## ACKNOWLEDGMENTS

This report was prepared for the Law Enforcement Assistance Administration by the Bureau of the Census. In the Law Enforcement Assistance Administration, general supervision was supplied by Charles R. Kindermann, assisted by Paul D. White. In the Bureau of the Census, Crime Statistics Analysis Staff, general supervision was supplied by Robert P. Parkinson. John F. Wallerstedt directed the project. The text was written by Mary K. Cantwell. Collection of data was supervised by Kenneth R. Brimmer, Demographic Surveys Division, assisted by Thomas W. Petersik.

(National prisoner statistics bulletin; no. SD-NPS-CP-2) 1. Capital punishment--- United States--- Statistics. I. Title. II. Series. 75-619081 364.6'6'0973 HV8699.U5U53 1975a

This report, one in the series on Capital Punishment published as part of the National Prisoner Statistics (NPS) program, provides information on prisoners under sentence of death during calendar year 1973. The total number of such prisoners is presented on a national, regional, and State basis both for the beginning of the year and for the end. As in past issuances of this series, inmates under sentence of death are differentiated by age, sex, race, offense for which sentenced, and duration of stay on death row; for the first time, they are also categorized by marital status, level of educational attainment, and legal status at the time of arrest. The report also gives data for 1973 on the number of new death sentences meted out and on the number of sentences disposed of by means other than execution. It also includes information showing trends in executions during the period from 1930 to 1967, the year of the most recent execution in the United States, and data on developments affecting the legal status of capital punishment during 1973. Two changes in format initiated in the report covering the years 1971 and 1972 were carried over into the 1973 study. First, the various types of transactions resulting in the removal of the death sentence, including commutation, resentencing, grant of new trial, and reversal of judgment, are combined into a single category. Second, the official count of inmates under sentence of death now includes escapees, persons returned to the courts for further adjudication, and inmates transferred from death row to such noncorrectional institutions as mental hospitals. Based on a voluntary reporting system, the NPS program was instituted to collect and interpret data on immates of State and Federal correctional institutions. The program was initiated by the Bureau of the Census in 1926 and was transferred to the Bureau of Prisons in 1950 and to the Law Enforcement Assistance Administration (LEAA) in 1971. Since 1972, the Bureau of the Census, acting as collecting agent for LEAA, has had responsibility for compiling the statistical data required.

The number of prisoners under sentence of death in the United States declined by 55 percent during 1973, the second straight year in which there were fewer inmates on death row at the end of the year than at the beginning. On January 1, 1973, a total of 359 prisoners were under sentence of death.<sup>1</sup> During 1973, an additional 42 persons received the death penalty, but 3 inmates were released from custody, 1 was killed after having escaped from prison, and 235 had their death sentence status changed as a result of commutations, resentencings, grants for a new trial, or reversals of judgment. Thus, on December 31, 1973, the death row population numbered 162. All were under the jurisdiction of State or District of Columbia correctional authorities, there having been no inmates under sentence of death in Federal prisons at any time during the year. Following at least a decade during which the yearend death row population rose annually, the downturn in 1973, following that in 1972, stemmed directly from the unprecedented number of changes in death sentence status in the wake of the U.S. Supreme Court finding in the case of Furman v. Georgia, June 29, 1972, that the death penalty, as imposed up to that time, amounted to "cruel and unusual punishment" in violation of the Eighth Amendment to the Constitution of the United States. Subsequent to that decision, many States began to revise their death penalty statutes in an attempt to meet the objections of the Court. Pending completion of such legislative action and in the face of actual or anticipated challenges to such action in the courts, a majority of the States continued the practice, begun in 1972, of reviewing death sentences handed down before Furman and of invoking the death penalty rarely, if at all. The number of changes in death sentence status effected in 1973 was the largest in any year since 1961, except for 1972. The number of death penalties meted out in 1973 was

<sup>1</sup>Figure revised from that appearing in <u>Capital Punishment</u> 1971-72, NPS Bulletin SD-NPS-CP-1, December 1974, to reflect 30 prisoners sentenced to death before January 1, 1973, who were not reported by the States in earlier counts and 1 prisoner who was erroneously listed on death row in 1972. The 30 prisoners previously unreported are listed as "other admissions" in Tables 4, 5, and 6, in accordance with past NPS practice.

## GENERAL FINDINGS

the lowest recorded in any year since at least 1961. Moreover, death sentences were imposed in only seven States in 1973.

At the beginning of 1973, 27 States and the District of Columbia held prisoners under sentence of death; 23 States had no such inmates. During the next 12 months, the number of prisoners being held for execution declined in 23 of the 28 jurisdictions having such inmates on January 1, including 9--Arkansas, Colorado, Connecticut, Delaware, Kansas, Oklahoma, South Carolina, Texas, and Washington--in which the number was reduced to zero. The number rose in four States--Florida, Massachusetts, North Carolina, and Utah--and remained the same in one--Mississippi. Thus, at yearend 1973, 18 States and the District of Columbia held prisoners under sentence of death; 32 States did not.

Regionally, the South showed the highest proportion of condemned prisoners at the end of 1973. Moreover, only in the South was the death row population dispersed in more than a few States. Ten of the 17 jurisdictions in the South (including the District of Columbia) held inmates awaiting execution at the end of 1973, compared with 3 of the 9 States of the Northeast, 3 of the 12 States of the North Central Region, and 3 of the 13 States of the West. Furthermore, in the Northeast, the North Central Region, and the West, one State alone accounted for a majority of the region's death row population. Massachusetts, for example, accounted for 74 percent of all prisoners under sentence of death in the Northeast, Illinois for 61 percent of those in the North Central Region. and California for 81 percent of those in the West. With 30 inmates awaiting execution at the end of 1973, California had the largest number of prisoners under sentence of death, and accounted for 19 percent of the national total. It was followed by Massachusetts, with 25 death row inmates, and North Carolina with 22.

## Prisoners under sentence of death

The typical inmate under sentence of death at the end of 1973 was a 31-year-old male high school dropout who had been convicted of murder and who had already spent  $37\frac{1}{12}$  months on death row. Blacks made up 50 percent of the prisoners under sentence of death; except for one American Indian and one Oriental, the remainder were whites.

we want the second s

- 2

On December 31, 1973, the median age of prisoners on death row was 31 years, compared with 30 years at the end of both 1971 and 1972. The youngest inmate under sentence of death was age 19; the oldest was age 73. The median age was slightly higher in the North Central Region (35 years) than in the other three regions. It was 31 years in the Northeast and 29 years in both the South and the West. Florida's median age of 24 years was the lowest among the States; Georgia's median age of 38 years was the highest.

As in past years, males predominated overwhelmingly on death row. Only three women, two in Georgia and one in North Carolina, were under sentence of death at the end of 1973.<sup>2</sup> Three women who were held under such status in California at the beginning of the year had their sentences reversed.

Blacks historically have made up a proportion of the death row population in excess of their representation in the national population. At the end of 1973, they accounted for exactly half the total. On a regional basis, the proportion of blacks among prisoners under sentence of death was nighest in the South (63 percent), lowest in the North Central Region (28 percent). When considered in relation to the proportion of blacks in the total population of each region, however, black overrepresentation on death row was shown to be less pronounced in the South than in the other three regions.

Murder traditionally has accounted for the preponderance of death penalties handed down in the United States. At the end of 1973, 146 prisoners, or 90 percent of those on death row, had been convicted of murder. Of the remaining 16 inmates, 13 had been convicted of rape, 1 of kidnaping, 1 of assault by a prisoner serving a life term, and 1 of burglary. All inmates under sentence of death for rape had been sentenced by jurisdictions in the South. Of those awaiting execution for rape at the end of 1973, blacks accounted for 69 percent, a proportion lower than that at the end of both 1971 and 1972.

<sup>2</sup>One of the women under sentence of death in Georgia was not reported in either 1971 or 1972, although she was sentenced in 1958.

622

3

The second se

Excluding five prisoners for whom marital status data were not reported, 43 percent of the inmates under sentence of death at the end of 1973 had been married at the time of their first imprisonment for a capital offense, 18 percent had been divorced or separated, 3 percent had been widowed, and 36 percent had never been married. When these proportions were compared with those ascertained by the 1970 census for the civilian male population age 18 and over, the most nearly comparable group, it was shown that prisoners on death row were much more likely never to have been married or to have been divorced or separated than their counterparts in the general civilian population. The proportion of black inmates who had never been married was 41 percent, compared with 30 percent among white inmates.

Information on the number of years of school completed at the time of first imprisonment for a capital offense was collected for 128 of the 162 prisoners on death row on December 31, 1973. Of these 128, 77 percent had completed 8 years of formal education, but only 27 percent had finished high school and only 5 percent had received any college training; 15 percent had no more than a sixth grade education. These figures show that prisoners under sentence of death at the end of 1973 had markedly lower levels of educational attainment than the general civilian population. Among inmates whose level of educational attainment was reported, blacks had had slightly more schooling than whites. Whereas 75 percent of the whites had completed 8 years of formal education. the proportion among blacks was 79 percent. Thirty percent of the black inmates under sentence of death had been graduated from high school, compared with 25 percent of the whites. Six percent of the blacks and five percent of the whites had some college training.

Of the 130 prisoners on death row at yearend 1973 for whom the relevant information was reported, 80 percent (87 percent of the blacks and 72 percent of the whites) had been neither in prison nor on probation or parole at the time they were arrested for their capital offense. Of the remaining 26, 14 were on parole at the time of their arrest, 5 were in prison, 5 were on probation, and 2 were escaped convicts.

Of the 162 prisoners under sentence of death at yearend 1973, 127 had been sentenced under statutes enacted before the Furman decision, as shown in the following ta

Alabama Arizona California District of Columbia Florida Georgia Tllinois Indiana Kentucky Louisiana Maryland Massachusetts Mississippi Missouri New York North Carolina Pennsylvania Utah Virginia Total

More than one-fifth of the inmates under sentence of death at the end of 1973 had received the death penalty during 1973. By contrast, 37 prisoners had spent at least 8 years on death row, the longest period of time being 25 years and 7 months.<sup>3</sup> The median number of months was  $37\frac{1}{2}$ , roughly the same as at yearend 1972 but substantially higher than during the 1960's. Regionally, the North Central Region recorded the

<sup>3</sup>The prisoner who had spent the longest period of time on death row was not reported in either 1971 or 1972, although he was sentenced in

5

After with, 's contra the lowest was in the South, 15 months. The with author of contra spent on faste row was highest in Indiana (135 wards,, fillows by Pangfranis "S), and Taninchy (22).

## Sentin HICKESSEE STORES

Fritz-ino persons (in man and 1 monar.) receiped the death penalty insting 1976, 32 for murder, 7 for rape, and 1 for burglary. Two States-Name. Namilian which 22 and Floride which 12-accounted for 81 percent of the 1994. Book States were among the first to change their death penalty statistics is an extended to meet the objections of the Sourt in the <u>Furmen</u> deviction. (See "Legal Status," pages 8-9 and 52.) In addition, there were four tests sentences handed down in Massachusetts and one each in Alexane, Louisiane, Benneylvande, and Utah. Elacks made up 64 percent of Mone receiving death sentences in 1973, compared with 60 percent in 1976, and 51 percent in 1971.

Research committed to desth row during 1973 were, on the average, young, election two-thirds being under age 26. Only two persons over age We received the desth penalty. Seventy-mine percent had completed 8 years of formal education, but only 33 percent had finished high school. Blacks restanced to desth during 1973 had had substantially more schooling than their white counterparts; for example, 14 percent of whites had completed high school, compared with 44 percent of blacks. Of persons sentenced to death during 1973, 43 percent had never been married, 38 percent were married at the time of first imprisonment for their capital offense, 14 percent were divorced or separated, and 5 percent were widowed. White immates were more likely to have been married at the time of imprisonment then black prisoners. Thirty-four of the 42 prisoners sentenced to death during 1973 were not under sentence at the time of arrest for their capital offense, four were on probation, two were on parole, and two were escaped convicts.

## Dispositions from the death penalty

The status of 239 death row inmates was changed during 1973. Most received lesser sentences as the result of such actions as commutations, resentencings, reversals of judgment, and grants for new trials. Three prisoners, however, were released from custody, and one was killed after escaping from prison. The dispositions were distributed by type of crime in more or less the same proportion in which each type of crime prevailed among the total death row population. Similarly, distribution by race was fairly proportional to that of the racial composition of the population under sentence of death. Median age was 27 years among those inmates whose death sentence status was changed during 1973. Almost half had spent at least 4 years on death row before their death sentences were put aside. The median number of months spent under sentence of death was 44, compared with 46 for those whose death sentence status was changed during 1972.

## Executions

The year 1973 was the sixth in a row during which no one was executed in the United States. The last execution took place in Colorado on June 2, 1967. During the period 1930-67, 3,859 persons were executed under civil jurisdiction--3,826 by State authorities and 33 by the Federal Government.<sup>4</sup> Of the total executed, 3,334, or 86 percent, had been convicted of murder; 455, or 12 percent, had been sentenced for rape; and the remainder had been found guilty of such offenses as robbery, kidnaping, burglary, sabotage, aggravated assault, and espionage. Some three-fifths of the executions in the United States during

Some three-fifths of the executions in the United States during 1930-67 were carried out in the South, as shown below.

The largest single number of executions (366) took place in Georgia, followed by New York (329). Three other States---California, North Carolina, and Texas---each carried out more than 200 executions during the 1930-67 period.

Over the 38-year period, blacks accounted for 54 percent of those executed, whites for 45 percent, and members of other races for 1 percent. The proportion of executions involving blacks varied significantly from year to year. Blacks made up some 72 percent of all those executed in the South during 1930-67; corresponding proportions for the Northeast, North Central Region, and the West were 29 percent, 36 percent, and 16 percent, respectively. The imbalance in the proportion of executions involving blacks was most pronounced with respect to rape. Whereas blacks accounted for 49 percent of those executed for murder during 1930-67 (and 44 percent of those executed for "other" offenses), they made up 89 percent of those put to death for rape. In 9 of the years during the 1930-67 period, blacks constituted all of those executed for rape, and only in 3 years did the proportion fall below 80 percent. With the exception of seven executions in Missouri, all executions of blacks for rape took place in the South.

Of the total of 42 executions involving members of races other than white and black, 19 concerned American Indians; 13, Filipinos; 8, Chinese; and 2, Japanese. Except for two American Indians executed for rape, all had been convicted of murder. During 1930-67, a total of 32 women were executed, including 2 who were put to death by Federal civil authorities. Legal status of the death penalty

At the time of the <u>Furman</u> decision, 39 States and the District of Columbia had statutory authority to invoke the death penalty for a variety of crimes ranging from murder to armed robbery; 11 States had no capital punishment statutes. Between June 29, 1972, the date of the <u>Furman</u> decision, and December 31, 1973, only 1 of the 11 States previously without death penalty statutes instituted capital punishment: the voters of California reinstated by referendum the legislation annulled earlier by the State Supreme Court. Of the 40 jurisdictions with capital punishment statutes at the time of <u>Furman</u>, 18 subsequently enacted revised laws that

8

were still in effect on December 31, 1973, and 1 (Tennessee) passed revised legislation that was declared unconstitutional by the State Supreme Court before the end of 1973. The Delaware Supreme Court (in November 1972) and the North Carolina Supreme Court (in January 1973) struck down provisions of pre-<u>Furman</u> laws that left the imposition of the death penalty to the discretion of a judge or jury or allowed a jury to recommend mercy upon convicting a person of a crime legally punishable by death, but allowed other provisions of the statutes to remain in force. The remaining 19 jurisdictions had taken no final action by yearend 1973 to revise existing laws or enact new ones, although by the end of the year courts in at least 4 of the 19 had declared existing legislation to be unconstitutional in light of the Furman decision.

Revised capital punishment statutes have been designed to overcome the U.S. Supreme Court objection that the old laws allowed the death penalty to be imposed in such an arbitrary and capricious manner that they were in violation of the Eighth Amendment prohibition against "cruel and unusual punishment." These revised statutes attempt to eliminate all possibility for the discriminatory application of the death penalty by making it mandatory for all who are found guilty of committing certain crimes, especially for specifically defined types of muder, such as murder of a law enforcement official, murder by a prisoner serving a life sentence, murder for pecuniary gain, and murder during the perpetration of a felony. Some States continue to authorize the death penalty for all premeditated murders or for rape, burglary, arson, and treason. In addition to specifying in detail the types of crimes that constitute capital offenses, most revised statutes also make imposition of the death penalty contingent upon at least one aggravating circumstance to the crime and no mitigating circumstances. These circumstances, varying from jurisdiction to jurisdiction, are spelled out separately in the statutes and are generally weighed by the jury or judge at separate sentence hearings. Whether or not the revised statutes meet the criteria set down in the Furman case remains to be determined by the courts.

9

## METHODOLOGY

This report is based upon information for 1973 provided by correctional authorities in the 50 States and the District of Columbia in response to a mail canvass and upon historical data appearing in previous reports in the <u>Capital Punishment</u> series.

In the mail canvass, each jurisdiction was asked to complete a form for each prisoner under sentence of death during 1973, providing information on such characteristics as sex, race, date of birth, offense for which sentenced, legal status at time of arrest, marital status and educational attainment at time of imprisonment, date of first sentence to death, and status on December 31, 1973. Included in the count were condemned persons in States granting principal jurisdiction to the county of conviction if such persons had at any time entered a State correctional facility. Excluded were prisoners under sentence of death who remained within local correctional systems pending exhaustion of the appeals process or who for other reasons had not been committed to prison at the time of the canvass. If a capital sentence was imposed for more than one offense, only the most serious was tallied, although secondary offenses were footnoted. Multiple counts of the same offense were treated as a single offense. Incomplete data, as well as information inconsistent with earlier years, were augmented or clarified through telephone followups to the mail canvass. The final response rate was 100 percent.

NOTE: xx signifies that the death penalty was illegal during entire period covered by this table. <sup>1</sup> In this category, the 8 Federal executions were for sabotage (6) and espionage (2). The 9 executions in North Carolina and the 2 in Alabama were for <sup>2</sup> burglary. In California, the 6 executions were for aggravated assault committed by prisoners under a life sentence. <sup>3</sup> See Table 24 for periods during which death penalty was in effect. <sup>3</sup> Alaska and Hawaii abolished capital punishment in 1957, when territories. As States, Alaska and Hawaii are included in the series beginning January 1, 1960.

NOTE: "Legal" signifies that the death penalty could be imposed for murder. In the case of <u>Furman</u> v. <u>Georgia</u>, June 29, 1972, the U.S. Supreme Court found that the death penalty as presently administered constitutes "cruel and unusual punishment" in violation of the Eighth Amendment to the U.S. Constitution. The revised statutes, most of which provide a mandatory death penalty for specified types of murder, represent an attempt on the part of the States to enact capital punishment statutes that will eliminate the possibility of arbitrary application and thus conform to the standards set down in the <u>Furman</u> decision. The constitutionality of such statutes remain to be determined by the courts. <sup>3</sup>Death penalty retained for persons convicted of first-degree murder who commit a second "unrelated" murder, and for the first-degree murder of any law enforcement officer or prison employee who is performing the duties of his office. <sup>3</sup>Death penalty retained for persons convicted of committing murder while serving a life sentence for any offense. <sup>4</sup>Death penalty retained for persons convicted of committing more while serving a life sentence for any offense. <sup>5</sup>Death penalty retained for treason. Partial abolition was voted in 1846, but was not put into effect until 1847. <sup>6</sup>Death penalty retained for reason and for first-degree murder committed by a prisoner who is serving a "fe sentence for first-degree murder. <sup>7</sup>Death penalty retained for the crime of killing a police officer or prison or jail guard while performing his duties, and in cases where the joury recommends the death penalty and the defendant commits a second capital felony after time for due deliberation following commission of first capital felony. 3

capital felony. <sup>9</sup>Death penalty retained for treason.
