Maryland Data Base on Alcohol & Drug Prevention & Treatment

A Joint Project of
Maryland Governor's Drug & Alcohol Abuse Commission and
Department of Health Education, University of Maryland, College Park

INTRODUCTION

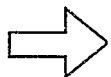

We are pleased to provide you with the 1992 Edition of the Directory of Alcohol and Drug Treatment Programs in Maryland. In developing this Directory, we have made every effort to ensure accurate representation of your program. Also, please note:

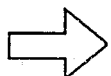

Information provided on the Directory page for each program represents only selected items from the complete data base.

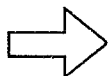

The criterion for inclusion is certification either by the Maryland Alcohol and Drug Abuse Administration or by the Joint Commission on Accreditation of Health Care Organizations.

Inclusion does not signify endorsement in any way—It is up to the consumer to make an appropriate selection.

We have made several attempts to contact all identified providers, both by mail and by telephone.

While we have tried to verify and complete the data collected, completeness and accuracy of information are limited by willingness of respondents to participate.

Upon printing and distribution of the Directory, this project is scheduled to close down.

For Additional Information, Please Contact:

Governor's Drug & Alcohol Abuse Commission, 410-321-3521

SUN			

Special Notes:
In this frame are any descriptive information, unique features or special emphasis that service providers offered about their program.

Brief description of Program Type, and special note of limitations if applicable.

These specific 3 items are "write-ins" in addition to choices in our survey.

Items indicated with "X" apply for this program. If not indicated with "X", that item does not apply. E.G., Sample Program does NOT serve ages 12 & under.

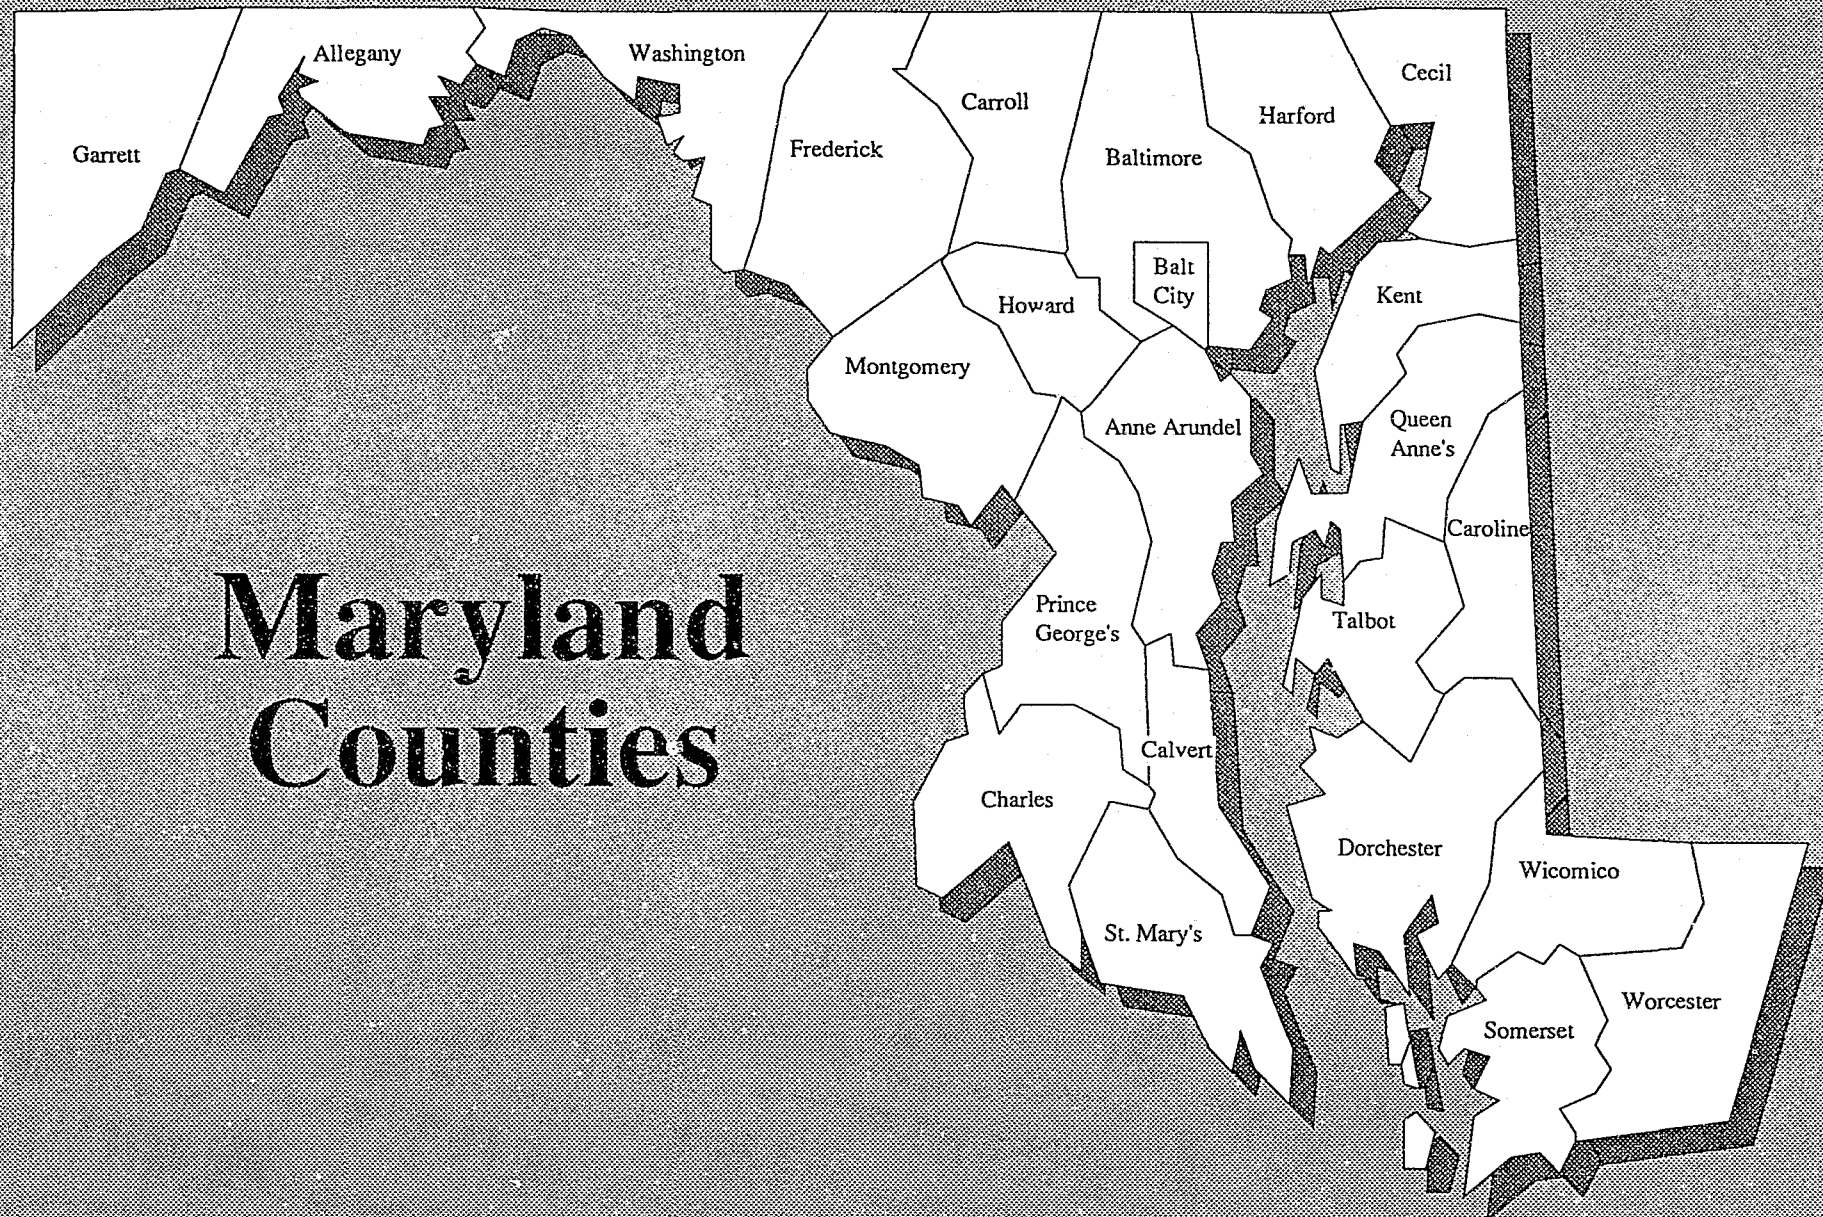

Contact service provider for more specific financial information

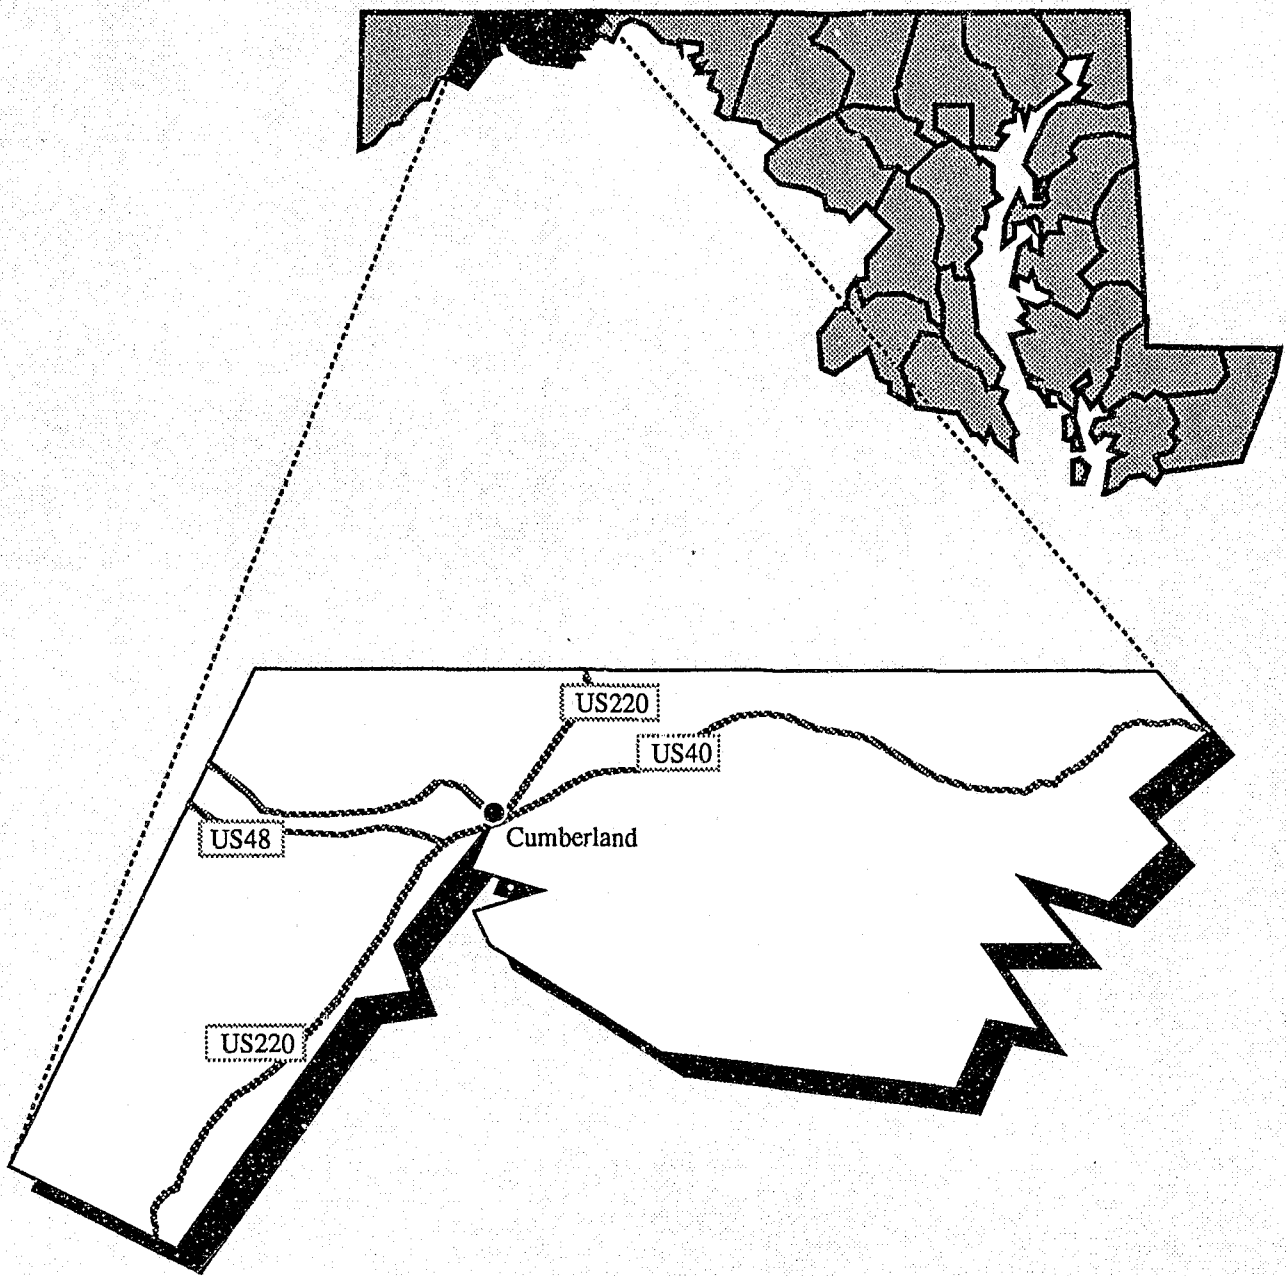

PLEASE NOTE:

All identified treatment programs are listed in the "grid" immediately following each county's map; only programs that responded to our survey are represented with an individual directory page

All identified treatment programs are listed alphabetically by program name at the end of the Directory.

Special Notes:

A diversity of specialized staff skills permits the selective application of group therapy, individual counseling, family therapy and educational and vocational services in the context of a therapeutic community. Treatment combines the basic human values of knowledge, love, honesty, responsibility and work with the dynamic instrument of intense group pressure in order to recognize and help correct the defects that prevent people from living by these values. Women who are pregnant at the time of admission to the program keep their newborns with them in the facility as they complete their treatment.

Special Notes:

The Center coordinates substance abuse treatment with stress management counseling in an effort to assist individuals in making lifestyle changes in order to improve their health status and quality of life. Individual help is given in planning and implementing behavioral changes and in integrating these changes in the client's lifestyle.

The Center also provides a comprehensive array of self-help educational programs, and comprehensive psychological and medical diagnostic services.

Special Notes:

The Substance Abuse Community Intervention Services includes some new programs and some programs which were previously administered by the Open Door Treatment Program. Substance Abuse Community Intervention Services provides substance abuse education, assessment, intervention, referral and some limited treatment services. Some of the services include: Juvenile Court Assessments, DWI Court Assessments, Substance Abuse/Sexual Offenders Education (SASOE), Family Intervention in western and southern Anne Arundel County, HIV/AIDS Outreach, Maternity and Family Planning Clinic Outreach, and HUD Drug Elimination Grant counseling in two public housing communities.

Accept Private Third Party Payment
HMO-EAP Agreement
Payment Plan Arrangements

Special Notes:

We are developed solely as an intensive outpatient program for women. We operate largely on a milieu model. This allows the clients to develop the program in conjunction with staff. We encourage clients to bring their children on occasion to best teach them parenting skills. We also have the clients actively involved in developing their treatment plans, group topics and agency events.

Special Notes:

We have recently consolidated all chemical dependency and dual diagnosis programs, both inpatient and outpatient, into a single service line. This assures rapid transition of patients from inpatient to outpatient status and includes provision for outpatient detox. Our services are comprehensive with the exclusion of methadone maintenance. We otherwise welcome all referrals.

Special Notes:

Clearview provides individual, group and family services as needed by the patient. Our groups are separated by Levels (I-Resistant/Denial; II-Court-Ordered but recognized potential problem; III-Acknowledged problem; IV-Intensive Treatment), and are limited to 8 patients per group. We also provide outpatient treatment to the dual-diagnosed, and have a special women's program as well. We have just opened a long-term, intensive outpatient program in Howard County for adolescents and their families.

Clearview provides individual, group and family services as needed by the patient. Our groups are separated by Levels (I-Resistant/Denial; II-Court-Ordered but recognized potential problem; III-Acknowledged problem; IV-Intensive Treatment), and are limited to 8 patients per group. We also provide outpatient treatment to the dual-diagnosed, and have a special women's program as well. We have just opened a long-term, intensive outpatient program in Howard County for adolescents and their families.

Special Notes:

Hidden Brook Provides the complete continuum of care from outpatient assessment & treatment, intensive outpatient programs, inpatient detox (except medical emergencies) and rehabilitation. Our program is designed to focus treatment and make it possible to provide maximum care in the shortest clinically appropriate time frame. Continuing care planning begins upon admission and often involves moving patients to intensive outpatient services. Our intensive tracks provide special treatment for women, cocaine abusers, relapse-prone individuals, male alcoholics, and black males.

Special Notes:

This Intensive Outpatient Treatment program is divided into three Phases. Each subsequent phase is less intense than the prior phase. Phase I meets four times a week; Phase II meets two times per week, and COC meets one time per week. The Intensive Program was designed to allow individuals who are employed to continue working. We have a morning and an evening program to treat 2nd shift or swing shift clients.

Special Notes:

Recovery Resources of Sheppard Pratt provides a complete continuum of chemical dependency treatment services, including inpatient, day treatment (partial hospital), intensive outpatient, inpatient and outpatient detox, specialized outpatient programs, and aftercare. Strong involvement in the 12-step fellowship programs of AA & NA is seen as an essential component of the overall treatment process.

Special Notes:

The Resource Group is a private, outpatient mental health center specializing in the evaluation and treatment of alcoholism, drug dependence, codependence, and issues of adult children of dysfunctional families. We honor and support a Twelve Step approach to recovery, recognizing that the problems we treat have spiritual as well as physical and emotional dimensions. Our clinical staff supplement "talk therapy" with a variety of experiential techniques, and we regularly offer our clients education and other opportunities for personal growth. All of our clinicians hold Master's degrees or Doctorates, and all are experienced in our specific areas of expertise.

Special Notes:

Alcoholism Treatment Services has a unique continuum of care available to alcohol and/or drug-addicted clients. We have a flexible length ICF/residential stay, with strong emphasis on transfer to the Intensive Outpatient Program. We have also recently started a partial-day treatment program as part of our Outpatient Program. Thus, we are effective in moving clients from an intensive residential treatment experience, through day treatment services, and into standard outpatient care, by a series of graduated, clinical steps. Also, it should be noted that we can treat methadone maintained clients in our residential and Intensive OP programs through cooperation with the FSK methadone program.

Special Notes:

We specialize in providing evaluation, referral and individual/family counseling services to adolescent drug abusers, many of whom meet diagnostic criteria for concomitant psychiatric disorders. The program is staffed by a master's level trained therapist who has expertise in substance use disorders, a master's level program coordinator, a doctoral level psychologist, and a psychiatrist as a medical consultant. Counseling occurs on an individual, family or group basis, and contact varies from twice a week to once a month, based on the status of the client and their family. Typically, sessions occur weekly. Urinalysis testing and supportive services are provided.

Special Notes:

We treat female addicts with methadone as a treatment resource. Clients come to treatment on a daily basis when they enter JHH CWC. They can graduate to the intermediate phase where they attend three times per week. The next level of care is the extended phase, and clients attend two times per week.

Special Notes:

To the best of my knowledge, we will be the only facility providing services to Southern Maryland residents who are unable to pay or that are uninsured. The residential program is designed to help those needy individuals make the transition from chemical dependency to productive, acceptable, socially and financially independent residents of our communities. If Federal, State and County funds become available, we plan to offer appropriate services to any indigent, needy individual. However, these individuals must be physically and psychologically stable.

Special Notes:

The treatment program has evolved into an efficient: detox, evaluation, treatment program which individualizes care per patient needs. Our assessment phase separates new patients into a group which stresses: orientation, education, preparation and disposition for treatment. Our relapse track is specially designed for patients who meet this criteria.

Special Notes:

New Beginnings at White Oak has a distinct and separate assessment phase of treatment, which lasts 5 to 10 days. At this time the patient and their family are thoroughly evaluated/assessed as to their level/involvement with chemicals/dependence. At the end of the assessment phase, a recommendation is made for continued treatment and/or discharge.

Special Notes:

Hidden Brook Provides the complete continuum of care from outpatient assessment & treatment, intensive outpatient programs, inpatient detox (except medical emergencies) and rehabilitation. Our program is designed to focus treatment and make it possible to provide maximum care in the shortest clinically appropriate time frame. Continuing care planning begins upon admission and often involves moving patients to intensive outpatient services. Our intensive tracks provide special treatment for women, cocaine abusers, relapse-prone individuals, male alcoholics, and black males.

Special Notes:

Clearview provides individual, group and family services as needed by the patient. Our groups are separated by Levels (I-Resistant/Denial; II-Court-Ordered but recognized potential problem; III-Acknowledged problem; IV-Intensive Treatment), and are limited to 8 patients per group. We also provide outpatient treatment to the dual-diagnosed, and have a special women's program as well. We have just opened a long-term, intensive outpatient program in Howard County for adolescents and their families.

Special Notes:

We are a hospital-based, short-term, inpatient program, treating chemically dependent people who have a co-existing psychiatric illness. We offer: 1) medically supervised detoxification from alcohol, opiates, benzodiazepines and barbiturates; 2) careful diagnosis and treatment of the co-existing psychiatric illness, such as post-traumatic stress disorder, major depression, bipolar illness, etc.; 3) immediate focus on education about, and acceptance of, the chemical dependency within the framework of a 12-step approach.

x Accept Private Third Party Payment
HMO-EAP Agreement
Payment Plan Arrangements

Special Notes:

We provide flexibility in meeting the clinical treatment needs of our clients while accommodating their individual circumstances. A client might spend the first one or two weeks as an inpatient, then complete the 28 day rehab program as an outpatient in intensive day treatment or partial hospitalization. Another patient may begin treatment in day rehab and complete it in the evening outpatient program. This process can work in reverse so that a client who relapses can be put into a more intensive level of treatment.

Special Notes:

Adolescent PHP is a new outpatient extension of PIMC. It is specifically geared to the out-of-control adolescent. We have a strong 3x a week CD track, morning check-in, and several family therapy programs per week. We also have a Phase II where the adolescent and parents return for 3 months, the adolescent attends alone for an additional 3 months after that. We have an active challenge therapy, and weekend adventure-based outings. We have a patient government, anger management, and many other unique programs.

Special Notes:

A diversity of specialized staff skills permits the selective application of group therapy, individual counseling, family therapy and educational and vocational services in the context of a therapeutic community. Treatment combines the basic human values of knowledge, love, honesty, responsibility and work with the dynamic instrument of intense group pressure in order to recognize and help correct the defects that prevent people from living by these values. Women who are pregnant at the time of admission to the program keep their newborns with them in the facility as they complete their treatment.

Special Notes:

The Addictions Program of White Flint Recovery, Inc. is designed to help the "multiple criminal offender." The majority of our clients have DWIs pending, previous criminal offenses, etc. We also do have a small clientele that is referred to our facility by previous clients. Our main focus is to help the individual learn about their addiction and how to live on a daily basis without any mood altering substances.

Special Notes:

At ADR, treatment programs are based on client needs; we don't fit the client to the program; we fit the program to the client. A new family component began in April 1992 and meets once a month to deal with issues facing the family of the substance abuser.

Special Notes:

A diversity of specialized staff skills permits the selective application of group therapy, individual counseling, family therapy and educational and vocational services in the context of a therapeutic community. Treatment combines the basic human values of knowledge, love, honesty, responsibility and work with the dynamic instrument of intense group pressure in order to recognize and help correct the defects that prevent people from living by these values. Women who are pregnant at the time of admission to the program keep their newborns with them in the facility as they complete their treatment.

Special Notes:

The Evening Substance Abuse Program is the only one of its type in the Tri-State area. ESAP is an individualized treatment program that places emphasis on meeting the unique needs of the client. ESAP consists of a year-long program that includes 104 group counseling sessions, Task and Recreation groups, mandatory attendance at two AA/NA meetings per week, Antabuse therapy, breathalyzer and urinalysis screenings, and individual counseling as needed. Each client entering the program also receives a physical exam by our licensed physician.

Special Notes:

The treatment program has evolved into an efficient: detox, evaluation, treatment program which individualizes care per patient needs. Our assessment phase separates new patients into a group which stresses: orientation, education, preparation and disposition for treatment. Our relapse track is specially designed for patients who meet this criteria.
