POLICE DEPARTMENT

DULUTH

MINNESOTA

MILO S. TASKY • CHIEF OF POLICE

April 7, 1975

Hon. Robert Beaudin
Mayor of the City of Duluth
Duluth, Minnesota

Dear Mayor Beaudin:

I am privileged to present to you the Annual Report of the Duluth Police Department. This, the 84th such annual report, records the activities of the Police Department for the year ending December 31, 1974.

Statistical data in this report have been compiled in strict accordance with standards prescribed by the Committee on Uniform Crime Records of the International Association of Chiefs of Police and the Federal Bureau of Investigation's Uniform Crime Reporting Program.

It is with some concern that I note the increase in the rate of criminal activity in the community. Serious crimes rose from 4,002 in 1973 to 4,637 in 1974, a 15.8% increase. This compares with a 17% increase nationwide during the year. Although the number of violent crimes declined in 1974, the rise in property crime emphasizes the area in which departmental efforts must be concentrated.

Traffic deaths decreased from 15 in 1973 to 12 in 1974 and pedestrian fatalities dropped from 5 to 4. The total number of traffic accidents investigated also decreased, with 1,838 being recorded in 1974 compared to 2,005 in 1973.

The department participated in innumerable community activities during the year. Among the appearances, talks, panels, seminars and other programs, were three "Safety On The Streets" sessions presented March 14, 1974 by the department in conjunction with the Northern Minnesota Safety Council. This program attracted more than 1,000 women.

The year to come will bring its challenges. However, I believe that our entire organization is ready and willing to meet those challenges with enthusiasm and dedication. We are indebted to you and to your staff for the continuing support extended to us during the year. We are also grateful for the assistance we received from the City Council and other City departments, courts and prosecutors, citizens, news media, business and civic community and, particularly, all the law enforcement agencies who worked with us so unselfishly.

Sincerely,
Milo S. Tasky
Milo S. Tasky
Chief of Police

Law Enforcement Code of Ethics

As a Law Enforcement Officer, my fundamental duty is to serve mankind; to safeguard lives and property; to protect the innocent against deception, the weak against oppression or intimidation, and the peaceful against violence or disorder; and to respect the Constitutional rights of all men to liberty, equality and justice.

I will keep my private life unsullied as an example to all; maintain courageous calm in the face of danger, scorn or ridicule; develop self-restraint; and be constantly mindful of the welfare of others. Honest in thought and deed in both my personal and official life, I will be exemplary in obeying the laws of the land and the regulations of my Department. Whatever I see or hear of a confidential nature or that is confided to me in my official capacity will be kept ever secret unless revelation is necessary in the performance of my duty.

I will never act officiously or permit personal feelings, prejudices, animosities or friendships to influence my decisions. With no compromise for crime and with relentless prosecution of criminals, I will enforce the law courteously and appropriately without fear or favor, malice or ill will, never employing unnecessary force or violence and never accepting gratuities.

I recognize the badge of my office as a symbol of public faith, and I accept it as a public trust to be held so long as I am true to the ethics of the police service. I will constantly strive to achieve these objectives and ideals, dedicating myself before God to my chosen profession

DULUTH - MID-CONTINENT SEAPORT

Duluth, eons ago, knew molten lava and volcanic action. Upheavals of the earth then resulted in the local Sawtooth mountain range and carved out the Lake Superior basin, the bed of which, it is believed, was at one time a desert. The area had at times been submerged by vast seas. Sometimes the climate was arctic cold; at other times it was almost tropical. About one million years ago, the Great Ice Age began. During this stage, four major glaciers advanced and receded across this area; they were the major contributors to the rugged topography of Duluth. When the glacial ice finally melted, Lake Superior and the shoreline of Duluth began to emerge. However, at that time the lake covered all the land up to the boulevard. Duluth's outcropping rocks are among the oldest known, possibly more than 700 million years, dating back even before there was any record of life on the globe. The ridge of rock above Duluth consists of a massive gabbro rock formation, a granular igneous rock composed essentially of labradorite and augite, the core of the ancient mountain range.

Duluth's first citizens were the Sioux Indians who were followed then by the Chippewas. Later came French and British explorers and the fur traders. Among them was Daniel de Greysolon Sieur du Lhut, who arrived in 1679 and raised the French flag on the shore of Lake Superior, not realizing that on this site a large and prosperous city would be built that would perpetuate his name. The population of Duluth in 1860 was about 80. The 1970 census reported it at 100,578.

Duluth was platted in 1856, organized as a township in 1857, and incorporated as a city in 1870, the year the first railroad entered the city. In 1871, the Duluth Ship Canal was cut through Minnesota Point.

Duluth adopted its first home rule charter in March, 1900, which provided for a mayor-alderman form of government. In 1912, that charter was replaced by the 1912 Home Rule Charter which provided for the Commission form of government, five elected commissioners who acted as both legislators and administrators. On March 20, 1956, the citizens voted in the Strong Mayor-Council form of government, the form under which the City of Duluth is presently operating. Minor amendments to the Charter were approved in an election on September 8, 1964.

The Mayor, his Administrative Assistant and twelve department heads constitute the administrative branch of Duluth's government; the nine council members form the legislative branch and the St. Louis County Court the judicial branch.

DULUTH STATISTICS

Land area	67.29 square miles
Length	23.25 miles
Width	8 miles (excluding Minnesota Point)
Elevation	602 to 1,481 feet above sea level
Location	Westernmost tip of Lake Superior
Dock frontage and berthing	9.7 miles
Parks	98 (3,264 acres)
Plus:	2 Municipal Golf courses
.....	10 Municipal forest areas
.....	1 Municipal Zoo
.....	950 acres - Spirit Mt. Ski Area
Streets (Improved)	517.7 miles
Sewers (Sanitary)	361 miles
Sewers (Storm)	151 miles
Population (1970 Census)	100,578

THE PATROL DIVISION

The Patrol Division, the Police Department's first line of defense against crime, is an indispensable service that is responsible for all primary police tasks and services and provides complete coverage of the city on a daily around-the-clock basis. The Patrol Division is the core of police operations and its main purpose is to protect citizens and property and reduce, prevent and suppress crime. Traffic enforcement and response to all types of emergencies are also within the scope of the division's duties. The Patrol officers' initial action at the scene of a crime or other emergency often determines the success or the failure of the police mission. The visible presence of Patrol units in the field is a deterrent to all law breakers and is a comforting sight to law-abiding citizens.

The Patrol Division is the largest division in the Police Department with 68 authorized personnel commanded by the Assistant Chief of Police. Four groups of shifts make up the division, with each group under the immediate supervision of a Lieutenant and two Patrol Sergeants. The Lieutenant is the station commander and supervises the Desk activity and handles special problems that may arise. The Patrol Sergeants work in the field supervising and assisting the patrol units.

Theoretically, the city is divided into six patrol districts. For all practical purposes, the city is patrolled by six two-man patrol units during the hours of darkness when patrol duty is more hazardous due to a higher incidence of crime. During the daylight hours, all but two of the patrol units are one-man squads.

Two Foot Patrol beats are maintained: the West End business district is patrolled on the Day watch, and the First Street beat is patrolled on Day and Middle watch from 0800 to 2400 hours. The need for police services dictates the distribution of patrol strength and prohibits the inclusion of more foot patrol beats.

In July, 1974, the City of Duluth obtained a grant from the Law Enforcement Assistance Administration to fund a Patrol Emphasis Program (PEP). This program allows the department to add two two-man squads for 8 hours each day of the week. These squads work during the hours when requests for police service are most frequent and in the areas with the greatest number of requests. The hours usually worked are from 1900 to 0300 hours but may be changed to meet special needs. No additional officers were hired to implement this program. Officers to man the two squad cars are drawn from existing personnel, patrolmen, sergeants and lieutenants, working on an overtime basis. A continuing record of the overtime worked is kept and the overtime is distributed as equitably as possible. This method of coverage has distinct advantages. Experienced officers were immediately assigned in districts where they were thoroughly familiar with both the physical terrain and the residents. Hiring additional personnel would have required training and fringe benefits for new officers at considerable expense to the city. Our total strength is minimal at best; the PEP concept enables us to strengthen our patrol during the hours of greatest activity without weakening our strength the remainder of the day when calls of a critical nature may still be received.

The Police Department maintains two snowmobiles for use in enforcing snowmobile regulations within the city limits of Duluth. Without adding personnel, the Patrol Division furnished capable, experienced operators to run these machines. The snowmobile patrol works in all areas of the city and is a deterrent to those who ignore regulations and become a danger and nuisance to the general public. The snowmobile patrol unit is also used to good advantage during blizzard conditions when travel by car is difficult or impossible.

ADULT ARRESTS FOR COURT: 1964 - 1974

DETECTIVE DIVISION

National Crime Trends:

Crime in the United States, as measured by the FBI Uniform Crime Index, increased 17% during the calendar year 1974 over 1973. This is a frightening statistic when compared to only a 5% increase in 1973 over 1972. During 1974, violent crimes as a group increased 11% with robbery showing a 14% rise. Geographically, the southern states reported the largest rise in total crime with 21% and the western states the lowest increase with 13%. Crime in 911 cities with population over 25,000 increased 15% as compared to suburban and rural areas where the increase was slightly over 20%.

Duluth Crime Trends:

Duluth's Crime Index (Total Class I Crimes) rose 15.8% in 1974 as compared to 1973. Most of this percentage increase is the result of the larceny-theft and burglary categories.

Our local drug problem is of great concern. Although no exact statistics are available, it can be conservatively estimated that over half of our crime is drug-related. This also includes juvenile offenders.

Analysis of Class I Crimes in Duluth: (All rates per 100,000 inhabitants)

Murder: There was one murder in Duluth. The national average per 100,000 inhabitants is 11.8.

Forcible Rape: There were 15 reported rapes in 1974 as compared to 16 in 1973. The national average is 35.3.

Robbery: There were 53 robberies in Duluth in 1974, compared to 73 in 1973. These figures include purse snatching. The national rate is 253.5.

Aggravated Assault: There were 35 aggravated assaults reported in 1974, compared to 19 in 1973, an increase of 84%. The national rate is 253.5.

Burglary: Burglaries increased from 1,088 in 1973 to 1,223 in 1974, an increase of 12.4%. The national rate is 1,951.7. There were 721 residential and 502 commercial burglaries in Duluth. Clearances by arrest amounted to 12.26% as compared to 7.72% in 1973.

Larceny-Theft: Increase in 1974 was 17% for a total of 2,762 as compared to 2,360 in 1973. The national rate is 3,171.2.

Auto Theft: This category showed a sharp increase of 22.9% with 548 auto thefts in 1974, compared to 446 in 1973. The national rate is 710.8.

COMMENT:

It is apparent that our major concerns are drug violations, burglaries and larceny-theft offenses.

The following tables (Page 15) are prepared for a three-year crime trend picture of local and national statistics.

NARCOTICS UNIT

The current trend in the local and area drug scene can only be described as alarming and should be a matter of great concern to everyone. Statistics for 1973 seemed to indicate a levelling off in reported incidents, investigations and arrests for drug involvement. However, this trend has been reversed recently and there has been a marked increase in the year 1974. Statistics can be sometimes confusing and hence misleading, but the following can provide some insight into the extent of the problem.

In 1973, there were 856 investigations into reported incidents of drug abuse and/or trafficking. The year 1974 brought about 852 similar investigations. Although fewer investigations were made, the number of adult arrests for possession and/or sale of controlled substances is an indication why concern should be expressed. There were 128 adult arrests in 1973, as compared to 161 in 1974, a 25% increase. Though juveniles technically are not charged with crimes, juvenile apprehensions for drug involvement in 1973 were 62, as against 132 in 1974, an increase of 113%.

Police officers in general, and the Narcotics Unit in particular, have spent countless hours in the investigation and apprehension of suspected parties. The follow-up to drug arrests, including court appearances, is one of the most time-consuming areas of police work today. Comparing the number of adults charged with the subsequent prosecution-court disposition of these same cases, it is apparent that the criminal justice system needs a serious review with respect to drug offenses. In 1974, three adults were sentenced to state penal institutions for controlled substance violations in the whole of the Duluth segment of the Sixth District of the State of Minnesota. No editorial comments could better illustrate the need for community concern.

1974

ANNUAL RETURN OF OFFENSES KNOWN TO THE POLICE

As Reported to the Federal Bureau of Investigation,
Washington, D. C.

PART I CLASSES

Classification of Offenses	Offenses Reported	Unfounded	Actual Offenses	Cleared By Arrest	Percent Cleared
Murder	1	0	1	1	100.00%
Rape	15	0	15	5	33.33%
Robbery	53	0	53	19	35.85%
Aggravated Assault	35	0	35	24	68.57%
Burglary	1,223	0	1,223	150	12.26%
Theft	2,763	1	2,762	482	17.45%
Auto Theft	555	7	548	77	14.05%
TOTAL:	4,645	8	4,637	758	

Part I Class Crimes were selected by the International Association of Chiefs of Police for use in the Crime Index because as a group they represent the most common local crime problem. They are all serious crimes, either by their very nature or due to the volume in which they occur. Basically, they can be categorized as violent crimes such as murder, forcible rape, robbery and aggravated assault, or as crimes against property, such as burglary, theft and auto theft.

The crimes used in the Crime Index are those considered to be most consistently reported to police, and the computations of crime trends and crime rates are prepared using the standard base of "Crimes Reported to Police."

IDENTIFICATION BUREAU

The Identification Bureau experienced an active year in all aspects of operation with continued expanding field investigations and the related responsibilities in the search, collection and handling of physical evidence in crimes ranging from theft to first-degree murder. Each incident investigated exhibited problems and needs peculiar to that case. The variety of evidence and the methods of handling it presented a constant challenge to the evidence technicians to insure that the evidence could be properly examined in the laboratory and could withstand presentation and cross-examination in the courts. A number of serious criminal cases of murder, rape, robbery, burglary and aggravated assault were successfully prosecuted because of the expert manner in which identification technicians accomplished their portion of the case prosecution. Identification and Detective Division personnel aided in the solution of a series of burglaries out of the city, involving local persons. The expert help given to the State investigators and other police agencies involved in the cooperative effort was noteworthy and deserving of the official commendations given to the officers engaged in the investigations.

The following is an example of some of the other activities of the Identification Division which show still further the varied and extended range of activities:

Prisoners Photographed	254
Prisoners fingerprinted	309
Fingerprint Records made	1,054
Palm Print impressions taken	128
Fingerprint records made for local file	225
Fingerprint records submitted to FBI, State Bureau, Superior PD	839
Photographs of prisoners made	4,937
Photographs furnished other agencies	2,639
Photographs furnished Traffic Bureau	609
Photographs furnished Chief of Police, Detective Inspector	603
Photographs furnished Desk Gallery	254
Prisoners Reprocessed	94
Arrested persons checked against Bureau files	3,008
Arrested persons identified	914
Photographs received from other agencies	714
Fingerprints received from other agencies	622
Fingerprints classified, searched, indexed, filed	879
Circulars received, checked, indexed, filed	282
American Bankers, Hotel-Merchants' Assoc. Bulletin items	181
Police Bulletin items	4,944
Prison and Reformatory paroles, discharges, probation lists recorded	1,463
Confidential reports received, checked, indexed, filed	567
Arrest records and dispositions filed	3,419
Investigations made	705
Deceased persons investigated	20
Prisoners photographed and fingerprinted for other agencies	35
Civil fingerprints taken in Bureau and received from other agencies	484
Civil fingerprints classified, searched, indexed, filed	94
Service record checks made for other investigative agencies	1,603
Specialized Photography:	
..... 35 mm Camera	1,996
..... Fingerprint Camera	200
..... Polaroid Photos	476

WOMEN'S BUREAU

The Duluth Police Department Women's Bureau is under assignment to the Detective Division - Juvenile Aid Bureau, to do varied protective, preventive and investigative police work concerned primarily with women and children, and to perform other work as required.

Protective duties may include taking a child into custody in accordance with the laws of arrest, or when a child has run away from his parents or guardian; when a child is found in surroundings or conditions which endanger the child's health or welfare, or when it is reasonable to believe that the child has violated the terms of his probation or parole. Children who are reportedly lost or whose home addresses are unknown are processed with speed to reunite child and parent.

Women arrested by the department's officers or by private business security officers are booked and incarcerated in the St. Louis County Jail. The majority of women are arrested for shoplifting or by warrants issued by the County and City Attorneys' offices for various criminal offenses.

The preventive duties performed by the Policewomen include patrolling known trouble areas within the city such as parks, waterfront and juvenile hang-outs; checking local liquor establishments for under-age patrons; counselling with parents and children regarding family or behavioral problems and advising of local social services available for more extensive counselling; public speaking on juvenile delinquency, self-protection for women and girls, duties of a policewoman; such speaking engagements are made with educational, civic, social and religious organizations. Policewomen also serve as guest lecturers in tutorials, sociology and psychology courses at the local college and university, and they represent the Police Department on the Executive Board of the Duluth Parent-Teacher-Student Association.

Investigative duties include receiving complaints, interviewing victims and witnesses, interrogating suspects, preparing reports, gathering physical evidence, testifying in Court proceedings and making referrals to the City and County Attorneys' Offices, Juvenile Court, Minnesota Department of Corrections, St. Louis County Welfare Department and other social service agencies in the community for further disposition of the cases.

When requested or assigned, the Policewomen assist other divisions of the department such as Vice, Auto Theft, Narcotics, Patrol and Traffic, in special investigations, patrol and surveillance.

JUVENILE AID BUREAU

In 1974, a total of 1,965 juveniles were handled by the Duluth Police Department for delinquent acts. This figure does not include juvenile traffic violations; these are listed in the Traffic Violations section (Pages 9 through 11). The 1974 figure shows an approximate increase of 25% over 1973 and is the highest number handled since juvenile record-keeping was initiated in 1941. Apprehensions in nearly all offenses showed increases, with auto theft, burglary, vandalism, narcotics and shoplifting the most notable.

The increase does not necessarily indicate any new or drastic trend for juveniles but does emphasize the seriousness of the delinquency problem. Although the statistics have varied from year to year, there has been a definite upward movement in the number of juveniles handled by Police over the years. About one-half of the cases that come to the attention of police are reprimanded and released on the police-parent level. The rest are referred to court and to social agencies for further attention. The decision to reprimand and release is based on the type of offense, misdemeanor or felony, the prior juvenile record of the child, and the information gained by interviewing the child and the parents.

If there is a trend in any specific area of juvenile behavior, it appears to be in the increase of chemical dependency in children. The number of children processed by police for chemical dependency is a very small percentage of those who use liquor and illegal drugs. This is a problem that has been developing (mostly unnoticed, until recently) and is most serious because of the effect on the health of the child. An irresponsible act of theft, burglary or vandalism can actually benefit a youth by bringing attention to the youth's behavior problem, but an addiction to liquor or drugs can cause an impairment in health for life and may sometimes result in death.

PLANNING AND TRAINING DIVISION

Planning responsibilities of this division include the writing and revision of department orders and policies, and the application, supervision and preparation of financial and progress reports for several federally-funded programs, including the Model Neighborhood Patrol.

Participating in the Police Administration Certificate Program at University of Minnesota, Duluth Extension Division were 117 officers earning a total of 2,796 credits. Eighteen officers have earned the necessary 45 credits required for the Certificate.

An 8-hour multi-media Red Cross First Aid course was instituted by the City of Duluth for all city employees and was attended this year by 37 members of the Police Department.

Firearms training: Department pistol team tryouts were held in April at the Police Range on Rice Lake Road with 39 officers participating. The top 12 shooters represented Duluth Police Department at the Hibbing Invitational Shoot, the St. Cloud Invitational, Arrowhead shoot, State shoot, Suburban Invitational, and Minneapolis Invitational, winning many first, second and third individual and team trophies. The Hibbing and Arrowhead shoots were completely dominated by Duluth shooters.

Department practical combat shoots were held in the spring and fall. Each officer was given instruction in quick draw, double action shooting with a .38, and instruction in handling and use of riot gun and 30-06 rifle. There were 109 officers participating in the spring shoot and 118 in the fall shoot. An average score of 95+ was achieved in the fall shoot.

Police Department personnel accumulated a total of 2,576 man-hours in In-service training sessions. The following is a list of training courses attended in 1974:

<u>Course</u>	<u>Location</u>	<u>Hours</u>	<u>No. Attending</u>
Workshop on Indian Relationships with the Criminal Justice System	Duluth, Minn.	8	10
ALERT Portable Breath Alcohol Screening Device Training Session	St. Paul, Minn.	8	2

Police Refresher Course	Duluth, Minn.	40	16

POLICE-COMMUNITY RELATIONS DIVISION

As stated in the previous annual report, the major goal of the Police Community Relations Division is to improve relations between the Duluth Police Department and the community it serves. Attainment and fulfillment of this goal may be reached in various ways: by establishing permanent lines of communication between the Police Department and the many organizations and agencies which represent minority groups, labor interests, business interests, youth interests, etc., for example. Improvement of police-community relations stresses a collective rather than an individual approach toward the attainment of this goal, because police-community relations is, in a broader sense, a goal and responsibility of the entire department. The fostering of better relations between a few individual police officers and a few members of the public would hardly benefit the entire Police Department and the public it serves. Therefore, stress on the collective approach toward the attainment of this goal cannot be emphasized too strongly.

The Police-Community Relations team participated in 58 meetings and 50 talks involving 2,347 people from various segments of Duluth's community - schools, churches, civic organizations and many other groups. The officers provided 37 ride-alongs in police cars and conducted 24 tours of Police Headquarters involving a total of 746 people. The majority of people involved in these activities were youths. In addition to the above-mentioned activities, the Police-Community Relations unit engaged in 19 other activities, such as special parties and recreational activities, with 1,154 young people from Duluth's community. Prior to the closing of the Police Drop-In office in March, 1974, there were 3,285 visitations to that facility. Approximately 93% of the visitations were by youths, eight to fifteen years of age. Also, the Police-Community Relations team acted on 190 citizen complaints and requests for service during 1974.

The Duluth AFL-CIO Community Services Activities sponsored a "Criminal Justice Training Course" for interested citizens in March, 1974. The Police-Community Relations director instructed the "Law Enforcement" component of the course. Among other things, the Police-Community Relations team participated in the "Career Exploring Program" and the "Children and the Law" program in Duluth public schools. The former program is sponsored by the Exploring Division of the Lake Superior Council, and the latter by the Minnesota State Bar Association.

Due to funding difficulties, there was a progressive reduction in the scope and size of the Police-Community Relations operation during 1974. The Police Drop-In Office which was located in Block 113 just east of Washington Junior High School, was closed March 25, 1974, after the Housing and Redevelopment Authority had acquisitioned the property and building to provide space for the erection of a new community complex in that block to serve the Central Hillside area. The services of the two community aides who staffed the office were terminated on that date and the aides were subsequently placed with another City of Duluth agency. In April, one Police-Community Relations officer was reassigned to the Patrol Division and the services of another officer were terminated effective January 1, 1975. The latter officer was assigned to work in the Detective Division. There will be office space provided in the new community complex for utilization by the Police-Community Relations operation.

It is the responsibility of the License Inspector to supervise the enforcement of the licensing provisions of the Duluth City Code. All applications for city licenses are forwarded to him for investigation and a recommendation of approval or denial.

The License Inspector is a police lieutenant who also serves as the department Training and Planning officer. The department Vice Officer assists with the licensing duties.

In 1974, the City of Duluth issued a total of 3,298 licenses which added a net total of \$219,277.63 to the city general fund. This is an increase of \$5,284.00 over 1973. The various licenses issued in 1974 are listed above.

The department Vice Officer has the primary responsibility for the control of prostitution, obscenity, gambling and liquor law violations in the city.

Compared to national standards, the vice problem in Duluth is very minor. One continuing problem is the sale and distribution of obscene materials and the showing of obscene films. The police department and city attorney's office are working together to control this problem but legal technicalities are making it very difficult. A second problem is the problem of obtaining convictions against liquor licensees for the sale of alcoholic beverages to a minor, due in part to a reluctance on the part of the Courts to accept the testimony of the minor involved.

TRAFFIC DIVISION

Enforcement and control of Traffic including Accident Investigation is one area of police activity that is the responsibility of all uniformed officers, but is the primary responsibility of the Traffic Division. The use of Selective Enforcement, Radar and sophisticated accident investigation equipment and methods necessitates a specialized Traffic Bureau with the latitude to perform city-wide without sector boundaries as is the case for the Patrol Division. Traffic functions of all uniformed officers are under the "policy" control of the Traffic Inspector who, in addition, exerts "command" control over Traffic Division personnel. Following is a list and record of activities of the Traffic Division for 1974:

I. Traffic Law Enforcement

- A. Moving Violations: 4,820 arrests which is 76% of the Police Department total of 6,015. Radar was responsible for 3,769 of the Traffic Division arrests. All moving violation arrests and requests for warrants are processed through the Traffic Division office. This includes a driver license record check prior to a court appearance. There were 425 warrant requests submitted to the City Attorney's office, issued and served.
- B. Parking Violations: There were 48,541 citations issued which is 80% of the department total of 61,698. About 35,000 citations were issued by the parkettes as part of the Traffic Division total. 1,119 warrants were issued and served for Failure to Appear on Parking citations.

II. Accident Investigation

There were 919 on-scene investigations of a department total of 1,566 for which State reports were made. In addition, 272 on-scene investigations of minor accidents were made. The specialized Accident Investigation squad made 708 accident investigations on the scene; 162 at the hospital; 166 assistance to other squads; 516 hit-and-run investigations; 200 miscellaneous calls; 1,101 photos taken at accident scene; 135 photos taken of other crime scenes.

III. Miscellaneous Activities

- A. Breathalyzer: Eleven of the 14 certified operators of the Breathalyzer instrument are Traffic Division personnel. These officers made 268 breathalyzer tests of drivers apprehended by Duluth police in 1974 at a saving of \$3,216.00 to the city. There were 72 blood alcohol tests made at a local hospital at a cost to the city of \$12.00 each. Fifty-seven breathalyzer tests were made by our officers for the Minnesota Highway Patrol and other police jurisdictions.
- B. Training: Six officers attended Breathalyzer certification school; eight officers attended Breathalyzer Recertification school.
- C. Calls: Fire Alarms: 408; Police: 540; Parking: 1,478
- D. Driver License Violations: Contacts: 293; Pickups: 151; Examinations recommended: 15.
- E. Accident Records: 7,981 copies of accident reports sold to attorneys, insurance adjusters and the general public; income, Copier: \$3,990.50.

Previous annual reports from this division documented the seriousness of the drunken driver problem in Duluth. The City's Traffic Safety Coordinator took this information to officials of the Minnesota Department of Public Safety and the National Highway Traffic Safety Administration. These agencies approved expenditure of federal monies for the purchase of a van-type vehicle, housing breath-testing equipment, and the cost of the two officers necessary to initiate a concentrated attack on Duluth's drunken driver problem. Funding for the program has been approved for three years. The project is patterned after Alcohol Safety Action Programs in major metropolitan areas. The Duluth program is a pilot project to determine if this action will be effective in smaller cities.

The mobile breathalyzer van provides greatly increased efficiency for the police officer. In the past, an officer had to abandon his patrol responsibilities to bring a drunk driving suspect to headquarters for the chemical test. Now, that officer turns the suspect over to the van operators and may resume his regular patrol. In addition, the van operators have become increasingly proficient in spotting DWI suspects, and have made arrests through their own action.

Comparison of arrests and tests for Drunken Driving for a comparable period in 1973 without the Van is the only criterion available to evaluate the program at this time. Increased highway safety, the optimal result, is of record but too infantile to project. Following is the record of the Breathalyzer Van since its inception on October 18, 1974, and a comparison with the same period of 1973:

	<u>ARRESTS</u>	<u>CHEMICAL TESTS</u>
October 18, 1974 to January 1, 1975:.....	89	107
October 18, 1973 to January 1, 1974:.....	37	40

TRAFFIC FATALITIES

No.	Type	Age of Victim	Offense
* 1.	Auto-Pedestrian	7	None. Child on sled was sliding into street from off street.
* 2.	Auto-Pedestrian	3	Pedestrians, mother and two children were walking on wrong side of roadway in early morning darkness.
* 3.	Auto-Pedestrian	58	Drunk Driver, charged with DWI (Driving While Intoxicated).
4.	Truck-Fixed object	22	Driver killed; Blood Alcohol over legal limit.
5.	Auto-Truck	61	Driver killed; auto struck rear of parked truck.
* 6.	Motorcycle-Pedestrian	66	Driver of cycle charged with Criminal Negligence; Blood Alcohol .17
7.	Auto-Fixed Object	17	Driver struck bridge; driver killed. BA .12; passengers were fatalities No. 8 and 9, listed below.
8.	Auto-Fixed Object	17	Passenger in vehicle in No. 7, above.
9.	Auto-Fixed Object	18	Passenger in vehicle in No. 7, above.
10.	Truck-Parked truck	21	Runaway truck.
11.	Auto-Fixed Object (Rock)	76	Driver had seizure; ran off roadway into Point of Rocks.
12.	Auto-Fixed Object (Pole)	17	Passenger killed; driver charged with Criminal Negligence; Blood Alcohol .219

Driving While Under the Influence of an Alcoholic Beverage was responsible for at least five of the above accidents resulting in seven deaths. Two drivers were charged with Criminal Negligence in the Operation of a Motor Vehicle (felony); one was charged with Driving While Intoxicated, and two were fatalities.

* Of the four pedestrian fatalities, two were struck by drunk drivers; the other two were children (ages 3 and 7) who were in hazardous positions by committing pedestrian violations.

The following table shows the yearly average of traffic deaths for the period from 1925 to 1974; for the period from 1965 to 1970, and for the years 1971, 1972, 1973 and 1974:

Years	Total Fatalities Average/Year	Total Pedestrians Average/Year
1965-1970	18.0	7.5
1971	30.0	16.0
1972	24.0	5.0
1973	15.0	5.0
1974	12.0	4.0
1925-1974 (Over-all average)	18.0	10.6

TYPES OF MOTOR VEHICLE ACCIDENTS (Two-Year Comparison)

* ENFORCEMENT INDEX

* The traffic enforcement index reflects traffic law enforcement in relation to the number of injury accidents. An index figure of 10.0 is considered an acceptable level of enforcement:

	1974	1973
1. Traffic Accidents	1,838	2,005
2. Fatal Traffic Accidents	10	14
3. Deaths from Traffic Accidents	12	15
4. Personal Injury Traffic Accidents	375	430
5. Property Damage Traffic Accidents	1,453	1,561
6. Arrests for All Traffic Violations	68,696	52,988
7. Arrests for Moving Violations	5,661	5,779
8. Convictions for all Traffic Violations	68,694	52,984
9. Convictions for Moving Violations	5,659	5,775
10. Hit-Run Accidents	847	739
11. Hit-Run Accidents Cleared	304	267
12. Accidents Investigated	1,566	1,698
* Enforcement Index	16.2	13.4

TRAFFIC DIVISION - (Continued)

The Traffic Division handled 191 special events during 1974 at a cost of 700 man hours in overtime plus 397 man hours of assigned regular time.

Some of the major events were as follows:

- Parades:
 1. Memorial Day
 2. Christmas City
 3. Duluth Heights Winter Frolic

- Other Events:
 1. Arena-Auditorium events
 2. Athletic contests
 3. Alcohol Safety Action Program (ASAP) Breathalyzer Van
 4. Vehicle Inspection with Minnesota Highway Patrol
 5. Bicycle Safety Inspection
 6. Grand Opening - Spirit Mountain Ski Area

SCHOOL POLICE PATROL

The School Police Patrol is under the supervision of a Traffic Division police officer who devotes full time during the school year to promoting pedestrian-student safety.

Patrol members receive instruction in their duties, training and periodic inspection at crossings under actual working conditions. Pedestrian safety talks were given to all elementary school students; there were 411 such talks given in individual classrooms and general assemblies.

Safety conditions at school crossings and on school routes are studied and potential hazards are eliminated where possible. Violations at school-police-officer crossings are investigated, and if evidence indicates, the violator is charged. The effectiveness of this program is illustrated by the outstanding record school police have achieved in our 48 years' work of supervisory school crossings. These school police officers are all sixth grade students, both boys and girls. No student has been killed at a supervised intersection.

A cooperative bicycle safety program was conducted last year in all Elementary schools with the assistance of the Board of Education School Safety Department. It consisted of a movie and instructions in safe bicycling. This program was followed with bicycle safety inspection.

The School Police Director attended 16 PTA meetings and conducted 27 tours of the Police Department for various visiting groups including Cub Scouts, Girl Scouts, school classes, etc.

The Traffic Division sponsors several free movies and the annual picnic for the 700 School Police officers; these events are financed entirely by contributions of civic-minded Duluthians. Food, candy, beverages, rides and prizes for the participants are furnished at a cost of about \$3,000.00.

For most children in the City of Duluth, the initial image of a police officer is formed after contact with the school-police-patrol officer and becomes one of our best crime prevention measures.

THE COMMUNICATIONS DIVISION

At mid year a contract was awarded that will replace all police radio equipment, including mobiles, base stations, portables and operating consoles. This equipment is funded under a grant provided by the Law Enforcement Assistance Administration. Seventy-five percent (75%) of the equipment cost is being borne by the federal grant. This project is to be completed by July, 1975.

The replacing of police radios includes a frequency change to conform to the State plan and should reduce the co-channel interference from non-local users. The radios include one local channel for Duluth police only, one channel shared by law enforcement agencies and an emergency channel that will be monitored throughout the State of Minnesota.

Some of the City of Duluth's radio base station equipment was moved to the new tower on Observation Road during the year to improve radio coverage. The main Fire Department, main Water and Gas Department and a temporary police base used this new tower facility.

New two-way radios were added to the various city departments to expand their radio-equipped fleet. This amounts to just over a ten percent (10%) increase in radio units.

About 27% of the radio-equipped vehicles were replaced in 1974, requiring removal, reconditioning and replacement of two-way radios.

Service technicians continued to provide relief duties at radio dispatch and telephone switchboard positions during the year.

During the first three quarters of 1974 the number of radio log sheets generated, which is an indication of the amount of traffic handled, increased slightly more than one percent over the corresponding period in 1973. With the implementation of the Patrol Emphasis Program, in the last quarter of 1974, with its requirements for additional information for record purposes, the number of typewritten log sheets increased a dramatic 31% over the same quarter in 1973.

The technical personnel maintain radio equipment for several governmental agencies. Each agency and its percentage of the total number of two-way units serviced is listed as follows:

Duluth Police Dept.	Sheriff	Proctor/US Customs UMD and Townships	Water & Gas	Public Service	Fire	Hospital & Ambulance
21%	6%	8%	22%	21%	18%	4%
Police Services - 35%			Non-Police - 65%			

The Duluth Police Department received funds under a Law Enforcement Assistance Administration grant to provide portable alarm data transmitter encoders and decoder displays. The complete system was not available commercially; however, equipment from several manufacturers was obtained and other circuits were developed by this shop to complete the system.
