Cat 1

The cover features large, bold letters spelling 'NPS' vertically. Below this, the title 'NATIONAL PRISONER STATISTICS' is printed in a serif font. Underneath the title, it says 'NUMBER 33 * DECEMBER 1963'. In the center, it reads 'PRISONERS IN STATE AND FEDERAL INSTITUTIONS 1962'. At the bottom left, it says 'UNITED STATES DEPARTMENT OF JUSTICE ROBERT F. KENNEDY, ATTORNEY GENERAL'. At the bottom right, it says 'BUREAU OF PRISONS JAMES V. BENNETT, DIRECTOR'. A small American flag is visible on the right side. A handwritten note 'West-Delco' is written vertically along the left edge of the cover.

Prisoners in State and Federal Institutions 1962

Coverage of this Report

This report presents in tabular and graphic form information concerning prisoners admitted to, confined in, and released from State and Federal correctional institutions for adult offenders in the United States during calendar year 1962. It is a part of the National Prisoner Statistics program, which is a voluntary reporting program initiated in 1926.

Recipients of the previous bulletins in this series, "Prisoners in State and Federal Institutions", will note that many changes have been made in the 1962 bulletin. One table which appeared in all of the previous reports was dropped, several new tables were added, and the tables have been renumbered.¹ In addition, more extensive use has been made of graphical methods to supplement the text and to present information from tables contained in this and in previous bulletins.

These changes were made in the hope that they will increase the usefulness of this annual report. We welcome comments and suggestions from the recipients with respect both to the changes made in this issue and to any suggested changes for future bulletins.

Prison Population Decreases After Reaching Record High in 1961

On December 31, 1962, there were 219,030 prisoners confined in Federal and State institutions for adult offenders in the United States. This represented a drop of 0.6 percent from the record high of 220,318 prisoners confined at the close of 1961, and was the first time the prison population has registered a decrease since December 31, 1951. A rise of 1.6 percent in the general civilian population during 1962, coupled with the decline in the prison population, resulted in a drop in the ratio of prisoners confined to the civilian population, to 118.3 per 100,000. State institutions reported their

first decrease in prisoners confined since 1951, with a drop of 0.8 percent. Federal institutions, on the other hand, recorded an increase of 1.0 percent—the 14th consecutive year Federal prison population has risen.² (See Charts 1, 2, and 3, and Tables 2 and 3)

Prison Population in State Institutions

Year-end prison population in 1962 was above the 1961 level in only 23 States, as compared with 38 States and the District of Columbia over the 1960 level in 1961. Nine States—Delaware, Hawaii, Illinois, Kentucky, Michigan, New Hampshire, North Carolina, Virginia, and West Virginia—reported decreases of more than 7 percent, while only 2 States—Colorado and Kansas—reported corresponding increases. The major geographical region showing the greatest percentage drop was the North Central region, 2.6 percent, with 8 out of 12 States closing out the year with a lower figure. The largest percentage increase was recorded by the West, 1.3 percent, with 9 out of 12 States closing the year with a greater number of prisoners confined. (See Tables 7 and 8)

It is interesting to note that a total of only 8 States—California, Florida, Illinois, Michigan, New York, Ohio, Pennsylvania, and Texas—contained approximately half of the State prison population, 50.5 percent, and of the estimated national civilian population, 48.4 percent. However, they accounted for proportionately less—38.5 percent—of the net decrease in the prison population in the State institutions. (See Figure 1 and Tables 7 and 8)

Decrease in Court Commitments

One factor which contributed to the drop in prison population was the marked decrease in court commitments in 1962. After registering an increase in 1961 of 6.8 percent over the 1960 total of 74,952, to a record high of 80,073, the number of court commit-

ments to State institutions in 1962 fell 5.2 percent, to 75,888. Only 9 States recorded increases, with 40 States and the District of Columbia reporting decreases. Nine States—California, Delaware, Illinois, Iowa, Montana, New Hampshire, Rhode Island, Vermont, and West Virginia—showed decreases of more than 15 percent, while 3 States—Nevada, North Dakota, and South Carolina—registered corresponding increases. Court commitments declined in all four major geographical regions, with the West showing the greatest percentage drop, 8.0 percent, and the North Central region a close second, with a decline of 6.9 percent. (See Chart 4 and Tables 3, 7, and 8)

Number of Violators Returned Continues to Increase

The number of releasees returned to State institutions after violating the terms of their parole or other conditional release increased 5.3 percent in 1962 over 1961, thus continuing the yearly rise in violators returned that began in 1951. The percentage of increase in 1962 was, however, below the 6.6 percent average increase of the last 10 years, and was far below the increases of 9.1 percent in 1961 and 12.7 percent in 1960. (See Chart 4 and Table 3)

Releases Increase

Another factor contributing to the drop in prison population was the increase of 5.9 percent in conditional and unconditional releases recorded by the State institutions in 1962 over 1961. The 91,329 conditional and unconditional releases reported in 1962 failed by just 163 to equal the combined total of both the court commitments (75,888) and the violators returned (15,604). With the principal methods of admission and release thus offsetting each other, the 747 deaths occurring in the State institutions, combined with an excess of 1,363 escapes and other discharges over escapees returned and other admissions, produced the drop of 1,536 reported by the State institutions in their prison population at the close of 1962. (See Tables 1 and 3)

Among the major geographical regions, the West showed the greatest percentage increase in conditional and unconditional releases, 13.6 percent, with 3 States—California, Nevada, and Utah—reporting increases of 25 percent or more. The only other State in the nation to report a corresponding increase was Illinois. (See Tables 7 and 8)

Increasing Use of Conditional Release Continues

The chief factor in the increasing number of violators being returned to prison is the steadily rising percentage of prisoners who are being released conditionally.³ In 1962, 63.8 percent of all prisoners released from the State institutions continued their sentence under supervision in the community.⁴ Of these, 93.4 percent were by parole. The West led the major geographical regions in the use of the conditional release, with 81.4 percent released conditionally. The West also led in the use of parole, with 99.2 percent conditional releases by parole. Among the individual States, New Hampshire had 100 percent conditional releases, followed closely by Washington, with 99.6 percent. In 33 States, 100 percent of the conditional releases were by parole. (See Figure 2, Charts 6 and 14, and Tables 6, 7, and 8)

Re-Releases Also Continue to Increase

The increasing number of conditional release violators being returned to prison has resulted in a steady rise in the percentage of prisoners being released from prison for the second or subsequent time on the same sentence. In 1962, 15.7 percent of all conditional and unconditional releases from State institutions were re-releases. Regionally, the Northeast had the highest percentage, 24.3 percent, while, among the States, Massachusetts led with 32.8 percent. The South had the lowest percentage, 7.2 percent. (See Chart 5, and Tables 4, 7, and 8)

Conditional methods of release accounted for 57.6 percent of all re-releases from State institutions in 1962. Of these, 89 percent were by parole. Among the prisoners

being released conditionally or unconditionally for the first time on their current sentence, 65 percent were by conditional release, and 94.1 percent of these were by parole. (See Charts 12 and 13, and Table 6)

Females in State Institutions

On December 31, 1962, there were 7,071 females confined in State institutions—3.6 percent of the total prisoners confined—and an increase of 1.2 percent over the year-end figure for 1961. Among the major geographical regions, the Northeast had the highest percentage of female prisoners, 5.2 percent, and Rhode Island led the States, with 10 percent. (See Charts 7 and 11, and Tables 3 and 5)

The number of females received from court in 1962 decreased by 5.1 percent as compared with an 8.3 percent increase in 1961. The number of female violators returned continued to rise sharply, with an increase of 13.9 percent in 1962 over 1961. (See Charts 8 and 10, and Tables 3 and 5)

Female conditional releases increased by only 2.0 percent in 1962, as compared with a rise of 11.6 percent in 1961. On the other hand, the steady downward trend in the number of females released unconditionally that began in 1958 was reversed, with a rise of 5.0 percent in female unconditional releases. (See Chart 9 and Tables 3 and 5)

Footnotes to Text:

¹ Table 6 from the 1961 bulletin (commitments and year-end population by institution) was omitted in its entirety. Tables 1 and 5 were extensively revised, the latter also being retitled. Additional changes were made in the remainder of the tables carried over from the 1961 bulletin.

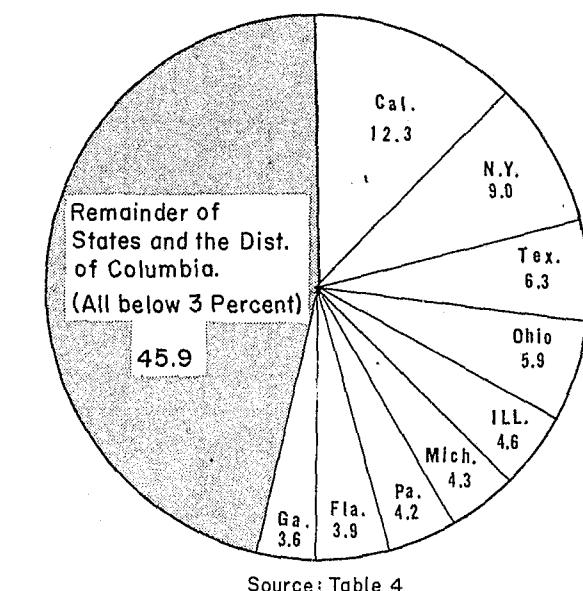

The new tables included in the 1962 bulletin consist of a summary table on movement of sentenced prisoners, by type of institution and sex; five pages of five-year summary tables covering various data concerning State institutions; and a comparison table for the State institutions.

² On a fiscal year basis, however, Federal prison population has declined during both 1962 and 1963.

³ For example, the sharp increases in violators returned in 1960 and in 1961 followed a big jump in the number of conditional releases in 1959.

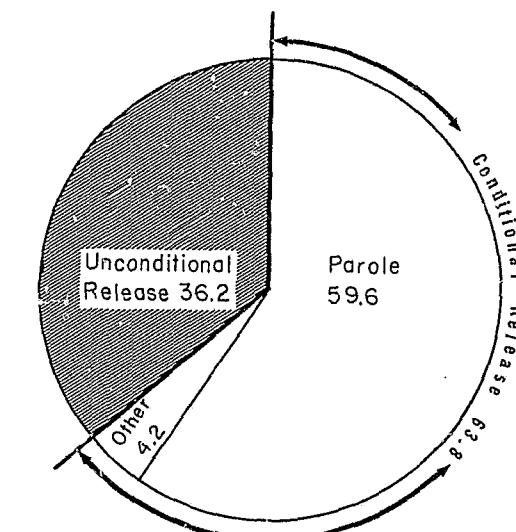

⁴ Excludes departures by court order, death, escape, and authorized temporary absences.

(a) Excludes Alaska.

(b) Figures are slightly lower than those appearing in National Prisoner Statistics

Bulletin Number 30. See Table 7 for affected States.

(c) Figures shown do not include some violators who were returned with new or additional sentences and were included as "Court commitments".

(d) Includes escapees returned, and returns from court orders and authorized temporary absences.

(e) Includes escapes, court orders, and authorized temporary absences.

TABLE 2. - SENTENCED PRISONERS RECEIVED FROM COURT AND PRESENT AT END OF YEAR, BY TYPE OF INSTITUTION, FOR THE UNITED STATES: FIVE-YEAR INTERVALS 1940-1950, AND YEARLY 1960-1962

(The figures used in this table may differ from figures in previously published tables due to the incorporation of data received subsequent to their publication. Beginning in 1960, State institutions in Hawaii are included. Those in Alaska are excluded throughout. For all years, a few prisoners committed from the Federal Courts in Alaska and Hawaii are included. Percent changes are from column to column.)

| Rate per 100,000 of civilian population | 41.0 | -6.6 | 43.9 | 5.3 | 41.7 | 8.3 | 38.5 | 4.9 | 36.7 | 25.7 | 29.2 | -33.6 | 44.0 |

(a) The civilian population figures for December 31 are in thousands. For 1955, 1960, 1961, and 1962, the civilian population figures are based upon extrapolations of the estimated figures published by the Bureau of the Census in Series P-25, Current Population Reports Numbers 250, 259, and 268. For 1940, 1945, and 1950, the civilian population figures are based on the estimated figures published by the Bureau of the Census in Series P-25, Current Population Reports Numbers 71 (1940 and 1945) and 249 (1950).

(b) Figures used in this table for rate per 100,000 of civilian population will differ from figures in previously published tables because figures in previous published tables were based upon civilian population figure as of July 1 of each year, while figures used in this table are based upon civilian population figure as of December 31 of each year.

TABLE 3. - SUMMARY OF MOVEMENT OF SENTENCED PRISONERS, BY TYPE OF INSTITUTION AND SEX, FOR THE UNITED STATES: 1955-1962

(Excludes statistics on transfers, escapes and escapees returned, court orders, executions and other deaths, and authorized temporary absences. The figures used in this table may differ from figures in previously published tables due to the incorporation of data received subsequent to their publication. Beginning in 1960, State institutions in Hawaii are included. Those in Alaska are excluded throughout. For all years, a few prisoners committed from the Federal Courts in Alaska and Hawaii are included. Percent changes are from year-to-year.)

(a) Figures shown do not include some violators who were returned with new or additional sentences and were included as "Court commitments".

b) Figures shown do not include some visitors who were returned with new or additional sentences.
Includes escapees returned, and returns from court orders and authorized temporary absences
"trust releases," and those held under the Civilian Conservation Corps.

(c) "First releases" are prisoners being released for the first time on their current sentence. "Re-releases" are prisoners being released who have been released previously on their current sentence but were returned to prison as violators of parole or another form of conditional release. "Conditional releases" are prisoners being released into the community to continue their sentence under supervision; if they violate the conditions of their release, then they may be returned to prison to continue their sentence in confinement. "Unconditional releases" are prisoners being released without continued supervision in the community; they cannot be returned to prison on the new sentence.

(d) released without continued supervision in the community; they cannot be returned to prison on the same sentence.
(e) Includes 47 executions. Detailed data on executions are presented in National Prisoner Statistics Bulletin Number 32, of April 1963.
Includes escapes, court orders, and authorized temporary absences.

(e) Includes escapes, court orders, and authorized temporary absences.

TABLE 5. - MOVEMENT OF SENTENCED FEMALE PRISONERS IN STATE INSTITUTIONS, BY REGION AND STATE: CALENDAR YEAR 1962

(Statistics on transfers which bring this table into balance are excluded.)

| Region and State | Prisoner population | | Admissions during the year | | | | Departures during the year | | | | | | | | Deaths (g) | Other departure (h) | | |

Seven female prisoners from South Dakota and nine from Wyoming were boarded in Nebraska; two from New Hampshire were boarded in Vermont.

Eleven female prisoners from South Dakota and five from Wyoming were boarded in Nebraska; two from New Hampshire were boarded in Vermont, two from New Hampshire were boarded in Vermont,

Figures shown do not include some violators who were returned with new or additional sentences and were included as "Court commitments".

"First releases" are prisoners being released for the first time on their current sentence. "Re-releases" are prisoners being released again.

First releases are prisoners being released for the first time on their current sentence. "Re-releases" are prisoners being released who have been released previously on their current sentence but were returned to prison as violators of parole or another form of community supervision.

Conditionally released. "Conditional releases" are prisoners being released into the community to continue their sentence under supervision if they violate parole.

if they violate the conditions of their release, then they may be returned to prison to continue their sentence in confinement. "Unconditional releases" are not considered to be violations.

"additional releases" are prisoners being released without continued supervision in the community; they cannot be returned to prison on the same sentence.

Percentages of less than 100 percent not shown where total of all releases is less than 25.

Percentages of less than 100 percent not shown where total of all releases is less than 25.
Includes one execution (in California).

Includes one execution (in California). Includes escapes, court orders, and authorized temporary absences.

TABLE 6. - CONDITIONAL RELEASES FROM STATE INSTITUTIONS, BY REGION AND STATE: CALENDAR YEAR 1962

(This table describes the class of prisoners released "conditionally" - i.e., to continue their sentence under supervision in the community. Emphasis is placed on the conditional release as a "first-release" or as a "re-release", and on the principal methods of conditional release. Statistics on unconditional releases which bring this table into balance are excluded. Data are provisional.)

| Region and State | All re- leases | All first re- leases | All re- leases | All conditional releases | | | | | | Principal methods of conditional release | | | | | | | | | |
|---------------------|----------------------|-------------------------------|----------------------|---------------------------------------|--|--|---|---------------------------------------|---|--|---|-------|--|----------------------------|---|-------|------------------------|-----------------|-----|
| | | | | First releases | | | Re-releases | | | Paroles | | | | Other conditional releases | | | | | |
| | | | | Total conditional re- leases | Per- cent of all re- leases | Total conditional first re- leases | Per- cent of total conditional re- leases | Total conditional re- leases | Per- cent of all re- leases (a) | Total | Per- cent of total conditional re- leases | Total | Per- cent of total conditional first re- leases | Total | Per- cent of total conditional first re- leases (b) | Total | First re- leases | Re- releases | |
