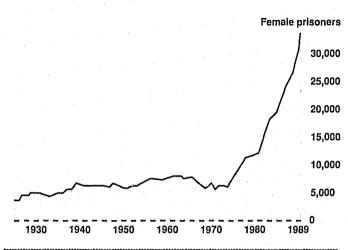

For information on methodology, definitions of terms, and a detailed explanation of revised, estimated, and noncomparable data, see Appendix 19.

Figure 6.4

Rate (per 100,000 resident population) of sentenced prisoners in State and Federal institutions on Dec. 31

United States, 1940-89

Note: See Note, figure 6.1. The rates for the period before 1980 are based on the civilian population. The civilian population represents the resident population less the armed forces stationed in the United States. Since 1980, the rates are based on the total resident population provided by the U.S. Bureau of the Census. For information on methodology, definitions of terms, and a detailed explanation of revised, estimated, and noncomparable data, see Appendix 19.

Note: See Notes, figures 6.1 and 6.4. Both custody and jurisdiction figures are shown for 1977 to facilitate year to year comparison. Data for 1984-1987 have been revised from previous presentations. For information on methodology, definitions of terms, and a detailed explanation of revised, estimated, and noncomparable data, see Appendix 19.

Note: See Notes, figures 6.1 and 6.4. Sentenced prisoners are defined as those serving sentences of more than 1 year. The data for the years 1971-77 represent sentenced prisoners in the custody of State and Federal institutions. The data for 1978-89 represent sentenced prisoners under the jurisdiction of State and Federal correctional authorities. Population estimates are provided by the U.S. Bureau of the Census. Data for 1985 and 1986 have been revised from previous presentations. For information on methodology, definitions of terms, and jurisdictional explanatory notes, see Appendix 19.

^aFigures include both jail and prison inmates; jails and prisons are combined in one system.

^bAll data for Arizona, California, the District of Columbia, Georgia, Illinois, Indiana, Iowa,
Massachusetts, Michigan, North Carolina, Texas, West Virginia (men), and Wyoming are
custody, rather than jurisdiction counts. Florida's counts are based on custody data.

^cCounts of inmates by sentence length may be slightly incorrect. See "Sentencing information" for the relevant jurisdictions in Appendix 19.

Note: See Note, figure 6.1. All figures on admissions and releases are of prisoners sentenced to more than 1 year. The data represents the number of transactions and not the number of individual prisoners who were involved in such movements. Because of different counting procedures among the States, a "0" entry in any category can mean that: (1) the State uses this category of admission or release but had no inmates in the category during 1989; (2) the State uses this category but cannot report the number of inmates in the category; or (3) the State does not use this category, "Unconditional releases" include expiration of sentence, commutation of sentence, and other such unqualified discharges, "Conditional releases" are those involving some form of supervision over the offender upon

return to the community and include parole, probation, supervised mandatory release (early release because of good behavior), and other forms of conditional discharge. For information on methodology, definitions of terms, and jurisdictional explanatory notes, see Appendix 19,

^aFigures include both jail and prison inmates; Jails and prisons are combined in one system.
Numbers for admission categories are estimated.

				Releases				
Total	Conditional releases	Uncondi- tional releases	Escapes and absent without leave	Out on appeal or bond	Transfers to other juris- dictions	Deaths	Other releases	Number of prisoners on Dec. 31, 1989

Median education	10th grade	10th grade	

Note: These data were collected by the U.S. Bureau of the Census for the U.S. Department Note: These data were collected by the U.S. Bureau of the Census for the U.S. Department of Justice, Bureau of Justice Statistics through the National Corrections Reporting Program (NCRP). Thirty-six States and the District of Columbia provided data on prison admissions, releases, and parole entries during 1985. Thirty-six States and the Federal Bureau of Prisons provided data on discharges from parole in 1985.

The 188,821 admissions reported in these States represented three-fourths of all the admissions to State prisons in 1985. New court commitments are delined as persons without

admissions to State prisons in 1985. New court commitments are defined as persons without prior prison time served for the offense for which they were committed.

Data on sex were reported for 99.8 percent of the 188,821 admissions to prison with a sentence of more than a year, data on race for 92.7 percent, data on ethnicity for 77.2 percent, and data on education for 55.1 percent. Data on sex were also reported for 99.8 percent of the 133,755 new court commitments with a sentence of more than a year, data on race for 92.1 percent, data on ethnicity for 75.5 percent, and data on education for 53 percent. Data on age at admission were reported for 100 percent of all admissions and 100 percent of new court commitments. The median is the point above which and below which 50 percent of all

These data are estimates derived from a sample and therefore subject to sampling variation. For methodology, offenses within categories, and jurisdictional explanatory notes, see Appendix 20.

Note: These data were collected by the U.S. Bureau of the Census for the Bureau of Justice Statistics through the Survey of Inmates of State Correctional Facilities. This survey, conducted in 1979 and 1986, employs a stratified probability sampling design with the probabilities proportional to the size of the correctional facility. In 1979, 11,397 interviews were conducted at 215 prisons with a selected sample of about 12,000 inmates. In 1986, 13,711 interviews were conducted at 275 prisons from a sample of approximately 15,000 inmates. In 1979, the State prison population was an estimated 274,563. In 1986, the estimated prison population was 450,416. For each characteristic other than ethnicity and income, data were available for at least 99 percent of the inmates. Ethnicity data were available for 95 percent of the inmates in both 1979 and 1986. Income data were available for 50 percent of the inmates in 1979 and 89 percent of the inmates in 1986. These data are estimates derived from a sample and therefore subject to sampling variation.

Source: U.S. Department of Justice, Bureau of Justice Statistics, *Profile of State Prison Immates 1986*, Special Report NCJ-109926 (Washington, DC: U.S. Department of Justice, January 1988), p. 3, Tables 1 and 2. Table adapted by SOURCEBOOK staff.

^aSentence length refers to the maximum sentence that an offender may be required to serve for the most serious offense.

^bHomicide includes all deaths where the offender intentionally killed someone without legal

^aThe median age was 26 in 1979 and 28 in 1986.

^bThe median number of years education was 11 in 1979 and 10 in 1986.

Note: These data were collected by the U.S. Bureau of the Census for the U.S. Department of Justice, Bureau of Justice Statistics through the Survey of Inmates in State Correctional Facilities. The sample design is a stratified two-stage selection with the probability of selection proportional to the size of the correctional facility. In the first stage the sample is selected independently from two frames: the first for males only, and a second to allow an oversample of females. Within each frame, facilities are stratified by type (prison versus community corrections facility) and by census region. In the second stage, interviewers visit each selected facility and select a sample of inmates using predetermined sampling procedures. In 1979, 11,397 interviews were conduced at 215 prisons with a selected sample of about 12,000 inmates. In 1986, 13,711 interviews at 275 facilities were conducted from a sample of about 15,000 inmates. The estimated number of female inmates is 11,080 in 1979 and 19,812 in 1986. The estimated number of male inmates is 263,484 in 1979 and 430,604 in 1986. These data are estimates derived from a sample and therefore subject to sampling variation.

Note: These data are from a survey conducted by the American Correctional Association's Task Force on the Female Offender. In late 1997 the Task Force mailed surveys to over 400 correctional facilities in all 50 States, the District of Columbia, and the Federal Bureau of Prisons. Each facility coordinator was asked to administer the questionnaire to a specified number of adult inmates or juvenile residents, using a random selection procedure specified in the instructions. Overall, the requested sample was 2,958 respondents. This represents approximately 6,9 percent of the approximately 43,000 female inmates in the United States.

approximately 6.9 percent of the approximately 43,000 female inmates in the United States.

Usable responses were received from a total of 2,094 inmates, or 70.8 percent of those requested. The number of adult respondents was 1,880 and the number of juvenile respondents was 214. These data are estimates derived from a sample and therefore subject to sampling variation.

Information on number of arrests was not available for 162 adults and 12 juveniles; number of times incarcerated, 162 adults and 15 juveniles; and first arrest offense, 256 adults and 18 juveniles.

Used in month before current offense	49.6	56.0	
Used daily in month before current offense	39.2	42.7	
Major drug ^C			
Ever used	53.8	52.3	
Ever used on a regular basis ^b	39.3	34.8	
Used in month before current offense	32,2	27.8	
Used dally in month before current offense	24.2	18,3	
Under the influence of drugs at the			
time of current offense	33.7	35.4	

Note: See Note, table 6.67. Drug use history was based on self-reports provided by the inmates. In the interview, inmates were asked a very detailed set of questions about each of 10 drugs. Drug use histories were developed by examining the responses to all 10 sets of questions. The drugs that were specifically asked about were heroin or methadone; amphetamines and barbiturates (alone or in combination); methaqualone (quaaludes); cocaine; LSD; PCP; and marihuana or hashish. Alcohol use was examined in a separate set of questions.

Note: These data are based on the 1986 Survey of Inmates in State Correctional Facilities conducted by the U.S. Bureau of the Census with the sponsorship of the U.S. Department of Justice, Bureau of Justice Statistics. The sample design employed a stratified two-stage selection with the probabilities proportional to the size of the correctional facility. The sample was selected independently from two frames, one for males only, and a second to allow an oversample of females. Within each frame, facilities were stratified by type (prison versus community corrections facility) and by census region. In the second stage, interviewers visited each selected facility and selected a sample of immates using predetermined sampling procedures. The design called for 275 facilities and a sample of about 15,000. Of the total of 14,649 inmates selected for the survey, 13,711 were successfully interviewed. Estimates for the entire inmate population were developed from a weighting procedure based on the original probability of selection into the sample. These data are estimates derived from a sample and therefore subject to sampling variation.

a Excluded are 147 cases for which race, sex, or offense was not reported. bThe category female inmates of "other" races has been excluded because of the small number of unweighted cases; however, "other" females are included in the total for all inmates.

Source: U.S. Department of Justice, Bureau of Justice Statistics, *Violent State Prisoners* and *Their Victims*, Special Report NCJ-124133 (Washington, DC: U.S. Department of Justice, July 1990), p. 2, Table 2.

Note: See Note, table 6.77. The set of questions about victims was asked of each inmate whose "controlling offense" was a violent crime. The controlling offense is the most serious current offense, defined as the one with the longest sentence attached to it. Inmates were asked if there was one or more than one victim present and then were asked a series of questions tailored to the situation. The victim's sex, race, and age are reported as they were by the inmate. The categories "both" and "mixed" refer only to multiple victim crimes where the characteristics of the victims differed. In cases of multiple victims who all had the same characteristics, the victims were coded with single victims of the same type. The category of "males," for example, refers to one male alone or to a group of male victims. The category of "both" is reserved for more than one victim when all victims were not of the same sex. In the cases of victim relationship to the offender, the victim with the closest relation to the offender defined the relationship.

Note: These data were collected by the U.S. Bureau of the Census for the U.S. Department of Justice, Bureau of Justice Statistics (BJS) through the Survey of Inmates of State Correctional Facilities. This survey is part of the National Prisoner Statistics Program, sponsored and designed by BJS and is carried out every 5 or 6 years. The data are derived from a nationally-representative sample of State prison inmates in 1986.

The sample design is a stratified two-stage selection with the probabilities proportional to the size of the correctional facility. The sample is selected independently from two frames, one for males only and a second to allow an oversample of females. Within each frame, facilities are stratified by type (prison versus community corrections facility) and by census region. In the second stage, interviewers visit each chosen facility and select a sample of prisoners using predetermined sampling procedures. In 1986, 13,711 Interviews were conducted at 275 facilities from a sample of about 15,000.

Rule violators were inmates who were formally charged with or written up for breaking prison rules or regulations during their current admission. Being written up means receiving tickets or incident reports and having records of the incidents placed in

administrative files. Prison rule-breaking involves a wide variety of misbehavior, ranging from minor infractions such as horseplay, failing to follow sanitary regulations, smoking where prohibited, and abusive language toward staff, to serious offenses such as use of contraband drugs and alcohol, possession of a weapon, offering a bribe, extortion, rioting, assault, and murder. Up to 2.0 percent missing data are excluded from the categories of race/ethnicity, age, marital status, education, military

service, and immediate family members who served time.

^aAny race. ^bAmerican Indians, Alaska Natives, Asians, and Pacific Island-

ers. ^CToo few cases to obtain a statistically reliable estimate.

Note: See Note, table 6.81. This table excludes approximately 3 percent of all inmates who received punishment in the form of fines, fees, or resti-tution requirements, or lost rights to participate in drug, alcohol, vocation-al, or educational programs; and 1 percent for whom type of punishment was not reported. Information concerning facility size and security level was based on the 1984 Census of State Adult Correctional Facilities, a complete enumeration of prisons and community-based correctional facilities (U.S. Department of Justice, Bureau of Justice Statistics, 1984 Census of State Adult Correctional Facilities, NCJ-105585 (Washington, DC: USGPO, 1987)).

^bBased on average daily population.

Eased on average daily population.

Excludes inmates in specialized facilities not using the maximum/medium/minimum classification, including reception classification and diagnosis centers; medical treatment units; hospitals; youthful offender facilities; and work and prerelease centers.

Any race.

Note: This information was collected through a survey of the 50 States, the District of Colum-Note: This information was conscient intogrilla survey on the 50 states, the District of Combi-bia, and the Federal Bureau of Prisons conducted in November 1990. States not appearing in the table either had no shock incarceration programs at the time of the survey, had legislative-ity authorized programs but no funding, or had program proposals under review. Shock incar-ceration programs involve abbreviated prison stays in military style boot camps for eligible inmates. The Source presents the information as submitted by the responding agencies. No attempt is made by the Source to verify the information received.

West Virginia	1,556	269 ^{ae}	17,4	Yes ^d	Individual counseling, group counseling, inmate support groups.	Yes, Paroled sex offenders must seek counseling. In incest cases, the parolee cannot live with the victim.
Wisconsin	6,035	1,117	18.5	No	Individual counseling, group counseling, inmate support groups,	No, only if ordered by court or paroling authority.
Wyoming	900	300 1	33,0	No	Individual counseling, group counseling, inmate support groups.	No

Note: This information was collected through a survey mailed to the 50 States, the District of Columbia, and the Federal Bureau of Prisons. Maryland, Michigan, and the Federal Bureau of Prisons did not respond to the survey. The survey did not specify which offenses were to be included as sex offenses, therefore each State used its own definition of "sex offenders". Total population figures were reported by each State. However, the survey specified no time frame for reporting population figures. As a result, population figures may differ from those presented elsewhere in SOURCEBOOK.

The Source presents the information as submitted by the responding agencies. No attempt is made by the Source to verify the information received.

Note: These data were obtained from annual surveys of correctional facilities in the 50 States, the District of Columbia, and the Federal Bureau of Prisons. These surveys were conducted by the U.S. Department of Justice, National Institute of Justice in October or November of each year beginning in 1985. Inconsistencies in correctional record keeping indicate that the numbers should be considered minimum estimates of the actual number of acquired immuno deficiency syndrome (AIDS) cases.

Note: The Federal Bureau of Prisons is responsible for two distinct Federal offender popula-tions: (1) individuals who are housed in, have escaped from, or are in transit between Federal institutions and community treatment centers; and (2) individuals who are housed in, awaiting trial in, or enroute to contract facilities, i.e., State, local, or private facilities that are under contract with the Federal Bureau of Prisons for the housing of Federal offenders. Approximately 10 percent of the total Federal prison population was housed in contract facilities at the end of fiscal year 1988. For a definition of "mandatory release," see Note, table 6.3.

^aData prior to 1974 reflect sentenced prisoners only.

^bBeginning in fiscal year 1970, figures include only Bureau of Prisons Institutions.

^c"Other" includes other temporary movement such as furloughs, writs, etc.

^dBeginning in 1958, the term mandatory release replaces the term conditional release.

Note: These data are from the National Drug and Alcoholism Treatment Unit Survey (NDATUS) and reflect information as of Sep. 30, 1989. The 1989 NDATUS was a joint effort between the National Institute on Drug Abuse (NIDA) and the National Institute on Alcohol Abuse and Alcoholism (NIAAA). The NDATUS is a national survey which is designed to measure the location, scope, and characteristics of drug abuse and alcoholism treatment and prevention facilities, services, and activities throughout the 50 States, the District of Columbia, Guam, Puerto Rico and the Virgin Islands. Both public and privately funded programs are included.

A total of 7.759 treatment units recognised to the survey was the survey of the survey was the survey of the survey was the survey.

A total of 7,759 treatment units responded to the survey reporting a total of 734,955 clients in treatment. However, this table excludes treatment units which did not report budgeted capacity for alcohol or drug abuse clients. The total number of units in this table is not equal to the sum of units in tables 6,98 and 6.102 because combined units are counted only once. Readers should note that utilization rates may be affected by problems that some units experience in determining a budgeted capacity level for outpatient treatment. (Source, p. 13.) For a discussion of survey methodology, data limitations, and definitions of terms, see Appendix 21.

		:		

Note: See Note, table 6.94. A total of 6,287 drug abuse only and combined drug abuse and alcoholism units serving 351,430 drug abuse clients on Sept. 30, 1989 responded to the survey. However, this table excludes treatment units which did not report budgeted capacity for drug abuse clients. For a discussion of survey methodology, data limitations, and definitions of terms, see Appendix 21.

Scurce: U.S. Department of Health and Human Services, National Institute on Drug Abuse and National Institute on Alcohol Abuse and Alcoholism, *National Drug and Alcoholism Treatment Unit Survey (NDATUS) 1989, Main Findings Report* (Rockville, MD: U.S. Department of Health and Human Services, 1990), p. 33.

^aIncludes combined alcohol/drug abuse treatment units.

Note: See Note, table 6.94. A total of 6,493 alcoholism only and combined alcoholism and drug abuse units serving 383,525 alcoholism clients on Sept. 30, 1989 responded to the survey. However, this table excludes treatment units which did not report budgeted capacity for alcoholism clients. For a discussion of survey methodology, data limitations, and definitions of terms, see Appendix 21.

Note: Data have been collected from the organizations or agencies through a mail survey. The Navy also operates other small correctional centers and detention spaces in the United States and overseas. All facilities are for Naval personnel 17 years of age and older awaiting court-martial or serving court-martial sentences. "Normal capacity" is the number of inmates the facility was designed to hold.

Note: This information was collected through a survey mailed to the departments of correction in the 50 States, the District of Columbia, Guam, Puerto Rico, and the Federal Bureau of Prisons. Categories may not add to total because community custody escapes, walkaways, and late returns are not calculated in the total escape category. Number of escaped inmates returned may include returned escapes from previous years. The Source presents the information as submitted by the responding agencies. No attempt is made by the Source to verify the information received.

a Fiscal year 1985. b Fiscal year 1986. c As of Jan. 1, 1986. d As of Jan. 1, 1987. e As of Jan. 31, 1988.

As of Jan. 31, 1989.

Sestimated.

33 facility escapes, 120 community custody escapes, security-level breakdown unavailable. 19 facility escapes, 123 community custody escapes, security-level breakdown unavailable.

Perimeter escapes only.

Also housed in closed facilities.

Escapes from community-based facilities only.

Includes one escape from an all-level female institution.

[&]quot;Includes one escape from an all-level female institution.

Apprehended.
Oincludes State inmate escapes from county jalls.
PEscapes from Department of Corrections only.

Returned or apprehended. Includes suicide while on escape status.
Returned or in custody.

Note: These data were compiled by the National Institute of Justice as part of a program designed to track the development of electronic monitors. The National Institute of Justice maintains a voluntary list of manufacturers of electronic monitoring equipment. These manufacturers voluntarily identified the programs using their equipment. Based on this information, each program director was contacted and asked for information on each offender being monitored on Feb. 14, 1988, the program history, and any other available program information. - Indicates no offenders known to be electronically monitored in the State.

^cProgram just started, no participants.

Note: See Notes, figure 6.1 and table 6.57. For information on methodology, definitions of terms, and jurisdictional explanatory notes, see Appendix 19.

Source: U.S. Department of Justice, Bureau of Justice Statistics, *Correctional Populations in the United States*, 1989, NCJ-130445 (Washington, DC: USGPO, 1991), Table 5.13,

^aFigures include both jall and prison inmates, jalls and prisons are combined in one

Pystem.

Dall data for Arizona, California, the District of Columbia, Georgia, Illinois, Indiana, Iowa, Massachusetts, Michigan, North Carolina, Texas, West Virginia (men), and Wyoming are custody, rather than jurisdiction counts. Florida's counts are based on custody data.

^CNumbers for release categories are estimated.

^CCounts of inmates by sentence length may be slightly incorrect. See "Sentencing information" for the relevant jurisdiction in Appendix 18.

Other offenses	2.2	10	13.5	1.5	11	15.9	3,2	9	10.3

Note: See Note, table 6.62. The 36 States and the District of Columbia reported a total of 163,718 releases, which accounted for three-fourths of the releases from State prisons during 1985. Of the releases, 80,357 were first releases, being released from prison for the first time on their current sentence. Excluded from first releases are persons leaving prison in 1985 who had previously been conditionally released from prison for the same offense and then were returned to prison for violating the conditions of that release. All data exclude persons released from prison by escape, death, transfer, appeal, or detainer. Data on offense distribution and time served in prison are based on all first releases with a sentence of more than a year for whom the most serious offense, race or ethnicity, and time served were reported. These data were estimated based on 38,884 white releases, 29,817 black releases, and 6,553 Hispanic releases.

The median is the amount of time served that marks the point below which and above which 50 percent of all amounts fall. For methodology, offenses within categories, and jurisdictional explanatory notes, see Appendix 20.

^aRace includes persons of Hispanic origin.

Hispanic releases include persons of all races.

CHomicide includes all deaths where the offender intentionally killed someone without legal justification or accidentally killed someone through reckless or grossly negligent conduct.

Other offenses	60	89.2	18	20.8	13	18.5	23	21

Note: See Notes, tables 6.62 and 6.113. These data were estimated based on 37,086 releases. Data on sentence length are based on all first releases with a sentence of more than a year for whom the most serious offense and sentence length were reported. Data on time served in prison are based on all first releases for whom the most serious offense and time served were reported. The median marks the point below which and above which 50 percent of all sentence lengths fall. For methodology, offenses within categories, and jurisdictional explanatory notes, see Appendix 20.

^aThe percent of maximum sentence length is calculated by dividing the mean minimum time to be served and the mean time

served by the mean maximum sentence length.

Sentence length refers to the maximum sentence that an offender may be required to serve for the most serious offense.

^CMinimum time to be served is the jurisdiction's estimate of the shortest time that each admitted prisoner must serve before

becoming eligible for release.

Cincludes centences of "life without parole," "life plus additional

[&]quot;includes sentences of "life without parole," "life plus additional years," "life," and "death."

"Excludes sentences of "life without parole," "life plus additional years," "life," and "death."

'Homicide includes ell deaths where the offender intentionally killed someone without legal justification or accidentally killed someone through reckless or grossly negligent conduct.

Note: See Notes, figure 6.1 and table 6.57. Admissions and releases are of prisoners sentenced to more than 1 year. Most, but not all, States reserve prison for offenders sontenced to a year or more. For information on methodology, definitions of terms, and jurisdictional explanatory notes, see Appendix 19.

Massachusetts, Michigan, North Carolina, Texas, West Virginia (men), and Wyoming are custody, rather than jurisdiction counts. Florida's counts are based on custody data, CNumbers for admission categories are estimated.

Counts of inmates by sentence length may be slightly incorrect. See "Sentencing informa-

Source: U.S. Department of Justice, Bureau of Justice Statistics, *Correctional Populations in the United States, 1989*, NCJ-130445 (Washington, DC: USGPO, 1991), Table 5.16.

^aFigures include both jall and prison inmates; jalls and prisons are combined in one

system.

Note: These data refer only to defendants sentenced as adults. The "percent" column refers to Inmates who were granted parole as a proportion of the total number of Inmates considered for parole. The Source notes, "while the percentage granted parole has traditionally served as an indicator of paroling policy, it has several limitations. First, it is affected by changes in types of offenders entering the system. For example, the rate of parole grants for auto thieves (whose number entering the Federal system had declined over the years) may not be the same as for narcotics dealers (whose number has risen). Second, the measure may be affected by changes in sentencing practices" (Source, *October 1, 1988 to September 30, 1989*, p. 9). The data do not reflect decisions modified under the Commission's appellate or reopening provisions. Data for 1978 have been revised from earlier reports by the Source.

For a list of States In regions, see Appendix 4.

Note: The NAACP Legal Defense and Educational Fund, Inc. periodically collects data on Note: The NAACP Legal Defense and Educational Fund, inc. periodically collects data on persons on death row. As of Apr. 24, 1991, 36 jurisdictions, the Federal government, and the United States military had capital punishment laws, and 34 jurisdictions and the United States military had at least 1 prisoner under sentence of death. Between Jan. 1, 1973 and Apr. 24, 1991, an estimated 1,091 convictions or sentences have been reversed or vacated on grounds other than constitutional. Between Jan. 1, 1973 and May 30, 1990, an estimated 558 death sentences have been vacated as unconstitutional.

Note: Thirty-six States and the Federal government had death penalty statutes in effect on Dec. 31, 1988 and 35 States and the Federal government had death penalty statutes in effect on Dec. 31, 1989. The Attorney General's office in Vermont has concluded that, although they have not been found unconstitutional, existing Vermont death penalty statutes do not conform to Constitutional requirements and the State has been removed from the listing of jurisdictions authorizing the death penalty. Some figures shown for yearend 1988 have been revised from previous presentations.

Source; U.S. Department of Justice, Bureau of Justice Statistics, Capital Punishment 1989, Bulletin NCJ-124545 (Washington, DC: U.S. Department of Justice, September 1990), p. 6.

^aIncludes five deaths due to natural causes (1 each in New Jersey, illinois, Georgia, Kentucky, and California) and 1 death due to suicide (Georgia).

Excludes five males held under Armed Forces jurisdiction with a military death sentence for

Note: See Note, table 6.129. For information on methodology, definitions of terms, and jurisdictional explanatory notes, see Appendix 19.

CDispositions of death sentences other than by execution include dismissal of indictment, reversal of judgement, commutations, resentencing, order of a new trial, and death.

An American Indian prisoner in New Mexico had his death sentence overturned by an appellate court and was awaiting resentencing.

Source: U.S. Department of Justice, Bureau of Justice Statistics, *Correctional Populations in the United States, 1989*, NCJ-130445 (Washington, DC: USGPO, 1991), Tables 7.2 and 7.4. Table adapted by SOURCEBOOK staff.

^aTwenty-three American Indians and 14 Asians were under a death sentence at yearend; 2 American Indians and 2 Asians were received from court, and an American Indian prisoner had a death sentence removed.

oner had a death sentence removed.

Hispanics may be of any race. This category does not figure into the total of all prisoners under sentence of death presented in tables 6.128, 6.129, and 6.132.

Note: See Note, table 6.129. This table identifies the 1989 yearend status of persons removed from death row during the year. Disposition is final only for those who are serving reduced sentences, who are deceased, or who have been found not guilty. Persons in each of the other categories are subject to further legal proceedings prior to final disposition. For information on methodology, definitions of terms, and jurisdictional explanatory notes, see Appendix 19.

life imprisonment or a term of years.

^CFurther legal proceedings may have followed the vacating of sentences and of convictions and may have resulted in new sentences of death. An American Indian prisoner in New Mexico had his sentence

overturned and was awaiting resentencing.

An inmate was removed from Indiana and transferred to Ohio under another death sentence.

Source: U.S. Department of Justice, Bureau of Justice Statistics, Correctional Populations in the United States, 1989, NCJ-130445 (Washington, DC: USGPO, 1991), Table 7.17. Table adapted by SOURCEBOOK staff.

^aA white inmate died of natural causes in each of the following States: New Jersey, Illinois, Georgia, and Kentucky. A black inmate died of natural causes in California. One white inmate in Georgia committed suicide.

Commutation effects an immediate change in sentence from death to

Note: In three States, Maine, Minnesota, and Wisconsin, the death penalty was abolished for the entire period covered by the table. Alaska and Hawaii have not had the death penalty since 1960, when they were first included as States. The death penalty was abolished in Michigan in 1963 and in lowa and West Virginia in 1965. Death penalty legistation expired in 1975 in North Dakota and was not renewed. Death penalty laws were found unconstitutional in Kansas (1973), the District of Columbia (1973), Rhode Island (1979), and New York (1984) and have not been rewritten. In South Dakota, the death penalty was abolished again in 1977, and restored in 1979. Oregon abolished the death penalty in 1914, restored it in 1920, abolished the diagnin in 1964, restored it in 1978, and it was found to be unconstitutional in 1981. Massachusetts abolished the death penalty in 1980, restored it in 1983, and it was found unconstitutional in 1984. In California, the death penalty was found to be partially unconstitutional in 1984. In the following States death penalty laws

were found unconstitutional but have been revised to meet constitutional standards: Colorado, Delaware, Illinois, Indiana, Kentucky, Maryland, Missouri, New Hampshire, New Jersey, New Mexico, North Carolina, Ohio, Okiahoma, Pennsylvania, Tennessee, and Washington. For information on methodology, definitions of terms, and jurisdictional explanatory notes, see Appendix 19.

^aAs States, Alaska and Hawaii are included in the series beginning Jan. 1, 1960.

#### Methods of execution in States authorizing the death penalty

## By State, 1989

Lethal injection	Electrocution	Lethal gas	Hanging	Firing squad
Arkansas ^a ,b Colorado Delaware Idaho ^a Illinois	Alabama Arkansasa,b Connecticut Florida Georgia	Arizona California Maryland Mississippia,c Missouri ^a	Montana ^a New Hampshire ^{a,d} Washington ^a	ldaho ^a Utah ^a
Mississippia.c Missouria	Indiana Kentucky	North Carolinaa		
Montana ^a	Louisiana			
Nevada New Hampshire ^a ,d	Nebraska Ohio ^e			
New Jersey New Mexico	Pennsylvania South Carolina			
North Carolina ^a	Tennessee			
Oklahoma Oregon	Virginia			
South Dakota Texas				
Jtaha Washington ^a Wyoming				

Note: See Note, table 6.128. Federal executions are to be carried out according to the method of the State in which performed.

^aAuthorizes two methods of execution. ^bArkansas authorizes lethal injection for those whose capital offense occurred after July 4, 1983; for those whose offense occurred before that date, the condemned prisoner may elect

1983; for those whose offense occurred before that date, the condemned prisoner may elect lethal Injection or electrocution.

Mississippi authorizes lethal injection for those convicted airer July 1, 1984; execution of those prior to that date is to be carried out with lethal gas.

New Hampshire authorizes hanging only if lethal injection could not be given.

On June 13, 1989, the Ohio legislature passed a bill to adopt lethal injection as the method of execution. This bill was vetoed by the Governor on July 3, 1989. Action to override the veto was pending in the legislature at yearend.

#### Annotated list of sources and references

Only published documents cited by the Sourcebook are listed here. Information provided to Sourcebook staff in the form of single tables or mimeographed reports are not listed.

Where data from more than one edition of a publication were used in trend tables, only the latest edition of the publication is annotated

Sources typically contain more tables than were selected for presentation in the *Sourcebook*. Narratives that describe or analyze the tables and the procedures used to collect the data may also be presented in greater detail in the original source.

Administrative Office of the United States Courts

#### 1989 Annual Report of the Director

(Annual. Washington: USGPO, 1990. 479 pages, 153 tables (estimated), 12 figures, 2 appendices.)

Presents data for year ending June 30, 1989 and trend tables for years ending June 30, 1973-89. SOURCEBOOK tables 1.44, 1.46, 1.50, 1.64, 1.66, 5.15-5.21, 5.23-5.26, 5.55-5.60, 5.68, 6.3-6.5.

This report begins with an overview of Federal judicial business, administration, appropriations, and expenditures, and provides data on all aspects of the Federal court system. A detailed analysis of the workload is presented for the U.S. courts of appeals and the U.S. district courts. For the appellate courts, information is presented on filings, terminations, types of appeals, State prisoner petitions, etc. Information for the U.S. district courts includes civil cases filed, terminated, and pending; prisoner petitions; juror utilization; Federal public/community defenders; criminal cases filed, terminated, and pending; dispositions of criminal cases filed; amount of time from filing to dispositions of criminal defendants; and length of civil and criminal trials. Data are provided in aggregate form and are also presented by circuit and district court.

#### Federal Court Management Statistics 1989

(Annual. Washington: Administrative Office of the United States Courts, 1989. 167 pages, 143 tables.) Presents data for years ending June 30, 1984-89. SOURCEBOOK table 1.49.

This report presents workload and performance statistics on both civil and criminal matters for each of the U.S. courts of appeals and each of the 94 U.S. district courts. Data for the former include appeals filed, terminated, and pending; number of judgeships; types of appeals; number of opinions and percent reversed or denied; median time from filing to disposition; and other matters pertaining to the appellate courts. Data for the U.S. district courts include cases filed, terminated, and pending; actions per judgeship; median time from filing to disposition; juror usage index; and other matters related to activities in U.S. district courts. As part of the profile, each court is ranked on various dimensions. Two tables presenting the national profile for all U.S. courts of appeals and all U.S. district courts on workload and performance measures are also included.

## Federal Judicial Workload Statistics December 31, 1989

(Annual. Washington: Administrative Office of the United States Courts, 1990. 69 pages, 31 tables, 1 appendix.)

Presents data for 1988 and 1989 and trend tables for 1985-89. SOURCEBOOK table 5.14.

This report reviews the judicial workload in Federal courts. Data on criminal and civil cases filed, terminated, and pending in U.S. district courts and courts of appeal are presented by district and in aggregate form. Information on persons received and removed from probation supervision under the Federal jurisdiction is presented, and U.S. Bankruptcy Court workload data are also highlighted. Data on pretrial services, juror service, the U.S. Court of International Trade, and the U.S. Claims Court are also presented.

# Grand and Petit Juror Service in United States District Courts

(Annual. Washington: USGPO, 1990. 180 pages, 112 tables, 3 figures, 4 appendices.)

Presents data for year ending June 30, 1989 and trend tables for years ending June 30, 1982-89. SOURCEBOOK tables 1.62, 1.63.

This report on juror utilization in the Federal courts is presented in three sections. The tirst section presents information on grand jury operation, petit juror activity, comparisons of grand jury duration for the period July 1, 1984-June 30, 1989, and comparisons of petit juror utilization for the period June 30, 1984-June 30, 1989. The second section contains information on 1989 payments for

juror attendance, subsistence, mileage, and other costs. The final section provides individual profile pages that highlight pertinent juror statistics for each of the 94 U.S. district courts. Historical data for a 5-year period are also provided along with comments discussing specific factors affecting juror usage. Appendix A is a glossary of terms found in the report. Appendix B lists the most recent rules setting the size of juries adopted by U.S. District Courts. Appendix C provides the local rules assessing juror costs for late settlements for each of the circuits. Appendix D presents the 1939 schedule of juror fees.

Report on Applications for Orders Authorizing or Approving the Interception of Wire, Oral, or Electronic Communications for the Period January 1, 1989 to December 31, 1989

(Annual. Washington: Administrative Office of the United States Courts, 1990. 67 pages, 13 tables, 4 figures, 1 appendix.)

Presents data for 1989 and trend tables for 1979-89. SOURCEBOOK tables 5.2-5.4.

This report details the applications for orders authorizing or approving the interception of wire, oral, or electronic communications, as required by Title 18, United States Code, Section 2519(1). There is a description of the reporting requirements of the statute, regulations for filing reports, and summaries of the reports submitted by judges and prosecuting officials. The tables in the body of the report include data on grants, denials, and authorized length of intercept orders; offenses for which court intercept orders were granted; types of surveillance used; average costs of electronic surveillance; arrests and convictions resulting from electronic surveillance; and a summary of authorized intercepts from 1979 to the year of the report. The appendix tables contain detailed data from reports filed by Federal and State judges and prosecuting officials on court-authorized electronic surveillance activities during the focal year and on arrests, trials, and convictions as a result of intercepts installed during previous years.

#### American Correctional Association

1991 Directory of Juvenile and Adult Correctional Departments, Institutions, Agencies and Paroling Authorities

(Annual. Laurel, MD: American Correctional Association, 1991. 663 pages, 18 tables, 2 figures.)

Presents data for 1990. SOURCEBOOK tables 1.79-1.81, 1.93, 1.94, 6.107, 6.108.

This directory describes the organization and administrative structure of correctional services in all 50 States, the District of Columbia, the Federal Bureau of Prisons, and the U.S. territories. For each jurisdiction, data are provided on institutions, parole boards, and parole and probation services for both adults and juveniles. Descriptions and addresses of each facility within each jurisdiction are provided.

Summary statistics are provided on personnel, fiscal expenditures, correctional populations, paroling authorities, types of facilities, and the death penalty. Information is provided on the U.S. Department of Justice, military correctional facilities, and the Canadian correctional system. New York City, Philadelphia, and Cook County (Chicago) departments of correction are included.

# The Female Offender: What Does the Future Hold?

(Special. Laurel, MD: American Correctional Association, 1990. 108 pages, 188 tables, 32 figures, 1 appendix.)

Presents data for 1987. SOURCEBOOK tables 6.69, 6.72, 6.75, 6.76.

This report presents the findings from three surveys conducted in 1987 by the American Correctional Association's Task Force on the Female Offender. The report is divided into five sections. The first section provides descriptive information from a survey of adult and juvenile female offenders incarcerated in over 400 correctional facilities in the United States. The second section profiles local government jails designed to house female inmates. The third section presents information on State correctional facilities for females. The fourth section summarizes the Task Force recommendations for improving the administration and treatment of female inmates. The final section presents detailed findings from the female offender survey, the local government jail survey, and the State correctional facility survey. Some of the information from the surveys includes: demographic information on female offenders, their living arrangements prior to incarceration, number of children, physical and sexual abuse, use of alcohol and drugs, employment history, arrest and sentence information, the physical characteristics, capacity and utilization, and staffing of local jails and State correctional facilities.

## Vital Statistics in Corrections 1991

(Periodic, Laurel, MD: American Correctional Association, 1991. 74 pages, 48 tables, 18 figures.) Presents data for 1990 and 1991, and trend tables for 1840-1991. SOURCEBOOK table 1.83.

This report is divided into seven sections and presents detailed information on correctional departments in the United States. Section one presents operating expenditures and budgets for State correctional systems. Section two includes salary and benefit information for personnel employed in State systems. Section three discusses educational and training requirements as well as salaries for State correctional officers. Section four presents information on State and county probation and parole departments. Statistics on inmate populations, court orders, recidivism, and the death penalty are presented in section five. Section six discusses State employee unions and organizations. The final section provides data on jails and detention centers including budgets, inmate populations, and personnel. Also included is an overview of the American Correctional Association.

American Judicature Society, The Center for Judicial Conduct Organizations

## Judicial Conduct Reporter

(Quarterly. Chicago: American Judicature Society. Contents and dates of data presented: See below. SOURCEBOOK tables 1.61, 5.91.)

The *Judicial Conduct Reporter* is a quarterly publication presenting recent developments in laws relating to judicial conduct and ethics as well as data on the procedures and operations of State judicial conduct commissions. The newsletter features annual reports on the disposition of complaints of judicial misconduct and on the personnel and budgets of the State commissions. Also presented are reviews of recent law review articles in the field.

## Anno, B. Jaye

"The Cost of Correctional Health Care: Results of a National Survey"

(Special. Chicago: National Commission on Correctional Health Care, August 1990. Mimeographed. 19 pages, 11 tables, 1 appendix.)

Presents data for fiscal year 1989. SOURCE-BOOK table 1.9.

This report presents data on the cost of correctional health care in 46 State correctional systems and the Federal Bureau of Prisons. Data are presented on total depart-

mental expenditures; total health care expenditures, including mental health care; and annual health care costs per inmate. Line items included in correctional health care service budgets are also provided. Comparisons of per inmate health care costs are provided for each jurisdiction for three time periods. The report also contains an appendix which provides a rank ordering, by jurisdiction, of total departmental expenditures and health care expenditures.

Astin, Alexander W.; William S. Korn; and Ellyne R. Berz

The American Freshman: National Norms for Fall 1990

(Annual. Higher Education Research Institute. Los Angeles: University of California, 1990. 166 pages, 12 tables, 9 figures, 6 appendices.)

Presents data for 1990. SOURCEBOOK tables 2.74-2.80.

This report presents national data on the characteristics of students entering American colleges and universities as first-time, full-time freshmen in Fall 1990. These data are based on the responses of 194,182 students at 382 of the Nation's 2- and 4-year colleges and universities, and have been statistically adjusted to reflect the responses of the 1.6 million first-time, full-time students entering college as freshmen in Fall 1990. Major trends from the Fall 1990 survey are also presented.

Bennack, Frank A., Jr.

The American Public's Hopes and Fears for the Decade of the 1990s

(Special. New York: The Hearst Corporation, 1989. 51 pages, 79 tables.)

Presents data for 1989. SOURCEBOOK table 2.34.

The results of the sixth annual Hearst survey are presented in this report. The national survey asked respondents about their expectations concerning a number of topics for the 1990s. The topics included international affairs, science, technology, the environment, the economy, selected social issues, and lifestyle. The report is divided into three sections: a summary of the findings, the findings in tabular form, and the survey methodology.

Bremby, Roderick L.

"Salaries of Municipal Officials for 1989"

(Annual. *The Municipal Year Book 1990*, pp. 93-112. Washington: International City Management Association, 1990. 20 pages, 3 tables, 1 figure.)

Presents data for 1989 and trend tables for 1984-89. SOURCEBOOK table 1.42.

This article presents data collected from a survey of municipal officials conducted by the International City Management Association in the Summer of 1989. The salaries of municipal officials are presented by job title, city size, region, city population, and form of government. Selected central city and suburban officials' salaries are also presented, as are a comparison of city manager and chief administrative officer salaries. City officials surveyed include the mayor; chief appointed administrator; assistant city manager; city clerk; chief financial officer; controller; treasurer; engineer; police chief; fire chief; librarian; and directors of public works, planning, personnel, parks and recreation, data processing, and purchasing.

## **CEGA Publishing**

## Corrections Compendium

(Monthly. Lincoln, NE: CEGA Publishing. Contents and dates of data presented: See below. SOURCEBOOK tables 1.67, 1.68, 1.82, 1.84, 1.89-1.92, 3.151, 5.63, 6.83-6.87, 6.109.)

The Corrections Compendium is a monthly publication focusing on issues in the area of corrections. Regular features of the Corrections Compendium include articles on subjects of special interest in the field, sections on court decisions, legal issues, and news items relating to corrections. Each issue also carries the results of a survey and charts on a selected issue (e.g., May 1990 goodtime credit for prison inmates).

The Council of State Governments

#### The Book of the States 1990-91

(Biennial. Lexington, KY; The Council of State Governments, 1990. 623 pages, 240 tables, 4 figures. Dates of data presented: See below. SOURCEBOOK tables 1.55, 1.56.)

The Book of the States is a reference work containing information on the operations, revenues, expenditures, and services of State governments. The book is divided into

ten sections: State constitutions; the State Executive Branch; the State Legislative Branch; the State Judicial Branch; the State Elections Branch; the State Finances Branch; State Management and Administration; Selected State Activities, Issues, Services; Intergovernmental Affairs; and a final section on historical and contemporary State characteristics. Data that were collected by the Council of State Governments or that were compiled from other sources are presented on a wide variety of topics.

Executive Office of the President, Office of Management and Budget

# Budget of the United States Government, Fiscal Year 1992

(Annual. Washington: USGPO, 1991. 2,026 pages, 600 tables (estimated).)

Presents data for fiscal 1990-94 and trend tables for fiscal 1976-94. SOURCEBOOK table 1.10.

This report details the actual budgetary expenditures for fiscal 1990 and the projected expenditures for fiscal 1991-94. Data are presented on expenditures of the Federal Government, by department, and on the budget as a whole. The report is divided into eight chapters. Chapter one provides an introduction, including the President's message and a general overview of the budget. Themes and priorities for future expenditures are presented in chapter two. Chapter three discusses receipts, user fees, other collections, and tax expenditures. The fourth chapter provides Federal programs by function, agency, and account. The Budget Enforcement Act Preview Report and current services estimates are provided in chapter five. Chapter six includes alternative budget presentations and chapter seven provides a series of historical tables. The final chapter includes a glossary of budget terms, a list of charts and tables, and an index.

Executive Office of the President, Office of National Drug Control Policy

# National Drug Control Strategy: Budget Summary

(Annual. Washington: Executive Office of the President, 1991. 219 pages, 110 tables (estimated), 1 figure.)

Presents data for fiscal 1992 and trend tables for fiscal 1981-92. SOURCEBOOK table 1.12.

This report summarizes the budget authority for the National Drug Control Strategy de-

veloped by the Office of National Drug Control Policy. The report is divided into three sections. The first section outlines Federal drug funding priorities and resource requirements. The second section provides descriptions of the fiscal year 1992 budget requests for each of the approximately 50 agencies and accounts that comprise the National Drug Control Budget. The final section provides additional information on funding and employment levels, including trend tables presenting funding levels for fiscal 1981 through the President's request for 1992.

Finn, Peter and Sarah Colson

# Civil Protection Orders: Legislation, Current Court Practice, and Enforcement

(Special. U.S. Department of Justice, National Institute of Justice. Washington: USGPO, 1990. 68 pages, 1 table, 13 figures, 1 appendix.)

Presents data for 1988. SOURCEBOOK tables 1.102, 1.103.

This report presents information on civil protection order statutes in 48 States and the District of Columbia. The primary purpose is to explain how judges can effectively use and enforce civil protection orders to protect victims of domestic violence. The report is divided into five chapters. Chapter one presents the advantages and limitations of civil protection orders. Chapter two reviews State statutes that provide the legal basis for issuing and enforcing civil protection orders. The process for petitioning for an order is discussed in chapter three. Chapter four describes the types of relief authorized by State statutes and reaffirmed on appeal. Chapter five examines the components of an effective court policy designed to ensure that orders are enforced and violators are punished. Finally, an appendix provides citations to State protection order statutes.

Gallup, George, Jr.

## The Gallup Poll

(Princeton, NJ: The Gallup Poll. Periodicity, contents, and dates of data presented: See below. SOURCEBOOK tables 2.1, 2.7, 2.18, 2.19.)

The results of public opinion research conducted by the Gallup Organization are released at least four times monthly in *The Gallup Poll*. A wide variety of topics are included in these surveys including problems facing the nation and personal drinking habits. A brief note on sample size, sample toler-

ance, and survey dates is included in each release.

# The Gallup Report The Gallup Poll Monthly

(Monthly. Princeton, NJ: The Gallup Poll. Contents and dates of data presented: See below. SOURCEBOOK tables 2.3, 2.4, 2.9, 2.10, 2.13-2.15, 2.22-2.24, 2.26-2.29, 2.32, 2.35, 2.37, 2.38, 2.40-2.43, 2.47, 2.50, 2.54, 2.55, 2.88, 2.96, 2.100, 2.103-2.107, Fig. 2.1, 3.99-3.103.)

The Gallup Report, The Gallup Poll Monthly (12/89 and following) contain the results of opinion surveys conducted by the Gallup Poll. Political, social, and economic trends are presented in monthly issues that include many topics (e.g., September 1990--President Bush's job performance, Soviet troops in the Middle East, handgun policies, safety in U.S. cities, and government spending on the space program). A brief note on sample size, sampling tolerance, and survey dates is included in each issue.

# Goldman, Sheldon

"The Bush Imprint on the Judiciary: Carrying on a Tradition"

(*Judicature* 74 (April-May 1991), pp. 294-306. 13 pages, 2 tables.)

Presents data for 1963-90. SOURCEBOOK tables 1.47, 1.48.

This article reports the results of research on judgeships to Federal district and appeals courts. Background characteristics of those appointed by President Bush during 1989 and 1990 are compared with those of appointees made by Presidents Johnson, Nixon, Ford, Carter, and Reagan. Appointees who had noteworthy political and legal credentials are highlighted as are controversial appointees.

Harris, Louis

### The Harris Poll

(Los Angeles: Creators Syndicate, Inc. Periodicity, contents, and dates of data presented: See below. SOURCEBOOK tables 2.8, 2.36, 2.90, 2.92.)

The Harris Poll is a weekly release of public opinion research conducted by Louis Harris and Associates. The releases deal with a variety of topics including confidence in selected institutions, funding for anti-drug programs, and the U.S. Supreme Court's rulings on abortion and flag-burning. A brief

note on sample size and survey dates is included in each release.

Healy, Kerry Murphy

## State and Local Experience with Drug Paraphernalia Laws

(Special. U.S. Department of Justice, National Institute of Justice. Washington: U.S. Department of Justice, 1988. 139 pages, 3 tables, 6 appendices.)

Presents data for 1988 and a trend table for 1977-86. SOURCEBOOK table 1.111.

This report presents information on State and local anti-paraphernalia laws. This includes a discussion of State laws and county and municipal ordinances pertaining to the sale of drug paraphernalia as well as the role of special interest groups. Also presented are issues related to the investigation and prosecution of drug paraphernalia cases, including the use of forfeiture legislation. The impact of State and local laws on the sale and availability of drug paraphernalia is assessed and criticisms of these laws are outlined. The need for revised model legislation as well as the need for Federal laws controlling various aspects of the paraphernalia industry are discussed. A series of appendices provide the following information: the 1979 Model Drug Paraphernalia Act, survey instruments used for the project, a list of selected drug paraphernalia prosecutions and constitutional challenges, the geographical distribution of survey respondents, a table of statutory provisions pertaining to drug paraphernalia in the 50 States, and advertising trends before and after the Model Drug Paraphernalia Act.

Hoetmer, Gerard J.

"Police, Fire, and Refuse Collection Personnel and Expenditures--1989"

(Annual. *The Municipal Year Book 1990*, pp. 123-180. Washington: International City Management Association, 1990. 57 pages, 25 tables, 1 figure.)

Presents data for 1989 and trend tables for 1979-89. SOURCEBOOK tables 1.34, 1.35, 1.41.

This report presents data gathered through a mail survey sent to all municipalities with populations of 10,000 persons and over in the United States. The survey was conducted in January 1989 by the International City Management Association. Data are presented on personnel, salaries, and expenditures for police, fire, and refuse departments as are

data from several similar surveys conducted in previous years.

Hunzeker, Donna

## State Legislative Response to Crimes Against the Elderly

(Special. Washington: National Conference of State Legislatures, 1990. 25 pages, 2 tables, 2 figures, 4 appendices.)

Presents data for 1989. SOURCEBOOK table 1.101.

This report presents information on State legislative responses to crimes against the elderly. It provides information on the extent of elder abuse, the creation of adult protective services, the existence of mandatory reporting statutes, investigative and support services, and extended care facilities. Data are presented on penalties and enhanced penalties for crimes and abuse against the elderly and handicapped. In addition, information on crime prevention and community education, and future legislation is provided. Finally, the four appendices list the statutes which pertain specifically to crimes against the elderly.

Insurance Information Institute

# 1991 Property/Casualty Insurance Facts

(Annual. New York: Insurance Information Institute, 1991. 131 pages, 99 tables, 32 figures.)

Presents data for 1989 and trend tables for 1980-89. SOURCEBOOK table 3.135.

This yearbook provides data on the property and liability segment of the insurance industry in the United States. Statistics are presented on property and liability insurance companies; policies written and in force, by type of coverage; and insurance written through special programs such as flood insurance and the Federal Crime Insurance Program. Data are presented on insurance losses due to fire, natural disasters, traffic accidents, crime, and other causes.

Johnston, Lloyd D.; Patrick M. O'Malley; and Jerald G. Bachman

Drug Use Among American High School Seniors, College Students and Young Adults, 1975-1990

(Annual. Washington: USGPO, 1991.)

Presents data for 1990 and trend tables for 1975-90. SOURCEBOOK tables 2.67-2.73, 3.75-3.82.

This document is the thirteenth in an annual series reporting on drug use and related attitudes of high school seniors, college students, and young adults in the United States. The research is sponsored by the U.S. Department of Health and Human Services, National Institute on Drug Abuse. Two major topics treated in the report are trends in drug use among American high school students since 1975 and prevalence of drug use among American high school seniors. Also reported are data on school grade at first use; intensity of "high" produced by drug use; attitudes and beliefs among seniors about various types of drug use; and their perceptions of certain relevant aspects of the social environment, such as parental disapproval of drug use or availability of drugs. Beginning in 1985, data on the prevalence and trends in drug use among young adults who have completed high school are incorporated into the report.

Karter, Michael J., Jr.

"Fire Loss in the United States During 1989"

(Annual. *Fire Journal* 84(September/October 1990), pp. 56-57. 10 pages, 6 tables, 5 figures.)

Presents data for 1989 and trend tables for 1977-89. SOURCEBOOK table 3.158.

This article reports the results of the 1989 National Fire Experience Survey conducted by the National Fire Protection Association. Data are presented that describe fire incidence, deaths, injuries, and property loss, by fire type (structural, vehicular, and arson), property use, and geographic region.

Killam, Christine A.

"Salaries of County Officials for 1989"

(Annual. *The Municipal Year Book 1990*, pp. 113-122. Washington: International City Management Association, 1990. 10 pages, 3 tables, 1 figure.)

Presents data for 1989. SOURCEBOOK table 1.43.

This article presents data collected from the 1989 County Salary Survey conducted by the International City Management Association. The salaries of county officials are presented by job title, region, county population, and county type. County officials surveyed include the governing board chairperson/president/county judge, county manager, county administrator, clerk to the governing board, chief financial officer, county health officer, planning director, county engineer, director of welfare/human services, chief law enforcement official, purchasing director, and personnel director.

Knopp, Fay Honey and William Ferree Stevenson.

Nationwide Survey of Juvenile and Adult Sex-Offender Treatment Programs, 1990

(Special. Orwell, VT: The Safer Society Program, 1990. 39 pages, 9 tables, 2 appendices.)

Presents data for 1990. SOURCEBOOK table 1.99.

This report presents data from a national survey of treatment programs for both juvenile and adult sex-offenders. The number of facilities available and the type of treatment services provided are presented for each State and the District of Columbia. Also included is information about the treatment of special juvenile and adult populations. The appendices provide sample questionnaires and the names and addresses of the facilities that were surveyed.

Louis Harris and Associates, Inc.

# Judges' Opinions on Procedural Issues

(Special. Los Angeles: Louis Harris and Associates, 1987. 118 pages, 65 tables, 1 appendix.)

Presents data for 1987. SOURCEBOOK tables 2.45, 2.46.

The results of a national survey of State and Federal trial judges are presented in this report. It is divided into eleven chapters which cover a number of judicial issues. Chapters one through three provide a profile of judges, the courts in which they serve, and staff support. Chapters four through eight report the results of questions about causes of delay in litigation, the discovery process, expert witnesses, court administration, and bifurcation. Chapters nine through eleven present opinions about judicial education, attitudes toward the jury system, and issues concerning costs. Finally, the appendix provides a copy of the questionnaire used in the survey.

Moini, Saira and Theodore M. Hammett

1989 Update: AIDS in Correctional Facilities

(Annual. U.S. Department of Justice, National Institute of Justice. Washington: USGPO, 1990. 69 pages, 21 tables.)

Presents data for 1989 and trend tables for 1985-89. SOURCEBOOK table 6.88.

This report presents the results of the fifth annual survey of AIDS in correctional facilities. A survey of the 50 States, the Federal Bureau of Prisons, and a sample of large city and county jail systems has been conducted each year since 1985 by the National Institute of Justice. Information is presented on the incidence of AIDS cases in the inmate population, AIDS education and testing, precautionary measures, counseling, and notification policies. Also provided is information on housing, medical care, and psychological services available to AIDS infected inmates. A discussion of research developments and AIDS related legal issues is also included.

National Center for State Courts

## Survey of Judicial Salaries

(Biannual. Williamsburg, VA: National Center for State Courts, 1991. 12 pages, 2 tables.)

Presents data for January 1991. SOURCE-BOOK table 1.57.

This report presents State judicial salaries as of January 1991. Salaries are presented for judges in the highest court, the intermediate appellate court, general trial court, and the courts of limited and special jurisdiction of each State. Information is also presented on salary levels of the Chief Justice and Associate Justices of the highest court and intermediate court as well as salaries of State court administrators.

National Conference of State Legislatures

"Legal Dispositional and Confinement Policies for Delinquent Youth"

(Special. *State Legislative Report*. Denver: National Conference of State Legislatures, July 1988, 13 pages, 2 tables, 1 appendix.)

Presents data for 1988. SOURCEBOOK table 1.98.

This report presents data on statutory provisions and administrative practices regarding

juvenile justice. Specific topics include dispositional options available to juvenile court judges, decisionmaking responsibility for the placement of juveniles, and general sentencing practices for confinement of delinquent youth. The report includes two charts. The first presents dispositional options for youth adjudicated delinquent for each State and the second lists the most common patterns followed by States in confining delinquents in youth corrections facilities. An appendix provides juvenile justice statutory citations for the 50 States.

National Criminal Justice Association

## A Guide to State Controlled Substances Acts

(Special. Washington: National Criminal Justice Association, 1991. 146 pages, 18 tables, 4 appendices.)

Presents data for 1990. SOURCEBOOK tables 1.109, 1.110.

This guide presents a comparative review of the controlled substances acts (CSA's) of the 50 States, the District of Columbia, and the Federal government. These acts govern the possession, use, sale, distribution, and manufacture of drugs that may lead to dependence or abuse. The guide is divided into five sections. The first section briefly reviews the history of Federal drug control efforts, the development of the model Uniform Controlled Substances Acts, and general variations among State CSA's. The second section describes the Federal CSA and recent amendments contained in the Anti-Drug Abuse Act of 1988 and Comprehensive Crime Control Act of 1990. The next section includes a general overview of each State's CSA and a comparative analysis of State and Federal CSA provisions. Section three lists summaries of each State's CSA in tabular form for comparison purposes. These summaries include highlights of the particular State's controlled substances act and lists penalties, forfeiture possibilities, and other consequences associated with violation of the CSA. The final section of the guide contains five appendices which list elements of controlled substances acts; penalties for basic violations; substances targeted for enhanced penalties; types of assets forfeitable; currency transaction reporting statutes; and drug tax provisions. The U.S. Attorney General's guidelines on seized and forfeited property are also presented.

National Opinion Research Center

## General Social Surveys, 1972-90

(Annual. Storrs, CT: Roper Center for Public Opinion Research, University of Connecticut, distributors. Contents: See below.)

Presents data for 1972-78, 1980, and 1982-90. SOURCEBOOK tables 2.12, 2.20, 2.21, 2.30, 2.31, 2.33, 2.39, 2.44, 2.49, 2.51-2.53, 2.56, 2.87, 2.101, 2.102, 3.35, 3.54, 3.55.

This cumulative data file merges all 17 General Social Surveys into a single machine-readable data file with each survey year as a subfile. Interviews were conducted by the National Opinion Research Center during February, March, and April of 1972-78, 1980, and 1982 through 1990. The data are derived from a national probability sample of English speaking adults, 18 years or older, living in non-institutional arrangements in the continental United States. Survey questions relate to a variety of social issues, including politics, abortion, religion, homosexuality, crime, law enforcement, guns, and capital punishment.

The items appearing on the surveys are one of three types: permanent questions that occur in each survey, rotating questions that appear two out of every three years, and a few questions that occur in a single survey. A comprehensive codebook entitled *General Social Surveys*, 1972-1990: Cumulative Codebook is published by the Roper Center for Public Opinion Research. Survey methodology and the data program are explained in detail in the document.

National Organization for Victim Assistance

# Victim Rights and Services: A Legislative Directory 1988/1989

(Annual. U.S. Department of Justice, Office of Justice Programs. Washington: National Organization for Victim Assistance, 1990. 315 pages, 6 tables.)

Presents data for 1988. SOURCEBOOK table 1.100.

This guide to crime victim legislation contains four sections. The first covers victim-related legislation by subject including issues such as victim compensation, funding of victim services, victim bill of rights, and the victim's involvement in criminal justice proceedings. Part two presents a summary of crime victim legislation in tabular form by State. A table describing the elements of victim compensation programs by State, a table listing drunk driving countermeasures taken, and a table listing issues covered in AIDS legislation are also included. The third section presents

legislative summaries by State and the final section presents samples of victim statutes from several States.

NFO Research, Inc.

## Final Report, Drug Awareness and Attitude Study

(Special. Chicago: NFO Research, Inc., 1990. 34 pages, 23 tables, 1 appendix.)

Presents data for 1990. SOURCEBOOK tables 2.81-2.86.

This report presents data from the drug awareness and attitude study conducted by NFO Research, Inc. for Edelman Public Relations. A nationally-representative sample of 500 fifth and sixth graders were surveyed during the Spring of 1990. The report begins with an executive summary of the survey findings. Detailed findings in tabular form are presented on the awareness and classification of drugs, knowledge of drug use, discussions with others about drugs, the ability to describe drugs, and drugs seen in public areas. Data is also presented on whether respondents had been offered drugs, perceptions of the effects of drugs, attitudes toward and intentions to try drugs, self esteem and peer pressure questions, and the awareness of drug education programs. An appendix provides a demographic comparison between the sample and U.S. households.

Police Foundation

# On the Move: The Status of Women in Policing

(Special. Washington: Police Foundation, 1990. 197 pages, 48 tables.)

Presents data for 1978 and 1986-88. SOURCEBOOK tables 1.26-1.33.

This report presents data from a national mail survey of State and municipal police departments and detailed case studies of five major city police agencies. Information from the mail survey is presented on: (1) departmental policies and procedures related to recruitment, selection, and promotion; (2) the number and percentage of male and female officers by ethnic group, rank, and assignment; (3) male and female officer turnover rates; and (4) other personnel policies related to women, including policies on affirmative action, sexual harassment, and pregnancy and maternity leave.

The case studies examine practices in five major departments serving populations over 100,000: Detroit, Washington, DC, Birmingham, Chicago, and Phoenix. Data from each

of the case study cities are presented on recruitment, selection, and training. Additional data are presented on male and female officer performance, evaluations, and assignments in Birmingham, Washington, DC, Detroit, and Phoenix. In addition, information is provided on promotions, women as supervisors, and turnover in the case study agencies. An appendix provides additional information on the number of surveys distributed and the survey response rate as well as other data on State and municipal police departments.

Snyder, Howard N.; Terrence A. Finnegan; Ellen H. Nimick; Melissa H. Sickmund; Dennis P. Sullivan; and Nancy J. Tierney

## Juvenile Court Statistics 1987

(Annual. Office of Juvenile Justice and Delinquency Prevention. Washington: USGPO, 1990. 175 pages, 73 tables, 49 figures, 3 appendices.)

Presents data for 1987 and trend tables for 1986-87. SOURCEBOOK tables 5.80-5.89.

This report is a product of the National Juvenile Court Data Archive and presents juvenile court workload data for 1987. The data were collected by the National Center for Juvenile Justice through a grant provided by the U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention. The data describe the number and characteristics of delinquency and status offense cases disposed by courts with juvenile jurisdiction in participating States. The report is divided into three sections: national estimates of delinquency cases; national estimates of petitioned status offense cases; and sample specific analyses of caseloads for jurisdictions providing comparable information. Data are presented on age, race, and sex of juverules under court jurisdiction, offense type, case dispositions, use of secure detention, probation, and out of home placement. Trends for 1986 and 1987 are provided when available. The appendices provide methodology and estimation procedures, a glossary of terms, and reported cases in each jurisdiction for 1987.

U.S. Department of Health and Human Services, National Institute on Drug Abuse

National Household Survey on Drug Abuse: Main Findings 1988

(Biennial. Washington: USGPO, 1990. 258 pages, 100 tables.)

Presents data for 1988. SOURCEBOOK tables 3.83-3.88, 3.93-3.97.

This report presents data on drug abuse among the Nation's population age 12 and over. Prevalence estimates for specific drugs are provided for age groups, sex and race, as well as other demographic characteristics. The drugs included are marihuana, cocaine, inhalants, hallucinogens, PCP, heroin, stimulants, sedatives, tranquilizers, analgesics, other psychotherapeutics, alcohol, cigarettes, and smokeless tobacco. Estimates of frequency of use as well as problems associated with use are provided. Population estimates, based on the prevalence figures, are also presented. A series of appendices provide methodological and statistical information as well as definitions of terms. Finally, selected portions of the survey questionnaire are provided. These portions include questions on drugs.

National Household Survey on Drug Abuse: Population Estimates 1990

(Biennial. Washington: USGPO, 1991. 121 pages, 142 tables.)

Presents data for 1990. SOURCEBOOK tables 3.89-3.92.

This report presents data on drug abuse among the Nation's population age 12 and over. Prevalence estimates for specific drugs are provided for age groups, sex and race, as well as region of the country. The drugs included are: marihuana, cocaine, crack, inhalants, hallucinogens, PCP, psychotherapeutics, stimulants, sedatives, tranquilizers, analgesics, alcohol, cigarettes, smokeless tobacco, and heroin. Population estimates, based on the prevalence figures, are also provided. Prevalence and population estimates for use of any illicit drug and needle use are also presented by age group, sex, race, and region. Finally, estimates of frequency of use during the past year for marihuana, cocaine, and alcohol users are presented.

U.S. Department of Health and Human Services, National Institute on Drug Abuse and National Institute on Alcohol Abuse and Alcoholism

National Drug and Alcoholism Treatment Unit Survey (NDATUS) 1989, Main Findings Report

(Annual. Rockville, MD: U.S. Department of Health and Human Services, 1990. 73 pages, 51 tables, 2 appendices.)

Presents data for 1989. SOURCEBOOK tables 6.94-6.106.

This report presents data on drug abuse and alcoholism treatment units in the 50 States,

the District of Columbia, Guam, Puerto Rico, and the Virgin Islands. These data were collected through the National Drug and Alcoholism Treatment Unit Survey (NDATUS) and reflect information as of Sept. 30, 1989. The information is presented by treatment type, location, ownership, specialized populations served, and types of services provided. Also provided is a profile of total drug abuse and alcoholism clients in all treatment units that responded to the survey. The client tables present the number of persons in treatment, the number of clients who could be treated (budgeted capacity), and the utilization rate. Additional client data include distributions by demographic characteristics, which are displayed separately for outpatients and inpatients. Also presented are tabulations of the annual unduplicated client count, the number of family members or others receiving services, and the estimated number of intravenous drug users. State level tabulations are provided for client demographics and for the number of treatment units, clients in treatment, budgeted capacity. and utilization rate. Also presented is information on sources of funding and average cost per client. Two appendices provide a glossary of terms used in the survey and the data collection instrument.

U.S. Department of Health and Human Services, Office of Human Development Services

"Annual Report to the Congress on the Runaway and Homeless Youth Program, Fiscal Year 1989"

(Annual. Washington: U.S. Department of Health and Human Services, 1990. Mimeographed. 108 pages, 25 tables, 4 appendices.)

Presents data for fiscal 1989. SOURCE-BOOK tables 6.21, 6.22.

This report is submitted to Congress by the U.S. Department of Health and Human Services pursuant to the Runaway and Homeless Youth Act enacted in 1974. The report provides an overview of the status of the runaway and homeless youth centers funded under the Act. The legislative history of the program, and information regarding the extent of the problem of runaway and homeless youth are presented. Data are provided for centers funded during fiscal year 1989, clients served, and services provided. Preliminary results of a follow-up study of former clients are also presented. Also discussed are the major activities undertaken by the U.S. Department of Health and Human Services to support the Runaway and Homeless Youth Basic Centers Program, such as funding of additional grants and research initiatives. This report also contains four appendices. The first provides the names and addresses of the basic center grantees of the Runaway and Homeless Youth Program for fiscal year 1989. In the second appendix, names and addresses of regional youth contacts are provided. The third appendix provides names and addresses of coordinated network grantees. Finally, a list of research and development (discretionary) grantees, for fiscal year 1989, is provided.

U.S. Department of Justice, Bureau of Justice Statistics

## Capital Punishment 1989

(Annual. Bulletin NCJ-124545. Washington: U.S. Department of Justice, September 1990. 13 pages, 13 tables, 3 figures.)

Presents data for 1989 and trend tables for 1930-89. SOURCEBOOK tables 6.128, 6.129, 6.136, 6.139, 6.140.

This bulletin presents data on prisoners sentenced to death, current methods of execution, and recent changes in capital punishment legislation. Prisoner information includes sex, race, ethnicity, age, education, marital status, and criminal history.

#### Census of Local Jails 1988

(Periodic. Bulletin NCJ-121101. Washington: U.S. Department of Justice, February 1990. 11 pages, 24 tables.)

Presents data for 1988 and trend tables for 1978-88. SOURCEBOOK tables 1.73, 1.75-1.77, 6.25-6.27, 6.29, 6.50-6.52, 6.54.

This document presents selected findings from the June 30, 1988 National Jail Census conducted by the U.S. Bureau of the Census for the Bureau of Justice Statistics. This census is the fifth in a series of surveys of local jails conducted in 1970, 1972, 1978, and 1983. Data are presented on the number of jails and inmates for both 1983 and 1988 by State and region. Also included are data on jail overcrowding, average daily jail population, admissions and releases, rated jail capacity, inmate deaths, number of jail employees, jails under court order, and jail expenditures. This bulletin precedes a detailed five volume publication presenting additional data from the 1988 Census.

## Census of Local Jalls, 1988

(Periodic, NCJ-127992, Washington: U.S. Department of Justice, 1991, 36 pages, 44 tables.)

Presents data for 1988. SOURCEBOOK tables 1.71, 1.72, 1.74, 6.24, 6.28, 6.30, 6.31, 6.33, 6.36, 6.39, 6.47-6.49.

This report presents findings from the 1988 Census of Local Jails conducted by the U.S. Bureau of the Census for the U.S. Department of Justice, Bureau of Justice Statistics. This census marks the fifth in a series of surveys of local jails conducted in 1970, 1972, 1978, and 1983. Data presented are as of June 30, 1988 and include tables on the number of jails and jail inmates, jail capacity, use of space, and number of jalls under court order or consent decree. Also presented are data on programs and health services available for inmates and causes of inmate deaths. Number and characteristics of jail employees, jail expenditures, and expansion plans are also provided. Data on juveniles detained in local jails are included as are data on amount of time served prior to release. The survey methodology is described and an appendix provides a copy of the question-

# Correctional Populations in the United States, 1989

(Annual. NCJ-130445. Washington: USGPO, 1991, 150 pages, 81 tables.)

Presents data for 1989. SOURCEBOOK tables 6.53, Fig. 6.1-Fig. 6.4, 6.55-6.61, 6.112, 6.117, 6.126, 6.130-6.135, 6.137, 6.138.

This report consolidates information collected through surveys of State and Federal corrections officials. The surveys, which include the 1989 Survey of Jail Inmates, 1989 Uniform Parole Report, 1989 National Probation Report, and 1989 National Prisoner Statistics were sponsored by the Bureau of Justice Statistics and conducted by the U.S. Bureau of the Census. Data on the numbers and characteristics of persons under correctional supervision in each jurisdiction, including movements between the major components of the correctional system, are presented. Parole and sentencing terms are examined. Jail facilities and inmates housed in local jails are presented. In addition, data on the numbers and characteristics of offenders under sentence of death are reported.

# Crime and the Nation's Households, 1989

(Annual. Bulletin NCJ-124544. Washington: U.S. Department of Justice, September 1990. 6 pages, 5 tables, 3 figures.)

Presents data for 1989 and trend tables for 1975-89. SOURCEBOOK tables 3.56, 3.57, Fig. 3.1, Fig. 3.2.

This annual bulletin presents data from the National Crime Survey (NCS) regarding the frequency with which American families experience crime directly. While concentrating on 1989, the bulletin also presents trend data from 1975. Demographic characteristics presented include race/ethnicity of household head, annual family income, region, and place of residence. An explanation of the methodology involved in developing the households touched by crime indicator is also included.

#### Criminal Victimization 1989

(Annual. Bulletin NCJ-125615. Washington: U.S. Department of Justice, October 1990. 8 pages, 9 tables, 4 figures.)

Presents data for 1988 and 1989 and trend tables for 1973-89. SOURCEBOOK tables 3.2, 3.3.

This report presents information on criminal victimization in the United States using National Crime Survey (NCS) data from 1988 and 1989 based on population figures derived from the 1980 census. Data presented in this report include levels and rates of victimization for personal and household crimes and police reporting rates for personal and household crimes for 1988 and 1989. Changes in victimization rates and police reporting rates for personal and household crimes for the period 1973 through 1989 are also presented.

# Criminal Victimization in the United States, 1988

(Annual, National Crime Survey Report NCJ-122024, Washington: U.S. Department of Justice, 1991, 125 tables, 5 appendices.)

Presents data for 1989. SOURCEBOOK tables 3.1, 3.4-3.23, 3.32-3.34, 3.36-3.49.

This report presents information on criminal victimization in the U.S. during 1989, and is the 17th in a series of annual reports prepared under the National Crime Survey (NCS) program. The NCS, conducted for the Bureau of Justice Statistics by the U.S. Bureau of the Census, is based on findings from a continuous survey of a representative sample of approximately 48,000 housing units across the U.S., inhabited by about 97,000 individuals age 12 and older.

The NCS concentrates on certain criminal offenses: the personal crimes of rape, robbery, assault, and larceny, and the household crimes of burglary, larceny, and motor vehicle theft. Both completed and attempted crimes are included in the survey. These crimes are examined from the perspective of their frequency, characteristics of the victims and offenders, circumstances surrounding the

offenses and their impact, and patterns of police reporting.

The appendices present the data tables, survey questionnaire and instrument, and technical information concerning sampling design, data collection, estimation procedures, reliability of estimates, and information on standard error computation. Estimates of the economic cost of crime to victims are presented as is a supplementary analysis on family violence. The final section of the report is a glossary, listing crime category definitions and the meanings of variables and other terms used in the NCS.

## Federal Criminal Case Processing, 1980-87, Addendum for 1988 and Preliminary 1989

(Special. NCJ-125616. Washington: U.S. Department of Justice, November 1990. 17 pages, 17 tables.)

Presents trend data for 1980, 1985-89. SOURCEBOOK tables 5.7-5.13.

This report presents detailed information on the processing of cases in the Federal criminal justice system for the years 1980, 1985-88, and preliminary figures for 1989. The data are derived from the Federal Justice Statistics database and describe initial prosecution decisions by U.S. Attorneys, suspects referred to U.S. magistrates, total number of cases terminated, defendants convicted or dismissed in U.S. District Courts, and defendants convicted and dismissed under the jurisdiction of U.S. magistrates. In addition, the number and percent of offenders sentenced to prison in U.S. District Courts, and their average sentence length is presided.

# Felony Defendants in Large Urban Counties, 1988

(Periodic. NCJ-122385. Washington: U.S. Department of Justice, 1990. 15 pages, 19 tables.)

Presents data for February 1988. SOURCE-BOOK tables 4.16-4.18, 5.45, 5.50, 5.51, 5.53.

This report presents data on felony case processing in the 75 most populous counties in the United States. The data are derived from the National Pretrial Reporting Program initiated in 1988 by the U.S. Department of Justice, Bureau of Justice Statistics. Information is presented on felony arrest charges, sex and age of felony defendants, prior arrests and convictions, and whether or not the arrestee was on probation or parole at the time of the current arrest. Also provided are pretrial detention and release status, type of pretrial release, bail amounts, and court appearance information. Finally, adjudication

outcomes, conviction data, and sentences imposed are included. A methodology section describes the study and provides definitions of terms used in the report.

## Felony Sentences in State Courts, 1988

(Periodic. Bulletin NCJ-126923. Washington: U.S. Department of Justice, December 1990. 11 pages, 14 tables.)

Presents data for 1988. SOURCEBOOK tables 5.32-5.39.

This bulletin presents data on felony sentences imposed by State courts. The data are derived from the National Judicial Reporting Program administered by the U.S. Department of Justice, Bureau of Justice Statistics. The results are based on case processing in a nationally representative sample of 300 counties. Information presented includes number of felony convictions and types of sentences imposed by State courts. Data on sentence length and time served are provided. Demographic characteristics of persons convicted of felonies are also presented, as are data on number and type of felony convictions. Mean and median number of days between arrest and sentencing is included as is information on the use of collateral penalties by State courts.

## Female Victims of Violent Crime

(Special. Bulletin NCJ-126826. Washington: U.S. Department of Justice, 1991. 15 pages, 33 tables, 1 figure.)

Presents trend data for 1973-87 and 1979-87. SOURCEBOOK tables 3.24-3.31.

This report presents aggregate data for 1973-87 and 1979-87 on violent victimizations of women. These data are derived from the National Crime Survey (NCS) conducted annually by the U.S. Bureau of the Census for the Bureau of Justice Statistics. Data for violent crime in general are presented by victim-offender relationship, type of crime, reasons for reporting and not reporting the victimization to the police, location of incident, selected victim demographics (such as race, ethnicity, age, marital status, family income, and employment status), type of injury and type of weapon, and self protective measures taken. Data which focus specifically on female victims of rape are presented by victimoffender relationship, time and place of occurrence, selected victim characteristics (such as race, ethnicity, age, marital status, location of residence, employment status, and family income), reporting of rape to the police, reasons why victims reported and did not report rape to the police, race and age of rape offenders, presence of weapon, selfprotective measures taken, injuries sustained, and medical care received by victims of rape. A brief methodological description is also provided.

## Handgun Crime Victims

(Special Report NCJ-123559. Washington: U.S. Department of Justice, July 1990. 8 pages, 13 tables, 2 figures.)

Presents aggregate data for 1979-87 and trend figures for 1979-87. SOURCEBOOK tables 3.50-3.53.

This report presents data on victims of crimes involving handguns reported to the National Crime Survey from 1979-87. Information on the annual number of handgun crimes is reported by various victim characteristics including sex, race, ethnicity, age, and place of residence. In addition, data on the type of weapon, the number and actions of offenders, victims' attempts at self-protection, and the victim-offender relationship are presented. Information on medical care required by the victim, known motives in handgun murders, and the number of handgun murders in 1986 is also provided.

## immigration Offenses

(Special Report NCJ-124546. Washington: U.S. Department of Justice, August 1990. 6 pages, 12 tables, 1 figure.)

Presents data for 1987 and trend tables for 1980-87. SOURCEBOOK tables 5.71-5.76.

This report presents information on the apprehension and disposition of immigration law violators. These data are provided by the Executive Office for U.S. Attorneys and the Administrative Office of the U.S. Courts. Data are presented on the number of suspects investigated by U.S. Attorneys for the years 1980-87 and the number of suspects referred to U.S. Attorneys in 1987 by the Immigration and Naturalization Service (INS). Also presented is information on decisions to prosecute by U.S. Attorneys and prosecutions and case outcomes handled by U.S. Magistrates and U.S. District Courts. Type of sentence and average length of prison sentences imposed on offenders convicted of immigration offenses in U.S. District Courts are also provided. An appendix table presents a detailed breakdown of the immigration offense categories for suspects investigated by U.S. Attorneys in 1987. A brief methodological description is also included.

## Jail Inmates 1990

(Annual. Bulletin NCJ-129756. Washington: U.S. Department of Justice, June 1991. 5 pages, 11 tables.)

Presents data for 1989 and 1990 and trend tables for selected years 1978-90. SOURCE-BOOK tables 6.23, 6.32, 6.34, 6.37.

The bulletin presents data from the 1990 Annual Survey of Jalis. Data presented include average daily population, admissions and releases, demographic characteristics, rated jail capacity, percent occupied, inmate deaths, and jails under court order. Also included is an appendix table which lists the one-day counts and the average daily population of jail inmates for 1978, 1983, 1988, 1989, and 1990.

# Justice Expenditure and Employment, 1988

(Periodic. Bulletin NCJ-124132. Washington: U.S. Department of Justice, July 1990. 13 pages, 14 tables.)

Presents data for 1988 and trend tables for 1971-79, 1985, and 1988. SOURCEBOOK tables 1.1-1.4, 1.13, 1.14, 1.17.

This report presents criminal justice expenditure and employment data for 1988 and trend tables for 1971-79, 1985, and 1988. The information was collected by the U.S. Bureau of the Census from the Federal government, all State governments, and a sample of county, municipal, and township governments. Data are presented on six categories of criminal justice activities: police protection; courts; prosecution and legal services; public defense; corrections; and a residual "other" category. The report contains a description of the methodology, data limitations, and definitions of terms. Public expenditure data are for fiscal year 1988. Employment and payroll data are for Oct. 1, 1988.

# Justice Expenditure and Employment in the U.S., 1988

(Annual. NCJ-125619. Washington: USGPO, 1991. 179 pages, 72 tables.)

Presents data for 1988 and trend data for 1971-79 and 1985. SOURCEBOOK tables 1.5-1.8, 1.15, 1.16, 1.18.

This publication is the twenty-first in a series of reports that present public expenditure and employment data on civil and criminal justice activities in the United States. The data in this report were collected by the U,S. Bureau of the Census for the Bureau of Justice Statistics through a special Survey of Criminal Justice Expenditure and Employment, which was an annual survey from 1971 to 1979 and was conducted for 1985 and 1988. Data are presented for six categories of justice activity: police protection; judicial; legal services and prosecution; public defense; corrections; and a residual "other" category. Specific data are

supplied for the Federal government, each of the 50 State governments, and the aggregate local level of government within each State. Data are published separately for the county governments and the municipal governments (cities, towns, and townships) for each of the 72 counties with a 1986 population of 500,000 or more, and for the 49 municipalities with a 1986 population of 300,000 or more. A survey methodology section discusses the variation in some fiscal year ending dates. The data in this report are not comparable to those in the Justice Expenditure and Employment Extracts series.

#### National Corrections Reporting Program, 1985

(Annual. Bulletin NCJ-123522. Washington: U.S. Department of Justice, 1990. 60 pages, 48 tables.)

Presents data for 1985. SOURCEBOOK tables 6.62-6.64, 6.113, 6.114, 6.118-6.121, 6.123-6.125.

This report presents data from the National Corrections Reporting Program. It is the first in an annual series which describes the characteristics of persons admitted to and released from State prisons and State and Federal parole systems during 1985. The report is divided into four primary sections. The first section provides data on admissions to State prisons by a number of demographic characteristics, offense type, and sentence length. The second section presents information on releases from State prisons by demographic characteristics, offense type, method of release, and sentence length. The third section covers entries to parole from State prisons by demographic characteristics, method of release, offense type, and sentence length. The final section provides data on discharges from State and Federal parole. This includes information on demographic characteristics, method of discharge, offense type, sentence length, and successful and unsuccessful paroles. A brief methodology section is also included in the report.

## Police Departments in Large Cities, 1987

(Special Report NCJ-119220. Washington: U.S. Department of Justice, August 1989. 8 pages, 17 tables.)

Presents data for 1987. SOURCEBOOK tables 1.19-1.25.

This report presents information on 59 U.S. police departments serving populations of 250,000 or more based on the Law Enforcement Management and Administrative Statistics (LEMAS) survey conducted in 1987. Data are provided on full-time sworn officers, population served, land area served, sworn

officers per 100 UCR crimes, per capita operating expenditures, vehicles used, regularly scheduled police patrols, computers used, special units, overtime hours, special pay, training and residency requirements, female and minority representation, and trends in policing. Additional data are presented on the 25 largest municipal police departments in the United States as well as the ten largest special police agencies, sheriffs' departments, and county police departments. An explanation of the methodology involved in developing the 1987 LEMAS survey is also included.

## Population Density in Local Jails, 1988

(Special. NCJ-122299. Washington: U.S. Department of Justice, March 1990. 10 pages, 11 tables, 2 figures.)

Presents data for 1988 and trend tables for 1983 and 1988. SOURCEBOOK tables 1.69, 1.70, 1.78.

This report presents data on jail population density from the 1988 Census of Local Jails conducted by the U.S. Bureau of the Census for the Bureau of Justice Statistics. Information is provided on amount of housing space available, number and size of jalls, number of correctional officers, and inmate to staff ratios. Also presented is average square feet of living space per inmate, inmates per living unit, and hours confined to living unit. Indicators of social and spatial density are also provided by region. Data from the 1983 Census of Local Jails is presented in some cases for comparison,

## Pretrial Release of Felony Defendants, 1988

(Special. Bulletin NCJ-127202. Washington: U.S. Department of Justice, February 1991. 10 pages, 16 tables.)

Presents data for 1988. SOURCEBOOK tables 4.19, 4.20, 5.46-5.49, 5.52, 5.54.

This report presents pretrial release data on a sample of felony defendants in the 75 most populous counties in the United States. The data are derived from the National Pretrial Reporting Program initiated in 1988 by the U.S. Department of Justice, Bureau of Justice Statistics. Information is presented on the number of felony defendants released before case disposition, financial and nonfinancial release, and type of offense. In addition, data on bail amounts, number of prior convictions, and the number rearrested prior to case disposition are provided. Finally, time from pretrial release to rearrest, time from arrest to adjudication, adjudication outcome, and sentencing outcome are presented. A

methodology section describes the study and provides definitions of terms used in the report.

## Prison Rule Violators

(Special Report NCJ-120344. Washington: U.S. Department of Justice, December 1989. 8 pages, 14 tables.)

Presents data for 1979 and 1986. SOURCE-BOOK tables 6.81, 6.82.

This report presents data from the Survey of Inmates of State Correctional Facilities, a component of the National Prisoner Statistics Program sponsored by the Bureau of Justice Statistics. Characteristics of State prison inmates charged with violating facility rules during their current incarceration are presented. Information is provided on demographic characteristics, drug-use history, criminal history, facility-related measures, inmates most likely to violate prison rules, and the number and frequency of their violations during their current incarceration. Punishments received by rule violators are also included.

## Probation and Parole 1989

(Annual, Bulletin NCJ-125833. Washington: U.S. Department of Justice, November 1990. 6 pages, 4 tables.)

Presents data for 1989 and trend tables for 1979-89. SOURCEBOOK tables 6.1, 6.2, 6.115, 6.116.

This bulletin reports on probation and parole populations for the 50 States, the District of Columbia, and the Federal system. Data are presented on probation and parole entries and exits for 1989, and on the rate of probationers and parolees per 100,000 adult residents. Summary data comparing prison, probation, and parole populations are presented as are national data on trends in methods of State prison releases.

## Profile of Jail Inmates, 1989

(Special Report NCJ-129027. Washington: U.S. Department of Justice, April 1991. 12 pages, 20 tables.)

Presents data for 1983 and 1989. SOURCE-BOOK tables 6.35, 6.38, 6.40-6.46.

This report presents data from the 1989 Survey of Inmates in Local Jails conducted for the U.S. Department of Justice, Bureau of Justice Statistics by the U.S. Bureau of the Census. Information is provided on characteristics of jail inmates, detention status, current offenses, criminal justice status at arrest, prior sentences and criminal histories, sen-

tence length, and time served. In addition, data are presented on drug and alcohol use, treatment for drug and alcohol abuse, family background, physical and sexual abuse, and mental health problems. A brief methodology section is also provided.

#### Profile of State Prison Inmates 1986

(Special. Bulletin NCJ-109926, Washington: U.S. Department of Justice, January 1988, 8 pages, 15 tables.)

Presents data for 1979 and 1986. SOURCE-BOOK tables 6.65, 6.66.

This bulletin presents the results of the 1986 Survey of Inmates of State Correctional Facilities. This survey is conducted by the U.S. Bureau of Census for the Bureau of Justice Statistics. Data on sociodemographic characteristics, current offense, criminal history, and prior sentences of a sample of State prisoners are provided. Also included is information on inmates' pre-incarceration alcohol and drug use as well as selected characteristics of the victims of violent crimes committed by these inmates. Data from the 1979 Survey of Inmates is also presented for comparison.

## Tracking Offenders, 1987

(Bulletin NCJ-125315. Washington: U.S. Department of Justice, October 1990. 7 pages, 10 tables, 2 figures.)

Presents data for 1987. SOURCEBOOK tables 4.21, 5.40-5.44.

This report presents information on criminal case processing in Alaska, California, Delaware, Minnesota, Missouri, New York, Pennsylvania, Alabama, Georgia, Nebraska, Vermont, and Virginia, Information is presented on felony arrests, prosecutions, and dispositions by type of offense. Also provided is information on sentences received by those arrested for felonies. Sentence information is presented by arrest offense as well as conviction offense. The likelihood of being prosecuted, convicted, and sentenced to jail or prison is provided as well. The report also contains data on the sex, race, and age of persons arrested for felonies in the twelve States. A brief methodology section describes the Offender Based Transaction Statistics data base from which this information was obtained.

## Violent State Prisoners and Their Victims

(Special Report NCJ-124133. Washington: U.S. Department of Justice, July 1990. 9 pages, 15 tables.)

Presents data for 1986. SOURCEBOOK tables 6.77-6.80.

This report presents data from the 1986 Survey of Inmates in State Correctional Facilities conducted by the U.S. Bureau of the Census for the Bureau of Justice Statistics. Previous surveys were conducted in 1974 and 1979. Data are provided on violent and nonviolent offenders in State prisons, victims of violence, victims of violent male and female offenders, interracial violence, and the relationship of offender and victim. Information on the use of drugs and alcohol by offenders and their victims is also presented. In addition, a brief methodological description is provided.

#### Women in Prison

(Special Report NCJ-127991. Washington: U.S. Department of Justice, March 1991. 8 pages, 15 tables.)

Presents data for 1979 and 1986, and trend data for 1980-89. SOURCEBOOK tables 6.67, 6.68, 6.70, 6.71, 6.73, 6.74.

This report presents data on women incarcerated in State prisons. The data were collected through the 1986 Survey of Inmates in State Correctional Facilities conducted by the U.S. Bureau of the Census for the U.S. Department of Justice, Bureau of Justice Statistics. Data presented include the characteristics and offenses of female inmates, relationship to victims, criminal history, and sentence length and time served. Information is also provided on the use of drugs among female inmates, physical and sexual abuse, mothers in prison, and the recent growth of the female offender population. A brief methodology section presents details of the survey procedures.

## U.S. Department of Justice, Criminal Division

"Report to Congress on the Activities and Operations of the Public Integrity Section for 1989"

(Annual. Washington: U.S. Department of Justice. Mimeographed. 31 pages, 3 tables.)

Presents data for 1970-89. SOURCEBOOK table 5.90.

This report was compiled by the Public Integrity Section of the U.S. Department of Justice. It presents tabular information describing Federal prosecutions of Federal, State, and local public officials for offenses involving abuse of public office. The number of public officials and others involved who were indicted, convicted, and awaiting trial is presented for each year from 1970 to 1989. Additionally, the number of convictions of individuals involved in abuse of public office is reported by judicial district.

U.S. Department of Justice, Drug Enforcement Administration

# 1990 Domestic Cannabis Eradication/Suppression Program

(Annual. Washington: U.S. Department of Justice, 1991. 42 pages, 10 tables, 7 figures.)

Presents data for 1990 and trend tables for 1985-90. SOURCEBOOK table 4.42.

This document reports on the Drug Enforcement Administration's (DEA) Domestic Mariiuana Eradication/ Suppression Program. describing the effort of the DEA in cooperation with State, local, and other Federal agencies to eradicate domestically cultivated marihuana in the United States. The report presents statistics on the number of marihuana plants destroyed, the number of plots sighted and eradicated, the number of persons arrested, and the number of weapons seized in connection with the eradication program. Data are also presented on the number of sinsemilia and ditchweed plants destroyed, the number of indoor cultivation operations eradicated, and the value of assets seized. Program funding, training, and cooperation with other agencies is also discussed.

U.S. Department of Justice, Executive Office for United States Attorneys

## United States Attorney's Office: Statistical Report Fiscal Year 1990

(Annual. Washington: U.S. Department of Justice, 1990. 82 pages, 37 tables, 14 figures.)

Presents data for fiscal 1990 and trend tables for fiscal 1981-90. SOURCEBOOK tables 5.5, 5.6.

This annual publication is comprised of charts, tables, and commentary summarizing the criminal and civil workloads in U.S. Attorneys' offices. Data are presented on civil and criminal cases filed, terminated, and pending: criminal complaints received, closed, and pending; monetary and nonmonetary civil matters received, terminated, and pending; criminal and civil trials in U.S. district courts; and number and method of disposition of criminal cases and defendants in U.S. district courts and U.S. appellate courts. Additional information is provided on fines imposed, collected, suspended, and uncollectable; grand jury proceedings; appeals filed and terminated in U.S. Attorneys' offices; and staffing in U.S. Attorneys' offices.

U.S. Department of Justice, Federal Bureau of Investigation

"Bank Crime Statistics, Federally Insured Financial Institutions"

(Annual. Washington: U.S. Department of Justice, 1991. Mimeographed. 19 pages, 40 tables.)

Presents data for 1990, SOURCEBOOK tables 3,136-3,138.

This report presents data on crime involving Federally insured financial institutions. Information is provided on violations of Federal bank robbery statutes and the Hobbs Act. The data are broken down by characteristics of the banking institutions, offenders, property loss and recovery, community characteristics, deaths, injuries sustained, hostages taken, and State and region of occurrence.

## Bomb Summary 1989

(Annual. FBI Uniform Crime Reports. Washington: U.S. Department of Justice, 1990. 39 pages, 8 tables, 14 figures.)

Presents data for 1989 and trend tables for 1979-89. SOURCEBOOK tables 3.154, 3.155.

This summary provides tables, charts, narrative descriptions, and comments on bombing incidents reported to the FBI. Data are presented for type of target; type of explosive device; region; State; time of day; day of week; month of year; and personal injury, deaths, and property damage.

## Crime in the United States, 1989

(Annual. FBI Uniform Crime Reports. Washington: USGPO, 1990. 363 pages, 105 tables (estimated), 38 figures, 6 appendices.)

Presents data for 1989 and trend tables for 1985-89. SOURCEBOOK tables 1.36-1.38, 3.108-3.111, 3.115, 3.116, 3.118-3.126, 3.128-3.134, 3.159-3.161, 4.1-4.15, 4.22-4.32, 4.34.

This report begins with a summary of the Uniform Crime Reporting Program. Each Index offense (murder and nonnegligent manslaughter, aggravated assault, forcible rape, robbery, burglary, larceny-theft, motor vehicle theft, and arson) is described individually in terms of the volume and trend of offenses known to police, the nature of the offense (e.g., type of weapon used, regional distribution, or target of the offense), clearances of the offense, and persons arrested and charged. Data on Index offenses cleared by arrest are then presented, followed by information on persons arrested and persons

charged. The last section of the report focuses on law enforcement personnel.

Data are presented on offenses known to police by State, region, size of place, and extent of urbanization. Clearance and arrest information are presented for the United States as a whole (estimated), cities, suburban areas, and rural areas. Disposition data are based on a limited number of reporting agencies and are presented by offense, except for juveniles taken into custody. The law enforcement personnel information includes data on the number of sworn and civilian law enforcement employees in the United States.

The 1989 report includes six appendices. The first appendix describes the data base and construction of each of the major tables in the report. Definitions of the offenses are presented in the second appendix. In the third appendix there are definitions of population categories used throughout the report. The fourth appendix compares the Nation's two primary measures of crime--the Uniform Crime Reporting (UCR) Program and the National Crime Survey (NCS). The fifth appendix presents the Index of crime and the number of Index offenses known to police by Metropolitan Statistical Area. The sixth appendix is a directory of State Uniform Crime Reporting Programs.

# Law Enforcement Officers Killed and Assaulted, 1989

(Annual, FBI Uniform Crime Reports. Washington: USGPO, 1990. 69 pages, 38 tables, 3 figures.)

Presents data for 1989 and trend tables for 1980-89, SOURCEBOOK tables 3,139-3,150.

This report contains comments, tables, charts, and descriptive summaries on law enforcement officers feloniously killed and assaulted in the line of duty. Data on officers killed are presented by State; geographic region; population group; circumstances at the scene of the incident; type of officer assignment; type of weapon used in killing the officer; location of the fatal wound; distance between the officer and offender; and the month, day, and time of the attack. Profiles of the victim officers and the known offenders are also included. Draw on officers assaulted are presented by geographic region, population group, type of weapon, circumstances at the scene of the incident, type of officer assignment, percent receiving personal injury, time of day, and percent

Information is also provided on law enforcement officers accidentally killed. These data are broken down by geographic region, State, and circumstances at the scene of the incident.

The report also presents data on assaults on Federal officers from six sectors of the

U.S. Government: the Department of the Interior, the Department of Justice, the Department of the Treasury, the judicial branch, the U.S. Capitol Police, and the U.S. Postal Service. This section begins with departmental summaries and descriptive summaries of selected incidents of assaults on Federal officers that occurred during 1989. Data are presented on the number of known assailants, officers killed or injured, type of weapon, type of activity officer was engaged in at time of incident, disposition of known assailants, and demographic region.

U.S. Department of Justice, Federal Bureau of Prisons

#### Facilities 1990

(Annual. Washington: U.S. Department of Justice, 1990. 85 pages, 2 figures.)

Presents data for 1990. SOURCEBOOK table 1.85.

This is the eighth edition of a report that presents information on Federal Bureau of Prisons' facilities. A brief history of the Federal Bureau of Prisons is provided. Data are presented on facility security level, judicial district of each facility, rated capacity, population, number of staff, housing accommodations, educational and vocational training programs, Federal prison industry programs, various services provided, accreditation status, and an overview of each facility. Also included are a list of staff training centers, an overview of new facility construction, community corrections office locations, and an organizational chart of the Bureau.

U.S. Department of Justice, National Institute of Justice

## 1989 Drug Use Forecasting Annual Report

(Annual. NCJ-123941. Washington: U.S. Department of Justice, June 1990. 16 pages, 11 tables, 3 figures.)

Presents data for 1989 and trend figures for 1986-89. SOURCEBOOK tables 4.36-4.39,

This report presents data on drug use among arrestees in 21 cities throughout the United States. The data are drawn from the Drug Use Forecasting (DUF) program which is sponsored by the U.S. Department of Justice, National Institute of Justice. Data are based on voluntary urinalysis testing and self-reports from samples of arrestees. Information is presented on the use of any drug, use of marihuana, cocaine, heroin, and multiple drug use. In addition, the data are broken down by gender, age, and race. Drug use by

offense charge, distribution of charges for male and female arrestees, drug use trends from 1988 to 1989 in selected cities, and cocaine use trends in Washington, DC from 1986 to 1989 are also included.

"The Use of Electronic Monitoring by Criminal Justice Agencies, 1988"

(Discussion Paper. Washington: U.S. Department of Justice, April 1988. 20 pages, 6 tables, 1 figure, 2 appendices.)

Presents data for 1987 and 1988. SOURCE-BOOK tables 6.110, 6.111.

This report provides information on the electronic monitoring of offenders. Data are presented on the number of participants by State, sex, age, and type of offense. In addition, the type of equipment that programs use is described. Information on program characteristics, problems experienced by programs, and the future of electronic monitoring is provided. Two appendices the cuss the monitoring equipment and preliminary findings about the use of monitors.

U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention

## Children in Custody 1989

(Periodic. NCJ-127189. Washington: U.S. Department of Justice, January 1991. 10 pages, 8 tables.)

Presents data for 1989 and trend data for 1985-89. SOURCEBOOK tables 6.8-6.10, 6.12-6.18.

This report presents information from the 1989 Children in Custody census (CIC) conducted by the U.S. Bureau of the Census for the Office of Juvenile Justice and Delinguency Prevention. Also included are selected findings from the 1985 and 1987 Censuses of Public Juvenile Detention, Correctional, and Shelter Facilities. Data are presented on the number of facilities, population counts, population flow, and demographic characteristics of juveniles in public juvenile facilities. Also provided are data on detention status and reasons for custody. In addition, information is presented on juvenile admissions and types of State and locally administered public juvenile custody facilities. Information on the total number of public facilities administered by State and local governments, total annual and per resident operating costs, and average daily population is also included.

U.S. Department of Justice, U.S. Marshals Service

The Director's Report: A Review of the United States Marshals Service in FY 1990

(Annual, Washington: U.S. Department of Justice, 1991. 69 pages, 12 tables, 22 figures, 2 appendices.)

Presents data for fiscal 1990 and trend data for fiscal 1984-90. SOURCEBOOK tables Fig. 1.1, Fig. 1.2, 1.51-1.54.

This report covers the activities of the U.S. Marshals Service (USMS) for fiscal year 1990. A brief history of the USMS is provided, followed by an explanation of various USMS duties. These duties include fugitive investigations, prisoner processing and detention, prisoner production and transportation, protection of the judiciary, witness security, execution of court orders, government seizures, and special operations and analysis.

The report includes two appendices. The first appendix describes support services provided by the USMS to other Federal justice agencies. The second appendix provides a brief explanation of executive direction, support, and staff development of and within the USMS.

U.S. Department of Justice, U.S. Parole Commission

Annual Report of the United States Parole Commission October 1, 1988 to September 30, 1989

(Annual. Washington: U.S. Department of Justice, 1990. 19 pages, 9 tables.)

Presents data for fiscal 1989 and trend tables for fiscal 1986-89. SOURCEBOOK tables 1.95-1.97, 6.122.

This report presents information on the activities of the U.S. Parole Commission for fiscal year 1989. The document describes the guidelines used in reaching various types of parole decisions and the procedures involved in administrative appeals and the field supervision of parolees. Recent litigation involving the U.S. Parole Commission is presented as well as a brief overview of projects carried out by the Research Unit. The report documents workload statistics and decision trends for the fiscal year, describing number and type of hearings conducted, parole grants and warrants issued, percent of decisions within guidelines, percent of hearings with inmate representation, and the results of appeals to parole decisions. Finally, biographical information for the parole commissioners is provided.

## Patterns of Global Terrorism: 1990

(Annual. Washington: U.S. Department of State, 1991, 77 pages, 2 tables, 4 figures, 4 appendices.)

Presents data for 1990 and trend data for 1968-90. SOURCEBOOK table 3.162.

This report provides tables, charts, narrative descriptions, and comments on incidents of international terrorism. Data are presented on types of incidents and victims, and on terrorist groups, regional patterns, counter-terrorist activities, and State-supported terrorism. Appendix A presents a statistical review of international terrorist attacks. Appendix B presents a chronology of significant terrorist events in 1990. Appendix C provides a worldwide overview of organizations that engage in terrorism. Appendix D provides a map identifying the location of international terrorist incidents in 1990.

U.S. Department of Transportation. Federal Aviation Administration

Semiannual Report to Congress on the Effectiveness of the Civil Aviation Security Program, July 1-December 31, 1989

(Semi-annual. Washington: U.S. Department of Transportation, 1991. 21 pages, 5 tables, 6 figures.)

Presents data for 1989 and trend data for 1980-89. SOURCEBOOK tables 3.163, 3.164.

These reports contain data on the threats against civil aviation, both foreign and domestic, in the forms of hijackings, airport bombings, bomb threats, and security incidents. Also included in these reports are data on passenger screening activities and summaries of other ongoing preventive measures. This particular report covers the period July 1 to Dec. 31, 1989, and provides more detailed descriptions of criminal acts against civil aviation committed during that period. The trend tables span various combinations of the years from 1980 to 1989 depending on the availability of data.

U.S. Department of Transportation, National Highway Traffic Safety Administration

Digest of State Alcohol-Highway Safety Related Legislation, Current as of January 1, 1991

(Annual. Washington: USGPO, 1991, 497 pages, 2 tables, 2 appendices.)

Presents data for 1991. SOURCEBOOK tables 1.105-1.108.

This ninth edition of the digest provides a detailed description of the various statutory provisions related to alcohol use and highway safety. The data were collected through an examination of the statutory codes of the 50 States, the District of Columbia, and Puerto Rico. Statutory provisions are examined in the following areas: blood alcohol concentration (BAC) levels as evidence in court, preliminary breath test and implied consent laws, chemical tests authorized under implied consent laws, provisions related to adjudication of driving while intoxicated charges, sanctions for refusal to submit to a blood alcohol concentration test, sanctions following a conviction for driving while intoxicated related offenses, laws requiring a blood alcohol concentration test on persons killed in traffic crashes, minimum legal drinking age, liability of owners of drinking establishments for serving alcohol to intoxicated patrons and to minors, open container laws, and anticonsumption laws. The appendices provide the Uniform Vehicle Code and Federal Alcohol Incentive Grant Criteria.

## Fatal Accident Reporting System 1989

(Annual, Washington: USGPO, 1991, 196 pages, 143 tables, 50 figures, 3 appendices.)

Presents data for 1989 and trend data for 1982-89. SOURCEBOOK tables 3.104, 3.105.

The Fatal Accident Reporting System (FARS) gathers data on traffic accidents occurring in the United States that result in loss of human life. FARS data are collected by each State under contractual agreements with the National Highway Traffic Safety Administration. This report presents information on Staffic fatality trends by demographic characteristics and related situational factors. A number of tables and figures are presented on the characteristics of fatal accidents including alcohol involvement, use of safety belts, type of vehicle involved, and involvement of pedestrians. Three appendices and a glossary are included.

## General Estimates System 1989

(Annual, Washington: U.S. Department of Transportation, 1990, 146 pages, 57 tables, 50 figures, 1 glossary, 3 appendices.)

Presents data for 1989. SOURCEBOOK tables 3.106, 3.107.

This is the second annual report of overall crash statistics produced from data collected by the General Estimates System. This report presents estimates of selected national

characteristics about approximately 6,600,000 police-reported motor vehicle traffic crashes that occurred in the United States in 1989. The report is divided into three sections. The first section provides information on when, how often, and where automobile crashes occur. It also presents information on crash type, crash severity, and alcoholrelated crashes. The second section presents data on the type of vehicle involved in the accident--passenger cars, light trucks, vans, utility vehicles, medium and heavy trucks, and motorcycles. Section three provides information on persons injured or killed in or by automobile crashes. Data are presented on drivers, passengers, pedestrians, and pedalcyclists. This report also contains a glossary of terms and three appendices. The first appendix provides the 1989 General Estimates System variable list. The second appendix lists the collection sites from which the data were obtained. The final appendix discusses the sample design, the estimation procedure, and the accuracy of the sample estimates.

U.S. Department of Transportation, U.S. Coast Guard

Digest of Law Enforcement Statistics, Thru March 31, 1991

(Semi-annual, Washington; U.S. Coast Guard, Mimeographed, 37 pages, 16 tables, 5 figures.)

Presents data thru March 31, 1991 and trend data for 1973-91. SOURCEBOOK table 4.45.

This report presents data on the law enforcement activities of the U.S. Coast Guard. General contraband seizures, marihuana and cocaine interdictions, and other drug seizures are included. Also included are data on marihuana interdictions by vessel nationality, drug eradications with Coast Guard assistance, and Navy assistance to Coast Guard drug enforcement. Coast Guard boarding statistics are presented as is information on illegal migrant interdictions and fisheries law enforcement seizures and forfeitures.

U.S. Department of the Treasury, Bureau of Alcohol, Tobacco and Firearms

# Explosives Incidents Report 1989

(Annual. Washington: U.S. Department of the Treasury, 1990. 70 pages, 22 tables, 10 figures.)

Presents data for 1989 and trend tables for 1985-89. SOURCEBOOK tables 3.152, 3.153, 3.156, 3.157.

This report provides tables and figures on and narrative descriptions of criminal bombings and other explosives incidents that were reported to and investigated by the Bureau of Alcohol, Tobacco and Firearms. This, however, does not necessarily include all the bombings and explosives incidents that may have occurred in the United States during these years. The report is divided into seven sections. The first section describes support programs. The second section analyzes the explosive incidents. Data are presented on types of incidents, targets, motives, injuries, property damage, types of devices, geographic location, and accidental explosions. Section three describes stolen and recovered explosives. The fourth section analyzes significant explosives investigations occurring in 1989. The final three sections present program initiatives, a directory of the Bureau's district offices, and a glossary of terms. Throughout the report, a 5-year retrospective of explosives incidents data is presented.

U.S. Department of the Treasury, U.S. Customs Service

## U.S. Customs--Update 1990

(Annual. Washington: U.S. Department of the Treasury, 1991. 40 pages, 7 tables.)

Presents data for fiscal 1990 and trend tables for fiscal 1986-90. SOURCEBOOK tables 4.40, 4.44.

This document describes the activities of the U.S. Customs Service for fiscal 1990. The report discusses the agency's role in collecting revenue from imports and enforcing customs and related laws. Data are presented in such areas as Customs' collections by region, district, and category; carriers and persons entering the United States; merchandise entries; and seizures of property, narcotics, and dangerous drugs for violation of laws enforced by the Customs Service.

U.S. Postal Service, U.S. Postal Inspection Service

Semiannual Report, April 1 - September 30, 1990

(Semi-annual. Washington: U.S. Postal Inspection Service, 1990. 64 pages, 1 table, 1 figure, 7 appendices.)

Presents data for fiscal 1990 and trend figures for fiscal 1979-90. SOURCEBOOK tables 5.66, 5.67.

This report presents information on the activities of the U.S. Postal Inspection Service.

The described activities include investigating

postal service abuse, auditing internal controls, protecting the work environment, investigating criminal misuse of the mail system, and employing enforcement tools. Data are provided on financial audits, employees identified for narcotics violations, mail theft, workers' compensation fraud, and summary statistics on arrests and convictions for other criminal activities. The appendices include information on other financial audits, contract audits, operations audits, revenue audits, pending findings, Inspector General reporting requirements, and criminal statistics.

Walker, Samuel

Employment of Black and Hispanic Police Officers, 1983-1988: A Follow-up Study

(Occasional Paper No. 89-1 (1989). Center for Applied Urban Research. Omaha, NE: University of Nebraska at Omaha. 8 pages, 2 tables.)

Presents data for 1983 and 1988. SOURCE-BOOK tables 1.39, 1.40.

This document reports the results of a 5-year follow-up to a similar study of racial minority employment in police departments of the 50 largest cities in the United States. Tables show the percentage of Black and Hispanic officers in the departments and an index of how those percentages compare with the Black or Hispanic population in the community. Percent change in the index between 1983 and 1988 is provided. The existence of affirmative action plans for Blacks and Hispanics is also indicated.

## Appendix 1

Justice Expenditure and Employment Data Survey methodology and definitions of terms

Note: The following information has been excerpted from the U.S. Department of Justice, Bureau of Justice Statistics, *Justice Expenditure and Employment*, 1988, Bulletin NCJ-124132 (Washington, DC: U.S. Department of Justice, July 1990), pp. 9, 12; and information provided by the U.S. Department of Justice, Bureau of Justice Statistics.

## **Data collection**

The Bureau of Justice Statistics (BJS) discontinued its survey of criminal justice expenditure and employment (CJEE) for budgetary reasons following the collection of 1979 data. That survey provided comparable trend data from 1971 to 1979. Beginning with 1980, the Bureau adopted a different methodology to compile and present public expenditure and employment data at greatly reduced cost. In 1985, the original survey methodology was reimplemented to provide data necessary for block grant allocation of Bureau of Justice Assistance funds.

Trend comparisons between the 1971-79, 1985 and 1988 survey data and reports covering data for 1980 through 1988 in the *Justice expenditure and employment extracts* series are complicated by differences in methodology. In making trend comparisons, users should limit their analysis to one of the two sources: long-term trends for 1971-79, 1985, and 1988 from the *Justice expenditure and employment survey* series; or recent year-to-year trends from the 1980-88 *Justice expenditure and employment extracts* reports.

## Methodology

These data were collected by the U.S. Bureau of the Census for the Bureau of Justice Statistics using a special sample survey of State and local governments. Data were collected for the Federal government, all State governments, all county governments, all municipalities (and townships in the six New England States, the three Middle Atlantic States, and Michigan and Wisconsin) having a 1980 population of 10,000 or more, and for a sample of the remaining municipalities and townships. A total of 8,302 local governments were included in the survey panel (3,041 county governments, 4,296 municipalities, and 965 townships).

The survey was accomplished using two methods of data collection: field compilation and mail canvass. Trained field representatives compiled expenditure and employment data from the governments' own records for all States, 72 counties, and 49 municipalities. Other units in the sample were canvassed by mail. Response for the field-compiled units was 100 percent. For the mail canvass units, the response rate was 87 percent.

Data for the Federal government were extracted from *Budget of the United States Government, FY 1990, Appendix*. For 1985 and 1988, that document allowed the classification of appropriate expenditure and employment amounts for the Immigration and Naturalization Service, the U.S. Customs Service, and the Internal Revenue Service as "prosecution and legal services." In earlier years, those amounts could not be broken out of the "police protection" category.

The justice data in this report include the expenditures and employment of the Federal government, State governments, and a sample of county, municipal, and township governments. Unless otherwise noted, data for total governmental functions and nonjustice governmental functions also include the expenditures of special districts and school districts, which generally do not have justice functions. Justice expenditure data for these districts are not collected, although in 1978 (the most recent year for which such data are available) 0.6 percent of justice expenditures were made by such districts. The special district and school district data are included in the total government spending to allow State-by-State comparisons across States that make varying use of school districts to finance education.

## **Definitions of terms**

Expenditure includes only external cash payments made from any source of monies, including any payments financed from borrowing, fund balances, intergovernmental revenue, and other current revenue. It excludes any intergovernmental transfers and noncash transactions, such as the provision of meals or housing of employees. It also excludes retirement of debt, investment in securities, extensions of loans, or agency transactions. Total expenditures for all government functions do include interest payments on debt, but the justice expenditure data do not.

Expenditure is divided into two major categories:

1. "Direct expenditure" is all expenditure except that classified as intergovernmental. It includes "direct current expenditure" (salaries, wages, fees, and commissions and purchases of supplies, materials, and contractual services) and "capital outlays" (con-

struction and purchase of equipment, land, and existing structures). Capital outlays are included for the year when the direct expenditure is made, regardless of how the funds are raised (for example, by bond issue) or when they are paid back.

2. "Intergovernmental expenditure" is the sum of payments from one government to another, including grants-in-aid, shared revenues, payments in lieu of taxes, and amounts for services performed by one government for another on a reimbursable or cost-sharing basis (for example, payments by one government to another for boarding prisoners).

Employees are all persons on government payrolls during the pay period including Oct. 12, 1988. They include all paid officials and persons on paid leave, but exclude unpaid officials, persons on unpaid leave, pensioners, and contractors.

Full-time employees are all persons employed on a full-time basis, including all full-time temporary or seasonal workers who were employed during this pay period.

Full-time equivalent employment is a statistical measure that estimates the number of full-time employees that could have been employed if the reported number of hours worked by part-time employees had been worked by full-time employees. This statistic is calculated separately for each function of a government by dividing the "part-time hours paid" by the standard number of hours for full-time employees in the particular government and then adding the resulting quotient to the number of full-time employees.

In previous reports in this series, a different methodology was used to compute this statistic, affecting comparability over time. In the past, the payroll-based formula divided the total payroll (full-time plus part-time) by the full-time payroll and multiplied the result by the number of full-time employees.

Payroll is the gross payroll before deductions and includes salaries, wages, fees, and commissions paid to employees as defined above for the month of October 1988.

Police protection is the function of enforcing the law, preserving order, and apprehending those who violate the law, whether these activities are performed by a city police department, sheriff's department, State police, or Federal law enforcement agency such as the FBI and the Drug Enforcement Administration. Private security police are outside the scope of the survey.

Judicial (courts only) includes all civil and criminal courts and activities associated with courts such as law libraries, grand juries, petit juries, and the like. It is not the same as the "judicial and legal services" category in reports from the Bureau of Justice Statistics Justice expenditure and employment extracts series. The "judicial" category in the Extracts reports also includes "prosecution"

and legal services" and "public defense," which are displayed separately in this report.

Prosecution and legal services includes the civil and criminal justice activities of the attorneys general, district attorneys, State's attorneys, and their variously named equivalents and corporation counsels, solicitors, and legal departments with various names.

**Public defense** includes legal counsel and representation in either criminal or civil proceedings as provided by public defenders and other government programs that pay the fees of court-appointed counsel.

Corrections involves the confinement and rehabilitation of adults and juveniles convicted of offenses against the law and the confinement of persons suspected of a crime awaiting trial and adjudication. It includes costs and employment for jails, prisons, probation, parole, pardon, and correctional administration. Data for institutions with authority to hold prisoners beyond arraignment (usually 48 hours or more) are included in this sector. Data for lock-ups or "tanks" holding prisoners less than 48 hours are included in "police protection."

Correctional institutions are prisons, reformatories, jails, houses of correction, penitentiaries, correctional farms, work-houses, reception centers, diagnostic centers, industrial schools, training schools, detention centers, and a variety of other types of institutions for the confinement and correction of convicted adults or juveniles who are adjudicated delinquent or in need of supervision. It also includes facilities for the detention of adults and juveniles accused of a crime and awaiting trial or hearing. Prison is sometimes used to refer to State correctional institutions.

Probation, parole, and pardon includes data on probation agencies, boards of parole, boards of pardon, and their variously named equivalents. Although probation departments frequently function under the administration of a court, the data are presented separately under corrections after having been deducted from the judicial data.

Other justice activities includes expenditure and employment data that are not elsewhere classified, that cut across more than one category, or that are not allocable to separate categories. Examples are crime commissions, neighborhood crime counsels, and State criminal justice coordinating councils.

## Appendix 2

### Geographic divisions

New England--Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont;

Mid-Atlantic--New Jersey, New York, and Pennsylvania;

East North Central--Illinois, Indiana, Michigan, Ohio, and Wisconsin;

West North Central--lowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, and South Dakota;

South Atlantic--Delaware, Florida, Georgia, Maryland, North Carolina, South Carolina, Virginia, and West Virginia, plus the District of Columbia;

East South Central--Alabama, Kentucky, Mississippi, and Tennessee;

West South Central--Arkansas, Louisiana, Oklahoma, and Texas;

Mountain--Arizona, Colorado, Idaho, Montana, Nevada, New Mexico, Utah, and Wyoming;

Pacific Coast--Alaska, California, Hawaii, Oregon, and Washington.

## Metro status

To be classified by the U.S. Office of Management and Budget as a Metropolitan Statistical Area (MSA), an area must include a city with a population of at least 50,000 or an urbanized area of at least 50,000 with a total metropolitan population of at least 100,000. The OMB further groups metropolitan areas of over 1,000,000 population into consolidated metropolitan statistical areas (CMSAs) and primary metropolitan statistical areas (PMSAs).

Central cities—The core cities of an MSA having a population of at least 25,000 and meeting two commuting requirements: at least 40 percent of the employed residents of the city must work within the city and there must be at least 75 jobs for each 100 residents who are employed. Cities between 15,000 and 25,000 population may also be considered central cities if they are at least one-third the size of the MSA's largest city and meet the two commuting requirements.

Suburban cities--The other cities, towns, and incorporated places in an MSA.

Independent cities--The incorporated places not located within an MSA.

City types include metro for municipalities located within an MSA and nonmetro for municipalities located outside an MSA. County types refer to counties located within an MSA for metro; and nonmetro for counties located outside the boundaries of an MSA.

## Forms of government

Mayor-council--an elected council serves as the legislative body with a separately elected head of government;

Council-manager--the mayor and council make policy and an appointed administrator is responsible for the administration of the city;

Commission--a board of elected commissioners serves as the legislative body and each commissioner is responsible for administration of one or more departments;

Town meeting--qualified voters meet to make basic policy and choose a board of selectmen to carry out the policy;

Representative town meeting--representatives selected by citizens' vote at meetings, which may be attended by all town citizens.

Table. Survey response rates for 1989

#### Appendix 3

Crime in the United States Definitions of

Note: The following information has been excerpted from the U.S. Department of Justice, Federal Bureau of Investigation, Crime in the United States, 1989 (Washington, DC: USGPO, 1990), pp. 1-5, 324-327. Non-substantive editorial adaptations have been made, See U.S. Department of Justice, Federal Bureau of Investigation, Uniform Crime Reporting Handbook (Washington, DC: USGPO, 1984) for further definitions and information on classification and counting rules.

## Population definitions

For purposes of statistical presentation, the cities and counties in the United States are divided into groups based on population size. The population group classifications used by the Uniform Crime Reporting Program are shown in Table 1.

Table 1 Population group, political label, and population coverage

Population group	Political label	Population coverage
	***	~~~~~~~~~
1	City	250,000 and over
11	City	100,000 to 249,999
III	City	50,000 to 99,999
IV	City	25,000 to 49,999
V	City_	10,000 to 24,999
VI	City ^a	Less than 10,000
VIII (Rural county)	Countyb	•
IX (Suburban county)	County	
• •		

^aIncludes universities and colleges to which no population is attributed.

Includes State police to which no population

## Metropolitan Statistical Area

(MSA)--This includes a city or an urbanized area with a population of 50,000 or more inhabitants and the surrounding county or counties that share certain metropolitan characteristics. MSAs made up approximately 77 percent of the total U.S. population in 1989.

Rural counties -- Rural counties are those outside MSAs. These areas represent 14 percent of the national population in 1989. Prior to 1981, rural counties were referred to as rural areas.

Suburban areas-These areas consist of cities with populations of less than 50,000 together with counties (unincorporated areas) that are within a MSA. Suburban areas can, therefore, be divided into suburban cities and suburban counties.

Other cities -- Other cities are urban places outside MSAs; most of these areas are incorporated. These cities comprise 9 percent of the 1989 national population.

The following diagram illustrates the aforementioned discussion of the community types.

6	MSA	Non-MSA
Cities	Cities over 50,000 Suburban cities	Other cities
Countles (unincorpo- rated area)	Suburban counties	Rural counties

As a general rule, sheriffs, county police, and many State police report on crimes committed within the limits of the counties, but outside cities; local police report on crimes committed within the city limits.

The major source of Uniform Crime Reporting (UCR) data is the individual law enforcement agency. The number of agencies included in each population group will vary slightly from year to year due to population growth, geopolitical consolidation, municipal consolidation, etc. Population figures for individual jurisdictions are estimated by the UCR Program in noncensus vears. Table 2 shows the number of agencies within each population group in 1989.

Table 2 Population group and number of agen-

Population group	Number of agencies
II III IV V VI VIII (Rural area) IX (Suburban county)	63 126 338 714 1,716 7,417 a 3,693 b 1,683
Total	15,750

^aIncludes universities and colleges to which no population is attributed.

## Regions and divisions

The United States is divided into four regions; these regions are further divided into nine

divisions. The following is a list of States within divisions and regions.

## Northeast:

New England--Connecticut, Maine, Massachusetts, New Hampshire, Phode Island, Vermont.

Middle Atlantic--New Jersey, New York, Pennsylvania.

#### Midwest:

East North Central--Illinois, Indiana, Michigan, Ohio, Wisconsin.

West North Central--lowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, South Dakota.

## South:

South Atlantic--Delaware, District of Columbia, Florida, Georgia, Maryland, North Carolina, South Carolina, Virginia, West Virginia.

East South Central--Alabama, Kentucky, Mississippi, Tennessee.

West South Central--Arkansas, Louisiana, Oklahoma, Texas.

#### West:

Mountain--Arizona, Colorado, Idaho, Montana, Nevada, New Mexico, Utah. Wyoming.

Pacific--Alaska, California, Hawaii, Oregon, Washington.

## The Crime Index and Part I offenses

The Crime Index

The following offenses and attempts to commit these offenses are used in compiling the Crime Index: (1) murder and nonnegligent manslaughter, (2) forcible rape, (3) robbery, (4) aggravated assault, (5) burglary, (6) larceny-theft, (7) motor vehicle theft, and (8) arson. Arson was added as the eighth index offense in October 1978. (Manslaughter by negligence and simple or minor assaults are not included in the Crime Index.)

# Part I offenses

Criminal homicide--a. Murder and nonnegligent manslaughter: the willful (nonnegligent) killing of one human being by another. Deaths caused by negligence, attempts to kill, assaults to kill, suicides, accidental deaths, and justifiable homicides are excluded. Justifiable homicides are limited to: (1) the killing of a felon by a law enforcement officer in the line of duty and (2) the killing of a felon by a private citizen, b. Manslaughter by negligence: the killing of another person through gross negligence. Traffic fatalities are excluded. While manslaughter by negligence is a Part I crime, it is not included in the Crime Index.

Forcible rape--The carnal knowledge of a female forcibly and against her will, Includ-

is attributed.

Includes State police to which no population is attributed.

ed are rapes by force and attempts or assaults to rape. Statutory offenses (no force used--victim under age of consent) are excluded.

Robbery--The taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

Aggravated assault--An unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault usually is accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Simple assaults are excluded.

Burglary--breaking or entering--The unlawful entry of a structure to commit a felony or a theft. Attempted forcible entry is included.

Larceny-theft (except motor vehicle theft)--The unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. Examples are thefts of bicycles or automobile accessories, shoplifting, pocket-picking, or the stealing of any property or article which is not taken by force and violence or by fraud. Attempted larcenies are included. Embezzlement, "con" games, forgery, worthless checks, etc., are excluded.

Motor vehicle theft--The theft or attempted theft of a motor vehicle. A motor vehicle is self-propelled and runs on the surface and not on rails. Specifically excluded from this category are motorboats, construction equipment, airplanes, and farming equipment.

Arson--Any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

### Part II offenses

Other assaults (simple)--Assaults and attempted assaults where no weapon is used and which do not result in serious or aggravated injury to the victim.

Forgery and counterfeiting--Making, altering, uttering, or possessing, with intent to defraud, anything false in the semblance of that which is true. Attempts are included.

Fraud--Fraudulent conversion and obtaining money or property by false pretenses. Included are confidence games and bad checks, except forgeries and counterfeiting.

Embezzlement--Misappropriation or misapplication of money or property entrusted to one's care, custody, or control.

Stolen property; buying, receiving, possessing-Buying, receiving, and possessing stolen property, including attempts.

Vandalism--Willful or malicious destruction, injury, disfigurement, or defacement of any public or private property, real or personal, without consent of the owner or persons having custody or control.

Weapons; carrying, possessing, etc.--All violations of regulations or statutes controlling the carrying, using, possessing, furnishing, and manufacturing of deadly weapons or silencers. Included are attempts.

Prostitution and commercialized vice--Sex offenses of a commercialized nature, such as prostitution, keeping a bawdy house, procuring, or transporting women for immoral purposes. Attempts are included.

Sex offenses (except forcible rape, prostitution, and commercialized vice)--Statutory rape and offenses against chastity, common decency, morals, and the like.

Attempts are included.

Drug abuse violations--State and local offenses relating to the unlawful possession, sale, use, growing, and manufacturing of narcotic drugs.

Gambling--Promoting, permitting, or engaging in illegal gambling.

Offenses against the family and children--Nonsupport, neglect, desertion, or abuse of family and children.

**Driving under the influence--**Driving or operating any vehicle or common carrier while drunk or under the influence of liquor or narcotics.

Liquor laws--State or local liquor law violations, except "drunkenness" and "driving under the influence." Federal violations are excluded.

**Drunkenness**--Offenses relating to drunkenness or intoxication. Excluded is "driving under the influence."

Disorderly conduct--Breach of the peace.

Vagrancy--Vagabondage, begging, loitering, etc.

All other offenses--All violations of State or local laws, except those listed above and traffic offenses.

Suspicion--No specific offense; suspect released without formal charges being placed.

Curfew and loitering laws-(persons under age 18)--Offenses relating to violations of local curfew or loitering ordinances where such laws exist.

Runaways-(persons under age 18)--Limited to juveniles taken into protective custody under provisions of local statutes.

## Appendix 4

Annual Report of the U.S. Parole Commission Parole guidelines and definitions of terms

Note: The following information was excerpted from the U.S. Department of Justice, U.S. Parole Commission, *Parole Commission Rules* (28 C.F.R. 2.1-2.65). Washington, DC: U.S. Parole Commission. Pp. 4, 5, 6, 10, 11, 44, 62, 68, 81; and information provided by the Source. Non-substantive editorial adaptations have been made.

## Parole guidelines

Initial parole consideration--The U.S. Parole Commission has adopted guidelines for parole release considerations. These guidelines indicate the customary range of time to be served before release for various combinations of offense (severity) and offender (parole prognosis) characteristics. The time ranges specified by the guidelines are established specifically for cases with good institutional adjustment and program progress. These time ranges are merely guidelines, where the circumstances warrant, decisions outside the guidelines (either above or below) may be rendered.

The guidelines designate offense characteristics as falling into one of eight severity categories. Category 1 represents the least severe and category 8 the most severe offense behavior. Mitigating or aggravating circumstances in a particular case may justify a decision or severity rating different from that listed.

An evaluation sheet containing a salient factor score serves as an aid in determining parole prognosis (potential risk of parole violation). A salient factor score is calculated by summing the offender's score on each of the following items: number of prior convictions and adjudications, number of prior commitments of more than 30 days duration, age at current offense, commitment of more than 30 days duration within the past 3 years, probation/parole/escape status at time of current offense, and heroin/opiate dependence.

Reparole consideration--An offencer whose parole is revoked is eligible to be considered for reparole. If revocation is based upon an administrative violation only, i.e., a violation not involving new criminal conduct, the behavior is graded as a category 1 offense and the salient factor score recalculated. If a finding is made that the prisoner has engaged in behavior constituting new criminal

conduct, the appropriate severity rating for the new criminal behavior is calculated. New criminal conduct may be determined either by a new Federal, State or local conviction or by an independent finding by the U.S. Parole Commission at a revocation hearing. If the criminal conduct is in violation of State or local law the appropriate severity level is determined by analogy with the listed Federal offense severity ratings and the salient factor score recalculated. Time served on a new State or Federal sentence is counted as time in custody for reparole guideline purposes.

#### **Definitions of terms**

Initial hearing--The initial parole determination hearing for an eligible prisoner, where examiners discuss with the prisoner his/her offense severity rating and salient factor score, his/her institutional conduct, and any other matter the panel may deem relevant.

Following an initial hearing, the Commission may (1) set a presumptive release date (either by parole or by mandatory release) within fifteen years of the hearing; (2) set an effective date of parole; or (3) continue the prisoner to a fifteen year reconsideration hearing pursuant to 28 C.F.R. 2.14(c).

One-third hearing--Covered under 28 C.F.R. 2.14(e) (1976) until it was phased out. The section provided that a prisoner sentenced to a maximum term of more than 18 months under 18 U.S.C. 4205(b)(2), 18 U.S.C. 294, or 26 U.S.C. 5871, could not be continued past one-third of the maximum sentence. The one-third hearing was phased out after implementation of presumptive date procedures in September 1977.

Pre-hearing record reviews--A review of the prisoner's case file by an examiner during the month preceding a regularly scheduled institutional review hearing. If the recommendation was to grant parole, and the regional commissioner concurred, no in-person hearing was conducted. Pre-hearing record reviews (28 C.F.R. 2.14(b)(1976)) were replaced by presumptive date record reviews.

Statutory review hearings--Replaced by statutory interim hearings. The purpose of the "interim hearing" is to consider any significant developments or changes that may have occurred subsequent to the initial hearing. Following the interim hearing, the presumptive release date that had been set may be advanced for superior program achievement or other clearly exceptional circumstances, retarded or rescinded for reason of disciplinary infractions, or remain unchanged.

Review hearing.-Subsequent parole hearing intended to focus on developments or changes in the prisoner's status; replaced by the statutory interim hearing.

Rescission hearing--28 C.F.R. 2.34 provides that if a prisoner has been granted parole and has subsequently been charged

with institutional misconduct sufficient to become a matter of record, or is alleged to have committed a new criminal act, a rescission hearing may be scheduled at which time parole may be rescinded or retarded.

Retroactive record review--A special type of consideration resulting from a revision of the parole decision guidelines in June 1979; for more information, see 28 C.F.R. 2.20, 2.21. For information on the local revocation hearing and institutional revocation hearing, see 28 C.F.R. 2.48-2.52 (1976).

Local or institutional revocation hearing--28 C.F.R. 2.49(a)(c)(1981) provides that the parolee may request that he/she be given a revocation hearing reasonably near the place of the alleged violation or arrest if the following conditions are met: (1) the parolee has not been convicted of a crime committed while under supervision; and (2) the parolee denies that he/she has violated any condition of his/her release. A parolee will be given a revocation hearing upon his/her return to a Federal institution if he/she voluntarily waives his/her right to a local revocation hearing, if he/she admits any violation of the conditions of parole, or if he/she is retaken following conviction for a new crime.

Region--The five regions of the United States are defined in the following manner:

Northeast--Connecticut, Delaware, District of Columbia, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, Virginia, West Virginia;

Southeast--Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Tennessee;

North Central--Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, Ohio, Wisconsin;

South Central--Arkansas, Louisiana, New Mexico, Oklahoma, Texas;

West--Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, North Dakota, Oregon, South Dakota, Utah, Washington, Wyoming.

## Appendix 5

Public opinion survey sampling procedures

Note: Information on Gallup survey sampling procedures was excerpted from George H. Gallup, The Gallup Poll, Public Opinion 1934-1971, Vol. 1, 1935-1948 (New York: Random House, 1972), pp. vi-viii; George H. Gallup, The Gallup Opinion Index, Report No. 162 (Princeton, NJ: The Gailup Poll, January 1979), pp. 29, 30; George Gallup, The Sophisticated Poll Watcher's Guide (Princeton, NJ: Princeton Opinion Press, 1976), p. 102; and from information provided to SOURCEBOOK staff from the Gallup Organization. Information on the Harris survey sampling procedures was provided to SOURCEBOOK staff by Louis Harris and Associates, Inc.; similar procedures used in earlier surveys are described in Louis Harris and Associates, Inc., The Harris Yearbook of Public Opinion 1970: A Compendium of Current American Attitudes (New York: Louis Harris and Associates, Inc., 1971), pp. 511-514. Information on the survey procedures employed by the National Opinion Research Center was excerpted from the National Opinion Research Center, General Social Surveys, 1972-1990: Cumulative Codebook (Chicago: National Opinion Research Center, University of Chicago, 1990), pp. 1, 59, 629-639. Information on the Media General/Associated Press Poll was provided by Media General/Associated Press

The sampling procedures of five public opinion survey organizations are presented in this appendix; The Gallup Poll, the Harris Survey, the National Opinion Research Center, the Media General/Associated Press Poll, and the Yankelovich Clancy Shulman Poll.

## **GALLUP POLLS**

All Gallup polls since 1950, excluding certain special surveys, have been based on a national probability sample of interviewing areas. Refinements in the sample design have been introduced at various points in time since then. However, over this period the design in its essentials has conformed to the current procedure, as described in the following paragraphs.

The United States is divided into seven size-of-community strata: cities of population 1,000,000 and over, 250,000 to 999,999, and 50,000 to 249,000, with the urbanized areas of all these cities forming a single stratum; cities of 2,500 to 49,999; rural villages; and

farm or open country rural areas. Within each of these strata, the population is further divided into seven regions: New England, Middle Atlantic, East Central, West Central, South, Mountain, and Pacific Coast. Within each size-of-community and regional stratum the population is arrayed in geographic order and zoned into equal sized groups of sampling units. Pairs of localities in each zone are selected with probability of selection proportional to the size of each locality's population--producing two replicated samples of localities.

Within selected cities for which population data are reported by census tracts or enumeration districts, these sample subdivisions are drawn with probability of selection proportional to the size of the population. For other cities, minor civil divisions, and rural areas in the sample for which population data are not reported by census tracts or enumeration districts, small, definable geographic areas are drawn, with the probability of selection proportional to size where available data permit; otherwise with equal probability.

A block or block cluster is drawn with probability of selection proportional to the number of dwelling units from within each subdivision selected for which block statistics are available. In cities and towns for which block statistics are not available, blocks are drawn at random, that is, with equal probability. In subdivisions that are rural or open country in character, segments approximately equal in size of population are delineated and drawn with equal probability.

In each cluster of blocks and each segment so selected, a randomly selected starting point is designated on the interviewer's map of the area. Starting at this point, interviewers are required to follow a given direction in the selection of households, taking households in sequence, until their assigned number of interviews has been completed. Within each occupied dwelling unit or household reached, the interviewer asks to speak to the youngest man 18 or older at home, or if no man is at home, the oldest woman 18 or older. This method of selection within the household has been developed empirically to produce an age distribution by men and women separately which compares closely with the age distribution of the population. It increases the probability of selecting younger men, who are at home relatively infrequently, and the probability of reaching older women in the household who tend to be under-represented unless given a disproportionate chance of being drawn from among those at home. The method of selection among those at home within the household is not strictly random, but it is systematic and objective, and eliminates interviewer judgment in the selection process. Interviewing is conducted at times when adults are most likely to be at home,

which means on weekends or if on weekdays, after 4 p.m. for women and after 6 p.m. for men. Allowance for persons not at home is made by a "times-at-home" weighting procedure rather than by "call-backs." This procedure is a standard method for reducing the sample bias that would otherwise result from under-representation of persons who are difficult to find at home.

The pre-stratification by regions is routinely supplemented by fitting each obtained sample to the latest available U.S. Bureau of the Census estimates of the regional distribution of the population. Also minor adjustments of the sample are made by educational attainment (for men and women separately), based on the annual estimates of the U.S. Bureau of the Census derived from their Current Population Survey. The sample procedure described is designed to produce an approximation of the adult civilian population living in the United States, except for those persons in institutions such as prisons or hospitals. The four regions of the country, as reported in Gallup public opinion surveys, have been defined in the following manner:

East--Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Maryland, Delaware, West Virginia, District of Columbia;

Midwest--Ohio, Michigan, Indiana, Illinois, Wisconsin, Minnesota, Iowa, Missouri, North Dakota, South Dakota, Nebraska, Kansas:

South--Virginia, North Carolina, South Carolina, Georgia, Florida, Kentucky, Tennessee, Alabama, Mississippi, Arkansas, Louisiana, Okiahoma, Texas; and

West--Montana, Arizona, Colorado, Idaho, Wyoming, Utah, Nevada, New Mexico, California, Oregon, Washington, Hawaii, Alaska.

Prior to 1950, the samples for all Gallup surveys, excluding special surveys, were a combination of what is known as a purposive design for the selection of cities, towns, and rural areas, and the quota method for the selection of individuals within such selected areas.

The first step in obtaining the sample was to draw a national sample of places (cities, towns, and rural areas). These were distributed by six regions and five or six city-size, urban-rural groups or strata in proportion to the distribution of the population of voting age by these regional city-size strata. The distribution of cases between the non-South and South, however, was on the basis of the vote in presidential elections.

Within each region, the sample of such places was drawn separately for each of the larger States and for groups of smaller States. The places were selected to provide

broad geographic distribution within States and at the same time in combination to be politically representative of the State or groups of States in terms of three previous elections. Specifically, they were selected so that in combination, they matched the State vote for three previous elections within small tolerances. Great emphasis was placed on election data as a control in the era from 1935 to 1950.

Within the civil divisions in the sample, respondents were selected on the basis of age, sex, and socioeconomic quotas. Otherwise, interviewers were given considerable latitude within the sample areas, being permitted to draw their cases from households and from persons on the street anywhere in the community.

According to Gallup policy, if the interviewee does not hear or does not understand a question, the interviewer repeats the question and if on the second reading the person does not understand or does not get the point of the question, the interviewer checks the "no opinion box. It should also be noted that seldom more than 10 percent of all those contacted refuse to be interviewed. Surveys of college students usually are based on in-person interviews with 1,000 full-time students representing 60 campuses. A sample of campuses is derived from a list of all colleges and universities obtained from the National Center for Education Statistics. Occasionally, special surveys conducted by Gallup for other organizations use smaller samples because of time and/or financial constraints.

Surveys of teenagers are conducted through recontact telephone interviews. A list of eligible teenagers is derived from previously conducted omnibus polls that gather a wide variety of demographic information. These omnibus polls determine whether a teenager is present in the respondent's home and whether the teenager is eligible for subsequent interview. Recontact calls are made based on this information.

Urbanization-Central cities have populations of 50,000 and above. Suburbs constitute the fringe and include populations of 2,500 to 49,999. Rural areas are those which have populations of under 2,500.

Race/ethnicity--Nonwhite are comprised of individuals who report themselves as any combination of the following classifications: Hispanic, American Indian, Other Indian, Oriental, and Black. Black and Hispanic are subcategories of Nonwhite. However, due to variation in respondent reporting the category White may also include some Hispanics.

The data presented in SOURCEBOOK from this Source were taken from the following

reports. The dates on which interviews were conducted are presented in parentheses after each citation.

## Sampling error

All sample surveys are subject to sampling error, that is, the extent to which the results may differ from what would be obtained if the entire population surveyed had been interviewed. The size of sampling errors depends largely on the number of interviews. The fol-

lowing table may be used in estimating sampling error. The computed allowances have taken into account the effect of the sample design upon sampling error. They may be interpreted as indicating the range (plus or minus the figure shown) within which the results of repeated samplings in the same time period could be expected to vary, 95 percent of the time, assuming the same sampling procedure, the same interviewers, and the same questionnaire.

Recommended allowance for sampling error (plus or minus) at 95 percent confidence level

#### (Percent)

Percent- ages Sample size										
near	1,000	750	600	400	200	100				
10	2	. 3	3	4	5	7				
20	3	4	4	5	7	9				
30	4	. 4	4	6	8	10				
40	4	4	5	6	8	11				
50	4	4	5	6	8	11				
60	4	4	5	6	8	11				
70	4	4	4	6	8	10				
80	3	4	4	5	7	9				
90	2	3	3	4	5	7				

The table would be used in the following manner: Assume a reported percentage is 33 for a group which includes 1,000 respondents. Proceed to row "Percentages near 30" in the table and then to the column headed, "1,000." The figure in this cell is four, which means that at the 95 percent confidence level, the 33 percent obtained in the sample is subject to a sampling error of plus or minus four points.

## HARRIS SURVEYS

Harris surveys are based on a national sample of the civilian population of the continental United States. Alaska and Hawaii are not represented in the sample, nor are those in prisons, hospitals, or religious and educational institutions. The sample is based on census information on the population of each State in the country, and on the population living in standard metropolitan areas and in the rest of the country. These population figures are updated by intercensal estimates produced annually by the U.S. Bureau of the Census, and sample locations are selected biennially to reflect changes in the country's demographic profile.

National samples are stratified in two dimensions--geographic region and metropolitan (and non-metropolitan) residence. Stratification insures that the samples will reflect, within 1 percent, the actual proportions of those living in the country in different regions and metropolitan (and non-

metropolitan) areas. Within each stratum the selection of the ultimate sampling unit is achieved through a series of steps, a process which is technically called multistage unclustered sampling. Each sampling unit yields one interview. First States, then counties, and then minor civil divisions (cities, towns, townships) are selected with probability proportional to census estimates of their respective household populations. The Harris Survey has four of these national samples, and they are used in rotation from study to study. The specific sample locations in one study generally are adjacent to those used in the next study. For most surveys covering the entire country, more than one national sample may be employed. Harris Surveys of a nationwide sample usually include 1,250 respondents.

All interviews prior to 1978 were conducted in person, in the homes of respondents. At each household the respondent was chosen by means of a random selection pattern, geared to the number of adults of each sex who live in the household. Interviews lasted approximately one hour. Almost all interviews conducted as of 1978 have been telephone interviews. Respondents are selected on the basis of random digit dialing. When the completed interviews are received in New York, a subsample of the respondents are re-contacted to verify that the data have been accurately recorded. Questionnaires are edited and coded in the New York office. The Harris sampling procedure is designed to produce a national cross-section that accurately reflects the actual population of the country 18 years of age and older living in private households. This means that the results of a survey among a national sample can be projected as representative of the country's civilian population 18 years old and older.

Harris Survey national results are reported for the East, Midwest, South, and West regions of the country, defined as follows:

East--Maine, New Hampshire, Vermont, New York, Massachusetts, Hhode Island, Connecticut, Pennsylvania, Maryland, New Jersey, Delaware, West Virginia;

Midwest--North Dakota, South Dakota, Nebraska, Kansas, Minnesota, Iowa, Missouri, Wisconsin, Illinois, Michigan, Indiana, Ohio:

South--Kentucky, Virginia, Tennessee, North Carolina, South Carolina, Georgia, Alabama, Mississippi, Florida, Louisiana, Arkansas, Oklahoma, Texas; and

West--Washington, Oregon, California, Idaho, Nevada, Utah, Arizona, Montana, Wyoming, Colorado, New Mexico.

The data presented in SOURCEBOOK from this Source were taken from the following reports. The number of interviews conduct-

ed and the interview dates are presented in parentheses after the citation.

# Sampling error

It should be kept in mind that the results of the surveys are subject to sampling error, i.e., the difference between the results obtained from the sample and those which would be obtained by surveying the entire population. The size of a possible sampling error varies to some extent with the size of the sample and with the percentage giving a particular answer. The following table sets forth the range of error in samples of different sizes and at different percentages of response:

Recommended allowance for sampling error (plus or minus) at 95 percent confidence level

Re- sponse percent	Sample size 1,600 1,200 900 500 250 100							
10(90) 20(80) 30(70)	2 2 3	2 3 3	2 3 4	3 4 5	5 6 7	7 10 11		
40(60) 50	3	3 3	4	5 5	7 8	12 12		

For example, if the response for a sample size of 1,200 is 30 percent, in 95 cases out of 100 the response in the population will be between 27 percent and 33 percent. This error accounts only for sampling error. Survey research is also susceptible to other errors, such as data handling and interview recording.

## **NATIONAL OPINION RESEARCH CENTER**

The National Opinion Research Center (NORC) maintains a national probability sample. The General Social Surveys are interviews administered to the NORC national samples using a standard questionnaire. They have been conducted during February, March, and April from 1972 to 1978, 1980, and from 1982 to 1990. There are a total of 26,265 completed interviews (1,613 in 1972; 1,504 in 1973; 1,484 in 1974; 1,490 in 1975; 1,499 in 1976; 1,530 in 1977; 1,532 in 1978; 1,486 in 1980; 1.506 in 1982; 1,599 in 1983; 1,473 in 1984; 1,534 in 1985; 1,470 in 1986; 1,466 in 1987; 1,481 in 1988; 1,537 in 1989; and 1,372 in 1990). Sampling frames are

based on 1970 census information for surveys conducted in 1972-78, 1980, and 1982. For all interviews conducted from 1984-90, the national sampling frame was based on 1980 census information. A split sample transition design was used in the 1983 survey. One-half of the sample was drawn from the 1970 frame and one-half from the 1980 frame. Since 1973, the median length of the interview has been about one and a half hours. This study employed standard field procedures for national surveys, including interviewer hiring and training by area supervisors in interviewing locations when necessary.

Each survey is an independently drawn sample of English-speaking persons 18 years of age or older, living in non-institutional arrangements within the United States. Alaska and Hawaii are not included in samples drawn from the 1970 sampling frame, but are represented in one-half of the 1983 surveys, and all those conducted from 1984-90. Block quota sampling was used in the 1972, 1973. and 1974 surveys and for half of the 1975 and 1976 surveys. Full probability sampling was employed in half of the 1975 and 1976 surveys and in all of the 1977, 1978, 1980. and 1982-90 surveys. At the block level, quota sampling is used with quotas based on sex, age, and employment status. The cost of the quota samples is substantially less than the cost of a full probability sample of the same size, but there is, of course, the chance of sample biases mainly due to not-at-homes which are not controlled by the quotas. However, in order to reduce this bias, the interviewers are given instructions to canvass and interview only after 3:00 p.m. on weekdays or during the weekend or holidays. The first stage of sample selection includes selection of the Primary Sampling Units (PSUs). The PSUs employed are Standard Metropolitan Statistical Areas (SMSAs) or nonmetropolitan counties selected in NORC's Master Sample. These SMSAs and counties were stratified by region, age, and race before selection. The units of selection of the second stage were block groups (BG) and enumeration districts (EDs). These EDs and BGs were stratified according to race and income. The third stage of selection was that of blocks. which were selected with probabilities proportional to size. In places without block statistics, measures of size for the blocks were obtained by field counting. The average cluster size is five respondents per cluster.

The quotas call for approximately equal numbers of men and women with the exact proportion in each segment determined by the 1970 census tract data. For women, the additional requirement is imposed that there be the proper proportion of employed and unemployed women in the location. Again, these quotas are based on the 1970 census tract data. For men, the added requirement is

that there be the proper proportion of men over and under 35 years old in the location. Past experience would suggest that, for most purposes, this quota sample of 1,500 could be considered as having about the same efficiency as a simple random sample of 1,000 cases.

The 1975 and 1976 studies were conducted with a traditional sample design, one-half full probability and one-half block quota. The sample was divided into two parts for several reasons: (1) to provide data for possibly interesting methodological comparisons; and (2) on the chance that there are some differences over time, that it would be possible to assign these differences to either shifts in sample designs, or changes in response patterns. Having allowed for the appearance of all items in the transitional sample design, the General Social Survey then switched to a full probability sample for the 1977 survey.

## 1970 National Sampling Frame

For 1977, 1978, 1980, 1982 and one-half of 1983 interviews, the NORC national probability sample is a stratified, multi-stage, area probability sample of clusters of households in the continental United States based on 1970 census information. The selection of geographic areas at successive stages is in accordance with the method of probabilities proportional to size. Furthermore, the clusters of households are divided into replicated subsamples in order to facilitate estimation of the variance of sample estimators of population characteristics.

At the first stage of selection, Standard Metropolitan Statistical Areas (SMSAs) and non-metropolitan counties covering the total continental United States were grouped according to size strata within the nine census regions. All population figures and other demographic information were obtained from 1970 U.S. Bureau of the Census reports. Within each size stratum, grouping, based on geographic location or racial characteristics (or both), was accomplished before selection. The final frame was further separated into zones or "paper strata" of equal population size in order to facilitate the selection of replicated subsamples of primary sampling units (PSUs). The selection of PSUs was designed to produce four independent subsamples of equal size. The four subsamples were randomly combined to form two larger subsamples of 101 PSUs each. The large subsamples are thus internally separable into two replicated subsamples for variance estimation purposes. NORC has selected one of the two large subsamples described above to serve as its principle frame of households for the remainder of the decade. The PSUs fall into 89 distinct SMSAs and non-metropolitan counties. (New York, a very large SMSA, represents five PSUs, whereas the smaller counties represent only one PSU.)

The second-stage procedure involved the direct selection of census block groups or enumeration districts (EDs) within SMSAs or counties, eliminating the traditional intermediate stage of clustering selections within urban places or county divisions. Before selections, census tracts, minor civil divisions. census county divisions containing the block groups, and EDs were carefully stratified by deographic location, income, and race, in order to maximize the precision of sample estimation within a PSU. Block groups and EDs were then selected with probabilities proportional to size in numbers sufficient to satisfy survey demands for households expected throughout the decade. Lists of the separate households contained in the second stage blocks or EDs were constructed by field personnel or obtained from directories. Thus, the principal NORC national probability sample is, in effect, an inventory of identifiable households, each with a known probability of selection. In a typical sample survey with equal probability of selection for individual households (i.e., a self-weighting sample), households at which interviews will take place are probabilistically selected from the available lists of addresses for blocks and EDs. The method of probabilities proportional to size results in the assignment of an approximately equal number of interviews in each final stage cluster, which in turn leads to increased precision in the estimation of overall population characteristics.

# 1980 National Sampling Frame

Census information for 1980 was used to sample respondents for one-half of the 1983 interviews, and all those surveys administered 1984-90. Eighty-four PSUs were selected at the first stage. The PSUs consist of counties, SMSAs, independent cities and, in New England, parts of counties. Prior to selection, the United States was divided into PSUs; the PSUs were then grouped into 84 strata. The strata were formed by grouping metropolitan and non-metropolitan PSUs within each of the four Census regions. Within each region, additional variables were used to define strata. The stratifying variables included within-region geography and size; size was measured by the 1980 Census count of occupied housing units. One PSU was selected from each stratum using a controlled selection procedure. This procedure ensured proportionate representation along certain control dimensions (such as percentage Hispanic in the West). The exact control variables (like the stratification variables) differed somewhat from region to region. Sixteen strata contained only one PSU. which was selected with certainty. The remaining 68 PSUs were selected with

probability proportional to size (measured in housing units).

The unit for second stage selection was the block or enumeration district (ED). The number of secondary selections within a PSU depended in part on the stratum size. The number of second stage selections listed for NORC's national frame in the 16 PSUs selected with certainty ranged from 24 to six selections for PSU. In the remaining 68 sample PSUs, six second stage selections were listed. All total, the new frame includes 562 secondary selections.

Prior to selection, the second stage units within each sample PSU were sorted by county, by minor civil division (in some areas), by Census Tract or ED number, and by block number. Counties were ordered within PSUs according to size and geography. Secondary selections were made using systematic zone selection; the probabilities of selection were proportional to size (measured in housing units). Each secondary selection included at least 50 housing units.

In enumeration districts and blocks with a large number of dwelling units, a third stage of selection was carried out. The block or ED was subdivided into pieces which were "field counted." Based on the field count, a piece of the sample block or ED with probability proportional to its size was selected.

Survey results are reported for four regional categories, with the States classified in the following way:

Northeast--Connecticut, Maine, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont;

North Central--Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, Wisconsin:

South--Alabama, Arkansas, Delaware, District of Columbia, Florida, Geergia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, West Virginia;

West--Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, Wyoming.

# MEDIA GENERAL/ASSOCIATED PRESS POLL

Media General and The Associated Press polls are based on telephone interviews with adults across the continental United States. All samples are drawn randomly by Survey Sampling, Inc. of Fairfield, Connecticut and include both listed and non-listed households with telephones. The data project to an estimated 161 million adults living in households with telephones.

Interviews on abortion were conducted on March 6-15, 1989 and included a representative sample of 1,108 adults. Interviews on the drug problem were conducted on Sept. 14-24, 1989 and May 11-20, 1990 and included representative samples of 1,071 and 1,143 adults respectively.

Survey results are reported for four regional categories, with the States classified in the following way:

Northeast--Connecticut, Maine, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont;

North Central--Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, Wisconsin;

South--Alabama, Arkansas, Delaware, District of Columbia, Florida, Georgia, Kentucky, Loulsiana, Maryland, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, West Virginia;

West--Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, Wyoming.

#### YANKELOVICH CLANCY SHULMAN

The Yankelovich Clancy Shulman Polls are based on telephone interviews with adults from across the country. The data presented in SOURCEBOOK from this source were provided for Cable News Network and Time Magazine from a survey of 506 adults conducted on June 1, 1989. The survey has a margin of sampling error of plus or minus four and a half percentage points.

Monitoring the Future 1975-1990 Survey methodology and definitions of terms

Note: The following information was excerpted from Jerald G. Bachman, Lloyd D. Johnston, and Patrick M. O'Malley, Monitoring the Future 1986 (Ann Arbor, Ml: Institute for Social Research, University of Michigan, 1987), pp. 2-10, 10, 14, 269; Lloyd D. Johnston, Patrick M. O'Malley, and Jerald G. Bachman, Drug Use Among American High School Seniors, College Students and Young Adults 1975-1990 (Washington, DC: USGPO, 1991); and information provided by the Monitoring the Future Project. Non-substantive editorial adaptations have been made.

### Survey methodology

The basic research design involves annual data collections from high school seniors during the spring of each year, beginning with the class of 1975. Each data collection takes place in approximately 125 to 135 public and private high schools selected to provide an accurate cross section of high school seniors throughout the coterminous United States.

Since 1985, the results of a follow-up survey of those young adults one to ten years beyond high school have been presented. These results should accurately characterize 85 percent of the young adults in the class cohorts one to ten years beyond high school who are high school graduates. The high school dropout segment, missing from the senior year surveys, is also missing from the follow-up segments.

Also since 1985, the results of follow-up surveys of those high school students who have continued on to college have been presented. The college sample is limited to the most typical one for college attendance: one to four years past high school, which corresponds to the modal ages of 19 to 22 years old. This age category should encompass about 85 percent of all students enrolled in college full-time in 1980.

## Sampling procedures

The procedure for securing a nationwide sample of high school seniors is a multistage one. Stage 1 is the selection of particular geographic areas, Stage 2 is the selection of one or more high schools in each area, and Stage 3 is the selection of seniors within each high school.

Stage 1: Geographic Areas. The geographic areas used in this study are the primary sampling units (PSUs) developed by the Sampling Section of the Survey Research Center for use in the Center's nationwide interview studies. These consist of 74 primary areas throughout the coterminous United States--including the 12 largest metropolitan areas, which contain about 30 percent of the nation's population. Of the 62 other primary areas, 10 are in the Northeast, 18 in the North Central area, 24 in the South, and 10 in the West. Because these same PSUs are used for personal interview studies by the Survey Research Center (SRC), local field representatives can be assigned to administer the data collections in practically all schools.

Stage 2: Schools. In the major metropolitan areas more than one high school is often included in the sampling design; in most other sampling areas a single high school is sampled. In all cases, the selections of high schools are made such that the probability of drawing a school is proportionate to the size of its senior class. The larger the senior class (according to recent records), the higher the selection probability assigned to the high school. When a sampled school is unwilling to participate, a replacement school as similar to it as possible is selected from the same geographic area.

Stage 3: Students. Within each selected school, up to about 400 seniors may be included in the data collection. In schools with fewer than 400 seniors, the usual procedure is to include all of them in the data collection. In larger schools, a subset of seniors is selected either by randomly sampling classrooms or by some other random method that is convenient for the school and judged to be unbiased. Sample weights are assigned to each respondent so as to take account of variations in the sizes of samples from one school to another, as well as the (smaller) variations in selection probabilities occurring at the earlier stages of sampling.

The three-stage sampling procedure described above yielded the number of participating schools and students indicated in Table 1.

One limitation in the design is that it does not include in the target population those young men and women who drop out of high school before graduation (or before the last few months of the senior year, to be more precise). This excludes a relatively small proportion of each age cohort--between 15 and 20 percent. Though not an unimportant segment, we do know that certain behaviors such as illicit drug use and delinquency tend to be higher than average in this group. However, the addition of a representative sample of dropouts would increase the cost of the present research enormously, because of their dispersion and generally higher level

of resistance to being located and interviewed.

For the purposes of estimating characteristics of the entire age group, the omission of high school dropouts does introduce certain biases; however, their small proportion sets outer limits on the bias. For the purposes of estimating changes from one cohort of high school seniors to another, the omission of dropouts represents a problem only if different cohorts have considerably different proportions who drop out. We have no reason to expect dramatic changes in those rates for the foreseeable future, and recently published government statistics indicate a great deal of stability in dropout rates since 1970.

Some may use the high school data to draw conclusions about changes for the entire age group. While we do not encourage such extrapolation, we suspect that the conclusions reached often would be valid, since over 80 percent of the age group is in the surveyed segment of the population and we expect that changes among those not in school are very likely to parallel the changes among those who are. Nevertheless, for purposes of characterizing the entire age group we would urge the user to check the results emanating from the present monitoring system against those emerging from other data collection systems using different methods, such as household interviews.

One other important feature of the base-year sampling procedures should be noted. All schools (except for half of the initial 1975 sample) are asked to participate in two data collections, thereby permitting replacement of half of the total sample of schools each year. One motivation for requesting that schools participate for two years is administrative efficiency; it is a costly and time-consuming procedure to secure the cooperation of schools, and a two-year period of participation cuts down that effort substantially. Another important advantage is that whenever an appreciable shift in scores from one graduating class to the next is observed, it is possible to check whether the shift might be attributable to some differences in the newly sampled schools. This is done simply by repeating the analysis using only the 60 or so schools which participated both years. Thus far, the half-sample approach has worked quite well; and examination of drug prevalence data from the "matched half-samples" shows that the half samples of repeat schools yielded drug prevalence trends which were virtually identical to trends based on all schools.

## Questionnaire administration

The questionnaire administration in each school is carried out by the local SRC repre-

sentatives and their assistants, following standardized procedures detailed in a project instruction manual. The questionnaires are administered in classrooms during normal class periods whenever possible, although circumstances in some schools require the use of larger group administrations. Teachers are not asked to do anything more than introduce the SRC staff members and (in most cases) remain in the classroom to help guarantee an orderly atmosphere for the survey. Teachers are urged to avoid walking around the room, so that students may feel free to write their answers without fear of being observed.

The actual process of completing the questionnaires is quite straightforward. Respondents are given sharpened pencils and asked to use them because the questionnaires are designed for automatic scanning. Most respondents can finish within a 45-minute class period; for those who cannot, an effort is made to provide a few minutes of additional time.

# Content areas and questionnaire design

Drug use and related attitudes are the topics which receive the most extensive coverage in the Monitoring the Future project; but the questionnaires also deal with a wide range of other subject areas, including attitudes about government, social institutions, race relations, changing roles for women, educational aspirations, occupational aims, and marital and family plans, as well as a variety of background and demographic factors. The list below provides an outline of the 19 general subject areas into which all items are categorized. Given this breadth of content, the study is not presented to respondents as a "drug use study," nor do they tend to view it as such.

#### Measurement content areas

- **A. Drugs.** Drug use and related attitudes and beliefs, drug availability and exposure, surrounding conditions and social meanings of drug use. Views of significant others regarding drugs.
- **B. Education.** Educational lifestyle, values, experiences, and environments.
- C. Work and leisure. Vocational values, meaning of work and leisure, work and leisure activities, preferences regarding occupational characteristics and type of work setting.
- **D. Sex roles and family.** Values, attitudes, and expectations about marriage, family structure, sex roles, and sex discrimination.
- E. Population concerns. Values and attitudes about overpopulation and birth control.

- F. Conservation, materialism, equity, etc. Values, attitudes, and expectations related to conservation, pollution, materialism, equity, and the sharing of resources. Preferences regarding type of dwelling and urbanicity.
- **G. Religion.** Religious affiliation, practices, and views.
- **H. Politics.** Political affiliation, activities, and views.
- **I. Social change.** Values, attitudes, and expectations about social change.
- J. Social problems. Concern with various social problems facing the nation and the world.
- K. Major social institutions. Confidence in and commitment to various major social institutions (business, unions, branches of government, press, organized religion, military, etc.).
- L. Military. Views about the armed services and the use of military force. Personal plans for military service.
- M. Interpersonal relationships. Qualitative and quantitative characteristics of cross-age and peer relationships. Interpersonal conflict.
- N. Race relations. Attitudes toward and experiences with other racial groups.
- **C. Concern for others.** Concern for others; voluntary and charitable activities.
- P. Happiness. Happiness and life satisfaction, overall and in specific life domains.
- Q. Other personality variables. Attitudes about self (including self-esteem), locus of control, loneliness, risk-taking, trust in others, importance placed on various life goals, counter-culture orientation, hostility.
- **R. Background.** Demographic and family background characteristics, living arrangements.
- S. Deviant behavior and victimization.
  Delinquent behaviors, driving violations and accidents (including those under the influence of drugs), victimization experiences.
- T. Health habits and symptoms. Health habits, somatic symptoms, medical treatments.

Because many questions are needed to cover all of these topic areas, much of the questionnaire content was divided into five different questionnaire forms in 1976-88 and six different questionnaire forms for 1989 and beyond which are distributed to participants in an ordered sequence that produces virtual-

ly identical subsamples. About one-third of each questionnaire form consists of key or "core" variables which are common to all forms. All demographic variables and some measures of drug use are included in this "core" set of measures. This use of the full sample for drug and demographic measures provides a more accurate estimation on these dimensions and also makes it possible to link them statistically to all of the other measures which are included in a single form only.

## Representativeness and validity

The samples for this study are intended to be representative of high school seniors throughout the 48 coterminous States. As previously mentioned, this definition of the sample excludes one important portion of the age cohort: those who have dropped out of high school before nearing the end of the senior year. But given the aim of representing high school seniors, it is useful to consider the extent to which the obtained samples of schools and students are likely to be representative of all seniors and the degree to which the data obtained are likely to be valid.

There are at least four ways in which survey data of this sort might fall short of being fully accurate. First, some sampled schools refuse to participate, which could introduce some bias. Second, the failure to obtain questionnaire data from 100 percent of the students sampled in participating schools would also introduce bias. Third, the answers provided by participating students are open to both conscious and unconscious distortions which could reduce validity. Finally, limitations in sample size and/or design could place limits on the accuracy of estimates.

# **School participation**

As noted in the description of the sampling design, schools are invited to participate in the study for a two-year period. With very few exceptions, each school which has participated for one data collection has agreed to participate for a second. Thus far, from 66 percent to 80 percent of the schools initially invited to participate have agreed to do so each year; for each school refusal, a similar school (in terms of size, geographic area, urbanicity, etc.) was recruited as a replacement.

The selection of replacement schools almost entirely removes problems of bias in region, urbanicity, and the like that might result from certain schools refusing to participate. Other potential biases are more subtle, however. For example, if it turned out that most schools with "drug problems" refused to participate, that could seriously bias the drug estimates derived from the sample. And if any other single factor was dominant in most refusals, that also might suggest a source of serious bias. In fact, however, the reason for

schools' refusals to participate are varied and largely a function of happenstance events of the particular year. Thus, there is a fair amount of confidence that school refusals have not seriously biased the surveys.

## Student participation

Completed questionnaires are obtained from three-fourths to four-fifths of all students sampled. The single most important reason that students are missed is that they are absent from class at the time of data collection, and in most cases it is not workable to schedule a special follow-up data collection for them.

In addition to absenteeism, student nonparticipation occurs because of schedule conflicts with school trips and other activities which tend to be more frequent than usual during the final months of the senior year. Of course, some students refuse to complete or turn in a questionnaire. However, the SRC representatives in the field estimate this proportion to be only about one percent.

# Research design for the follow-up surveys after high school

Beginning with the graduating class of 1976, each class is followed up and surveyed each year after high school. From the approximately 17,000 seniors originally participating in a given class, a representative sample of 2,400 individuals was chosen for follow-up. In order to ensure sufficient numbers of drug users in the follow-up surveys, those fitting certain criteria of current drug use (that is, those reporting current daily marihuana use in senior year or use of any of the other illicit drugs in the previous 30 days) were selected with higher probability (by a factor of 3.0) than the remaining seniors. Differential weighting is used in all follow-up analyses to compensate for the differential sampling probabilities.

The 2,400 selected respondents from each class were randomly assigned to one of two matching groups of 1,200 each; one group was surveyed on even-numbered calendar years, while the other group was surveyed on odd-numbered years. This biannual procedure was intended to reduce respondent burden.

### Follow-up procedures

Using information provided by respondents at the time of the senior survey (name, address, phone number, and the name and address of someone who would always know how to reach them), students selected for the panels were contacted by mail. Newsletters were sent each year and name and address corrections were requested. Questionnaires were sent by certified mail in the spring of each

year. A check for \$5.00 made out to the respondent, was attached to the front. Reminder letters and post cards went out at fixed intervals thereafter and finally, those not responding received a prompting phone call from the Survey Research Center's phone interviewing facility in Ann Arbor. If requested, a second copy of the questionnaire was sent.

### Panel retention rates

To date the panel retention rates have remained quite high. In the first follow-up after high school, about 81 percent of the original panel returned questionnaires. The retention rate decreases ordinally with time; however, the 1990 panel retention from the Class of 1976--the oldest of the panels, now aged 32--remains at about 70 percent.

Since attrition is to a modest degree associated with drug use, corrections to the prevalence estimates are presented for the follow-up panels. These raise the prevalence estimates from what they would be uncorrected, but only slightly. It is believed that the resulting estimates are the most accurate obtainable, but still low for the age group as a whole due to the omission of dropouts and absentees from the population covered by the original panels.

#### Validity of self-report data

Survey measures of delinquency and of drug use depend upon respondents reporting what are, in many cases, illegal acts. Thus, a critical question is whether such self-reports are likely to be valid. Like most studies dealing with these areas, there is no direct, objective validation of the present measures; however, the considerable amount of inferential evidence which exists strongly suggests that the self-report questions produce largely valid data. A number of factors suggest a reasonable amount of confidence about the validity of the responses to what are presumably among the most sensitive questions in the study: a low nonresponse on the drug question; a large proportion admitting to some illicit drug use; the consistency of findings across several years of the present study; strong evidence of construct validity (based on relationships observed between variables); a close match between these data and the findings from other studies using other methods; and the findings from several methodological studies which have used objective validation methods.

# Accuracy of the sample

A sample survey never can provide the same level of accuracy as would be obtained if the entire target population were to participate in the survey--in the case of the present study, about three million seniors per year. But perfect accuracy of this sort would be extremely

expensive and certainly not worthwhile considering the fact that a high level of accuracy can be provided by a carefully designed probability sample. The accuracy of the sample in this study is affected both by the size of the student sample and by the number of schools in which they are clustered. Virtually all estimates based on the total sample have confidence intervals of plus or minus 1.5 percentage points or smaller--sometimes considerably smaller.

# Interpreting racial differences

Data are given for the two largest racial ethnic subgroups in the population--those who identify themselves as White or Caucasian and those who identify themselves as Black or Afro-American. Data are not given for the other ethnic categories (American Indians, Asian Americans, Mexican Americans, Puerto Ricans, or other Latin Americans) since each of these groups comprise less than three percent of the sample in any given year, which means that their small N's (in combination with their clustered groupings in a limited number of schools) would yield estimates which would be too unreliable. In fact, even Blacks--who constitute approximately 12 percent of each year's sample--are represented by only 350 to 425 respondents per year on any single questionnaire form. Further, because the sample is a stratified clustered sample, it yields less accuracy than would be yielded by a pure random sample of equal size. Therefore, because of the limited number of cases, the margin of sampling error around any statistic describing Blacks is larger than for most other subgroups described in this survey.

There are factors in addition to unreliability, however, which could be misleading in the interpretation of racial differences. Given the social importance which has been placed on various racial differences reported in the social science literature, the reader is cautioned to consider the various factors which could account for differences. These factors fall into three categories: differential representation in the sample, differential response tendencies, and the confounding of race with a number of other background and demographic characteristics.

Differential representation--A smaller segment of the Black population than of the White population of high school age is represented by the data contained here. Insofar as any characteristic is associated with being a school dropout or absentee, it is likely to be somewhat disproportionately underrepresented among Blacks in the sample.

Differential response tendencies--In examining the full range of variables, certain racial differences in response tendencies were noted. First, the tendency to state agreement

in response to agree-disagree questions is generally somewhat greater among Blacks than among Whites.

There is also a somewhat greater than average tendency for Black respondents to select extreme answer categories on attitudinal scales. For example, even if the same proportion of Blacks as Whites felt positively (or negatively) about some subject, fewer of the Whites are likely to say they feel very positively (or very negatively). In the process of interpreting racial differences, the reader should be aware that differences in responses to particular questions may be related to these more general tendencies.

Covariance with other factors--Some characteristics such as race are highly confounded (correlated) with other variables--variables which may in fact explain some observed racial differences. Put another way, at the aggregate level one might observe a considerable racial difference on some characteristic, but once one controls for some background characteristics such as socio-economic level or region of the country--that is, comparing the Black respondents with Whites who come from similar backgrounds--there may be no racial difference at all.

### **Definitions of terms**

Sex--Percentage distributions are given separately for males and females. Respondents with missing data on the question asking the respondent's sex are omitted from both groupings.

Race--Percentage distributions are given separately for those describing themselves as "White or Caucasian" and "Black or Afro-American." Comparable columns for the other racial or ethnic groups (Mexican Americans, Asian Americans, American Indians, etc.) are not shown because of the low number of cases in each group.

Region--Percentage distributions are given separately for respondents living in each of four mutually exclusive regions of the country. The regional classifications are based on Census categories and are defined as follows:

Northeast: Census classifications of New England and Middle Atlantic States; includes Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, and Pennsylvania.

North Central: Census classifications of East North Central and West North Central States; includes Ohio, Indiana, Illinois, Michigan, Wisconsin, Minnesota, Iowa, Missouri, North Dakota, South Dakota, Nebraska, and Kansas.

South: Census classifications of South Atlantic, East South Central, and West South Central States; includes Delaware, Maryland, District of Columbia, Virginia, West Virginia, North Carolina, South Carolina, Georgia, Florida, Kentucky, Tennessee, Alabama, Mississippi, Arkansas, Louisiana, Oklahoma, and Texas.

West: Census classifications of Mountain and Pacific States; includes Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada, Washington, Oregon, and California.

Four-year college plans--Percentage distributions are given separately for (1) respondents who indicate that they "definitely will" or "probably will" graduate from a four-year college program and (2) those who say that they "definitely won't" or "probably won't" graduate from a four-year college program. Respondents not responding are omitted from both columns. A number of those who do not expect to complete a four-year college program do expect to get some post-secondary education.

Illicit drug use: Lifetime--Percentage distributions are given separately for five mutually exclusive subgroups differentiated by their degree of involvement with illicit drugs. Eligibility for each category is defined below.

None--This column contains data from those respondents who indicated that they had not used marihuana at any time and did not report use of any of the following illicit drugs in their lifetime: LSD, other psychedelics, cocaine, amphetamines, tranquilizers, methaqualone, barbiturates, heroin, or other narcotics.

Marihuana only--This column contains data from other respondents who indicated that they had used marihuana (or hashish) but had never used any of the other illicit drugs just listed.

Few pills--This column contains data from those respondents who indicated having used one or more of the above listed drugs (other than marihuana) but who had not used any one class of them on three or more occasions and who had not used heroin at all.

More pills--This column contains data from respondents who had used any of the above listed drugs (other than marihuana) on three or more occasions but who had never used heroin.

Any heroin--This column contains data from those respondents who indicated having used heroin on one or more occasions in their lifetime.

Weighted number of cases--The number of cases is stated in terms of the weighted number of respondents rather than the actual number, since all percentages have been calculated using weighted cases. The actual number of respondents generally is about 15 percent higher than the weighted number for data collected in 1975, 1976, and 1977. A comparison of weighted and unweighted numbers is provided in Table 2. For data collected in 1978 or later, the actual number of respondents is roughly equal to the weighted number. Weighting is used to

improve the accuracy of estimates by correcting for unequal probabilities of selection which arise in the multi-stage sampling procedures.

**Drug types**--Definitions or identifiers used in survey forms include:

Marihuana--pot, grass or hashish; Other psychedelics--mescaline, peyote, PCP;

Amphetamines--uppers, pep pills, bennies, speed;

Quaaludes--quads, methaqualone; Barbiturates--downers, goofballs, reds, yellows;

Heroin--smack, horse;

Other narcotics--methadone, opium, codeine, paregoric;

Inhalants--glue, aerosols, laughing gas; Tranquilizers--Librium, Valium, Miltown.

Beginning with the 1979 survey, amyl and butyl nitrites were considered "other inhalants" for questions on one alternate survey form (N=one-fifth of total sample size). This was due to the fact that not all users of this subclass of inhalants were reporting themselves as inhalant users. Hallucinogen use had been similarly underestimated because some users of the hallucinogenic drug PCP do not report themselves as users of hallucinogens--even though PCP was included as an example of a hallucinogenic drug in earlier surveys and on other questions. The alternate questionnaire form contained a special set of questions about PCP, which provided other street names for it (e.g., angel dust). As a result of these definition changes, since 1979 data for drug use in these two drug classes have been adjusted for underreporting. For more information, see the Source.

rate (percent)b	78	.77	79	83	82	81	81	83	84	83	84	83	84	83	86	86	

aSample weights are assigned to each respondent to correct for unequal probabilities of selection that arise in the multi-stage sampling procedure. bThe student response rate is derived by dividing the attained sample by the target sample

(both based on weighted numbers of cases). The target sample is based upon listings provided by schools. Because such listings may fall to take account of recent student attrition, the actual response rate may be slightly underestimated.

National Crime Survey Data collection procedures and definitions of terms

Note: The following information was compiled by SOURCEBOOK staff and excerpted from U.S. Department of Justice, Bureau of Justice Statistics, *Criminal Victimization in the United States, 1989*, National Crime Survey Report NCJ-129391 (Washington, DC: U.S. Department of Justice, 1991), Appendix III and glossary; *Female Victims of Violent Crime*, NCJ-126826 (Washington, DC: U.S. Department of Justice, 1991), p. 14; and U.S. Department of Justice, Bureau of Justice Statistics, *Handgun Crime Victims*, Special Report NCJ-123559 (Washington, DC: U.S. Department of Justice, June 1990), p. 8.

The National Crime Survey Program surveys a nationwide sample of residents throughout the Nation, including persons living in group quarters such as dormitories, rooming houses, and religious group dwellings. Crew members of merchant vessels, Armed Forces personnel living in military barracks, and institutionalized persons, such as correctional facility inmates, did not fall within the scope of the survey. Similarly, United States citizens residing abroad and foreign visitors to this country were excluded. With these exceptions, individuals age 12 and older living in units designated for the sample were eligible to be interviewed.

### **Data collection**

Each housing unit selected for the National Crime Survey (NCS) is in the sample for 3 years with each of seven interviews taking place at 6-month intervals. An NCS interviewer's first contact with a housing unit selected for the survey is in person, and if it is not possible to secure face-to-face interviews with all eligible members of the house-hold during this initial visit, interviews by telephone are permissible thereafter. The only exceptions to the requirement that each eligible person be interviewed apply to incapacitated persons and individuals who are absent from the household during the entire field-interviewing period.

Beginning in July of 1986, unless a knowledgeable household member insists otherwise, 12- and 13-year olds are interviewed directly by the interviewer. This differs from the previous practice of interviewing a knowledgeable adult as a proxy respondent for all 12- and 13-year olds unless the adult insisted that the child be interviewed and the alternative was no interview at all, in the case of

temporarily absent household members and persons who are physically or mentally incapable of granting interviews, interviewers may accept other household members as proxy respondents, and in certain situations (under rigidly prescribed rules) nonhousehold members may provide information for incapacitated persons.

Prior to February 1980 the second through seventh interviews were conducted in the same manner as the initial interview. At that time, however, the mode of interviewing was changed to cut data collection costs. Telephone interviewing was increased and inperson interviewing was reduced. This change was implemented in a manner that reduced the possibility of biasing the results. For half the remaining interviews at a sample address, the procedure was the same as that used for the entire sample prior to February 1980: The third, fifth, and seventh interviews were conducted primarily in person, with telephone follow-up permitted. The three even-numbered interviews have been conducted insofar as possible by telephone. Beginning in March 1986, all interviews were done by telephone wherever possible, except for the first and fifth interviews, which are still primarily conducted in person. Face-to-face interviews are often conducted with other family members present. Consequently, if offender and victim reside in the same household, it may not be possible for the victim to relate his or her experience because of the presence of the offender. In telephone interviews the interviewer has no way of knowing if a household member's responses are being monitored.

A basic screen questionnaire and a crime incident report are used to elicit information on the relevant crimes committed against any members of the household age 12 or older. The initial interview is designed to screen for all instances of victimization before details of any specific incident are collected. In the screen questions respondents are asked if they were attacked or threatened but not directly asked if they have been raped. Nor are they told that threats or attacks by their intimates are germane to the survey. Only if a respondent volunteers that she or he has been raped or threatened with rape is the incident so classified.

# Sample design and size

Survey estimates are based on data obtained from a stratified, multistage cluster sample. The primary sampling units (PSU's) composing the first stage of the sampling were counties, groups of countles, or large metropolitan areas. Large PSU's were included in the sample automatically and were considered to be self-representing (SR). The remaining PSU's, called non-self-representing (NSR), were combined into strata by grouping PSU's

with similar demographic characteristics, as determined by the 1980 census. From each stratum, one PSU was selected for the sample, the probability of selection having been proportionate to the PSU's population.

In June 1984, a sample cut resulted in the reduction of NSR strata from 220 to 153. This also included a 20 percent sample reduction In the larger of the 156 SR PSU's. Phase-in of a revised NCS sample design based on 1980 census data began in January 1985. Thus, households that were interviewed during 1987 were drawn from both the 1970and 1980-based sample designs. The 1980 design consists of 84 SR PSU's and 153 NSR strata, with one PSU per stratum selected with probability proportionate to size. Part of the reduction in the number of SR PSU's is due to a different procedure for drawing PSU boundaries, especially in the New England states, so that the 156 PSU's in the 1970 design are equivalent to 130 PSU's in the current design. Even with this smaller number of sample areas, the reliability of estimates has been maintained by using crimerelated characteristics in the formation of the strata and by improving sample selection within the PSU's.

The remaining stages of sampling were designed to ensure a self-weighting probability sample of dwelling units and group quarters within each of the selected areas. This involved a systematic selection of enumeration districts (geographic areas used for the 1980 census), with a probability of selection proportionate to their 1980 population size, followed by the selection of clusters of approximately four housing units each from within each enumeration district. To account for units built within each of the sample areas after the 1980 census, a sample was drawn, by means of an independent clerical operation, of permits issued for the construction of residential housing. Jurisdictions that do not issue building permits were sampled using small land-area segments. These supplementary procedures, though yielding a relatively small portion of the total sample, enabled persons occupying housing built after 1980 to be properly represented in the survey. With the passage of time, newly constructed units account for an increased proportion of the total sample.

Approximately 62,700 housing units and other living quarters were designated for the sample. For purposes of conducting the field interviews, the sample was divided into six groups, or rotations, each of which contained housing units whose occupants were to be interviewed once every 6 months over a period of 3 years. The initial interview was for purposes of bounding (that is, establishing a time frame to avoid duplicative recording of information on subsequent interviews) but was not used in computing annual estimates.

Each rotation group was further divided into six panels. Persons occupying housing units within one-sixth of each rotation group, or one panel were interviewed each month during the 6-month period. Because the survey is continuous, additional housing units are selected in the manner described and assigned to rotation groups and panels for subsequent incorporation into the sample. A new rotation group enters the sample every 6 months, replacing a group phased out after being in the sample for 3 years. Interviews were obtained at 6-month intervals from the occupants of about 48,400 of the 58,800 housing units designated for the sample. The large majority of the remaining 10,400 units were found to be vacant, demolished, converted to non-residential use, or otherwise ineligible for the survey. However, approximately 1,800 of the 10,400 units were occupied by persons who, although eligible to participate in the survey, were not interviewed because they could not be reached after repeated visits, declined to be interviewed, were temporarily absent, or were otherwise not available.

Thus, the occupants of about 96 percent of all eligible housing units, or some 97,000 persons, participated in the survey.

Approximately 5 percent of the 48,000 households in the 1989 sample, were interviewed using a new technique called Computer-Assisted Telephone Interviewing (CATI). This technique was first used in 1987, and a study of the results revealed that it had no serious effect on the NCS data. Therefore, the data collected from CATI-designated households are included in the 1989 results.

# **Estimation procedure**

To enhance the reliability of the estimates presented, the estimation procedure incorporated additional data on those characteristics of the population that are believed to effect victimization rates. These data were used in the various stages of ratio estimation.

The estimation procedure produces quarterly estimates of the volume and rates of victimization. Sample data from 8 months of field interviewing are required to produce estimates for each quarter. Each quarterly estimate is made up of equal numbers of field observations from the months during the half-year interval prior to the time of interview. This arrangement minimizes expected biases associated with the tendency of respondents to place criminal victimizations in more recent months during the 6-month reference period than when they actually occurred. Annual estimates are derived by accumulating data from the four quarterly estimates, which in turn are obtained from 17 months of field interviewing--from February of one year through June of the following year. The population and household rates of victimization are based on an average for these 17 months, centering on the ninth month of data collection period, or October 1989.

## Reliability of estimates

All of the National Crime Survey data presented are population estimates derived from nationwide probability samples. The samples used for the national survey are large; during a 6-month period, about 48,000 household interviews and 97,000 personal interviews are conducted. Nevertheless, whenever samples of a population--rather than the entire population--are studied, a certain amount of sampling error is introduced into the results. The size of this error depends on such factors as the size of the sample and the variability of the population. However, the sampling design and techniques were carried out in a way that permits an estimation of the amount of sampling error present in the results.

The sample used for the NCS is one of a large number of possible samples of equal size that could have been used applying the same sample design and selection procedures. Estimates derived from different samples would differ from each other.

The standard error of a survey estimate is a measure of the variation among the estimates from all possible samples and is, therefore, a measure of the precision with which the estimate from a particular sample approximates the average result of all possible samples. The estimate and its associated standard error may be used to construct a confidence interval, that is, an interval having a prescribed probability that it would include the average result of all possible samples. Estimates falling within the prescribed confidence interval are considered statistically significant. Most comparisons cited in this report were significant at a minimum level of 2.0 standard errors (the 95 percent confidence level), meaning that the estimated difference is greater than twice the standard error of the difference. Comparisons that failed the 90 percent test were not considered statistically significant.

Because the method utilized in the production of these standard errors and confidence intervals is based on approximations, the standard errors are an indication of the order of magnitude of the standard error rather than the precise standard error for any specific item. It should be noted that as finer and finer breakdowns of the population are made--for example, along dimensions of race, income, age, etc.--the size of the standard error, relative to the size of the estimate, can be expected to increase.

#### Series victimizations

Three or more criminal events that are similar if not identical in nature and incurred by individuals who are unable to identify separately the details of each act or recount accurately the total number of such acts are known as series victimizations. Because of the inability of the victims to provide details for each event separately, series crimes have been excluded from analysis and tables derived from the 1989 NCS data. However, tables presented from *Female Victims of Violent Crime* include series crimes. Each series incident was counted as one incident.

## **Definitions of terms**

Age--The appropriate age category is determined by the respondent's age on the last day of the month before the interview.

Aggravated assault--Attack or attempted attack with a weapon, regardless of whether or not an injury occurred, and attack without a weapon when serious injury results. Serious injury includes broken bones, lost teeth, internal injuries, loss of consciousness, and any injury requiring two or more days of hospitalization.

Annual family income--The total income of the household head and all relatives living in the same housing unit for the 12 months preceding the interview. Includes wages, salaries, net income from businesses or farms, pensions, interest, dividends, rent, and any other form of monetary income. The incomes of people who are not related to the head of the household are not included.

Assault--An unlawful physical attack or threat of attack. Assaults may be classified as aggravated or simple. Rape and attempted rape are excluded from this category, as well as robbery and attempted robbery. The severity of assaults ranges from minor threat to incidents which are nearly fatal.

Attempted forcible entry--A form of burglary in which force is used in an attempt to gain entry.

Burglary--Unlawful or forcible entry or attempted entry of a residence. This crime usually, but not always, involves theft. The illegal entry may be by force, such as breaking a window or slashing a screen, or may be without force by entering through an unlocked door or an open window. As long as the person entering has no legal right to be present in the structure a burglary has occurred. Furthermore, the structure need not be the house itself for a burglary to take place; illegal entry of a garage, shed, or any other structure on the premises also constitutes household burglary. If breaking and entering occurs in a hotel or vacation residence, it is still classified as a burglary for the household whose member or members were staying there at the time the entry occurred.

**Ethnicity-**-A classification based on Hispanic culture and origin, regardless of race.

Forcible entry--A form of burglary in which force is used to gain entry to a residence. Some examples include breaking a window or slashing a screen.

Head of household--A classification which defines one and only one person in each housing unit as the head. Head of household implies that the person rents or owns (or is in the process of buying), the housing unit. The head of household must be at least 18, unless all members of the household are under 18, or the head is married to someone 18 or older.

Household--A person or group of people meeting either of the following criteria. (1) people whose usual place of residence is the same housing unit, even if they are temporarily absent. (2) people staying in a housing unit who have no usual place of residence elsewhere.

Household crimes--Attempted and completed crimes that do not involve personal confrontation. Examples of household crimes include burglary, motor vehicle theft, and household larceny.

Household larceny--Theft or attempted theft of property or cash from a residence or the immediate vicinity of the residence. In order to occur within a house, the thief must have a legal right to be in the house (such as a maid, delivery person or guest), as unlawful or forcible entry constitutes a burglary.

Incident--A specific criminal act involving one or more victims and offenders. For example, if two people are robbed at the same time and place, this is classified as two robbery victimizations but only one robbery incident.

Larceny--Theft or attempted theft of property or cash without involving force or illegal entry. This category is subdivided into personal larceny and household larceny.

Location of residence--A metropolitan area is a county or counties that contain a city or cities having at least 50,000 total population. A central city is the largest city of a metropolitan area. A suburban area is the portion outside the central city. Nonmetropolitan areas include rural areas and cities of fewer than 50,000.

Marital status--Every person is assigned to one of the following classifications: (1) married, which includes persons in common-law unions and those who are currently living apart for reasons other than marital discord (employment, military service, etc.); (2) separated or divorced, which includes married persons who are legally separated and those who are not living together because of marital discord; (3) widowed; and (4) never married, which includes persons whose marriages have been annulled and those who are living together and not in a common-law union.

Minor injury--Injuries 1) that involve bruises, black eyes, cuts, scratches, swelling, or 2) that are of undetermined nature that required less than 2 days of hospitalization.

Motor vehicle--An automobile, truck, motorcycle or any other motorized vehicle legally allowed on public roads and highways.

Motor vehicle theft--Stealing or unauthorized taking of a motor vehicle, including attempted thefts.

Nonstranger--A classification of a crime victim's relationship to the offender. An offender who is either related to, well known to or casually acquainted with the victim is a nonstranger. For crimes with more than one offender, if any of the offenders are nonstrangers, then the group of offenders as a whole is classified as nonstranger. This category only applies to crimes which involve contact between the victim and the offender; the distinction is not made for personal larceny without contact since victims of this offense rarely see the offenders.

Offender--The perpetrator of a crime; this term usually applies to crimes involving contact between the victim and the offender.

Offense--A crime. When referring to personal crimes, the term can be used to refer to both victimizations and incidents.

Personal crimes--Rape, personal robbery, assault, personal larceny with contact or personal larceny without contact. Includes both attempted and completed crimes.

Personal crimes of theft--Personal larceny. The theft or attempted theft of property or cash by stealth, either with contact (but without force or threat of force) or without direct contact between the victim and the offender.

Personal crimes of violence--Rape, personal robbery or assault. Includes both attempted and completed crimes, and the crime always involves contact between the victim and the offender.

Personal larceny--Equivalent to personal crimes of theft. Personal larceny is divided into two subgroups depending on whether or not the crime involved personal contact between the victim and the offender.

Personal larceny with contact--Theft or attempted theft of property or cash directly from the victim by stealth, not force or threat of force, Includes both purse snatching and pocket picking.

Personal larceny without contact-Theft or attempted theft of property or cash
from anyplace other than the victim's home or
its immediate vicinity, without direct contact
between the victim and the offender. This
crime differs from household larceny only in
the location in which the theft occurs. Examples of personal larceny without contact
include theft of an umbrella in a restaurant, a
radio from the beach, or cash from an
automobile parked in a parking lot. Occasionally, the victim may see the offender
commit the crime.

Physical injury--Physical injury is measured for the three personal crimes of violence. Completed or attempted robberies that result in injury are classified as involving "serious" or "minor" assault. Examples of injuries from serious assault include broken bones, loss of teeth, internal injuries, loss of consciousness, and undetermined injuries requiring two or more days of hospitalization. Injuries from minor assault include bruises. black eyes, cuts, scratches, swelling, or undetermined injuries requiring less than two days of hospitalization. Assaults without a weapon are classified as aggravated if the victim's injuries fit the description given above of serious assault. All completed rapes are defined as having resulted in physical injury. Attempted rapes are classified as having resulted in injury if the victim reported having suffered some form of physical injury.

Race--Racial categories for this survey are white, black, and other. The category "other" is composed mainly of Asians and American Indians. The race of the head of household is used in determining the race of the household for computing household crime demographics.

Rape--Carnal knowledge through the use of force or the threat of force, including attempts. Statutory rape (without force) is excluded. Both heterosexual and homosexual rape are included.

Rate of victimization--See "Victimization rate."

Robbery--Completed or attempted theft, directly from a person, of property or cash by force or threat of force, with or without a weapon.

Robbery with injury--Completed or attempted theft from a person, accompanied by an attack, either with or without a weapon. resulting in injury. An injury is classified as resulting from a serious assault, irrespective of the extent of injury, if a weapon was used in committing the crime, or, if not, when the extent of the injury was either serious (broken bones, loss of teeth, internal injuries or loss of consciousness, for example) or undetermined but requiring two or more days of hospitalization. An injury is classified as resulting from a minor assault when the extent of the injury was minor (for example, bruises, black eyes, cuts, scratches or swelling) or undetermined but requiring less than two days of hospitalization.

Robbery without injury--Theft or attempted theft from a person, accompanied by force or the threat of force, either with or without a weapon, but not resulting in injury.

Self-protective measures--These include attacking the offender(s) with or without a weapon; threatening the offender(s) with or without a weapon; resisting or capturing the offender(s); scaring, warning, persuading, or appeasing the offender(s); running away or hiding; getting help or giving alarm; screaming from pain or fear; or some other method reported by the respondent.

Series--Three or more similar but separate events, which the respondent is unable to describe separately in detail to an interviewer.

Serious injury--Injuries 1) that involve gunshot or knife wounds, internal injuries, broken bones, loss of consciousness, loss of teeth or 2) that are of undetermined nature that required 2 or more days of hospitalization.

Simple assault--Attack without a weapon resulting either in minor injury (for example, bruises, black eyes, cuts, scratches or swelling) or in undetermined injury requiring less than two days of hospitalization. Also includes attempted assault without a weapon.

Stranger—A classification of the victim's relationship to the offender for crimes involving direct contact between the two. Incidents are classified as involving strangers if the victim identifies the offender as a stranger, did not see or recognize the offender, or knew the offender only by sight. Crimes involving multiple offenders are classified as involving nonstrangers if any of the offenders was a nonstranger. Since victims of personal larceny without contact rarely see the offender, no distinction is made between strangers and nonstrangers for this crime.

Tenure--The NCS recognizes two forms of household tenancy: (1) owned, which includes dwellings that are mortgaged, and (2) rented, which also includes rent-free quarters belonging to a party other than the occupants, and situations where rental payments are in kind or in services.

Unlawful entry--A form of burglary committed by someone having no legal right to be on the premises, even though no force is used.

Victim--The recipient of a criminal act, usually used in relation to personal crimes, but also applicable to households.

Victimization--A crime as it affects one individual person or household. For personal crimes, the number of victimizations is equal to the number of victims involved. The number of victimizations may be greater than the number of incidents because more than one person may be victimized during an incident. Each crime against a household is assumed to involve a single victim, the affected household.

Victimization rate--A measure of the occurrence of victimizations among a specified population group. For personal crimes, this is based on the number of victimizations per 1,000 residents age 12 or older. For household crimes, the victimization rates are calculated using the number of incidents per 1,000 households.

Victimize--To commit a crime against a person or household.

National Household Survey on Drug Abuse: Main Findings 1988 Survey methodology

Note: The following information was excerpted from U.S. Department of Health and Human Services, National Institute on Drug Abuse, *National Household Survey on Drug Abuse: Main Findings 1988* (Washington, DC: USGPO, 1990), pp. 1-10, 153-158, 161-169, 182. Non-substantive editorial adaptations have been made.

# Survey methodology

The 1988 National Household Survey on Drug Abuse (NHSDA) is the ninth study in a series of national surveys to measure the prevalence of drug use among the American household population aged 12 and older. Population estimates of drug use prevalence for the civilian, noninstitutionalized population of the United States are presented.

The following drugs or categories of drugs are examined in the National Household Survey: marihuana (including hashish), cocaine (including crack), inhalants, hallucinogens (including PCP), heroin, nonmedical use of four classes of psychotherapeutic drugs (stimulants, sedatives, tranquilizers, and analgesics), cigarettes and smokeless tobacco, and alcohol. The principle correlates of drug use presented are age, sex, race/ethnicity, density of population, region of residence, educational attainment among those 18 years old and older, and current employment.

Essentially the same methodology has been used in each of the nine National Household Surveys. A national probability sample of households in the coterminous United States was selected from 100 primary sampling units. The household population includes more than 98 percent of the U.S. population. It excludes persons living in group quarters or institutions such as military installations, dormitories, hotels, hospitals, and jails and transient populations such as the homeless. Alaska and Hawaii have not been included in the sample since the first National Household Survey because of logistic and cost considerations.

The 1988 sample design used a composite size measure methodology and a specially designed within-household selection procedure to meet specified precision constraints for subgroups defined by age and minority group membership. To reduce survey costs,

the design sampled Hispanics at higher rates in geographic areas where they were concentrated. The basic plan involved several selection stages: the selection of primary areas (e.g., counties), subareas (area segments) within these primary areas, sample households within subareas, and one or two eligible residents (if an, ) within these households.

To reduce the number of regulred screenings, two selections par household were allowed in some Hispanic and black households containing 12 to 17 year-olds. Two interviews were always conducted in those Hispanic and non-Hispanic black households with a 12 to 17 year-old resident (one always with a 12 to 17 year old), unless one of the selected respondents refused or was otherwise unavailable for interview. A total of 40,006 listings were screened to identify sufficient households to yield the Hispanic and black age-domain samples. In each selected household, a roster recording the age, race/ethnicity, and sex of all household members aged 12 and older was completed. Two, one, or no respondents were selected to be interviewed using a random sampling procedure. Selection probabilities were based on the race/ethnicity of the head of household and the ages of household members. The procedure was designed to control the sample sizes for age and race/ethnicity groups of interest. The sample design ensured adequate sample sizes for four age groups (12 to 17, 18 to 25, 26 to 34, and 35 and older) and three race/ethnicity groups (Hispanic in origin, regardless of race; white, not of Hispanic origin; and black, not of Hispanic origin. The within-household selection procedure was designed to minimize the effect of unequal weighting caused by selecting only one person per household for interview (or two in Hispanic and black homes) with 12 to 17 year-olds.

After selection, respondents were interviewed in person in their homes by trained interviewers. At the conclusion of data collection for the study, sample weights that reflect the various stages of sampling described above were constructed. The sample weights were then adjusted to account for sample persons who could not be found at home or who refused to participate. Finally, these weights were post-stratified to census projections of population counts for Hispanic origin by age group and race by age group. This adjusted weight is the analysis weight used in estimation.

For the 1988 National Household Survey, data were collected from Sept. 13, 1988 to Feb. 28, 1989, resulting in a total of 8,814 interviews. Eighty-seven percent of the interviewers were conducted by Dec. 31, 1988, and the median completion date for the survey was Nov. 5, 1988. A completed interview had to contain, at a minimum, data on

use of marlhuana, cocaine, alcohol, and cigarettes in the respondent's lifetime. Strategles for ensuring high rates of participation resulted in a response rate of 77 percent and a total of 8,243 completed interviews for the original selection of cases. In an attempt to increase the count of non-Hispanic, nonblack interviews to the target sample size, 1,104 cases that were originally screened out were refielded, resulting in 571 additional completed interviews. Of the 8,814 completed Interviews, 4,551 were with whites (i.e., non-Hispanic, non-blacks), 1,888 were with (non-Hispanic) blacks, and 2,193 were with Hispanics. About 5 percent (413) of the interviews were conducted using the Spanish version of the questionnaire. The completed interviews represented a 93.3 percent completion rate for screening sample households and 74.3 percent for interviewing sample individuals. With the original and refleided samples combined, the response rates for these three racial/ethnic groups were 73 percent for whites, 75 percent for blacks, and 78 percent for Hispanics.

The importance of confidentiality was stressed to the interviewers. Throughout the course of the study, the respondent's anonymity and the privacy of his or her responses were protected by separating identifying information from survey responses. Respondents were assured that their identities and responses would be handled in the strictest confidence in accordance with Federal law. The questionnaire itself and the interviewing procedures were designed to enhance the privacy of responses, especially during segments of the interview in which questions concerning illicit drug use were asked, and respondents were asked to mark answer sheets to record their responses to questions read aloud by the interviewer. The interviewer did not see the completed answer sheets.

# Sampling error and confidence intervals

Estimates which are based on survey data may differ from true population values because of two sources of error: sampling error and nonsampling error. Sampling error for individual rates results from asking questions of a sample rather than of everyone in the target population. Sampling theory provides the basis for calculation of confidence intervals around the estimates and tests of significance in comparing two estimates. The size of the intervals and the algorithm for tests of significance depend on (1) the sample size; (2) the extent of homogeneity of the sample on the variable in question, that is, the appropriate design effect; (3) the specific type of probability sampling procedure used; and (4) the degree of confidence required in the estimate. In the 1988 National Household Survey on Drug Abuse (NHSDA), sampling error due to the random process used to

subsample the total population of inferential interest (i.e., the household population age 12 and older of the coterminous United States), was quantified using 95 percent confidence intervals. Because one is often dealing with small percentages in the 1988 NHSDA, asymmetrical confidence intervals for estimated percentages and corresponding population sizes were calculated using methods based on logit transformations. Nonsampling error refers to error due to nonresponse, misreporting, and miscoding. Nonsampling errors cannot be quantified, although rigorous attempts were made to minimize them through pretesting, interviewer training and evaluation, interview verification, coder training, coding checks, and other quality control measures.

#### Missing data

The Issues concerning the effects of missing data on drug-use prevalence estimates are cifferent for the 1988 NHSDA than has been true for previous NHSDA rounds, while issues concerning the effects of missing data in other variables are similar.

### Prevalence measures and missing data

Effectively, after editing and imputation, there are no missing data in the 1988 NHSDA for the age, sex, race/ethnicity variables and for the drug-use prevalence measures. Even before statistically imputing values to replace missing data in the recency-of-use measures on which prevalence estimates are based, no recency-of-use variable had missing data for more than 0,54 percent of the sample cases.

# Procedures for handling missing data in analyses

When there are no missing data, a decision rule is not required. When there are only a few cases with missing data, analysis results are not likely to be greatly affected by how missing data are treated. When the amount of missing data is substantial, results can be appreciably affected by decisions about how to handle the missing data. Both the situations of a little missing data and substantial missing data in variables other than age, sex, race/ethnicity and the drug-use prevalence measures need to be considered in assessing how results were produced for the 1988 data.

There are a number of situations in which the decision about treatment of missing data can significantly affect the interpretation of results. The first instance occurs when comparing prevalence rates for 1982, 1985, and 1988 in the trend tables. Since there are no data missing for lifetime use in any of these three years, interpreting differences in lifetime prevalence rates across the period 1982-88 is straightforward. However, prior to

1985, if past year or past month use or nonuse of a drug could not be determined. the respondent was effectively counted as a nonuser in any period for which use or nonuse was missing; then prevalence rates were calculated by dividing the number of users by the sum of the number of users, nonusers, and missing cases. Such treatment of respondents known to have used the drug at some time in their lifetime for whom use or nonuse in the past year or month is unknown seems unwarranted since doing so results in underestimating past year and past month drug use. For 1985, if it was not possible to determine past year or past month use or nonuse of a drug, the case was excluded from the appropriate analyses. For 1988, the elimination (see section below for discussion of this procedure) of missing data for past year and past month drug use by means of statistical imputation has essentially the same effect as did excluding cases with such missing data from analyses of the 1985 NHSDA data. In practice, underestimation of past year and past month drug use prior to 1985 appears to have been negligible because the amount of missing data has always been very small, with one exception. In 1982 counting cases known to have used alcohol at some time in their lifetimes for whom past year and past month alcohol use was unknown as nonusers resulted in a typically low prevalence rates for the past year and past month periods: nevertheless, differences between 1982 and 1985 rates of past year and past month alcohol use calculated both ways are negligible.

The second instance where treatment of missing data significantly affects interpretation of results occurs in the tables which focus on the problems that respondents attributed to alcohol or drugs are analyzed. Nearly 30 percent of respondents who had used some drug and who should have answered the questions on the drug problems failed to do so. Most of these persons smoked cigarettes or drank alcohol less often than weekly and had used no illicit drug in their lifetimes. The decision was made to treat these respondents as not having problems rather than exclude them from the analyses. This treatment is documented in both the tables and the accompanying text and represents a conservative strategy that errs, if at all, in the direction of underestimating the prevalence of problems thought by respondents to have been caused by their use of alcohol, tobacco, or drugs. The magnitude of the rates of problems reported even using this conservative approach is an important finding.

# Adjusting for nonresponse through imputation

Missing data for recency-of-use variables (other than for alcohol, marihuana, and co-

caine), for the frequency-of-use-in-past-12months variables, and for age, race, and Hispanic origin variables, were imputed by using a statistically-based technique known as hot-dock imputation. The first step in the hot-deck imputation procedure involved progressively sorting the data file by recencyof-use of alcohol, marihuana, and cocaine. and then by age, sex, Hispanic origin, and race. This sorting produced an ordered data file in which adjacent data records represent individuals with similar characteristics. A missing value for each demographic variable was then replaced by the nonmissing response for the same variable in the last encountered record in the sorted data base. After all missing age, race, and Hispanicorigin values had been statistically-imputed, the file was again progressively sorted by these variables. Then a missing value for each recency-of-use or frequency-of-use-inpast-12-months variable was replaced by the nonmissing response for the same variable in the last encountered record in the sorted data base. For each hot-deck imputation-revised variable, there is an imputation-indicator variable whose values distinguish whether the imputed variable's value originated from edited (and perhaps logically imputed) interview responses or were imputed by the hotdeck technique.

### Limitations of the household survey

Although the NHSDA is useful for many purposes, it has certain limitations. First, the data are self-reports of drug use, and their value depends on respondents' truthfulness and memory. Although some experimental studies have established the validity of selfreport data in similar contexts and the NHSDA procedures were designed to encourage honesty and recall, some under- and over-reporting may have taken place. Second, the survey is cross-sectional rather than longitudinal. That is, individuals were interviewed only once and were not followed for additional interviews. The surveys therefore provide an overview of the prevalence of drug use at specific points in time rather than a view of how drug use changes over time for groups of individuals. Third, because the target population of the survey is defined as the household population of the continental United States, a small proportion (less than 2 percent) of the population is excluded. The subpopulations excluded are those in noninstitutional group quarters (e.g., military installations, college dormitories, group homes), those in institutional group quarters (e.g., prisons, nursing homes, treatment centers), and those who had no permanent residence (the homeless and residents of single rooms in hotels). If the drug use of these groups differs from that of the household population, the NHSDA may provide slightly inaccurate estimates of drug use in the total population. This may be particularly true for prevalence

estimates of rarely used drugs such as heroin.

### **Definitions of terms**

Population density

Large metropolitan--Includes Standard Metropolitan Statistical Areas (SMSAs) with a population of 1,000,000 or more in 1980. Large metropolitan areas include central cities and surrounding areas as defined by the U.S. Bureau of the Census. The 1988 and 1985 data for large metropolitan areas are not directly comparable because of changes in definition. Other population density areas defined are Small Metropolitan and Nonmetropolitan.

Nonmetropolitan--Those areas of the continental United States that were not part of a Standard Metropolitan Statistical Area (SMSA) as of 1980, according to the U.S. Bureau of the Census. In general, this includes small communities, rural non-farm

areas, and rural farm areas. The 1988 and 1985 data for nonmetropolitan areas are not directly comparable because of changes in definition. Other population density areas defined are Large Metropolitan and Small Metropolitan.

Small metropolitan--Standard Metropolitan Statistical Areas with a population of 50,000 to 999,999 in 1980 constitute Small Metropolitan areas. The 1988 and 1985 data for small metropolitan areas are not directly comparable because of changes in definition. Other population density areas defined are Large Metropolitan and Nonmetropolitan.

Regions

North Central--The States included are the East North Central States--Illinois, Indiana, Michigan, Ohio, and Wisconsin--and the West North Central States--lowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, and South Dakota. Northeast--The States included are the New England States of Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont and Middle Atlantic States--New Jersey, New York, Pennsylvania.

South--This census classification contains the South Atlantic States--Delaware, District of Columbia, Florida, Georgia, Maryland, North Carolina, South Carolina, Virginia, and West Virginia; the East South Central States of Alabama, Kentucky, Mississippi, and Tennessee, and the West South Central States of Arkansas, Louisiana, Texas, and Oklahoma.

West--This census classification includes the States of Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming.

Note: Sample size is the unweighted number of respondents in the 1988 National Household Survey on Drug Abuse. Population in the United States as of July 1, 1988 is based on data provided by the U.S. Bureau of the Census.

^bData on current employment are missing for 6 persons 12 to 17 years old, 3 persons 18 to 25, 3 persons 26 to 34, and 5 persons 35 or older. Total refers to those 18 and older. ^cRetired, disabled, homemaker, student, or "other.

^aData on adult education are not applicable for 12 to 17 year olds, and are missing for 10 persons 18 to 25 years old, 6 persons 26 to 34 years old, and 13 persons 35 or older. Total refers to those 18 and older.

National Household Survey on Drug Abuse: Population Estimates 1990 Survey methodology

Note: The following information was excerpted from U.S. Department of Health and Human Services, National Institute for Drug Abuse, *National Household Survey on Drug Abuse: Population Estimates 1990* (Washington, DC: USGPO, 1991), pp. 1-10, 13-15. Non-substantive editorial adaptions have been made.

### Survey methodology

The 1990 National Household Survey on Drug Abuse is the tenth study in a series of national surveys to measure the prevalence of drug use among the American household population aged 12 and older. Population estimates of drug use prevalence for the civilian, noninstitutionalized population of the United States are presented.

Essentially the same methodology has been used in each of the ten National Household Surveys. A national probability sample of households in the coterminous United States was selected from 100 primary sampling units. The household sample excluded persons living in group quarters or institutions such as military installations, dormitories, hotels, hospitals, and jails and transient populations such as the homeless. Alaska and Hawaii have not been included in the sample since the first National Household Survey because of logistic and cost considerations.

In each selected household, a roster recording the age, race/ethnicity, and sex of all household members aged 12 and older was completed. Using a random sampling procedure, either two, one, or no respondents were selected to be interviewed. (Selection probabilities were based on the race/ethnicity of the head of household and the ages of household members.) The procedure was designed to control the sample sizes for age and race/ethnicity groups of interest. After selection, respondents were interviewed in person in their homes by trained interviewers. The interview process included use of self-administered answer sheets and other procedures designed to assure respondents that their responses to sensitive questions would be kept confidential and anonymous.

For the 1990 National Household Survey, data were collected from Mar. 12, 1990 to June 30, 1990, resulting in a total of 9,259 interviews with a 96.4 percent completion rate for screening sample households and 82.0 percent for interviewing sample individuals. The median completion date for the survey was Apr. 29, 1990.

Age and race/ethnicity were the two primary correlates of drug use on which the 1990 sample was stratified. The sample design ensured adequate sample sizes for four age groups (12 to 17, 18 to 25, 26 to 34, and 35 and older) and three race/ethnicity groups. In addition, for the 1990 National Household Survey on Drug Abuse, sample sizes in the Washington, DC Metropolitan Statistical Area (MSA) were designed to be large enough to support particular special interest estimation. Based on the respondents' self-classifications the race/ethnicity groups were classified as: (1) Hispanic in origin, regardless of race; (2) White, not of Hispanic origin; and (3) Black, not of Hispanic origin. As defined, these groups are mutually exclusive. Those who did not identify themselves as Hispanic, non-Hispanic White or non-Hispanic Black were included in the population totals, but no separate population estimates were presented for this "Other" race/ethnicity group because of the small sample size.

## **Development of weights**

Sampling weights were calculated to reflect selection probabilities and to compensate for nonresponse and undercoverage. Each weight can be viewed as the number of population members that the responding sample member represents. A post-stratification adjustment was made to force respondent weight totals to reflect population totals for age, sex, and race/ethnicity population groups.

# Adjusting for nonresponse through imputation

The prevalence estimates are based on the total sample or all cases in a subgroup, including some cases for which missing data for some recency-of-use and frequency-ofuse variables were replaced with logically or statistically imputed values. Prior to determining the completeness of a case, an editing procedure was implemented to check for inconsistencies and to determine if missing information was retrievable by using other information in the questionnaire. Logical imputation was then done to replace inconsistent, missing, or invalid data. Determination of completeness of a case was then made. To be classified as minimally complete interviews, and therefore included in the data base, data on the recency of use of alcohol, marihuana, and cocaine had to have been provided by the respondent or logically imputed from other answers supplied by the respondent.

Missing data for recency-of-use quastions (for drugs other than alcohol, cocaine, and marihuana) and for the frequency-of-use-inthe-past-12-months variables were statistically imputed (that is, replaced) by using a technique known as hot deck imputation. The first step in this procedure involved sorting the data file with a progressive series of subsorts using data on recency-of-use of alcohol, marihuana, cocaine, age, sex, Hispanic origin and race. This sorting produced an ordered data file in which adjacent data records represent individuals with similar characteristics. Missing values for particular items were then replaced by the last encountered non-missing response in the sorted data base. A hot deck imputation procedure was appropriate for use because the level of item nonresponse was low.

The use of imputation can potentially reduce the bias caused by missing data and substantially improve estimates. In this survey, however, the potential impact of bias due to item nonresponse and the impact of imputation on the estimates themselves is quite small because item nonresponse was less than 5 percent for drug use questions. The main advantage of such imputation for this survey was that it simplified calculation of the estimates.

#### Sampling error and confidence intervals

In the National Household Survey on Drug Abuse, as in every sample survey, there is some degree of statistical uncertainty or error. The estimates provided in this report are subject to uncertainties of two types: nonsampling and sampling errors. Nonsampling errors are attributed to such sources as recording and coding errors, missing data, and differences in respondents' interpretations of questions. Nonsampling errors cannot be quantified, however rigorous attempts were made to minimize them through pretesting, interviewer training and evaluation, interview verification, coder training, coding checks, and other quality control measures.

Sampling errors denote the random fluctuations that occur in estimates when a sample of the population is drawn rather than conducting a complete census. Different samples drawn using the same procedures from the same population would be expected to result in different estimates. Many of these observed estimates would differ to some degree from the "true" population value and these differences are due to sampling errors. Sampling errors are quantified in this report by way of confidence intervals. Methods based on a logit transformation were used to calculate asymmetrical 95 percent confidence intervals for all estimated proportions and corresponding population estimates. The precise interpretation of the 95 percent confidence interval is as follows: If repeated

samples of identical design were drawn from the population, and the sample estimate and corresponding upper and lower confidence limits were calculated for each sample, then the true population value would be included in the confidence intervals of 95 out of every 100 samples.

#### Considerations in interpreting the data

Readers are cautioned to take the following into account when using or interpreting these estimates: (1) The value of self-reports depends upon the honesty and memory of sampled respondents. The National Household Survey procedures are designed to encourage truthfulness and recall, nevertheless, some under- or over-reporting may occur. (2) Drug use prevalence estimates from the National Household Survey for specific subgroups are sometimes based on modest to small sample sizes, which may lead to substantial sampling error. (3) The population projections prepared for the Cur

rent Population Survey and used in weighting the National Household Survey sample are subject to error as the time since the last census increases. Further, they include the population of the entire United States while the National Household Survey included only the population of the coterminous states. (4) The population surveyed is the noninstitutionalized population living in households, and therefore does not include some segments of the U.S. population which may contain a substantial proportion of drug users, such as college students living in dormitories, transients and those incarcerated.

Consequently, the estimates produced should be viewed as approximations based on the best data available at this time.

### Regions

North Central--The States included are the East North Central States--Illinois, Indiana, Michigan, Ohio, and Wisconsin--and the West North Central States--Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, and South Dakota.

Northeast--The States included are the New England States of Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont and Middle Atlantic States--New Jersey, New York, Pennsylvania.

South--This census classification contains the South Atlantic States--Delaware, District of Columbia, Florida, Georgia, Maryland, North Carolina, South Carolina, Virginia, and West Virginia; the East South Central States of Alabama, Kentucky, Mississippi, and Tennessee, and the West South Central States of Arkansas, Louisiana, Texas, and Oklahoma.

West--This census classification includes the States of Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming.

Felony Defendants in Large Urban Counties, 1988 Survey methodology, definitions of terms, and crimes within offense categories

Note: The following information has been excerpted from U.S. Department of Justice, Bureau of Justice Statistics, *Felony Defendants in Large Urban Counties, 1988* NCJ-122385 (Washington, DC: U.S. Department of Justice, 1990), pp. 1-3; and *Pretrial Release of Felony Defendants, 1988*, Bulletin NCJ-127202 (Washington, DC: U.S. Department of Justice, February 1991), p. 10. Non-substantive editorial adaptations have been made.

#### Methodology

The National Pretrial Reporting Program (NPRP) conducted its initial survey from February 1988 to February 1989 to describe the criminal justice process from arrest to case disposition. NPRP used a sample of cases designed to represent the Nation's 75 most populous counties (by 1985 estimates). Almost half of all reported U.S. crimes in 1985 occurred in these counties.

The sample was designed and selected by the U.S. Bureau of the Census. It is a two-stage stratified sample with 40 of the 75 most populous counties selected at the first stage (one county had to be dropped from the sample at which point no site could be substituted for it), and a systematic sample of felony filings (defendants) within each county selected at the second stage,

The 40 counties were divided into 4 first-stage strata, based on court filing information obtained through a telephone survey. Four-teen counties were included in the sample with certainty because of their large number of court filings. The remaining 26 counties were allocated to the 3 non-certainty strata based on the variance of felony court dispositions.

The second-stage sampling (filings) was designed to represent all defendants who had felony cases filed with the court during the month of February 1988. The participating jurisdictions included every defendant who had a felony case filed on selected days during that month. The number of days selected depended on the stage-one stratum in which the county had been placed. One week's worth of filings were selected in the first two strata, 2 weeks of filings in the third stratum, and all felony filings for the month

were selected from jurisdictions in the fourth stratum.

Data on 11,063 sample felony cases were collected from the 39 sampled jurisdictions. This sample represented more than 47,000 weighted cases filed during the month of February 1988 in the 75 most populous counties. Cases that, because of incomplete information, could not be classified into one of the four major crime categories (violent, property, drug, public order) were omitted from the analysis. This reduced the weighted total to 46,921 cases. The data collection effort was supervised by the Pretrial Services Resource Center in Washington, D.C.

This report is based on data collected from the following participating counties: Arizona (Maricopa); California (Los Angeles, Orange, Sacramento, San Bernardino, San Diego, Santa Clara); District of Columbia; Florida (Broward, Dade, Duval, Hillsborough, Palm Beach, Pinellas); Georgia (Fulton); Hawaii (Honolulu); Illinois (Cook); Massachusetts (Suffolk); Michigan (Wayne); Missouri (St. Louis); New Jersey (Essex); New York (Bronx, Erie, Kings, Monroe, New York, Queens); Ohio (Hamilton); Pennsylvania (Allegheny, Montgomery, Philadelphia); Tennessee (Shelby); Texas (Dallas, Harris, Tarrant); Utah (Salt Lake); Virginia (Fairfax); Washington (King); Wisconsin (Milwaukee).

#### **Definitions of terms**

# Terms relating to pretrial release

Released defendant--Any defendant who was released from custody prior to the disposition of his or her case by the court. Includes defendants who were detained for some period of time before being released and defendants who were returned to custody after being released because of a violation of the conditions of pretrial release.

Detained defendant--Any defendant who remained in custody from the time of arrest until the disposition of his or her case by the court, Includes defendants whose cases were disposed of in such a short time that they had no opportunity for pretrial release. This report also refers to detained defendants as "not released."

Failure to appear--When a court issues a bench warrant for a defendant's arrest because he or she has missed a scheduled court appearance.

# Type of financial release

Full cash bond--The defendant posts the full bail amount in cash with the court. If the defendant makes all court appearances, the cash is returned to him or her. If the defendant falls to appear in court, the bond is forfeited.

Deposit bond--The defendant deposits a percentage (usually 10 percent) of the full bail amount with the court. The full amount of the bail is required if the defendant falls to appear in court. The percentage ball is returned after the description of the case, but the court often retains 1 percent for administrative costs.

Surety bond--A third party, usually a ball bondsman, signs a promissory note to the court for the full ball amount and charges the defendant a fee for the service (usually 10 percent of the full ball amount). If the defendant fails to appear, the bondsman must pay the court the full ball amount. Frequently the bondsman requires the defendant to post collateral in addition to the fee.

# Type of nonfinancial release

Unsecured bond--The defendant pays no money to the court but is liable for the full amount of bail should he or she fail to appear in court.

Release on recognizance--The court releases the defendant on the promise that he or she will appear in court as required.

Citation release--Arrestees are released pending their first court appearance on a written order issued by law enforcement personnel.

### Offense categories

Felony offenses were classified into 12 categories. These categories were further divided into the four major crime categories of violent offenses, property offenses, drug offenses, and public-order offenses. The following listings contain a representative summary of most of the crimes contained in each category; however, these lists are not meant to be exhaustive. All offenses, except murder, include attempts and conspiracies to commit.

## Violent offenses

Murder--Includes homicide, nonnegligent manslaughter, and voluntary homicide. Does not include attempted murder (which is classified as felony assault), negligent homicide, involuntary homicide, and vehicular manslaughter (which are classified as "other violent crime").

Rape--Includes forcible intercourse, sodomy, or penetration with a foreign object. Does not include statutory rape or nonforcible acts with a minor or someone unable to give legal consent, nonviolent sexual offenses, and commercialized sex offenses.

Robbery--Includes the unlawful taking of property by force or threat of force.

Assault--Includes aggravated assault, aggravated battery, attempted murder, assault with a deadly weapon, felony assault or battery on a law enforcement officer, or other

felony assaults. Does not include extortion, coercion, or intimidation.

Other violent offenses--Includes vehicular manslaughter, involuntary manslaughter, negligent or reckless homicide, nonviolent or nonforcible sexual assault, kidnaping, unlawful imprisonment, child or spouse abuse, cruelty to child, reckless endangerment, hit and run with bodily injury, intimidation, and extortion.

## Property offenses

Burglary--Includes any type of entry to a residence, industry, or business with or without the use of force with the intent to commit a felony or theft, such as forcible entry and breaking and entering. Does not include possession of burglary tools, trespassing, and unlawful entry where the intent is not known.

Theft--Includes grand theft, grand larceny, motor vehicle theft, or any other felony theft. Does not include receiving or dealing stolen property, fraud, forgery, or deceit.

Other property offenses--Includes receiving or buying stolen property, forgery, fraud, embezzlement, arson, reckless burning, damage to property, criminal mischief, vandalism, bad checks, counterfeiting, criminal trespassing, possession of burglary tools, and unlawful entry.

## Drug offenses

Drug sale/trafficking--Includes trafficking of controlled substances, sales, distribution, possession with intent to distribute or sell, manufacturing, or smuggling. Does not include possession of controlled substances.

Other drug offense--Includes possession of controlled substances, prescription violations, possession of drug paraphernalia, and other drug law violations.

## Public-order offenses

**Driving-related--**Includes driving under the influence of drugs or alcohol, driving with a suspended or revoked license, or any other felony in the motor vehicle code.

Other public-order offenses--Includes flight/escape, parole or probation violations, prison contraband, habitual offender, obstruction of justice, rioting, libel and slander, weapons offenses, treason, perjury, prostitution/pandering, bribery, and tax law violations.

### Appendix 11

Offender-Based Transaction Statistics program Methodology, data limitations, and definitions of terms

Note: The following information was excerpted from the U.S. Department of Justice, Bureau of Justice Statistics, *Criminal Cases In Five States*, 1983-86, Special Report NCJ-118798 (Washington, DC: U.S. Department of Justice, September 1989), p. 3; and U.S. Department of Justice, Bureau of Justice Statistics, *Tracking Offenders*, 1987, Bulletin NCJ-125315 (Washington, DC: U.S. Department of Justice, October 1990), pp. 1, 2, 7. Nonsubstantive editorial adaptations have been made.

#### Methodology

These data are derived from the Bureau of Justice Statistics' Offender-Based Transaction Statistics (OBTS) program. The OBTS program receives information about dispositions of adult felony arrests from criminal justice repositories of participating States. In 1987 the participating States, which accounted for more than a third of the resident population of the United States, were Alabama, Alaska, California, Delaware, Georgia, Minnesota, Missouri, Nebraska, New York, Pennsylvania, Vermont, and Virginia.

Local criminal justice agencies record arrest data and other information on fingerprint cards and disposition documents. The agencies forward the data to a State's criminal information repository that updates appropriate master records. OBTS receives data from the repositories. OBTS coverage may remain incomplete within the reporting States for several reasons. Not all law enforcement agencies fingerprint all persons arrested, and some do not submit all their fingerprint cards. Offenders sometimes surrender directly to a court and are not fingerprinted. Even when a fingerprint card is filed, the prosecutor or court may not report the final disposition.

BJS annually solicits State repositories to extract and submit data from the master records, following OBTS guidelines. Some States are in the process of automating their criminal-history files and cannot participate. Other States have not joined because of insufficient reporting by local agencies, criminal-history files not designed for statistical extraction, or lack of resources.

To allow comparability among States, the OBTS standards use the FBI's National Crime Information Center (NCIC) offense

codes. To ensure privacy, an OBTS record uses as personal identifiers only an encrypted identification number (to permit study of repeat offenders), sex, race, and age.

The OBTS program captures information on the most serious charge and the most serious consequence for the arrestee at each decision point in the justice process. A basic program requirement is that the arrestee must have been originally charged with a felony, an offense that may be punishable by imprisonment for more than 1 year. An OBTS record distinguishes among arrestees, incldents, and charges. The arrestee is identified through fingerprints and is assigned an identification number which can be linked to earlier records. The incident number identifies each incident so that records in multiple charge cases can be condensed. In the latter situation, the program collects the most serious arrest charge as well as the most serious disposition by the police, prosecutor, grand jury, or court, depending on the circumstances of the particular case. Sentence information is also collected for the conviction on the most serious charge. OBTS data are based on the year of final disposition, not on the year of arrest, Thus, an OBTS year includes arrests that occurred in an earlier year. A final disposition refers to either a decision not to prosecute or a trial court finding, not to an appeal.

## **Definitions of terms**

Adult is defined by State statute, and OBTS defines felony as any crime for which an offender can be imprisoned for more than 1 year.

BJS' standard crime definitions and categories are used. The basic categories and major crimes in each are as follows:

**Drug crimes-**-possession, manufacturing, trafficking of illegal drugs.

Property crimes--burglary, larceny or theft, motor vehicle theft, arson, fraud, embezzlement, stolen property.

Public-order crimes--weapons, driving while intoxicated, disturbing the peace, obstructing police, vice, bribery, sex offenses not involving assault, parole violations.

Violent crimes--murder and nonnegligent manslaughter, negligent manslaughter, kidnaping, rape, other sexual assault, robbery, aggravated assault.

1989 Drug Use Forecasting Annual Report Methodology and survey sampling information

Note: The following information was excerpted from the U.S. Department of Justice, National Institute of Justice, 1989 Drug Use Forecasting Annual Report (Washington, DC: U.S. Department of Justice, June 1990), pp. 2-3. Non-sub stantive editorial adaptations have been made.

## Methodology

Drug Use Forecasting (DUF) data are collected in central booking facilities throughout the United States. For approximately 14 consecutive evenings each quarter, trained local staff obtain voluntary and anonymous urine specimens and interviews from a new sample of arrestees. In each site, approximately 225 males are sampled. One hundred female arrestees are also interviewed in some of the sites. Sample sizes for the year 1989 differed from city to city because cities joined the DUF program at various times throughout the year. For example, San Jose, the newest DUF site, initiated data collection in September 1989, and other sites such as Chicago and Miami were not able to collect data each quarter.

Response rates were consistently high, with over 90 percent of the arrestees approached agreeing to be interviewed. Approximately 80 percent of the persons interviewed provided a urine specimen. Traffic offense charges are also limited in the sample of male arrestees. Because of their small number, all female arrestees, regardless of charge, are selected for inclusion in DUF samples.

Urine specimens are analyzed for 10 drugs: cocaine, opiates, marijuana, phencyclidine (PCP), methadone, benzodiazepine (Valium), methaqualone (Quaalude), propoxyphene (Darvon), barbiturates, and amphetamines. Positive results for amphetamines are confirmed by gas chromatography to eliminate positives that may be caused by over-the-counter drugs. For most drugs, the urine test detects use in the prior 2 to 3 days. Exceptions are marijuana and PCP, which can sometimes be detected several weeks after use.

Table. Annual number of DUF cases sizes

City	Male	Female
Birmingham, AL	637	261
Chicago, IL	437	(a)
Cleveland, OH	802	(a)
Dallas, TX	995	430
Detroit, MI	846	(a)
Fort Lauderdale, FL	459	197
Houston, TX	693	320
Indianapolis, IN	716	313
Kansas City, MO	893	410
Los Angeles, CA	640	300
Miami, FL	215	(a)

Federal Criminal Case Processing Methodology and definitions of terms

Note: The following was excerpted from U.S. Department of Justice, Bureau of Justice Statistics, *Federal Criminal Case Processing*, 1980-87, NCJ-120069 (Washington, DC: U.S. Department of Justice, 1990), pp. 23, 27-34.

### Methodology

The data in this report come from the Bureau of Justice Statistics (BJS) Federal Justice Statistics database. The database is constructed from source files provided by the Executive Office for U.S. Attorneys, the Administrative Office of the United States Courts (AO), the Pretrial Services Agency, the U.S. Bureau of Prisons, and the U.S. Parole Commission.

The offense classifications in the tables are based on the classification system used by the AO. Specific offenses in the AO classification are combined to form the BJS categories in the tables. These categories are designed to be as consistent as possible with BJS publications on State criminal justice systems.

Where more than one offense is charged or adjudicated, the most serious offense, the one that may result in the most severe sentence, is used in the classification. The offense description may change as a case goes through the criminal justice process. Tables indicate whether charged or adjudicated offenses are used.

Data describing the number and rate of prosecutions and the results of magistrate proceedings include only those cases handled by U.S. attorneys. Data describing convictions in district court, sentencing patterns, pretrial release, and sentence length include all cases, regardless of the prosecuting authority. Data presented describe the calendar year indicated.

Sentencing figures differ from statistics published by the Administrative Office of the United States Courts for the average "regular" sentence imposed. "Regular" sentences exclude two categories of offenders included in the BJS calculations: offenders receiving a "split" sentence (5 days through 6 months followed by probation) and offenders sentenced under 18 USC 4205(b)(1) and (b)(2) (where a maximum term is set accompanied by no or a small minimum).

The section below defines all offense categories used, citing the U.S. Code, "Racketeering and extortion" offenses include primarily prosecutions under the Racketeer Influenced and Corrupt Organizations (RICO) Act. "Murder" includes nonnegligent homicide but excludes negligent homicide. "Other sex offenses" for the most part refer to violent offenses but may also include some nonviolent offenses. "Other property offenses" include destruction of property and trespassing.

#### **Definitions of terms**

Definitions of offense categories describe all offenses included in each category. Statutory sections are cited in parentheses at the end of each definition.

Agriculture violation--violation of the Federal statutes on agriculture and conservation, for example, violations of the Agricultural Acts, Federal Seed Act, Game Conservation Acts, Insecticide Act, and the Packers and Stockyards Act; also violation of laws concerning plant quarantine and the handling of animals pertaining to research (title 7 U.S.C. except sections on food stamps).

Antitrust--violation of Federal antitrust statutes (15 U.S.C. 1, 2, 3, 8, 13(A)-(F), 20, 24, 70I, and 72).

Arson--willfully or maliciously setting, or attempting to set, fire to any property within the special maritime and territorial jurisdiction of the United States as defined in 18 U.S.C. 7(18 U.S.C. 81).

Assault--intentionally inflicting or attempting or threatening to inflict bodily injury to anyone within the special maritime and territorial jurisdiction of the United States as defined in 18 U.S.C. 7 or to any Government official, foreign official, official quest, internationally protected person, or any officer or employee of the United States designated in section 1114 of title 18; also certain violations of the Fair Housing Law (18 U.S.C. 111, 112(A)-(C), 113(A)-(F), 114, 351(C)-(E), 372, 1501-2, 1751(E), 1991, 2231(A)(B), and 2233; 21 U.S.C. 461(C), 675(A)(B), and 1041(C); 26 U.S.C. 7212(A)(B); 42 U.S.C. 3610(A), 3611(F), and 3631; 46 U.S.C. 701(6); and 49 U.S.C. 1472(k1) and 1475(J)(k1)).

Bribery--offering or promising anything of value with intent to unlawfully influence a public official, bank employee, officer or employee of the U.S. Government, witness, or any common carrier as well as soliciting or accepting such an offer. Soliciting or receiving anything of value in consideration of aiding a person to obtain employment in the U.S. Government. Receiving or soliciting any remuneration, directly or indirectly, in cash or any kind in return for purchasing, ordering, leasing, or recommending to purchase any good, service, facility, or item for which payment may be made through Medical Assistance Programs. Bribing in sporting contests is also illegal (18 U.S.C. 201(A)-(I), 203-5, 207 (B)(C), 208-15, and 224; 21

U.S.C. 622; 26 U.S.C. 7214(A); 42 U.S.C. 1396H(B); 46 U.S.C. 239(I); and 49 U.S.C. 10(4), 917(B), and 1472(D)).

Burglary--breaking and entering into another's property with intent to steal within the special maritime and territorial jurisdiction of the United States, as defined in 18 U.S.C. 7; also including breaking and entering into any official bank, credit union, savings and loan institution, post office, vessel or steamboat assigned to the use of mail service, or personal property of the United States or breaking the seal or lock of any carrier facility containing inter-State or foreign shipments of freight or express (18 U.S.C. 2111, 2113(A), and 2115-17).

Conspiracy--an agreement by two or more persons to commit or to effect the commission of an unlawful act or to use unlawful means to accomplish an act that is not in itself unlawful; also any overt act in furtherance of the agreement. A person charged with conspiracy is classified under the substantive offense alleged.

Counterfeiting--falsely making, forging, or altering any obligation or security of the United States, foreign obligation or security, coin or bar stamped at any mint in the United States, money order issued by the Postal Service, domestic or foreign stamp, or seal of any department or agency of the United States. Passing, selling, attempting to pass or sell, or bringing into the United States any of the above falsely made articles. Making, selling, or possessing any plates or stones used for printing counterfelt obligations or securities of the United States, foreign obligations or securities, Government transportation requests, or postal stamps (18 U.S.C. 331, 471-74, 476-81, 485-88, 490, 492, 500-502, 506-7, and 509; 21 U.S.C. 458(C4) and 611(B4); 26 U.S.C. 5604(A4) and 7241; and 46 U.S.C.

**Dismissal**--termination of a case before trial or other final judgment (including nolle prosequi and deferred prosecution).

Drug offenses--possessing or trafficking in (distributing, importing, and manufacturing) controlled substances. Also furnishing of fraudulent or false information concerning prescriptions as well as any other unspecified drug-related offense. (See specific offenses in this section for citations.)

Embezzlement--fraudulently misapplying property by a person to whom such property has been entrusted or into whose hands it has lawfully come where offense is committed by bank officers or employees; officers or employees of the Postal Service; officers of lending, credit, or insurance institutions; any officer or employee of a corporation or association engaged in commerce as a common carrier; court officers of the U.S. courts; or officers or employees of the United States. Embezzling, stealing, or knowingly converting to one's own use or the use of another or without authority selling, conveying, or disposing of any money, property,

records, or thing of value to the United States or any department thereof (12 U.S.C. 630; 15 U.S.C. 645(B)(C); 18 U.S.C. 332, 334, 641-57, 660, 664, 665(A)(B), 1025, 1163, 1709-11 and 1721; 22 U.S.C. 1179; 29 U.S.C. 501(C) and 502(B); 38 U.S.C. 3501; and 42 U.S.C. 2703A, 2971F(A)(B), 3220(B), and 3791).

Escape--departing or attempting to depart from the custody of a correctional institution; a judicial, correctional, or law enforcement officer; or a hospital where one is committed for drug abuse and drug dependency problems. Knowingly advising, aiding, assisting, or procuring the escape or attempted escape of any person from a correctional facility, an officer, or the above-mentioned hospital as well as concealing an escapee. Forcibly rescuing any person in an attempt to prevent execution or forcibly removing or attempting to remove the dead body of any executed offender in order to prevent an autopsy. Aiding or enticing any person belonging to the Armed Forces of a belligerent nation or fraction, who is interned in the United States in accordance with the law of nations, to escape or attempt to escape. Providing or attempting to provide to an inmate in prison a prohibited object or making, possessing, obtaining, or attempting to make or obtain a prohibited object (as defined in section 1791C of title 18). Instigating, assisting, attempting to cause, or causing any mutiny or riot at any Federal penal, detention, or correctional facility or conveying into any of these institutions any dangerous instrumentalities (18 U.S.C. 751, 752(A)(B), 753-57, 1071-74,1791-92, 3150, and 4082(D); 42 U.S.C. 261(B)(C) and 3425-26; and 50 U.S.C. 822-

Food and drug violations--violations of the Federal Food and Drug Act (21 U.S.C. 16-17, 20-23, 62-63, 104, 111, 115, 117, 120, 122, 124, 126, 134(A)-(E), 141-45, 151-55 157, 158, 201, 203, 205, 207, 209-12, 331(A)-(G), 331(I2)(I3), 331(J)-(P), 333(A)(B), 458(A1)-(A5), 459, 460(A)-(D), 461(A), 463, 466(A), 610(A)(B)(B2)(C), 611(A)(B3), 620(D), 642, 676(A), 1037, 1041(A), 1175, and 1175F; and 26 U.S.C. 4591, 4594(A)-(C), 4597(A), 4804(A2)(A4)(B), 4805(B), 4814(A1), 4815(A)(B), 4817, 4833(A2)(B)(C), 4834(A), 4841, 4862(B), 7234(A)-(C)(D1)(D2A)(D2B) (D3)(D4), 7235(A)-(E), 7236, 7264, 7265(A)(B), and 7266(A1)-(A3)(B)).

Forgery--falsely and with intent to defraud, making, counterfeiting, altering, or possessing with intent to pass off as genuine any U.S. Postal Service money order; postmarking stamp or impression; obligation or security of the United States; foreign obligation, security, or bank note; contractors' bond, bid, or public record; seal of a court or any department or agency of the U.S. Government; the signature of a judge or court officer; ships' papers; documents on entry of vessels; deed; power of attorney; customs matters; bond of distilleries; military or naval discharge certificate; coin or bar; and so forth. Also making, possessing, selling, or printing plates or stones for counterfeiting obligations or securities and receiving, possessing, concealing, selling, or disposing of any falsely made securities, tax stamps, or pledges that have crossed a State or the U.S. boundary after being stolen or unlawfully converted (18 U.S.C. 471-74, 478-79, 482-85, 493-98, 500, 503, 505-8, 1025, 2314-15, and 2318; 19 U.S.C. 1436; 21 U.S.C. 458(B)(C1)(C2), and 611(B1); 26 U.S.C. 5601(A4)(A5); 43 U.S.C. 1191-92; and 49 U.S.C. 1472(B)).

Fraud--unlawfully depriving a person of his or her property or legal rights through intentional misrepresentation of fact or deceit other than forgery or counterfeiting. Includes violations of statutes pertaining to lending and credit institutions, the Postal Service, inter-State wire, radio, television, veterans benefits, allotments, bankruptcy, marketing agreements, commodity credit, the Securities and Exchange Commission, railroad retirement, unemployment, Social Security, false personation, citizenship, passports, conspiracy, and claims and statements, excluding tax fraud. The category excludes fraud involving tax violations that are shown in a separate category under "Public-order, other offenses." (See specific offenses in this section for citations.)

Gambling--transporting, manufacturing, selling, possessing, or using any gambling device in the District of Columbia or any possession of the United States or within Indian country or the special maritime and territorial jurisdiction of the United States as defined in section 7 of title 18. Also transporting gambling devices in the jurisdiction of the United States, except under authority of the Federal Trade Commission or any State that has a law providing for their exemption from these provisions, transmitting wagering information in inter-State or foreign commerce, inter-State transporting of wagering paraphernalia, importing or transporting lottery tickets, or mailing lottery tickets or related matter. An employee of the Postal Service acting as a lottery agent is considered guilty of this offense (15 U.S.C. 1172-76; and 18 U.S.C. 1082(A)(B), 1084, 1301-3, 1953, and 1955).

Immigration offenses--offenses involving illegal entrance into the United States, illegally reentering after being deported, willfully failing to deport when so ordered, or willfully remaining beyond days allowed on conditional permit. Falsely representing oneself to be a citizen of the United States or counterfeiting any visa, permit, or other document to enter the United States as well as violating any of the provisions for travel of citizens or aliens during war or national emergency. Also bringing in or harboring any aliens not duly admitted by an immigration officer (8 U.S.C. 331, 333-34, 338-39 1185(C), 1252(D)(E), 1282(A)(C), 1286-87, 1321, and 1324-26; and 18 U.S.C. 911 and 1546).

Kidnaping--unlawfully seizing any person, within the special maritime and territorial jurisdiction of the United States as defined by section 7 of title 18, for ransom or reward, except in the case of a minor by a parent. Also receiving, possessing, or disposing of any money or other property that has been delivered as ransom or reward in connection with a kidnaping as well as conspiring to kidnap. This offense include kidnaping or attempting to kidnap any Government official, the President of the United States, the President-elect, the Vice President, any foreign official, any official guest, or any internationally protected person (18 U.S.C. 351(B)-(D), 1201-2, and 1751(B)-(C)).

Labor law violations--violations of the Fair Labor Standards Act, the Taft-Hartley Act (labor-management relations), the Byrnes Act (transportation of strikebreakers), laws regarding the 8-hour day on public works, and peonage laws (18 U.S.C. 1231 and 1581-88; 29 U.S.C. 162, 186(A), 206-7, 211 (C)(D), 212, 214-15, 216(A), 439(A)-(C), 463(B), 503(C), 504(B), and 1131; and 40 U.S.C. 321-22).

Larceny-taking and carrying away with intent to steal any personal property of another, within the special maritime and territorial jurisdiction of the United States, as defined in 18 U.S.C. 7. Stealing, possessing, converting to one's own use, or illegally selling or disposing of anything of value to the United States or any of its departments or agencies or any property made or being made under contract for the United States or any of its departments or agencies. Stealing anything of value (in excess of \$100) from a bank, the Postal Service, or any inter-State or Foreign shipments by carrier. Receiving or possessing stolen property or pirate property. Stealing or obtaining by fraud any funds, assets, or property that are the subject of a grant, contract, or other form of assistance, whether received directly or indirectly, from the Law Enforcement Assistance Administration or that belong to or are entrusted to the custody of an Indian tribal organization. This offense category excludes the transportation of stolen property (18 U.S.C. 641, 659, 661-62, 1024, 1163, 1660, 1702, 1704, 1707-8, and 2113(B)(C); 42 U.S.C. 3791; and 49 U.S.C. 1472(K1)).

Liquor violations--violations of Internal Revenue Service laws on liquor as well as violations of liquor laws not cited under these laws, such as smuggling goods into the United States; dispensing or unlawfully possessing intoxicants in Indian country; transporting intoxicating liquors into any State, territory, district, or possession where sale is prohibited; shipping packages containing unmarked and unlabeled intoxicants; failing to declare liquor at customs; shipping liquor by C.O.D.; knowingly delivering a liquor shipment to someone other than to whom it has been consigned; and violating in any way the Federal Alcohol Administration Act (18 U.S.C.

545, 1154-56, and 1262-65; 19 U.S.C. 1461; 26 U.S.C. 5061(B), 5113(A), 5115, 517(A), 5179(A)-80, 5214(A), 5221(A), 5273(B), 5291(A), 5301(A)-(C), 5601(A1)-(A4)(A6)-(A14), 5602, 5603(A)(B), 5604(A1)-(A3), (A6)-(A13)(A15)-(A19), 5605-7, 5608(A)(B), 5661(A)(B), 5661(A)(B), 5662, 5671-72, 5674, 5676(1-3)(5), 5681(A)-(C), 5682-83, 5685(A)(B), 5686-87, 5689, and 5691(A); and 27 U.S.C. 203, 205(E)(F), 206(A)(B), 207, and 208(A)(D)).

Malling or transportation of obscene materials--knowingly using the mail for malling obscene or crime-inciting matter, as defined in 18 U.S.C. 1461 and 39 U.S.C. 3001(E). Also transporting for sale or distribution, importing, or transporting any obscene matter in inter-State or foreign commerce (18 U.S.C. 1461-63, 1465, and 1718).

Migratory birds offenses--taking, killing, or possessing migratory birds, or any part, nest, or egg thereof, in violation of Federal regulations or the transportation laws of the State, territory, or district from which the bird was taken. Misuse or nonuse of a migratory-bird hunting and conservation stamp. Violation of the regulations of Bear River Refuge in Utah and Ouachita National Forest sanctuary and refuge in Arkansas and Oklahoma (16 U.S.C. 690(D)(G), 693A, 701, 703-6, 707(A)(B), 708-11, and 718(A)(E)(G)).

Motor carrier violations--violations of the Federal statutes listed below concerning the Motor Carrier Act (15 U.S.C. 1986, 1990, and 1990(C); and 49 U.S.C. 1(7)(17)(20), 10(1), 15(11)(12), 41(1), 46, 301-4, 322(A)(D), 917(A)(E)(F), 1021(A)(B)(E)(F), and 1159(A)).

Motor vehicle theft--inter-State or foreign transporting, receiving, concealing, storing, bartering, selling, or disposing of any stolen motor vehicle or aircraft (18 U.S.C. 2312 and 2313; and 49 U.S.C. 1472I, I1A, I1B, NA, and NB).

Murder--committing or attempting to commit murder (first or second degree) or voluntary manslaughter within the special maritime and territorial jurisdiction of the United States (18 U.S.C. 7). Killing or attempting to kill any Government official, the President of the United States, the President-elect, the Vice President, any officers and employees of the United States, any foreign officials, any official guests, or any internationally protected persons. As applied to the owner or charterer of any steamboat or vessel knowingly and willfully causing or allowing fraud, neglect, misconduct, or violation of any law resulting in loss of life (18 U.S.C. 351(A), 1111-16, 175(A), and 2113(E); 21 U.S.C. 461(C) and 675(E); 49 U.S.C. 1472(K)).

Negligent manslaughter--causing the death of another, within the special maritime and territorial jurisdiction of the United States as defined in 18 U.S.C. 7, by wanton or reckless disregard for human life. Also negligent manslaughter of any Government official, the President of the United States, the President-

elect, the Vice President, any officers and employees of the United States, any foreign officials, and official guests, or any internationally protected persons. This offense category also includes misconduct, negligence, or inattention to duties by ship officers on a steamboat or vessel resulting in death to any person (18 U.S.C. 351(A), 1112, 1114-16, and 1751(A); and 49 U.S.C. 1472(K1)).

Offense--violation of U.S. criminal law. Where more than one offense is charged, the offense with the greatest potential penalty is reported.

Other property offenses-offenses that involve the destruction of property moving in inter-State or foreign commerce in the possession of a common or contract carrier. The malicious destruction of Government property, or injury to U.S. postal property such as mailboxes or mailbags. Trespassing on timber and Government lands is also included in this category of offenses (15 U.S.C. 1281; 16 U.S.C. 3, 9A, 45A, 45C-E, 114, 121-24, 146, 152, 163, 171, 403H-4, 413, 430H, 430Q, 430V, 460K-3, 460N-3, 460N-5, 460N-7, 471, 476-78, 478A, 479, 481-82, 551, and 604-6; 18 U.S.C. 1164, 1361-64, 1705-6, 1851-63, 2071(A)(B), and 2072; 24 U.S.C. 286; 40 U.S.C. 53, 101, 193(E)(O)(P)-(R), and 318(C); and 43 U.S.C. 316K).

Other public-order offenses--violations of laws pertaining to abortion; bigamy; disorderly conduct on the U.S. Capitol grounds; civil disorder; hunting, trapping, or fishing on Indian lands or military areas and zones; and obscene or harassing telephone calls (18 U.S.C. 231, 1165, 1384-85, and 2101; 40 U.S.C. 193(B)-(D)(F)(G)(O)(P); and 47 U.S.C. 223). Included in "public-order, non-regulatory offenses" (q.v.).

Other regulatory offenses--violations of civil rights election laws, the Communication Act (including wire tapping and wire interception), contempt, laws regarding congressional contempt, custom laws (except narcotics and liquor), importation of injurious animals and birds, inter-State commerce (the Connally Act, Hot Oil Act, transportation or importation of prison-made goods, and the Railroad and Transportation Act), maritime and shipping laws, laws regarding stowaways, the Federal Boat Safety Act of 1971, the Federal Water Pollution Control Act, the U.S. postal laws (excluding injury to postal property), intimidation of witness laws, aircraft regulations, explosives (except in vessels), the Gold Acts, train wrecking, and any other regulatory offenses not listed above. (For citations refer to the United States Title and Code Criminal Offense Citations, Administrative Office of the United States Courts, September

Other sex offenses--transporting, coercing, or enticing any women to go from one place to another in inter-State or foreign commerce, in the District of Columbia, or in any territory or possession of the United States with the intent and purpose to engage

in prostitution, debauchery, or any other immoral purpose. Importing, maintaining, or harboring any women for purposes of prostitution or debauchery or for any other immoral purpose. These offenses may be either violent or nonviolent (8 U.S.C. 1328 and 18 U.S.C. 2421-24).

Perjury--knowingly or willfully giving false evidence or swearing to false statements under oath or by any means procuring or instigating any person to commit perjury. Making any false material declarations under oath in any proceeding before or ancillary to any court or grand jury of the United States. This offense also includes any officers and employees of the Government listed under 13 U.S.C. 21-25 who willfully or knowingly furnish or cause to be furnished any false information or statement (8 U.S.C. 1357(B), 13 U.S.C. 213, 18 U.S.C. 1621-23, and 22 U.S.C. 1203).

Possession--acquiring a controlled substance by misrepresentation or fraud, attempting or conspiring to possess, or simple possession of a controlled substance in schedules I-V (as defined by 21 U.S.C. 812). Also possession of a controlled substance in schedule I or II or a narcotic drug in schedule III or IV on board a vessel of the United States or vessels within custom waters of the United States or by any citizen of the United States on board a vessel. Possessing any punch, die, plate, stone, or any other thing designed to reproduce the label upon any drug or container is an offense under this category. Distributing a small amount of marihuana for no remuneration is treated as simple possession and, therefore, is included In this offense category (21 U.S.C. 843 (A3)(A5), 844(A), 846, 955, and 962-63).

Property offenses, fraudulent--property offenses involving the elements of deceit or intentional misrepresentation. Specifically includes embezzlement, fraud (excluding tax fraud), forgery, and counterfeiting.

Property offenses, non-fraudulent--violent offenses against property: burglary, larceny, motor vehicle theft, arson, transportation of stolen property, and other property offenses (destruction of property and trespassing). These offenses are termed "non-fraudulent" only for the purpose of distinguishing them from the category "property offenses, fraudulent," above.

Public-order, non-regulatory offenses--offenses concerning weapons; immigration; tax law violations (tax fraud); bribery; perjury; national defense; escape; racketeering and extortion; gambling; liquor; mailing or transporting of obscene materials; traffic; migratory birds; conspiracy, aiding and abetting, and jurisdictional offenses; and "other public-order offenses" (q.v.). These offenses are termed "non-regulatory" only for the purpose of distinguishing them from the category "public-order, regulatory offenses," below.

Public-order, regulatory offenses--violations of regulatory laws and regulations in agriculture, antitrust, labor law, food and drug, motor carrier, and other regulatory offenses that are not specifically listed in the category "public-order, non-regulatory offenses" above.

Racketeering and extortion--using inter-State or foreign commerce or any facility in inter-State or foreign commerce to aid racketeering enterprises such as arson, bribery, gambling, liquor, narcotics, prostitution, and extortionate credit transactions. For officers or employees of the United States, or anyone representing himself or herself as such, obtaining property or money from another, with his or her consent induced by actual or threatened force, violence, blackmail, or unlawful interference with employment or business. Transmitting by inter-State commerce or through the mail any threat to injure the property, the person, or the reputation of the addressee or of another or to kidnap any person with intent to extort (18 U.S.C. 872-74, 875(A-D), 876-77, 892-94, 1951-52, 1954, 1962(A-D), and 1963; 19 U.S.C. 60; 27 U.S.C. 205(C); and 42 U.S.C. 2703(B)).

Rape--rape, assault with intent to commit rape, and carnal knowledge of a female under 16 who is not one's wife, within the territorial and special maritime jurisdictions of the United States as defined in 18 U.S.C. 7(18 U.S.C. 113(A), and 2031-32; and 49 U.S.C. 1472(K1)).

Robbery--taking anything of value from the person or presence of another by force or by intimidation, within the special maritime and territorial jurisdiction of the United States (18 U.S.C. 7). Also robbery of bank property, U.S. postal property, or personal property of the United States. Also assaulting or putting the life of any person in jeopardy by the use of a dangerous weapon while committing or attempting to commit such robbery (18 U.S.C. 113(B), 1661, 1991, 2111-12, 2113(A)(D)(E), and 2114; and 49 U.S.C. 1472(K1)).

Sentence--sanction imposed on a convicted offender. For sentences to incarceration, the maximum time the offender may be held in custody is reported.

Suspect--a person who is under investigation or interrogation as a likely perpetrator of a specific criminal offense.

Tax law violations--tax fraud offenses such as income tax fraud; evading or defeating tax; willful failure to file; fraudulently withholding on exemption certificate or failing to supply information; counterfeiting any stamps with intent to defraud the collection or payment of tax; willful failure to collect or pay tax; putting fraudulent or false statements on tax returns; failure to obey summons to produce any papers concerning taxes; preparers of returns disclosing or using any information for any purpose other than to assist in preparing returns; failing to furnish receipts for employees of tax withheld; failing to furnish information relating to certain trusts, annuity, and bond purchase plans; and not

obtaining a license for a business that makes a profit from foreign items. Also included in this offense category are violations of excise and wagering tax laws and any other laws listed below from the Internal Revenue Service title (26 U.S.C. 3402, 4411-12, 4918(E)(H), 4919(B2), 5751(A1)(A2), 5752(A)-(D), 5762(A1)-(A11)(B), 6047(A)-(C), 6051, 6056, 6331, 6420(E2), 6421(F2), 6424(D2), 6427(E2), 6674, 7001, 7121-22, 7201-5, 7206(1)-(4)(5A)(5B), 7207, 7208(1), 7210, 7213(A1)-(A3)(B)-(D), 7215(A), 7216, 7231-32, 7322(2), 7261-62, 7272(A), 7512, 7513(B), 7602-3, and 7604(B); and 50A U.S.C. 243(A)).

Threats against the President--knowingly and willfully depositing in the mail, at any post office, or by any letter carrier a letter, paper, writing, print, missive, or document containing any threat to take the life of or to inflict bodily harm upon the President, Vice President, or any other officer in order of succession to the Presidency. Knowingly and willfully making such threats in any way to the above-named people (18 U.S.C. 871).

Traffic offenses--driving while intoxicated or any moving or parking violations on Federal lands (40 U.S.C. 212 B).

Trafficking--importing any controlled substance in schedule I, II, III, IV, or V (as defined by 21 U.S.C. 812). Manufacturing, distributing, selling, or possessing with intent to manufacture, distribute, or sell a controlled substance or a counterfeit substance. Exporting any controlled substance in schedules I-V. Manufacturing or distributing a controlled substance in schedule I or II for purposes of unlawful importation. Making or distributing any punch, die, plate, stone, or any other thing designed to reproduce the label upon any drug or container or removing or obliterating the label or symbol of any drug or container. Obtaining a prescription of a controlled substance in schedule III or IV without a written or oral prescription. Distributing for reasons other than medical a controlled substance in schedule V. Illegally crossing the border if the individual is addicted to or using drugs or has been convicted of any violation of narcotics or marihuana laws (18 U.S.C 1407; and 21 U.S.C. 825(A)-(D), 829(B)(C), 841 (A)(B1A)(B2)-(B4), 842(A4)-(A8), 843(A1)(A2)(A5)(B), 845(A)(B), 846, 952(A)(B), 953(A)(C)(E), 954-55, 957, 959, 960(A1)(B2), 961(2), and 962-63).

Transportation of stolen property--transporting, selling, or receiving stolen goods, stolen securities, stolen moneys, stolen cattle, fraudulent State tax stamps, or articles used in counterfeiting if the above articles or goods involve or constitute inter-State or foreign commerce (18 U.S.C. 2314-17).

U.S. Attorneys.-all United States Attorneys. Prosecutorial data in this compendium come from the Docket and Reporting System of the Executive Office for U.S. Attorneys.

Violent offenses--threatening, attempting, or actually using physical force against a person. Includes murder, negligent manslaughter, assault, robbery, rape, other sex offenses (some of which may be nonviolent), kidnaping, and threats against the President. (See specific offenses for citations.)

Weapons violations--violations of any of the provisions of sections 922 and 923 of title 18 concerning the manufacturing, importing, possessing, receiving, and licensing of firearms and ammunition. Manufacturing, selling, possessing, or transporting (within any territory or possession of the United States. within Indian country, or within the special maritime and territorial jurisdiction of the United States) (18 U.S.C. 7) any switchblade knife. Engaging in importing, manufacturing, or dealing in firearms if not registered with the secretary in the Internal Revenue Service District in which the business is conducted or not having paid a special occupational tax. Carrying on the U.S. Capitol grounds or within U.S. Capitol buildings any firearm, dangerous weapon, explosive, or incendiary (2 U.S.C. 167(D); 15 U.S.C. 1242-43; 18 U.S.C. 922(A)-(M), 923, and 924(A)-(C); 18A U.S.C. 1202(A1)-(A5), (B1)(B5); 26 U.S.C. 5801-2, 5811-12, 5821-22, 5841-44, 5851, 5861(A)-(L), and 5871; 40 U.S.C. 193F(A); and 49 U.S.C. 1472(L1(L2)).

Felony Sentences in State Courts, 1988
Definitions of terms and survey sampling procedures

Note: The following information has been excerpted from the U.S. Department of Justice, Bureau of Justice Statistics, *Felony Sentences in State Courts, 1988* (Washington, DC: U.S. Department of Justice, December 1990), pp. 7-11. Non-substantive editorial adaptations have been made.

#### **Crime definitions**

Before the sample was drawn, eight crime categories were defined. State penal codes, restricted to those defined as felonies and most closely conforming to each of the eight definitions, were identified. Convicted felons were placed into appropriate categories based on their penal code citations. The eight definitions are the following:

Murder and nonnegligent manslaughter--Murder is (1) intentionally causing the death of another person without extreme provocation or legal justification or (2) causing the death of another while committing or attempting to commit another crime. Nonnegligent (or voluntary) manslaughter is intentionally and without legal justification causing the death of another when acting under extreme provocation. The combined category of murder and nonnegligent manslaughter excludes involuntary or negligent manslaughter, conspiracies to commit murder, solicitation of murder, and attempted murder.

Rape--Forcible intercourse (vaginal, anal, or oral) with a female or male. Includes forcible sodomy and penetration with a foreign object (both of which are sometimes called "deviate sexual assault"); excludes statutory rape or any other nonforcible sexual acts with a minor or with someone unable to give legal or factual consent. Includes attempts.

Robbery--The unlawful taking of property that is in the immediate possession of another, by force or the threat of force. Includes forcible purse snatching but excludes nonforcible purse snatching, which is classified as larceny/theft. Includes attempts.

Aggravated assault.-(1) Intentionally and without legal justification causing serious bodily injury, with or without a deadly weapon or (2) using a deadly or dangerous weapon to threaten, attempt, or cause bodily injury, regardless of the degree of injury if any. Includes "attempted murder," "aggravated battery," "felonious assault," and "assault with a deadly weapon."

Burglary--The unlawful entry of a fixed structure used for regular residence, industry, or business, with or without the use of force, to commit a felony or theft. Includes attempts.

Larceny and motor vehicle theft--Larceny is the unlawful taking of property other than a motor vehicle from the possession of another, by stealth, without force or deceit. Includes pocket picking, nonforcible purse snatching, shoplifting, and thefts from motor vehicles. Excludes receiving and/or reselling stolen property (fencing) and thefts through fraud or deceit. Includes attempts. Motor vehicle theft is the unlawful taking of a self-propelled road vehicle owned by another. Includes the theft of automobiles, trucks, and motorcycles but not the theft of boats, aircraft, or farm equipment (which is classified as larceny/theft). Also includes receiving, possessing, stripping, transporting, and reselling stolen vehicles and unauthorized use of a vehicle (joyriding). Includes

**Drug trafficking**--Includes manufacturing, distributing, selling, smuggling, or "possession with intent to sell." Includes attempts.

Other felonies--All felony offenses not listed above. Includes drug possession, forgery or fraud, weapon possession, negligent manslaughter, receiving stolen property, driving while intoxicated or other traffic offenses, statutory rape, and sexual assault (excluding rape). Includes attempts.

# Survey sampling procedures

A sample of 300 counties was drawn for the 1988 National Judicial Reporting Program (NJRP) survey. Every county in the Nation had a nonzero probability of being in the sample. In general, the more felony cases a county had, the more likely it was to be in the sample.

The survey used a two-stage, stratified cluster sampling design. In the first stage the Nation's 3,109 counties or county equivalents were divided into 8 strata. Strata 1 and 2 consisted solely of the 75 largest counties in the United States as defined by the 1985 resident population, Strata 3 through 8 consisted of the remaining 3,034 counties.

Because the 75 largest counties account for a disproportionately large amount of serious crime in the Nation, they were given a greater chance of being selected than the remaining counties.

Stratum 1 consisted of both the 19 counties with the largest number of felony convictions in 1985, and 12 counties whose participation in the survey had been prearranged. Every county in stratum 1 was selected for the sample.

Stratum 2 consisted of the 44 most populous counties that were not in stratum 1. The 44 were ordered by their number of felony convictions in 1985, and then approximately every other county was selected. Stratum 2 thus contributed 23 counties to the sample. Altogether, 54 out of the 75 largest counties were sampled. Data on 1985 felony convictions were obtained from a mail survey described in *State Felony Courts and Felony Laws* (NCJ-106273) and *Census of State Felony Courts*, 1985 (codebook for ICPSR 8667). The 54 sampled counties in the 1988 NJRP survey were the same 54 as in the 1986 survey.

The 3,034 counties not among the 75 largest were placed into 6 strata defined by the total number of felony convictions in 1985 and then arrayed within stratum by region, and within region from largest to smallest on felony conviction totals. Sampling specifications for the 6 strata are given in Table 1.

The final sample thus included 246 counties from among the 3,034 counties outside the 75 largest. Case-level data were successfully obtained on convicted felons sentenced in 1988 from all 300 sampled counties.

The 60 sampled counties in strata 1 and 3 were self-representing only, and their sampled cases therefore had a first-stage sampling weight of 1. The remaining 240 counties sampled from strata 2 and 4 through 8 were selected to represent their respective stratum so that the felony conviction cases sampled had first-stage weights greater than 1.

The smallest county in the sample had a 1988 resident population of about 1,500 persons; the largest county had 8.6 million. Every State except Vermont had a county in the sample. The number of sentenced felons ranged from a low of 0 in 2 counties to a high of 29,000 in the largest county.

At the second stage of sampling, a systematic sample of felons sentenced for murder/nonnegligent manslaughter, rape, robbery, aggravated assault, burglary, felony larceny/motor vehicle theft, drug trafficking, and other offenses was selected from each county's official records. The total sample numbered 80,930 cases. Of these, 52.346 cases were in the 75 largest counties.

Rates at which cases were sampled varied by stratum and crime type. In smaller counties every felony case was taken. In larger counties all murder cases and rape cases were typically included, but other offense categories were sampled.

Before the sample of cases was drawn, each felon sentenced in the sampled county in 1988 was placed into one of the eight offense categories identified above. Any person convicted of multiple offenses that included any of the Federal Bureau of Investigation's index crimes received the offense designation of the most serious Index crime. Drug trafficking was the designation only if the person was not also convicted of one of the Index crimes. These procedures gave each sentenced felon a single chance to be in the sample. An exception would have occurred if a felon appeared in court on more than 1 day for different offenses and received a sentence at each reappearance.

The survey targeted and recorded initial sentences imposed in 1988. If a sentence was imposed on one date and then modified at a later date, the revision was ignored. The survey recorded sentences that were actually executed, not suspended sentences.

Because the year of conviction was not a defining characteristic, some cases in the sample were of persons convicted before 1988 but not sentenced until 1988.

In a few counties, where it was impractical to target sentences in 1988, the target was felons convicted in 1988. In some of the cases the data relate to sentences imposed after 1988,

#### Sources of data

For 76 percent of the 300 counties sampled, NJRP data were obtained directly from the State courts. Other sources included prosecutor offices (6 percent) and courts and prosecutor offices combined (3 percent). Individual-level NJRP records were obtained through a variety of collection methods, including magnetic tape (25 percent of the counties), printouts and other documents (36 percent), manually completed forms (18 percent), and field collection (20 percent).

Data collection for 233 counties was performed by the U.S. Bureau of the Census and for 67 counties by the National Association of Criminal Justice Planners.

# Sampling error

NJRP data were obtained from a sample and not from a complete enumeration. Consequently they are subject to sampling error. A standard error, which is a measure of sampling error, is associated with each number in the report. In general, if the difference between two numbers is at least twice the standard error of that difference, there is at least 95% confidence that the two numbers do in fact differ; that is, the apparent difference is not simply the result of surveying a sample rather than the entire population.

National estimates of the number of convictions for individual crime categories and for

the aggregate total had a coefficient of variation of 3 percent.

#### Missing data

Computations of statistics excluded sample cases that were missing data for the particular variables being tabulated. An exception was table 5.34, which is based on computations that redistributed cases with missing data according to the distribution of the known cases.

Table 1. Sampled countles for NJRP, 1988

Stratum	Total number of counties	Number of convictions in each county	Sampling rate	Number of counties sampled
3	29 ⁸	2,000 or more	1 in 1	29
4	71	950 to 1,999	1 in 2	34
5	165	450 to 949	1 in 4	38

Juvenile Court Statistics 1987 Methodology, definitions of terms, and offenses within categories

This information was excerpted from Howard N. Snyder et al. *Juvenile Court Statistics* 1987, U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention (Washington, DC: USGPO, 1990), pp. 1-3, 125-131. Non-substantive editorial adaptations have been made.

## Methodology

These data describe the number and characteristics of delinquency and status offense cases disposed in 1987 by courts with juvenile jurisdiction. Such courts may handle other case types, including traffic, child support, adoption, termination of parental rights, and abuse or neglect cases. However, these data focus on the court's handling of juveniles charged with a law violation (a criminal law violation or a status offense). Data collection involves the secondary analysis of data originally compiled by juvenile courts or iuvenile justice agencies to meet their own information and reporting needs. As a consequence, the incoming data are not uniform across jurisdictions. In addition, the data do not come from a scientifically selected probability sample of courts, but rather from those juvenile court systems which routinely collect and willingly disseminate their data. To combine information from various sources, the data were recoded into standardized coding categories which at times sacrificed detail in order to increase sample size. Every attempt was made to insure that only compatible information from the various data sets was placed into the standardized data file. The unit of count is a case disposed. A case disposed represents a youth processed by a juvenile court on a new referral regardless of the number of charges contained in that referral. A youth charged with four burglaries in a single referral represents a single case, while a youth referred to court intake for three burglaries and referred again the following week on another burglary charge represents two cases. The offense coded was the most serious offense for which the youth was referred to court. Attempts to commit an offense were included under that offense category except attempted murder, which was included in the aggravated assault category. The term disposed means that some definite action has been taken or that some plan of treatment has been decided upon or initiated. It does not necessarily mean that the case is closed or terminated in

the sense that all contact with the youth has ceased.

#### **Definitions of terms**

Delinquent act/offense--An act committed by a juvenile for which an adult could be prosecuted in a criminal court, but when committed by a juvenile is within the jurisdiction of the juvenile court.

**Detention--**The placement of a youth in a restrictive facility between referral to court intake and case disposition.

Nonpetitioned cases--Informally handled cases which duly authorized court personnel screen for adjustment prior to the filing of a formal petition. Such personnel include judges, referees, probation officers, other officers of the court and/or an agency statutorily designated to conduct petition screening for the juvenile court.

Petioned cases--Formally handled cases that appear on the official court calendar in response to the filling of a petition or other legal instrument requesting the court to adjudicate the youth a delinquent, status offender, or a dependent child, or to waive the youth to criminal court for processing as an adult.

Placement out-of-home--Cases in which youth were placed out of the home in a residential facility housing delinquents or status offenders or were otherwise removed from their home.

**Probation** -Cases in which youth were placed on informal/voluntary or formal/court-ordered probation or supervision.

Race--The race of the youth referred as determined by the youth or by court personnel.

White--A person having origins in any of the original peoples of Europe, North Africa, or the Middle East. (Nearly all Hispanics were included in the white racial category.)

Black--A person having origins in any of the black racial groups of Africa.

Other--A person having origins in any of the original peoples of North America, the Far East, Southeast Asia, the Indian Subcontinent, or the Pacific Islands.

Nonwhite-Includes black and other racial categories.

Status offense--Acts or conduct which are offenses only when committed or engaged in by a juvenile, and which can be adjudicated only by a juvenile court.

Upper age of court jurisdictionThe oldest age at which a juvenile court has original jurisdiction over an individual for lawviolating behavior. In 1987 in three States (Connecticut, New York, and North Carolina) the upper age of jurisdiction was 15, in eight States (Georgia, Illinois, Louisiana, Massachusetts, Michigan, Missouri, South Carolina, and Texas) the upper age of jurisdiction was 16, in Wyoming it was 18, and in the remaining 38 States and the District of Columbia the

upper age of jurisdiction was 17. It must be noted that within most States there are exceptions to the age criteria which place or permit youth at or below the State's upper age of jurisdiction to be under the original jurisdiction of the adult criminal court. For example, in most States if a youth of a certain age is charged with one of a defined list of what are commonly labelled "excluded offenses," the case must originate in the adult criminal court. In addition, in a number of States, the district attorney is given the discretion of filing certain cases either in the iuvenile or in the criminal court. Therefore, while the upper age of jurisdiciton is commonly recognized in all States, there are numerous exceptions to this age criterion.

Youth population at risk--For delinquency and status offense matters this is the number of children from age 10 through the upper age of jurisdiction. In all States the upper age of jurisdiction is defined by statute. In most States individuals are considered adults when they reach their 18th birthday. Therefore, for these States, the delinquency and status offense youth population at risk would equal the number of children who are 10 through 17 years of age living within the geographical area serviced by the court.

### Offenses within categories

Crimes against persons--This category includes criminal homicide, forcible rape, robbery, aggravated assault, simple assault, and other person offenses as defined below.

Criminal homicide--Causing the death of another person without legal justification or excuse. Criminal homicide is a summary category, not a single codified offense. The term, in law, embraces all homicides where the perpetrator intentionally killed someone without legal justification, or accidentally killed someone as a consequence of reckless or grossly negligent conduct. It includes all conduct encompassed by the terms murder, nonnegligent (voluntary) manslaughter, negligent (involuntary) manslaughter, and vehicular manslaughter. The term is broader than the Crime Index category used in the Federal Bureau of Investigation's Uniform Crime Reports (UCR) in which murder and nonnegligent manslaughter does not include negligent manslaughter or vehicular manslaughter.

Forcible rape. Sexual intercourse or attempted sexual intercourse with a female against her will by force or threat of force. The term is used in the same sense as in the UCR Crime Index. (Some States have enacted gender neutral rape or sexual assault statutes which prohibit forced sexual penetration of either sex. Data reported by such States does not distinguish between forcible rape of females as defined above and other sexual assaults.)

Robbery--Unlawful taking or astempted taking of property that is in the

immediate possession of another by force or the threat of force. The term is used in the same sense as in the UCR Crime Index and includes forcible purse snatching.

Assault--Unlawful intentional inflicting, or attempted or threatened inflicting, of injury upon the person of another.

Aggravated assault.-Unlawful intentional inflicting of serious bodily injury, or unlawful threat or attempt to inflict bodily injury or death by means of a deadly or dangerous weapon with or without actual infliction of any injury. The term is used in the same sense as in the UCR Crime Index. It includes conduct included under the statutory names aggravated assault and battery, aggravated battery, assault with intent to kill, assault with intent to commit murder or manslaughter, atroclous assault, attempted murder, felonious assault, and assault with a deadly weapon.

Simple assault--Unlawful intentional inflicting, or attempted or threatened inflicting, of less than serious bodily injury without a deadly or dangerous weapon. The term is used in the same sense as in UCR reporting. Simple assault is often not distinctly named in statutes since it consists of all assaults not explicitly named and defined as serious. Unspecified assaults are contained in the other offenses against persons category.

Other offenses against persons--This category includes kidnaping, violent sex acts other than forcible rape (e.g., incest, sodomy), custody interference, unlawful restraint, false imprisonment, reckless endangerment, harassment, etc., and attempts to commit any such acts.

Crimes against property--This category includes burglary, larceny, motor vehicle theft, arson, vandalism, stolen property offenses, trespassing, and other property offenses as defined below.

Burglary--Unlawful entry or attempted entry of any fixed structure, vehicle or vessel used for regular residence, industry, or business, with or without force, with intent to commit a felony or larceny. The term is used in the same sense as in the UCR Crime Index.

Larceny--Unlawful taking or attempted taking of property (other than a motor vehicle) from the possession of another, by stealth, without force and without deceit, with intent to permanently deprive the owner of the property. It includes shop-lifting and purse snatching without force.

Motor vehicle theft--Unlawful taking, or attempted taking, of a self-propelled road vehicle owned by another, with the intent to deprive him of it permanently or temporarily. The term is used in the same sense as in the UCR Crime Index. It includes joyriding or unauthorized use of a motor vehicle as well as grand theft auto.

Arson--Intentional damaging or destruction by means of fire or explosion of

the property of another without their consent, or of any property with intent to defraud, or attempting the above acts. This term is used in the same sense as in the UCR Crime Index.

Vandalism--Destroying or damaging, or attempting to destroy or damage, the property of another without their consent, or public property, except by burning.

Stolen property offenses--Unlawfully and knowingly receiving, buying, or possessing stolen property, or attempting any of the above. The term is used in the same sense as the UCR category stolen property; buying, receiving, possessing.

Trespassing--Unlawful entry or attempted entry of the property of another with the Intent to commit a misdemeanor, other than larceny, or without intent to commit a crime.

Other property offenses.-This category includes extortion and all fraud offenses, such as forgery, counterfeiting, embezzlement, check or credit card fraud, and attempts to commit any such offenses.

Drug law violations--Unlawful sale, purchase, distribution, manufacture, cultivation, transport, possession, or use of a controlled or prohibited substance or drug, or drug paraphernalia, or attempt to commit these acts. Sniffing of glue, paint, gasoline and other inhalants are also included; hence, the term is broader than the UCR category drug abuse violations.

Offenses against public order--This category includes weapons offenses; non-violent sex offenses; non-status liquor law violations; disorderly conduct; obstruction of justice; and other offenses against public order as defined below.

Weapons offenses--Unlawful sale, distribution, manufacture, alteration, transportation, possession, or use of a deadly or dangerous weapon, or accessory, or attempt to commit any of these acts. The term is used in the same sense as the UCR category weapons; carrying, possessing, etc.

Sex offenses.-All offenses having a sexual element, not involving violence. The term combines the meaning of the UCR categories prostitution and commercialized vice and sex offenses. It includes offenses such as statutory rape, indecent exposure, prostitution, solicitation, pimping, lewdness, fornication, adultery, etc.

Liquor law violations, not status--Being in a public place while intoxicated through consumption of alcohoi, or intake of a controlled substance or drug. It includes public intoxication, drunkenness and other liquor law violations. It does not include driving under the influence. The term is used in the same sense as the UCR category of the same name. (Some States treat public drunkenness of juveniles as a status offense, rather than delinquency; hence, some of these offenses may appear under the status offense code status liquor law violations.

Where a person who is publicly intoxicated performs acts which cause a disturbance, he or she may be charged with disorderly conduct.)

Other delinquent acts-This category includes those offenses which contain a combination of person, property, drug and/or public order offenses or those offenses coded as Other in the original data.

Status offenses.—Acts or conduct which are offenses only when committed or engaged in by a juvenile, and which can be adjudicated only by a juvenile court. Although State statutes defining status offenses vary (and some States may classify cases involving these offenses as dependency cases), the following types of offenses were classified as "tatus offenses.

Running away--Leaving the custody and home of parents, guardians, or custodians without permission and failing to return within a reasonable length of time, in violation of a statute regulating the conduct of youth.

**Truancy**--Violation of a compulsory school attendance law.

Ungovernability--Being beyond the control of parents, guardians, or custodians, or disobedient of parental authority, referred to in various juvenile codes as unruly, unmanageable, incorrigible, etc.

Status liquor law violations--Violation of laws regulating the possession, purchase or consumption of liquor by minors. (Some States treat consumption of alcohol and public drunkenness of juveniles as a status offense, rather than delinquency; hence, some of these offenses may appear under this status offense code.)

Other status offenses--This category includes both a variety of miscellaneous status offenses not included above (e.g., tobacco violation, curfew violation, and violation of a court order in a status offense proceeding), and those offenses coded as Other in the original data.

Probation and Parole in the United States Definitions of terms, survey methodology, and jurisdictional explanatory notes

This information was excerpted from U.S. Department of Justice, Bureau of Justice Statistics, **Probation and Parole 1989**, Bulletin NCJ-125833, pp. 4-6 (Washington, DC; U.S. Department of Justice); and information provided by the U.S. Department of Commerce, Bureau of the Census. Nonsubstantive editorial adaptations have been made. Data were collected for the U.S. Department of Justice, Bureau of Justice Statistics by the U.S. Bureau of the Census.

### **Definitions of terms**

Probation entries--Persons entering probation directly from a sentencing court, or from a correctional facility as a result of split sentencing or sentence modification.

Probation exits--Persons removed from probation including discharges (termination, completion of terms, and early discharges), revocation and commitment to incarceration, and people who die while on probation.

Probation population--All adults who have been placed under the supervisory authority of a probation agency as part of a court order. Bench, court, informal and summary probation cases, where the judiciary never surrenders jurisdiction to a probation agency are excluded from counting.

Probationers--Persons who have been placed under the supervisory authority of a probation agency as part of a court order regardless of whether they have been convicted.

Parole entries--Persons entering parole supervision from a correctional facility as a result of either parole, reparole, reinstatement, or mandatory supervised release.

## Parole exits

Mandatory supervised release--Persons entering parole supervision from a correctional facility upon expiration of sentence not as a result of a paroling authority decision.

Removals--Persons removed from parole: discharges, including terminations, completion of term and early discharges; revocations and recommitments to prison; and deaths.

Parole population--All persons under the jurisdiction of a paroling authority. (Out-of-State parolees under courtesy supervision are counted in the population of the paroling authority with jurisdiction.) Paroling authority--A board, commission, or authority responsible for parole supervision which may or may not have discretionary power to release offenders from prison prior to the expiration of sentence, to revoke parole and return violators to prison, and to reinstate or grant other forms of reentry to parole supervision.

### Jurisdictional explanatory notes

### Probation notes

Many States update their population counts, therefore the Jan. 1, 1989, numbers may differ from those previously published from Dec. 31, 1988.

Alabama--The State estimated all data.
Arkansas--The State estimated all data.
California--Exits include 13,971 transfers of jurisdiction, deaths, or loss of jurisdiction. Absconders were omitted from the January 1 and December 31 counts.

Delaware--The State estimated all data.
District of Columbia--The District of
Columbia counted 167 rejections as exits.

Florida--The State revised the previously reported yearend 1988 population to include those supervised under the pretrial intervention program.

Georgia--The State included 1,932 abandonment and bastardy cases and all inter-state compact cases as entries. Exits include 12,037 abandonment and bastardy cases, special termination cases, and cases transferred out-of-State. The transfer of abandonment and bastardy cases to another State agency is reflected in the exits. All data exclude probationers who have been sent to another State for supervision and include probationers that Georgia supervises for other States.

Indiana--The State estimated exits.
Kentucky--The State included 17 dismissed cases as exits. Inactive supervision cases were excluded from the probation count.

Maine--The State estimated entries and exits.

Maryland--Exits include 4,469 unsatisfactory case closings. The State excluded 23,968 cases supervised under the Drinking Driver Monitoring Program.

Massachusetts--The State omitted absconders from the January 1 and December 31 counts.

**Michigan--**The State estimated entries and exits.

Minnesota--The State revised the previously reported yearend 1988 count to include inactive supervision cases in Hennepin County.

Missouri--Entries include 63 diversion cases without sentence. Absconders were omitted from the January 1 and December 31 counts.

New Hampshire--The State included 303 unaccountable violators as exits.

New Jersey--Entries include 1,316 transfers from other States. Exits include 5,409 with new offenses, violation of probation, and other discharges.

New Mexico--The State included closed semi-active and inter-area transfers as exits.

New York--Exits include 484 early discharges.

North Carolina--The State reported that approximately 0.6 percent of the figures reported may include cases that are supervised under probation and parole simultaneously.

Ohio--The State included persons transferred between State and county probation agency in entries and exits.

Oregon--The State included absconders in the probation count not previously reported. The State estimated exits.

South Carolina--The State included 1,315 unsatisfactorily closed cases and 12 medical cases in the exit count.

South Dakota--All data are midyear 1989 counts. The State excluded absconders from all data.

**Texas**--All data are for August 1989. The State estimated entries.

**Utah**--The State included 90 reinstatements as entries. Exits include 213 revocations and discharges.

Virginia--The State included revocations, out-of-State cases terminated, and cases closed administratively as exits. Virginia did not include absconders in its counts.

West Virginia--Virtually all in-State probation cases supervised by the Department of corrections were transferred to the jurisdiction of the West Virginia Supreme Court of Appeals Probation Department. Entries include 29 transfers and 50 reinstatements. Exits include 179 transfers.

Wisconsin--Exits include revocation and fine, vacated by court, terminated with outstanding court obligation, and revoked sentence to time served.

Wyoming--Entries, exits, and the December 31 count are estimated.

### Parole notes

Many States update their population counts, therefore, the Jan. 1, 1989, numbers may differ from those previously reported for Dec. 31, 1988.

Federal--Absconders are included in the population counts.

Alabama--All data are estimated. Absconders are included in the population counts.

Alaska--Absconders are placed in an inactive caseload but are included in the population counts.

Arizona--The State revised the previously reported yearend 1988 population to exclude juvenile cases. Entries include 330 interstate compact cases. Exits include 10 early discharges. Absconders are included in the population counts.

**Arkansas-**-Absconders are omitted from the population counts.

California Data include California Youth Authority (CYA) cases. Absconders are placed in an inactive caseload and are omitted from the population counts.

Colorado--Entries and exits include an unknown number of interstate compact cases. The population counts exclude interstate compact cases. Absconders are placed in an inactive caseload and are omitted from the population counts.

Connecticut--Absconders are included in the population counts.

**Delaware--**The State estimated its figures. Absconders are included in the population counts.

**District of Columbia--**Absconders are included in the population counts.

Florida--The State supervised only persons sentenced to a year or more. Absconders are placed in an inactive caseload and are omitted from the population counts.

**Georgia--**Absconders are included in the population counts.

Hawaii--Entries include 158 parolees from other States. Exits include 84 suspended cases. Absconders are included in the population counts.

**Idaho--**Absconders are included in the population counts.

Illinois--The State estimated entries and exits. Absconders are included in the population counts. Only persons sentenced to a year or more are supervised.

Indiana--Absconders are omitted from the population counts.

**lowa**--The State only supervises persons sentenced to a year or more. Absconders are omitted from the population counts.

Kansas--Exits exclude an unknown number of persons returned to prison or jail, parole revocation pending; returned to prison of til, new charges pending; or transferred to another parole jurisdiction. Exits include 212 absconded, 235 expiration of sentence, and 157 supervised out-of-State. The State monitors absconders apart from the regular parole caseload and omits them from the January 1 and December 31 counts.

Kentucky--The State included 407 transfers from out-of-State districts as entries. The State estimated exits.

Louisiana--All data are estimated.

Absconders are included in the population counts.

Maine--The State abolished parole in 1976. There remain 30 pre-1976 parolees under supervision and 30 in prison who will become eligible for parole.

Maryland--Absconders are included in the population counts.

Massachusetts--Absconders are included in the population counts.

**Michigan--**Absconders are included in the population counts.

Minnesota--Entries include 442 parolees on work release. Absconders are included in the population counts.

Mississippi--Entries include 6 work release cases. Absconders are placed in an inactive caseload and are omitted from the population counts.

Missouri--Data exclude 608 parolees from local jails. Absconders are included in the population counts.

Montana--Exits include 2 pardons and 3 commutations. Absconders are included in the population counts.

**Nebraska**--Absconders are included in the population counts.

Nevada--Absconders are included in the population counts.

New Hampshire--The State supervised only persons sentenced to a year or more. Absconders are omitted from the population counts.

**New Jersey-**-Absconders are included in the population counts.

New Mexico--The State estimated entries and exits. Absconders are omitted from the population counts.

New York--Absconders are included in the population counts.

North Carolina--Absconders are included in the population counts.

North Dakota--Absconders are included in the population counts.

Ohio--Entries include 416 parolees supervised out-of-State. Exits include 165 inactive and interstate compact cases. Absconders are omitted from the population counts.

Oklahoma--The State estimated exits. Absconders are included in the population counts.

Oregon--The State revised the previously reported yearend 1988 count to include absconders not reported as well as other administrative adjustments.

Pennsylvania--Entries include 14,821 parolees released by county courts. The State supervised 685 parolees from local jails. Absconders are included in the population counts.

Rhode Island--Absconders are removed from parole if and only if a revocation warrant has been issued.

South Carolina--Exits include 13 pardoned parolees. The State excluded 850 youthful offenders from its counts. Absconders are included in the parole population.

South Dakota--The State estimated exits. Absconders are included in the population counts.

Tennessee--Entries include 593 parolees supervised out-of-State. Absconders are included in the population counts.

Texas--The State estimated exits. Absconders are included in the population counts.

**Utah**--Absconders are included in the population counts.

**Vermont**--Absconders are omitted from population counts.

Virginia--The State revised the previously reported yearend 1988 count to exclude in-State transfers. Entries include 393 transfers from other States. Exits include terminated out-of-State cases. Absconders are omitted from the population counts.

Washington--The State estimated the January 1 count, exits, and the December 31 count. Absconders are included in the population counts.

Wyoming--All data are estimated. Absconders are included in the population counts.

West Virginia--Entries include 100 transfers. The State estimated exits. Absconders are included in the population counts.

Children in Custody Survey methodology and definitions of terms

The following information was excerpted from U.S. Department of Justice, Bureau of Justice Statistics, *Children in Custody, 1975-85:*Census of Public and Private Juvenile Detention, Correctional and Shelter Facilities (Washington, DC: USGPO, 1989), pp. 4-8;
U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention, Children in Custody, 1989 (Washington, DC: U.S. Department of Justice, 1991), pp. 1, 2, 10; and information provided by the U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention. Non-substantive editorial adaptations have been made.

### Survey methodology

Data for each of the censuses were collected by the U.S. Bureau of the Census for the Office of Juvenile Justice and Delinquency Prevention.

All data collected for each of the censuses reflect State-by-State variation among juvenile justice systems and thus require caution when making comparative interpretations. Caution should also be used when interpreting changes over time in categories where the population of interest makes up less than 1 percent of the total population.

The comparison of data is also limited by changes in the questionnaires at each enumeration. The present analysis has accounted for the majority of these changes by collapsing categories where applicable. Tables may include only one or two of the years under consideration because earlier data may not be comparable with later collections. In using these tables one should take into consideration whether the total residential population or only the juvenile population was used. A juvenile is a person of an age (usually under 18) specified by State statute who is subject to juvenile court authority at the time of admission, regardless of age at the time of the census.

## The 1975 census

#### Period of reference

The 1975 census was conducted on June 30, 1975. Most data elements (including the facility counts and the number of individuals residing within the facilities) pertain to midyear 1975 (June 30). Other data elements, namely admissions and discharges, apply to the

annual year from July 1, 1974, to June 30, 1975, whereas the information on expenditures reflects activities that in general refer to the fiscal year July 1, 1974, through June 30, 1975. For some facilities this timeframe coincided with the calendar year.

### Criteria for inclusion

To be included in the 1975 census, juvenile detention and correctional facilities in the public sector were required to have been in operation at the time the census was conducted (February 1976), to have been in operation at least a month before the census reference date (June 30, 1975), and to have a resident population in which juveniles made up at least 50 percent of the total population. This last criterion, however, did not apply to California State administered facilities that held youthful offenders in addition to juveniles. These facilities were included in the census even in cases where the youthful offender population outnumbered the juvenile component.

In addition to meeting the public facility criteria, private facilities were eligible for enumeration if a minimum of 10 percent of their residents were adjudicated delinquents, persons in need of supervision (PINS), voluntary admissions, persons awaiting transfer to another jurisdiction, or persons held pending disposition by the courts.

Excluded were facilities in which more than 90 percent of the residents were dependent or neglected or other types of non-offenders. Also excluded were juvenile detention centers operated as part of local jails but lacking a separate staff or budget; Federal juvenile facilities; non-residential facilities; foster homes; and facilities exclusively for drug abusers, alcoholics, dependent or neglected persons, unwed mothers, and the emotionally disturbed or the mentally retarded.

### Data collection procedures

The census was conducted by mail, with two followup mailings, and then by a telephone call or telegram to nonrespondents.

An overall response rate of virtually 100 percent was achieved for public facilities that met the selection criteria; the rate for private facilities was 95 percent. For the few private facilities that ultimately did not respond to the census, data were supplied from the questionnaires returned in the 1974 census. Respondents were requested to provide estimates for data that could not be obtained from available records. Respondents were asked to submit expenditure information on a fiscal year basis for the period from July 1, 1974, to June 30, 1975; however, other reference periods such as the calendar year were acceptable.

#### Other notes

In response to an increased interest in the extent to which juvenile facilities emphasized rehabilitation-oriented programs, the 1975 instrument included an additional facility type--residential treatment centers. Uneven responses necessitated the elimination of this category and the reclassification of these facilities to the other six types.

Data for two State forestry camps in New Mexico were reported with those for a State training school.

The nonjuvenile component of the population included youthful offenders as well as adults. The 1975 youthful offender figures included 2,072 males and 58 females, all in public California facilities. Of the 176 adults, 16 males (all in public facilities) were in Montana, whereas private sector institutions held 152 males and 8 females distributed among Alabama, Arizona, California, Colorado, Connecticut, Florida, Massachusetts, Minnesota, New Hampshire, North Dakota, and Oregon.

### The 1977 and 1979 censuses

### Period of reference

The reference date for both the 1977 and 1979 censuses was changed from midyear, the point used in earlier censuses, to yearend (December 31). Data on occupancy, admissions, discharges, average daily population, and expenditures were for calendar years Jan. 1, 1977, through Dec. 31, 1977, and Jan. 1, 1979, through Dec. 31, 1979.

#### Criteria for inclusion

To be included in the 1977 and 1979 censuses, facilities were required to have been in operation on December 31 and to have a resident population in which juveniles made up at least 50 percent of the total population. This last criterion, however, did not apply to California State-administered facilities that held youthful offenders in addition to juveniles. These facilities were included even in cases where the youthful offender population outnumbered the juvenile component. Facilities were included in the count if they had as few as 1 percent offenders in an otherwise exclusively nonoffender population. In the 1975 census a minimum of 10 percent offenders was required for inclusion.

Excluded were juvenile detention centers operated as a part of local jails but lacking a separate staff or budget; non-residential facilities, that is, those in which juveniles did not stay overnight; establishments operated by Federal authorities; and foster homes for fewer than three juveniles. Also excluded were facilities solely for aicoholics; depend-

ent, neglected, or abused persons; the emotionally disturbed or the mentally retarded; unwed mothers; or other types of non-offenders.

## Data collection procedures

The 1977 and 1979 censuses were conducted by mail, with two followup mailings, and then by a telephone call to nonrespondents.

An overall response rate of virtually 100 percent was achieved for public facilities that met the selection criteria; the rate for private facilities was 94 percent. For the few private facilities that ultimately did not respond to the census, data were supplied from the questionnaires returned for earlier years. Respondents were requested to provide estimates for data that could not be obtained from available records. Respondents were asked to submit expenditure information on a calendar year basis for the period from January 1 to December 31. However, other reference periods such as the fiscal year were acceptable.

### Other notes

On Dec. 31, 1977, there were 2,131 nonjuveniles housed in juvenile facilities (1,824 in public facilities; 307 in private facilities). A total of 2,191 nonjuveniles were housed in juvenile facilities on Dec. 31, 1979 (2,162 in public facilities; 29 in private facilities). As in earlier enumerations the nonjuvenile component of the 1977 and 1979 censuses consisted primarily of youthful offenders, the large majority of whom were committed by the California Youth Authority.

An additional facility classification scheme was added in 1977. In order to provide a classification method that would uniformly group all facilities according to their basic function and at the same time take into account the increasing national policy interest in the degree of restrictiveness prevailing in juvenile custody facilities, the 1977 and 1979 censuses (and all censuses thereafter) were expanded to obtain information on the specific nature of each facility's mission and on key factors indicative of onsite controls.

The designations "short-term" and "long-term" were retained, but assignment to one or the other of these broad categories was determined by which of the following the respondent facility identified as its paramount purpose:

Short-term: Diagnosis and/or classifications; detention pending adjudication, commitment, or placement.

Long-term: Commitment and/or placement for treatment; probation or aftercare; voluntary admission. If a facility marked more than one of these categories, the largest group of juveniles usually held determined its classification.

Additional designations for "institutional" and "open" environments were added. Questions were added to the instrument to determine existing security arrangements. Respondents were asked to characterize facilities according to three key factors indicative of the control environment:

- 1. Frequency of access to community resources.
- 2. Physical and staff restraints on the movement of residents.
- A qualitative judgment based on (1) and (2) above about the degree of restrictiveness pervading the facility.

These factors were used as the basis for a classification system (referred to as "census classification") permitting the designation of a facility as either institutional or open as well as short-term or long-term.

### The 1983 census

#### Period of reference

The 1983 census was conducted on Feb. 1, 1983. Most data elements pertain to this date. Other data information elements, namely admissions and discharges and expenditures, apply to the calendar year Jan. 1, 1984, through Dec. 31, 1984. Other reference periods such as the fiscal year were acceptable.

## Criteria for inclusion

Juvenile programs in operation on Feb. 1, 1983, were included in the census if they housed more than three residents, 50 percent of whom were juveniles, and if offenders were at least 1 percent of their average daily population. In California, however, all California Youth Authority facilities were included in the census. Juvenile detention centers operated as part of an adult jail were excluded, as were non-residential facilities, facilities exclusively for drug or alcohol abusers or non-offenders, and Federal juvenile correctional facilities.

# Data collection procedures

The census was conducted by mail, with followup mailings and phone calls used to encourage reporting. The response rate was virtually 100 percent in the public facilities and 90 percent for the private facilities. For the few private facilities that did not respond to the census, data were supplied from the questionnaires returned for earlier years. Respondents were requested to provide estimates for data that could not be obtained from available records.

#### Other notes

On Feb. 1, 1983, there were 2,181 nonjuveniles housed in juvenile facilities (2,098 in public facilities; 83 in private facilities).

#### The 1985 census

## Period of reference

The 1985 census was conducted on Feb. 1, 1985. Most data elements refer to that date. Other annual data such as admissions, discharges, and expenditure information apply to the calendar year Jan. 1, 1984, through Dec. 31, 1984.

### Criteria for inclusion

Juvenile programs in operation on Feb. 1, 1985, were included in the census if they housed more than three residents, if at least 50 percent of the residents were juveniles, and if accused or adjudicated delinquents and status offenders were at least 1 percent of their average daily population. In California, however, all California Youth Authority facilities were included in the census. Juvenile facilities operated as part of adult jails were excluded, as were non-residential facilities, facilities exclusively for drug or alcohol abusers or non-offenders, and Federal juvenile correctional facilities.

# Data collection procedures

The census was conducted by mail, with followup mailings and phone calls used to encourage reporting. The response rate for public juvenile facilities was virtually 100 percent; the response rate for private facilities was 99 percent.

Respondents were requested to provide estimates for data that could not be obtained from available records.

## Other notes

On Feb. 1, 1985, there were 2,112 nonjuveniles housed in juvenile facilities (2,080 in public facilities; 32 in private facilities).

# The 1987 census

#### Criteria for inclusion

Except in California, residential programs and group homes operating on Feb. 2, 1987 were included in the census if they met the following three criteria: 1) They housed three or more residents. 2) At least 50 percent of the residents were juveniles. 3) Accused or adjudicated delinquents and status offenders made up at least one percent of their average daily population. In California, all California Youth Authority facilities were included.

Juvenile facilities which are a part of adult

facilities, non-residential facilities, and facilities operated exclusively for substance abuse and non-offenders were excluded from the census, as were Federal juvenile correctional facilities.

## Data collection procedures

The 1987 Census of Public and Private Juvenile Detention Correctional and Shelter Facilities collected information from 1,107 public and 2,195 private juvenile institutions. The response rate for public institutions was almost 100 percent, with only two refusing to participate. Approximately 80 percent of private facilities responded. The initial response rate from private institutions was about 50 percent. The remaining 30 percent responded to telephone interviews. The questionnaire is fairly lengthy, and in some cases, some information could not be collected during the telephone interviews. Correcting for incomplete data and missing cases was not attempted.

#### Other notes

The census included a count of juveniles and adults in these facilities on Monday, Feb. 2, 1987. These data were used to calculate the rates and counts of juveniles in institutions. Annual data for the fiscal year 1986 on admissions, discharges, average length of stay, average daily population, staff, services provided, characteristics of the facility, and revenues and expenditures were also collected.

Individuals over the age of juvenile court jurisdiction could be in these institutions for two reasons. First, there were about 2,600 adult offenders housed in these facilities on the date of the census. These adults were not included in the counts of juveniles. Second, there were about 8,000 juvenile offenders in these facilities who passed the age of juvenile court jurisdiction while in detention, but remained in the juvenile facility. These juvenile offenders were included in the counts of juveniles in custody.

The custody rate is the simple ratio of all children in custody to the sum of the juvenile populations aged 10 to majority for all States, multiplied by 100,000. The age at which juvenile courts lose jurisdiction over young offenders ranges from 16 to 19. For each State, the appropriate upper age is used in deriving the sum for the denominator. Estimates of the population (in one thousands) of each State and the District of Columbia, by age and by gender were provided by the U.S. Bureau of the Census. Juveniles aged 10 to the age at which the juvenile court loses jurisdiction were defined as the population at risk.

There were a total of 1,037 youths under the age of 10 in juvenile facilities on the census date. These youngsters, along with the approximately 8,000 juvenile offenders who were past the age of juvenile court jurisdiction while in a facility are included in the numerator of the rates, but these age groups are not included in the denominator. The rates will be slightly inflated because of this. On the other hand, the rates are deflated because some institutions did not respond to the survey.

## The 1989 Census

The 1989 Children in Custody census surveyed more than 3,200 public and private facilities nationwide that provide custody and care for over 92,000 children daily who are wards of juvenile courts, juvenile corrections, or private agencies.

These facilities represent a broad spectrum of residential programs for juveniles who are either accused or adjudicated delinquents or status offenders--runaways, incorrigibles, or truants. Some facilities also house youth who are detained or committed for treatment or placement as a result of abuse, dependency, or neglect, or for other reasons. They include juvenile detention centers, shelters, reception and diagnostic centers, training schools, camps, ranches, and group homes.

Results are presented from the *public* facility census only. These results are based on data from 1,100 facilities--nearly all such facilities administered by State or local governments in 1989. Facilities reported information on their operations for calendar year 1988 and for the census date, Feb. 15, 1989.

#### **Definitions of terms**

Admissions--Entry transactions recorded by the facility including new entries, reentries, and transfer entries. The number of admissions recorded in a given year does not represent the number of different juveniles admitted.

Adult--A person subject to the original jurisdiction of the criminal court, rather than juvenile court, because at the time of the offense the person was above a statutorily specified age. This includes youthful offenders who have been tried in adult court and who have been committed to a facility that also houses juveniles.

Commitment--Placement of a juvenile in a juvenile custody facility for supervision and treatment following an adjudication for committing a specific delinquent or status offense; following a determination that the juvenile was dependent, neglected, or abused; or for some other reason unrelated to delinquency.

**Detention--**Temporary holding of a juvenile pending adjudication for a specific delinquent or status offenses or for a condition

such as dependency, neglect, or abuse. A juvenile who has already been adjudicated and is awaiting disposition or transfer to a placement facility is also considered to be detained.

Discharges--Exit transactions recorded by the facility including final exits, transfer exits, exits to supervision, and unauthorized exits. The number of discharges recorded in a given year does not represent the number of different juveniles discharged.

Juvenile--A person subject to juvenile court jurisdiction for purposes of adjudication and treatment based on age and offense limitations defined by State law. The upper age of original juvenile court jurisdiction ranges from 16 to 19, but for most States it is 17 or 18.

## Types of facilities

Institutional environments-- Impose restraints on residents' movements and limit access to the community. They are usually much larger than open facilities. Most detention centers, reception and diagnostic centers, and a majority of training schools are classified as having institutional environments.

Long-term--Facilities generally holding juveniles who have been adjudicated and committed to treatment and custody.

Open environments.-Allow greater movement of residents within the facilities and more access to the community. Facilities with open environments included most private facilities and most shelters; ranches, forestry camps or farms; halfway houses, and group homes.

Private facility--A juvenile facility (either profit-making or nonprofit) subject to governmental licensing but under the direct administrative and operational control of private enterprise; it may receive substantial public funding in addition to support from private sources.

Public facility--A facility under the direct administrative and operational control of a State or local government and staffed by governmental employees.

Short-term--Facilities typically holding juveniles awaiting adjudication, disposition, or placement.

## **Adjudication status**

Committed or commitment--The placement of juvenile offenders following adjudication and any placement procedure. May be referred to as "placement."

Detained or detention--Juveniles who are pending adjudication or who have been adjudicated but are awaiting disposition or placement. Includes those juveniles undergoing diagnosis or classification before disposition or placement.

Voluntary admission--A type of admission in which a juvenile voluntarily commits

himself/herself to a facility without having been adjudicated by a court. The juvenile may be referred to the facility by parents, court, school, or a social agency.

#### Appendix 18

**Profile of Jail Inmates, 1989** Methodology and survey sampling procedures

Note: The following information was excerpted from the U.S. Department of Justice, Bureau of Justice Statistics, *Profile of Jall Inmates*, 1989, Special Report NCJ-129097 (Washington, DC: U.S. Department of Justice, April 1991), pp. 11, 12. Non-substantive editorial adaptations have been made.

# Methodology

The 1989 Survey of Inmates in Local Jails was conducted for the U.S. Department of Justice, Bureau of Justice Statistics by the U.S. Bureau of the Census. Through personal interviews during July, August, and September 1989, data were collected on individual characteristics of jail inmates, current offenses and sentences, characteristics of victims, criminal histories, jail activities and programs, prior drug and alcohol use and treatment, and health care services provided while in jail. Similar surveys of jail inmates were conducted in 1972, 1978, and 1983.

#### Sample design

The sample for the 1989 survey was selected from a universe of 3,312 jalls that were enumerated in the 1988 National Jail Census. The sample design was a stratified two-stage selection. In the first stage six separate strata were formed based on the size of the male and female populations. In two strata all jails were selected; in the remaining four strata, a systematic sample of jails was selected proportional to the population size of each jail. Overall, a total of 424 local jails were selected. In the second stage interviewers visited each selected facility and systematically selected a sample of male and female inmates using predetermined procedures. As a result, approximately 1 of every 70 males were selected, and depending on the stratum, 1 of every 14, 15 or 70 females were selected. A total of 5,675 interviews were completed, yielding an overall response rate of 92.3 percent.

Based on the completed interviews, estimates for the entire population were developed using weighting factors derived from the original probability of selection in the sample. These factors were adjusted for variable rates of nonresponse across strata and inmate characteristics. Further adjustments were made to control the survey estimates to counts of jail inmates obtained

from the 1988 National Jail Census and the 1989 Sample Survey of Jails.

#### Accuracy of the estimates

The accuracy of the estimates depends on two types of error: sampling and nonsampling. Sampling error is variation that may occur by chance because a sample rather than a complete enumeration of the population was conducted. Nonsampling error can be attributed to many sources, such as nonresponse, differences in the interpretation of questions among inmates, recall difficulties, and processing errors. In any survey the full extent of the nonsampling error is never known.

The sampling error, as measured by an estimated standard error, varies by the size of the estimate and the size of the base population. Estimates of the standard errors have been calculated for the 1989 and 1983 surveys of jail inmates (see table 1). These standard errors may be used to construct confidence intervals around percentages in this report. For example, the 95 percent confidence interval around the percent of jail inmates in 1989 who were in jail for a drug offense is approximately 23.0 percent plus or minus 1.96 multiplied by 0.6 percent (or 21.8 percent to 24.2 percent).

These standard errors may also be used to test the statistical significance of the difference between two sample statistics by pooling the standard errors of the two sample estimates. For example, the standard error of the difference in the percent in jail for drug offenses in 1989 compared to 1983 would be .72 (or the square root of the sum of the squared standard errors in each year). The 95 percent confidence interval around the difference would be 1.96 multiplied by 0.72 percent (or 1.4 percent). Since the observed difference of 13.7 percent (23.0 percent minus 9.3 percent) is greater than 1.4 percent, the difference would be considered statistically significant.

All comparisons discussed in this report were statistically significant at the 95 percent confidence level. Because of the sample design, State, local or other subnational estimates cannot be made.

## Self-reported information

Criminal history data are based on self-reported information provided by each respondent. Through a series of questions, inmates were asked to report on past probation sentences as juveniles and as adults and on past sentences to incarceration up to 10 prior times. For each sentence, the inmates were asked the offenses for which they were sentenced, the type of institution in which they served time, the date of admission, and

the length of time actually served. From this information, a criminal history profile was constructed. A recidivist was defined as an inmate who reported a sentence to probation or incarceration at any time in the past.

Drug use and treatment history data are also based on responses from the inmates. Inmates were asked a detailed set of questions about each of 10 types of drugs. These drugs included heroin; methadone used outside of a treatment program; amphetamines and barbiturates (alone and in combination); methaqualone (Quaaludes); cocaine or crack; LSD; PCP; and marihuana and hashish. Drug use histories were developed by examining the responses to questions for each of these drugs. Inmates who were unconvicted (awaiting arraignment, awaiting trial, or on trial) were not asked any questions about drug use during the month before the arrest for which they were currently detained or about drug use in the month before the first offense for which they had served time in the past.

Table 1. Standard errors of the estimated percentages, all jail inmates, 1989 and 1983

Base of the			Estimated	percentages		
estimate and year	98 ot 2	95 or 5	90 or 10	80 or 20	70 or 30	50
1,000		,,			.,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,	
1989	4.4 %	6.9 %	9.5 %	12.7 %	14.6 %	15.9 %
1983	3.1	4.8	6.6	8.7	10.0	10.9
5,000						
1989	2.0	3.1	4.3	5.7	6.5	7.1
1983	1.4	2.1	2.9	3.9	4.5	4,9
10,000						
1989	1.4	2.2	3.0	4.0	4.6	5.0
1983	1.0	1.5	2,1	2.8	3.2	3.5
25,000						
1989	0,9	1.4	1.9	2.5	2,9	3.2
1983	0.6	1.0	1.3	1.7	2.0	2.2
50,000						
1989	0.6	1.0	1.3	1.8	2.1	2.2
1983	0.4	0.7	0.9	1.2	1.4	1.5
100,000						
1989	0.4	0.7	1.0	1.3	1.5	1.6
1983	0.3	0.5	0.7	0.9	1.0	1.1
200,000						
1989	0.3	0.5	0.7	0.9	1.0	1.1
1983	0.2	0.3	0.5	0.6	0.7	0.8
223,550 ^a						
1983	0.2	0.3	0.4	0.6	0.7	0.8
395,553 ^a						
1989	0.2	0.3	0.5	0.6	0.7	8.0

^aThe total number of jall inmates in 1983 and 1989.

Note: The reliability of an estimated percentage depends on the size of the percentage and its base. Each standard error when multiplied by 1.96 provides a 95 percent confidence interval around an estimated percentage. To calculate the standard error of the difference between two estimated percentages, take the square root of the sum of each squared standard error for the percentages being compared.

### Appendix 19

Correctional Populations in the United States, 1989 Survey methodology, definitions of terms, and jurisdictional explanatory notes

Note: The following information has been excerpted from U.S. Department of Justice, Bureau of Justice Statistics, *Correctional Populations in the United States, 1989*, NCJ-130445 (Washington, DC: USGPO, 1991). Non-substantive editorial adaptations have been made.

### Survey methodology

Data from these sources are based on yearend 1988 and 1989 inmate counts and on enumerations of prisoner transactions during 1989. As in past years, these data were collected with a standard questionnaire transmitted to the appropriate State authorities and the Federal Bureau of Prisons. The final date for receipt of information was Mar. 15, 1990.

In each jurisdiction, the questionnaire was completed by a central agency reporting for institutions within the correctional system. This procedure was also used by the Federal Bureau of Prisons in supplying data on Federal institutions. Because the information was derived from a complete enumeration rather than a survey, the statistical data are not affected by sampling error. Response errors were held to a minimum by means of a systematic telephone follow-up and, where necessary, other control procedures. Thus, the yearend counts are generally considered reliable. Because of the absence of standardized administrative and record keeping practices from State to State, the data for admissions and departures are not always entirely comparable across jurisdictions. Jurisdictions may revise their numbers in later years. Subsequent publications may therefore differ from data presented here.

### National Prisoner Statistics (NPS) category definitions

Jurisdiction population, Dec. 31, 1989--Includes all inmates under jurisdiction of State correctional authorities on Dec. 31, 1989 regardless of location. Does not include other jurisdictions' inmates (for example, inmates from other States, pretrial detainees) merely housed in prisons.

Custody population, Dec. 31, 1989--Includes all inmates in the State's custody, that is, housed in State correctional facilities on Dec. 31, 1989. Does not include State inmates housed outside State prison facilities; does not include other jurisdictions' inmates (for example, inmates from other States, the courts, local jails) housed in the State's facilities.

Overcrowding, Dec. 31, 1989--Includes all State prison inmates housed in local jails on Dec. 31, 1989, as a direct result of State prison overcrowding. Does not include State prison inmates held in local jails for other reasons (for example, work release, court appearance, etc.).

#### Admissions

New court commitments--Includes all inmates who were admitted with all new sentences, that is, these inmates were not readmitted for any sentences for which they had already served some prison time. This category includes probation violators entering prison for the first time on the probated offenses. Does not include parole violators with new sentences.

Parole violators with new sentences--includes all parolees returned with new sentences.

Other conditional release violators with new sentences--Includes all individuals on conditional release (other than parole) who are returned with new sentences, for example, returns from supervised mandatory release, from shock probation, etc.

Parole violators only, no new sentences--Includes all parolees returned only for formal revocations of parole that were not accompanied by new sentences. If the parole was not formally revoked, that is, the parolee was held only temporarily pending a hearing, no admission occurred for NPS purposes.

Other conditional release violators only, no new sentences—Same as above, substituting conditional release violator for parole violator.

Transfers from other jurisdictions--Includes all inmates transferred to this State's jurisdiction to continue sentences already in force. Does not include admissions if State does not acquire jurisdiction. Does not include movements from prison to prison within State.

Absent without leave (AWOL) returns, with or without sentences--Includes all returns from AWOL, that is, failures to return from authorized temporary absences such as work furlough, study release, mercy furlough, or other authorized temporary absence.

Escapee returns, with or without new sentences--Includes all returns from escape, that is, unlawful departures from a State correctional facility or from the custody of State correctional personnel.

Returns from appeal/bond--Includes all inmates reinstated to correctional jurisdiction from long-term jurisdictional absences on appeal or bond. Does not include returns from short-term movements (less than 30 days) to court (that is, where the State retains jurisdiction).

Other admissions--includes all other admissions not covered by the above categories.

### Releases

Unconditional--An unconditional release occurs only if the released inmate cannot be imprisoned for any sentence for which he was in prison.

Expirations of sentence--includes all inmates whose maximum court sentences minus credits have been served.

Commutations--includes all inmates whose maximum sentences have been changed (lowered) to time served to allow immediate unconditional release.

Other unconditional releases--Includes all other unconditional releases not covered by the above categories.

Conditional--A conditional release occurs if the released inmate, upon violating the conditions of release, can be imprisoned again for any of the sentences for which he/she was in prison.

Probations--Includes all inmates who have been placed under probation supervision and conditionally released; includes all shock probation (split sentence) releases.

Supervised mandatory releases--Includes all inmates who must, by law, be conditionally released. This type of release may also be called mandatory conditional release.

Paroles--includes all inmates conditionally released to parole.

Other conditional releases--includes all other conditional releases not covered by the above categories.

Death:

Executions--Self-explanatory. Illness/natural causes--Self-explanatory.

Suicides--Self-explanatory.
Accidental injury to self--Includes
all inmates who accidentally cause their own
deaths (for example, a fall from a ladder,
mishandling electrical equipment).

Death caused by another person--includes all inmates whose deaths were caused accidentally or intentionally by another inmate or prison personnel.

Other deaths--includes all other deaths not covered by the above categories.

### Other releases:

Absent without leave (AWOL)--Includes all failures to return from an authorized temporary absence such as work furlough, study release, mercy furlough, or other authorized temporary absence.

Escapes from confinement--Includes all unlawful departures from a State correctional facility or from the custody of State correctional personnel.

Transfers to other jurisdictions--includes all inmates who were transferred from one State's jurisdiction to another to continue sentences already in force. Does not include the release if State does not relinquish jurisdiction. Does not include movements from prison to prison within State.

Releases to appeal/bond--Includes all inmates released from correctional jurisdiction to long-term jurisdictional absences on appeal or bond. Does not include short-term movements (less than 30 days) to court (that is, where the State correctional system retains jurisdiction).

Other releases--Includes all other releases not covered by the above categories.

### Race

White--A person having origins in any of the original peoples of Europe, North Africa, or the Middle East.

Black--A person having origins in any of the black racial groups of Africa.

American Indian or Alaska Native--A person having origins in any of the original peoples of North America, who maintains cultural identification through tribal affiliation or community recognition.

Asian or Pacific Islander--A person having origins in any of the original peoples of the Far East, Southeast Asia, the Indian Subcontinent, or the Pacific Islands. This area includes, for example, China, India, Japan, Korea, the Philippine Islands, and Samoa.

Other--Any other race not covered by the above categories.

Not known--Any inmate whose racial origin is unknown.

### Ethnic origin

Hispanic--A person of Mexican, Puerto Rican, Cuban, Central or South American or other Spanish culture or origin, regardless of race

Not Hispanic--A person not covered by the above category.

Not known--Any inmate whose ethnic origin is unknown.

### Capital punishment explanatory notes

The statistics reported for capital punishment may differ from data collected by other organizations. The differences occur for a variety of reasons.

- (1) Inmates under sentence of death are originally added to the National Prisoner Statistics (NPS) counts when they enter correctional facilities rather than when judges pronounce sentence.
- (2) Following the year when prisoners are first counted, their admissions or releases as a result of court order are attributed to the

year for the sentence or court order. For example, a prisoner sentenced in November 1987 and entering prison custody in January 1988 would be counted as an admission in the 1988 report; the 1989 report would count him or her as being under sentence of death at yearend 1987. Similarly, a prisoner whose sentence is overturned in 1987 but who remains in the count until 1989 when the court's decision is reported would be subtracted from the 1987 and 1988 reports.

(3) NPS counts of persons under sentence of death are always for the last day of a calendar year and thus will differ from more recent counts.

Correctional Populations in the United States, 1988, failed to include 18 inmates who either were reported late to the NPS program or were not in the custody of State correctional authorities at yearend 1988: Florida (1), Georgia (1), Missouri (1), Nevada (1), Pennsylvania (4), Ohio (2), Oklahoma (7), and Tennessee (1). Twenty-five inmates had sentences of death removed in 1988 but were not reported: Alabama (1), Arizona (4), California (1), Florida (9), Georgia (1), Illinois (3), Louisiana (1), Mississippi (1), North Carolina (1), Pennsylvania (1), South Carolina (1), and Tennessee (1).

In 1989, five male prisoners of the Armed Forces were under a military death sentence for murder.

### Jurisdictional explanatory notes

Differing legal and administrative requirements as well as diverse record keeping practices among jurisdictions hamper efforts to collect uniform nationwide data on the number and movement of inmates in State and Federal correctional institutions. Not all jurisdictions are able to provide information that meets NPS definitions. For some, the discrepancies between reported data and the criteria are minor, but in others these discrepancies are more serious and, overall. serve to limit the comparability of data among jurisdictions. Limitations in State data, of course, carry over into regional and national figures, which, as a consequence, should be viewed as providing an order of general magnitude rather than precise totals.

The notes that follow identify deviations from the category definitions used in the 1989 questionnaire, provide details on the content of "other" admission and release categories, and specify revisions to data that should be taken into account when comparing 1988 and 1989 figures. State inmates housed in local jails are generally considered to be under State jurisdiction. Exceptions to this rule are noted below. Some States included an adjustment residual in their admission or re-

lease figure in order to balance the yearend 1988 count with the yearend 1989 count.

Alabama--New court commitments: Include other conditional release violators with or without new sentences. Escapees and AWOL prisoners: Counted as a single category. Other admissions: Unspecified in the Alabama data system. Other conditional releases: Unspecified in the Alabama data system. Cause of death: Can specify only execution.

Alaska--New court commitments: Include other conditional release violators with or without new sentences. Transfers to and from other jurisdictions: Include custody transfers of inmates under Alaska's jurisdiction from and to Federal and Minnesota facilities. Total inmate population: Custody and jurisdiction counts include inmates in prisons and jails, which form an integrated system in Alaska. Race and ethnicity data were estimated.

Arizona--Population, admissions and releases counts: Based on custody data. Other unconditional releases: Court-ordered releases. Other conditional releases: Include supervised temporary releases, supervised discretionary releases and supervised work furloughs. Other releases: Include early releases to detainer and persons returned to prison pending a revocation hearing. The male/female breakdown for the 117 inmates housed in local jalls to ease overcrowding in prisons is estimated, based proportionally on admissions.

Arkansas -- Arkansas revised the previously reported Dec. 31, 1988, population of inmates with maximum sentences of more than 1 year. Sentencing information: Reported population with sentences of more than 1 year includes a small number of inmates with sentences of 1 year or less. Parole violators with new sentences: Include parole violators without new sentences. Conditional release violators with new sentences: Include conditional release violators without new sentences. Other unconditional releases: Courtordered releases. Other conditional releases: Comprised of persons released to supervision under the provisions of Arkansas' Act 309, 378, and 814. Race and ethnicity numbers were estimated.

California--Population, admissions and releases counts: Based on custody data. New court commitments: May include a small number of transfers from other jurisdictions. Conditional release violators with new sentences: Include some parole violators without new sentences. The category also includes supervised mandatory and parole releases returned to prison pending revocation hearings. Conditional release violators without new sentence: Include some parole violators and returns from supervised mandatory release with new sentence. Other admissions: Contain the difference between total admissions and the number in other admis-

sions categories. Unconditional releases, expirations of sentence: Include some court-ordered releases. Supervised mandatory releases: Include some releases to parole. Other releases: Contain the difference between total releases and the number in other categories of releases. Unsentenced inmates: Include civil commitments of narcotic addicts and county diagnostic cases. Hispanic prisoners: Include only Mexican-Americans. Other Hispanic prisoners were categorized as non-Hispanic.

Colorado--Sentencing information:
Reported population with sentences of more than 1 year includes a very small number of inmates with maximum sentences of 1 year. Jurisdiction counts for admissions, releases, and population characteristics: Exclude 401 men and 9 women housed in jails solely to ease prison crowding. Other unconditional releases: Court-ordered releases. Race and Hispanic origin: Numbers estimated.

Connecticut--New court commitments: May include a small number of prisoners returned from appeal or bond and some probation violators entering with or without new sentences. Other conditional release violators, with or without new sentences: Include former residents of halfway houses and participants in the supervised homerelease program. Unconditional releases, expirations of sentence: Include some releases to probation supervision. Other unconditional releases: Court-ordered releases and pardon discharges. Other conditional releases: Community residence releases under supervision similar to that for parolees. Unspecified causes of death: Unspecified in the Connecticut data system. Hispanic prisoners: Categorized as prisoners of unknown race. Total inmate population: Custody and jurisdiction counts include inmates in prisons and jails, which form an integrated system in Connecticut.

Delaware -- Delaware revised the previously reported Dec. 31, 1988, population of male inmates with maximum sentences of more than 1 year. Sentencing information, partially suspended sentences: Some prisoners serve sentences in which the term in prison is partially suspended, to be completed under probation. They were categorized with inmates sentenced to 1 year or more only when the prison portion of their sentences exceeded 12 months. As a result, the population and movement counts of inmates with maximum sentences of more than 1 year are understated, and the population count of inmates with 1 year or less maximum sentences is overstated. New court commitments: Include some conditional release violators other than parolees, with or without new sentences. Escapees and AWOL prisoners: Counted as a single category. Other admissions: Include those prisoners for whom a short-term movement became long term and a small number of admissions of unknown type. Unconditional releases, expirations of sentence: Include some releases to probation. Other unconditional releases: Court-ordered releases. Other releases: Include those prisoners for whom a short-term movement became long term and a small number of releases of unknown type. Total inmate population: Custody and jurisdiction counts include inmates in prisons and jails, which form an integrated system in Delaware. Other race: Include Puerto Rican and Mexican prisoners.

District of Columbia -- The jurisdiction revised the previously reported Dec. 31, 1988, population of inmates with maximum sentences of more than 1 year. Population, admissions and releases counts: Based on custody data. Sentencing information, partially suspended sentences: Some prisoners serve sentences in which the term in prison is partially suspended, to be completed under probation. They are categorized with inmates sentenced to 1 year or more only when the prison portion of their sentences exceeded 12 months. As a result, the population and movement counts of Inmates with maximum sentences of more than 1 year are understated, and the population count of inmates with 1 year or less maximum sentences is overstated. Sentencing information, short sentences: An undetermined number of inmates housed in neither the District of Columbia jail nor the detention center and having either no sentence or a maximum sentence of 1 year or less were included in the admissions, releases, and population counts of inmates with more than 1 year maximum sentences. As a result, the population and movement counts of inmates with maximum sentences of more than 1 year are overstated, and the population count of inmates with 1 year or less maximum sentences is understated. Parole and other conditional release violators: The total number is actual; the counts of men within categories of violation are estimated. The female parole violators are counted as having new sentences. Transfers from and to other jurisdictions: Transfers from mental hospitals and Federal facilities. Unconditional releases, expirations of sentence: Include some inmates with partially suspended sentences and those released to probation. Cause of death: No cause is specified in the District of Columbia's data system. Other transfers to other jurisdictions: Transfers to mental hospitals and Federal facilities. Jurisdictional population totals: Include unsentenced inmates held for the first time in the District jail or detention center. Total inmate population: Custody and jurisdiction counts include inmates in prisons and jails, which form an integrated system in the District of Columbia. Race: Numbers estimated.

Federal prisons--Sentencing information, partially suspended sentences: Some prisoners serve sentences in which the term in prison is partially suspended, to be completed under probation. They were categorized with inmates sentenced to 1 year or more only when the prison portion of their sentences exceeded 12 months. As a result, the population and movement counts of inmates with maximum sentences of more than 1 year are understated, and the population count of inmates with 1 year or less maximum sentences is overstated. New court commitments: Include other conditional release violators with new sentences. Parole violators with or without new sentences: The total number of parole violators is actual; however, the numbers in sentencing categories are estimated. Unconditional releases, expirations of sentence: Include some inmates with partially suspended sentences released subject to conditions of probation. Other unconditional releases: Include persons released by court orders, pardons, and clemency. Other unconditional releases: Include persons released by court orders, pardons, and clemency. Other releases: Include an adjustment for inmates counted as being admitted although they were already in the jurisdiction of a prison. Such prisoners had been released on writs or authorized temporary absences that became long term. Population total, unsentenced prisoners: Includes 1,837 men and 19 women held under the jurisdiction of the U.S. Immigration and Naturalization Service.

Florida--Population, admissions and releases counts: Based on custody data. Returns from appeal or bond hearings and other admissions: Contain the difference between total admissions and the number otherwise categorized. Include returns from authorized temporary absences on appeal or bond. Other unconditional releases: Include pardons, vacated sentences, and unconditional releases ordered by the Probation and Parole Commission. Other conditional releases: Include inmates released to supervised community release. Hispanic prisoners: Classified as prisoners of unknown race.

Georgia--Population, admissions and releases counts: Based on custody data. New court commitments: May include some prisoners returning from appeal bond. Parole violators with new sentences: Include parole violators without new sentences and other conditional release violators with or without new sentences. Escapees and AWOL prisoners: Counted as a single category. Other unconditional releases: Include fines, pardons, and suspended sentences. Other conditional releases: The Parole Board controls the conditional reprieve releases. Unspecified causes of death: Cannot specify cause that may include accidents. Jurisdiction population: Excludes inmates awaiting pickup from jails. Race: Numbers estimated. Black prisoners: Include all persons of a race other than white.

Hawaii--Category estimates: Jurisdiction and custody totals are actual counts. Admissions, releases, race, and Hispanic origin are estimated from information from Hawaii's Comprehensive Offender Monitoring and Program Assessment System. New court commitments: May include a small number of probation violators or escapees returned to prison with or without new sentences as well as returns from appeal or bond. Other releases: Include 5 administrative discharges and 5 of unknown type. Total inmate population: Custody and jurisdiction counts include inmates in prisons and jails, which form an integrated system in Hawaii. Unknown race: Includes Puerto Ricans, prisoners of other Hispanic origin, and inmates who identified more than one racial background; however, prisoners of part-Hawaiian ancestry were counted as Asians or Pacific Islanders.

Idaho-Idaho revised the previously reported Dec. 31, 1988, population of female inmates with maximum sentences of more than 1 year. The population count for Dec. 31, 1989, excludes 121 men and 9 women housed in jails solely to ease prison crowding. Escapees and AWOL prisoners: Counted as a single category. Other admissions: Include 4 inmates returned from Agreement on Detainer and 2 civil commitments. Other unconditional releases: Court-ordered releases. Cause of death: No cause is specified in Idaho's data system. Other releases: Include 4 inmates released to Agreement on Detainer. Racial and ethnic compositions are estimated based on history of percentages.

Illinois--Population, admissions and releases counts: Based on custody data. Data for inmates with sentences of more than 1 year include some inmates with 1 year maximum sentences. Conditional release violators with new sentences: Include some parole violators with new sentences. Other conditional release violators without new sentences: Include some parole violators without new sentences. Also include some returned violators with charges pending. Other admissions: Contain the difference between total admissions and the number in other admissions categories. Include transfers and prisoners returning from a release on medical furlough, writ appeal, or bond. Other unconditional releases: Court-ordered releases. Other releases: Contain the difference between total releases and the number in other categories of releases. Include transfers and prisoners leaving for a release on medical furlough, writ, appeal, or bond. Hispanic prisoners: Categorized as prisoners of unknown race.

Indiana--Population, admissions and releases counts: Based on custody data. Jurisdictional population: Exclude 633 male inmates awaiting pickup from local jails. Conditional release violators with new sentences: Include parole violators with or without new sentences and other conditional release violators without new sentences. Unconditional releases, commutations: The Parole Board determines the termination of sentences. Conditional releases, probations: Numbers estimated. Other conditional re-

leases: Releases to regulated community assignment.

Iowa--Population, admissions and releases counts: Based on custody data. Parole violators without new sentences: Include persons returned to prison to await a revocation hearing. Other admissions: Include safekeepers. Unconditional releases, expirations of sentence: Include prisoners who received executive commutations that free inmates immediately and unconditionally. Other unconditional releases: Court-ordered discharges. Conditional releases, paroles: Include prisoners remanded to prison prior to a formal revocation hearing at which they were returned to parole. Also included inmates released to parole by Conditional Commutation Orders. Hispanic prisoners: Categorized as prisoners of unknown race.

Kansas--Kansas revised the previously reported Dec. 31, 1988, population of inmates with maximum sentences of more than 1 year. New court commitments: May include a small number of prisoners returning from appeal or bond. Other conditional release violators, with or without new sentences: Include some probation violators who should have been categorized as new court commitments. Escapees and AWOL prisoners: Counted as a single category. Other conditional releases: Prisoners under supervision similar to that for parolees. Hispanic prisoners: Categorized as prisoners of unknown race.

Kentucky--Escapees and AWOL prisoners: Counted as a single category. Other admissions: Prisoners returned to prison by court. May include some prisoners returning from appeal or bond. Other releases: Courtordered releases, conditional or unconditional. May include some releases to appeal or bond.

Louisiana--Escapees and AWOL prisoners: Counted as a single category. Other unconditional releases: Include court-ordered releases, pardons, and good-time releases. Other releases: Inmates whose types of release were unknown at the time of data collection. Race: Distinguished as white or black. Ethnicity: Not included in Louisiana's data system.

Maine--Maine revised the previously reported Dec. 31, 1988, population of female inmates with maximum sentences of more than 1 year. Other conditional release violators: Returns from probation. Escapees and AWOL prisoners returned to prison: Counted as a single category. Other unconditional releases: Court-ordered releases. Other conditional releases: Releases to Intensive Supervision Program.

Maryland--Category estimates: The admissions, releases, and population totals are actual counts. Categories for admissions and releases are estimated by applying percentages from automated data to the totals that are made manually. The automated data count only inmates with maximum

sentences of more than 1 year, while the detailed categories in the manual data include inmates with maximum sentences of 1 year or less. New court commitments: May include a small number of prisoners returning from appeal or bond. Other conditional release violators: Patuxent work release inmates returned from halfway houses. Escapees and AWOL prisoners: Counted as a single category. Other unconditional releases: Court-ordered releases. May include a small number of releases to appeal or bond. Other conditional releases: Inmates from Patuxent Institution released to halfway houses.

Massachusetts--Population, admissions and releases counts: Based on custody data. Category estimates: The totals for admissions and releases are actual; the categories are estimated. New court commitments: Include some parole violators with new sentences and other conditional release violators with or without new sentences. Unconditional releases, expirations of sentences: Include some releases to probation. Other unconditional releases: Court-ordered releases. Total inmate population with sentences of more than 1 year: Offenders who are sentenced to local correctional facilities for terms up to 2 1/2 years are excluded from counts of population, admissions, and releases; however, they may be included in reports about the jail population. Total jurisdiction population: Excluded 365 men and 12 women housed in jails solely to ease prison crowding. Unknown race: The race of some Hispanics was not reported.

Michigan--Population, admissions and releases counts: Based on custody data. Transfers from other jurisdictions: Include transfers from mental hospitals. Federal prisons, and prisons in other States. May include other long-term admissions such as writs or medical cases. Returns from appeal or bond: Contain the net difference between movements to and from courts. Unspecified causes of death: Causes unknown at the time of data collection. Transfers to other jurisdictions: Include transfers from mental hospitals, Federal prisons, and prisons in other States. May include other long-term releases such as writs or medical cases. Releases to appeal or bond: Contain the net difference between movements to and from courts. Asian and Pacific Islander prisoners: Categorized as prisoners of unknown race. Hispanic prisoners: Include only Mexican-Americans who are also categorized as prisoners of unknown race. Other Hispanic prisoners are classified as non-Hispanic.

Minnesota--Parole violators with new sentences: Include other conditional release violators from supervised mandatory releases and work releases with new sentences. Parole violators without new sentences: Include other conditional release violators from supervised mandatory releases and work releases without new sentences.

Escapees and AWOL prisoners: Counted as a single category. Other unconditional releases: Include prisoners discharged after the Office of Adult Releases modified their sentences or after a court or executive order. May include some commutations. Other conditional releases: Work releases. Prisoners of unknown race: Eleven non-Hispanic men categorized as prisoners of unknown race. Hispanic prisoners and prisoners of unknown race: Include 79 men and 1 woman, Hispanic, categorized as prisoners of unknown race. Unsentenced prisoners: Include 1 hold for the U.S. Immigration and Naturalization Service and 43 holds for the U.S. Marshals Service.

Mississippi--New court commitments: Include a small number of shock probation violators. Other admissions: Inmates awalting a parole revocation hearing as well as returns from appeal or bond. Other unconditional releases: Court-ordered releases. Other conditional releases: Include supervised earned releases, Governor's suspensions of sentence, and Emergency Powers Act releases. Other releases: Inmates who went back to prison pending a parole revocation hearing that subsequently returned them to community supervision.

Missouri--New court commitments: Include some shock probation commitments. May also include other conditional release violators returned to prison. Parole violators without new sentences: Include some parole violators with new sentences. Escapees and AWOL prisoners: Counted as a single category. Other admissions: Include returns from appeal or bond and shock probation. Other releases: Include releases to appeal or bond, commutations, court-ordered releases, and shock probation.

Montana--Montana revised the previously reported Dec. 31, 1988, population of female inmates with maximum sentences of more than 1 year. Parole violators without new sentences: Include some other types of conditional release violators with new sentences.

Nebraska--Nebraska revised the previously reported Dec. 31, 1988, population of female inmates with maximum sentences of more than 1 year to include women at the work release center. Parole violators without new sentences, men: Include some parole violators with new sentences. Other unconditional releases; Court-ordered releases.

Nevada--New court commitments: May contain a small number of returns from appeal or bond. Escapees and AWOL prisoners: Counted as a single category. Hispanic prisoners: Categorized as prisoners of unknown race.

New Hampshire--New court commitments: Include some prisoners returned from appeal or bond and may include other conditional release violators with or without new sentences. Parole violators without new sentences: Include parole violators who receive new sentences after readmission to prison. Other unconditional releases: Court-ordered releases.

New Jersey--New court commitments: May include some transfers from other jurisdictions. Other admissions: Inmates housed in county facilities to ease crowding who have not yet been entered into the department's information system. Other conditional release violators without new sentences: Prisoners returned (some with new sentences) from the Intensive Supervision Program, an experimental program operated by the Administrative Office of the Courts. The program provides a sanction that in severity lies between incarceration and probation. The category may also include some conditionally released prisoners returned with new sentences. Escapees and AWOL prisoners: Counted as a single category. Other conditional releases: Prisoners released to the Intensive Supervision Program. Total custody population: Includes county assistance housed inmates. Other race: Hispanic inmates who are not classified as white or black.

New Mexico--Parole violators without new sentences: May include parole violators with new sentences. Other conditional release violators: Returns from community corrections program. Other conditional releases: Releases to community corrections programs.

New York--New York revised the previously reported Dec. 31, 1988, population of inmates with maximum sentences of more than 1 year. New court commitments: Include parole violators and other conditional release violators with new sentences. Transfers from and to other jurisdictions: Transfers from and to the Department of Mental Hygiene for psychiatric treatment. Other admissions: Types of admission unknown at the time of data collection. Unspecified causes of death: Causes unknown at the time of data collection. Other releases: Types of release unknown at the time of data collection. Hispanic prisoners and race: All Hispanic inmates, white and black are categorized as

North Carolina -- Population, admissions and releases counts: Based on custody data. Parole violators with new sentences: Include some parole violators without new sentences and some other conditional release violators with or without new sentences. Escapees and AWOL prisoners: Counted as a single category. Sentencing information, partially suspended sentences: Some prisoners serve sentences in which the term in prison is partially suspended, to be completed under probation. They were categorized with inmates sentenced to 1 year or more only when the prison portion of their sentences exceeded 12 months. Although the maximum sentences of all such prisoners were more than 1 year, nearly all of them were included with those prisoners having sentences of 1 year or less. As a result, the counts of population, admissions, and releases of inmates with more than 1 year maximum sentences are understated, and the population count of inmates with maximum sentences of 1 year or less is overstated. Other unconditional releases: Court-ordered releases. Paroles: Include some supervised mandatory releases. Other releases: Residual not accounted for in other categories; used to adjust the movement data to the yearend total. Category estimates, sentencing: Population totals are actual; however, sentence length populations of more than 1 year and 1 year or less are estimated.

North Dakota--New court commitments: Include some parole violators with new sentences. Other conditional releases: Court-ordered releases.

Ohio--Sentencing information: The yearend total of inmates with maximum sentences of more than 1 year includes some inmates with sentences of 1 year or less. New court commitments: Include some other conditional release violators with new sentences. Transfers: Include only prisoners transferred between prison and Ohio's Forensic Unit. Other unconditional releases: Sentences vacated by courts. Race and Hispanic origin: Actual counts only of jurisdictional inmates in Ohio's custody.

Oklahoma--New court commitments: Include an undetermined number of conditional release violators with or without new sentences. Sentencing information: The counts of population, admissions, and releases of inmates with maximum sentences of more than 1 year may include a very small number of inmates with sentences of 1 year. Escapees and AWOL prisoners: Counted as a single category. Other unconditional releases: Include legislative cap releases (Senate Bill 445). Deaths: An inmate on escape status died in a car accident. Other releases: Types of release unknown at the time of data collection. Race and Hispanic origin: Numbers estimated. Hispanic prisoners: Categorized as prisoners of unknown race.

Oregon--Parole violators without new sentences: Include some returned parolees whose revocation status was unknown at the time of admission. Escapees and AWOL prisoners: Counted as a single category. Other conditional releases: Court-ordered releases. Race and Hispanic origin: Numbers estimated.

Pennsylvania--Parole violators with or without new sentences: Include 1,601 men and 33 women returned to State incarceration by the Board of Probation and Parole. They entered on their original sentences and not as technical or convicted parole violators. Their count was divided between violators with new sentences and violators without new sentences according to the ratios of actual convicted or technical parole violators. Thus, 658 men and 14 women were categorized as parole violators with new sentences, and 943

men and 19 women were categorized as parole violators without new sentences. Other unconditional releases: Court-ordered releases. Conditional releases, paroles: Includes an undetermined number of men and women who had been admitted to prison for parole violations and then released after a revocation hearing on their original paroles. Other releases: Types of release unknown at the time of data collection.

Rhode Island--Sentencing information, partially suspended sentences: Some prisoners serve sentences in which the term in prison is partially suspended, to be completed under probation. They were categorized with inmates sentenced to 1 year or more only when the prison portion of their sentences exceeded 12 months. As a result, the population and movement counts of inmates with maximum sentences of more than 1 year are understated, and the population count of inmates with 1 year or less maximum sentences is overstated. Other admissions: Returned from erroneous release to probation. Other releases: Court-ordered releases. Total inmate population: Custody and jurisdiction counts include inmates in prisons and jails, which form an integrated system in Rhode Island.

South Carolina--New court commitments: Include a very small number of transfers from other jurisdictions. Other unconditional releases: Court-ordered releases and offenders who paid fines. Other conditional releases: Inmates released to the jurisdiction of the Department of Parole and Community Corrections under the Emergency Powers Act.

South Dakota -- South Dakota revised the previously reported Dec. 31, 1988, population of inmates with maximum sentences of more than 1 year.

Tennessee--Tennessee revised the previously reported Dec. 31, 1988, population of inmates with maximum sentences of more than 1 year to include inmates housed in local jails, solely to ease overcrowding. Total admissions and releases: Total counts are actual, detailed categories are estimated. Sentencing information: Include 52 men and 8 women with a year or less maximum sentence in the movement and population counts of inmates with a maximum sentence of more than 1 year. Parole violators with new sentences: Include parole violators without new sentences and other conditional release violators with or without new sentences. Escapees and AWOL prisoners: Counted as a single category. Releases to parole: Include some mandatory releases to supervision. Unknown race: Includes all inmates who are not classified as white or black. Ethnicity: Tennessee's data system does not distinguish Hispanic origin.

Texas--Population, admissions and releases counts: Based on custody data. Parole violators with or without new sentences: All parole violators reported as having

new sentences. Other conditional release violators with or without new sentences: All conditional release violators reported as having new sentences. Other admissions and other releases: Include an adjustment for inmates counted as being released even though they remained in the jurisdiction of a prison. Include prisoners returning from or leaving for long-term bench warrants and medical furloughs. Other unconditional releases: Court-ordered releases. Other race: Includes 9,088 men and 279 women of Hispanic origin.

**Utah**--Other unconditional releases: Includes inmates whose sentences were terminated by the Board of Pardons.

Vermont--Parole violators with or without new sentences: May include an undetermined number of other conditional release violators returned. Combined prison and jail populations: Numbers reflect the populations of an integrated jail and prison system. "Lockups" operated by some cities and counties are excluded. Population counts: Made Dec. 4, 1989. Race: Numbers estimated, with less than 0.5 percent of the men classified as non-white.

Virginia--Other admissions: Include parole revocations pending (both discretionary and mandatory), transfers, and returns from appeal or bond. Other unconditional releases: Administrative releases. Supervised mandatory releases and paroles: Include an undetermined number of persons who were returned to prison pending revocation of discretionary and mandatory parole, for whom no revocation occurred, who are being returned to parole or other supervised status. Also include releases to detainer. Unspecified causes of death: Cause of death not known at time of data collection. Prisoners housed in jails to ease prison crowding: Include those with outstanding warrants and those being held in jail.

Washington--Escapees and AWOL prisoners: Counted as a single category. Other race: Include inmates with mixed racial origins.

West Virginia--West Virginia revised the previously reported Dec. 31, 1988, population of inmates with maximum sentences of more than 1 year. Population, admissions and releases counts, men: Based on custody data. New court commitments, men: Include parole violators and other conditional release violators with new sentences. Conditional releases, probation, men: Include some releases to court jurisdiction of inmates declared unfit to remain in a particular minimum security facility. Other releases, men: Court-ordered releases for which conditions, if any, are unknown. Jurisdiction population total, men: Excludes some inmates awaiting pickup from jails where they were housed solely to ease prison crowding.

Wisconsin--Wisconsin revised the previously reported Dec. 31, 1988, population of inmates with maximum sentences of more

than 1 year. Transfers from other jurisdictions: An undetermined number of inmates may be included in other admissions categories. Other conditional releases: Special Action early releases. Other releases: Courtordered releases, for which conditions, if any, are unknown.

Wyoming--Population, admissions and releases counts: Based on custody data. New court commitments: May include a small number of administrative turnovers--the start of a consecutive sentence. Escapees and AWOL prisoners: Counted as a single category. Unconditional releases, expirations of sentence: May include a small number of administrative turnovers--the end of one sentence to be followed by another. Other releases: Releases to detainer. Other race, men: Includes Hispanic prisoners.

### Appendix 20

National Corrections Reporting Program, 1985 Methodology, offenses within categories, and jurisdictional explanatory notes

Note: The following information has been excerpted from the U.S. Department of Justice, Bureau of Justice Statistics, *National Corrections Reporting Program, 1985*, NCJ-123522 (Washington, DC: U.S. Department of Justice, 1990), pp. 6-9. Non-substantive editorial adaptations have been made.

### Methodology

The National Corrections Reporting Program (NCRP) sought to collect data on all prison admissions and releases and on all parole entries and releases for calendar year 1985. Thirty-six States and the District of Columbia provided data on prison admissions, releases, and parole entries for 1985. Thirty-six States and the Federal Bureau of Prisons provided data on discharges from parole in 1985. States participating in the program were Alabama, California, Colorado, Delaware, Hawaii, Illinois, Kentucky, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nebraska, Nevada, New Hampshire, New Jersey, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Virginia, Washington, West Virginia, Wisconsin, and Wyoming.

Multiple admissions or releases per person during the year were recorded as separate events. The NCRP data covered prisoners admitted to or released from custody regardless of the jurisdiction where the prisoner was sentenced. Persons who were sentenced to a State prison but were admitted to or released from the custody of a local jail were included in the NCRP.

Beginning in 1983 all sentenced inmates, including those with a sentence of a year or less, were counted. To assure greater comparability across jurisdictions, the 1985 report includes only inmates with a sentence of more than a year.

Data on sentence length refer to the offense with the longest sentence. Whenever a sentence had both a minimum and a maximum term, the maximum was used to define the sentence length. A life sentence was defined as any prison sentence with a fixed or maximum term of life in prison, regardless of the possibility of parole.

Time served refers to the amount of time spent in prison between the date of admission and the date of release or to the amount of time spent on parole between the date of prison release and the date of parole discharge. Time served in prison underestimates the actual time served because data on time spent in jail that was credited to the prison sentence for the current offense were not available for most inmates. All tables present data for time served in prison only.

On average, people spent about 3 months in jail prior to entering prison; adding this figure to the reported time served in prison may provide a better estimate of the actual time served in confinement. Additionally, time spent in jail is related to the seriousness of the offense. The more serious the offense, the more time a person is likely to spend in jail.

Total time under supervision was calculated by adding time spent in prison and time spent on parole. Once again, adding jail-time credits may provide a better estimate of the total time under supervision.

The medians were calculated from ungrouped data, since sentencing data do not conform to the standard assumptions permitting calculations from grouped data. Because nearly all sentences are multiples of 12-month units, the assumption of an even distribution of values within groups is not met. Therefore, a shift of only a few cases may increase or decrease the median by 12 months.

In contrast to the calculation of medians, mean sentence lengths excluded prisoners with a sentence of life in prison or death. Medians are sensitive to the uneven distribution of cases; means are strongly influenced by extreme values. Because of the limitations of each measure, both medians and means were reported for sentence length.

Time served data do not group at 12-month intervals. Both medians and means have been reported to provide a more accurate summary of the data.

### Offenses within categories

Each jurisdiction's offenses were recoded to a common set of offense codes. Attempts and conspiracies were included with completed offenses, except for attempted murders and conspiracies to commit murder, which were classified as assaults.

Offense types include the following offenses:

Homicide--murder, felony murder,
nonnegligent manslaughter, voluntary manslaughter, negligent manslaughter, involuntary manslaughter, and unspecified homicide.

Murder and nonnegligent manslaughter--murder, felony murder, nonnegligent manslaughter, and voluntary manslaughter.

Murder--murder and felony murder.

Manslaughter--negligent manslaughter, vehicular manslaughter, involuntary manslaughter, and negligent homicide.

Nonnegligent manslaughter--voluntary manslaughter, nonnegligent manslaughter, and aggravated manslaughter.

**Unspecified homicide--**homicide and homicide type not specified.

Kidnaping--abduction, kidnaping, and felonious restraint.

Rape--forcible rape, aggravated rape, and sexual intercourse without consent.

Other sexual assault--statutory rape, carnal abuse, gross sexual imposition by force, fondling, child molestation, and lewd acts with children.

Robbery--unarmed robbery, armed robbery, aggravated robbery, and forcible purse snatching.

Assault--attempted murder, simple assault, aggravated assault, aggravated battery, vehicular assault, and criminal injury to persons.

Other violent--extortion, intimidation, hit-and-run driving, child abuse, and criminal endangerment against a person.

**Burglary**--breaking and entering, burglary, and safecracking.

Larceny--theft, petty larceny, and grand larceny.

Motor vehicle theft--auto theft, conversion of an automobile, receiving and transferring a stolen vehicle, unauthorized use of a vehicle, and unauthorized entry of a vehicle.

**Arson**--arson and burning a thing of value.

Fraud--worthless checks, uttering, obtaining money be false pretenses, credit card fraud, fraud, forgery, counterfeiting, and embezzlement.

Stolen property--possession, transportation, receiving, or selling of stolen property.

Other property.-destruction of property, vandalism, criminal tampering, trespassing, entering without breaking, and possession of burglary tools.

**Drug possession--**possession or use of controlled substances.

**Drug trafficking**--importation, manufacture, sale, or delivery of controlled substances; possession with intent to sell.

Other drug--forging or uttering a false prescription for a controlled substance; possession of drug paraphernalia, unknown drug offenses, and violations of controlled substance acts where the type of violation was unspecified.

**Weapons**--unlawful sale, distribution, manufacture, transportation, or possession of a deadly or dangerous weapon.

Other public-order--escape from custody, court offenses, obstruction, driving while intoxicated, other traffic offenses, drunkenness, disorderly conduct, morals and

decency violations, commercialized vice, and liquor law violations.

Other offenses--juvenile offenses and unspecified felonies.

### Jurisdictional explanatory notes

### Hispanic origin

In Colorado, Michigan, and Oklahoma, Hispanics include Mexican Americans only. In New York, Hispanics include only

persons of Puerto Rican birth or parentage.
Federal data on Hispanic inmates were

Federal data on Hispanic inmates were not available for persons entering prison before July 1983.

### Education

Data on education in Maryland and Michigan include credits for education received after entering prison.

### Minimum prison sentence

Maryland did not report "minimum sentence" because there is no statute establishing minimum sentence.

### Admission date

Data on date of admission in New York, Texas, and Wyoming refer to the original admission date, rather than the most recent date, if inmates had been released and then returned.

For Federal offenders the date of sentencing is provided instead of the date of admission. This date is accurate for only new court commitments.

### Admission type

Colorado and Ohio--"new court commitments" includes some parole violators.

Minnesota--"new court commitments" includes probation violators.

Wyoming--"transfers" includes an unknown number of transfers within the State prison system.

Delaware--"transfers" includes inmates returned to Delaware after being tried in another State.

Massachusetts--"transfers" includes returns to prison after court appearance, temporary interstate transfers, transfers from other States, Federal transfers, transfers from county to State custody, and transfers from other secure facilities.

Nebraska--reported the following types of admissions: regular, multiple-offender, evaluator, Federal safekeeper, county safekeeper, and other. Since these could not be translated into the NCRP categories, they were coded as "missing/invalid data entries."

Oklahorna--reported only the following types of admissions: new court commitments,

transfers, and parole revocations with no new sentence.

**Tennessee**--data on admission type were only available for half the cases.

New York--there are no probation revocations because probation is considered a county function.

North Carolina--"probation revocation" includes persons whose parole status was pending.

Minnesota--"parole revocation with or without new sentence" includes mandatory parole violators returned and work release violators returned.

Pennsylvania--"parole revocation, no sentence information" includes parole revocation, with recommitment decisions pending.

North Carolina--"parole revocation, no sentence information" includes all parole violators with or without new sentences as well as pending parole revocations.

South Carolina--"parole revocation, no sentence information" includes revocation of "supervised furlough II releases" and Emergency Powers Act releases.

Texas--"parole revocation, no sentence information" and "mandatory parole revocation, no sentence information" include all parole revocations, with or without new sentences.

Wisconsin--"parole revocations, new sentence" and "parole revocation, no new sentence" include returns of inmates released early because of overcrowding.

New York--"mandatory parole revocation with or without new sentence" includes the return of inmates who were granted early release for goodtime served.

On parole release records in New York, data on admission type were reported only for parole violators with no new sentence.

North Carolina--"mandatory parole revocation, no sentence information" includes all mandatory parole violators with or without new sentences as well as pending mandatory parole revocations.

Pennsylvania--"escapees returned" are not considered escapes until returned from court.

South Carolina--"escapees returned" are not counted as admissions.

Texas--"not known" includes inmates returning from vocational or educational programs.

### Offenses

**Colorado**--offenses may include offenses added after admission if they are more serious than the admitting offense.

**Minnesota**--provides only one offense for each prisoner or parolee, which is the most recent, not the most serious.

North Carolina--reports only one offense per inmate, the offense with the longest maximum sentence.

Federal prisoners--only two offenses per inmate are reported, usually the two most

serious. If an inmate receives an additional offense after admission that is more serious than the original offenses, the inmate's record is updated to show that offense.

### Maximum sentence and total maximum sentence

Illinois, Maryland, and Wyoming-persons receiving indeterminate sentences were reported as "not known" on sentence length.

Virginia--three admission records, three prison release records, and a small but unknown number of parole records incorrectly coded death sentences as "not known."

### Prison release date

In the Federal prison system and Maryland, the prison release date on parole exit records is the date parole supervision begins, not the actual release date.

### Prison release method

Massachusetts--"parole board decision" includes some inmates released by the Massachusetts parole board to another parole board.

New York--"parole board decision" includes inmates who received a commutation or pardon.

North Carolina--"parole board decision" includes some inmates released by the Division of Prisons.

**Pennsylvania**--does not distinguish "parole board decision" from " mandatory parole releases."

South Carolina--on prison release records "parole board decision" includes inmates released from a Youthful Offenders Act sentence to a straight sentence and vice versa. On parole release records, " parole board decision" includes inmates released to supervised furlough.

Wisconsin--"parole board decision" includes early releases because of over-crowding.

New York--"mandatory parole releases" includes early releases for goodtime served.

Minnesota--"other conditional" releases consists of work releases.

Mississippi--"other conditional releases" includes split sentences, work releases, and supervised earned releases.

Ohio--"other conditional releases" consists of releases for educational or vocational purposes, inmates paroled or shock paroled, on detainer, and under interstate compact.

Oklahoma--"other conditional releases" consists of releases to a community treatment center.

Pennsylvania--"other conditional releases" consists of court-ordered paroles.

South Carolina--"other conditional releases" consists of persons released by the Emergency Powers Act. Texas--"other conditional releases" consists of conditional pardons.

Wyoming--"other conditional releases" consists of paroles to detainer. These are prisoners paroled under the authority of Federal immigration officials.

California Youth Authority--"other unconditional releases" includes discharges to Federal or other prisons.

Delaware, Maryland, Ohio, Texas, and Wyoming--"other unconditional releases" consists of court-ordered releases.

Minnesota--"other unconditional releases" consists of discharges of persons with indeterminate sentences by the releasing authority.

Mississippi--"other unconditional releases" includes shock probation, court suspensions, and court-ordered releases.

Nebraska--"other unconditional releases" consists of persons whose sentences were vacated.

Tennessee--"other unconditional releases" consists of unconditional releases to probation.

Ohio--"other releases" consists of inmates-at-large who did not belong to any other NCRP category.

Texas--"other releases" includes inmates released to attend vocational or educational facilities.

### Parole release method

The California Youth Authority's figure for "returned to prison or jail" includes only those inmates returned to the California Youth Authority.

In the **Federal prison system**, "discharged, completion of term" includes absconders.

Ohio--"discharged, completion of term" includes all parole releases because Ohio can only provide information for final releases.

Nebraska--parole exit file does not include parole violators returned to prison.

New York--"other releases" includes parole board decisions (discretionary after 3 years); court-ordered releases; new revocations, not pursued; and cases in the revocation process in which statutory requirements were not fulfilled.

Pennsylvania--"other releases" includes parole board case closures for persons who have reached their maximum expiration date and who are in one of the following categories: criminal charges pending, absconders, or returned to home State.

### Appendix 21

National Drug and Alcoholism Treatment Unit Survey (NDATUS) 1989, Main Findings Report Survey methodology, data limitations, and definitions of terms

Note: The following information was excerpted from the U.S. Department of Health and Human Services, National Institute on Drug Abuse and National Institute on Alcohol Abuse and Alcoholism, National Drug and Alcoholism Treatment Unit Survey (NDATUS) 1989, Main Findings Report (Rockville, MD: U.S. Department of Health and Human Services, 1990), pp. 1-8, A1-A9. Non-substantive editorial adaptations have been made.

### Survey methodology

The National Drug and Alcoholism Treatment Unit Survey (NDATUS) was conducted as of Sept. 30, 1989. The 1989 NDATUS was a joint effort between the National Institute on Drug Abuse (NIDA) and the National Institute on Alcohol Abuse and Alcoholism (NIAAA), with other Federal agencies also cooperating in the survey. The NDATUS is a national survey which is designed to measure the location, scope, and the characteristics of drug abuse and alcoholism treatment and prevention facilities, services, and activities throughout the 50 States, the District of Columbia, Guam, Puerto Rico and the Virgin Islands. The NDATUS is the only survey that includes private as well as publicly funded programs. Data collected from all treatment units include unit identification, type and scope of services provided, client capacity and utilization, selected client characteristics, sources of funding, and staffing. Prevention type facilities completed a partial survey. which includes data on unit identification and types and scope of services provided. Unless otherwise noted, all data are based on information collected as of Sept. 30, 1989.

The 1989 NDATUS was largely dependent on participation from the States to ensure proper identification of all existing active units, including new or closed units, and to assist in distributing and collecting the NDATUS forms from the participating units. Although the level of effort involved in reviewing and editing the NDATUS forms varied by State, a representative from each State attended formal training sessions to assure that he or she possessed sufficient expertise to perform the required survey functions and to provide assistance to the reporting units. To further clarify the reporting requirements, each State and reporting unit was provided a manual

containing item-by-item instructions and a glossary of definitions. On-site technical assistance was available and offered to all States. In three cases such assistance was requested and provided. In all other cases technical assistance to State staff was handled by telephone.

For this survey, an individual was counted as an active client if the following three criteria were met: (1) the individual had been admitted to treatment and a treatment plan had been developed; (2) the individual had been seen on a scheduled appointment basis at least once during September 1989; (3) the individual had not been discharged from treatment by Sept. 30, 1989. For inpatients and residential patients, this definition applied to active clients as of Sept. 30, 1989. For outpatients, individuals were to be counted as active if they received treatment between Sept. 1 and Sept. 30, 1989.

### Sample size

A total of 9.608 units reported data to the 1989 NDATUS. However, most of the data presented are restricted to the 7,759 units that provide actual treatment services to drug abuse and/or alcoholism clients. A total of 13,345 preprinted forms were mailed to the States for distribution to the programs or units. In addition, new units identified by the States were surveyed using blank forms. A total of 13,893 treatment and prevention units were surveyed. Of these units, 1,563 were either closed, reported at the program level, were no longer appropriate for inclusion in NDATUS (i.e., no longer served substance abuse clients), or reflected duplicate forms. Thus of the total surveyed 12,330 units were considered to be active units (although whether they are treatment units is not known where no response was received). Altogether, 9,608 units responded to the NDATUS, and 2,722 units did not respond. The 1989 NDATUS therefore had an overall response rate of 77.9 percent.

### **Data limitations**

There are certain procedural considerations and limitations which must be taken into account when interpreting the data from the 1989 NDATUS. The following issues should be considered:

While NDATUS attempts to obtain responses from all known treatment units, it is a voluntary survey. Consequently, it has less than a 100 percent response rate. While the response rate is believed to be very high among treatment units, it must be recognized that treatment units which did not respond to the survey are not reflected in the data presented.

Data on the number of reporting units from the 1989 NDATUS are not comparable to data collected prior to 1987 and do not correspond precisely to the 1987 NDATUS data. In the 1987 NDATUS, States were given the option of allowing units to report aggregate data at the administrative or program level rather than at the clinic level. This option had not been available in previous NDATUS efforts. Under the option, a program consisting of a number of clinics may now report data for the entire program on one survey form rather than submitting a separate survey form for each clinic in the program. Since each completed survey was counted as a single reporting unit, this optional change in reporting level had the effect of reducing the number of currently operating units when compared to previous NDATUS surveys prior to 1987. It should be noted that if the choice was made to report at the program level, then the program level entry was the only one that appeared in the National Directory. While the data on numbers of units were rendered incomparable between NDATUS efforts because of the optional change in reporting level, the data on numbers of clients were not affected by the change in reporting level. Client data were unaffected because capacity, clients in treatment, and client characteristics, etc., from all component clinics were included in the program level response. The choice to report at the program level was made either at the State level or by the units themselves. Thus the degree of reporting at the program level varied within and across States and probably varied between the 1987 NDATUS and the 1989 NDATUS.

Because NDATUS is based on a reference date, the data reported include only those clients who were in treatment as of Sept. 30, 1989. The definition of "in treatment" includes inpatients who were in the unit on Sept. 30, 1989 and outpatients who had been seen at least once during September 1989. Clients need not have actually been seen on that date to be reported but must have been currently enrolled in the treatment program. Exceptions to the reference point reporting procedures include data on funding, on the annual unduplicated client count, and on staffing. The first two of these items cover a 12-month period, and the third covers a onemonth period. The funding data, as discussed below, are based on a 12-month period that included the reference date; this period may vary from one unit to another. The unduplicated count of clients is the number of different clients a unit served in the 12-month period ending with Sept. 30, 1989; thus, it is only unduplicated within units. As clients could be treated at more than one unit reporting to NDATUS within the time period covered, tabulations of the unduplicated annual client count variable may, in fact, include some multiple counting. Staffing data include all staff who worked during the month of

September, regardless of whether they were still working on Sept. 30, 1989.

Since both drug abuse and alcoholism clients are reported in the combined units, it is necessary to unduplicate the count of combined units when totaling the data from units providing services to all drug abuse or all alcoholism clients. The clients can be summed, but the units cannot be totaled without counting the combined units twice.

Data on budgeted capacity by treatment modality (drug abuse) and type of care (alcoholism), especially in combined units, must be treated with caution. The inpatient or residential capacity is determined by the unit's total number of beds. However, it should be noted that in units providing multiple types of services, the same beds could be used by clients in different treatment modalities or types of care. Of greater concern is the problem of establishing a budgeted capacity figure for an outpatient unit, since some of the units responded that they had "unlimited capacity" or were unable to provide any estimate of outpatient capacity. Units that did not report budgeted capacity were excluded from the calculations of utilization rates. The utilization rate is calculated by dividing the actual number of clients by the budgeted capacity and reporting the result as a percentage.

Client caseload matrices for drug abuse and alcoholism treatment did not collect the same data items. The drug abuse matrix collected data by treatment modality and environment whereas the alcoholism matrix collected data by type of care and facility location. As units could provide multiple types of services, these matrices could contain multiple entries reflecting clients receiving different types of services. In such cases the data processing procedures ensured that the totals equaled the sum of clients receiving each type of service. Client demographic data were collected for drug abuse clients and alcoholism clients separately from the client caseload matrices. In the case of combined units, demographic data were collected separately for drug abuse clients and alcoholism clients. The total for each demographic category (i.e., age, gender, and race/ethnicity) was set equal to the number of clients reported in the client caseload matrix. Any initial discrepancy between the demographic total and the caseload total was included in the "unknown" demographic category. The "unknown" category, however, is excluded from any calculations based on demographic data.

In many combined units the patients' primary diagnoses did not allow a differentiation between alcoholism and drug abuse clients. In contrast to the 1987 NDATUS, however, no attempt was made to artificially allocate clients or other data between the alcoholism

and drug abuse categories; data were accepted as reported. Readers should bear in mind the underlying problem of dual diagnoses, since any procedure in handling the data will lead to a degree of arbitrariness in defining all of the drug abuse clients or all of the alcoholism clients. To avoid the loss of usable information, observations with missing, incomplete, or invalid information for individual items were retained and are excluded only from tabulations involving those items. Thus, the number of treatment units on which related tables are based varies somewhat from table to table.

The NDATUS is a census of units, not individuals. Readers are cautioned that data on client characteristics are aggregate attributes of the units and do not represent the characteristics of individual clients. Data collected in different matrices are only indirectly related. For example, data on patient characteristics were reported in a separate matrix from data on the sources of funding. Therefore, the relationship between the funding and the characteristics of the clients can only be analyzed indirectly.

Two tabulation conventions should be noted. First, tabulations of treatment facilities are based on facilities which reported either budgeted capacity or actual clients on Sept. 30, 1989. Second, tables showing utilization rates are based on data from facilities that reported budgeted capacity; units that reported actual clients but no budgeted capacity are excluded from these tables.

### **Definitions of terms**

Actual clients in treatment--The actual number of active clients being treated in each type of care/modality and facility location/environment as of Sept. 30, 1989.

Aftercare/followup services--Provided after the cessation of routine treatment or recovery services provided by the unit.

Aversive techniques--Behavioral approaches to the treatment of drug abusers or alcoholics that include the use of procedures which punish unwanted actions and behaviors.

Black (not of Hispanic origin)--A person having origins in any of the peoples of sub-Saharan Africa or Haiti who does not self-classify as Hispanic.

Budgeted capacity or capacity of treatment--The maximum number of individuals who could be enrolled as active clients as of Sept. 30, 1989 given the unit's staffing, funding, and physical facility at that time. For residential and other 24-hour care units, treatment capacity is equal to the number of beds available at the unit. For outpatient units, treatment capacity reflects the maximum active client caseload a unit could carry. This maximum caseload would depend upon such factors as the percentage of staff hours

devoted to direct client care, the average length of counseling sessions, and the frequency of client visits to the unit.

Child care services—Services which provide care for minor children of active clients, including supervised activities.

Crisis intervention services--Activities which provide information about the availability of services and/or provide services directly to a person on an outpatient basis when he/she is in a crisis situation. A hotline could provide this service by referring a person for emergency care or to an appropriate treatment unit.

Driving while intoxicated/alcohol safety action program (DWI/ASAP)--These programs are designed to educate or provide referral or treatment services to persons who are arrested for Driving While Intoxicated (DWI) or Driving Under the Influence (DUI). In California, these offenses are known as first offender and multi-offender drinking driver programs.

Early intervention services--These services are intended to encourage persons to seek early help for their alcohol and drug problems, provide crisis services, educate the helping professions to recognize persons with substance abuse problems and to offer appropriate services, and the like.

Employee assistance program (EAP) services--Services designed to assist employees in overcoming job performance problems. The program provides or arranges services for employees or their collaterals, which can include diagnosis, referral, counseling, education, treatment or rehabilitation, etc. The services can also include marketing of an employee assistance program.

Family counseling/therapy services--Services which are provided during the same session to members of a family/collateral group.

Group counseling/therapy services--Services which are provided to a group of clients by unit staff members. This would include but not be limited to psychotherapy, insight therapy, reality therapy, transactional analysis, and the various types of expressive groups.

Hispanic--A person of Cuban, Mexican, Puerto Rican, and all other Spanish cultures and origins, regardless of race (includes Central and South America and Spain).

Individual counseling/therapy services--Services which are provided to a client on a one-to-one basis by a unit staff member.

Outreach services--Outreach activities involve efforts in the community for early case-finding and early intervention services to drug and alcohol abusers. These services would also include efforts to educate various groups about drug and alcohol abuse.

Physical examination services--A medical examination by (or supervised by) a physician or other health professional to determine the status of an individual's health. Research services--Activities performed by unit staff to systematically collect and/or analyze empirical data based on the scientific model of developing knowledge.

Self-help group services--Independent support groups or fellowships organized by and for drug abusers, alcoholics or their collaterals to help members achieve and maintain abstinence from and/or cope with the effects of licit or illicit drugs and alcohol. Examples are Alcoholics Anonymous, Narcotics Anonymous, Women for Sobriety, Al Anon or other non-professionally led groups such as Al Anon-Adult Children of Alcoholics.

Teen suicide prevention services--Services for youth, family members, and peers designed to educate, prevent, or intervene in teen suicidal behavior.

Transportation services--A service designed to provide a client with the means to travel or to move from place to place by auto or bus or other conveyance.

Treatment unit--A facility having: (1) a formal structured arrangement for alcohol or drug abuse treatment or recovery using alcohol or drug-specified personnel; and (2) a designated portion of the facility (or resources) for treatment services; and (3) an allocated budget for such treatment services. A treatment unit must directly provide services to clients at the facility's location. The unit usually offers some form of initial evaluation or diagnosis of its clients and, thereafter, may include a wide range of different services, such as counseling, job placement, or other rehabilitation services. This is also referred to as a recovery unit in some States.

Unduplicated annual client count--The number of different clients a unit served in the 12-month period ending Sept. 30, 1989. This number is unduplicated only within units. As clients could be treated at more than one unit reporting to NDATUS at some time during the 12-month reference period, tabulations of the unduplicated annual count may in fact include some multiple counting.

White (not of Hispanic origin)--A
Caucasian person having origins in any of the
people of Europe (includes Portugal), North
Africa, or the Middle East.

# National Victims Resource Center

# provides vital information

The National Victims Resource Center (NVRC) is a national clearinghouse for victims information funded by the Office for Victims of Crime, U.S. Department of Justice. Like the Justice Statistics Clearinghouse, sponsored by the Bureau of Justice Statistics (BJS), the NVRC is one of several information resources maintained by the National Criminal Justice Reference Service (NCJRS). When you contact the NVRC, information specialists will provide you with access to the following resources:

- More than 7,000 victim-related books and articles covering child physical and sexual abuse, victims services, domestic violence, victim-witness programs, and violent crime included in the NCJRS data base.
- National victimization.
- Federally sponsored victim-related research studies.
- Names, addresses, and telephone numbers of people to contact for information and assistance.
- Information on State victims compensation programs funded by the Office for Victims of Crime.

# Learn About Victims Issues and Programs

From the clearinghouse you can get free publications, borrow hard-to-find publications, and buy selected videotapes. The NVRC information specialists can also conduct data base searches designed especially for your needs.

The NVRC is the single most comprehensive source of victim information: it can refer victims to programs that help soften the blow, ease their recovery from trauma, and educate them about the aftermath of crime.

OVC, NVRC information is now available on the NCJRS Electronic Bulletin Board. Call for additional details.

For your convenience, we now offer a toll-free telephone number.

If we can be of assistance, call us at

(800) 627-NVRC (6872) or (301) 251-5525 or 251-5519,

or write

National Victims Resource Center Box 6000-AJE Rockville, MD 20850

### **Bureau of Justice Statistics** reports

(Revised July 1991)

Call toll-free 800-732-3277 (local 301-251-5500) to order BJS reports, to be added to one of the BJS mailing lists, or to speak to a reference specialist in statistics at the Justice Statistics Clearinghouse, National Criminal Justice Reference Service, Box 6000, Rockville, MD 20850.

BJS maintains the following mailing lists:

- Law enforcement reports (new)
- Drugs and crime data (new)
- Justice spending & employment White-collar crime
- National Crime Survey (annual) Corrections (annual)
- Courts (annual)
- Privacy and security of criminal history information and
- information policy
  Federal statistics (annual)
  BJS bulletins and special reports
  (approximately twice a month)
  Sourcebook of Siminal Justice
- Statistics (annual)

Single copies of reports are free; use NCJ number to order. Postage and handling are charged for bulk orders of single reports. For single copies of multiple titles, up to 10 titles are free; 11-40 titles \$10; more than 40, \$20; libraries call for special rates.

Public-use tapes of BJS data sets and other criminal justice data are available from the National Archive of Criminal Justice Data (formerly CJAIN), P.O. Box 1248, Ann Arbor, MI 48106 (toll-free 1-800-999-0960).
