THE HAWAII PROGRAM

The Criminal Injuries Compensation Commission (CICC) was established by the Hawaii State Legislature in 1967 to compensate victims and dependents of deceased victims of certain crimes and to indemnify private citizens for personal injury or property damage suffered in the prevention of a crime or the apprehension of a criminal. It was the fourth state in the nation to enact a crime victim compensation program.

In accordance with Hawaii Revised Statutes 351-70, the Commission must transmit an annual report of its activities to the Governor and the Director of Budget and Finance. The following report was prepared for this purpose and includes brief case summaries of the awards, denials and withdrawals that were rendered by the Commission. To simplify and illustrate the Commission's decisions tables are provided.

The Commission has a limited budget and publicity is limited to outreach. The Administrator conducts in-service training for victim assistance agencies and medical providers. The County Police Departments are continuing to use the Victim Information Cards as a method to notify victims about the Commission's existence. However, the major source of referrals continue to come from the Office of the Prosecuting Attorney, Victim Witness Divisions throughout the State. This continued support is necessary for the Commission to reach crime victims. This liaison between the agencies is enhanced through the monthly meetings with the Victim Witness Coordinators and Directors.

What is evident is the increasing number of claims and the growing backlog of pending claims. The following table illustrates the claims received and processed from the various jurisdictions:

THE COMMISSION MEMBERS

In their second term, the Chairperson, Geoffrey Hamilton, and members Thomas Blondin and Jacob Manegdeg conducted 63 meetings. This was a reduction from the previous number of meetings that were conducted in the previous years. The reduction was due to budgetary restrictions that were imposed. Being cognizant of the State-wide budgetary restrictions, they did not want to penalize the Victims. The Commissioners increased the number of victims that are scheduled for a day of hearing and accepted the challenge before them. Monthly administrative meetings were initiated to decide claims that required a full commission and to make policy decisions.

Statutory changes which occurred during their tenure is reflected in the following:

LEGISLATIVE HISTORY

FY 1988 to FY 1993

Effective Date	Act	Description of Changes
June 13, 1988	Act 322	351-62.5 Provided for Victims or dependents to be notified of the option to have payments made on their behalf to other designated persons.

The signing of the decision and orders may be delegated to the Administrator.</p> <p>351-17 Provided that a request for reconsideration must be received within 30 days after the service of a certified copy of the decision.</p>
June 10, 1993	Act 219	<p>351-13 Provided for the commission to assign cases to the administrator for determination if the case could be adjudicated appropriately on the record and documents and the applicant has waived a hearing before the commission. If the applicant is dissatisfied, the applicant may appeal to the commission for a hearing. The commission shall review the case as if it has not been heard before.</p> <p>351-62.5 Provided for amounts received from restitution and subrogation to be deposited in the criminal injuries compensation fund.</p>

THE FEDERAL PROGRAM

The Commission continues to receive funds from the Department of Justice, Office of Crime Victim through the Omnibus Crime Package. The Federal grant represent about 40% of the awards made by the State. During this reporting period, of the total \$993,249 that was awarded, \$135,000 were from federal funds. The Federal grant is essential to bridge the gap between the periods when state appropriations are available. Without these funds, Hawaii's crime victims would be required to wait an additional three months to receive the compensation that they were awarded.

The following table summarizes the 732 completed cases during the reporting period of July 1, 1992 to June 30, 1993.

During the reporting period of July 1, 1992 to June 30, 1993 the Commission awarded \$993,249.41 to 547 crime victims. This equated to an average award of \$1,816. The following illustration show the **PERCENTAGE OF TOTAL AWARDS** of payments for medical expenses, lost earnings, funeral and burial expenses, attorneys fees and pain and suffering.

PERCENTAGE OF TOTAL AWARDS

Appendix A provides a case by case summary of the 547 awards that were completed. The total paid for medical expenses was \$481,794 or an average medical award \$880. The Department of Justice, Office of Crime Victims, Report to Congress in 1989, indicated that the national average medical award was \$1,216. By statute, the Commission is the payer of last resort. The lower cost to the Hawaii's compensation program may be attributable to our state's approach to health care. According to the Department of Health only two percent of the State's population is uninsured.

Appendix B and C Gives a case by case breakdown of the denials.

Appendix D provides historical statistical data of the Commission payments from its inception to the current reporting period ending June 30, 1993.

CONCLUSION

Since 1967, the Hawaii Commission has awarded 7,712, denied 2,618 and had 167 claims withdrawn. The monetary awards totaled \$10,251,895.16.

"Mamala-Hoe Kanawai - Compensation for Victims" Article IX, Section 10 Hawaii State Constitution. "The law of the splintered paddle, mamala-hoe kanawai", decreed by Kamehameha I, 'Let every elderly person, woman and child lie by the roadside in safety, shall be a unique and living symbol of the State's Concern for Public Safety.'

The challenges that face this and future Commission members is its role in the community and to establish its priorities. What is contributory conduct? Should the State continue to award "pain and suffering" to victims? Should secondary Victims be eligible for compensation? Should the Commission provide speedy decisions to crime victims? Should the Commission be a sounding board to the complaints about the bureaucracy and judicial system? What are the acceptable standards to complete a case?
