CHARACTERISTICS OF NEW COMMITMENTS

1991

This document describes the population of new court commitments to the New York State Department of Correctional Services during calendar year 1991. These tables present information on legal history characteristics of new commitments (e.g. crime, minimum sentence, prior criminal record) and demographic characteristics (e.g. age, sex, ethnic status, county of commitment). In addition, several tables show trends in new court commitments across the years 1988 through 1991.

DIVISION OF PROGRAM PLANNING, RESEARCH AND EVALUATION

1992

SUMMARY

1. Total number of admissions

There were 29,860 total admissions to the New York State Department of Correctional Services in calendar year 1991. Of these 24,116 (81%) were new court commitments, 3,401 (11%) were returned parole violators and 2,343 (8%) were other admissions (see Table 1.1, p. 5; Graphic p. 4).

2. Commitment Crime

The proportion of court commitments made up by drug offenders has grown dramatically in recent years. Drug offenders made up 37% (N=6,432) of court commitments in 1988, but they make up 45% (N=10,778) of new commitments in 1991. In general, 34% of 1991 new commitments were violent felony offenders, 45% drug offenders, 14% were committed for property crimes, 5% for other coercive crimes, and 2% were Youthful Offenders (see Table 2.1, p. 9 and Figure 2.1 p. 8).

3. Second felony offenders

Forty-four percent of 1991 new court commitments were sentenced as first felony offenders (N=10,653), 55% (N=13,238) as second felony offenders and 1% (N=225) as persistent felony offenders (see Table 3.1, p. 14; Figure 3.1 p. 13).

4. Average minimum sentence

The average minimum sentence for 1991 new court commitments was 36.5 months (the median was 24.0 months). For persons sentenced as a first felony offender the average was 36.6 months (median 18.0 months), for persons sentenced as a second felony offender the average was 34.7 months (median 24.0 months), the average for a persistent felony offender is 139.4 months (median 72.0 months) (see Table 5.2, p. 34). That the average minimum sentence for a second felony offender (34.7 months) is lower than that for a first felony offender (36.6 months) is due to the greater concentration of lower level class D and E offenders in the second felony group.

The average minimum term for legislatively designated violent felony offenders committed in 1991 was 54.1 months (median 30.0 months). For drug offenders the average was 30.2 months (median 24.0). For property and other offenders the average was 20.4 months (median 18.0 months) (see Table 5.2, p. 34).

5. Prior adult criminal record

Examining the prior adult criminal record of 1991 new court commitments, 12% had no prior adult arrest, 9% had a prior adult arrest but no conviction, 22% had a prior conviction but received a sentence other than jail or prison, 31% had served a prior local jail sentence, and 25% had previously served a state or federal term (see Table 6.1, p. 45 and Figure 6.1 p. 44).

6. Gender

Males made up 91% of 1991 new court commitments (N=21,852), females 9% (N=2,264) (see Table 2.1, p. 9 and Figure 8.1 p. 61).

The number of female offenders committed to state prison has grown substantially in recent years from 495 (4%) in 1985, to 1,014 (6%) in 1988, to 2,264 (9%) in 1991 (see Table 8.2, p. 63).

7. Race/Ethnic status

Whites made up 14% of 1991 new court commitments, blacks 50%, and Hispanics 35% (see Table 9.4, p. 69 and Figure 9.1 p. 65).

8. Age

The average age of 1991 new court commitments was 28.9 years. For males the average age was 28.7 years, for females 30.5 years (see Table 10.1, p. 81).

9. Region of the State

In 1991, 71% of court commitments were from New York City, 11% were from suburban New York City counties, 10% were from upstate counties with a population center of 50,000 or more, and 8% were from the remaining upstate counties (see Table 11.1, p. 93 and Figure 11.1 p. 92).

10. **Country of Birth**

Among 1991 new court commitments 76% (N=18,416) were born in the United States, 10% (N=2,513) in United States Possessions, 8% (N=1,982) in the island nations located in the Caribbean Sea, 2% (N=510) from nations in South America, and 3% (N=691) in other nations (see Table 12.1, p. 106 and Figure 12.1 p. 105). As a percentage of total new court commitments foreign born inmates have increased from 11.5% in 1990 to 12.9% in 1991 (see Table 12.1, p. 106).

11. **Education**

The average educational level (based on last grade completed as reported by the inmate) among 1991 new court commitments is 10th grade. Based on tests administered at reception to the Department, the average reading level is 7th grade, the average mathematics level is 6th grade (see Tables 13.1, 13.2, 13.3, pp. 111-112).

12. **Marital Status**

Seventy-four percent of 1991 new court commitments were not legally married, 17% were married, and 9% were divorced, widowed or separated (see Table 14.1, p. 116).

CHARACTERISTICS OF NEW COURT COMMITMENTS 1991

INTRODUCTION

This report is one of a series designed to make data available on the inmate population of the New York State Department of Correctional Services. The report presents basic descriptive information on selected characteristics of offenders admitted to Department custody as court commitments. Information on criminal justice system variables is presented (e.g., commitment offense type, prior adult criminal record) as well as information on demographic variables (e.g., ethnic status). In addition, at several stages in the report, commitments in 1991 are compared with commitments received in each of the three preceding years to determine whether any significant shifts have occurred over the period 1988 through 1991.

Section 1

TYPE OF ADMISSION

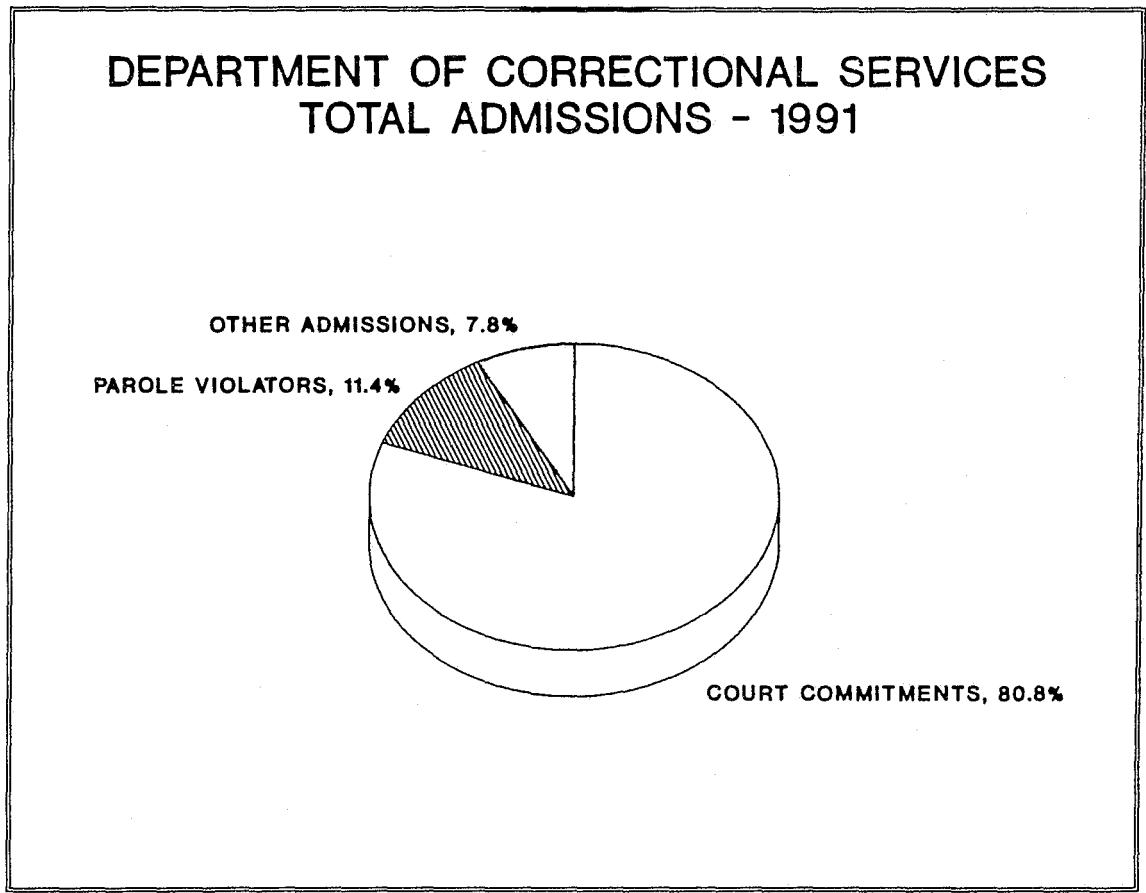

Individuals may be committed to state prison following conviction of a felony offense in a New York State court. For some offenses the court is required by law to hand down a sentence to a state correctional facility. For other felony offenses a period of incarceration in state prison is one of several sentencing alternatives available to the judge. The large majority (approximately 81%) of people admitted in 1991 to the New York State Department of Correctional Services were committed from county courts following conviction for a felony offense. Approximately 11% of admissions to state prison in 1991 were returned parole violators. The remaining 8% were admitted for other reasons. Figure 1 shows the proportion of admissions that fall into each of three general categories: (1) new court commitments, (2) returned parole violators, and (3) all other admissions. Each of these general categories is examined in detail.

New Court Commitments

Table 1.1 presents the number of 1991 admissions to state prison that fall into each specific admission category. These specific admission categories are grouped into three larger categories. The first of these larger categories is referred to as new court commitments and it comprises 80.8% (N=24,116) of total admissions. New court commitments are persons who have been convicted of a felony offense and are sentenced to state prison as a result of this conviction.

There are several subcategories in the new court commitment pool. The first group, labeled "new court commitments", are persons committed to state prison for conviction of a felony offense. Also included in the new court commitments group are people who were on parole at the time they committed the offense for which they were admitted to prison in 1991. Persons identified as "new term absconders from work release" in Table 1.1 are people who had been incarcerated on a previous conviction and had been approved for work release. These inmates absconded from the work release program and then committed a new crime. They are returned to state prison on the new conviction charge even though they were absconders from work release. There were also 21 individuals who were arrested while in the community on work release and these persons were returned to prison following conviction on the new charges. Finally, each year the Department receives a few persons who had been committed to the Division for Youth but at age 21 were transferred to the state correctional system to complete service of a juvenile offender sentence.

Returned Parole Violators

The second large category of admissions to state prison is made up of returned parole violators. Felony offenders committed to prison in New York State receive an indeterminate sentence which has a minimum term and a maximum term. Once an inmate has served the minimum sentence he or she may, at the discretion of the Board of Parole, be released to parole supervision. Except for people serving a life sentence and people who lose good time, once the individual has reached his or her conditional release date (defined as service of two-thirds of the maximum sentence) he or she must, by law, be released to parole supervision. The grant of parole may be revoked if the individual violates the rules that are a condition of release on parole. People whose parole status has been revoked are returned to state prison to continue service of the original sentence until such time as they are re-released by the Board of Parole, or until the inmate reaches his or her conditional release date, or the maximum expiration date of the sentence is reached. People returned for violation of parole made up 11.4% (N=3,401) of 1991 admissions.

Other Admissions

The third large category of admissions to state prison (labeled "other admissions", see Table 1.1) contains a range of different reasons for re-admission to state prison. "Returns from court ordered discharge" refers to individuals who had appealed the original conviction and while court proceedings were taking place the court had ordered the person to be discharged. People whose criminal charges (and sentence) were upheld by the appellate courts and who were returned to state prison fall into this category (N=102). "Returned escapees" (N=10) pertains to inmates who had escaped from Department custody and were then returned. Similarly, "returned absconders from work release" (N=1150) accounts for inmates who had been placed in the Department's work release program and who absconded from this program and were then returned to custody (approximately one-half voluntarily, one-half involuntarily).

Inmates transferred to Central New York Psychiatric Center for mental health services are passed to the legal custody of the Office of Mental Health. These individuals continue to earn time toward the service of their sentence. Inmates that are returned to the Department of Correctional Services from the Office of Mental Health are identified as "Returns from Office of Mental Health" (N=841). "Return from other agency" (N=12) refers to persons who were transferred from the Department to another state, to the federal system, or to other criminal justice agencies and who were subsequently returned to the Department. "Return temporary release arrest" (N=115) refers to inmates who were arrested while out on work release and then returned to Department custody. These inmates did not receive a new sentence prior to their return to DOCS' custody. There were an additional 107 admissions to the Department in 1991.

Section 2

COMMITMENT OFFENSE

The commitment crime for the 24,116 persons who were new court commitments to the Department of Correctional Services in 1991 is presented in Table 2.1 (see also Figure 2.1 p. 8). Commitment crimes are grouped into several larger categories the first of which is termed "violent felony". During a 1978 special session the New York State Legislature enacted laws designed to provide for more severe penalties for certain violent felony crimes (see N.Y.S. Penal Law Section 70.02). The Legislature designated certain crimes as "violent felony offenses" (e.g., Attempted Murder 2nd, Manslaughter 1st, Rape 1st, Robbery 1st, Assault 1st). The Legislature did not include Murder 1st (which has been declared unconstitutional), Murder 2nd, Kidnapping 1st and Arson 1st in the designated violent felony legislation because these crimes as class A-1 felony offenses already carry the most severe sentences ranging from 15 years to Life imprisonment. However, due to their violent nature, we include Murder 2nd, Kidnapping 1st and Arson 1st in the violent felony group.

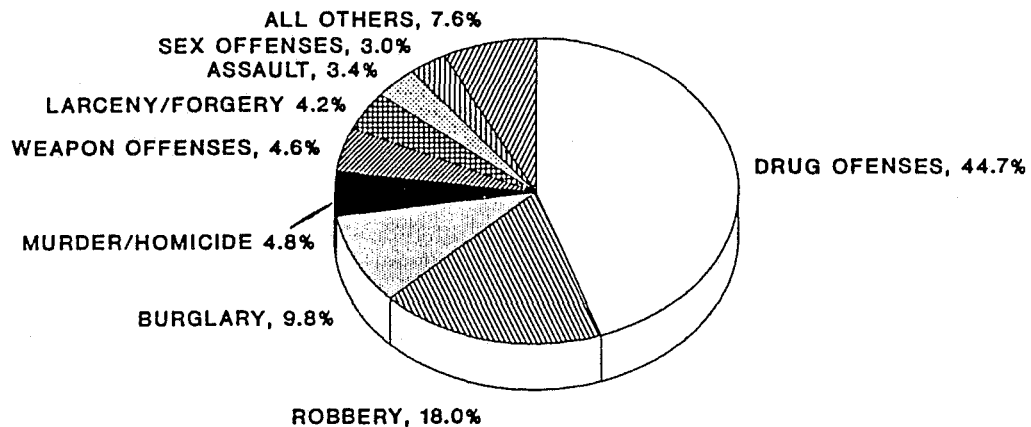

Persons convicted of violent felony crimes made up 34.5% (N=8,329 cases) of 1991 court commitments (see Table 2.1).

The second general category is labeled "other coercive" crimes. It includes crimes that are of a violent or coercive nature but were not designated by the legislature as violent felony crimes. These other coercive crimes made up 5.3% (N=1,280) of court commitments. The third category includes all felony classes of drug commitments. Forty-five percent (N=10,778) of 1991 court commitments were for drug offenses. The fourth general category is termed "property and other" and contains non-violent offenses such as Burglary 3rd, Grand Larceny, Forgery, Stolen Property, etc. Property and other felonies comprise 14.0% of 1991 new court commitments (N=3,314).

The last general category is Youthful Offenders who made up 1.7% (N=415) of commitments. Youthful Offenders are persons aged 16 to 19 at the date of the offense who were convicted of a felony crime but were subsequently granted Youthful Offender status by the court. (See New York State Criminal Procedure Law Section 720.10).

Gender Differences in Commitment Crime

Among men committed to state prison in 1991, 36.7% were convicted of a violent felony crime which compares with 14.1% of women (see Table 2.1). Men committed to state prison are more than twice as likely as women to have been convicted of a violent felony.

Women committed to state prison are, however, considerably more likely to have been convicted of a drug offense than are men. Seventy-two percent of females committed to state prison were convicted of a drug offense compared with 41.8% of males.

The population of persons committed to state prison in 1991 is predominately male. Females make up only 9.4% (N=2,264) of the 24,116 persons committed to state prison in 1991. It should be noted however that females as a proportion of total new court commitments have shown dramatic growth in recent years. They made up 5.1% of court commitments in 1987, 5.8% in 1988, 7.5% in 1989, 7.3% in 1990 and 9.4% in 1991 (see also Section 8 below, pages 60-63).

Shifts in Commitment Crime 1988-1991

The most salient change in commitment crime over the last four years is the increase in drug offenders. In 1988 there were 6,432 drug offenders committed to state prison, or 37.0% of total commitments (see Table 2.2). In 1991, however, there were 10,778 drug offenders committed to state prison or 44.7% of court commitments. While the number of drug offenders committed in 1991 (N=10,778) is about the same as that committed in 1990 (N=10,785), the percent of total commitments made up by drug offenders dipped slightly between 1991 (44.7%) and the previous year (46.7%).

The number of persons committed to state prison for violent felony offenses has steadily increased across the years 1988 (N=6,754) through 1991 (N=8,329).

Section 3

SECOND FELONY OFFENDER STATUS

The New York State Penal Law provides for more severe sentences for second felony offenders and for persistent felony offenders (see Appendix A). In addition, the penal law requires with some exceptions a mandatory state prison term for persons convicted of a second felony offense (see section 70.06 NYS Penal Law).

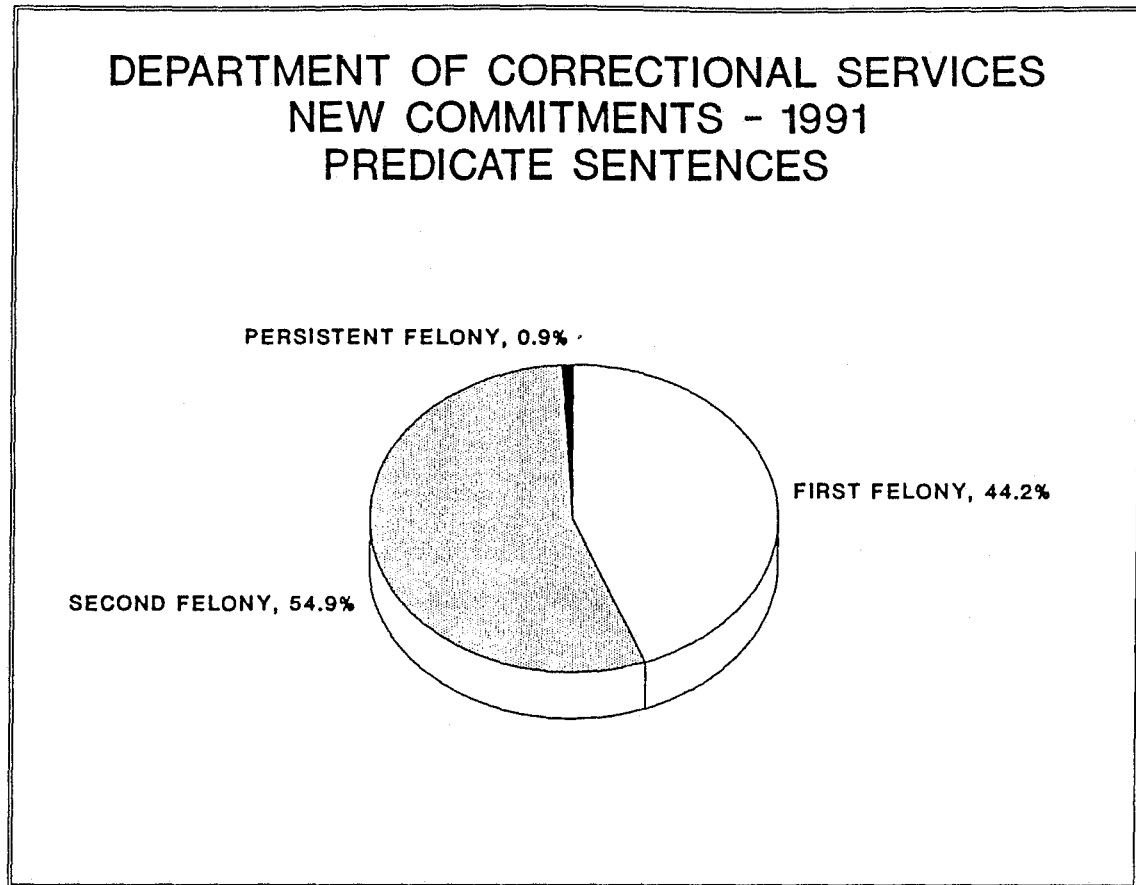

Among 1991 new court commitments 44.2% (N=10,653) were sentenced as first felony offenders, 54.9% as second felony offenders (N=13,238) and 0.9% (N=225) as persistent felony offenders (see Table 3.1 and Figure 3.1).

Those persons in Table 3.1 identified as second felony offenders are defendants who were sentenced by the trial court judge as a second felony offender. Some of those persons listed as first felony commitments have been convicted of prior felony crimes and some have previous sentences to state prison, but they were not sentenced as second felony offenders. This occurs because the statutes for class A-1 felony crimes do not contain provisions for sentencing as a second felony offender. The penalty for A-1 felony crimes is already the most severe so there is no need for additional enhancement in length of sentence.

There are differences in the percent of persons sentenced as second felony offenders in each general crime group. For example, 68.6% of those committed for property offenses were sentenced as second felony offenders as were 62.4% of persons committed for drug offenses. Among those committed for violent felony crimes, only 41.9% were sentenced as second felony offenders.

Table 3.2 also shows crime by second felony offender status except the percentages are based on felony offender status rather than commitment crime.

Increase In Second Felony Offenders Committed For Drug Offenses

Data on the number of persons committed to DOCS as a first, second, or persistent felony offender according to commitment crime for the period 1988 through 1991 is presented in Table 3.3. The proportion of commitments sentenced as a second felony offender grew from 50.7% in 1988 (N=8,810), to 54.9% (N=13,238) in 1991.

Among drug offenders committed to state prison the proportion sentenced as a second felony offender grew substantially from 1988 through 1991. In 1988, 52.9% of drug offenders were sentenced as a second felony offender; by 1991 62.4% of drug offenders were sentenced as a second felony offender (see Table 3.3). There were either small or no differences in the proportion sentenced as a second felony offender in other crime groups. In both 1988 and 1991, approximately 42% of violent felony offenders were sentenced as second felony offenders. In 1988 and 1991 approximately 58% of commitments for other coercive offenses were second felony offenders. Among property offenders there was a slight decline from 70.6% in 1988 to 68.6% in 1991. (See Table 3.4 for the percent of first, second and persistent felony offenders within each specific crime group).

Across the period 1988 through 1991, drug offenders showed more dramatic growth among those sentenced as a second felony offender than among those sentenced as a first felony offender. Drug offenders made up 35.8% of first felony offenders committed to state prison in 1988 and this increased slightly to 37.8% in 1991. Among persons sentenced as a second felony offender in 1988, 38.1% were drug offenders, however, by 1991, 50.1% of second felony offenders were committed for drug offenses (see Table 3.5).

Section 4

FELONY CLASS CATEGORY

In New York State felony offenses are classified into one of several felony class categories: Class A (including Class A-I, and A-II), Class B, Class C, Class D, Class E, and Youthful Offender. In general, more serious offenses are categorized as Class A, Class B, or Class C felonies and the less serious offenses are categorized as Class D or Class E felonies. There are still less serious offenses that are treated as misdemeanors or violations, but only those convicted of a felony may be sentenced to state prison. Conviction for an "attempt" of a particular felony offense generally drops the conviction into the next lower felony class category. For instance, Robbery 1st is a Class B felony offense, but "Attempted" Robbery 1st is a Class C felony offense as is Robbery 2nd. The felony class category of the conviction offense is relevant because the sentencing laws are based on the felony class category. That is, the range of minimum and maximum sentences that apply to conviction for a particular offense are governed, in part, by the felony class of the offense.¹ Appendix A contains a brief summary of the range of minimum and maximum sentences for each felony class category.

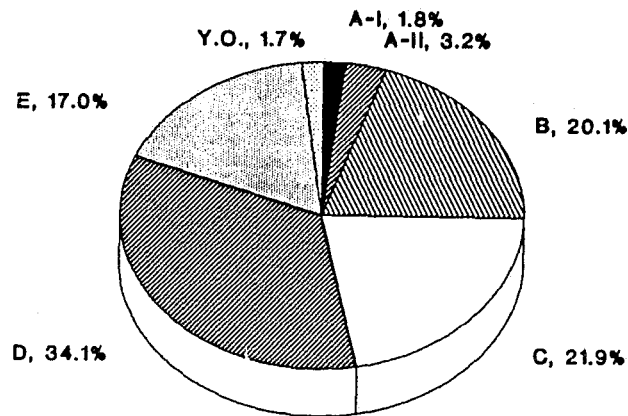

Table 4.1 shows the specific commitment crime, broken out by felony class category, for new court commitments committed to DOCS in 1991 (see also Figure 4.1). (Appendix B contains the Penal Law Section number for the offenses listed in Table 4.1.) The letters "ATT" before the offense indicate that the crime was an attempt. Approximately 2% of 1991 new court commitments were Class A-I crimes. Class A-II offenses made up 3.2% of commitments. Offenses in the Class B felony category made up 20.1% (N=4,856) of 1991 new court commitments. Class C Felony offenders made up 21.9% (N=5,290) of 1991 commitments. The Class D felony category was the largest at 34.1% (N=8,230) of new commitments. Class E felony offenders comprise 17.0%.

The first felony offender group when compared with those sentenced as second felony offenders has a higher concentration of persons sentenced for Class B (32.2%) and Class C (25.9%) felony offenses. The second felony group has a higher concentration of Class D (44.8%) and Class E (25.6%) felony offenses. For many first felony offenders it is the violent nature of the act that results in a state prison sentence (the 1978 Violent Felony Offender Legislation requires a prison sentence for convictions of a Class B or C violent felony). For many of those sentenced as a second felony offender it is the existence of a prior felony

¹For example, the minimum sentence range for a Class D felony offense for a first felony offender is 1 year to 2 years and 4 months. The sentencing court judge must select a minimum term that falls between 1 year and 2 years 4 months. Other factors affect the range of sentences that apply to each felony class category. In general, if the offense is a legislatively designated violent felony the sentence length range is more severe. For a Class B violent felony the lowest legally permissible minimum term is 2 years. For all other Class B felony offenders the lowest legally permissible minimum term is one year. It is also the case that the range of sentences that may be available to the judge after a conviction depends on whether the person is a first, second or persistent felony offender. In general, persons who are convicted of a second felony offense face more severe penalties than do first felony offenders.

conviction that results in a state prison commitment. (In 1973 the legislature required that persons convicted of a second felony offense must be sentenced to state prison).

The percent of first, second and persistent felony offenders in each felony class group is presented in Table 4.2. As one moves from the Class A-II category to the Class E category the proportion of second felony offenders steadily increases. Fully 82% of Class E and 72% of Class D commitments are second felony offenders.

Crime by Felony Class and Predicate Felony Status

In recent years several proposals have been put before the legislature which would permit judges to select a sentencing alternative other than state prison for second felony offenders convicted of Class D or Class E non-violent offenses.² Consideration of these and other proposals has often led to requests for additional information, particularly on the number of court commitments in a calendar year that fall into subgroups defined by: (1) crime, (2) felony crime class and (3) first, second or persistent felony offender status. These data are presented in Table 4.3.

Trends in Commitments by Felony Class

Changes in the proportion of commitments in each crime class by first, second or persistent felony offender subgroup across the commitment years 1988 through 1991 are shown in Table 4.4. From 1988 to 1991 first felony offenders convicted of Class A-I, Class A-II, Class B and Class D felony offenses have shown an approximate decline of one percentage point. Declines in the first felony category are offset by the large percentage point increase in second felony offenders convicted of Class D crimes. They were 21.8% of new court commitments in 1988 but rise to 24.6% in 1991 (see Table 4.4).

²See "Profile of Second Felony Non-Violent Offenders", Division of Program Planning, Research and Evaluation, NYS Correctional Services, March 1991.

Section 5

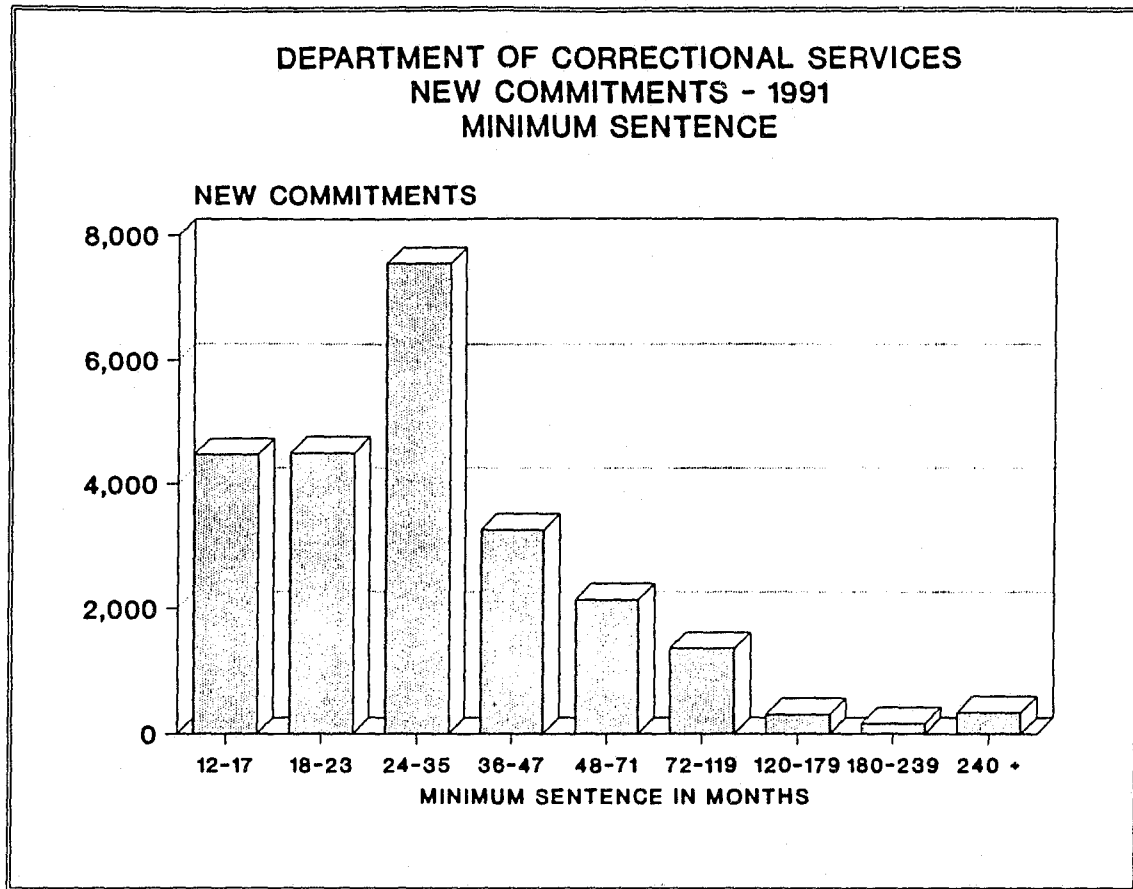

MINIMUM AND MAXIMUM SENTENCE

Persons committed to prison in New York State receive an indeterminate sentence which is composed of a minimum period of imprisonment and a maximum period of imprisonment. The minimum sentence reflects the shortest period of time that a person must serve in prison before being considered for release on parole.³ The maximum sentence reflects the longest possible period that the defendant can be held in custody on the instant offense. Individuals serving an indeterminate sentence are eligible for release to parole after having served the minimum sentence (given favorable action by the Board of Parole) and they must by law can be released once the conditional release date is reached (the conditional release date is the point at which 2/3 of the maximum sentence has been served). Persons in custody may serve past the conditional release date if for disciplinary reasons they have lost "good time" during service of the sentence.

A crosstabulation of crime by minimum sentence length for 1991 commitments is presented in Table 5.1. The table shows the number and percent of cases in each minimum sentence length category for several different types of crime.

³Felony criminal offenses in New York are classified according to six felony class categories (Class A, B, C, D, and E felony offenses, and Youthful Offenders). For each felony class category the legislature has enacted certain provisions which affect the length of the minimum term of imprisonment and which determine the range of maximum sentences available to the judge (see Article 70 New York State Penal Law). In addition to the felony class category that the offense falls into, the minimum period of imprisonment may differ depending on whether the defendant is a first, second, or persistent felony offender, and/or whether the defendant has been convicted of a legislatively designated violent felony offense. In general, the minimum-maximum sentence range is more severe for those defendants with a prior felony conviction and for those convicted of violent felony crimes. For first felony offenders sentenced to state prison for a violent felony crime the judge must in most cases set the minimum period of imprisonment at one-third the maximum sentence. For first felony offenders sentenced to state prison for other felony offenses (i.e. all offenses not designated as a violent felony) the judge must fix the minimum period of imprisonment at some point between one-year and one-third the maximum term. For second felony offenders committed to state prison the judge must set the minimum period of imprisonment at one-half the maximum sentence. Article 70 of the Penal Law spells out the different sentencing provisions that pertain to armed felony offenders; first, second or persistent felony offenders; and violent felony offenders. Appendix A presents a brief summary of the sentences that apply to each felony class category.

Average and Median Minimum Sentence by Crime

The average and median minimum sentence length according to commitment crime and first or second felony offender status is presented in Table 5.2. In this and other tables the arithmetic average and the median are used as measures of central tendency. The value for the median is generally somewhat lower than the value for the average. For approximately 63% of court commitments the judge has sentenced the defendant to the lowest legally permissible minimum term (given the conviction crime, prior record etc.). Generally the median minimum sentence is close to the value of the minimum-minimum term (this is clearer in Table 5.7 below). However, the remaining 37% of commitments receive a sentence above the minimum-minimum term and the arithmetic average is sensitive to the impact of these cases. The median is a measure of central tendency which represents the value of the middle case (i.e. the case or cases at the 50th percentile) in the distribution of cases and is preferred by some users because it is less sensitive to extreme values than is the arithmetic average.

The average minimum sentence for the total new court commitment population in 1991 was 36.5 months. The average minimum sentence for violent felony crimes was 54.1 months, for other coercive crimes 24.5 months, for drug offenders 30.2 months and for property offenders 20.4 months.

The average minimum sentence was generally longer for persons sentenced as a second or persistent felony offender when compared with those sentenced as a first felony offender (see Table 5.2). For example, the average minimum sentence for first felons sentenced for Robbery 1st was 32.7 months, for second felony offenders convicted of Robbery 1st it was 74.6 months, and for persistent felony offenders committed for Robbery 1st the average was 254.5 months.

Trends in Average Minimum Sentence Length

The average minimum sentence by crime and second felony offender status for each year 1988 through 1991 is presented in Table 5.3. Within each specific crime group and within each felony status category (e.g. 1st or 2nd felon) the average minimum sentence generally remains stable across the commitment years. For example, first felony offenders convicted of Robbery 1st received an average minimum sentence of 32.8 months in 1988, 33.0 months in 1989, 30.7 months in 1990, and 32.7 months in 1991.

The data in Table 5.3 is repeated in Table 5.4 except that the measure of central tendency is the median.

Minimum Sentence by Felony Class Category

Average minimum sentence by felony class category and second felony offender status for 1991 New Court Commitments is presented in Table 5.5. These figures show that as the felony class declines from A-I to E the average minimum sentence also declines. Further, within each felony class category, as one moves from first felony offender to second felony offender to persistent felony offender the average minimum sentence increases, as would be expected based on the sentencing requirements found in the New York State Penal Law (see Appendix A for a brief statement of the sentence range for each subgroup).

Table 5.6 shows average minimum sentence by felony class category and second felony status (persistent felons have been grouped with second felony offenders) for each year 1988 through 1991. Within each specific felony class category as one moves from 1988 to 1991 the average minimum sentence tends to be about the same from one year to the next.

In Table 5.7 the data are broken out by felony class category, violent or non-violent offense, and first or second felony offender status. Within each specific felony class category the average minimum sentence remains very stable from year to year, and this is true for 19 of the 21 specific felony class categories. Exceptions where there was some increase between 1988 and 1991 include first felony class A-I non-violent felons, and second felony class A-II non-violent felons. For instance, first felony offenders convicted of a class B violent crime had an average minimum sentence of 51.4 months in 1988, 51.2 months in 1989 and 49.3 months in 1990 and 52.5 in 1991. Table 5.7 also shows the decline in average minimum sentence as one moves from Class A felony offenses to Class E felony offenses.

Maximum Sentence Length

A crosstabulation of commitment crime by maximum sentence is presented in Table 5.8. Since the development of programs such as Earned Eligibility,³ the minimum sentence is a much better estimate of the length of time that will be served in state prison than is the maximum sentence.

Persons committed for violent felony offenses were more likely (35%) to be given a maximum sentence of nine years (108 months) or longer when compared with drug (16%) or property (1%) offenders. Approximately 6% of violent felony offenders received a Life maximum sentence (see Table 5.8). Approximately 8% of drug offenders received a Life maximum sentence. Many of the Class A-II drug offenders were persons with a minimum term of six years and a maximum term of Life.

Table 5.9 shows average and median maximum sentence length by crime and second felony offender status. A Life sentence has been treated as 25 years. For 1991 new court commitments the average maximum sentence was 83.8 months, the median 54.0 months. The average maximum sentence for a first felony offender was 97.0 months (median 54.0 months). The average for second felony offenders was 70.3 months and was somewhat lower than the average for first felony offenders because the second felony group had a higher concentration of the lower level Class D and E felony commitments.

³See "Earned Eligibility Program Statistical Report 1991 Calendar Year" Division of Program Planning, Research and Evaluation, NYS Department of Correctional Services, Albany, NY 12226.

Section 6

PRIOR ADULT CRIMINAL RECORD

Prior adult criminal record for 1991 new court commitments is presented in Table 6.1. Persons are coded according to their most serious penetration into the criminal justice system.⁵ Among 1991 commitments approximately 25% had served a prior prison term, and 31% had served a prior term in a local jail. An additional 22% had a prior conviction which resulted in a sentence to probation or a fine or other non-incarcerative sentencing alternative. Approximately 9% have prior misdemeanor or felony arrests which did not result in a conviction and approximately 12% had no prior arrests (see also Figure 6.1).

Trends in Prior Adult Criminal Record

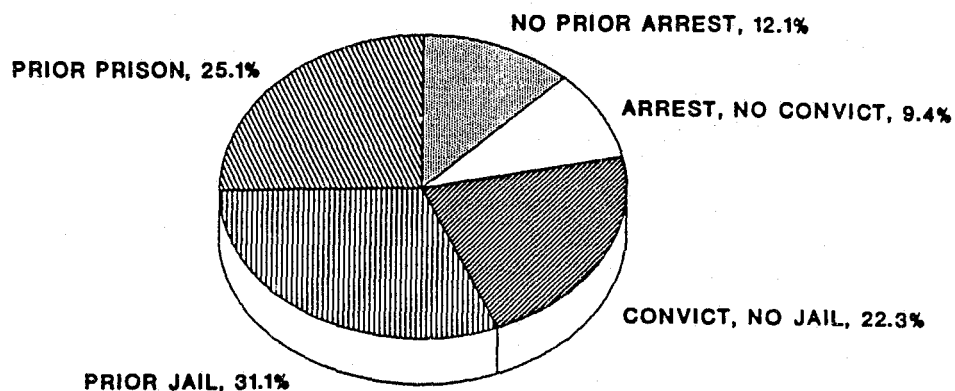

Prior criminal history for new court commitments received across the years 1988 to 1991 is shown in Table 6.2. There is a slight increase in 1991 in the percent committed to state prison who have no prior arrest (12%) when compared with earlier years. There is a slight decline between 1988 and 1991 in the percent committed who have a prior arrest but no conviction (from 11% down to 9%). There is a steady decline over 1988-1991 in the percent committed who have a prior adult conviction but who did not receive a sentence to jail or state prison (28% down to 22%).

Recent years have shown an increase in the percent of commitments with a conviction that resulted in a sentence to a local jail. In 1988, 28% of commitments had served a prior jail term and this rises to 32% in 1990 before falling back slightly in 1991 (31%). Commitments in 1991 show a sharp increase in the percent who had served a prior state or federal prison term (25%) when compared with earlier years (approximately 22% from 1988 through 1990). In general, the last few years have shown a decline in the percent of commitments who have an adult conviction that did not result in a jail or prison sentence and an increase in the percent who have a conviction that did result in a jail sentence, with the added jump in 1991 in the percent of cases with a prior prison term.

⁵The first category shows those who have no prior felony or misdemeanor arrests. The second category contains those persons who have prior arrests but no prior convictions (i.e. charges were dismissed or defendant was acquitted or rap sheet has no further information on disposition of the charges). The third category contains those who have prior convictions but did not receive a sentence to jail (i.e., they were sentenced to probation, fined, adjourned in contemplation of dismissal, ordered to pay restitution, or other sentencing alternative). The fourth category includes those who have prior convictions and who received a sentence that included a term in a local jail (including those who may have received a sentence of jail and then probation). The last category includes those persons who have served a prior state or federal prison term.

Section 7

DRUG COMMITMENTS

Given the dramatic affect on the composition of commitments to state prison as a result of recent drug enforcement efforts this section contains several tables which focus only on drug offenders committed to state prison.⁶

The absolute number of drug offenders committed to state prison increased substantially between 1988 (N=6,432) and 1991 (10,778) (see Table 7.1). This growth is heaviest in the lower felony class categories. The number of class A-I drug offenders committed to state prison declines steadily from 115 individuals in 1988 to 82 cases in 1991. The number of class B drug felony offenders increases between 1988 (N=1,901) and 1991 (N=2,502) but as a percent of all drug commitments the class B category declines from 29.6% in 1988 to 23.2% in 1991. Large increases both numerically and as a percent of all drug commitments are found in the class C and D categories. Class C drug offenders increase from 1,081 in 1988 to 2,459 in 1991 and class D drug offenders from 1,890 in 1988 to 3,697 in 1991.

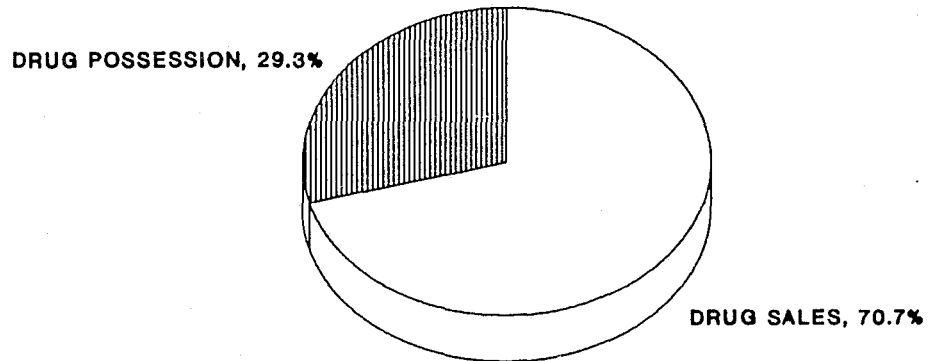

Among drug commitments there has been a considerable shift in the percent that are sentenced as second felony offenders. In 1988 approximately 53% (N=3,420) were sentenced as second felons but by 1991, 63% (N=6,751) of drug offenders were sentenced as second felons (see Table 7.2).

In general, over the years 1988 to 1991, drug commitments have shown a greater concentration of second felony offenders convicted of class C and D drug offenses. For example, second felony offenders committed for a class C drug crime make up 8.0% of drug commitments in 1988 but they make up 13.0% of 1991 drug commitments. Class D second felony offenders increase from 26.6% in 1988 to 31.5% in 1992. In 1991, 93% of the class D and E drug commitments were sentenced as second felony offenders, compared with 57% of class C drug commitments and 27% of class B drug commitments.

⁶See also "Drug Offenders Committed to State Prison" (1991), Division of Program Planning, Research and Evaluation, N.Y.S. Department of Correctional Services, NY 12226.

Trends in Drug Commitments by Possession or Sale

Of those committed to state prison for a drug offense the large majority are for drug sale (i.e., 70.7% in 1991) as opposed to drug possession (29.3% in 1991, see Table 7.3 and Figure 7.1). However, as a percent of total drug commitments to state prison, those convicted of drug possession have shown a moderate increase over the four year period 1988 to 1991. People committed for possession of controlled substances made up 22.6% of total drug commitments in 1988 (N=1454) but they make up 29.3% of drug commitments in 1991 (N=3153). This shift is due to more commitments for lower level class D and E drug possession offenses.

Trends in Drug Commitments by Region

The increase in the number of drug commitments to state prison is a phenomenon that occurs in each region of the state (see Table 7.4, counties that fall into each specific region are listed in Table 11.1 below). Further, each region of the state shows a higher concentration of second felons among drug offenders committed over the period 1988 through 1991. For example, in Suburban New York 38.5% of drug offenders committed in 1988 were sentenced as a second felony offender compared with 58.7% in 1991. The most substantial percent increase over the period 1988 to 1991 occurs among second felony offenders committed for class C and class D offenses. For example, second felons convicted of a class C drug felony made up 7.8% of drug commitments from New York City in 1988 but they make up 11.4% in 1991; further, offenders in this category made up 12.7% of drug commitments from Suburban New York counties in 1988 but this rises to 28.2% in 1991.

Table 7.5 shows felony crime class and second felony offender status for drug commitments over the period 1988 to 1991. In this table the five New York City counties are shown separately.

Trends in Drug Commitments by Gender

The ten percentage point increase in the percent of drug offenders who are second felony offenders is evident among both male drug commitments (i.e., 54% second felons in 1988 rising to 64% in 1991) and female drug commitments (46% were sentenced as second felons in 1988 and 56% in 1991) (see Table 7.6).

By increasing the number of persons with a drug felony conviction the recent enhancements to drug law enforcement also increase the pool of persons who are at risk for sentencing as a second felony offender should a second conviction result.⁷ New York State law mandates a state prison sentence for a second felony conviction (Penal Law Section 70.06, 70.02). In terms of increasing drug commitments to state prison, recent drug enforcement efforts appear to have had a more pronounced effect on women than men. While the number of males committed to state prison for a drug offense increases by 50% between 1988 (N=5,896) and 1991 (N=9,138), the number of females committed for a drug offense triples between 1988 (N=536) and 1991 (N=1,640).

Trends in Drug Commitments by Ethnic Status

There are important differences in commitments to prison for drug offenses according to ethnic status. Among whites committed to prison in 1991, 18% were convicted of a drug offense, among blacks 44% were committed for drug offense, and among Hispanics 58% were committed for a drug offense (see Table 9.3 below). Table 7.7 shows that among whites, the proportion of drug offenders who were sentenced as a second felon increases between 1988 (25% second felony) and 1991 (38%). Among blacks committed for a drug offense in 1988 54% were sentenced as a second felon but in 1991 67% were sentenced as a second felon. Among Hispanics committed for drug offenses in 1988, 58% were second felons and this increases slightly to 62% in 1991. For all three ethnic group categories there is a greater concentration of drug commitments who are second felony offenders convicted of class C and class D offenses as one moves from 1988 to 1991.

⁷See "Arrest Rates and Post-Arrest Processing of Persons with Prior Felony Convictions" (May 1989), New York State Division of Criminal Justice Services, Executive Park Tower, Stuyvesant Plaza, Albany, NY 12203.

Trends in Average Minimum Sentence for Drug Offenders

As the felony class category declines from most serious (e.g., class A- I, class A-II) to least serious (e.g., class E) the average minimum sentence declines (see Table 7.8). Further, where the felony class category is the same (e.g., class B), second felony offenders earn longer sentences than do first felony offenders (see Table 7.9). For example, in 1991 a first felony offender convicted of a class B drug felony received a minimum term (on average) of 19.3 months, but a second felony offender convicted of a class B drug felony received a minimum term (on average) of 64.4 months.

Within each specific felony class category the average minimum sentence changes only slightly from year to year across the period 1988 to 1991 (see Table 7.9).

The average minimum sentence for the total group of drug offenders committed in 1991 is 30.2 months. For first felony offenders it is 27.7 months and for second felony offenders 31.7 months. That the average minimum sentence for all second felony offenders committed in 1991 for a drug felony is not substantially greater than the average minimum term for first felony drug offenders is due to the larger number of class D and class E offenders in the second felony group.

Section 8

GENDER

There are significant differences in the commitment offense of males and females. In 1991, 36.7% of males were committed for a violent felony offense compared with only 14.1% of females (see Table 8.1). Males are also somewhat more likely to be committed for other coercive offenses (5.5% compared with 3.4% for females) and for property offenses (14.2% compared with 9.1%). On the other hand, females are considerably more likely than males to be committed to state prison for a drug offense (72.4% compared with 44.7% for men).

The proportion of commitments to state prison made up by drug offenders has grown more dramatically among females than males in recent years. In 1988 the percent of males committed for a drug offense stood at 36% and this figure grows to 42% by 1991. However, among females the percent of drug offenders increased from 53% in 1988 to 73% in 1991.

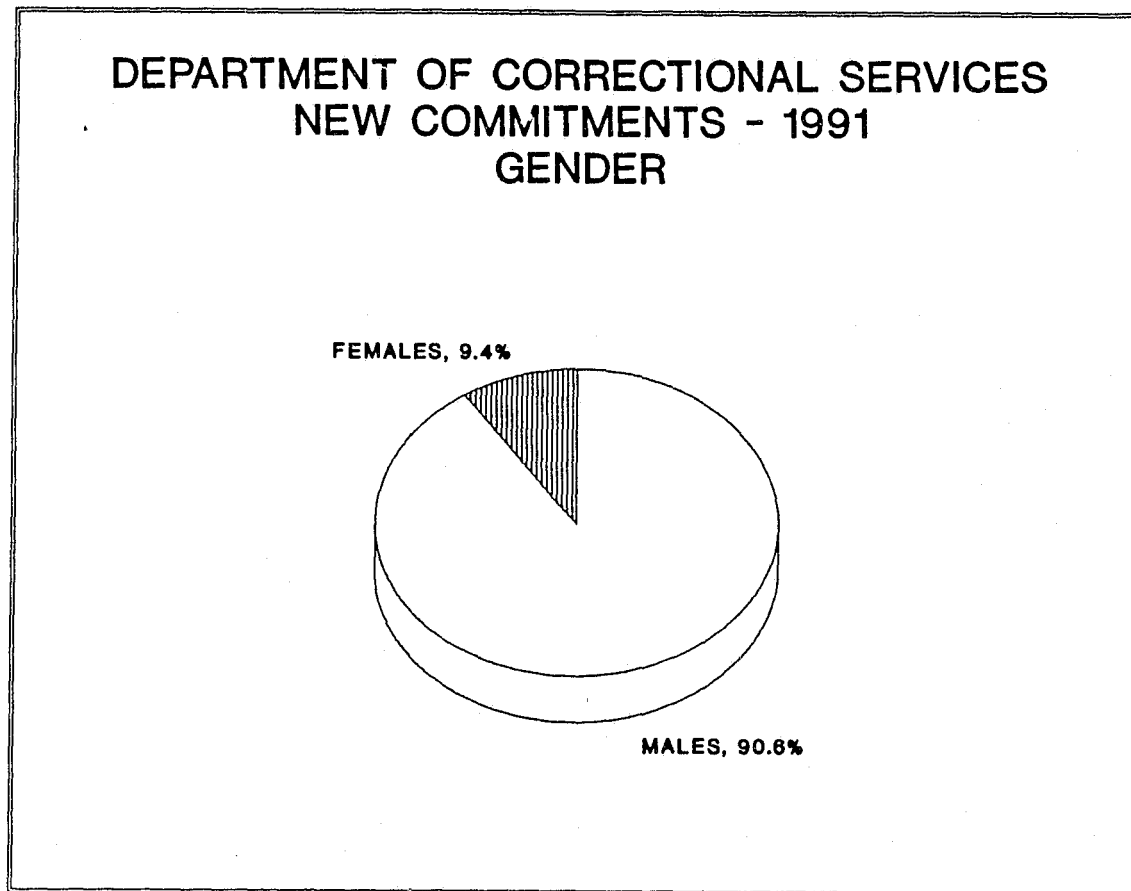

Long Term Trend in Female Commitments

The largest number of female offenders committed to state prison occurred in calendar year 1991 (N=2,264). Not only has the number of female offenders committed to state prison grown sharply over the last five years but the percent of total new court commitments made up by women has also grown (see Table 8.2).

Over the admission years 1976 through 1983 women offenders made up approximately 3.6% of court commitments. In 1986 women made up 4.8% of commitments and in 1989 this figure rises to 7.5%. In 1991 women made up 9.4% of commitments.⁸

⁸For further information on female offenders see "Female Offenders Committed to State Prison" (1992), "Female Drug Commitment Population 1987 - 1989" (1990), and "Female New Court Commitments 1976-1987" (1988), Division of Program Planning, Research and Evaluation, New York State Department of Correctional Services.

Section 9

ETHNIC STATUS

Race/Ethnic Status of 1991 Commitments

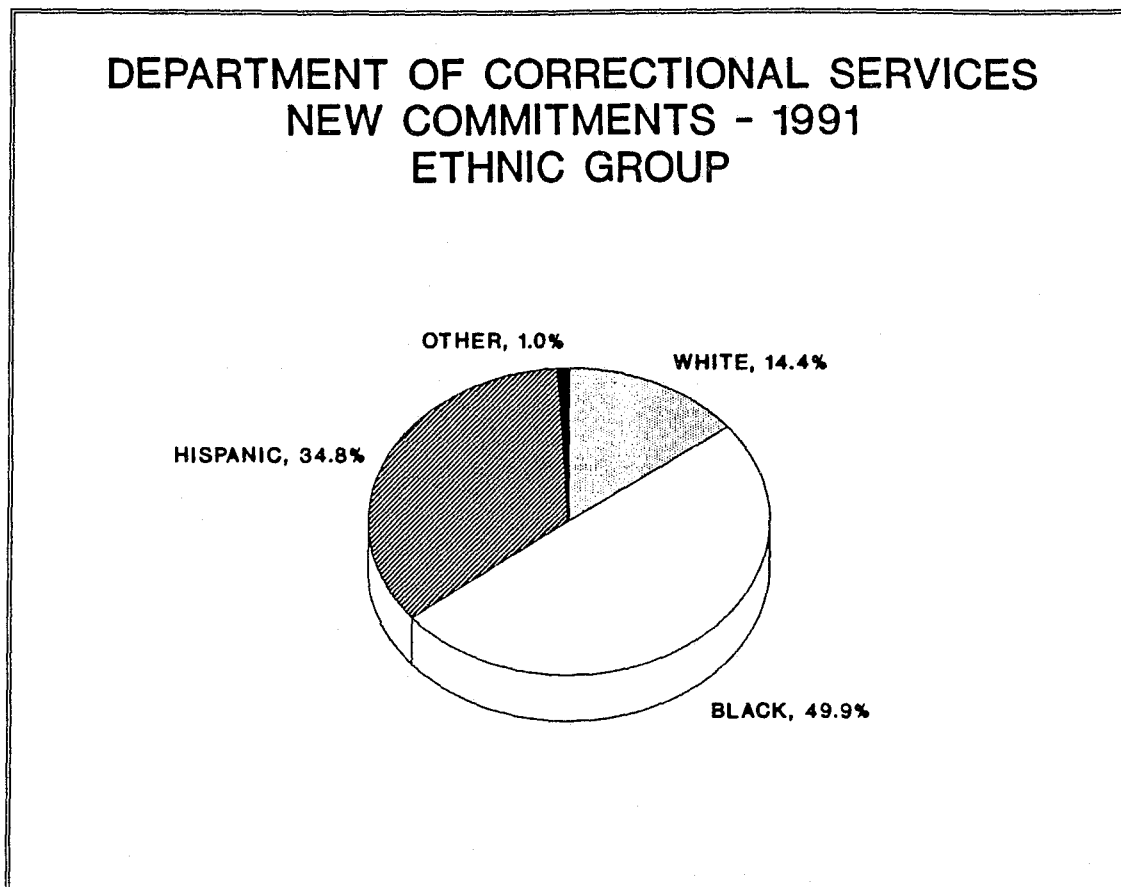

In 1991, 14.4% of commitments were white, 49.9% were black, 34.8% Hispanic, 0.2% Native American (N=59), 0.2% Asian (N=59), and 0.5% (N=116) other ethnic groups (see Table 9.1).

Commitment offense by ethnic status for 1991 new court commitments is shown in Table 9.2 and in Table 9.3. (In Table 9.3 Native American, Asian and other ethnic groups are categorized as "other"). Approximately the same percent of whites and blacks are committed for violent felony crimes (36%, and 37%, respectively) (see Table 9.3). Compared with whites and blacks, 29% of Hispanics are committed for violent offenses. Whites are also more likely to be committed for other coercive offenses (10%) than either blacks (6%) or Hispanics (3%). Among Hispanics, the largest commitment crime category is drug offenses (58%). Drug offenders also make up a large percent of blacks sentenced to state prison (44%). Whites are more likely to be committed for property offenses (34%) than either blacks (11%) or Hispanics (9%).

In brief, white offenders committed to state prison are made up of approximately one-third violent felony offenders, one-third property offenders and the remaining one-third other crimes. Black offenders are approximately one-third violent felony, one-half drug offenders and the remainder other crimes. Hispanic offenders committed to state prison in 1991 were approximately four-sevenths drug offenders, two-sevenths violent offenders and the remainder other crimes.

Table 9.4 shows the ethnic status distribution for specific offenses with the percentages based on each offense group. Looking for example at commitments for murder in 1991 (N=332), 18.4% (N=61) were white, 54.5% (N=181) were black, 23.5% (N=78) were Hispanic and 3.6% (N=12) were other.

Race/Ethnic Status of Female 1991 Commitments

Earlier tables have shown the high concentration of drug offenses among female commitments and the concentration of drug offenses among Hispanic commitments. The data in Table 9.5 show that 87% of Hispanic females committed to state prison were sentenced for a drug offense. Sixty-eight percent of black females were committed for a drug offense. In sharp contrast, only 44% of white females committed to state prison were sentenced for a drug offense. Compared with black and Hispanic females, white females are somewhat more likely to be committed for a violent felony offense (21% compared with 16% for blacks and 9% Hispanics) and considerably more likely to be committed for a property offense (26% compared with 10% for blacks and 3% for Hispanics).

Trends in Commitment Crime by Ethnic Status

The number of white, black and Hispanic offenders in each crime category for commitment years 1988 through 1991 is shown in Table 9.6. These are the figures upon which the percentages in Table 9.7 are based.

The proportion of whites committed for violent felony offenses declines slightly from 41% in 1988 to 36% in 1991 (see Table 9.7). There is a slight increase in property offenders among whites (29% in 1988 to 34% in 1991).

Among blacks there is moderate decline in the percent committed for violent felony crimes between 1988 (43%) and 1991 (37%) and a moderate decline in the percent committed for property offenses (16% in 1988 to 11% in 1991) (see Table 9.7). There is an increase in the percent of blacks committed for drug offenses between 1988 (32%) and 1991 (43%). More so than for either whites or Hispanics, drug offenses have altered the distribution of crimes for which blacks are committed to prison.

Among Hispanics the proportion committed for violent, drug or property crimes has remained relatively constant over the last four years.

The raw number of males in each crime and ethnic status group for the years 1988 to 1991 is presented in Table 9.8. The percent figures in Table 9.9 are based on the numbers in Table 9.8. Since males are such a predominant portion of total commitments the patterns in the ethnic status distribution of offenses over time generally correspond to those found in Table 9.7 (which are briefly discussed in the paragraphs immediately above).

Trends in Commitment Crime by Race/Ethnic Status for Females

The number of white females committed to state prison is relatively stable across the period 1988 (N=193) to 1990 (N=177), but increases somewhat in 1991 (N=244) (see Table 9.10). The number of black females committed to state prison has grown steadily from 433 in 1988 to 762 in 1989 to 868 in 1990 and to 1153 in 1991 (i.e. more than two and one-half times as many in 1991 as in 1988). The number of Hispanic females committed to state prison in 1991 is also twice as large (N=860) as the number committed in 1988 (N=383).

The crime distribution of white, black and Hispanic females has changed somewhat over the years 1988 to 1991. For white females the percent committed for violent felony crimes declines from 26% in 1988 to 21% in 1991. But the percent of white females committed for drug offenses increases from 31% in 1988 to 44% in 1991. Among black females the shifts are even sharper. Thirty-one percent of black females were committed for a violent felony in 1988 but only 16% were in 1991. In 1988 42% of black females were sentenced to prison for a drug felony but this rises to 68% by 1991. Even in 1988 there is a high concentration of drug offenses among Hispanic females (76%) but this percent increases across the four-year period to stand at 87% in 1991. The percent of Hispanic females committed for a violent felony declines from 17% in 1988 to 9% in 1991. Among female offenders in each ethnic group, there is a general decline in the percent committed for violent crimes and an increase in the percent committed for drug offenses.

Section 10

AGE AT ADMISSION

The average age at admission is 28.9 years. For males the average is 28.7 years, for females 30.5 years (see Table 10.1).

Whites are the oldest (average age 30.4), followed by Hispanics (average age 29.6), blacks (28.0) and others (27.5 years).

The age distribution by gender and ethnic status for 1991 new court commitments is presented in Table 10.3 (see also Figure 10.1). Crime by age at admission (broken into 12 categories) is presented in Table 10.4.

Average Age at Admission by Crime and Gender

Among 1991 commitments females committed for drug offenses or for other coercive crimes are approximately a year older on average than are males committed for these offenses (see Table 10.5). Females committed for violent felony offenses are approximately 2 years older than males (29.1 compared to 27.3) and females committed for property offenses are approximately 3 years older than males committed for these offenses (32.5 compared to 29.7).

It can also be seen in Table 10.5 that for both males and females the average age at admission within each general crime group (violent, other coercive, drugs, and property) is steady across the years 1988 through 1991.

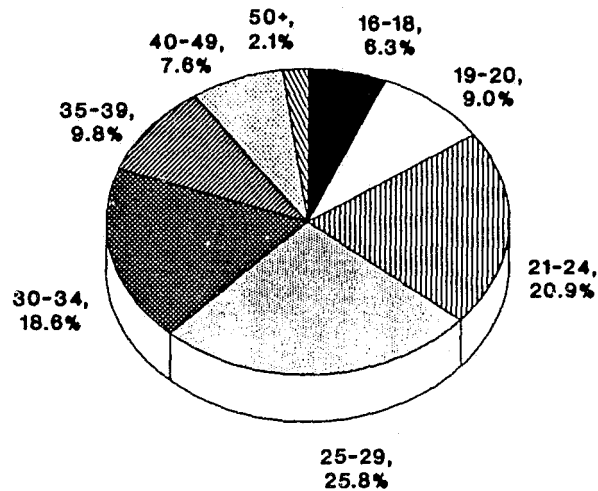

Average Age at Admission by Crime and Race/Ethnic Status

Whites committed in 1991 for violent felony crimes tend to be somewhat older (average age 29.9) than either blacks or Hispanics committed for violent crimes (average age 26.7 years and 27.2 respectively) (see Table 10.6). The same is true for other coercive offenses. Among offenders committed for drug offenses, blacks tend to be younger (29.1 years) than either whites (31.0) or Hispanics (31.1). For property offenses the average age is approximately 30 years for each ethnic group.

The average age at admission within each general crime group (e.g. violent, other coercive, drugs, property) is stable for each ethnic group over the years 1988 through 1991 (see Table 10.6). For example, the average age of whites committed for a violent felony is 29.5 years in 1988, 29.5 years in 1989, 29.9 years in 1990 and 29.9 years in 1992.

Trends in Age at Commitment

People committed in 1991 were slightly older (average age 28.9) than those committed in 1988 (average age 28.5) (see Table 10.7). Between 1988 and 1991 the percent of commitments that were 19 to 24 years of age declined slightly and the percent of commitments that were between 30 and 44 years of age increased slightly.

Section 11

COUNTY AND REGION OF COMMITMENT

Approximately 71 % (N=17,179) of 1991 new court commitments were sentenced to state prison from New York City (see Table 11.1 and Figure 11.1)⁹. Eleven percent (N=2,729) were sentenced from the Suburban counties near New York City. Ten percent (N=2,287) were committed from Upstate Urban counties and 8% (N=1,896) from Upstate Rural counties. Table 11.1 also shows that the county of commitment distribution is similar for males and females.

Commitment Crime by County and Region

There are important differences in commitment crime according to region of the state. Commitments from New York City are most likely to be drug offenders (48%) followed by violent felony offenders (36%) and then property offenders (11%) (See Table 11.2). The suburban New York counties are similar to New York City with drug commitments as the largest category (48%), followed by violent felony offenders (32%) and then property offenders (14%). Compared with either New York City or Suburban New York City, persons committed from Upstate counties are less likely to be committed for drug offenses and more likely to be committed for property offenses. For example, among commitments from Upstate Rural counties 30% are property offenders, 31% are drug offenders and 28% are violent felony offenders.

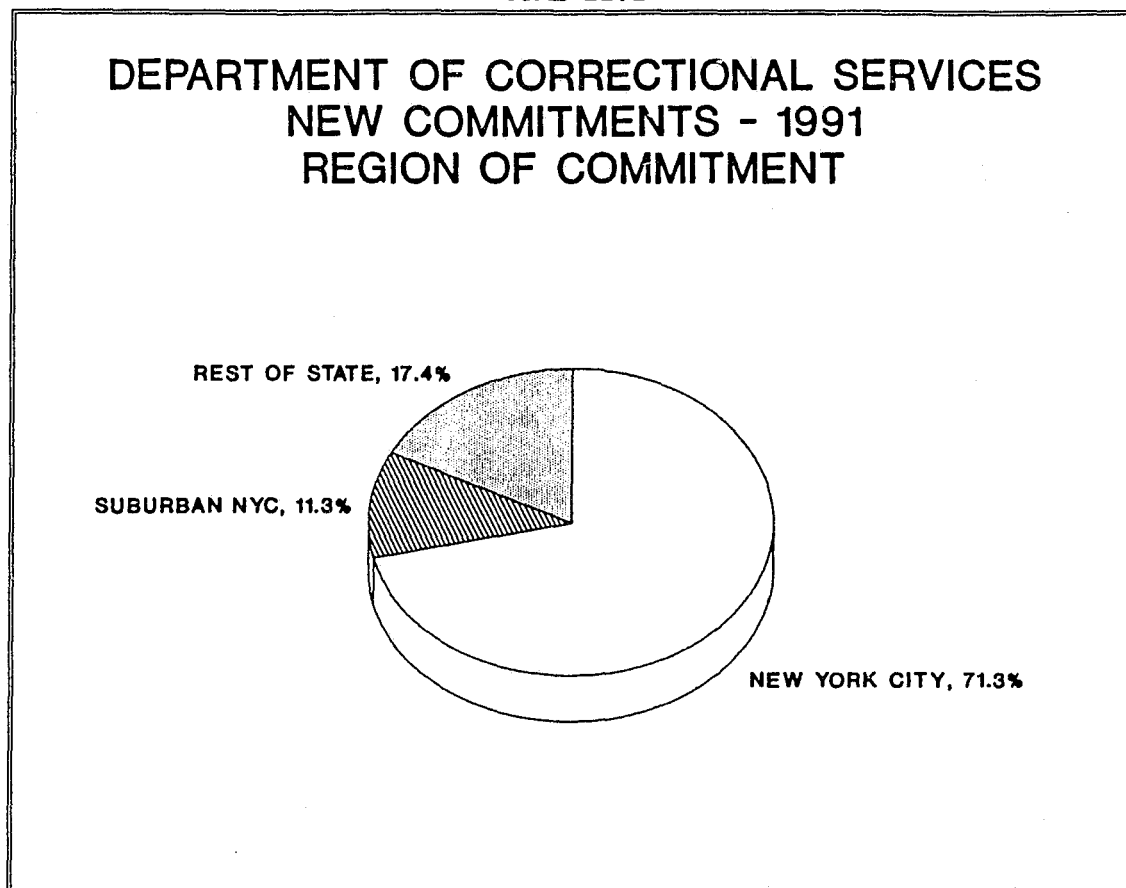

Table 11.3 presents the commitment crime distribution for each New York State county.

Felony Class of Crime by Region

While the type of crime for which persons are committed differs by region of the state, the percent of cases in each felony class category is generally similar according to region of the state (see Table 11.4). Among commitments from Suburban New York there is a somewhat higher percent of class C felony offenders (33%) and a somewhat lower percent of class E felony offenders (12%) when compared with other regions. The reverse is true for commitments from Upstate Rural counties where the percent of cases that are class C felony offenders (15%) is somewhat lower and the percent of class E felony offenders (21%) is slightly

⁹The 62 counties in New York State are grouped into 4 larger regions. New York City refers to commitments from the five counties (or boroughs) that comprise New York City which are Kings, New York, Queens, Richmond, and Bronx counties. Suburban New York City refers to Nassau, Rockland, Suffolk and Westchester counties. The Upstate Urban region refers to counties in upstate New York that have a population center of 50,000 or more. Finally, Upstate Rural refers to all the remaining New York State counties.

higher when compared with other regions. To the extent that felony class category is an index of the seriousness of offense, the Upstate counties commit roughly the same proportion of serious offenders (i.e. class A-I, A-II, and class B offenders) to state prison as do the New York City and Suburban New York City counties. The proportion of class A-I, class A-II, and class B offenders committed from each region is as follows: New York City 24.7%, Suburban New York 25.3%, Upstate urban 27.6%, and Upstate rural 25.4%.

Trends in Commitments by Region

There are only slight differences in the percent of offenders committed from each region of the state across the years 1988 through 1991 (see Table 11.5).

Section 12

COUNTRY OF BIRTH

Country of birth for new court commitments across the years 1988 through 1991 is presented in Table 12.1. Among 1991 new court commitments, 76% (N=18,416) were born in one of the 50 states that make up the United States. Another 10% (N=2,513) were born in one of the U.S. Possessions (for purposes of immigration persons born in United States Possessions are treated as U.S. citizens). Another 8% (N=1,982) were born in one of the island nations in the Caribbean Sea. One percent were born in countries in Central America (N=216) and approximately 2% (N=510) in South America. Approximately 1% (N=398) were born in other countries in the world. For 77 cases (0.3%) place of birth was missing.

Trends in Foreign Born Commitments

The number of new commitments who are foreign born has increased across the last four years. There were 2,182 foreign born persons committed in 1988, 2,578 in 1989, 2,646 in 1990 and 3,106 in 1991. As a percent of total new court commitments foreign born inmates decline from 1988 (12.6%) to 1990 (11.5%), but they increase in 1991 (12.9%).

In recent years the number of commitments who claim to have been born in certain countries increased. Some of these include: Dominican Republic (582 in 1988, 1002 in 1991), Jamaica (390 in 1988, 524 in 1991), El Salvador (11 in 1988, 51 in 1991), Guyana (60 to 98), China (from 6 to 29), Vietnam (3 in 1988, 24 in 1991)(see Table 12.1).

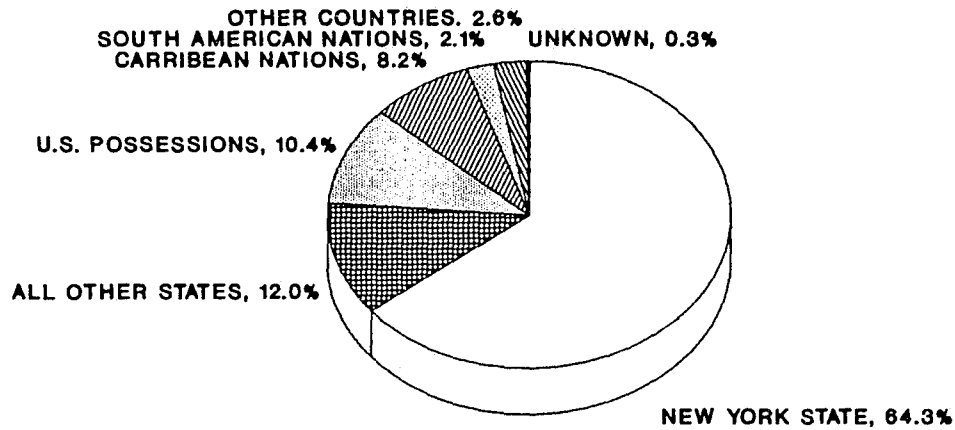

Commitment Crime for Foreign Born

Table 12.2 presents crime by region of birth (i.e. countries are grouped into regions, see Table 12.1) for 1991 new court commitments. Overall, 34% of 1991 new court commitments were sentenced for violent felony crimes. Foreign born inmates from several regions show a comparatively high percent of cases committed as violent felony offenders including those from North America (58%), Central America (44%), and Asia (73%).

Overall, 45% of 1991 new commitments were sentenced for drug offenses. Inmates from several regions show a comparatively high percent of cases committed for drug offenses including: U.S. Possessions (66%), island nations in the Caribbean (60%), and South America (61%). Of the 10,775 drug offenders committed in 1991, 69% (N=7,395) were born in the United States, 15% (N=1,653) in U.S. Possessions, and 16% (N=1,696) in foreign nations. Looking, however, at the 3,106 foreign born persons committed in 1991, 55% (N=1,696) were convicted of a drug offense.

Section 13

EDUCATION

Education level by gender for 1991 new court commitments is presented in Table 13.1. In this table education status refers to the last school grade completed as reported by the inmate. Where the individual claims to have earned a General Education Diploma (i.e. High School Equivalency) he or she was assigned to the 12th grade. As shown in Table 13.1, the average grade level achieved is 10th grade based on reports of persons admitted at reception.

In order to properly place inmates in education programs, the Department administers a battery of tests during the reception/classification process. These include tests on reading vocabulary and reading comprehension. Table 13.2 shows the distribution of combined reading vocabulary and reading comprehension scores for 1991 commitments. The average reading level (7.7) based on these tests is approximately two-thirds of the way between 7th and 8th grade. While the average grade completed as reported at reception is 10th grade, tested reading proficiency tends to be 2 to 3 grade levels below what is reported. While only 5% of inmates claim education year completed of 6th grade or below (see Table 13.1), fully 42% perform on reading tests at the 6th grade level or below (see Table 13.2).

Results from tests on ability to perform math computations and to solve math problems are shown in Table 13.3. For 1991 new commitments the average proficiency in mathematics based on these test scores is 6th grade.

Trends in Education Level

The average number of years of completed education is 10 in each of the last four commitment years (see Table 13.4). Reading proficiency based on tests administered at reception tends to be at the 7th to 8th grade level in each commitment year 1988 through 1991 (see Table 13.5). Average performance level in math proficiency tends to be at approximately 6th grade (see Table 13.6).

Section 14

MARITAL STATUS

Among 1991 commitments 74% were not legally married, 17% of commitments reported that they were legally married, and 9% reported that they were divorced, widowed or separated (see Table 14.1). Among 1991 commitments males were somewhat less likely to report being married (16%) than females (19%). Females are more likely to report marital status of divorced, widowed or separated (11%) than males (9%).

Looking at commitments over the period 1988 through 1991 approximately the same percent of males (17%) report being married at time of reception to state prison. For females 24% of 1988 commitments were married, but this declines to 11% in 1990 before rising again to 19% in 1991.

Section 15

JAIL TIME

Among those individuals committed to state prison many have accumulated time in a local jail prior to the date of reception at a New York State correctional facility. Following arrest the court may require that a defendant post bail so as ensure the defendant will re-appear at a later date for further court proceedings. Those unable to post bail when it is required by the court will generally be confined in a local jail pending court proceedings. Also, for those sentenced to a state prison term, jail time may accumulate between the date of sentencing and the date of transfer to a state correctional facility. Time spent in a local jail prior to conviction or prior to commitment to state prison is credited toward service of the minimum term.

On average, the length of time served in a local jail was approximately one month longer for new commitments in 1991 (average 6.4 months) than for new commitments received in 1990 (average 5.5 months) or 1989 (average 5.5 months) (see Table 15.1).

Jail Time by Crime and Crime Class

Violent felony offenders tend to have served more jail time than do other offenders. For example, among 1991 new commitments, those convicted of a violent felony had served 8.1 months on average compared to 6.1 months for other coercive offenders, 5.6 months for drug offenders and 5.4 months for property offenders (see Table 15.1). Within specific crime categories persons sentenced as a second felony offender tend to serve more jail time than those sentenced as first felony offenders. For instance, second felony offenders committed for Robbery 1st in 1991 served 9.5 months of jail time on average compared with 7.1 months for first felony offenders convicted of Robbery 1st. That the average jail time for the total group of first and second felony offenders is similar (6.4 and 6.5 months on average in 1991) is due to the higher concentration of drug and property offenders in the second felony group.

Average and median jail time according to felony class category for the year 1988 through 1991 is reflected in Table 15.2. These data show that as the felony class category declines from most serious (class A-I felony) to least serious (class E felony) the average jail time also declines. This is true for both first and second felons.

Jail Time by Region

Across the years 1988 to 1990 the average jail time for commitments from New York City was approximately 5.6 months (see Table 15.3). This increases to 6.8 months on average for 1991 commitments. For Suburban New York counties and Upstate Urban counties the average jail time in 1991 is approximately the same as that in 1988. For Upstate Urban counties average jail time declines from 6.2 months in 1988 to approximately 5.1 months in the three following years.

**APPENDIX A: RANGE OF MINIMUM AND MAXIMUM
SENTENCES BY FELONY CLASS CATEGORY^{a/}**

Sentence to State Prison for First Felony Offense

<u>Felony Class</u>		<u>Legislatively Designated Violent Felony Offense</u>	<u>All Other Felony Offenses</u>
A-I Felony	Maximum	N/A	LIFE
	Minimum		15-25 Years
A-II Felony	Maximum	N/A	LIFE
	Minimum		3-8 1/2 Years
Class B Felony	Maximum	6-25	3-25
	Minimum	2-8 1/3 ^{b/} (Minimum = 1/3 of maximum sentence)	1-8 1/3 (Minimum = 1 year up to 1/3 of maximum)
Class C Felony	Maximum	4 1/2-15	3-15
	Minimum	1 1/2-5 (Minimum = 1/3 of maximum sentence)	1-5 (Minimum = 1 year up to 1/3 of maximum)
Class D Felony	Maximum	3-7	3-7
	Minimum	1-2 1/3 (Minimum = 1 year up to 1/3 of maximum)	1-2 1/3 (Minimum = 1 year up to 1/3 of maximum)
Class E Felony	Maximum	3-4	3-4
	Minimum	1-1 1/3 (Minimum = 1 year up to 1/3 of maximum)	1-1 1/3 (Minimum = 1 year up to 1/3 of maximum)

^{a/} These are the general cases for these offense categories. Exceptions do exist. For example, certain class C, class D and class E felony offenders may receive a definite sentence of one year or less. For more detail see Article 70, Sentences of Imprisonment, New York State Penal Law or New York State Sentence Charts, West Publishing Co.

^{b/} For a class B "armed violent felony offense" the court may impose a minimum term which is between 1/3 the maximum and 1/2 the maximum term imposed (i.e. a minimum of 2-12 1/2).

**APPENDIX A: RANGE OF MINIMUM AND MAXIMUM
SENTENCES BY FELONY CLASS CATEGORY**

Sentence to State Prison for Second Felony Offense

<u>Felony Class</u>		<u>Legislatively Designated Violent Felony Offense</u>	<u>All Other Felony Offenses</u>
Class A-II Felony	Maximum	N/A	Life
	Minimum		6-12 1/2 (Minimum Sentence fixed by Court)
Class B Felony	Maximum	12-25	9-25
	Minimum	6-12 1/2 (Minimum Sentence = 1/2 of maximum sentence)	4 1/2-12 1/2 (Minimum Sentence = 1/2 of maximum sentence)
Class C Felony	Maximum	8-15	6-15
	Minimum	4-7 1/2 (Minimum Sentence = 1/2 of maximum sentence)	3-7 1/2 (Minimum Sentence = 1/2 of maximum sentence)
Class D Felony	Maximum	5-7	4-7
	Minimum	2 1/2-3 1/2 (Minimum Sentence = 1/2 of maximum sentence)	2-3 1/2 (Minimum Sentence = 1/2 of maximum sentence)
Class E Felony	Maximum	4 years	3-4
	Minimum	2 years (Minimum Sentence = 1/2 of maximum sentence)	1 1/2-2 (Minimum Sentence = 1/2 of maximum sentence)

**APPENDIX A: RANGE OF MINIMUM AND MAXIMUM
SENTENCES BY FELONY CLASS CATEGORY^{a/}**

Sentences to State Prison for Persistent Felony Offense

<u>Felony Class</u>		<u>Legislatively Designated Violent Felony Offense</u>	<u>All Other Felony Offenses*</u>
Class B Felony	Maximum	LIFE	9-25 Life Optional
	Minimum	10-25	4 1/2-12 1/2 (Minimum Sentence = 1/2 of maximum sentence)
Class C Felony	Maximum	LIFE	6-15 Life Optional
	Minimum	8-25	3-7 1/2 (Minimum Sentence = 1/2 of maximum sentence)
Class D Felony	Maximum	LIFE	4-7 Life Optional
	Minimum	6-25	2-3 1/2 (Minimum Sentence = 1/2 of maximum sentence)
Class E Felony	Maximum	LIFE	3-4 Life Optional
	Minimum	Statute does not specify minimum term	1 1/2-2 (Minimum Sentence = 1/2 of maximum sentence)

* Under the old law a person convicted of a third felony could be sentenced as a second felony offender.
