## STATISTICAL TABLES DESCRIBING THE BACKGROUND CHARACTERISTICS AND RECIDIVISM RATES FOR RELEASES FROM MASSACHUSETTS CORRECTIONAL INSTITUTIONS <br> DURING 1988

This report presents recidivism rates of offenders released from Department of Correction facilities during 1988. Some highlights from this report are:

- The recidivism rate in 1988 was $31 \%$. This is an increase from the rate for 1987 ( $28 \%$ ).
- The number of releases increased from 2,859 in 1987 to 3,164 in 1988, an increase of $11 \%$.
- The recidivism rate varied by security level of the institution from which the offender was released: $46 \%$ for maximum, $39 \%$ for medium, $30 \%$ for minimum, $18 \%$ for minimum/pre-release, $30 \%$ for state pre-release and $18 \%$ for contract pre-release.
- From 1987 to 1988 the recidivism rate for releases from maximum or medium security institutions increased from $36 \%$ to $40 \%$, and the recidivism rate for releases from lower security facilities increased from $20 \%$ to $21 \%$.
- The recidivism rate for males was $32 \%$, an increase from the 1987 figure of $29 \%$; and the rate for females was $25 \%$, an increase from last year's figure of $23 \%$.
- $\quad \Lambda$ mong males, the recidivism rate was $35 \%$ for those serving a Cedar Junction/State Prison sentence (compared to $32 \%$ for 1987 ), $40 \%$ for those serving a Concord/Reformatory sentence (compared to $34 \%$ for 1987 ), and $8 \%$ for those committed to other jurisdictions (e.g. county).
- Recidivists were returned for a variety of reasons: $19 \%$ for technical parole violations, $51 \%$ for parole violations involving a new arrest, $27 \%$ for re-incarceration on a new offense, $2 \%$ for probation violations, and one percent to await trial for a new offense.
- Offenders released by parole had a higher recidivism rate (39\%) than those who were released by a discharge or expiration of sentence ( $19 \%$ ).
- Offenders who were paroled following a parole violation had a higher rate of recidivism ( $65 \%$ ) than those who were first releases (24\%). Likewise, offenders who were discharged following a parole violation had a higher rate of recidivism (28\%) than those who were first releases (17\%).
- For males, those committed for property offenses had the highest recidivism rate (51\%). Females committed for property offenses had a recidivism rate of $28 \%$.
- The recidivism rate for those released with no prior adult incarcerations was lower (22\%) than for those released with a history of one ( $35 \%$ ) or more than one ( $42 \%$ ) prior adult incarcerations.
- The recidivism rate was higher for offenders with no furloughs prior to release (33\%) than the recidivism rate for individuals with one or more furloughs prior to release ( $14 \%$ ).

## I. Introduction

This report presents a statistical description of offenders released to the street from Massachusetts Department of Correction (DOC) facilities during 1988 with corresponding recidivism rates. This report presents recidivism statistics by the security level of the facility from which the offender was released. The maximum security facility is Cedar Junction. The medium security facilities include MCI-Concord, OCCC, MCI-Framingham, MCINorfolk, SECC-Medium, and NCCI. The minimum security facilities include Bay State C.C., Medfield, N.C.C., and SECC-Minimum. ${ }^{1}$ The facilities which combine minimum and pre-release populations are MCI-Lancaster, MCI-Shirley, Hodder House, MCI-Plymouth, MCI-Warwick, and Longwood Treatment Center. The pre-release facilities include state and contract pre-release facilities. The state pre-release facilities are Boston State PRC, South Middlesex PRC, Park Drive PRC, and Norfolk PRC. The contract pre-release facilities are Meridian House, McGrath House, Coolidge II, Griffin House, THP, Brooke House, Charlotte House, Hillside PRC, and Faith House.

Information contained in this report includes recidivism rates with regard to release variables, nature of present offense, personal background, criminal history, furlough participation, and release follow-up variables. Each table contains two types of information: (1) statistical data describing characteristics of offenders released from each security level during 1988; and (2) the rates of recidivism for each of the categories of the statistical data for these offenders.

1. SECC contains both medium security and minimum security. Of the 282 releases from SECC during 1988, 250 were from SECC-Medium and 32 were from SECC-Minimum. In the tables that follow, the releases from SECCMinimum are included in the "Minimum" column and the releases from SECC-Medium are included in the "Medium" column.

There are two general sections in this report. Section One discusses selected variables in relation to recidivisin rates. Where appropriate, comparisons are made between 1987 and 1988 rates. Section Two consists solely of statistical tables. In reading the tables, the reader should note the following: (1) the release population is divided according to the security level from which the offender was released; (2) N represents the number of releases who fall into the corresponiing category in the table; (3) Rec represents the number of releases who are recidivists; and (4) Rate (Recidivism Rate) represents the percentage of releases in that category who have recidivated. For example, upon referring to the first table on page 22 , the variable "Type of Release" is presented and the following kinds of information may be obtained: (1) the number of releases broken down by the security level of the releasing institution is presented horizontaliy; (2) the number of releases by type of release (expiration, parole, and GCD) is presented vertically; (3) of the 3,164 releases during $1988,1,835$ were released on parole, 1,214 were released by a certificate of discharge, and 115 were released by expiration of sentence; and (4) of the parole releases, 710 were recidivists (yielding a recidivism rate of $39 \%$ ).

During 1988, there were 3,164 releases from DOC facilities where the offender had been incarcerated in the DOC for at least 30 days. This included 2,486 males and 678 females. Any release of an offender who was incarcerated for less than 30 days or where the release was not to the community (i.e., released to a new sentence at a State, Federal or county facility, or released to and held on a warrant) was excluded from the sample. In the case of inmates transferred from houses of correction to Longwood T.C., the time spent in county facilities was counted towards the 30 days. An analysis of the cases excluded from the sample appears in Section VI, Technical Notes. The follow-up period is one year from the date of the offender's release to the community. A recidivist is defined as any release who returns to a state or federal correctional institution, or to a house of correction or jail during the followup period for 30 days or more. This includes parole violators as well as those offenders sentenced for new crimes. ${ }^{2}$

[^0]There were 3,164 releases to the street from the DOC during 1988. Of these, 969 offenders recidivated during the one year period following their release date, yielding a recidivism rate of $31 \%$.

## Type of Return

Table 1 presents the distribution of types of return for recidivists. Recidivists were returned for a variety of reasons: $19 \%$ for technical parole violations, $51 \%$ for parole violations involving a new arrest, $27 \%$ for commitments to a county house of correction or a DOC facility to serve a new sentence, $2 \%$ for violations of probation, and one percent were held in jail to await trial on a new offense.

The proportions within these categories are very different for male and female offenders. For males, $21 \%$ were technical parole violators, $58 \%$ were parole violators with new arrests, $18 \%$ were committed for new offenses, two percent were returned to custody for probation violations, and one percent were in jail to await trial on a new offense.

For females, $11 \%$ were technical parole violators, $17 \%$ were parole violators with new arrests, $70 \%$ were committed for new offenses, and two percent were returned to custody for probation violations.

## Time Until Return

Table 2 presents time until return by sex of the recidivist. Of the 969 recidivists, $56 \%$ recidivated within 6 months of their release, $24 \%$ between 6 and 9 months, and $20 \%$ between 9 months and 1 year.

For males, $7 \%$ recidivated within one month following their release, $18 \%$ between 1 and 3 months, $30 \%$ between 3 and 6 months, $24 \%$ between 6 and 9 months, and $20 \%$ between 9 months and a year after their release. This was similar for females, where $4 \%$ recidivated within one month of release, $18 \%$ between 1 and 3 months, $35 \%$ between 3 and 6 months, $25 \%$ between 6 and 9 months, and $18 \%$ between 9 months and a year after their release.

Table 1. Type of Return by Sex of Recidivist

| Type of Return | Sex of Recidivist |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Male |  | Female |  | Total |  |
|  | N | \% | N | \% | $\mathbf{N}$ | \% |
| Parole Violation - Technical | 169 | (21) | 19 | (11) | 188 | (19) |
| Parole Violation - New Arrest | 462 | (58) | 28 | (17) | 490 | (51) |
| Commitment - HOC | 90 | (11) | 1 | (1) | 91 | (9) |
| Commitment - DOC | 57 | (7) | 116 | (69) | 173 | (18) |
| Jail - Awaiting Trial | 10 | (1) | 0 | (0) | 10 | (1) |
| Probation Violation - Technical | 3 | (0) | 0 | (0) | 3 | (0) |
| Probation Violation - New Arrest | 11 | (1) | 3 | (2) | 14 | (1) |
| Total | 802 | (100) | 167 | (100) | 969 | (100) |

Table 2. Time Until Return by Sex of Recidivist

## Institution Released From

Table 3 shows the recidivism rate by institution and security level of the institution from which the inmate was released. 3 Releases ifom maximum security had the highest recidivism rate (46\%). Recidivism rates were lower for releases from medium security (39\%) and releases from lower security facilities: minimum (30\%), minimum/prerelease ( $18 \%$ ), state pre-release ( $30 \%$ ), and contract pre-release ( $18 \%$ ).

In comprison to recidivism rates for 1987 releases, the 1988 recidivism rates show increases in some security level categories and decreases in other categories. Increases in recidivism rates have occurred for releases from medium security institutions from $35 \%$ to $39 \%$, minimum security institutions from $25 \%$ to $30 \%$, and state pre-release institutions from $21 \%$ to $30 \%$. Decreases in recidivism rates from last year have occurred for releases from maximum security from $50 \%$ to $46 \%$, minimum/pre-release security institutions from $19 \%$ to $18 \%$ and for releases from contract pre-release facilities from $22 \%$ to $18 \%$.

## Furlough Program Participation

Table 4 shows that the recidivism rate was substantially lower for those who had received at least one furlough prior to release (14\%) than it was for those who had not been furloughed (33\%). Of the $\mathbf{3 , 1 6 4}$ offenders released during $1988,422(13 \%)$ received a furlough prior to release. The remaining eighty-seven percent had not participated in
3. Releases from Lemuel Shattuck Hospital are included in the following tables as releases from the institution they were in prior to placement at the hospital.

| Institution and <br> Security Level | Non <br> Recidivists | Recidivists | Total | Recidivism <br> Rate |
| :--- | :---: | :---: | :---: | :---: |
| Maximum |  |  |  |  |
| Cedar Junction | 71 | 61 | 132 | $46 \% \%$ |
| Sub-Total | 71 | 61 | 132 | $46 \%$ |
| Medium |  |  |  |  |
| Concord |  |  |  |  |
| OCCC | 100 | 77 | 177 | $44 \%$ |
| Framingham | 54 | 87 | 141 | $62 \%$ |
| Norfolk | 135 | 135 | 490 | $28 \%$ |
| SECC-Medium | 152 | 105 | 240 | $44 \%$ |
| NCCI | 117 | 98 | 250 | $39 \%$ |
| Sub-Total | 913 | 86 | 203 | $42 \%$ |
|  |  | 588 | 1501 | $39 \%$ |

Minimum

| Bay State | 14 | 5 | 19 | $26 \%$ |
| :--- | ---: | ---: | ---: | ---: |
| NCC | 50 | 18 | 68 | $26 \%$ |
| Medfield | 1 | 0 | 1 | $0 \%$ |
| SECC-Minimum | 19 | 13 | 32 | $41 \%$ |
| Sub-Total | 84 | 36 | 120 | $30 \%$ |

Minimum/Pre-Release

| MCI-Plymouth | 29 | 16 | 45 | $36 \%$ |
| :--- | ---: | ---: | ---: | ---: |
| MCI-Warwick | 39 | 22 | 61 | $36 \%$ |
| MCI-Shirley | 174 | 70 | 244 | $29 \%$ |
| MCI-Lancaster | 96 | 23 | 119 | $19 \%$ |
| Longwood | 377 | 21 | 398 | $5 \%$ |
| Hodder House | 35 | 12 | 47 | $26 \%$ |
| Sub-Total | 750 | 164 | 914 | $18 \%$ |

State Pre-Release

| Boston State Pre-Release | 52 | 20 | 72 | 28\% |
| :---: | :---: | :---: | :---: | :---: |
| Park Drive PRC | 32 | 14 | 46 | 30\% |
| Norfolk PRC | 31 | 12 | 43 | 28\% |
| South Middlesex PRC | 66 | 31 | 97 | 32\% |
| Sub-Total | 181 | 77 | 258 | 30\% |
| Contreet Pro-Release |  |  |  |  |
| Brooke House | 51 | , | 60 | 15\% |
| Griffin House | 2 | 1 | 3 | 33\% |
| Coolidge II | 15 | 3 | 18 | 17\% |
| T.H.P. | 52 | 10 | 62 | 16\% |
| McGrath House | 32 | 12 | 44 | 27\% |
| Charlotte House | 21 | 5 | 26 | 19\% |
| Hillside Pre-Release | 19 | 3 | 22 | 14\% |
| Meridian House | 2 | 0 | 2 | 0\% |
| Faith House | 2 | 0 | 2 | 0\% |
| Sub-Total | 196 | 43 | 239 | 18\% |
| Total | 2195 | 969 | 3164 | 31\% |

the furlough program prior to release. Compared to last yesr the proportion of individuals released from prison who had received a furlough prior to release has decreased from $24 \%$ in 1987 to $13 \%$ in 1988.

The recidivism rate also varied by security level of the releasing institution. Offenders released from a maximum or medium security institution who had never been on a furlough, had the highest recidivism rate ( $41 \%$ ), while offenders who were released from a lower security facility (minimum or pre-release) and who had been on at least one furlough had the lowest recidivism rate (9\%).

Similar trends are apparent when the data are disaggregated by sex. The recidivism rate was highest for males and females who had not participated in the furlough program, $36 \%$ for males and $25 \%$ for females. Recidivism rates were found to be positively associated with the security levels of the releasing institution. For males, the rate was lowest for offenders released from lower security who had participated in the furlough program ( $10 \%$ ), while the recidivism rate was highest for releases from maximum or medium security institutions with no prior furlough participation ( $47 \%$ ). The same pattern held true for females, although only small number of females have participated in the furlough progam.

## Type of Release

Table 5 shows recidivism rates by type of release and security level of releasing institution. Overall, the recidivism rate was higher for those released on parole (39\%) than for those who were discharged (19\%).

It is important to look at whether the offender had been paroled and subsequently returned as a parole violator on his/her present sentence prior to the 1988 release, or if the offender's 1988 release was the first release on his/her

Table 4. Recidivism by Furlough Program Participation, Sex of Offender and Security Level of Releasing Institution

## Security Level of Releasing Institution

|  | Maximum/Medium |  |  | Lower |  |  | Total |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Furlough Program Participation and Sex of Offender | N | R | $\mathbf{R R}$ | N | R | $\mathbf{R R}$ | N | R | RR |
| Males |  |  |  |  |  |  |  |  |  |
| No Furloughs | 1021 | 484 | 47\% | 1073 | 262 | 24\% | 2094 | 746 | 36\% |
| One or More Furloughs | 122 | 30 | 25\% | 270 | 26 | 10\% | 392 | 56 | 14\% |
| Subtotal | 1143 | 514 | 45\% | 1343 | 288 | 21\% | 2486 | 802 | 32\% |
| Females |  |  |  |  |  |  |  |  |  |
| No Furloughs | 481 | 134 | 28\% | 167 | 31 | 19\% | 648 | 165 | 25\% |
| One or More Furloughs | 9 | 1 | 11\% | 21 | 1 | 5\% | 30 | 2 | 7\% |
| Subtotal | 490 | 135 | 28\% | 188 | 32 | 17\% | 678 | 167 | 25\% |
| Total |  |  |  |  |  |  |  |  |  |
| No Furloughs | 1.502 | 618 | 41\% | 1240 | 293 | 24\% | 2742 | 911 | 33\% |
| One or More Furloughs | 131 | 31 | 24\% | 291 | 27 | 9\% | 422 | 58 | 14\% |
| Grand Total | 1633 | 649 | 40\% | 1531 | 320 | 21\% | 3164 | 969 | 31\% |

present sentence. The data in Table 5 show first releases to have consistently lower rates of recidivism than parole violators. For parolees, those who were first releases had a lower recidivism rate (24\%) than those who were parole violators ( $65 \%$ ). For offenders discharged from their sentence, the recidivism rate was lower for those who were first releases ( $17 \%$ ) than for those who were parole violators ( $28 \%$ ).

When the data were compared by security level of the releasing institution, the recidivism rate was $35 \%$ for first releases paroled from maximum or medium security institutions and $17 \%$ for first releases paroled from lower security institutions. For those paroled from maximum or medium security who were parole violators, the recidivism rate was $66 \%$, compared to $63 \%$ for those paroled from lower security who were parole violators.

The recidivism rate for offenders discharged by expiration of sentence or good conduct discharge was $26 \%$ for first releases from maximum or medium security and $9 \%$ for first releases from lower security. For those who were discharged, but were parole violators, the recidivism rate was $32 \%$ for those released from maximum or medium security and $15 \%$ for those released from lower security.

Table 6 shows recidivism rates by type of release for males and females. The overall recidivism rates are the same as the overall recidivism rates for Table 5, i.e., offenders released by parole have a higher recidivism rate than those released by expiration of sentence or good conduct discharge; and parole violators have a higher recidivism rate than first releases.

Males released by parole had a recidivism rate of $41 \%$ and males released by discharge had a recidivism rate of $17 \%$. For both types of release, the recidivism rates were lower for first releases than for parole violators. For females, those released by parole had a slightly higher recidivism rate (25\%) than those released by discharge (24\%). The recidivism rate for females was also higher for parole violators than for first releases.

Table 5. Recidivism by Type of Release and Security Level of Releasing Institution

| Type of Release | Security Level of Releasing Institution |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Total | 2486 | 802 | 32\% | 678 | 167 | 25\% | 3164 | 969 | 31\% |

## Offender Characteristics

Table 7 shows recidivism rates for male and female offenders by race, age at release, present offense, and prior adult incarcerations. Overall, females have a lower rate of recidivism (25\%) than males (32\%).

As shown in Table 7, Caucasian inmates had a recidivism rate of $26 \%$, Hispanic inmates had a recidivism rate of $34 \%$, and African American inmates had a recidivism rate of $42 \%$. This pattern was similar for males and females.

The section on age at release and sex of offender shows that younger offenders generally have higher rates of recidivism than older offenders. The 21 years and younger age group had the highest recidivism rate for both males ( $39 \%$ ) and females ( $38 \%$ ). The recidivism rates for the older age categories ( $40-49$ years, $50-59$ years, and $60-69$ years), were lower than the recidivism rates for the younger age groups, for males and females.

In terms of present offense, the recidivism rate was highest in the property offense category (43\%), followed by person offenses ( $37 \%$ ), drug offenses ( $26 \%$ ), sex offenses (24\%), and "other" offenses (14\%). Males committed for property offenses had the highest rate of recidivism (51\%) and those committed for "other" offenses had the lowest recidivism rate ( $9 \%$ ). Excluding the sex offense category, where the number of cases is too small to make any comparisons, the highest rate of recidivism for females was in the property offense category (28\%), and the lowest was in the drug offense category ( $22 \%$ ).

The final section of Table 7 on recidivism by prior adult incarcerations and sex of offender reveals a higher recidivism rate for those with a history of one or more prior adult incarcerations than for those with no prior adult incarcerations. Overall, the recidivism rate was $22 \%$ for offenders with no prior adult incarcerations versus a $35 \%$ recidivism rate for those with one prior adult incarceration and a $42 \%$ recidivism rate for those with two or more prior adult incarcerations. This pattern is similar for males and females. For males, those with no prior adult incarcerations had a $24 \%$ recidivism rate, while those with one prior adult incarceration or those with more than one prior adult incarceration had higher rates ( $36 \%$ and $44 \%$, respectively). Females with no prior adult incarcerations had a $15 \%$ recidivism rate, those with one prior adult incarceration had a $30 \%$ recidivism rate, and those with more than one prior adult incarceration had a $34 \%$ recidivism rate.

## VI. Technical Notes

This study draws its cases from a cohort of offenders released to the community from the Department of Correction during 1988 by parole, good conduct discharge, or expiration of sentence. From the original data file, 294 cases were excluded for purposes of the recidivism study. There are five reasons why cases were excluded: 1) an error in the data file, i.e., the person was not released or the release was not a parole, expiration, or discharge; 2) the offender was not released to the community but released to a from and after sentence or warrant; 3) the offender served less than 30 days in custody prior to release; 4) the offender died within 1 year of release; or 5) the offender was released to an immigration detainer or was deported.

It should be noted that in calculating time served, the day the person started serving their sentence and the day of release were both credited toward time served. For all releases serving their first period of incarceration in a DOC facility, time served starts on the day committed to the DOC and does not credit any time served in a jail, house of correction, or other correctional facility prior to commitment.

Table 8 shows an analysis of cases excluded from the study: $75 \%$ were cases where time served was less than 30 days; $15 \%$ were because the release was not to the community; $4 \%$ were due to data errors in the release file; $4 \%$ were dropped because the releasee was released to an Immigration \& Naturalization Service (INS) detainer, or deported, and less than $1 \%$ due to death of the releasee.

Due to the large proportion of females that were excluded from the analysis because their time served was less than 30 days, a subsequent analysis was conducted to determine what impact the inclusion of these cases might have on recidivism rates.

Follow-up information was collected on the 207 females. Forty-two of the cases were reincarcerated for 30 days or more within a year of their release. Table 9 shows that if these cases had been included in the study, the overall recidivism rate would decrease from $31 \%$ to $30 \%$, and the recidivism rate for females would decrease from $25 \%$ to $24 \%$.

Table 8. Reason for Exclusion by Commitment Institution, 1988 Releases

| Reason for Exclusion | Commitment Institution |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Cedar Junction | Concord | Framingham | Total |
| Release File Error (Not released or Wrong Type) | 1 | 1 | 11 | 13 |
| Not Released to Community ( $\mathrm{F}+\mathrm{A}$, Warrant) | 14 | 2 | 28 | 44 |
| Served Less Than 30 Days | 6 | 9 | 207 | 222 |
| Died Within 1 Year of Release | 1 | 1 | 0 | 2 |
| Released to Immigration Detainer or Deported | 9 | 2 | 2 | 13 |
| Total | 31 | 15 | 248 | 294 |

Table 9. Recidivism Rates Including Females Where Time Served is Less than 30 Days

## Time Served

|  | 30 Days or More |  |  | Less Than 30 Days |  |  | Total |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Sex of Offender | N | R | RR | N | R | RR | N | R | $\mathbf{R R}$ |
| Male | 2486 | 802 | $32 \%$ | NA | NA | NA | 2486 | 802 | 32\% |
| Female | 678 | 167 | 25\% | 207 | 42 | 20\% | 885 | 209 | 24\% |
| Total | 3164 | 969 | 31\% | 207 | 42 | 20\% | 3371 | 1011 | 30\% |

[^0]:    2. Recidivism data were collected and coded for this study by Colleen R. O'Brien, Sandra A. Sansone, Elizabeth Boisvert, and Karen O'Brien Ahlers. Special thanks for their efforts.
[^1]:    *Includes Native Americans and Asians.
