Preface

This report has been compiled to provide a detailed statistical profile of the adult offenders within the Kansas correctional system and to describe offender commitment and release trends for the state.

Each year since Fiscal Year 1980, the data for this report have been obtained through an on-line computerized offender information system in which information is gathered systematically during the entire period that offenders are in the custody or control of the Department of Corrections. The number of offenders for which information could be obtained varies among the items of information being reported. For this reason, each percentage reported is based on the number of individuals for whom the data were available, and not necessarily on the total number in the population being described.

In accordance with Kansas Senate Bill 748, effective May 24, 1990, several correctional facilities were consolidated and/or renamed. Subsequent administrative actions taken by the Department of Corrections in August, 1990 and in June, 1991 resulted in further consolidation of facilities. In addition, two new facilities have opened recently, El Dorado Correctional Facility in June, 1991, and Larned Correctional Mental Health Facility in January, 1992. Table A contains a list of the current facilities and unit designations along with the prior names and designations. In addition to the facilities listed, inmates were also housed in FY 1992 at one contract work release facility (Topeka Halfway House), at Larned State Hospital (LSH), and in contract jail placement (CJP).

Introduction

The purpose of this statistical profile report is to summarize information regarding offender population levels, commitment trends, and characteristics of the offender population. The four major sections of the report include: a description of the pattern of growth in the offender population; a summary of admission and release activities occurring during Fiscal Year 1992; a detailed description of the characteristics of the inmate population confined on June 30, 1992; and a description of the June 30, 1992 population of offenders on supervised release. In the past several years there have been several modifications in Kansas criminal statutes which have produced significant changes in various attributes of the offender population. For this reason emphasis has been placed on comparisons of current information with that of prior years (particularly for data pertaining to type of criminal offense, sentencing patterns, and length of time served).

The detailed statistical tables and graphs of each section of the report are preceded by a summary of the highlights which identify significant trends and developments that occurred during FY 1992.

• • • • • SECTION I • • • • •

Offender Population Levels and Institutional Capacity for
Fiscal Year 1992

Components of the System-wide Offender Population

- Primary components of June 30, 1992 in-state inmate and parole population of 11,814 are as follows:
 - Inmates confined in Kansas correctional facilities numbered 6,193 or 52.4% of the population.
 - Kansas parole caseload -- Kansas offenders on parole/conditional release in Kansas and compact parole/probation cases supervised in Kansas --numbered 5,621 or 47.6% of the population.
- Additional offenders under management include 125 inmates either on in absentia or compact status, as well as 2,578 offenders on parole/conditional release under out-of-state supervision or on abscond status.

[SEE Table 1: Status and Physical Location of Offenders in the Correctional System: Comparison of June 30, 1991 and June 30, 1992 Populations -- page 5]

Inmate Population Trends

- Year-end inmate population increased in FY 1992, by 10% -- compared to decreases of 1% and 8% during the previous two fiscal years.
- The change in the month-end inmate population was relatively steady during FY 1992, with population increases in 10 of the 12 months.

- The average monthly change in inmate population has fluctuated markedly over the past 10 years.

<u>Fiscal Year</u>	<u>Average Monthly Change</u>
1983	31.8
1984	53.6
1985	42.1
1986	37.8
1987	55.3
1988	29.9
1989	13.3
1990	-41.3
1991	- 4.8
1992	47.8

[SEE Figure 1: Kansas Inmate Population: Fiscal Years 1983-1992 -- page 6; and

Figure 2: End-of-month Inmate Population: Fiscal Years 1991-1992 -- page 7]

Current Inmate Population

- On June 30, 1992 the total inmate population was 6,193, an increase of 574 (10.2%) from June 30, 1991.
- The number of inmates in facilities operated by the Department of Corrections was 6,075, an increase of 592 (10.8%) from FY 1991. The population in contract placement was 118, down 18 from 136 in FY 1991.
- The FY 1992 average daily population was 5,870, an increase of 144 (2.5%) from 5,726 in FY 1991.
- Update on inmate population levels since June 30, 1992:

	<u>Number of Inmates</u>		
	<u>KDOC Facilities</u>	<u>Contract Placements</u>	<u>Total</u>
June 30, 1992	6,075	118	6,193
July 31, 1992	6,103	111	6,214
August 31, 1992	6,056	105	6,161
September 30, 1992	6,038	101	6,139

- Total inmate population on September 30, 1992, was 6,139 -- down 54 from 6,193 on June 30, 1992.

[SEE Table 2: Number of Inmates Confined (Census) and Average Daily Population, FY 1991 and FY 1992 -- page 8]

Capacity of Correctional Facilities

- The total operating capacity, including placements in non-KDOC facilities, is 6,621.
 - The operating capacity total includes all 610 beds of the new central unit of the El Dorado Correctional Facility, which opened in June, 1991, and all 150 beds of the new Larned Correctional Mental Health Facility, which opened in January, 1992.
 - Of the total operating capacity, 376 beds have been designated for female occupancy.
- The capacity for placement of inmates at non-DOC facilities is 161. This total includes placements at Larned State Hospital, contract jail facilities, and a contract work release facility (Topeka Halfway House).
- Funding has been approved for the construction of a 75-bed maximum security housing unit for female inmates. The new unit will be located on the grounds of the Topeka Correctional Facility and is scheduled to open in early 1994.

[SEE Table 3: Operating Capacity of Correctional Facilities -- page 9]

Table 1

Status and Physical Location of Offenders in the Correctional System:
Comparison of the June 30, 1991 and June 30, 1992 Populations

<u>Status/Physical Location</u>	<u>Number of Offenders</u>		<u>Change</u>

*The Central Unit of El Dorado Correctional Facility is a new facility that began receiving inmates on June 17, 1991. Larned Correctional Mental Health Facility is a new facility that opened in January, 1992.

• • • • • SECTION II • • • • •

Admissions and Releases During Fiscal Year 1992

Information pertaining to admissions and releases of offenders during FY 1992 is summarized in this section. The basic data are presented in Table 4, the format of which is explained in the footnotes accompanying the table. Detailed information on court-related admissions to the system is presented by felony class of offense and county of commitment. Also included as part of this section is information on two topics which are central to the discussion of admissions and releases -- rate of parole and offender recidivism.

Summary of Admission and Release Activities

- In FY 1992, admissions increased and releases decreased from the levels observed in FY 1991.
- Total number of admissions during FY 1992 was 4,051, up 275 (7.3%) from FY 1991.
 - As in previous years, court commitments accounted for most of the admissions (69%).
- Total number of releases during FY 1992 was 3,490, down 367 (9.5%) from FY 1991.
- In recent years, return admissions for violations of parole and conditional release (no new sentence) have increased substantially and have accounted for larger proportions of total admissions. In FY 1992 returns with no new sentences accounted for over one-fourth (28%) of all admissions.

In the past two years, return admissions via violations for new sentences, which had accounted for smaller proportions of total admissions in previous years, have shown a substantial increase -- from 254 in FY 1990 to 325 in FY 1991 to 386 in FY 1992.

- Both types of violation together accounted for over one-third (37%) of all admissions in FY 1992.

Return Admissions for Violation of Parole or Conditional Release

<u>Fiscal Year</u>	<u>No New Sentence</u>		<u>New Sentence</u>	
	<u>No.</u>	<u>% of Total Admissions</u>	<u>No.</u>	<u>% of Total Admissions</u>
1983	202	8	240	10
1984	242	10	249	10
1985	254	11	158	7
1986	334	14	162	7
1987	393	15	197	7
1988	564	19	204	7
1989	715	20	238	7
1990	954	24	254	6
1991	982	26	325	9
1992	1130	28	386	10

[SEE Table 4: Admissions and Releases During FY 1992 -- page 14; and

Table 5: Yearly Admissions and Releases: FY 1983 - FY 1992 -- page 16]

Admissions by Court Actions

- The distribution of the FY 1992 court admissions by felony class is as follows:

<u>Felony Class</u>	<u>%</u>
A	1.2
B	7.4
C	28.5
D	26.8
E	36.1
Total	100.0

- The distribution of the FY 1992 court admissions by county of commitment indicates that as in prior years, the four most populous counties (Johnson, Sedgwick, Shawnee, and Wyandotte) collectively account for over half the total (56%).
- In FY 1992 there were 88 admissions of offenders under age eighteen at the time of offense, down 8 (8%) from FY 1991.

[SEE Table 6: Admissions by Court Actions, by Felony Class of the Most Serious Offense: FY 1983 - FY 1992 -- page 18; and

Figure 3: Number of Admissions by Court Actions: FY 1992 and Level of Change from FY 1991, by County -- page 19; and

Table 7: Number of Admissions of Offenders Under Age Eighteen at the Time of Offense, by Felony Class of Offense and Type of Offense: FY 1983 - FY 1992 -- page 20]

Rate of Parole

The information presented on rate of parole reflects Kansas Parole Board decisions only and not actual parole exits from correctional facilities. The length of the period of time between the decision to parole and the actual release varies among cases.

- The rate of parole fell sharply in FY 1992 -- to 45.6% from 57.9% in FY 1991. While the total number of decisions increased by 210 (5%), the number receiving parole decreased by 474 (18%).
- The rates of parole experienced in recent years are substantially lower than the estimated 80% parole rate for the early 1980's.

[SEE Table 8: Kansas Parole Board Decisions by Type of Decision (FY 1985 - FY 1992 -- page 21)]

Offender Recidivism

The rate of offender recidivism has been operationally defined by the Department as the rate of return to Kansas prisons by offenders released via parole or conditional release. In deriving the data on this measure each offender is tracked individually for the specified length of the follow-up period. Separate rates are calculated for those returning with new sentences and those returning with no new sentences. Table 9 contains a summary of the return rates for each yearly cohort of releases (Fiscal Years 1985 - 1991).

- "Combined failure rate" (combined returns via new sentence, no new sentence, and new commitment after discharge) for the release cohorts was as follows:

<u>Follow-up Period (years after release)</u>	<u>Range of Return Rates</u>
One	16% - 23%
Two	31% - 39%
Three	39% - 47%
Four	44% - 50%
Five	46% - 54%

- Note that most failures occur in the first three years post-release.
- In general there appears to be the same trend in these data as noted in the admissions and releases section of this report:

- Considerably higher rate of returns with no new sentences in recent years.

[SEE Table 9: Return Rate of Offenders Released Via Parole or Conditional Release During FY 1985 - FY 1991: By Type of Readmission and Length of Follow-up Period -- page 22]

Difference: Admissions Over Releases	561	----	561	----	----

* An "Initial" entry/exit represents the first entry by an offender during the period and/or his latest exit, with each individual counted only once as an entry and/or once as an exit. The "Subsequent" column includes the counting of offenders who were in confinement at the beginning of the period, but who were subsequently released and readmitted, thus remaining in confinement at the end of the period. This column also includes the counting of the additional release-admission transactions for offenders already counted in the "Initial" column. The "Total" column contains the sum of the "Initial" and "Subsequent" entries/exits.

**Within the "Subsequent" column, certain types of transactions involving temporary exit from a correctional facility have been excluded: Release to court/return from court (603 transactions) and escape/return from escape (29 transactions).

Remaining 93 Counties	4	30	154	189	247	624
FY 92 Total	33	199	764	717	968	2681

*Entries represent "Initial" admissions as defined in Table 4; see "Subtotals: Court Commitments" (FY 92 = 2712; FY 91 = 2591; FY 90 = 2734; FY 89 = 2579; FY 88 = 2249; FY 87 = 2112; FY 86 = 1953; FY 85 = 1852; FY 84 = 2049; FY 83 = 2062) less the number of admissions which the county and/or felony class was unknown at that time.

Figure 3
Number of Admissions by Court Actions:
FY 1992 and Level Change from FY 1991 by County*

KANSAS

*The top figure for each county is the number of "Initial" admissions as defined in Table 4 (all types of "Initial" admissions under the heading "Court Commitments"). The bottom figure represents the change in the number from FY 1991. For FY 1992 statewide, there were 2,712 such admissions (including 31 for which the county of admission was not available). Four counties (those projected on the map) collectively accounted for over half (56%) of the total.

1990	2961	56	1931	37	349	7	5241	100
1991	2684	58	1722	37	229	5	4635	100
1992	2210	46	2446	50	189	4	4845	100

*Source of information: Kansas Department of Corrections computer program "KPBTBL" (KPB decisions that occurred during the period specified). The number of paroles and passes reflect all such KPB decisions during the period (from version 1 of "KPBTBL" - "All KPB Decisions"). The number of continuances is the number of offenders whose latest KPB decision of the period was "continued" (from version 2 of "KPBTBL" - "Most Recent KPB Decision").

The tabled information reflects KPB decisions only and not actual parole exits from correctional facilities. The data include all decisions (whether by regular hearing, special minute, etc.) that were entered into the KDOC computer by KPB staff.

**Explanation of the types of KPB decisions rendered: "Parole" - parole granted; "Pass" - parole denied, a date is set for offender to be heard again; "Continue" - decision pending, a final decision will be made after further deliberation.

Table 9 (cont.)

Footnotes

- *The release population includes all offenders released via parole or conditional release during the fiscal year specified (excluding releases to detainees).
The follow-up period is applied individually for each inmate (release date plus the specified number of years in the follow-up period).

Explanation of row headings

Successes = no readmission to KDOC facilities during follow-up;

Violation, New Sentence = readmission to KDOC for a new felony offense;

Violation, No New Sentence = readmission to KDOC for violation of parole/CR that did not involve a new felony sentence.

New Commitment (After Discharge) = new admission to KDOC (after discharge from sentence obligation, but before the end of the follow-up period).

Abscond Status (End of Period) = offender was on abscond status as of the end of the follow-up period.

*Information not yet available (end date of follow-up period has not yet passed).

**In some instances it is possible for the number of "successes" during the year to be greater than that of a preceding year. Such instances arise in cases where offenders are on abscond status for a long period of time (counted in "Abscond Status" group), but later are reinstated on parole in good standing and then discharged. When such reinstatements occur, the affected offenders move from the absconder group to the success group for the latest year.

NOTE: Each percentage total is given as 100 even though the sum may vary slightly due to rounding.

• • • • • SECTION III • • • • •

Profile of the Inmate Population: June 30, 1992

This section provides a description of selected characteristics of the inmate population confined within Kansas correctional facilities on June 30, 1992, the last day of FY 1992. The focus of this profile information is on the demographic attributes and social backgrounds of the offenders, the nature of the offenses for which incarcerated, the sentences imposed, and the criminal histories of the offenders. The inmate population was composed of 5,865 males and 328 females, for a total of 6,193.

Characteristics of the Inmate Population

- The list below summarizes some of the basic characteristics of the inmate population on June 30, 1992. Each of the following characteristics was observed in a majority of the inmates upon admission to the correctional system (or, as in the case of "age" and "length of current confinement," the status as of June 30, 1992):
 - Sex - Male (95%)
 - Racial/ethnic Group - White (with 45% non-white)
 - Age - 32 or under (average age - 30.1)
 - Religion - Protestant (59%)
 - Formal Education - Less than high school or G.E.D. (52%)
 - Formal Vocational Training - None (77%)
 - Longest Period of Employment - One year or less (54%)
 - Type of Admission - New court commitment (70%)
 - Type of Offense (controlling minimum) - Person crime (58%)
 - Length of Sentence (minimum) - Five years or less (61%)
 - Duration of Confinement To-date (through 6-30-92) - 18 months or less
 - Prior Felony Convictions - None (61%)
 - Prior Felony Incarcerations - None (70%)
- There is considerable difference among the correctional facilities with regard to the demographic and criminal history characteristics of the inmate population housed. To a great extent this reflects the assignment of housing according to the security needs of the inmates, as well as their needs for particular correctional programs and services.

- Among offenders by felony class, the proportion with at least one prior felony conviction ranges from 35% for Class E to 44% for Classes A and B. The proportion with at least one prior felony incarceration ranges from 27% and 28% for Classes C and E, respectively, to 35% for Class A.
- The distribution of the population by inmate custody classification was as follows on June 30, 1992:

*Maximum	27%
Medium	35%
Minimum	<u>38%</u>
	100%

*Maximum category includes special management inmates.

- The distribution of the inmate population by substance abuse level (as determined by a standardized diagnostic appraisal conducted by psychologists under contractual arrangements) was as follows (date of June 30, 1992):

*Level		<u>Number</u>	<u>%</u>
0	No Usage Problem (abstainer or limited social usage)	510	9
1	Limited Usage (possible minor interference)	785	13
2	Occasional Abuse (some interference)	588	10
3	Episodic Abuse (interference, may have symptoms of early dependence)	1,385	23
4	Substance Dependence (history of continuous abuse with symptoms of dependence)	1,590	26
5	Substance Addiction (lengthy history of chronic abuse with symptoms of addiction)	<u>1,157</u>	<u>19</u>
Total (All Levels)		6,015	100
Information Unavailable		177	---

*The term "interference" is used in describing the degree to which substance usage has contributed to problems with the law, job, school, family, or other relationships.

[SEE Figure 4: Inmate Population, by Location: June 30, 1992 -- page 30; and

Table 10: Summary of Inmate Characteristics: June 30, 1992 Population -- page 31; and

Table 11: Inmate Characteristics: Comparison of the June 30, 1991 and June 30, 1992 Populations -- page 33; and

Table 12: Number of Previous Felony Convictions and Incarcerations by Felony Class of the Most Serious Offense: June 30, 1992 Population -- page 35]

Inmate Employment Status and Program Assignments

- On June 30, 1992, 4,757 or 78% of the 6,075 inmates in department facilities had full-time work, program, academic or vocational assignments. As a general rule, a full-time assignment means that a single work or program assignment occupies the inmate for more than half the work day, usually for 6.5 hours or more.
- Of the 1,318 inmates without full-time assignments:

- 668 were not available for assignment because they were in some type of segregation, treatment, orientation, or evaluation.
- 650 were not assigned because they were in transition between assignments, or because an assignment was not available on the specified date, or because they were unwilling or temporarily unable to be assigned.
- An additional 118 inmates were contract placements (Larned State Hospital, contract jail placement, and contract work release).
- The most common institutional assignments were of the following types: institutional support, maintenance, utility work detail, Kansas Correctional Industries, vocational or academic education, and evaluation status. Additionally, a large number of inmates housed at the smaller facilities were assigned to non-institutional work programs.

[SEE Table 13: General Employment and Program Status of Offenders in the Inmate Population as of June 30, 1992 -- page 36]

Comparison of Female and Male Inmate Populations

- As of June 30, 1992, the inmate population was 94.7% male and 5.3% female.
 - The women in the inmate population numbered 328, up sharply (36%) from 242 the previous year. It should be noted, however, that the 242 observed at the end of FY 1991 was a particularly low point, having dropped from 293 at the end of FY 1990.
- The average daily population (ADP) for FY 1992 is approximately double the level of ten years ago for both male and female inmates. The female ADP is 97% greater and the male ADP is 110% greater than in FY 1982, at which time the female ADP was 144 and the male 2,657. For the past three years there has been relatively little change in ADP for either group.
- As in the past several years, differences have been noted between the female and male inmates on almost all the characteristics compared. Proportionately speaking, in comparison to the male population the female population:
 - contained more inmates from minority racial/ethnic groups
 - had a higher level of formal education upon admission
 - had been committed for less severe offenses
 - had shorter average duration of current confinement
 - had less extensive criminal histories
 - fewer had prior felony convictions
 - fewer had prior felony incarcerations

[SEE Figure 5: Change in Average Daily Population: Male and Female Inmates, FY 1983 - FY 1992 -
- page 38; and

Table 14: Comparison of the Characteristics of Male and Female Inmates: June 30, 1992
Population -- page 39]

Characteristics of the New Admissions Population

Although the yearly turnover rate is relatively high among the offenders in the inmate population, at any point in time there is a large proportion of the group that has been counted in the yearly population for a number of years. For the past several years the characteristics of newly admitted offenders have been examined in order to better assess any trends toward change in the composition of the inmate population. Included as new admissions are new court commitments, aggravated juvenile delinquency commitments, and probation violators. Many offenders in this group are also members of the end-of-year inmate population since they were still on hand as of June 30, 1992. Note that the new admissions were not necessarily first-time offenders -- some had been incarcerated previously in other states or had served Kansas sentences from which they had been discharged.

- Compared to the June 30, 1991 inmate population, the FY 1992 new admissions population contained proportionately:
 - more offenders in the younger age groups
 - more women
 - more offenders with less serious offenses
 - fewer offenders with prior felony convictions
 - fewer offenders with prior felony incarcerations
- To some extent the differences noted are due to the type of offense and sentence length. The offenders with more serious offenses, extensive criminal histories, and longer sentences tend to accumulate in the inmate population. Thus, the population on hand contains proportionately more offenders with these and related characteristics than does the population of new incoming offenders.

[SEE Table 15: Characteristics of the New Admissions Population: Comparison of FY 1983 -
FY 1992 -- page 41]

Criminal Offenses and Sentence Structures

- Collectively, eight specific crimes were identified as the most serious offenses of just over half (51%) the inmate population:

<u>Offense</u>	<u>Class</u>	<u>No.</u>	<u>%</u>
Burglary	D/E	817	13.4
Aggravated Robbery	B	531	8.7
Theft	D/E	329	5.4
Murder I	A	355	5.8
Indecent Liberties/Child	C	335	5.5
Rape	B/C	259	4.2
Robbery	C	257	4.2
Aggravated Battery	C	<u>229</u>	<u>3.8</u>
Subtotal		3,112	51.0

- Offenders whose most serious offense was a drug crime numbered 867. This represents 14.2% of the population and reflects an increase of 19% from the corresponding figure for FY 1991 (731).
- Distribution of the inmate population by the minimum term of the controlling sentence shows that there is a nearly even split between those with minimums of under five years (49.4%) and those with minimums of five or more years (51.6%). As shown in the second part of Table 17 (cited below) this distribution has remained relatively stable over the past several years.

<u>Minimum (Years)</u>	<u>% of Population</u>
1	11.8
2	11.1
3	18.5
4	8.0
5	11.6
6-14	20.0
15 or more	<u>19.0</u>
	100.0

[SEE Table 16: Distribution of the Inmate Population by Felony Class and Criminal Offense: Comparison of Fiscal Years 1983 - 1992 -- page 43; and

Table 17: Structure of Controlling Sentences: June 30, 1992 Inmate Population (Comparison with Previous Years) -- page 50]

Average Length of Stay

- Average length of stay for FY 1992 parolees:

<u>Felony Class</u>	<u>Average Stay in Months</u>
A	180.0
B	51.5
C	21.4
D	11.1
E	8.1
All Classes	20.3

- The average length of stay was shorter by 1.2 months (6%) than last year.

<u>Fiscal Year</u>	<u>Average Stay in Months</u> <u>(All Felony Classes Combined)</u>
1983	16.2
1984	18.2
1985	19.3
1986	21.0
1987	22.9
1988	24.9
1989	28.3
1990	25.1
1991	21.5
1992	20.3

- For the FY 1992 admissions population, the overall projected average time to serve to earliest possible release, all felony classes combined, is 21 months. This represents an increase (0.9 months or 4%) from the average of 20.1 months previously projected for FY 1991 admissions.

[SEE Table 18: Average Length of Stay in Correctional Facilities, by Felony Class of Offense and Sentence Minimum: Offenders Paroled During Fiscal Years 1984 - 1992 - page 52; and

Table 19: Projected Average Length of Time to Serve to Earliest Possible Release Date: FY 1992 Admissions Population -- page 53]

Figure 4

*The population includes, in addition to inmates actually housed in correctional facilities on June 30, 1992, all offenders in the following physical locations: state hospital, contract jail placement, contract work release, out for medical care, and out on furlough. Excluded from the population are offenders out for court appearances, inmates serving Kansas sentences while housed in out-of-state facilities under compact agreement, inmates serving in absentia (inmates housed in other jurisdictions while serving Kansas sentences concurrently with sentences of other jurisdictions), escapees, offenders confined in local detention facilities, and all offenders on parole or probation status.

**All characteristics reflect status on June 30, 1992 (or time calculated from that date) except "Education Level" which is as reported upon admission. The total number of inmates for which information was available varies with the type of characteristic assessed.

Note: See Preface, pages vi and vii, for list of facility abbreviations.

Grand Total (All Facilities)	6193

*Source of information: 6-30-92 runs of "PGM-WRKASM" (computerized record of work assignments); segregation breakdown from "PGM-POPRP1". Detailed work/program assignment information is not yet available for some of the units within certain facilities.

**Information on the non-KDOC facilities (contract placements) is presented in Part 2 of this table.

***In addition to the full-time assignments tabled, many inmates participate in other programs on a part-time basis. Such part-time programs include certain courses in academic and vocational education as well as other services such as substance abuse, sex offender and mental health treatment and counseling.

Note: See Preface, pages vi and vii, for list of facility abbreviations.

*The offense described is the overall most serious offense of all active sentences for the inmate. The designation "A/C/S" (Attempt/Conspire/Solicitation) in the offense description denotes attempted crimes or in some cases to conspire to commit, or to aid, abet, advise, counsel, procure, or hire others to commit the crime.

Table 16 (cont.)

Footnotes (cont.)

**For the total number of inmates serving for this offense, add the corresponding unclassified offenses listed in the "Breakdown of Unknown Category."

***The offense of rape was changed from Class C to Class B on 7-1-1978; hence, there can be inmates serving under each of the two classifications.

****On May 17, 1984, the felony class of several offenses (including theft, theft of services, habitual giving of worthless checks, and forgery) was changed from D to E. Effective July 1, 1990, these same offenses, except for forgery, were reclassified according to a dollar value threshold (\$500 up to \$50,000 = Class E; \$50,000 or more = Class D). Also, the offense of burglary was reclassified (burglary of residences, business, etc., = Class D; of vehicles, etc. = Class E).

Number of Inmates (on which % is based)	3347	3957	4454	4884	5552	5921	6026	5578	5549	6123

*The controlling sentence is the range, in years, determined by the longest minimum and the longest maximum term to be served. The controlling minimum is the indicator for the parole eligibility date. The controlling maximum is used to project the conditional release date (the date of the maximum term less the statutorily earned good time) which indicates completion of the sentence obligation.

NOTE: Each percentage total is given as 100 even though the sum may vary slightly due to rounding.

*Excluded from the parolee population are those with sentence structures which involved consecutive sentencing and those paroled from in absentia status. The length of stay is the period of time from the date of admission to the date of release (thus excluding any jail credit or other credits applied to the sentence). The felony class of offense is the most serious offense associated with the offender's most recent admission and the minimum term associated with this same offense. Source of information: PGM-AVSTAS run 6-30-92.

**The number of parolees in the group is too small for the average stay to be representative. For purposes of calculating the overall average (all classes combined) an average length of stay of 15 years (180 months) was used for Class A cases in these instances.

***In these cases the average length of stay for each felony class was estimated from a frequency distribution consisting of the number of offenders falling within each category of range of months served.

Table 19

Projected Average Length of Time to Serve to Earliest Possible
Release Date: FY 1992 Admissions Population*

Felony Class by Minimum Sentence (Years)	Number of Offenders (Adjusted)**	Projected Average Time to Serve		Total Number of Years to Serve

Table 19 (cont.)

*Figures based on 3,459 admissions during FY 1992 (first admissions during the period per computer program PGM-ELNAS run 6-30-92. For purposes of this table, time to be served was calculated according to the good time provisions which were effective August 1, 1989 per Kansas Senate Bill 49. The maximum allowable earned good time has been applied in all cases. Thus, projected time to serve is the period from the sentence begins date to earliest possible release date.

**Represents the number of offenders remaining in the specified group after the estimated number of probationers is removed from the group. For each felony class, the probationers (total of 422 for all classes) are identified separately and assigned an average time to serve of three months (.25 years).

***Represents cases involving the application of consecutive sentencing. In such cases the sentence minimum used is twice the current lowest possible minimum for the felony class.

• • • • • SECTION IV • • • • •

Kansas Parolee Population, June 30, 1992

This section provides a brief description of the population of offenders in the correctional system who were on parole or supervised conditional release as of June 30, 1992. Also included is a summary of various parole-related activities occurring during FY 1992.

In years prior to FY 1987 the parole services caseload information that was described in this report was limited to that pertaining to clients in good standing. For the past several years there has been more detailed information available regarding the various categories of clients comprising the caseload. The parole officer caseload consists of Kansas offenders paroled to Kansas locations, as well as out-of-state parolees and probationers received by Kansas for supervision under interstate compact. There are no Kansas probationers included in the caseload since the supervision of this group has been a function of the district courts since July 1, 1979.

Composition of Parole Caseload

- As of June 30, 1992 there was a total Kansas caseload of 5,616 offenders under supervision of 70 Kansas parole officers.
 - The total Kansas caseload increased only slightly (2%) from FY 1991, but is still double the corresponding figure for FY 1987.
 - The average caseload per parole officer changed little -- from 79 in FY 1991 to 80 in FY 1992.
 - The group of 1,925 Kansas offenders under supervision out-of-state (including those with KDOC warrants), plus another group of 642 absconders, brings the total number of offenders managed by Kansas Parole Services to 8,183 -- up 166 (2%) from FY 1991.

[SEE Table 20: Composition of Offender Caseload Managed by Kansas Parole Officers: End-of-year Status, FY 1987 - FY 1992 -- page 57]

Characteristics of Kansas Parolees

- The basic profile information on the characteristics of the population of Kansas offenders on parole and conditional release in Kansas suggests relatively little change in the past several years.
 - One exception noted in recent years is a shift in the composition of the population with regard to felony class of offense.

Noteworthy is the substantial increase in the number and proportion of offenders in felony classes A, B and C (the more serious offenses). At the end of FY 1988, only 28% of the population was from A, B, and C collectively. The proportion has increased to 33% in FY 1989, 36% in FY 1990, 38% in FY 1991, and 39% in FY 1992.

- There are substantial differences between the parole population and the inmate population with regard to felony class of most serious offense:
 - Collectively, Class A and B offenders account for about 30% of the inmate population, but only about 11% of the parole population.
 - Class D and E offenders account for about 40% of the inmate population, compared to 63% of the parole population.

[SEE Table 21: Characteristics of Kansas Parolees Under Supervision in Kansas: June 30, 1992 -- page 58; and

Figure 6: Felony Class of Most Serious Offense: Comparison of Parole Population and Inmate Population -- page 60]

- As in previous years, the paroles and conditional releases occurring in FY 1992 were concentrated in a few counties/states:
 - Three counties (Sedgwick, Shawnee, and Wyandotte) collectively account for 67% of the total number of in-state paroles and conditional releases. Sedgwick County alone received 888 or 40% of the statewide total.
 - Three states (Missouri, Oklahoma, and Texas) collectively account for 55% of the total number of out-of-state paroles and conditional releases.
- Within the June 30, 1992 parole population there was a total of 1,375 out-of-state offenders being supervised in Kansas (439 parole cases and 936 probation cases). The number of such cases increased by 82 or 6% from FY 1991.
- As of June 30, 1992, there was a total of 1,947 Kansas cases being supervised out-of-state - again the majority (53%) in Missouri, Oklahoma, and Texas collectively.

[SEE Table 22: Kansas Offenders Paroled and Conditionally Released During FY 1992, by County or State to Which Released -- page 61; and

Table 23: Number of Compact Cases Serving Parole or Probation in Kansas on June 30, 1992, by Sending State -- page 63; and

Table 24: Number of Kansas Cases Serving Out-of-state Parole or Conditional Release: As of June 30, 1992, by Location -- page 65]

Absconders	363	409	396	539	599	642
Grand Total (All Categories)	4,026	4,589	5,499	7,106	8,017	8,183

*Source of information: Parole activities report (computer program "PGM-PARREP") run dates 7-7-87, 7-8-88, and 7-5-89, 6-30-90, 7-1-91, and 6-30-92. The caseload totals differ slightly from corresponding figures in other parts of this report (e.g. Table 1) because of differences in the way the computer programs categorize certain types of data.

**For FY 1990 - FY 1992 the figure represents only those officers who directly supervised clients. For prior years it represents all officers, including a few whose duties were primarily supervisory.

***Average caseload is based on the total Kansas caseload, including cases not yet assigned to parole officers.
