Rules of Evidence - Part VI

Review and Study Workbook

INSTRUCTIONS: This study workbook is designed to be of use both during the group discussion period and by you on your own at home. It should serve as 1) an effective aid for the group discussion which follows each television program, 2) a means of privately checking to see how well you learned the points covered in this lesson, and 3) an opportunity to review the material on your own, at home, to be sure that you have gotten all out of the program that you want to.

Here is how the Study Workbook is to be used.

FOR THE GROUP DISCUSSION PERIOD

For the group discussion periods which follow the television programs, the discussion leader will provide you with directions. Just be sure that you write your answers in the space between the dashed lines and not in the blanks of the items themselves.

FOR HOME REVIEW AND STUDY

Use the workbook for review and study on your own as follows:

Cover the printed text of the workbook with a blank sheet of paper. Slide the blank paper down until you come to an asterisk or star (*). Read the text material above the star until you come to a numbered blank. To complete the sentence correctly requires that you write an answer of one or several words.

Write the word or words in the blank space provided, which you think completes the sentence correctly.

Sometimes you will be asked to fill in more than one blank to complete an item.

After you have filled in <u>all</u> of the blanks which are contained in an item, slide the blank paper down just far enough to reveal the numbered correct answer(s) which you filled in during the group discussion period. They will correspond to the numbered blank or blanks which you have just filled in.

In this way, you can both check to see how well you have learned the content of the television program and can immediately find out, item by item, whether the answer you give is correct.

Even after the workbook has been filled in, both in the blanks and between the dashed lines, it provides an excellent means for review.

An item might go like this, for example:

The legal meaning of hearsay differs very little from its popular
meaning. With very few exceptions, any testimony given as to fact, in
either a civil or a criminal case, must be from a person who knows such
fact from (1)

Answers: (2) seen (3) heard (4) tasted (5) smelled (6) felt

And now to proceed with your study and review!

Suppose there has been a mistrial. At the second trial a key witness, who testified at the first trial, cannot be found. His sworn testimony from the first trial can/cannot (11) _____ be read into the record of the second one. Answer: (11) The hearsay rule means, generally, that a person may not testify as to anything (12) _____ by someone else, or to any fact that has been made known to the witness from any other source than his own (13) Answers: (12) It may be noted that the number of exceptions to the statement above are (14) _____. Answer: (14) One exception to the general hearsay rule is the case of (15) declarations. Answer: (15)

Even though a dying declaration may be considered to be good
evidence, it should be realized that nevertheless it is (16)

Answer: (25)

Suppose, in the case above, that the wounded man, instead of only
saying, "John Doe shot me"; had added, "I don't believe I am going to
make it." Considering the 3-requirements rule, the officer can/still
cannot (26)testify as to the dead man's statementor
dying declaration.
<u>Answer</u> : (26)
The fact that a person knows that he has been shot is/is not
(27) enough to establish the fact that he believes
himself to be dying.
Answer (27)
The words, for example, of a doctor, priest, minister, or rabbi
telling a dying person that he is going to die are/are not (28)
enough in themselves to establish a dying declaration. It must be
apparent that the dying person (29) the statements

Suppose that a doctor stated to a dying man, "You are not going to

*
<u>Answer</u> : (30)
A deceased does not necessarily have to make an oral statement,
when thinking he is going to die, for it to be accepted.
If a wounded man were not able to speak, but could communicate by
some recognized sign, such as (31), that
would be a sufficient answer.
*
<u>Answer</u> : (31)
Consider the following facts: A person is found severely wounded. He cannot speak. He is conscious, however. A police officer says to him, "You're hit pretty bad. We're trying to get help to you. You have a good
chance of pulling through!"
The wounded man shakes his head hopelessly, indicating disagreement. The officer, suspecting a particular person, says "Who shot you, John Smith?" In obvious response, the wounded man nods his head, "yes."
This could/could not (32) be admitted in evidence
because it does/does not (33) meet all the requirements

Answer: (32) (33)

Obviously, when a person dies, he is as likely to be in the presence
of a nurse, ambulance driver, attendant, or a deacon of a church as he
is to be in the presence of a doctor, priest, or a rabbi. However, it
doesn't really matter whether the person who informs someone of impending
death is technically qualified to do so. The important thing is to be
able to show that the dying man (34) he was dying.
*
Answer: (34)
If a dying man knew that the person who told him he was dying was

In comparison to prior convictions involving moral turpitude, the

<u>Answer</u> : (50)
There is good reason why the rule regarding direct evidence is much
either before or after the offense for which he is on trial, is no proof
that he is guilty of the one for which he is being tried.
The fact of another crime, if known to the jury members, would
almost certainly prejudice the case against the accused.

<u>Answer:</u> (56)

One important aspect of the legal rules of evidence involves the way evidence is handled from the time it is collected until it is presented to the court. In other words, there are legal requirements relative to the necessity that the (57) _______ of the possession of evidence must be established.

Answer: (57)

Suppose that a bottle of whiskey, taken in evidence, is placed in an unlocked general storage room so that at the trial the officer cannot truthfully say that the contents of the bottle are now the same as when he got it.

Or suppose that a murder bullet is not properly marked and kept in a safe place so that it can be traced at every single step from the time it was taken from the dead person's body until it is placed in evidence at the trial.

In both of these cases it would b	e difficult or impossible t

It is important for investigating officers to make sketches of
accident scenes and scenes of crimes. When accuracy of testimony will
