UNIFORM CRIME REPORT

Compiled by
DEPARTMENT OF STATE POLICE

1-11-61

The crime statistics for this report were collected and compiled by the Uniform Crime Reports Unit of the Records and Identification Division, with the computer assistance of the Criminal Justice Data Center. The report was drafted by Operations Research Section of the Executive Division, and composed and printed by Printing and Mailing Section of the Business Administration Division.

1974
UNIFORM CRIME REPORT

for the
STATE OF MICHIGAN

16th Edition
Compiled and Published Annually

MICHIGAN DEPARTMENT OF STATE POLICE
714 South Harrison Road
East Lansing, Michigan 48823
COL. GEORGE L. HALVERSON, DIRECTOR

FOREWORD

This Michigan Uniform Crime Report is being published for the 16th consecutive year. During this time, participation by the various police and sheriff's agencies has consistently increased to the point that we now approach 100% reporting each month. Completeness of reporting has been particularly high since 1969, when Act 319 of the Public Acts of 1968 took effect. A copy of Act 319 is printed on page 6 of this volume.

The timeliness and thoroughness of reporting by Michigan's law enforcement agencies is to be commended. We wish to thank these departments and are confident that they will continue to offer this fine support so that we may continue to effectively serve together.

You will note some changes in this year's report, including presentation of the content, the narration, and the crime analyses; we believe these changes will make the reader's interpretation and usage of the statistics easier. We have printed four sections on colored paper, so that the major charts and analyses can be referred to and found more easily.

We trust the information contained in this report will prove of value, not only to police officials, but to other agencies and persons—both public and private—who are concerned with the critical problem of crime in our state. We invite your comments and observations on this report, its content, and its modes of presentation, for we appreciate your concern about the reduction of our crime problem.

COL. GEORGE L. HALVERSON, Director
Michigan State Police

THE MICHIGAN UNIFORM CRIME REPORTING SYSTEM

This section will briefly describe the uniform crime reporting system and detail the "ground rules" under which the annual report is compiled.

Michigan began its program to collect crime statistics from around the state in 1959, when the State Police requested each police and sheriff's agency to voluntarily submit crime data to its headquarters for purposes of forming the report. The number of participating agencies was rather small in the beginning, with participants tending to be the larger departments. The smaller agencies began to increase participation to the point that in 1969, 253 agencies contributed data, then 308 contributed in 1970, 383 in 1971, 439 in 1972, and 482 in 1973. In this volume, data for 487 agencies are presented. The recent growth of this program has indeed been encouraging. The rate of growth has undoubtedly been greatly spurred by the enactment of Act 319 of the Public Acts of 1968 wherein the Michigan Legislature made the submission of data to this program mandatory. (A copy of this legislation follows this narrative.)

The degree of contribution has now reached the point that only 21 Michigan law enforcement agencies which are recognized by the Law Enforcement Information Network did not contribute data during 1974. Since these are all smaller departments, it is estimated that if the missing reports from all 21 non-reporting and 47 partially reporting agencies could be tabulated, the addition to the reported statewide crime total would increase not more than one half of one percent.

Each participating agency reports its crime statistics to the Department of State Police monthly, using a seven page set of return forms which are provided for that purpose. As each set of completed forms is received by the State Police, it is compiled into appropriate categories for later use in the monthly Uniform Crime Report Bulletin, which is sent to the various criminal justice agencies; the quarterly crime summary, which is a set of compiled statistics sent to each reporting agency; and the annual Uniform Crime Report. Any criminal justice agency or official governmental or research bodies which would like to be added to the mailing list of the monthly Uniform Crime Report Bulletin or the annual Uniform Crime Report may send a request, on official stationery, to the Michigan State Police, Uniform Crime Report Unit, Records Section, 714 South Harrison Road, East Lansing, Michigan 48823.

It may be helpful to the reader to review the following general information regarding the UCR system:

- (1) The crime figures presented in this issue are "police statistics" and are distinguished in this manner so that they are not confused with judicial or penal statistics.
- (2) Crimes reported represent violations of Michigan Statutes and local ordinances.
- (3) Each reporting agency counts only those crimes or arrests for crimes committed within its jurisdiction.
- (4) Offenses reported to the police are divided into Index and Non-index offenses, as outlined below.
- (5) Offenses are reported at the end of the month during which they become known. The police may become aware of the crime in several ways: reports of police officers, citizens' complaints, notification from the prosecuting attorney, court officials, or in some other manner.
- (6) Offenses are included without regard to (a) age of offender, (b) value of property involved, (c) recovery of stolen property, (d) arrests, or (e) action by prosecution.
- (7) Complaints that are found by the police to be unfounded are not included in the crime tables even though as much time is often consumed on verification of the offense as there is in a solution.
- (8) Arrests are not included in "Offenses Known" information, but arrest data are collected separately for each crime classification.

Interpretation of the meaning of the terms "Index" and "Non-index" crimes can be aided by a review of the following brief listing of general crimes included in each category:

INDEX OFFENSES

- (1) Murder and Non-negligent Manslaughter — Includes all willful felonious homicides, as distinguished from deaths caused by negligence.

- (2) Rape — Includes forcible rape, assault to rape, and attempted rape.
- (3) Robbery — Includes the stealing or taking away of anything of value from a person by force or violence; or through fear, such as strongarm holdups, stick-ups, and robbery armed. Includes assault to rob and attempts to rob.
- (4) Aggravated Assault — Includes assault with intent to kill, assault by shooting, cutting, stabbing, maiming, poisoning, scalding, or by the use of acids.
- (5) Burglary — Breaking and Entering — Includes burglary, house-breaking, safecracking, or any unlawful entry to commit a felony or a theft, even though no force was used to gain entrance. Includes attempted burglary.
- (6) Larceny — Theft (except auto theft). Does not include con games, embezzlement, fraud, etc.
- (7) Auto Theft — Includes all cases where a motor vehicle is stolen or driven away, including so-called joyriding thefts.

NON-INDEX OFFENSES

- (8) Negligent manslaughter — includes deaths which police investigation establishes as primarily caused by gross negligence.
- (9) Other Assaults — Includes all assaults and attempted assaults which are not of an aggravated nature (see Item No. 4 above).
- (10) Arson — Includes willful fire setting.
- (11) Forgery and Counterfeiting — Includes offenses dealing with making, altering, uttering or possessing forged documents.
- (12) Fraud — Deals with making, altering, presenting, advertising, converting, and obtaining money under false pretenses.
- (13) Embezzlement — Includes all offenses of embezzlement and conversion.
- (14) Stolen Property — Includes buying, receiving, possessing, and attempts.
- (15) Vandalism — Includes malicious destruction.
- (16) Weapons (carrying, possessing)—Includes all violations of fire-arm registrations.

- (17) Prostitution and Commercialized Vice — Includes sex offenses of a commercialized nature, and attempts.
- (18) Sex Offenses (other than Items 2 and 17, above) — Includes all offenses against chastity, common decency, morals and the like. Includes attempts.
- (19) Drug Laws — Includes all offenses of possession and unlawful use, sale, or distribution of controlled substances.
- (20) Gambling — Includes offenses of promoting, permitting or engaging in gambling.
- (21) Offenses Against Family and Children — Includes nonsupport, desertion, neglect, and abuse.
- (22) Driving Under the Influence — Includes driving under influence of alcoholic beverages and drugs.
- (23) Liquor Laws — Includes all violations of the liquor laws except driving under the influence, and drunkenness.
- (24) Drunkenness — Includes drunk and disorderly and common drunkenness.
- (25) Disorderly Conduct — Includes all offenses committing a breach of the peace.
- (26) Vagrancy — Includes all offenses of vagabonds, beggars, loiterers, etc.
- (27) All Other Offenses — Includes all violations of state and local law not listed above.

The same categories are used for arrests as for offenses, although subcategories are added for rape, robbery, assault, burglary, and larceny offenses, and for drug and gambling arrests, to provide a more detailed look at these items. Two additional arrest categories—curfew and loitering, and runaways—are used to report police apprehensions of juveniles for these offenses. No offense data is collected for these two categories.

Complete descriptions of the offenses included in each of the above categories are contained in the Michigan Uniform Crime Reporting Handbook, available at the address listed on the facing page.

* * * * *

ACT 319
Public Acts 1968

AN ACT to provide a uniform crime reporting system; to provide for the submitting of such report to the department of state police; to require submission of the report by certain police agencies; to require the reporting on wanted persons and stolen vehicles; and to vest the director of the department of state police with the authority to prescribe the reporting form and its contents.

The people of the State of Michigan enact:

Sec. 1. The police department of each city or village, any duly constituted police department of a township, and the sheriff's department of each county, once each month upon a date and form prescribed and furnished by the director of the department of state police, shall forward to the department of state police a crime report. Each reporting department shall report only on cases within its jurisdiction and upon which it is making, or has made, the primary police investigation. The report shall be called the uniform crime report and shall cover crimes reported and otherwise processed during the month preceding the month of the report. It shall contain the number and nature of offenses committed, the disposition of such offenses and such other information as the director of state police shall specify relating to the method, frequency, cause and prevention of crime. Under no circumstances shall the name of any person be reported.

Sec. 2. Upon receipt of the monthly uniform crime reports from the reporting agencies, the department of state police shall prepare a statewide compilation of the statistics contained therein and the resulting statistical compilation shall be available to any governmental law enforcement agency in the state, the judiciary committees of the Michigan state senate and the Michigan state house of representatives, and the federal bureau of investigation, upon request. The statistics made available through the uniform crime report shall be used for the purpose of studying the causes, trends and effects of crime in this state and for intelligence upon which to base a more sound program of crime detection and prevention and the apprehension of criminals.

Sec. 3. Any governmental police agency, not falling within the description of those required to submit the monthly uniform crime report set forth in section 1, which desires to submit such a report, shall be furnished with the proper forms by the department of state police. When a report is received by the department of state police from a governmental police agency not required to make such report, the information contained therein shall be included within the monthly compilation provided for in section 2.

Sec. 4. The chief of police of each city or village and of each township having a police department, and the sheriff of each county within this state, shall report to the department of state police, in a manner prescribed by the department, all persons wanted by, and all vehicles stolen from, their primary police jurisdictions. The report shall be made as soon as is practical after the investigating department either ascertains that a vehicle is stolen or obtains a warrant for an individual's arrest or determines that they have reasonable grounds to believe that the individual committed a crime. In no case shall this time exceed 12 hours after the reporting agency determines that it has grounds to believe that a vehicle was stolen or that the wanted person should be arrested.

Sec. 5. When at any time after making a report required by section 4 it is determined by the reporting agency that a person is no longer wanted because of his apprehension, or any other factor, and when a vehicle reported stolen under section 4 is recovered, the chief of police or sheriff of the reporting agency shall immediately notify the department of state police in a manner prescribed by the department.

Sec. 6. The provisions of this act do not apply to misdemeanor traffic cases or to persons wanted for misdemeanor traffic offenses, or for the violation of any city, village or township ordinance. The provisions of this act shall not be construed to in any way affect existing or future laws and procedures governing the reporting of persons wanted for traffic law violations or for the violation of city, village or township ordinances.

COMMENTARY ON CRIME DATA AND THEIR USAGE

THE IDEAL . . .

Ideal crime data (offenses, arrests, crime rates, etc.) are an accurate, complete measure of the crime problem in any given area. The essential, basic part of crime data starts with specific police jurisdictions with their geographical areas and population.

Ideally, all police jurisdictions record and submit crime data uniformly for each month. This implies that all rules for official crime reporting are uniformly interpreted, that crime reports are completely and uniformly recorded and reported, and that reports are submitted in a timely manner.

This ideal crime reporting system contains these main elements:

- Enumerated crime data by specific crime classes.
- Specific police jurisdictions with specific service populations.
- Accurate, timely and uniform monthly reporting of all data.

Unfortunately, there are many possible and actual variations in each of these elements which can, to various degrees, affect the precision of grouped data, and the analysis and comparison of jurisdictional data.

. . . and THE REAL

Crime statistics listed and analyzed in this report system are based on the most complete data currently available; however, the quality limitations intrinsic to the present system should be made clear to readers and students who attempt to interpret reported data or draw conclusions. These limitations should be reviewed by officials of jurisdictions which might use crime rates, trends, or other analyses as a basis for changes in the managing, budgeting, and staffing of criminal justice agencies. Following are the major limitations of the current system:

1. CRIME UNREPORTED TO THE POLICE

One immediate limitation is that perhaps one-half of all crime is not reported to police agencies. This is based on victimization studies done for the Law Enforcement Assistance Administration by the U.S. Bureau of the Census. A survey conducted in January, 1975, for the Michigan Office of Criminal Justice Programs found that about 20% of crime against persons and their property is

unreported. A much greater proportion of crimes against businesses are unreported. In total, as much as 50% of all crime goes unreported to the police. Nevertheless, reported crime is the best available indication of overall trends.

2. CRIME UNREPORTED TO THE STATE

Another limitation is the failure of some police agencies to consistently send UCR reports to the state. In Michigan, there are now 512 separate police organizations reporting to the UCR system. As noted below, 69 of the 512 reporting jurisdictions did not supply twelve full months of reporting during 1974; therefore, it is not possible to provide crime rate data with less than a 10% range of error for most of those jurisdictions. In this 1974 UCR report, no crime rates are computed for jurisdictions which submitted less than 11 monthly reports.

1974 UNIFORM CRIME REPORT PARTICIPATION	AGENCIES		AGENCIES SUBMITTING LESS THAN 12 MONTHLY REPORTS IN 1974		
	Total	Net Change During 1974	Total	Submitted Some Reports	Submitted No Reports
TOTAL	512	+6	69	47	22
Cities and Villages . . .	358		52	31	21
Sheriffs	83		3	3	
Townships	57	+2	10	9	1
Special (Airports, Universities, etc.) . .	13	+4	4	4	
State Police	1				

3. POPULATIONS USED IN COMPUTING CRIME RATES

Crime rates, as used in the UCR system, are based on census-fixed residential populations of police jurisdictions. However, large cities and certain tourist areas are centers for significant employment, business or commercial transient populations. Such transient populations, whether measured by the workday or by the recreational season, tend to increase the amount of criminal activity; but, such special populations are not estimated and computed into area crime rates to lower those rates proportionally.

4. OVERLAPPING POLICE JURISDICTIONS

To various degrees, some of the crime complaint handling which occurs within certain police jurisdictions (especially, small towns, villages, and townships) is done by the sheriff or state police. That part of such crime complaint handling by sheriffs and state police is not applied to the police service population of the local jurisdiction, but is reflected in sheriff/state police crime rates. Therefore, index crime rates in many smaller police jurisdictions do not fully state the higher incidence of crime that actually occurs within the borders of those jurisdictions. Conversely, this reporting system practice tends to reduce the actual estimated service population served jointly by sheriffs and state police; which, in turn, tends to proportionally inflate the crime rates applied jointly to sheriffs and state police. Jurisdictional crime rates, therefore, tend to be measures of complaint handling by a police unit as applied to a specific service population, rather than an indicator of crime incidence within a jurisdictional border.

5. COLLECTION AND INTERPRETATION OF CRIME DATA

Some reasonable differences in the collection and interpretation of crime data exist among Michigan police agencies. In a few instances, errors of interpretation are made, which are mostly determined after the data are recorded and processed into the report system, too late to be easily corrected during the report year. Most such collection and interpretation variations are believed to be in the non-index, or "less serious" crimes. The index, or "more serious" crimes, tend to be given a higher degree of consistently uniform reporting. The reporting variations in non-index crime data are believed to have two main sources:

First, large cities and areas of population concentration tend to receive proportionally fewer complaints of misdemeanor crime, such as disorderly conduct or drunkenness. Such conduct is believed to be more conspicuous and less tolerated in smaller, homogeneous communities; therefore, it is more likely to result in a formal citizen complaint (or police observation) and effect the police services necessary to complete an official offense report. Such reasoning is used to explain, in part, why less populated police jurisdictions tend to report proportionally greater amounts of non-index crime.

Second, non-index crime offense reports are often inflated or deflated from a uniform reporting level by unintentional, but extensive, variation among jurisdictions in the reporting of the non-index "All Other" crime category (a catchall for unspecified crime classes). Statewide, in 1974, the number of

non-index crime offenses totaled 526,945, of which 140,898, or 27% is "All Other". A review of 1974 offense data by jurisdiction shows that such percentages vary from 0% to over 90%. This problem does not occur in the other categories.

6. REPORTING OF OFFENSE AND ARREST DISPOSITIONS

Certain reporting problems exist in the crime disposition (pink section) data which require clarification. Many crime clearances lag months, or even years, behind the reported offense. Therefore, the reporting system permits some reporting of clearances in 1974, for offenses which were recorded for prior years. This time-lag/recording year factor can result in clearance rates which exceed the base number of recorded offenses, especially in smaller jurisdictions. Therefore, each annual clearance rate must be interpreted with caution, unless it is averaged over a several year period. A similar problem exists for the arrest disposition data shown in the pink section. Another problem is that some complaints are later unfounded, producing the negative numbers (in smaller totals) which are seen in the Reported Offenses (blue section). Only an extended reporting time frame and a greatly expanded report system can fully eliminate such system limitations.

7. CONFLICTING DEFINITIONS OF "JUVENILE"

Careful readers of this report may note some discrepancy in arrest data for adult and juvenile totals. Ages used in comprising the juvenile class may vary. The F.B.I., and some states, classify a 17 year-old youth as juvenile; while Michigan and many other states classify that age group as adult. The Michigan UCR data processing system is presently programmed to tabulate selected arrest totals to either include or exclude the 17 year-old age group from juvenile totals. Such inconsistency in arrest classifications will be either carefully noted or totally eliminated in future UCR tabulations.

SOME GUIDELINES AND CAUTIONS IN THE USAGE OF THIS REPORT

The foregoing analysis of UCR crime reporting variations and limitations may tend to cast excessive doubt about the accuracy of basic crime data and crime rate statistics. Nevertheless, this report can have many valuable uses if the following points are kept in mind:

1. Trends in year-to-year data for each jurisdiction are valuable, even though a jurisdiction may vary some of its reporting procedures from the average or norm for 500 other jurisdictions. Hopefully, state totals and other grouped totals may tend to balance out variations in under or over reporting among all jurisdictions.

2. Comparisons are most useful when applied to jurisdictions of similar manpower, service population, reporting reliability, etc. If careful adjustments are made to compensate for significant variations, as previously reviewed, reliable trend lines and comparisons among jurisdictions are possible.
3. Index crime rates are based on data with a high degree of interpreting and reporting reliability. Even so, comparability of index crime rates can be adversely affected by variables in service populations. Except for the state and county totals, the system uses fixed residential populations determined by the 1970 census. This method permits the continued use of urban and rural population totals which, to date, have not been established in post-census estimates of population. In the future, it may be possible to develop a system of annually adjusted service population estimates. Such estimates might possibly include such variable factors as:
 - Population growth or decline.
 - Weight of transient or seasonal populations.
 - Any intra-jurisdictional sharing of crime complaint handling among local departments and sheriffs or state police.

At present, it is not possible to obtain or to develop estimates which integrate these variables with a high degree of reliability.

4. For many first-time readers, there is confusion in understanding the relationship between "offense", "arrest", and "offense cleared by arrest" data. Very simply, there is NO direct relationship between offenses and arrests. Offenses are crime events, while arrests refer to numbers of individual persons taken into custody and formally charged with violation of law.

Part of such confusion over the relationship of these terms is attributable to the fact that jurisdictional crime data in the blue section are laid out with offenses and arrests in juxtaposition. That design is for convenience rather than an invitation to compare two unrelated types of data.

Specifically, an offense crime event may involve one or many criminals, and one criminal may commit many separate offenses. It is possible to arrest many persons for a single offense; or, the arrest of a single individual may solve many recorded offenses.

"Closed by Arrest" data supply the statistical instrument which partially bridges the separation of offenses and arrests. For UCR purposes, an offense is cleared by arrest when at least one person is arrested and charged and given to the court for prosecution. Simply stated, these important data measure those crimes that are "solved" within the limits of the police function.

5. The reader is reminded that basic crime data for state police are totaled (or grouped) by counties; and, therefore, are data which include all the state police posts which serve an individual county. State police data for entire post areas are not included in the UCR.

LOOKING AHEAD

In future UCR reports, all efforts will be continued to eliminate or reduce variations in system reporting, data manipulation, and analysis. Within two years, the UCR reporting system will include significant data base and auditing improvements which are expected to overcome wide variations in jurisdictional reporting. Within the next five years, the UCR reporting system may begin to be phased into a more comprehensive criminal justice data system, which will attempt to interface with reporting systems of prosecutors, courts and corrections systems. Currently, the Federal Law Enforcement Assistance Administration conducts research and pilot programs to perfect and implement such systems.

Reader comments or criticisms, as well as suggestions for UCR editing and content, are invited. These should be sent to the address shown on page 4.

* * * * *

STATE SUMMARY

The yellow pages which follow form a detailed look at the statewide crime in Michigan in 1974, with comparisons to previous years. The summary below highlights the 1974 crime situation.

1974 MICHIGAN CRIME "IN A NUTSHELL"

Overall, 1974 was a dismal year in the state's fight against crime. During the year, the ground gained in 1972 and 1973 was more than lost to a 20% rise in reported index crime. Of some small comfort was the report by the FBI that the nationwide increase in index crime was 17% for the year, indicating that Michigan was not alone in its crime problems. The Michigan criminal justice system should be distressed by the fact that index crime at the end of 1974 stood 15% above the previous record level set in 1971. The 1974 index crime rate was 6,519 per 100,000 population, or one reported crime for every 15 Michigan residents. The poor economic condition of the state in 1974 undoubtedly was the major factor in the year's crime problems, since the largest increases came in the economically-motivated crimes of burglary, larceny, and robbery.

In response to this wave of crime, arrests for index crimes by law enforcement agencies in the state rose 22% during the year, indicating that even though they were unable to prevent the crime increase, these agencies at least kept their enforcement efforts in step with crime.

The year saw the continuance of the trend of the last few years toward an increasing crime problem in the rural areas of the state. The 1974 index crime rate for rural areas was fully two-thirds as high as that for urban areas, indicating that rural areas are no longer havens from crime. Index crime in these areas rose 24% in 1974, and at the end of the year stood 39% above the 1971 level. Urban areas also experienced large crime increases in 1974, with index crimes rising 19% during the year. However, due to declines in 1972 and 1973, urban index crime at the end of 1974 stood at only 9% above the 1971 level.

The total number of reported offenses (including "non-index" as well as "index" crimes) rose to 1,118,609 in 1974, a 21% rise from 1971, and a rate of one reported crime for every 8 Michigan residents.

STATE TOTAL OFFENSES

STATE TOTAL OFFENSES

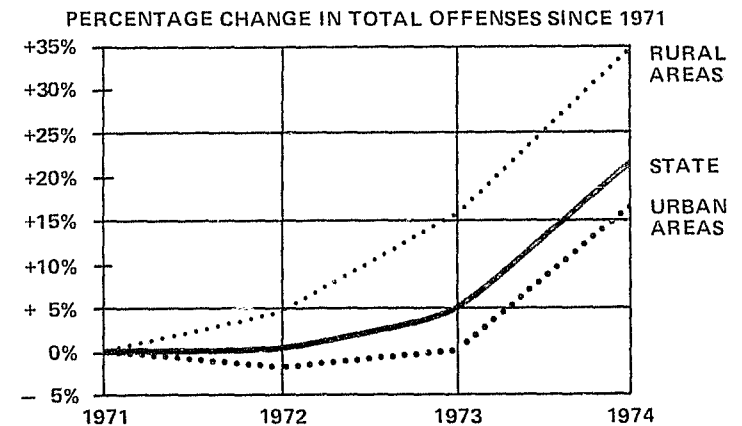

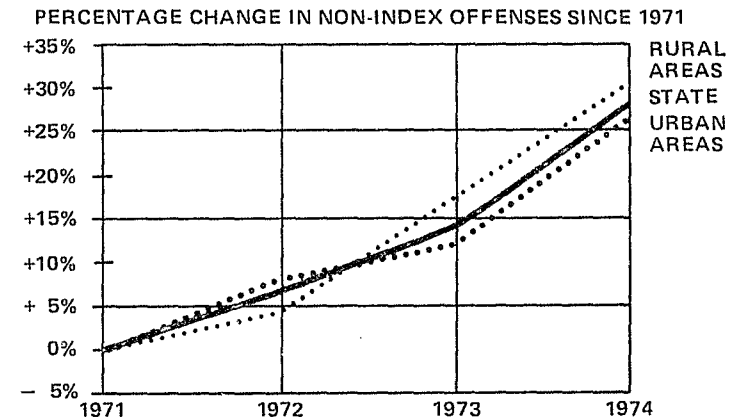

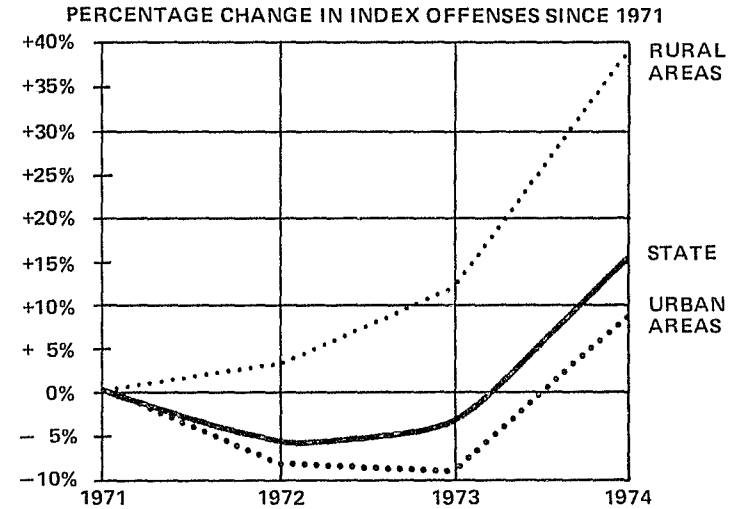

Crime in Michigan during 1974 showed dramatic increases in most categories. Total reported crime went up 16.5% compared to 1973, with the increase being almost evenly distributed between rural and urban areas. For the index crimes, however, rural areas experienced a larger percentage increase (23.5%) than did urban areas (19.0%), while the opposite was true for the non-index crimes. As can be seen by reference to the graphs at the right, rural index crime has now risen steadily since 1971, and now stands 39% above the 1971 level. On the other hand, urban index crime for 1972 and 1973 was below the 1971 level, and at the end of 1974 stood at only 9% above the 1971 level. Statewide, index crime for 1974 was 15% above the 1971 level.

Below is a chart displaying the distribution of the 1,118,609 crimes reported in 1974. Just three crimes—larceny, burglary, and vandalism—made up more than one-half of all reported crimes, indicating the importance of these property-related crimes in the 1974 Michigan crime picture.

¹ Includes all local JCR reporting jurisdiction of at least 2,500 population.

² Total arrests for some lines may exceed the sum of adult and juvenile arrests due to unknown age for some arrestees.

³ These totals have been adjusted to account for 8,338 traffic-related arrests erroneously included in the "All Other" category in 1973; the 1973 state arrest totals have not been changed to reflect this adjustment.

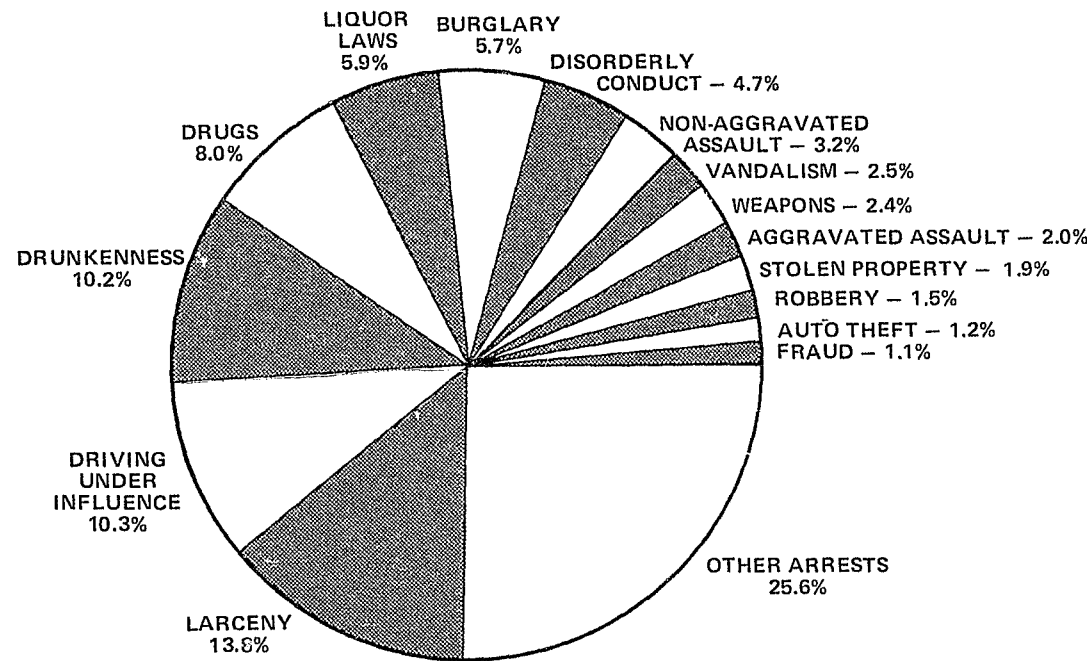

STATE TOTAL ARRESTS

Total arrests in Michigan during 1974 increased only 7.5%, compared to the 16.5% increase in total reported offenses. For index crimes, however, the increase in arrests exceeded that for offenses by a margin of 22.1% to 20.2%. The major lag in arrests was for non-index offenses, where arrests increased only 2.2%, compared to a 12.6% rise in offenses.

Arrest trends for the past four years are illustrated in the graphs at the right. The large arrest increases which will be noticed for rural areas is consistent with those for rural offenses (see page 13).

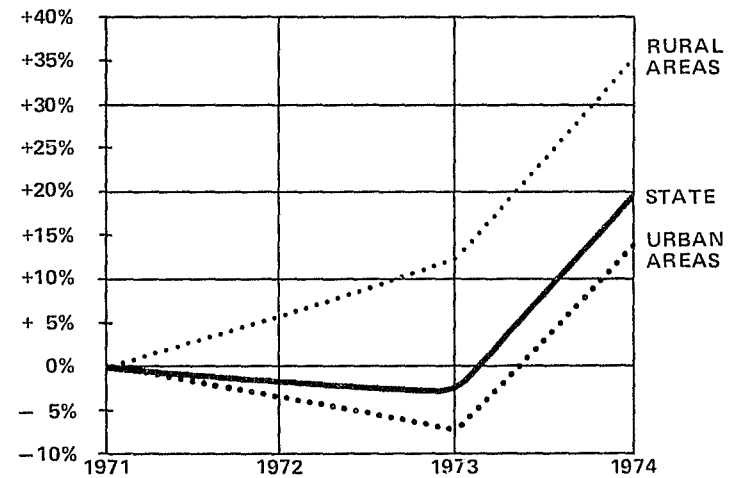

The "pie" chart below shows the distribution of the 373,833 arrests reported in 1974. Six categories—larceny, driving under the influence, drunkenness, drug law violations, liquor law violations, and burglary accounted for more than half of all arrests.

PERCENTAGE CHANGE FROM 1973 TO 1974	INDEX ARRESTS	NON-INDEX ARRESTS	TOTAL ARRESTS
Urban Areas	+22.9%	+2.0%	+8.5%
Rural Areas	+20.5%	+2.5%	+5.6%
Michigan	+22.1%	+2.2%	+7.5%

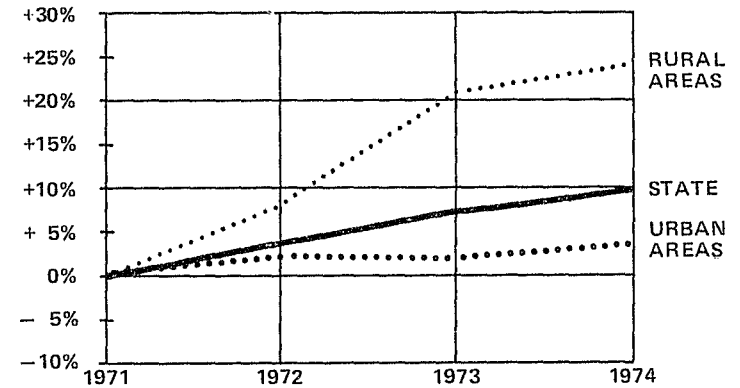

PERCENTAGE DISTRIBUTION OF 1974 ARRESTS

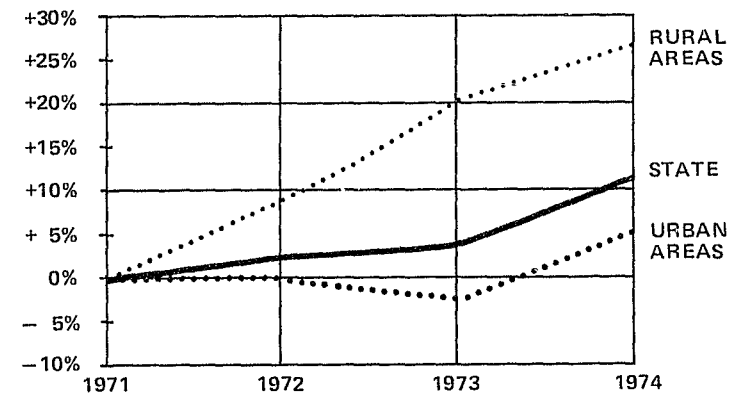

PERCENTAGE CHANGE IN INDEX ARRESTS SINCE 1971

PERCENTAGE CHANGE IN NON-INDEX ARRESTS SINCE 1971

PERCENTAGE CHANGE IN TOTAL ARRESTS SINCE 1971

STATE TOTAL OFFENSES BY MONTH

As is well known to all law enforcement agencies, most crimes follow distinct time patterns, rising and falling in level throughout the day, week, month, and year. While the Michigan UCR does not collect data on the variations in crime during the day, week, or month, it does provide monthly crime totals which can be used to show the variation in crime on a month-to-month basis throughout the year. The two graphs below illustrate the month-to-month variation during 1974 in index and non-index offenses. The peak month for index offenses was July, with the lowest month being February, at only 54% of the July level. For non-index offenses, the peak month was October (mainly due

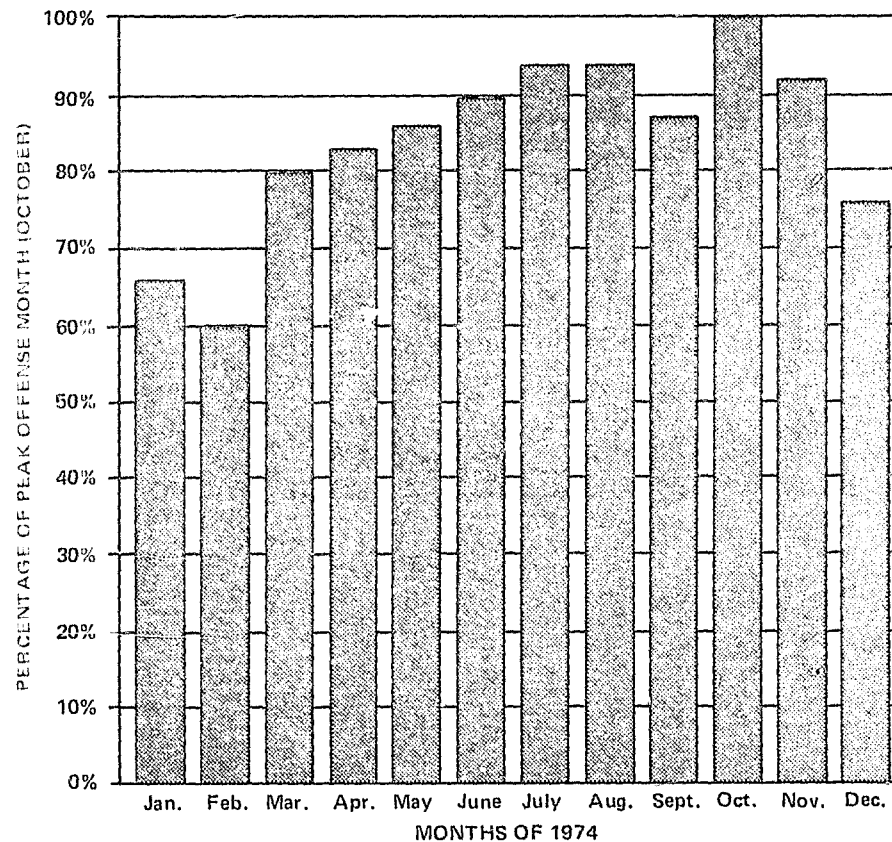

to the large number of vandalism offenses associated with Halloween), with the lowest month again being February, at 60% of the October level.

Certain offenses have greater seasonal variation than others. For 1974, crimes having a variation of greater than 2-to-1 between the highest and lowest months were rape, burglary, larceny, arson, vandalism, liquor law violations, and disorderly conduct. Crimes with little seasonal variation included fraud, forgery and counterfeiting, drug law violations, crimes against family and children, and driving under the influence of alcohol or narcotics.

1974 MONTHLY INDEX OFFENSES

STATE TOTAL OFFENSES BY JURISDICTION SIZE

The following is a brief analysis of changes in offenses reported between 1972 and 1974 by population size of the reporting jurisdictions. Between 1972 and 1973, total offenses showed the greatest increases in jurisdictions of less than 10,000 population, while slight decreases were experienced in jurisdictions of over 50,000 population. During the 1973-1974 period, increases in total offenses were more evenly spread among the jurisdiction sizes, with the greatest increase occurring in the unincorporated category.

As shown in the chart below, index offenses, during the 1972-1973 period closely followed the pattern of total offenses, with the greatest increases occurring in the jurisdictions of less than 10,000 population,

and slight decreases occurring in jurisdictions of over 50,000 population. Substantial increases in index offenses were experienced in all jurisdiction sizes during the 1973-1974 period, with the greatest jump occurring in the 2,500-5,000 category. Only the "under 2,500" and "5,000-10,000" population jurisdictions experienced smaller increases than in the previous year.

Overall, during the 1973-1974 period, reported offenses increased at nearly the same rate in the urban areas as in the rural areas. Index offenses rose at a greater rate in rural areas, but were offset by increases in non-index offenses in the urban areas.

1972-1974 PERCENTAGE CHANGES, INDEX OFFENSES REPORTED

1 Urban and rural populations are estimated, based on the proportions of rural and urban populations in the 1970 census.

2 Includes state police reports from local reporting jurisdictions.

3 Populations are based on 1970 census.

STATE CRIME RATE AND OFFENSE DISPOSITION DATA

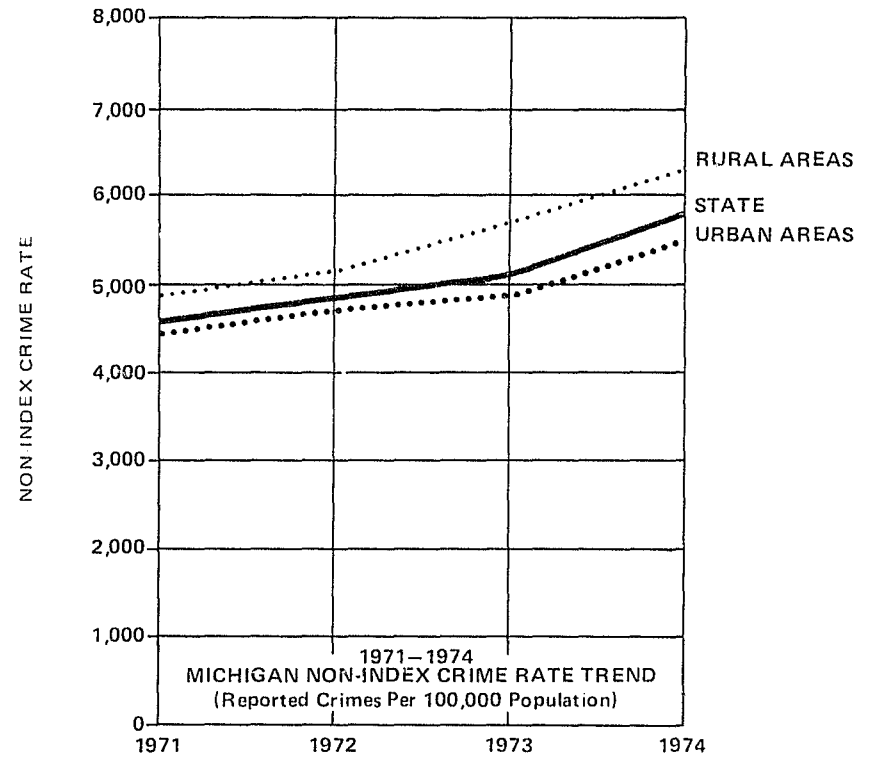

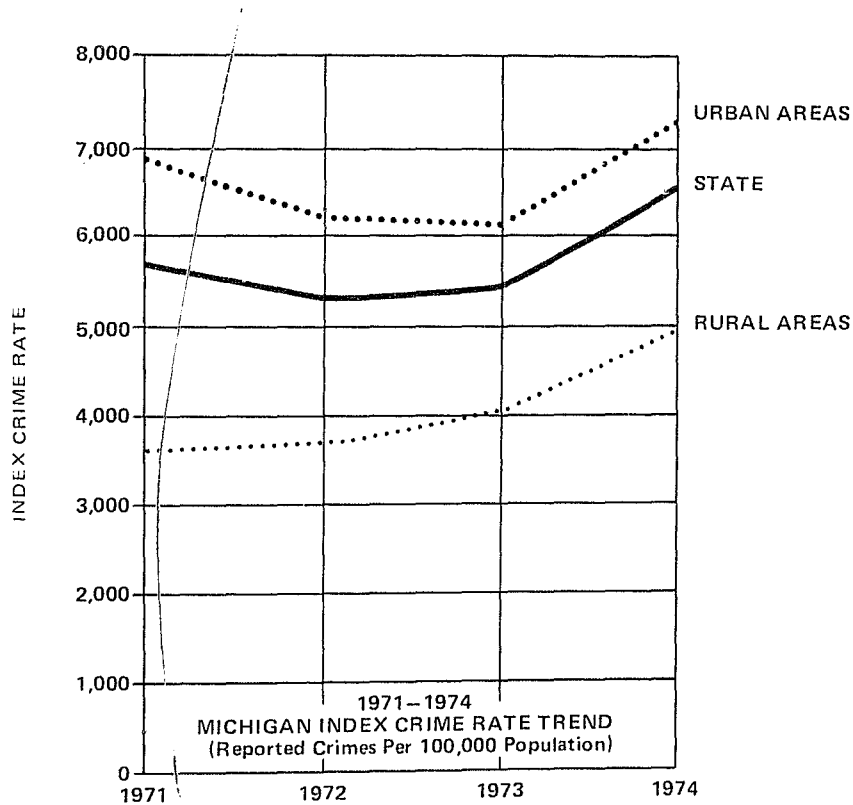

Crime rates are a measure of the severity of the crime problem within any given jurisdiction. They are intended to gauge the level of crime victimization of the population which resides within the area. This is done by relating the annual number of reported crimes to the population which runs the risk of being victimized by these crimes.

The Michigan index crime rate over the past four years, shown in the chart at the left below, decreased in 1972 and 1973, but rose sharply again in 1974. The urban crime rate showed the same trend, although at a higher level than for the state as a whole. The rural index crime rate, however, did not decrease in 1972 and 1973, but instead rose steadily from 1971 through 1974, causing the rural rate to rise from 52.9% of

the urban rate, to 67.5% in 1974. Thus, the rural rate appears to be rapidly approaching the urban rate.

For non-index crimes, the rate did not fall in 1972 and 1973, as it did for index crimes (see chart at right below). During all four years, the rural rate was above the urban rate; however, the difference between the rural and urban rates was not as great as for the index crimes.

Clearance rates (percent of offenses cleared by arrest) did not vary greatly over the four years, although a slight improvement was evident in all three categories. Clearance rates for 1974 did not show any significant trends by the size of the reporting jurisdiction.

STATE TOTAL ARRESTS BY AGE

Arrests for most criminal offenses are by no means equally distributed throughout the various age groups in the population. Certain offenses are primarily committed by the young; others are mainly the province of middle-aged persons. The chart below is an attempt to illustrate the strong age dependence of arrests for various offenses. To prepare this chart, the ten largest arrests categories*, in terms of the total number of arrests for all ages, were selected and ranked. These categories, shown in the single column at the right of the chart, are ranked from the largest category (larceny) at the bottom, to the smallest of the ten categories (weapons) at the top.

The key to reading this chart is that the width of the band for each arrest category represents its importance, or contribution, to the total

arrests at a given age for these ten largest arrest categories. For example, it can be seen that arrests for "driving under the influence of alcohol or narcotics" are negligible until age 16, at which time arrests in this category become increasingly predominant (the band becomes broader) as age increases. Beyond age 30 this offense is an important part of the arrest picture. "Larceny" and "vandalism" arrests take the opposite route, starting out very predominant in the youngest age groups, and gradually tapering off with age. "Drug law violations" appear predominantly between ages 15 and 30. "Disorderly conduct" and "non-aggravated assault" maintain about the same relative importance throughout all age groups. This graphic presentation may be useful to those who wish to address crime prevention programs to specific age groups.

DISTRIBUTION OF ARRESTS BY AGE GROUP FOR THE TEN LARGEST* ARREST CATEGORIES — 1974

*These 10 arrest categories accounted for 67% of all arrests in Michigan in 1974.

*Arrests per 100,000 population in category

Rate exceeds state average arrest rate
(1,197 for index & 3,379 for non-index)

NOTE: Arrest rates for races other than white and black are not included because the extremely low numbers of arrests and small populations do not yield valid rates. The rates for "all races" include these data.

The arrest data for these demographic categories may prove helpful to various criminal justice administrators who direct crime prevention and community relations activities toward certain groups.

The table at left shows the percentage of total state arrests attributable to each race, sex, and age category. For index arrests, the largest category was male juvenile whites, who accounted for 28.6% of all index arrests. For non-index arrests, on the other hand, male adult whites accounted for 49.3% (almost half) of the state total.

In interpreting arrest rates such as those shown here, it should be kept in mind that the ARREST rate for any given population group is probably not an accurate reflection of the OFFENSE rate for that group. In other words, the number of arrests within a group may not be proportional to the number of offenses committed by that group. This is due to a number of factors, such as skill in avoiding apprehension, probable law enforcement emphasis on certain groups (e.g. juveniles), and the types of crimes which the group tends to commit (the percentage of offenses cleared by arrest varies widely by type of crime).

The lower table displays the 1974 arrest rates for the major race, sex, and age categories collected by the UCR. To compute these rates, the number of arrests in each category was divided by the 1970 population for each group, much in the same way that crime rates are computed. As can be seen, there are wide variations in these arrest rates. For example, the index arrest rate for male juvenile blacks (6,850) was 33 times as high as that for female adult whites (209). The non-index arrest rate for male adult blacks (17,353) was likewise 33 times as high as that for female adult whites (527).

JUVENILE APPREHENSIONS

Juvenile apprehensions accounted for 24.5% of all arrests in 1974, a slight decrease from 25.5% in 1972, while juvenile index arrests dropped from 42.4% to 39.4% of total index arrests. Index arrests accounted for 40%, and non-index arrests 38%, of the juvenile apprehensions during the year. The remaining 22% were curfew and loitering or runaway apprehensions.

Total juvenile apprehensions increased 4.9% from 1972 to 1974 with a 3.8% increase in urban arrests and 8.8% rise in rural arrests. However, a decrease in the juvenile population, over the same period, resulted in a greater increase in the arrest rate for this age group. The juvenile arrest rate per 100,000 juvenile population rose 8.5%, from 4,622.5 in 1972 to 5,013.5 in 1974.

Significant increases in the arrest rate over the two year period occurred in aggravated assault, burglary, larceny, stolen property, weapons, and marijuana. The most significant decreases occurred in non-aggravated assaults, opium-cocaine drugs, drugs other than opium-cocaine, marijuana or synthetic, and disorderly conduct.

Rural juvenile arrests accounted for 29.3% of all juvenile arrests during 1974, up from 28.2% in 1972. Above average rural arrest rates were experienced in rape, burglary, forgery and counterfeiting, drugs other than opium-cocaine, marijuana or synthetic, family and children, driving under the influence, liquor laws, drunkenness and runaways.

Although females comprised only 24.5% of the total juvenile arrests during 1974, they accounted for 80.5% of the prostitution and common law vice apprehensions and 58.9% of the runaways. Larceny, non-aggravated assault, forgery and counterfeiting, and family and children were the other areas with higher than average female involvement.

Sixteen year olds accounted for 30.9% of all juvenile apprehensions during the year, up from 29.1% in 1972. Areas of particularly heavy involvement (over 50% of the total) for this age were forgery and counterfeiting, fraud, marijuana, driving under the influence, liquor laws, and drunkenness.

THE SEVEN INDEX CRIMES

The green pages of this report comprise a detailed analysis of each of the seven so-called "index crimes", as defined by the Federal Bureau of Investigation. These crimes, including murder, rape, robbery, aggravated assault, burglary, larceny, and motor vehicle theft, are considered to be crimes of a more serious nature which tend to be particularly well-reported. Therefore, they can be used collectively as a fairly reliable measure of the crime problem within any given area for which data are available.

* * * * *

THE SEVEN INDEX CRIMES

Index crimes in Michigan increased 20.2% in 1974, to bring these important crimes to record levels. This large increase much more than wiped out the modest decreases experienced in 1972 and 1973 following the previous record year of 1971. The 20.2% increase was even greater than the record-breaking nationwide increase of 17% reported by the FBI for 1974.* As has been the trend in recent years, index crimes increased at a faster rate in rural areas of the state than in urban areas (23.5% compared to 19.0%), with the result that the rural index crime rate in 1974 continued to draw closer to the urban rate.

Arrests for index crimes by all law enforcement agencies in the state increased 22.1% in 1974, or slightly more than the index crime increase.

*Uniform Crime Reports 1974 Preliminary Annual Release, Federal Bureau of Investigation, U.S. Department of Justice, Washington, D.C., March 31, 1975.

* * * * *

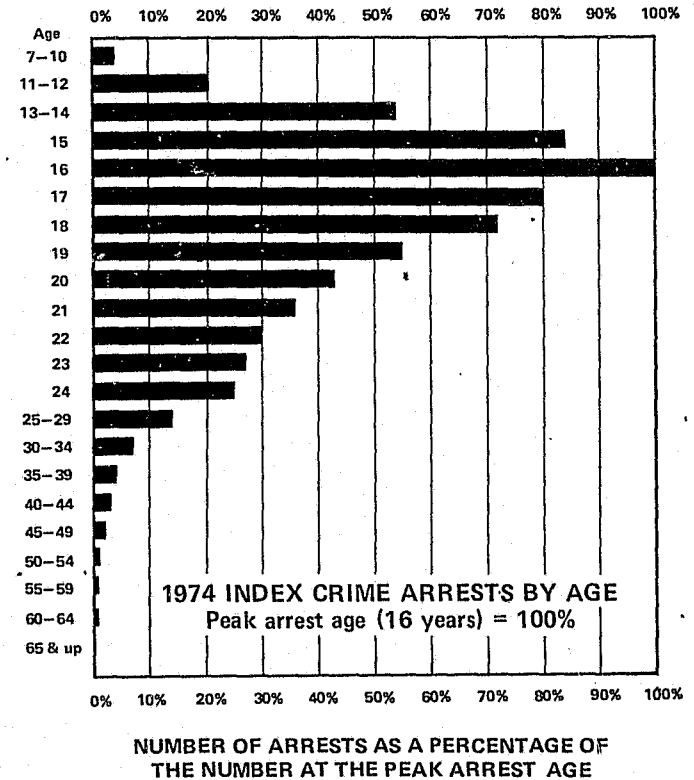

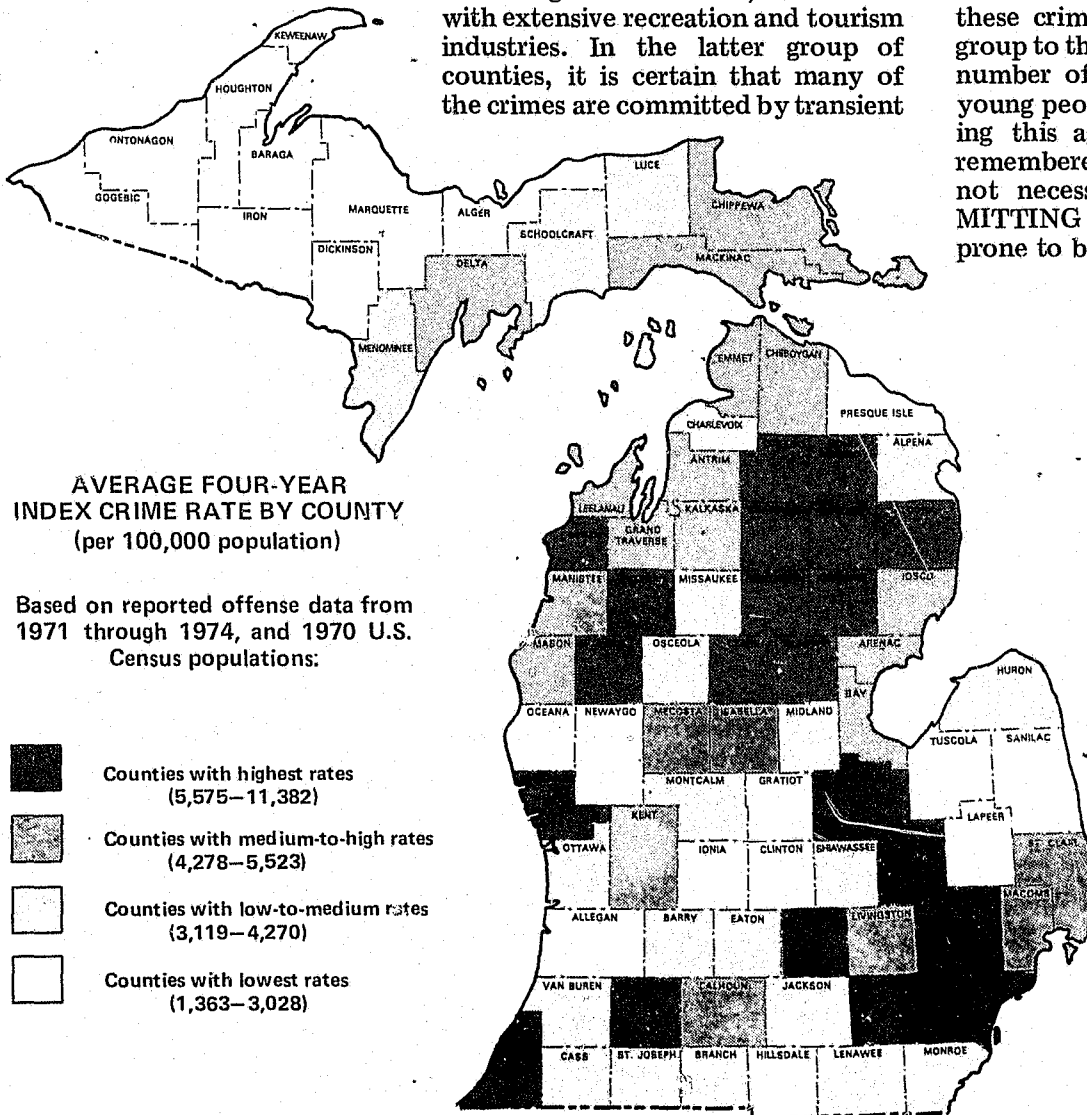

THE SEVEN INDEX CRIMES.

On this page, and on succeeding pages, we have attempted to show two important aspects of index crimes—the geographical distribution of their occurrence, and the age distribution of those persons arrested for the crimes. There are, to be sure, other aspects of interest, but these two show much about the nature of these crimes.

The index crime rate map shows two distinct types of counties with high index crime rates—those with large urban areas, and those with extensive recreation and tourism industries. In the latter group of counties, it is certain that many of the crimes are committed by transient

populations and not by the permanent residents of the counties. Since the crime rate is based on the permanent county population, the rates are higher for these counties than they would be if it were possible to include the average transient population of each county during the year in computing the crime rates. Nevertheless, this map does show the general intensity of the index crime problem throughout the state.

The chart below shows the relative involvement of each age group in index crimes, as measured by the numbers of persons arrested for these crimes. This chart compares the number of arrests in each age group to the number of arrests in the age group which had the maximum number of arrests. This chart clearly shows the heavy involvement of young people in index crimes, since the peak arrest age is 16. In interpreting this age chart (and the following ones), however, it should be remembered that those persons **ARRESTED** for committing crimes are not necessarily a truly representative cross section of those **COMMITTING** the crimes. In other words, some age groups may be more prone to being arrested for their crimes than others.

MURDER
(Including Non-negligent Manslaughter)

Murder is the unlawful killing of another person, with some degree of intent. Non-negligent manslaughter is the unintentional killing of

another person as a result of a potentially dangerous, willful act, or the intentional killing of another person without premeditation or malice.

* Due to reporting error, total is one greater than the correct murder totals listed elsewhere in this report.

NOTE: Statistics reported throughout this volume do not include the 85 cases of justifiable homicide which occurred in 1974. Justifiable homicide is not considered a criminal act.

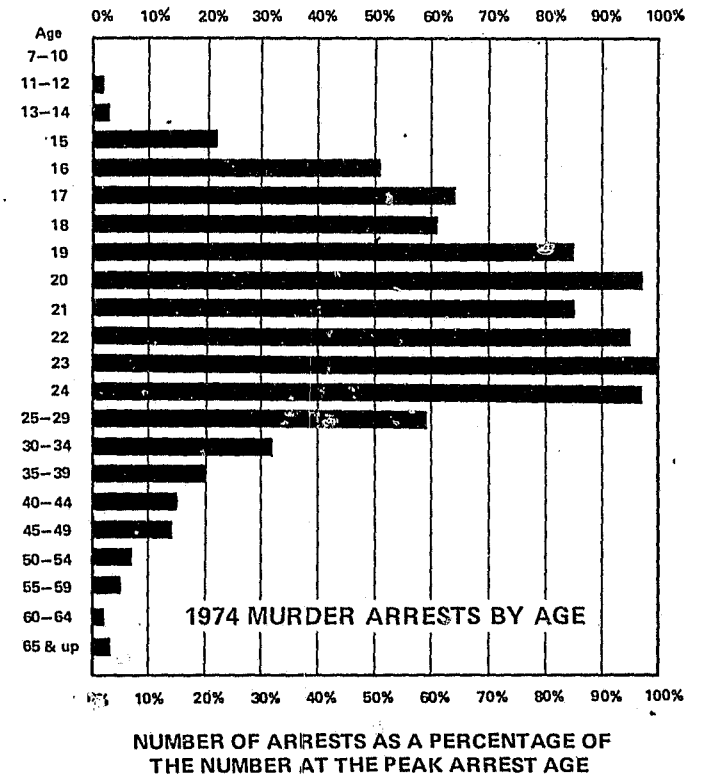

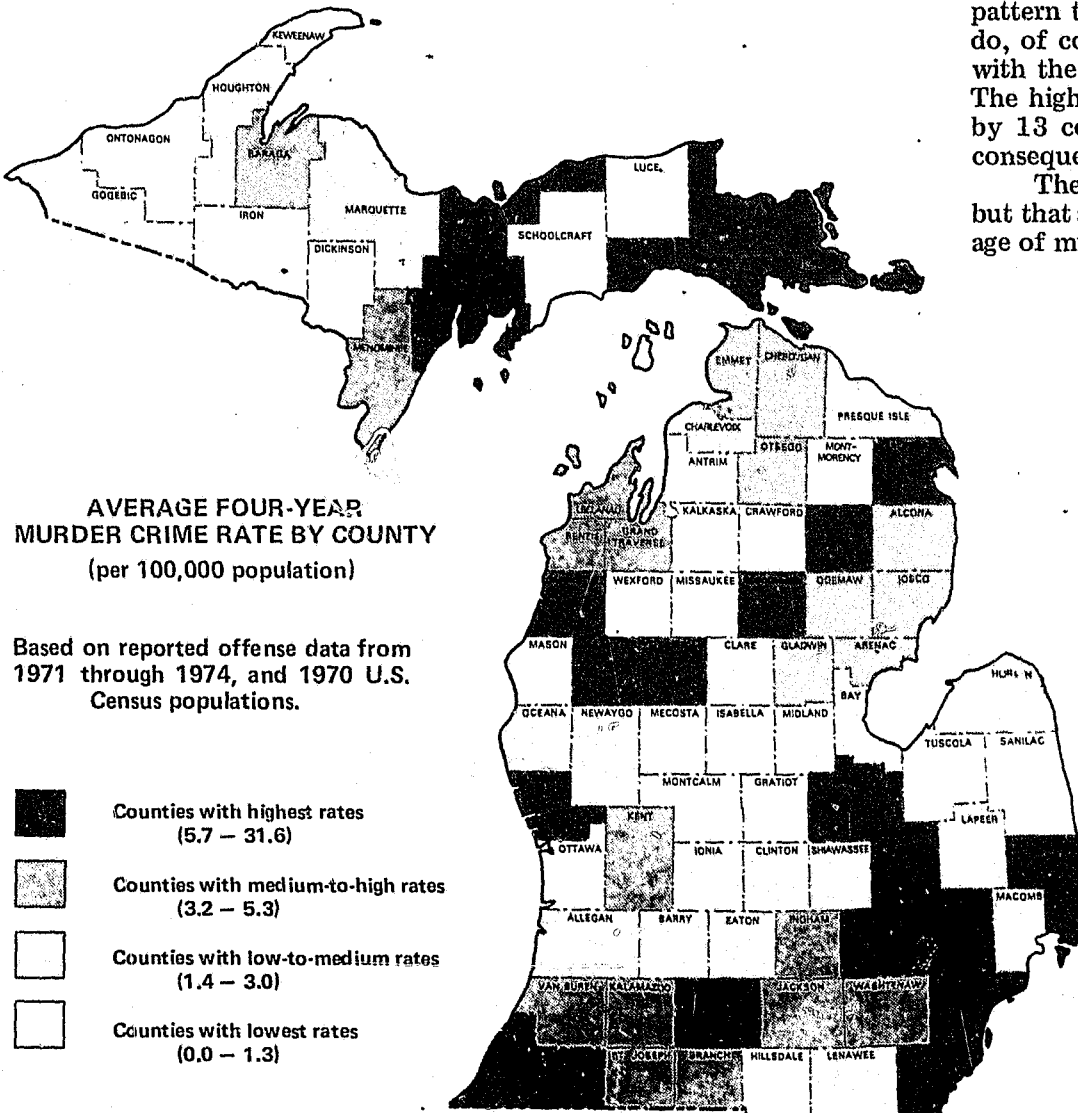

MURDER

Murder is the most serious and best documented of all the index crimes. In 1974, there were 1,170 murders in the state, 88.1% of which were in urban areas. Guns were the murder weapon in 72% of the crimes. Nearly 84% of those arrested for murder were male, and 77% of the

victims were male, indicating that murder is primarily committed by males against male victims. As opposed to most of the other index offenses, juveniles are not extensively involved in murders, either as offenders or victims.

The murder crime rate map shows that there is no identifiable pattern to murder throughout the state. Counties with large urban areas do, of course, tend to have high murder rates, but ten of the counties with the highest rates are in the sparsely populated northern counties. The highest murder rate is in Wayne County; the lowest rate is shared by 13 counties which had no murders from 1971 through 1974, and consequently had a rate of zero.

The chart below shows that the peak arrest age for murder is 23, but that ages 19 through 24 are almost as strongly involved. The average age of murderers is higher than for any other index crime.

RAPE

Rape is the carnal knowledge of a female forcibly and against her will. For the purposes of Uniform Crime Reports, rape is divided into two categories: (1) rape by force and (2) attempted rapes. Statutory rape is not included.

RAPE OFFENSES	1973	1974	% Change

Juvenile	13.2%	0.1%	13.3%
TOTAL	99.5%	0.5%	100.0%

* * * * *

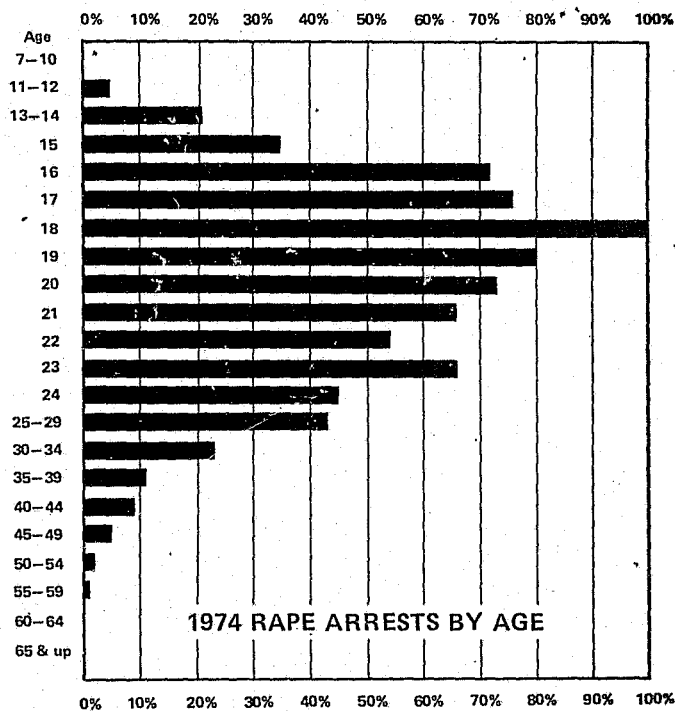

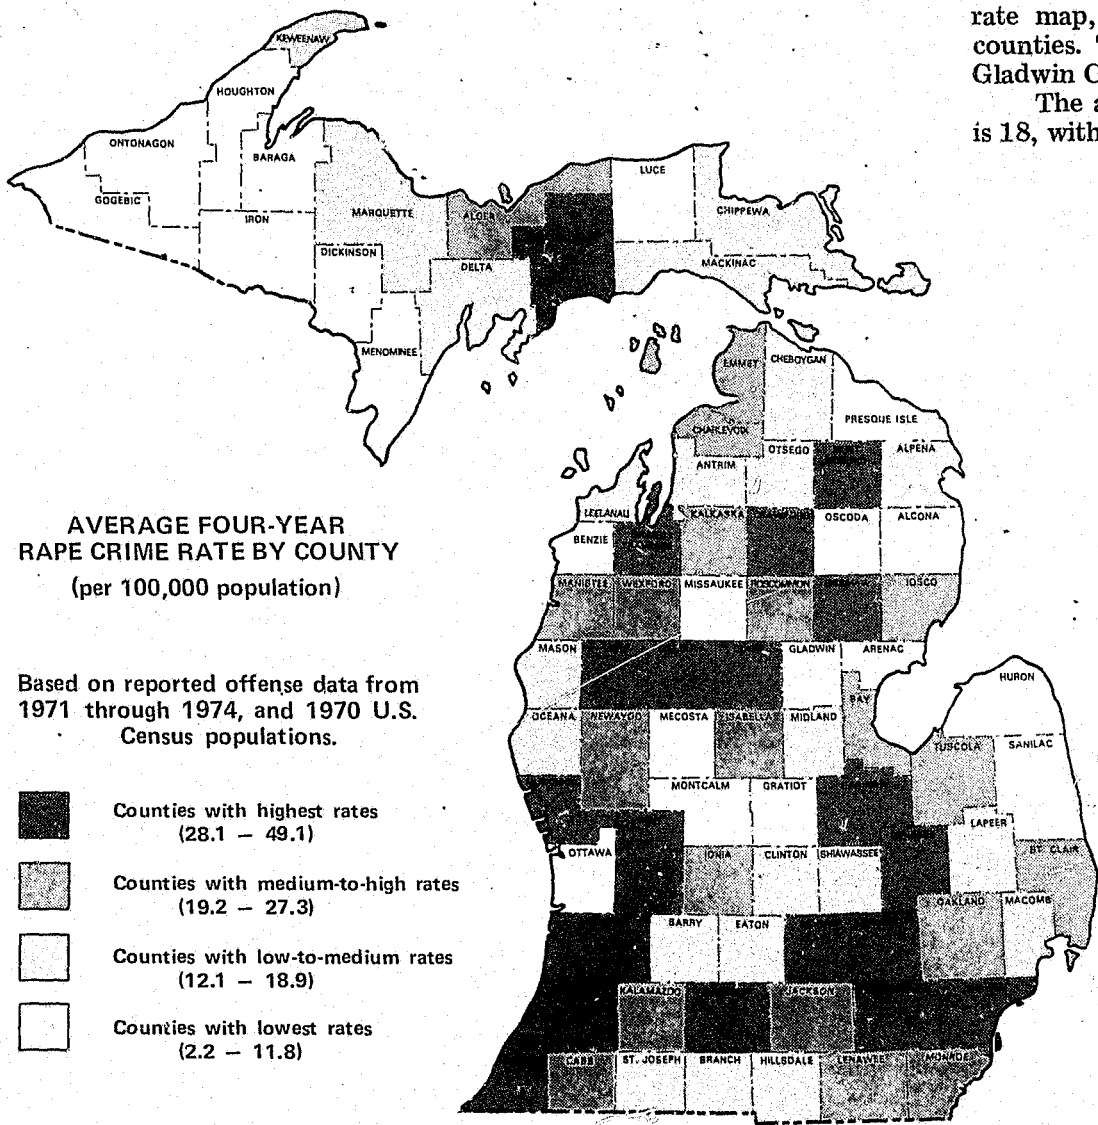

RAPE

Rape is by definition almost an exclusively male crime, although a few females are arrested each year for complicity in these offenses. It is also largely an adult offense; 86.7% of those arrested in 1974 were adults. Of those rape offenses reported, 71.8% were forcible (successful)

rapes, while 28.2% were attempted rapes. It is suspected that a large percentage of rapes, especially attempted rapes, are not reported to the police, so that the figures reported here form a rather incomplete picture of rape in Michigan.

As with murder, rape shows no clear pattern on the county crime rate map, with the exception of some concentration in large urban counties. The highest rape rate is in Wayne County; the lowest is in Gladwin County.

The arrest age chart below shows that the peak arrest age for rape is 18, with significant involvement by those of ages 16 through 23.

NUMBER OF ARRESTS AS A PERCENTAGE OF THE NUMBER AT THE PEAK ARREST AGE

ROBBERY

Robbery is the taking or attempt to take anything of value from the care, custody, or control of a person by force or threat of force or violence, and/or by putting the victim in fear.

1974 ROBBERY ARRESTS BY SEX AND AGE	Male	Female	Total
Adult	73.8%	4.4%	78.2%
Juvenile	20.1%	1.7%	21.8%
TOTAL	93.9%	6.1%	100.0%

* * * * *

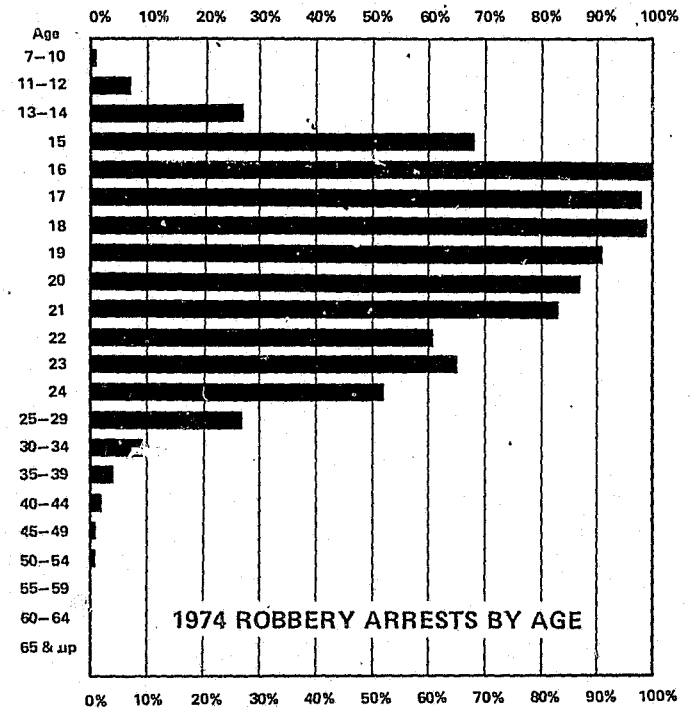

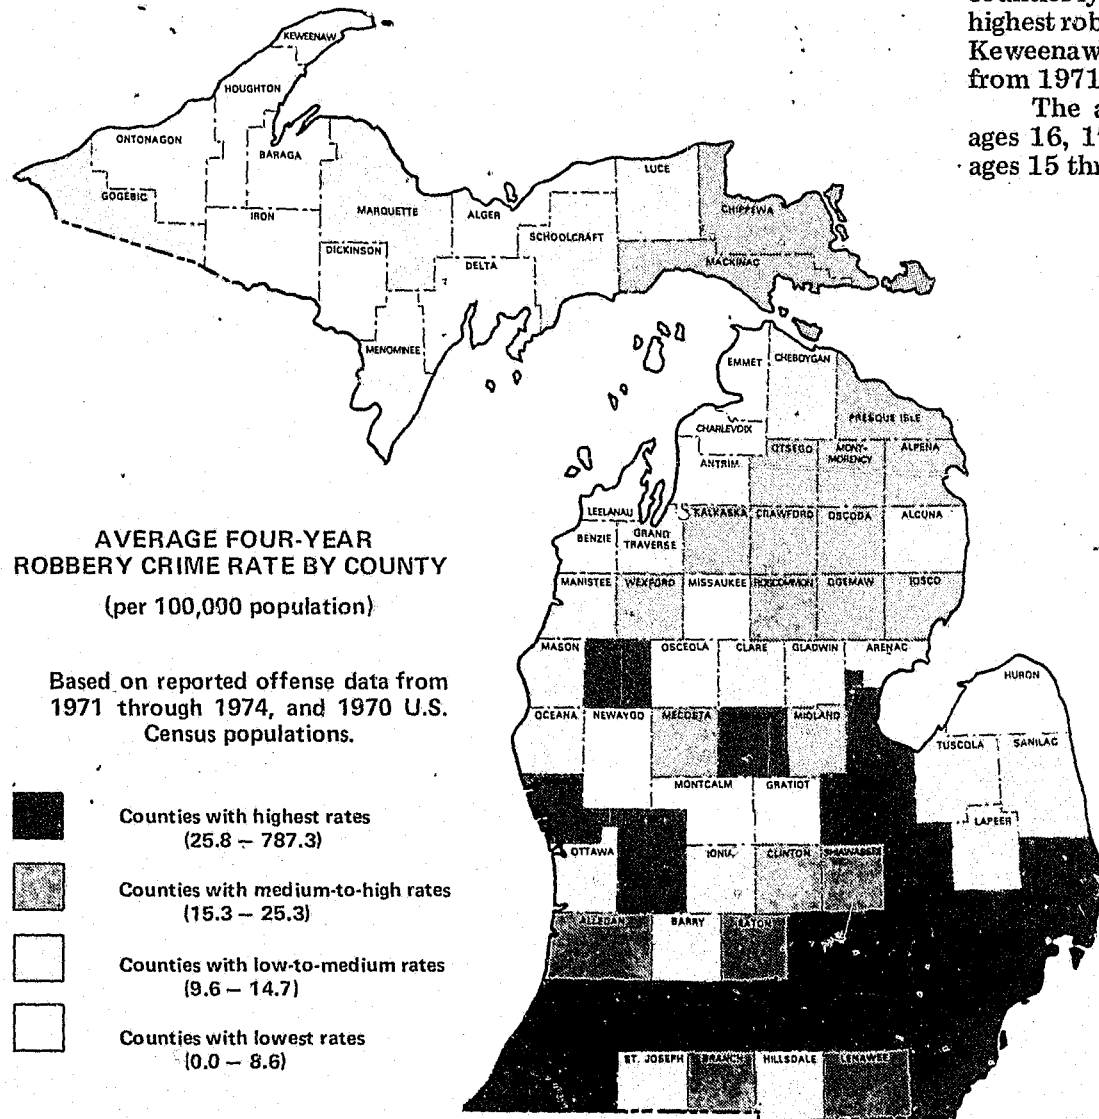

ROBBERY

Of all the index offenses, robbery is the most concentrated within urban areas; 94.1% of 1974 robberies occurred in urban areas. Robberies increased 20.1% in 1974, one of the largest gains of the index crimes; arrests for robbery increased by 19.5%. The clearance rate for robbery

is low—only 18.4%, most likely because the offender is usually a stranger to the victim and not readily identifiable.

The crime rate map for robbery shows a strong concentration in the large urban counties in the southern part of the state. Note that all counties lying in the I-94 "corridor" are in the highest rate category. The highest robbery rate is in Wayne County; the lowest rate is in Missaukee, Keweenaw, and Alger Counties, all of which had no reported robberies from 1971 through 1974.

The arrest age chart shows an almost equal number of arrests at ages 16, 17, and 18 for robbery. Significant involvement extends from ages 15 through 24.

NUMBER OF ARRESTS AS A PERCENTAGE OF THE NUMBER AT THE PEAK ARREST AGE

AGGRAVATED ASSAULT

Assault is an attempt or offer with unlawful force or violence, to do physical injury to another. An aggravated assault may be committed by a gun, knife or other cutting instrument, other dangerous weapons such as clubs, or through the use of hands, fists or feet. Assault with

intent to commit a murder is also reported as aggravated assault.

All assaults, where no weapon is used, and which result in minor injuries, are normally classified as non-aggravated assaults and are not counted in the Crime Index totals.

AGGRAVATED ASSAULT OFFENSES	1973	1974	% Change
TOTAL OFFENSES REPORTED	23,001	24,739	+ 7.6%

1974 AGGRAVATED ASSAULT ARRESTS BY SEX AND AGE	Male	Female	Total
Adult	70.7%	7.4%	78.1%
Juvenile	16.6%	5.3%	21.9%
TOTAL	87.3%	12.7%	100.0%

* * * * *

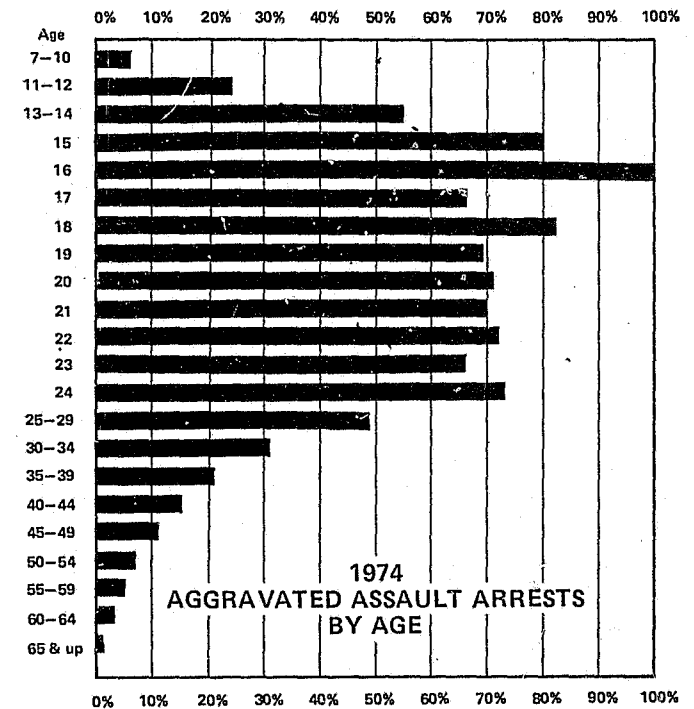

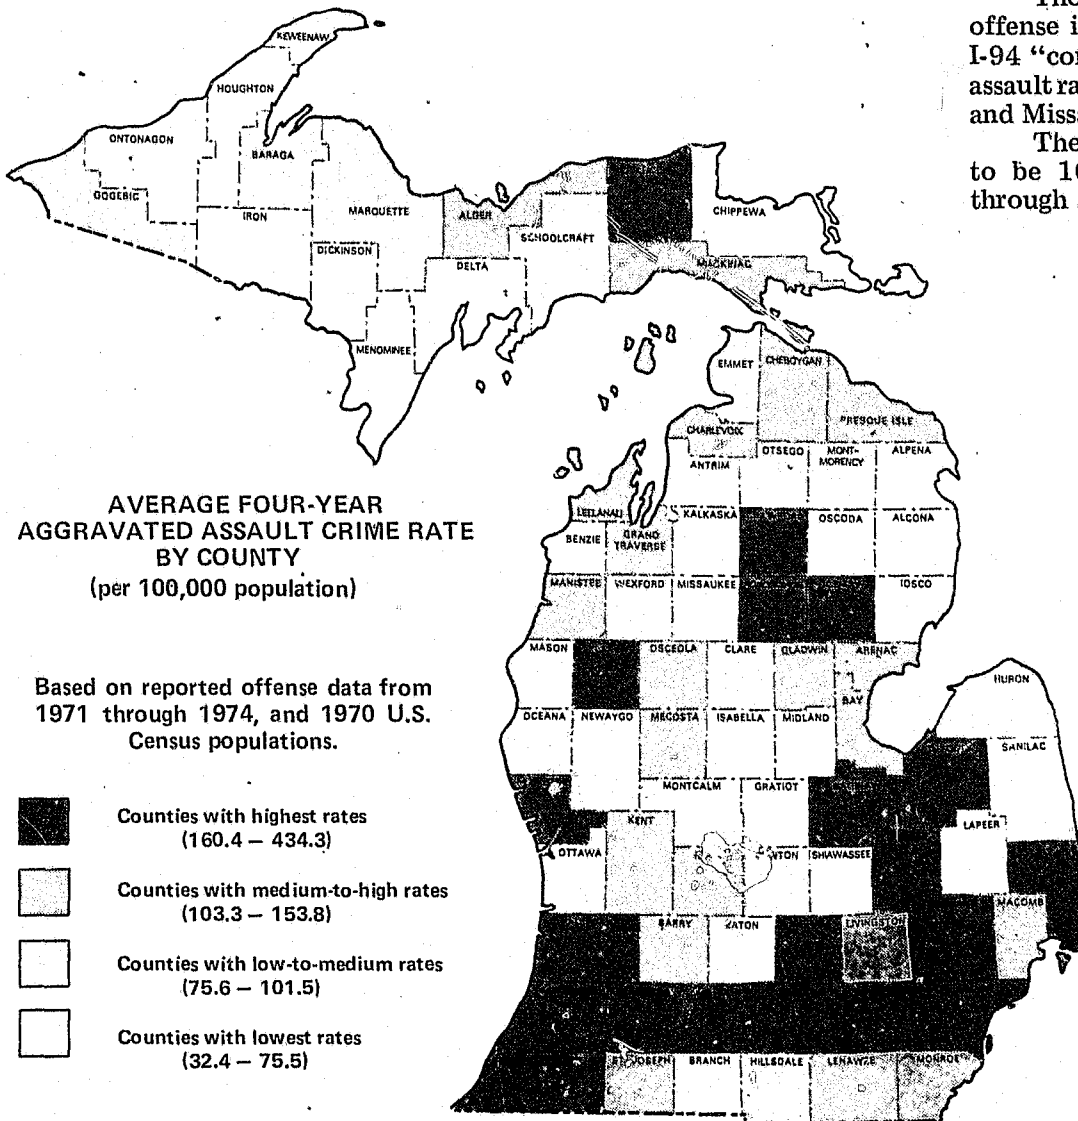

AGGRAVATED ASSAULT

Aggravated assault increased 7.6% in 1974, one of the smaller increases among the index offenses. Urban areas reported 77.2% of the offenses. The weapon used in committing the assaults showed no predominance by any of the four weapon categories (see facing page).

Arrests for aggravated assault rose 12.7% during the year. The clearance rate was 53.2%, the highest of the index crimes, except for murder; this high rate is probably due to the fact that most assault victims know the offenders and can readily identify them.

The assault crime rate map shows heavy concentration of this offense in the large urban counties. Note that all counties lying in the I-94 "corridor" are in the highest rate category. The highest aggravated assault rate is in Genesee County; the lowest rate is a tie between Alcona and Missaukee Counties.

The arrest age chart below shows the peak arrest age for assault to be 16; however, the level of arrests is relatively high for ages 13 through 24.

NUMBER OF ARRESTS AS A PERCENTAGE OF
THE NUMBER AT THE PEAK ARREST AGE

BURGLARY

Burglary is the unlawful entry of a structure to commit a felony or a larceny. Forcible burglary involves some type of physical force to gain entry; unlawful entry does not.

* * * * *

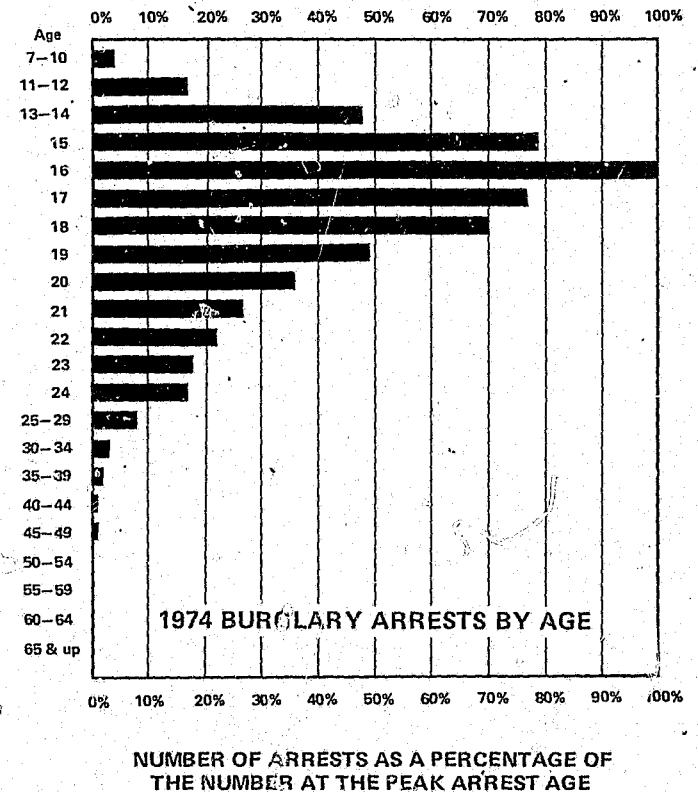

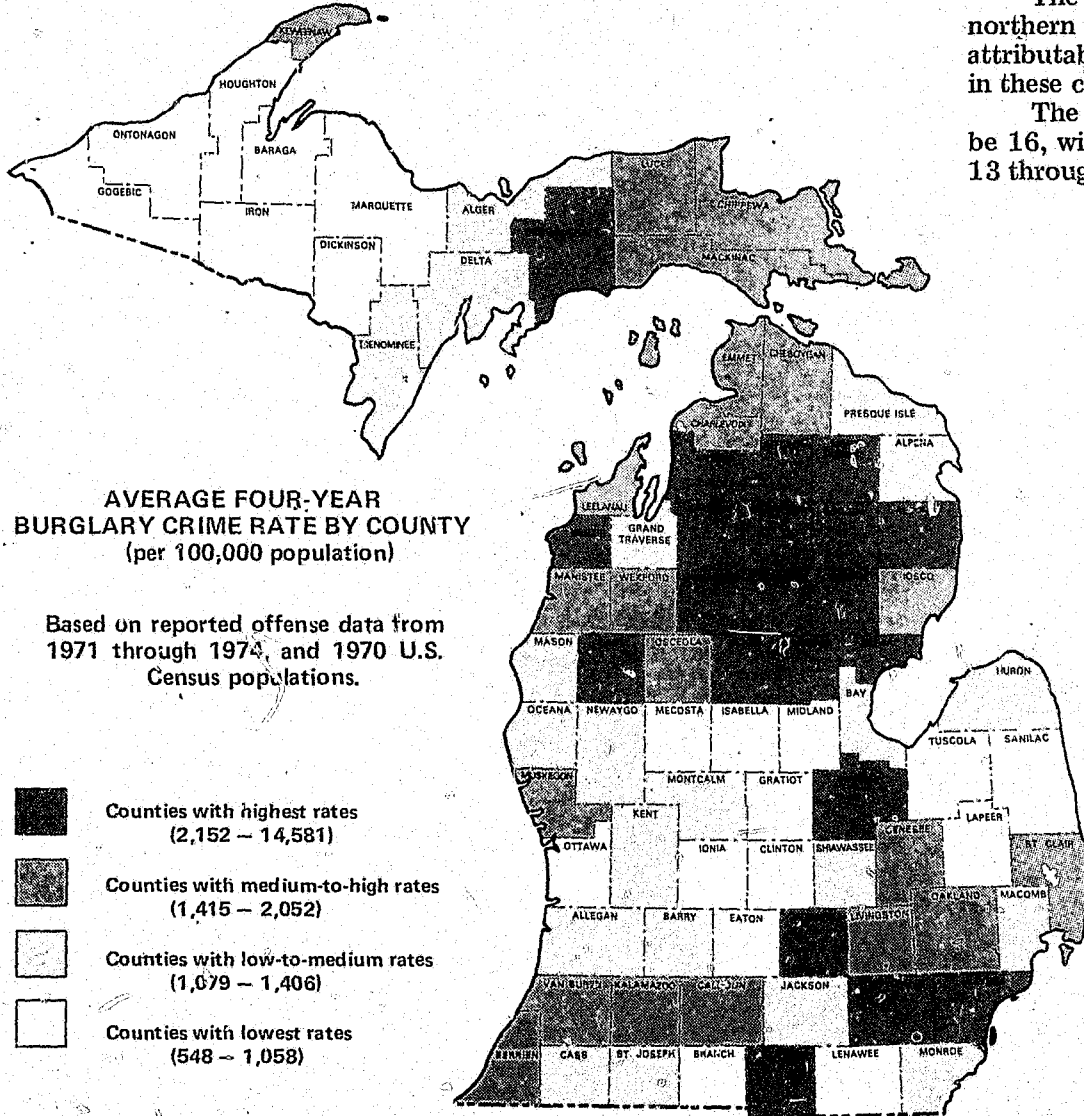

BURGLARY

Next to larceny, burglary showed the largest increase (21.4%) of the index crimes in 1974. Of all the index crimes, burglary is the least concentrated in urban areas, with only 67.3% reported as having occurred in these areas in 1974. Residential burglaries accounted for 61.9% of

all 1974 burglaries, and as might be expected, the data show that the most popular time for burglary is at night. Burglary arrests rose 23.4% during 1974, slightly more than the rise in burglary offenses themselves. The clearance rate was a low 15.0%.

The burglary crime rate map clearly shows high rates in many northern lower peninsula counties. Presumably, these high rates are attributable to burglaries of the many part-time residences and cottages in these counties which are easy burglary targets.

The arrest age chart below shows the peak arrest age for burglary to be 16, with significant involvement in the relatively narrow age range of 13 through 19.

LARCENY

Larceny (Theft) is the taking of the personal property of another with intent to permanently deprive him of ownership.

All larcenies, regardless of the value of property taken, are now included in the index crime offenses.

LARCENY OFFENSES	1973	1974	% Change

* * * * *

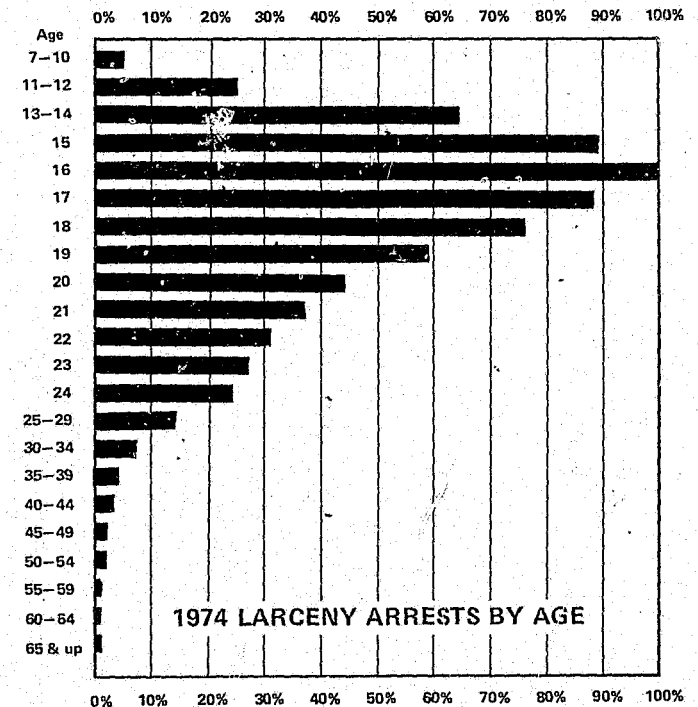

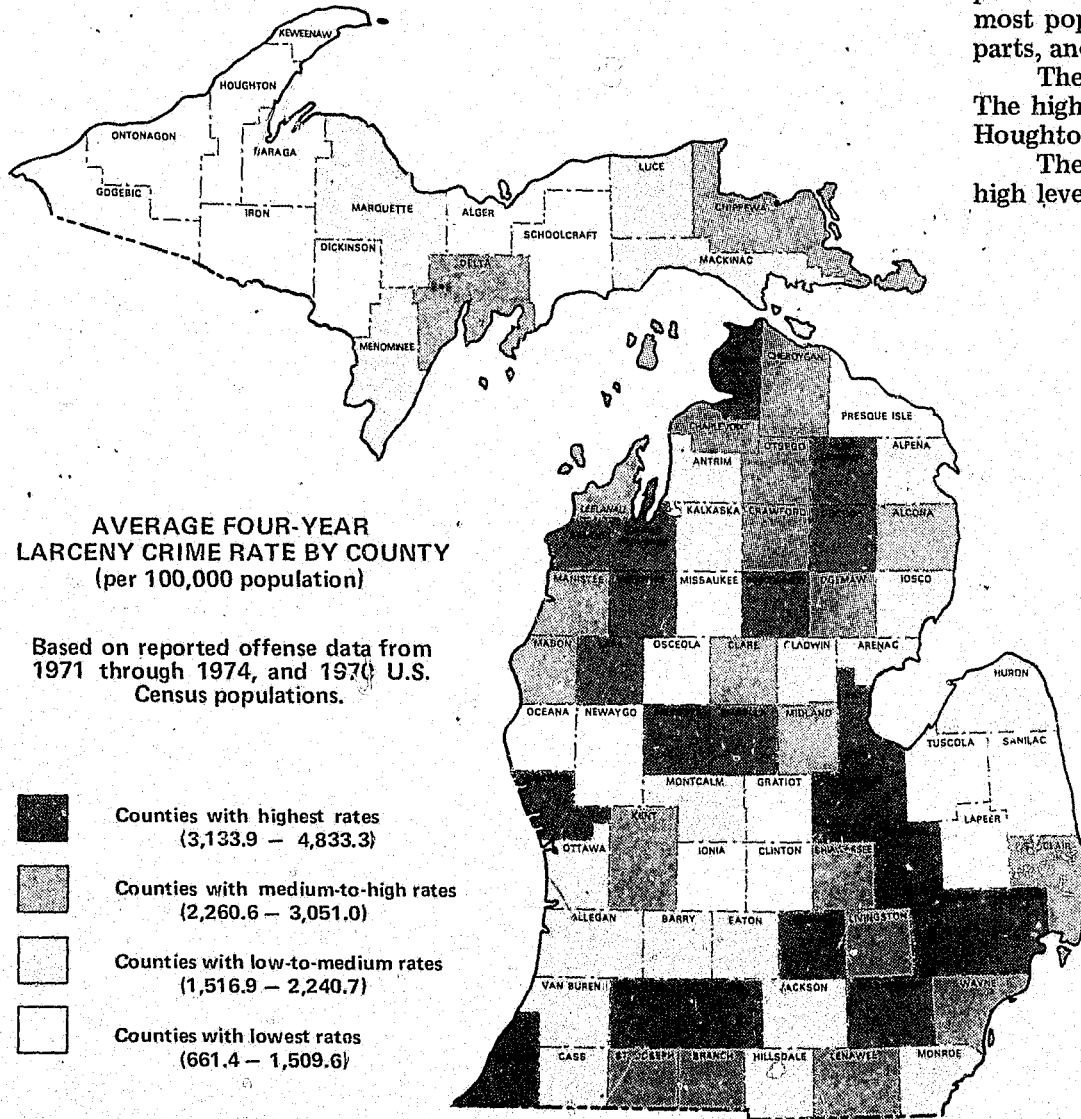

LARCENY

Larceny is by far the most common crime reported to the Michigan Uniform Crime Reports, making up 51% of all index crimes, and 27% of total crimes reported in 1974. It also showed the largest increase of all the index offenses, rising 22.0% in 1974. The increase in rural areas was

slightly larger than in urban areas. The number of arrests for larceny shot up 29.2%, but still only 19.7% of larcenies were reported cleared by arrest. In terms of the value of property stolen, there is a definite shift to higher value goods (over \$50); this may be partially a by-product of inflation, which causes the value of goods to increase. The most popular types of larceny in 1974 were larcenies of bicycles, auto parts, and articles from buildings (other than shoplifting).

The larceny crime rate map shows no definite pattern to larcenies. The highest larceny rate is in Roscommon County; the lowest rate is in Houghton County.

The arrest age chart below shows 16 as the peak arrest age, with high levels of involvement for ages 13 through 19.

NUMBER OF ARRESTS AS A PERCENTAGE OF THE NUMBER AT THE PEAK ARREST AGE

AUTO THEFT

Auto theft or motor vehicle theft, is the larceny of a motor vehicle. This includes all vehicles that can be registered as such, including autos,

trucks, buses, motorcycles, snowmobiles, etc. "Joyriding" is include in this category.

AUTO THEFT OFFENSES	1973	1974	% Change

TOTAL	92.8%	7.2%	100.0%

* * * * *

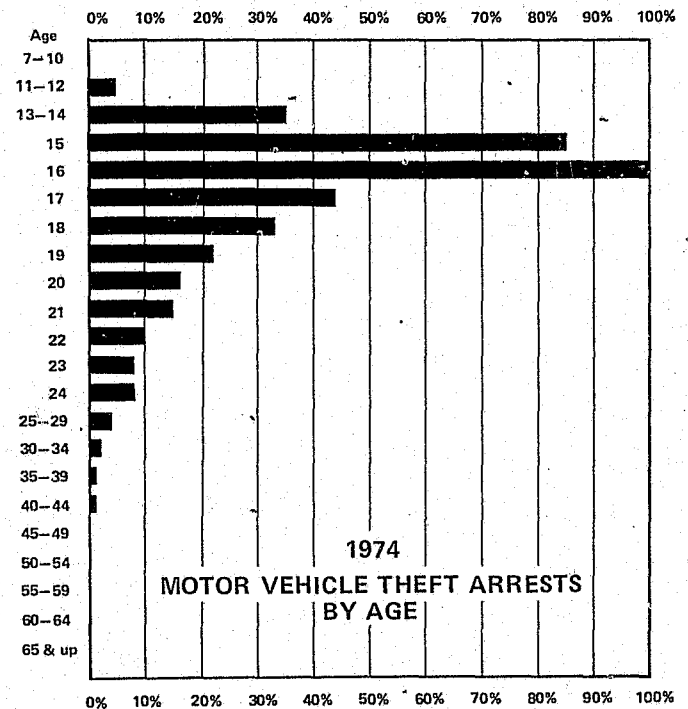

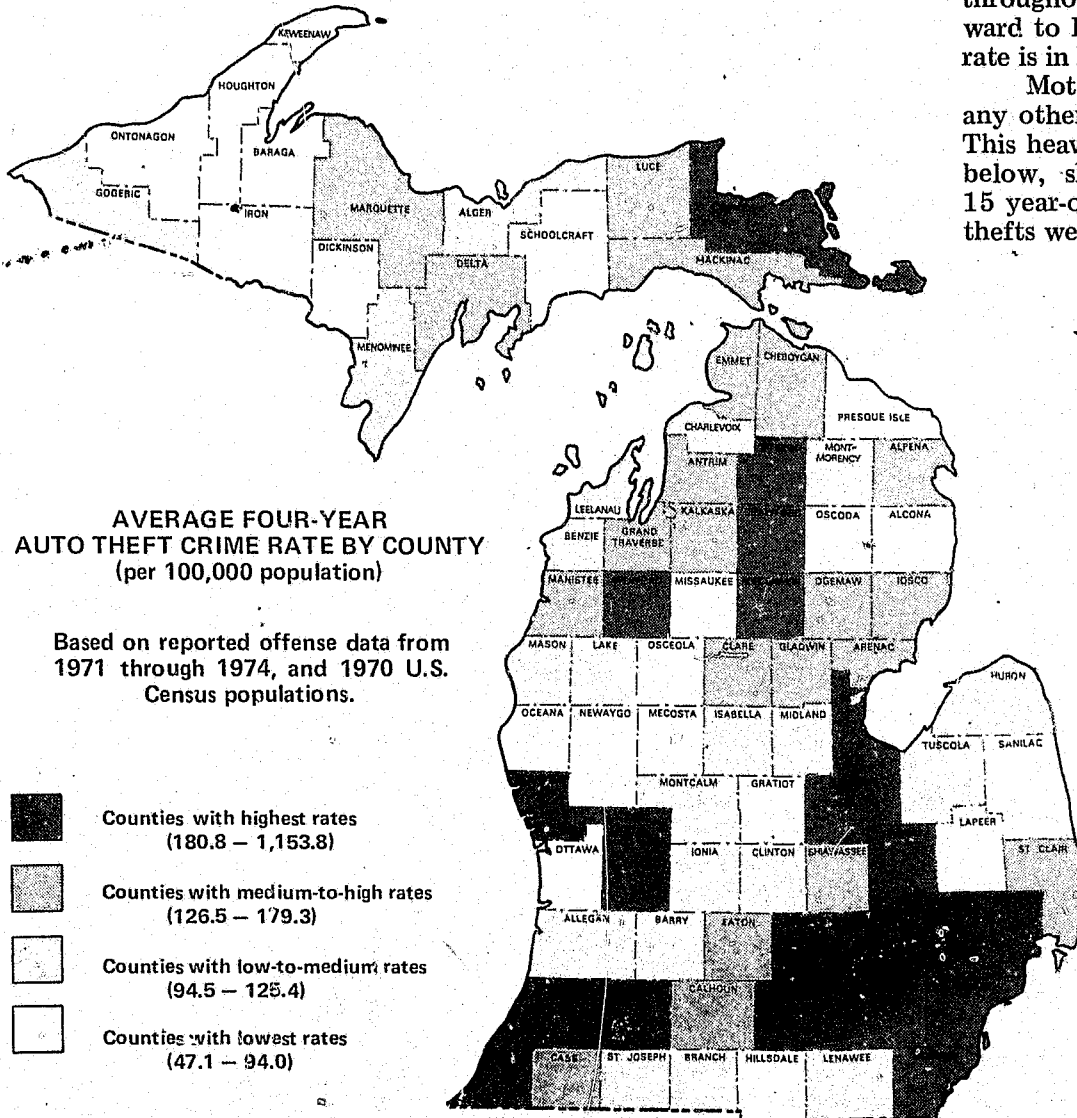

AUTO THEFT

Motor vehicle theft, the final index crime category, increased 15.0% in 1974, with a slightly higher increase in rural areas than in urban areas. Disturbingly, the number of arrests for this crime fell 13.1% during the year, in sharp exception to the other index crimes, which generally

showed increases in arrests in proportion to offenses. The clearance rate experienced a sharp 14.8% decrease, undoubtedly due to the decline in arrests.

The motor vehicle theft crime rate map indicates a high rate throughout the southeastern counties around the Detroit area, and northward to Bay County. The highest rate is in Wayne County; the lowest rate is in Iron County in the upper peninsula.

Motor vehicle theft involves a higher percentage of juveniles than any other index offense—57.6% of the arrestees were juveniles in 1974. This heavy involvement of juveniles is evident from the arrest age chart below, showing the peak arrest age to be 16, followed closely by 15 year-olds. In 1974, 64.9%, or almost two-thirds, of all motor vehicle thefts were committed by persons between the ages of 13 and 17.

NUMBER OF ARRESTS AS A PERCENTAGE OF
THE NUMBER AT THE PEAK ARREST AGE

SELECTED NON-INDEX OFFENSES

The following non-index offenses were selected for analysis in a manner similar to that for index offenses because of their general interest to many readers and users of this report.

* * * * *

DRUG LAW VIOLATIONS

Drug law violations increased a relatively modest 6.9% in 1974. However, rural areas reported a 16.8% rise, while urban areas reported only a 1.1% rise. Arrests for marijuana accounted for 72.0% of the drug arrests in 1974, up from 69.2% in 1973. By far the biggest arrest type

was for possession of illegal drugs, accounting for 74.8% of all arrests.

Juveniles were involved in 18.9% of the drug arrests in 1974, and 88.1% of all arrestees were male.

The clearance rate for drug offenses was 70.7% in 1974, about the same as for 1973. This exceptionally high clearance rate is most likely due to the fact that drug arrests, along with several other types of arrests, are usually initiated by the police upon the observance of an offense. Therefore, the offense and arrest, and consequently the clearance, occur at the same time, as opposed to other crimes where an investigation is needed to identify the criminal.

The county crime rate map for drug offenses shows a high concentration of offenses in several northern lower peninsula counties, the southeastern urban counties, and the extreme southwestern counties.

* * * * *

DRIVING UNDER THE INFLUENCE OF ALCOHOL OR NARCOTICS

The number of reported "driving under the influence" offenses increased only 1.1% in 1974. In rural areas, there was a 4.8% increase, while in urban areas there was a decrease of 2.2%.

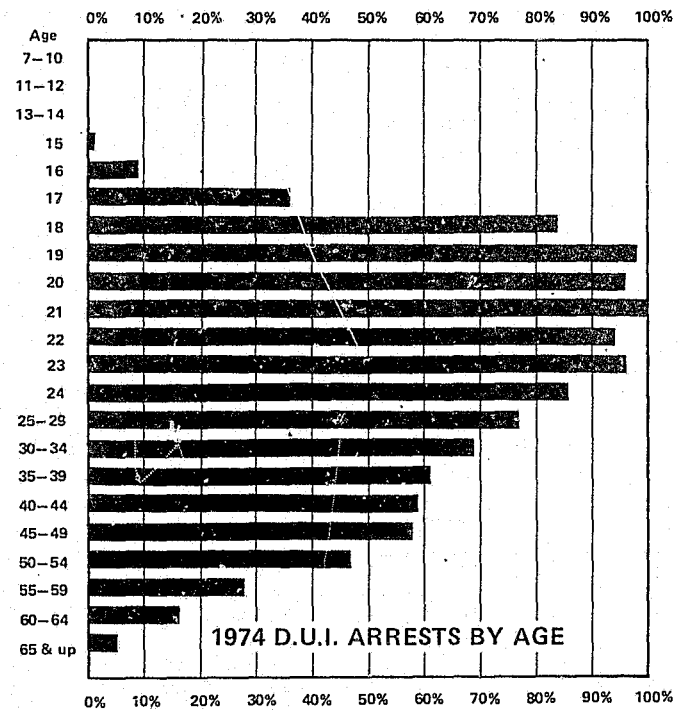

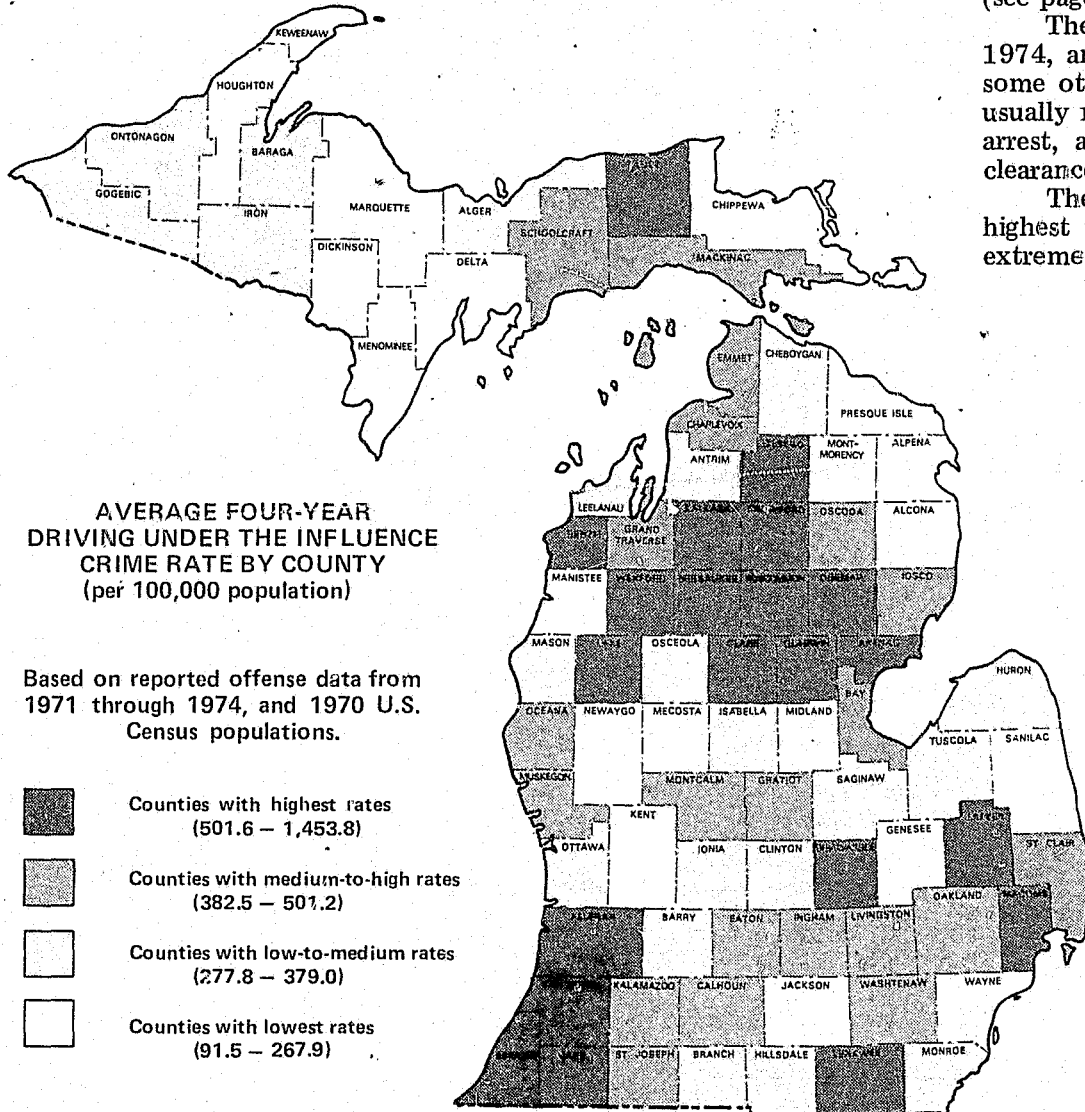

The number of persons arrested for this offense remained virtually unchanged. Of those arrested, 99.6% were adults, and 93.4% were males.

As evidenced by the arrest age chart below, the peak arrest age is 21, but there are significant numbers of arrests from ages 18 through 49.

"Driving under the influence" arrestees are older on the average than those arrested for any other offense. In fact, this offense accounts for a large portion of those arrested in the older age groups (see page 23).

The clearance rate for driving under the influence was 94.9% in 1974, an exceptionally high figure. As with drug law violations, and some other types of offenses, driving under the influence arrests are usually made after police observance of an offense, so that the offense, arrest, and clearance take place at the same time; this leads to high clearance rates.

The county crime rate map below shows that this offense has its highest rates in the northern lower peninsula counties, and in the extreme southwestern counties.

NUMBER OF ARRESTS AS A PERCENTAGE OF THE NUMBER AT THE PEAK ARREST AGE

1974 REGIONAL CRIME AND ARREST DATA

Presented here is a very brief analysis of selected 1974 crime and arrest data which has been compiled according to the state planning and development regions, as defined by the Executive Office of the Governor. The accompanying map identifies the counties included in each of the fourteen regions. The data which are listed below may serve to partially indicate various crime offense and arrest patterns of the regions. Arrests for "driving under the influence" were included because they are crime statistics which are directly related to traffic problems. This limited data compilation is not intended to invite direct comparisons of law enforcement among the various regions.

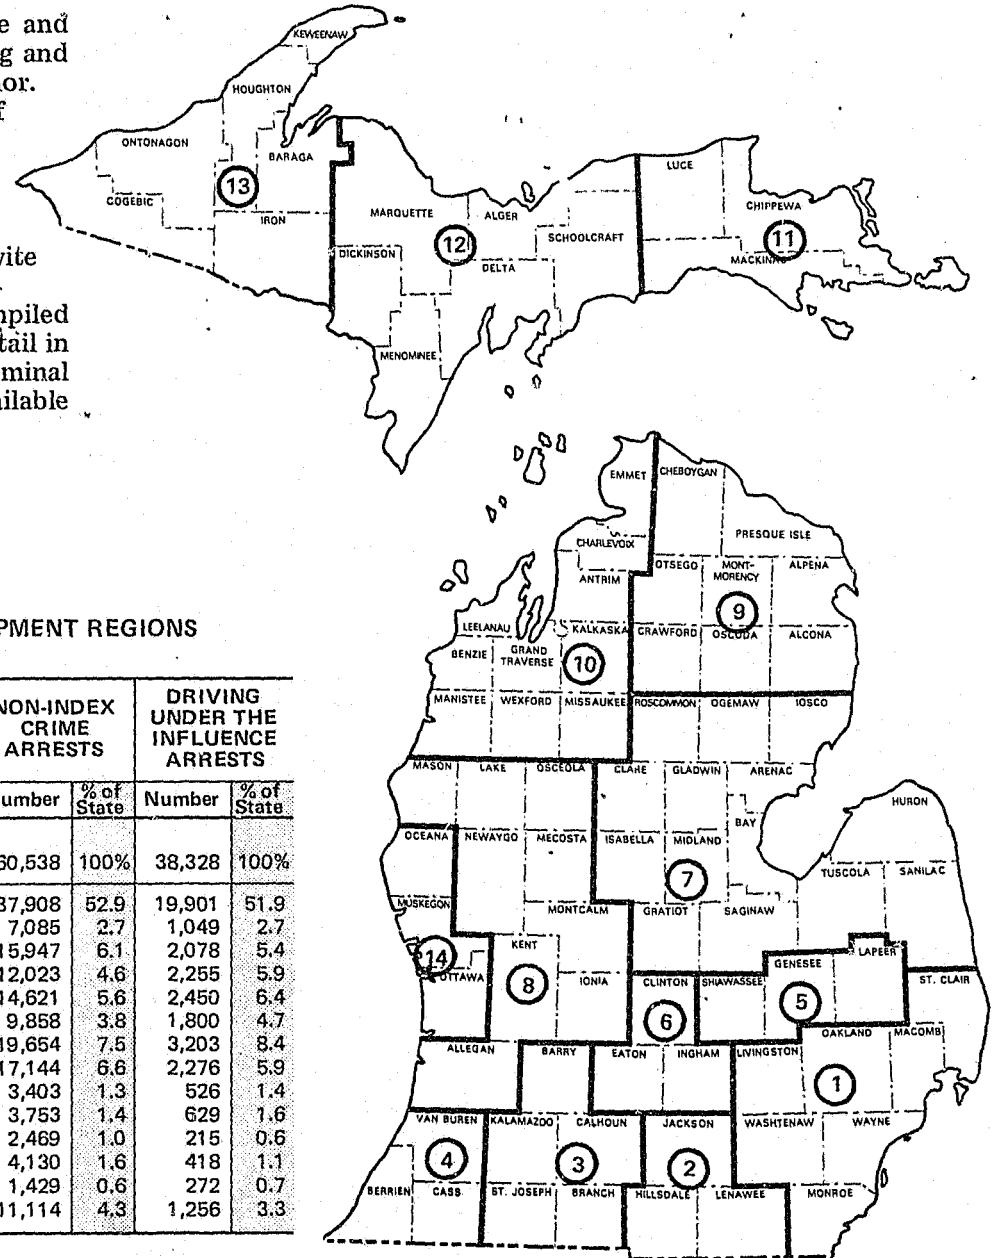

It should be noted that any desired regional statistics can be compiled by the appropriate combination of county data, which appear in detail in the blue and pink pages of this report. The Michigan Office of Criminal Justice Programs compiles various regional statistics, which are available upon request by contacting:

MICHIGAN OFFICE OF CRIMINAL JUSTICE PROGRAMS
 Second Floor, Lewis Cass Building
 Lansing, MI 48913

ARREST AND OFFENSE DATA FOR INDIVIDUAL JURISDICTIONS

This section presents data on the number of criminal offenses, arrests, and juvenile apprehensions reported by each participating law enforcement agency. These statistics represent the total of that information submitted to the Uniform Crime Reporting Unit of the state police by February 15, 1975. The following notes will be helpful in interpreting and using these tables:

1. A single asterisk (*) beside a contributing agency's name indicates that less than twelve monthly reports were made by that jurisdiction. Where this occurs, a number in parentheses is placed beside the name to indicate the number of months for which reports were received. A double asterisk (**) indicates the 1974 total is incomplete, due to incomplete reporting by one or more jurisdictions within the county.
2. The offense and arrest data for each jurisdiction are presented facing each other on these pages. Thus, it is easy to compare the number of offenses and arrests for each crime category. However, as discussed on pages 7-9 of this volume, comparisons of offense data with arrest data cannot be used to measure the performance of any law enforcement agency; this is better done by use of the clearance rates presented in the pink pages of this report.
3. Most state police post areas cover parts of two or more counties; therefore, it is impossible to determine the activity of these posts from the state police data presented here.
4. It should be noted that valid comparisons can be made between individual agency totals ONLY IF A VARIETY OF FACTORS ARE CONSIDERED:* Some of these factors are:
 - Density and size of the community population and the metropolitan area of which it is a part.
 - Composition of the population with reference particularly to age, sex and race.
 - Economic status and mores of the population.
 - Relative stability of population, including commuters, seasonal, and other transient types.
 - Climate, including seasonal weather conditions.
 - Educational, recreational, and religious characteristics.
 - Effective strength of the police force.
 - Standards governing appointments to the police force.
 - Policies of the prosecuting officials in the courts.
 - Attitude of the public toward law enforcement problems.
 - The administrative and investigative efficiency of the local law enforcement agency, including the degree of adherence to crime reporting standards.
5. In a few instances, a negative number appears in the offense listings in this section. This occurs because agencies are allowed to adjust the number of crimes previously submitted for any category. This is done to declare that a previously reported crime was "unfounded". For example, if a village reports an aggravated assault for February, but the victim dies from the injuries in March, the village will subtract the aggravated assault count and add a murder count. A negative number in the charts means that during 1974, more subtraction counts than addition counts were submitted. These are usually due to subtractions reported in 1974 for crimes which were reported late in 1973.

CRIME RATE AND OFFENSE DISPOSITION DATA

This section presents selected items of data regarding disposition of cases after arrest or apprehension, the percentage of crimes which are cleared by arrest, and the crime rates for the various police jurisdictions which participate in the Uniform Crime Report system. These statistics are calculated from data submitted by the various agencies.

The following notes will be helpful in interpreting and using the data in these tables:

INCOMPLETE REPORTING

A single asterisk (*) beside a contributing agency's name indicates that less than twelve monthly reports were made by that jurisdiction. Where this occurs, a number in parentheses is placed beside the name to indicate the number of months for which reports were received. A double (**) asterisk indicates that the 1974 county total is incomplete because not all agencies in the county reported for the entire year.

SERVICE POPULATIONS AND CRIME RATES

The crime rates are computed on the basis of the number of reported crimes per 100,000 population of the reporting jurisdiction. The county populations used in computing crime rates for 1972, 1973, and 1974 are based on official State of Michigan estimates. Service populations for state police, sheriffs, and local jurisdictions are based on the 1970 U.S. Census, since no comprehensive population projections are available for local areas. Combined state police and sheriff populations and crime rates have been included, since they both serve essentially the same areas.

Index crime rates are the most stable and valid indicator of the crime problem in any particular area. The non-index rates are suspect in many cases because of reporting irregularities, particularly in regard to the "All Other" category. The total crime rate (for Index and Non-Index crimes combined) has been deleted this year because it is believed that this rate has little practical value since it mixes serious crimes with petty offenses which are irregularly reported.

Crime rates for jurisdictions reporting less than 11 months data are not included since these rates would be artificially low due to incomplete reporting.

CLEARANCE RATES

The percentage of reported offenses cleared by the arrest of one or more persons is computed for index, non-index, and total offenses. Because of the change in the definition of the index crimes in 1974,

the index crime clearance rates previously published for counties for 1972 and 1973 are not comparable to those for 1974. Since revised rates for 1972 and 1973 could not be computed in time for this report, they are not included in the tables. However, the total clearance rates included in these tables are comparable.

Since clearances may be reported in the current year for offenses which were reported in a previous year, clearance rates greater than 100% are possible. Since such percentages are meaningless, rates over 100% have been reduced to 100% wherever they occur. Because of this year-to-year overlap in reporting offenses and their clearances, the reported clearance rates should be interpreted with great caution, especially for smaller jurisdictions with small numbers of offenses and clearances.

ADULT DISPOSITIONS

These data are intended to show the eventual disposition of those persons arrested by the police. The percentages listed in the first three categories are based on the known dispositions as of the end of the year. In many cases, sizeable numbers of cases are outstanding at year's end; consequently, the fourth column is often rather large. As the final dispositions of these cases become known, they fall into the first three columns.

This disposition data should be used with caution because of the following problems. First, the dispositions for many cases are often difficult for law enforcement agencies to obtain, and thus the dispositions of many cases may never be reported to the UCR. Second, the percentages shown are based on the number of persons charged in the CURRENT year, whereas the dispositions reported may be for persons charged in the CURRENT year and/or for persons who were reported charged in PREVIOUS years. The latter case would occur when the disposition of a person charged in a previous year was known for the first time in the current year. For example, an agency may have reported 400 persons charged in 1974, and reported the dispositions for 250 persons, with 200 of these dispositions being for persons charged in 1974, and 50 being for persons charged in previous years.

STATE POLICE DATA

In most cases, state police data for counties cannot be interpreted as the total activity for any given state police post, since most posts have multiple-county post areas. State police data by post is not reported in the UCR.

GLOSSARY OF TERMS

The following items are listed, with general definitions, to serve as a guide to the reader. The terms apply only to usage in this volume, for statistical reporting purposes, and will not always conform to definitions found elsewhere for other purposes. Wherever possible, the UCR system attempts to use terminology which is easily understood in everyday language.

AGGRAVATED ASSAULT—See "Assault".

ARREST—The act of taking another person into custody for the purpose of holding or detaining him to answer a criminal charge or civil demand.

ASSAULT—The unlawful attack by one person upon another for the purpose of inflicting bodily injury. In general, an assault with a dangerous or deadly weapon is classified as an "aggravated assault". If no such weapon is used, the term "simple assault" is often used.

AUTO THEFT—The theft or attempted theft of a motor vehicle (auto, truck, bus, motorcycle, snowmobile, plane, etc.).

BURGLARY—The unlawful entry of a structure to commit a felony or a theft. NOTE: In the blue section of this book, the term "burglary (forcible)" means some type of physical force was needed to gain entry. If no physical force is needed, the crime is counted under "burglary (unlawful)". A person's illegal entry by opening an unlocked door would be classified in the latter category.

CLEARANCE—The discontinuance of a criminal investigation by the police because the person (or persons) who committed the crime was identified. When that person (or persons) is arrested, the crime is said to be "cleared by arrest". An "exceptional" clearance is one in which no arrest occurs, but the crime is cleared for special reasons, such as the death of a person known to have committed the crime.

CLEARANCE RATE—A numerical figure which indicates the percent of all crimes which are cleared (or "solved") by the police. NOTE: In the pink section of this volume, clearance rates are calculated by linking each clearance to the jurisdiction in which the original offense occurred. For example, if the Littleton Police Department takes a report on a larceny, but another department arrests the suspect for the larceny, Littleton clears the crime and reports it to the UCR as cleared by arrest.

CRIME—The violation of law, or an act of commission or omission which is a violation of a law for which there is a penalty. The two general legal classifications of crimes are misdemeanors (less serious crimes) and felonies (more serious crimes). Often used interchangeably with the term "offense".

CRIMES CLEARED BY ARREST—A figure which indicates the number of crimes which the police have "solved" by identifying and arresting the suspected criminal(s). Crimes may also be cleared by an "exceptional clearance" (see CLEARANCE).

CRIME RATE—A figure which represents the number of crimes known to the police, for each 100,000 population. It is intended as a measure of the severity of the crime problem within a given jurisdiction. There are three types of crime rates presented in this volume—the index crime rate, the non-index crime rate, and the total crime rate, including both index and non-index crimes.

FELONY—A crime of a more serious nature than those designated as misdemeanors. Generally, it is any crime punishable by imprisonment in state prison.

HOMICIDE—The act of a human being taking away the life of another human being.

INDEX ARREST—An arrest for an index crime.

INDEX CRIMES (Or Offenses)—A term for a grouping of selected types of crimes which are recognized as more stable indicators of crime measurements and trends than the usage of all crimes. Index crimes are: murder and non-negligent manslaughter, rape (forcible and attempted), robbery, aggravated assault, burglary, larceny, and auto theft.

JUVENILE—For Michigan UCR purposes, any person between 7 years (minimum arrest age) and 16 years of age. The FBI includes 17 year-olds as juveniles in their U.S. Uniform Crime Reports.

JUVENILE APPREHENSION—The act of taking a juvenile into legal custody for the purpose of holding or detaining him to answer a criminal charge or civil demand.

LARCENY—The unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. In UCR statistics, larceny of motor vehicles is not counted in the "larceny" category, but is placed in a separate "auto theft" category.

MANSLAUGHTER, NEGLIGENT—The unintentional killing of another person through gross negligence.

MANSLAUGHTER, NON-NEGLIGENT—The unintentional killing of one person by another, as a result of a potentially dangerous, willful act, or the intentional killing of another person without premeditation and without malice.

MISDEMEANOR—A crime of lesser seriousness than a felony. In Michigan, the usual penalty for a misdemeanor is one year imprisonment and/or a fine. There are instances where a misdemeanor may carry a more serious penalty, at the option of the Legislature.

MURDER—An act where a person of sound memory and discretion unlawfully kills another person, with some degree of intent. (If the killing is without any intent, it is classified as manslaughter.)

NON-INDEX ARREST—An arrest for a non-index crime.

NON-INDEX CRIMES (Or Offenses)—All crimes reported to the Michigan UCR which are not index crimes.

OFFENSE—A violation of the criminal laws; a misdemeanor or felony; a crime.

OFFENSES KNOWN TO THE POLICE—The number of offenses or crimes of which the police are aware.

RAPE—The carnal knowledge of a female, forcibly and against her will.

ROBBERY—The taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

RURAL—Areas in the state not falling within the definition of "urban".

THEFT—The unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another.

TOTAL CRIMES—All crimes reported to the Michigan UCR, including both index and non-index offenses.

URBAN—Any municipality with a population of 2,500 or more, which contributes to the UCR.

UNINCORPORATED AREA STATISTICS—Those data submitted to the UCR by township police (which do not report through the sheriff) and campus, airport, park police, or other specially-authorized law enforcement agency.
