POLICE CAR IMPROVEMENT
PROGRAM CONFERENCE

JANUARY 1975

Conference for Planning
an Evolutionary Police Car Improvement Program

MONDAY, JANUARY 13, 1975

2:00   INTRODUCTION

E. H. KRAUSE, SR VICE PRESIDENT, DEVELOPMENT
THE AEROSPACE CORPORATION

2:05   PRIORITIES FOR IMPROVING POLICE CAR SYSTEMS

R.W. VELDE, ADMINISTRATOR
LAW ENFORCEMENT ASSISTANCE ADMINISTRATION

2:15   LEAA SPONSORED EQUIPMENT DEVELOPMENTS

W.G. NANCE, ASSOC. GROUP
PLANNING AND EVALUATION GROUP
LAW ENFORCEMENT AND TELECOMMUNICATIONS DIVISION
THE AEROSPACE CORPORATION

2:35   AN EVOLUTIONARY POLICE CAR IMPROVEMENT PROGRAM

J.B. WOODFORD, ASSOCIATE GENERAL MANAGER
LAW ENFORCEMENT AND TELECOMMUNICATIONS DIVISION
THE AEROSPACE CORPORATION

4:15   RATIONALE OF THE PROGRAM

J.C. DALY, GROUP DIRECTOR
PLANNING AND EVALUATION GROUP
LAW ENFORCEMENT AND TELECOMMUNICATIONS DIVISION
THE AEROSPACE CORPORATION

5:00   DISCUSSION BY ATTENDEES OF HOW THE PROGRAM MEETS POLICE REQUIREMENTS

Summary of Briefing Presented to the Conference on an Improved Police Car Development Program

JANUARY 13 1975

Summary of LEAA Sponsored
Equipment System Improvements

3

Mr. Scott Hovey
Alameda 911 Project
Alameda County Regional
    Criminal Justice's Planning Board
100 Webster Street, Suite 104
Oakland, California 94607

Deputy Chief Vernon L. Hoy
Executive Director
Police Chief Executive Project
Kajima Building, Suite 809
250 East First Street
Los Angeles, California 90012

Chief Rocky Pomerance
President, International Association
    of Chiefs of Police
Chief, Miami Police Department
Miami, Florida

Chief Philip G. Tannian
Commissioner, Police Department
1300 Beaubien
Detroit, Michigan 48226

Sgnt. Claude Schlesinger
New Orleans Police Department
City Hall
New Orleans, Louisiana

Mr. Gino M. D'Angelo
Director of State Police Fiscal
    Management
New York State Police
State Campus
Albany, New York 12226

Mr. O. J. Hawkins
Executive Director
SEARCH Group, Inc.
1620 35th Avenue, Suite 200
Sacramento, California 95822

Chief Edward M. Davis
Chief of Police
City of Los Angeles
Los Angeles, California

Chief Glen King
International Association of Chiefs
    of Police
11 First Field Road
Gaithersburg, Maryland 20760

W. F. Kirtley and
R. Owens
Los Angeles County Sheriff's Office
Los Angeles, California

Col. C. Wayne Keith
Chief, Colorado State Patrol
4201 East Arkansas
Denver, Colorado 80222

Chief Theodore Von Minden
Patrol Division
Hall of Justice
211 West Temple
Los Angeles, California 20012

Capt. George P. Day
Director, Transportation Division
Metropolitan Police Department
300 Indiana Avenue, N.W.
Room 5080
Washington, D.C. 20001

Col. John R. Plants
Group Manager
Automobile Club of Detroit
Auto Club Drive
Dearborn, Michigan 48126

Mr. R. W. Velde, Administrator
Law Enforcement Assistance
    Administration
633 Indiana Avenue N.W.
Washington, D.C. 20530

Mr. J. T. Kochanski, Director
Advanced Technology Division
National Institute of Law
    Enforcement and Criminal Justice
LEAA
633 Indiana Avenue N.W.
Washington, D.C. 20530

Mr. Harry M. Bratt
Acting Director, Systems
    Development Division
National Criminal Justice Informa-
    tion Statistics Service
LEAA
Columbian Building
Washington, D.C.

Dr. E. H. Krause
Sr Vice President, Development
The Aserospace Corporation
P. O. Box 92957
Los Angeles, California 90009

Mr. John O. Eylar, Jr.
General Manager, Law Enforcement
    and Telecommunications Division
The Aerospace Corporation
Suite 4040, 955 L'Enfant Plaza, S.W.
Washington, D.C. 20024

Dr. J. B. Woodford,
Associate General Manager
Law Enforcement and Telecommunications
    Division
The Aerospace Corporation
Suite 4040, 955 L'Enfant Plaza, S.W.
Washington, D.C. 20024

Mr. J. C. Daly, Director
Planning and Evaluation Group
Law Enforcement and Telecommunications
    Division
The Aerospace Corporation
Suite 4040, 955 L'Enfant Plaza, S.W.

Mr. William G. Nance, Assoc. Director
Planning and Evaluation Group
Law Enforcement and Telecommunications
    Division
The Aerospace Corporation
P. O. Box 92957
Los Angeles, California 90009

Mr. W. D. Pittman, Director
Technology Development Group
Law Enforcement and Telecommunications
    Division
The Aerospace Corporation
P. O. Box 92957
Los Angeles, California 90009

Mr. E. A. Emerson
Communications and Control Systems
Law Enforcement and Telecommunications
    Division
The Aerospace Corporation
Suite 4040, 955 L'Enfant Plaza, S.W.
Washington, D.C. 20024

Mr. H. R. Falck
Planning and Evaluation
Law Enforcement and Telecommunications
    Division
Suite 4040, 955 L'Enfant Plaza, S.W.
Washington, D.C. 20024

Mr. W. R. Preysnar
Planning and Evaluation
Law Enforcement and Telecommunications
    Division
Suite 4040, 955 L'Enfant Plaza, S.W.
Washington, D.C. 20024

6

NATIONAL INSTITUTE OF LAW ENFORCEMENT AND CRIMINAL JUSTICE
Statuatory Objectives

1968   ". . . . TO ENCOURAGE RESEARCH AND DEVELOPMENT TO IMPROVE AND STRENGTHEN LAW ENFORCEMENT"

1973   "TO ENCOURAGE RESEARCH AND DEVELOPMENT TO IMPROVE AND STRENGTHEN LAW ENFORCEMENT AND CRIMINAL JUSTICE;

TO DISSEMINATE THE RESULTS OF SUCH EFFORTS TO STATE AND LOCAL GOVERNMENTS;

TO DEVELOP AND SUPPORT PROGRAMS FOR THE TRAINING OF LAW ENFORCEMENT AND CRIMINAL JUSTICE PERSONNEL."

SOURCE: PL 90 - 351; PL 93 - 83

Law Enforcement Assistance Administration
National Institute of Law Enforcement and Criminal Justice

EQUIPMENT
SYSTEM
IMPROVEMENT
PROGRAM

ℰ

NATIONAL INSTITUTE OF LAW ENFORCEMENT AND CRIMINAL JUSTICE
Advanced Technology Division
TOTAL TECHNOLOGY AND EQUIPMENT RELATED EXPENDITURES

NATIONAL INSTITUTE OF LAW ENFORCEMENT AND CRIMINAL JUSTICE
Advanced Technology Division

- ANALYZE CRIMINAL JUSTICE PROBLEMS AND DETERMINE OPERATIONAL REQUIREMENTS

- DEVELOP AND TEST NEW HARDWARE SYSTEMS

- DISSEMINATE EQUIPMENT STANDARDS AND GUIDELINES

/O

NATIONAL INSTITUTE OF LAW ENFORCEMENT AND CRIMINAL JUSTICE
Analysis Group

MITRE CORPORATION SELECTED TO

- DEFINE OPERATIONAL REQUIREMENTS

- IDENTIFY PROBLEM AREAS AND RELATIVE
  PRIORITIES

- PUBLISH PROBLEM IDENTIFICATION
  REPORTS

FOURTEEN MITRE ANALYSTS SPENT UP TO TWO

YEARS WITH REPRESENTATIVE POLICE, COURTS,

AND CORRECTION AGENCIES

Initial Organization of ESIP

```

ANALYSIS	DEVELOPMENT	GUIDELINES AND STANDARDS
MITRE, D.C.	AEROSPACE	NATIONAL BUREAU OF STANDARDS
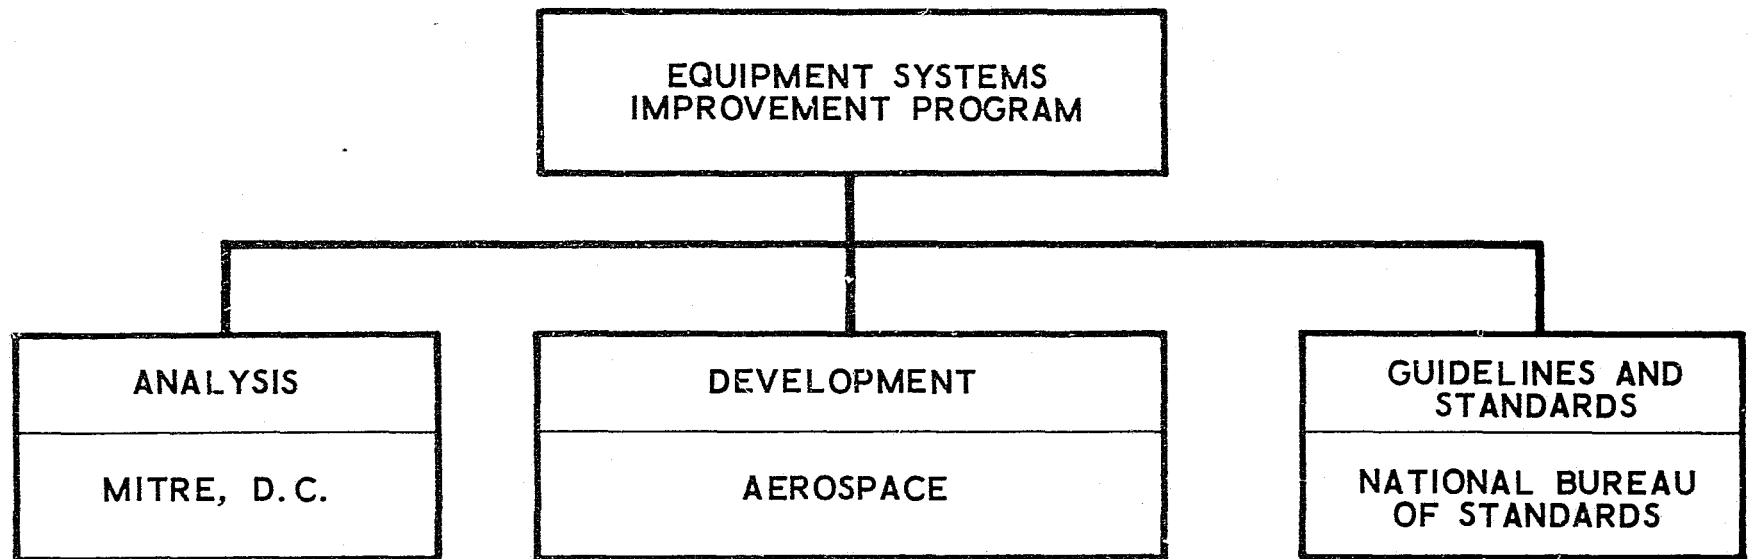

- PROBLEM DEFINITION
- OPERATIONAL REQUIREMENTS

- PROBLEM SOLUTION
- DEVELOPMENT SUBCONTRACTS

- STANDARDS
- GUIDELINES

NATIONAL INSTITUTE OF LAW ENFORCEMENT AND CRIMINAL JUSTICE
Law Enforcement Standards Laboratory

NATIONAL BUREAU OF STANDARDS ASSIGNED
RESPONSIBILITY TO

- TEST OFF-THE-SHELF HARDWARE AND EQUIPMENT

- DEVELOP GUIDELINES DESCRIBING PERFORMANCE; INFORMATION ON USE AND MAINTENANCE

- PUBLISH STANDARDS FOR SELECTION AND PROCUREMENT OF EQUIPMENT

BY FY 1974 55 STANDARDS AND 12 GUIDELINES
IN PREPARATION

- SECURITY SYSTEMS

- COMMUNICATION SYSTEMS

- INVESTIGATIVE AIDS

- PROTECTIVE EQUIPMENT AND WEAPONS

- COURTROOM EQUIPMENT

NATIONAL INSTITUTE OF LAW ENFORCEMENT AND CRIMINAL JUSTICE
Development Group

GENERAL OBJECTIVE OF LAW ENFORCEMENT DEVELOPMENT GROUP

" . . . To Develop Improved or New Equipment Systems to Solve Law Enforcement and Criminal Justice Problems . . . "

PROGRAM RESPONSIBILITIES

" . . . Propose Solutions to the Problems . . . Analyze Programs to Determine Relative Priority . . . Group Responsible for the Development of Equipment -- From Defining System Requirements to Completing Field Tests . . . "

- DEVELOP DETAILED SYSTEM REQUIREMENTS AND SPECIFICATIONS

- GENERATE CONCEPTUAL DESIGNS AND PERFORM TRADEOFF ANALYSIS

- RECOMMEND SYSTEM CONCEPTS

- PERFORM OR SUBCONTRACT SELECTED FEASIBILITY DEMONSTRATIONS

- PERFORM OR SUBCONTRACT SYSTEM DEVELOPMENT, FABRICATION AND LABORATORY TESTING

Development Projects

FY 73 PROJECTS	FY 74 PROJECTS	FY 75 PROJECTS
• LIGHTWEIGHT BODY ARMOR	• LIGHTWEIGHT BODY ARMOR	• LIGHTWEIGHT BODY ARMOR
• CITIZEN ALARM SYSTEM	• CITIZEN ALARM SYSTEM	• CITIZEN ALARM SYSTEM
• BURGLARY ALARM	• BURGLARY ALARM	• BURGLARY ALARM
• SPEAKER IDENTIFICATION	• SPEAKER IDENTIFICATION	• SPEAKER IDENTIFICATION
• ANTIHIJACKING SYSTEM	• ANTIHIJACKING SYSTEM	• ANTIHIJACKING SYSTEM
• AERIAL VEHICLE	• BLOOD ANALYSIS	• BLOOD ANALYSIS
• BODY MOUNTED ANTENNA	• EXPLOSIVES DETECTION	• EXPLOSIVES DETECTION
• REMOTE VEHICLE DISABLING	• GUNSHOT RESIDUE	• GUNSHOT RESIDUE
	• POLICE VEHICLES	• POLICE CAR SYSTEMS
	• FINGERPRINT	• FIELD EVALUATIONS
	• 911	• BODY ARMOR
		• CITIZEN ALARM

Typical Candidate Development Projects

COST-EFFECTIVE SECURITY ALARM SYSTEM
IMPROVED HARDENED DOORS AND WINDOWS
RESIDENCE BUSINESS LOCK SYSTEMS
ARCHITECTURAL DESIGN CONCEPTS
POLICE EMERGENCY CALL WARNING SYSTEM
STOLEN GOODS DETECTION SYSTEM
INTEGRATED POLICE CAR EQUIPMENT SYSTEMS
HARDENED CASH REGISTERS
MODULARIZED COMMAND AND CONTROL SYSTEM
COMMAND AND CONTROL EQUIPMENT SIMULATION
CITIZEN'S ALARM SYSTEM
GUARD AND INMATE SECURITY SYSTEM
LIGHTWEIGHT BODY ARMOR
BLOOD AND BLOODSTAIN ANALYSIS
INTEGRATED POLICE CAR DESIGN
POLICE AND WITNESS PAGING SYSTEM
COURT VIDEO RECORDING SYSTEM
CRIME LAB-COURT COMMUNICATIONS SYSTEMS
IMPROVED INSTITUTIONAL LOCKING SYSTEMS
AUTOMATED INMATE ACCOUNTABILITY SYSTEM
PROPERTY TAGGING AND IDENTIFICATION SYSTEMS
911 SYSTEM
POLICE VEHICLE RF SIREN
ADVANCED FINGERPRINT HOLOGRAPHY
ADVANCED DIGITAL FINGERPRINT ENCODING
CONVERSION OF NON-SECURE BUILDINGS
COMMUNICATIONS HELMET
AUTOMATIC POLICE CAR LOCATION SYSTEM
SPRAY FILM EVIDENCE COLLECTION
ACTIVE METAL-WEAPON DETECTION SYSTEM
X-RAY WEAPON DETECTION
IMPROVED CRIME SCENE RECORDING EQUIPMENT
INDIVIDUALIZATION OF HAIR
PERIMETER SECURITY
SATELLITE APPLICATIONS FOR LAW ENFORCEMENT
900 MHz TECHNOLOGY
IMPROVED AIRBORNE POLICING
SPEAKER IDENTIFICATION
EXPLOSIVES VAPOR DETECTION

MOBILE DETENTION FACILITY
VEHICLE EMERGENCY CALL SYSTEM
DETECTION OF GUNSHOT RESIDUE
INDIVIDUAL PATROLMAN LOCATION SYSTEM
BULLET TRACING AND IDENTIFICATION
LIGHTWEIGHT POWER SOURCES
DATA SECURITY TECHNIQUES
FREQUENCY MANAGEMENT STUDY
TRUCK ANTIHIJACKING SYSTEM
ROBBER TAGGING
AUTO THEFT PREVENTION
IMPROVED FINGERPRINT LIFTING TECHNIQUES
EXPLOSIVES TAGGING AND DETECTION
POSITIVE IDENTIFICATION CREDIT CARDS
EVENT DATING TECHNIQUES
AUTOPSY TECHNOLOGY
THERMOLUMINESCENT TECHNIQUES
POLICE WEAPON SAFETY SYSTEM
TRAFFIC LIGHT REGULATION SYSTEM
DIGITAL COMMUNICATIONS SYSTEM
MOBILE VIDEO COMMUNICATION SYSTEM
STEERABLE 450 MHz ANTENNA
LOW-COST SECURE COMMUNICATIONS
LESS-LETHAL WEAPONS
LOW-COST TRANSMITTER IDENTIFIER
ION MICROPROBE ANALYSIS
REMOTE BOMB DISPOSAL TECHNIQUES
MATERIAL COVERT TAGGING TECHNIQUES
ANALYSIS OF NON BLOOD BODY FLUIDS
RAPE COCOON
UNDERCOVER AGENT COMMUNICATIONS
SNIPER DISABLING AND APPREHENSION
HIGH INTENSITY PORTABLE LIGHTS
INTEGRATED LETHAL LESS-LETHAL WEAPONS
NIGHT VISION AIDS
NEW MASS SPECTROMETRY METHODS
COMPUTER AIDED FACIAL FEATURE IDENTIFICATION
REMOTE WEAPON ARMING SYSTEM
CONCEALED RECORDING SYSTEM

BODY ARMOR FIELD EVALUATION

OBJECTIVE

Evaluate the performance and user acceptability of limited protection, continuous wear protective armor under operational conditions

GENERAL GARMENT TYPES

UNDERWEAR   INTEGRATED UNIFORMS   PLAIN CLOTHES

EVALUATION TEST PLAN

- Fifteen urban police departments

- Approximately 3000 garments to be evaluated for one year

- FY 75 Implementation

PROTECTIVE ARMOR DEVELOPMENT

OBJECTIVE
Develop light weight, inconspicuous protective garments for law enforcement and public officials that protect against common handgun threats

KEY PARAMETERS

BALLISTIC LOADING
- MASS
- SHAPE
- VELOCITY

NON-PENETRATING DYNAMICS
- MATERIAL
- WEIGHT
- WEAVE

BODY LOADING
- DECELERATION
- DEFORMATION

BLUNT TRAUMA
- MEDICAL ANALYSIS
TEST DATA—HIGH SPEED PHOTOS

.38 BULLET   SOFT ARMOR   GELATIN BACKING

DEFORMATION CURVES

DEFORMATION FACTOR

500
400   .38 cal
300
200   ACCEPTABLE BLUNT TRAUMA LEVEL
100
0
2 6 10 14 18
NUMBER OF LAYERS
ACCOMPLISHMENTS
Penetration protection and acceptable blunt trauma demonstrated for the .38 caliber handgun threat class at low armor weights (less than two pounds)

CITIZEN ALARM FIELD EVALUATION

OBJECTIVE

Evaluate system performance, effectiveness, and user/response agency acceptance in realistic scenarios

TEST SCENARIOS
| RESIDENTIAL | INSTITUTIONS | COMMERCIAL | PUBLIC AREAS |
EVALUATION TEST PLAN

- Multiple scenario types and locations

- Approximately 2,000 - 10,000 user units to be evaluated

- FY 76 implementation

CITIZEN ALARM DEVELOPMENT

OBJFCTIVE

Develop a personal means by which citizens may call for emergency assistance at the onset of a crime or other emergency occurring in either inbuilding or outside areas

SYSTEM CONCEPT

ACTUATOR   RF   PRIMARY RECEIVER RELAY   POWERLINE   SECONDARY RECEIVER RELAY   TELEPHONE   CENTRAL STATION
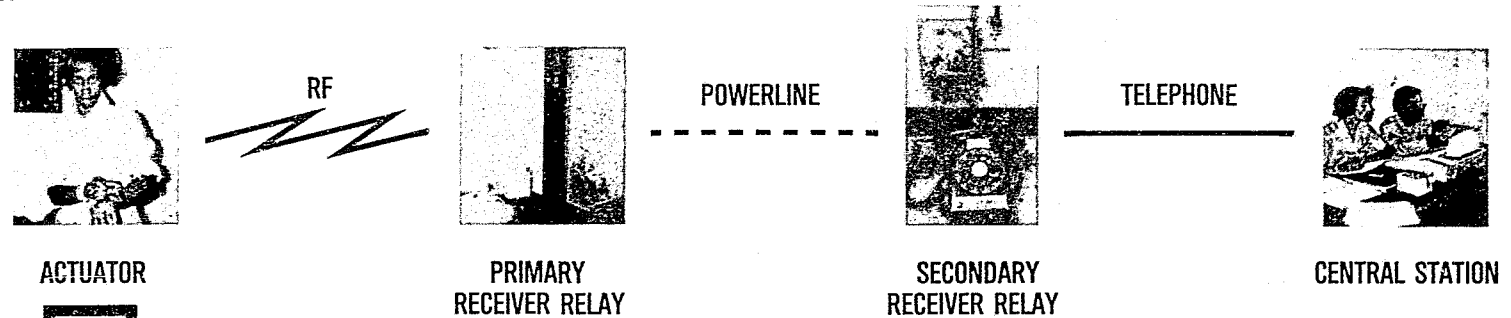

KEY FEATURES

DESIGN FEATURES
- INCONSPICUOUS ACTUATION
- USER IDENTIFICATION
- AESTHETICALLY ACCEPTABLE
- LOW COST
- HIGH RELIABILITY

PROTOTYPE HARDWARE FABRICATED AND TESTED — FY 76 FIELD EVALUATION

SPEAKER IDENTIFICATION PROGRAM

OBJECTIVE

Develop computer assisted speaker identification system to accurately identify specific individuals from recorded speech

SYSTEM CONCEPT

CRIMINAL RECORDING IS COMPARED WITH SUSPECT EXEMPLARS USING QUANTITATIVE STATISTICAL TECHNIQUES
COMPUTER CALCULATES PROBABILITY THAT SUSPECT'S VOICE MATCHES CRIMINAL RECORDING

ADVANTAGES:

- Repeatable
- Quantitative
- Objective
- Faster and Cheaper

SYSTEM PRESENTLY UNDERGOING FEASIBILITY TESTS

COST EFFECTIVE BURGLARY ALARM SYSTEM

OBJECTIVE

Develop a low cost, low false alarm reliable, burglary alarm system for application to residential and small business needs

SYSTEM PARAMETERS
DETERRENCE

- DOORS/WINDOWS/LOCKS
- LIGHTING
- SECURITY MARKINGS

DETECTION

- POINT OPENING
- LINE/AREA
- VOLUMETRIC

INTER. TRANS./CONTROL

- HARDWIRE/POWER LINES
- CONTROL BOX LOGIC
- LOCAL ALARM

EXTER. TRANS./RESPONSE

- HARDWIRE/TV/RF/ TELEPHONE/POWER LINES
- CENTRAL ALARM AGENCY/POLICE

- External transmission tradeoff study

DEVELOPMENT EFFORTS

- Burglary alarm system development contract integrates several subcontract efforts

- Utilization of building power lines to reduce installation costs

- New sensor types to improve reliability and reduce false alarms

BLOOD AND BLOODSTAIN ANALYSIS

OBJECTIVE

Develop improved techniques to identify an individual by analysis of key genetic markers in blood and bloodstains

POTENTIAL IMPROVEMENTS

CURRENT U.S. TECHNIQUES:
Identification Probability 15:1

SURVEY AND ASSESSMENT INDICATES:
Potential increase to 1,000,000:1 using additional tests
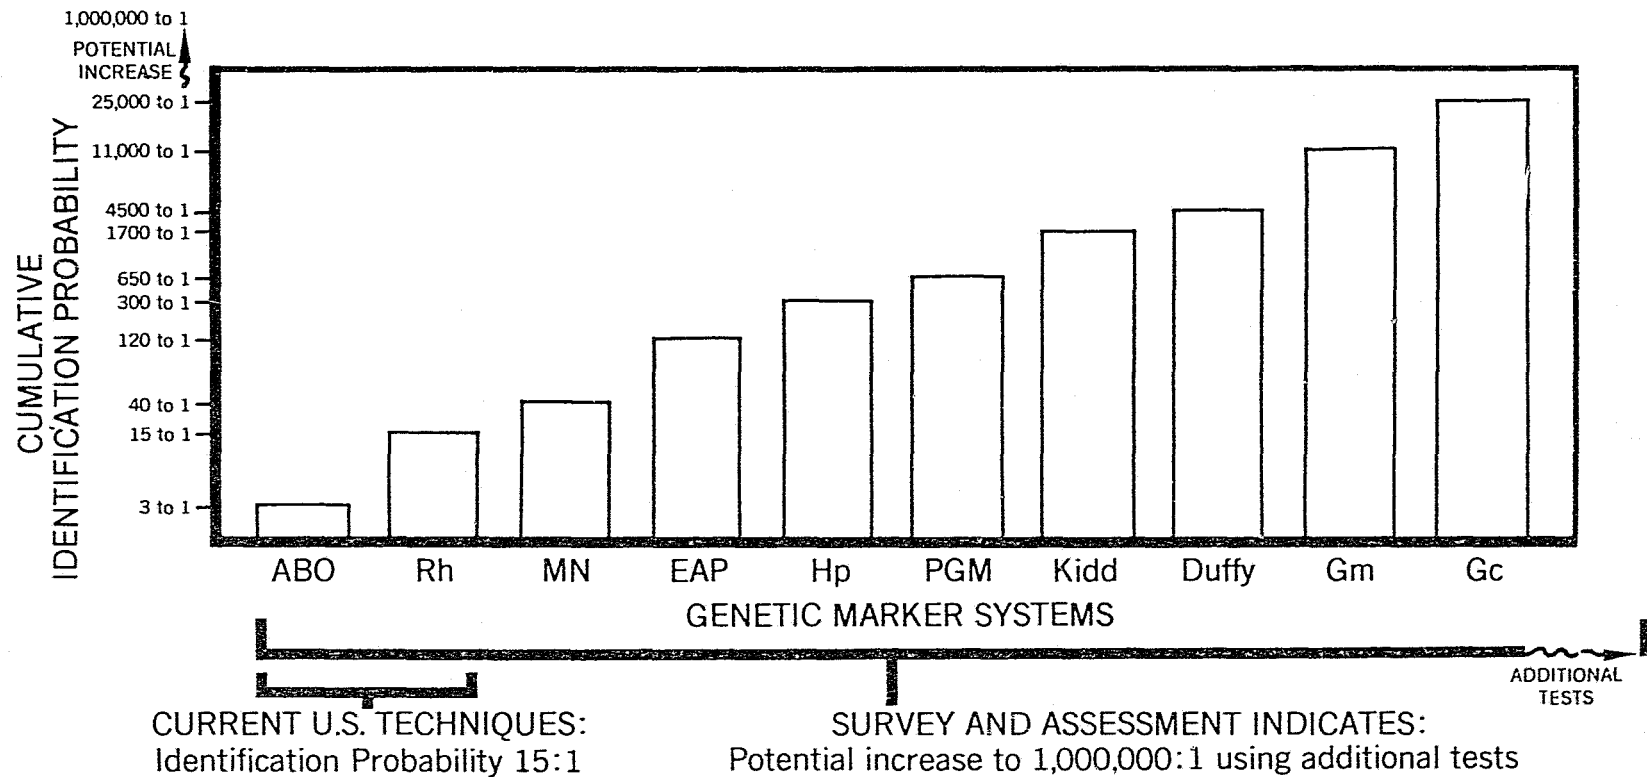

SEMI-AUTOMATIC ANALYSIS METHODS FOR HIGH ID PROBABILITY UNDER DEVELOPMENT

CARGO SECURITY SYSTEM

OBJECTIVE
Develop cost effective means to improve cargo security and reduce cargo losses in the trucking industry

SYSTEM CONCEPT
Monitor location and status of moving and parked vehicles

- DRIVER COMPARTMENT DOORS
- DRIVER COMPARTMENT SEATS

- CARGO COMPARTMENT ACCESS
- VEHICLE LOCATION

- CARGO COMPARTMENT ACCESS
- VEHICLE LOCATION
- WHEEL MOVEMENT

FLEET DISPATCHER

RESPONSE AGENCY
HARDWARE SYSTEMS CURRENTLY UNDERGOING FEASIBILITY TESTING

DETECTION OF GUNSHOT RESIDUE

OBJECTIVE
  Develop improved methods to reliably determine whether a suspect fired gun

ONE APPROACH
  Subparticle analysis

WHOLE RESIDUE PARTICLE (100x)   SUBPARTICLE WITHIN RESIDUE PARTICLE (10,000x)
(RESIDUE OF BROWNING .380 AUTOMATIC)

—.7 mm—   —.004 mm—

ELEMENTAL ANALYSIS

CONCENTRATION

LEAD	ANTIMONY	BARIUM
.17	.07	.01

CONCENTRATION

LEAD	ANTIMONY	BARIUM
1.0	.6	1.2
WHILE THE WHOLE PARTICLE   SUBPARTICLE SHAPE AND COMPOSITION
PROVIDES INCONCLUSIVE DATA   PROVIDES CLEAR IDENTIFICATION

THESE AND OTHER METHODS ARE IN RESEARCH AND DEVELOPMENT

CONTROL OF THE ILLEGAL USE OF EXPLOSIVES

OBJECTIVE:

To develop technology and equipment systems for the detection, identification and disposal of tagged and untagged explosives

PROJECTS:

VAPOR CHARACTERIZATION STUDY

LABORATORY GAS CHROMATOGRAPH
MASS SPECTROMETER
SULFUR HEXAFLUORIDE (SF$_6$) TAGGING FOR DETECTION

WIRES

SF$_6$ VAPORS   DETECTOR

BLASTING CAP
UNTAGGED DETECTION — LASER OPTOACOUSTIC CONCEPT

LIGHT CHOPPER

FILL VALVE

SAMPLE

IR DETECTOR

IR GAS LASER

CHAMBER

WAVELENGTH SELECTOR

MICROPHONE

COMPARISON NETWORK

DIGITAL VOLTMETER
- Selected laser wavelengths excite corresponding infrared absorbtion wavelengths of explosive vapors
- Modulated laser beam creates pressure fluctuations detected by sensitive microphone

TAGGING FOR IDENTIFICATION

FILLER   TAGGANT (POLYETHYLENE MICROSPHERES)

NITROGLYCERINE

DYNAMITE

TALLEY BOWL
MIXING PROCESS

PRODUCT

CLANDESTINE BOMBING

ANALYSIS OF DEBRIS
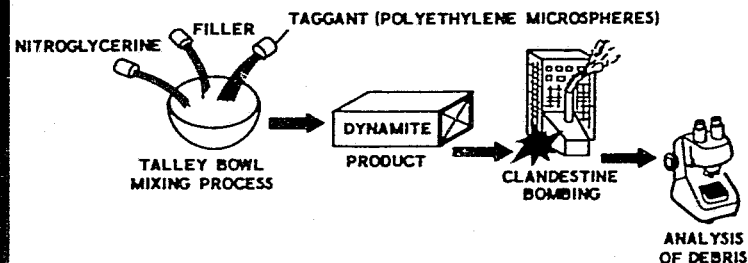

Police Patrol Car System Improvements
LONG RANGE OBJECTIVES

IMPROVE COST EFFECTIVNESS OF POLICE CAR OPERATIONS

- o SAFETY AND RELIABILITY
    - o ANTI-LOCK BRAKES
    - o IMPROVE WARNING
    - o VEHICLE CONDITION MONITORING

- o VEHICLE ECONOMY

- o OFFICER EFFECTIVENESS
    - o ACCESS TO DATA BASE
    - o AUTOMATED COMMAND AND CONTROL
    - o COMPUTER-AIDED REPORTING
    - o EASE OF INTERFACING WITH CAR SYSTEMS

- o SECURITY OF CAR AND DATA
    - o PROTECTION OF DATA FROM UNAUTHORIZED USE
    - o PROTECTION OF CAR WHEN OFFICER IS AWAY

- o CHANNEL CONSERVATION
    - o WIDE USE OF DATA TRANSMISSION
    - o FORMATTING - CODING
    - o DATA COMPRESSION

Proposed Police Car Improvement Program

Police Patrol Car System Improvements Program

PHASED APPROACH

PHASE I

- MINIMUM TIME TO DEMONSTRATION
- OFF-THE-SHELF HARDWARE
- INCLUDES FULL DATA SYSTEM, IN-CAR DATA BASE EXPERIMENTS
- FIELD TEST TO DETERMINE BENEFITS, DESIRED REDESIGNS
- TRANSITION TO OPERATIONAL USE

PHASE II

- STATE-OF-THE-ART TECHNOLOGY
- REPACKAGING/RE-ENGINEERING FOR POLICE CAR APPLICATION
- INCLUDES SLOW-SCAN TV, IN-CAR DATA BASE
- FIELD TEST
- TRANSITION TO OPERATIONAL USE

PHASE III

- ADVANCED TECHNOLOGY FOLLOW-ON
- FLAT TV DISPLAYS
- VERY LARGE ($\approx 10^9$ word) IN-CAR DATA BASE
- REAL TIME IN AVAILABLE
- MODULARITY BEGUN IN PHASE I KEEPS OBSOLESCENCE TO A MINIMUM

27

Police Patrol Car System Improvements
SHORT RANGE OBJECTIVES

● DEMONSTRATE QUICKLY WHAT PRESENT EQUIPMENT/TECHNOLOGY CAN DO AND WHAT LIMITATIONS ARISE

● PLAN FOLLOW-ON PHASES TO UTILIZE RESULTS OF FIRST DEMONSTRATION, REDESIGNED EQUIPMENT, AND NEW TECHNOLOGY

● UTILIZE FLEXIBLE, MODULAR APPROACH WITH STANDARDIZED INTERFACES TO MINIMIZE OBSOLESCENCE AT EACH STAGE

● GET DESIRABLE DEVICES QUICKLY INTO OPERATIONAL USE AT EACH STAGE

30

Vehicle and Safety

PHASE I

- FUEL ECONOMY INDICATOR

- VEHICLE SENSOR AND DIAGNOSTIC SENSORS

- IMPROVED WARNING SYSTEM -- BEST AVAILABLE

- SEAT DESIGN

- ANTI-SKID BRAKES ON REAR WHEELS

- LIGHTWEIGHT CAR -- OPTIONAL

PHASE II

- MODIFY CAR BODY AND INTERIOR TO MEET SPECIFIC
  POLICE REQUIREMENTS

- IMPROVED COOLING

- DUAL MODE AIR-FUEL MIXTURE RATIO

- ANTI-SKID BRAKING -- 4 WHEELS

- UPDATED PHASE I SENSORS

Vehicle Safety and Economy

Status of Anti-Skid Brakes

- SEVERAL FOREIGN AND DOMESTIC SYSTEMS FOR PASSENGER CARS IN DEVELOPMENT OR PRODUCTION

  TOYOTA   FORD

  HONDA   GENERAL MOTORS

  MERCEDES-BENZ

- FORD, GM APPLICATIONS ON LARGE, LUXURY MODELS ADAPTABLE TO OTHER, SMALLER MODELS FOR REAR WHEEL CONTROL (at present)
  - KELSEY-HAYES (Ford line) DEVELOPING FOUR WHEEL HYDRAULIC ANTI-SKID BRAKE SYSTEM

- ANTI-SKID BRAKES MOST APPLICABLE TO LIGHTER CARS DUE TO HIGHER LIGHT/LADEN LOAD RATIO
  - COST MAJOR DETERRENT

3/

Anti-Skid Brakes

- PROVIDES IMPROVED BRAKING PERFORMANCE

  - STABILITY FROM REAR WHEEL CONTROL

  - STEERABILITY FROM FRONT WHEEL CONTROL

  - REDUCED STOPPING DISTANCE UNDER MOST CONDITIONS WITH EITHER REAR OR FOUR WHEEL CONTROL

- FEDERAL REGULATIONS HAVE STIMULATED DEVELOPMENT

  - STANDARD 121 FOR AIR BRAKE VEHICLES REQUIRES ANTI-SKID BRAKING FOR WET AND DRY SURFACES

  - STANDARD 105 FOR HYDRAULIC BRAKE VEHICLES (passenger cars, light trucks) REQUIRES ANTI-SKID BRAKING ON DRY SURFACE ONLY (effective September 1975)

  - LIGHT TRUCKS EXPECTED TO NEED ANTI-SKID CONTROL DUE TO HIGH LIGHT/LADEN LOAD RATIO

Warning System Selection

PHASE I

- COMPARE EXISTING SYSTEMS TO NBS STANDARDS AND EVALUATE

- USE TOP RANKED COMPONENTS FOR PROGRAM

- DESIGN INTEGRALLY PACKAGED SUBSYSTEM

PHASE II AND III

- ASSESS ALTERNATIVE CONCEPTS AND DEVELOP IMPROVED SYSTEM
    - PROVIDE DIRECTIONALITY AT INTERSECTIONS
    - TRAFFIC LIGHT REGULATION
    - RADIO FREQUENCY SIREN

Emergency Vehicle Warning Systems

- SYSTEM OBJECTIVES

    - ALERT DRIVERS AND   DETECT WARNING AND GIVE
      PEDESTRIANS   ATTENTION TO PROBLEM

    - CLEAR PATH FOR   DRIVERS AND PEDESTRIANS
      EMERGENCY VEHICLES   TAKE APPROPRIATE ACTION

- EFFECTIVENESS OF DETECTION AND ATTENTION PHASES OF WARNING
  SYSTEMS ARE IMPACTED BY:

    - PHYSICAL CONDITIONS   - LIGHT AND NOISE DISTRACTIONS
      ROAD AND TRAFFIC   FLASHING NEON LIGHTS
      TYPE OF DEVICE   CAR RADIOS AND TAPES
      WEATHER   AIR CONDITIONERS
      VEHICLE DESTINATION   CLOSED WINDOWS

- PROBLEMS IN SIGNAL INTERPRETATION AND INITIATION OF APPROPRIATE
  ACTION RELATED TO:

    - MOST WARNING SIGNALS ARE NON-DIRECTIVE

    - INAPPROPRIATE OBSERVER INTERPRETATION

    - NO CLUE TO APPROPRIATE ACTION

Instrumentation Applications on Police Cars

- USE SAFETY, PERFORMANCE/ECONOMY RELATED SENSORS ON VEHICLE
    - CANDIDATE SENSORS

        BRAKE LINING TEMPERATURE AND WEAR

        ENGINE COOLANT TEMPERATURE

        ENGINE OIL TEMPERATURE, LEVEL

        TIRE PRESSURE

        BATTERY VOLTAGE

        DWELL/TIMING

- USE PREVENTIVE MAINTENANCE/DIAGNOSTIC SENSORS ON FIXED
  STATION SYSTEM
    - "AUTOSENSE" SYSTEM ONLY IDENTIFIED SYSTEM AVAILABLE
    - COST ABOUT $8K

35

Instrumentation Systems

- INSTRUMENTATION SYSTEMS CAN PROVIDE A COMPREHENSIVE INDICATION OF THE OPERATIONAL CONDITION OF A VEHICLE
    - PROVIDES SAFETY RELATED WARNINGS
    - WARNS OF IMMINENT COMPONENT WEAROUT/FAILURE
    - MONITORS STATE-OF-TUNE FOR GOOD PERFORMANCE, FUEL ECONOMY, LOW EMISSIONS
    - PROVIDES DIAGNOSTIC CAPABILITY FOR FAULT ISOLATION

- TWO BASIC APPROACHES TO VEHICLE SENSOR USE FOR MONITORING/ DIAGNOSING CONDITION OF VEHICLE
    - ON-BOARD SENSORS - DISPLAYS
    - FIXED STATION SYSTEMS - COMPUTER AND PRINTER

Patrol Vehicle Economy

- ECONOMY CONSIDERATIONS INCLUDE INITIAL COST, OPERATING COST, MAINTENANCE, RESALE VALUE

- ENERGY CRISIS STIMULATED INTEREST IN SMALLER CARS

- STUDY PERFORMED TO ASSESS USE OF SMALLER CARS FOR POLICE
    - COMPACT NOW NEARLY AS LARGE AND HEAVY AS STANDARD 10 YEARS AGO
    - REDUCED VEHICLE WEIGHT IS PRIMARY FACTOR IN IMPROVED FUEL ECONOMY (beyond driver)
    - COMPACT SEDAN FOUND SUITABLE FOR URBAN, SUBURBAN APPLICATIONS

- LOS ANGELES COUNTY SHERRIFF/MOTOR TREND TESTS OF COMPACT CARS SHOW SUITABILITY FOR POLICE PATROL
    - CHEVY NOVA ONLY DOMESTIC COMPACT WITH POLICE PACKAGE

Driver Station Seat Design

- POTENTIAL IMPROVEMENTS IN SEAT DESIGN FOR SAFETY, COMFORT
    - INTEGRAL SEAT BELT AND SEAT
    - ADEQUATE SEAT ADJUSTMENT TRAVEL
    - PROVISIONS FOR OFFICER BELT-GEAR AND INSTALLED EQUIPMENT
    - OPTIMUM POSTURE CONTROL
    - CONTOURING FOR LATERAL STABILITY

- NO IDENTIFIED SOURCE FOR SPECIAL POLICE CAR SEAT PROCUREMENT
    - DEMONSTRATION UNIT COST ESTIMATED AT $5,000
    - LOW VOLUME PRODUCTION ESTIMATED AT $250-500

- INFORMATION OBTAINED FROM MAN-FACTORS, INC
    - HUMAN ENGINEERING R&D FIRM
    - SUPPORTS SAN DIEGO POLICE DEPARTMENT

Data Bases Accessed by LAPD Field Officer

- AUTOMATED WANT/WARRANT SYSTEM (LA county wide)

- STOLEN VEHICLE SYSTEM (California DOJ data base)

- CALIFORNIA DMV INFORMATION SYSTEM

- NCIC

Total Potential Data File Storage

- STOLEN/WANTED AUTO LICENSES 10^9-10^{10} BITS
- ALL AUTO LICENSES 10^{11} BITS
- WANTED/MISSING PERSONS 10^8 BITS
- STOLEN PROPERTY (non-auto) 10^9-10^{10} BITS
- FIREARM REGISTRATION 10^9 BITS
- PERSON IDENTIFICATION 10^{12} TO 10^{15} BITS
    - NAME, ALIAS
    - SOCIAL SECURITY
    - DRIVER'S LICENSE
    - MILITARY RECORD
    - FINGERPRINTS
    - PHYSICAL DESCRIPTION, MARKINGS
    - PHOTOGRAPH(S)
    - VOICE
    - BLOOD, HAIR, ETC

- ANALYZED DATA AND STATISTICS
    - CRIME STATISTICS
    - HIGH RISK AREAS
    - TRAFFIC STATISTICS
    - REPORT COMPILATION
    - EFFECTIVITY EVALUATION
- TRAFFIC CONDITIONS
- WEATHER AND WEATHER FORECAST
- UP-TO-DATE CITY MAP (including construction)

50

Applications of Modest In-Car Data Base

- REVIEW OF INFORMATION ISSUED AT ROLL CALL
  (data media given to officer at roll call)

- PROVIDE OFFICER WITH AUTOMATED QUESTIONNAIRE FOR
  MOST SITUATIONS

- STORE ROUTINE BROADCAST DATA FOR REVIEW AND
  REFERENCE

- ACCEPT AND STORE UNIT ACITIVITY REPORT FOR
  AUTOMATIC PRINTING (data media returned to headquarters)

- LOG ALL MESSAGE TRAFFIC FOR REFERENCE

- PROVIDE TRAINING MATERIAL FOR PERIODS OF LOW ACTIVITY

Examples of Inquiry to Data Bases

1. ENTER: VEHICLE LICENSE NUMBER   ABC 123   (CA assumed)

                                                ABC 123 NJ   (NJ specified)

   OBTAIN RESPONSE FROM RCF, SVS, NCIC, AWWS, OR DMV AS APPLICABLE

   DELAY 5-30 sec

2. ENTER: DRIVER LICENSE NUMBER AND/OR NAME PLUS ID DATA

   OBTAIN RESPONSE FROM AWWS, APIF, AS APPLICABLE

   DELAY 10-30 sec

3. ENTER: BICYCLE ID NUMBER

   OBTAIN RESPONSE FROM DOJ

4. ENTER: VEHICLE IDENTIFICATION NUMBER

   OBTAIN RESPONSE FROM SVS, NCIC, DMV

Los Angeles Police Department Dispatch Center

RADIO TELEPHONE OPERATORS

Proposed Data System Experimental Developments

BASE STATION

- EQUIP ONE RADIO TELEPHONE OPERATOR WITH CAPABILITY FOR
    - MESSAGE ENTRY
    - MESSAGE DISPLAY
    - STATUS DISPLAY
    - RECORDING PRINTER

- PROVIDE DATA PROCESSOR AND SOFTWARE WITH CAPABILITY FOR
    - IN-OUT INTERFACES
    - STORE AND FORWARD OF DOWN LINK AND UPLINK MESSAGES
    - STATUS MONITORING
    - ERROR CONTROL/SECURITY
    - MESSAGE FORMATTING FOR INQUIRY TO L.A. BASES

- DEVELOP COMMUNICATIONS
    - UTILIZE APPROPRIATE AVAILABLE RADIO
    - PROVIDE MODEM

56

A Standardized Interface

1. PIN CONNECTION   No. (to be specified) OR EQUIV. 25 PIN LOCKING
                             CONNECTOR

2. SIGNAL LEVEL   LOGIC   TRUE   10 MA, 4.5 volts } ISOLATED FROM
                           LOGIC   FALSE   1 MA, 0.5 volts } GROUND ON
                                                             } INPUT

3. CHARACTER CODE   8 BIT ASCII PARALLEL
                            (1 parity bit), PARALLEL TO EACH PORT

4. DEVICE ENABLE/STROBE   1 BIT, SEPARATE TO EACH PORT

5. DEVICE READY TO   1 BIT
   TRANSMIT

6. DEVICE READY TO   1 BIT
   RECEIVE

Integration of Car Subsystems

- THE FOLLOWING SPECIAL CONTROLS COMPETE
  FOR SPACE IN THE CAR:

  - RADIO CHANNEL, ON/OFF, MODE
  - SIREN
  - EMERGENCY LIGHTS
  - PUBLIC ADDRESS
  - DATA LINK CONTROLS

- THE COMPUTER CAN INTEGRATE CONTROL, AS
  DESIRED, THROUGH SPECIALIZED BUTTONS ON
  THE DATA TERMINAL OR THROUGH TYPED-IN
  COMMANDS

Advantages of Standardization of Interfaces

- EQUIPMENT FROM DIFFERENT MANUFACTURERS CAN BE INTERCONNECTED

- INDIVIDUAL EQUIPMENTS CAN BE REPLACED WITH IMPROVED VERSIONS

- NEW TYPES OF DEVICES CAN BE ADDED AS DEVELOPED

- INSTALLATIONS CAN BE TAILORED FOR SPECIAL PURPOSE VEHICLES

THE ABOVE SAVES MONEY BECAUSE OF

- INCREASED COMPETITION IN FOLLOW-ON PROCUREMENTS

- INCREASED FLEXIBILITY

- DECREASED OBSOLESCENCE

- RAPID UTILIZATION OF NEW DEVELOPMENTS

- EASIER MAINTENANCE

$\mathcal{3}C$

Communication Security

DATA
MESSAGE
(clear text) } 1,0 → [KEY table] → CHANNEL (code) → [IN / KEY table] → { DECODED MESSAGE (clear text)

KEY

	0	1
0	0	1
1	1	0

KEY

1,0

SYNC
CIRCUIT → KEY
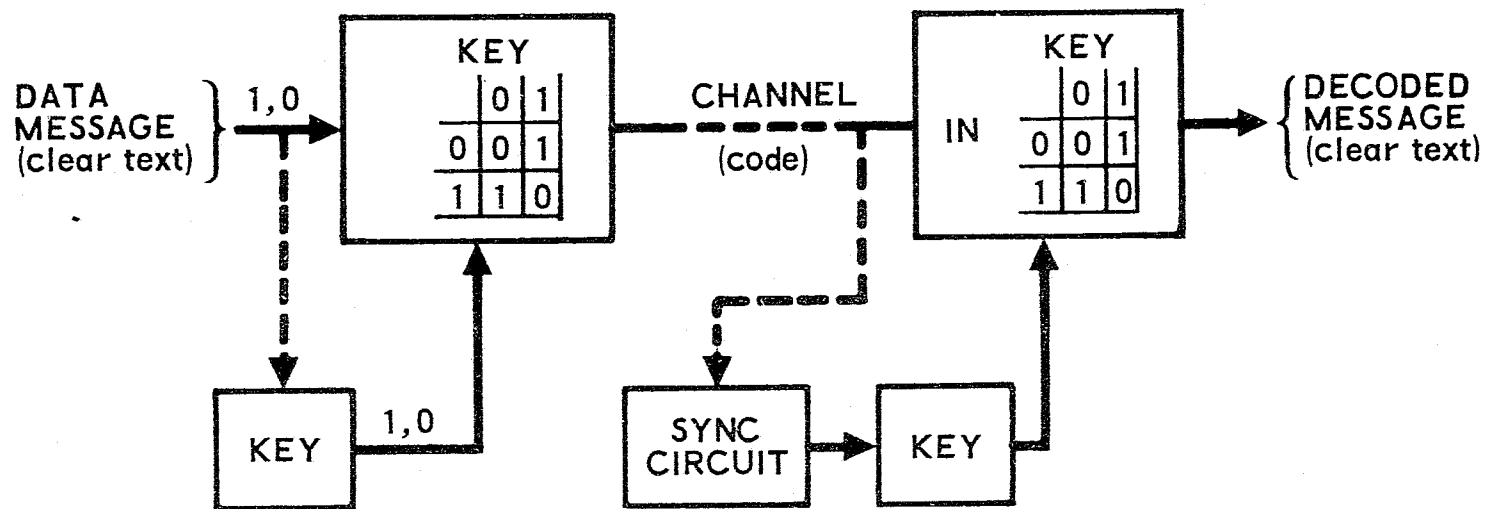

- CLEAR TEST + KEY = CODE
    CODE + KEY = CLEAR TEXT

- PROCESS CAN BE IMPLEMENTED IN A COMPUTER

Car Security

● COMPUTER INTEGRATION OF:

    ● ELECTRICALLY CONTROLLED WINDOWS AND DOOR LOCKS

    ● STATUS TRANSMISSION TO HEADQUARTERS

    ● ACCESS BY KEY OR VIA HAND-HELD DATA TERMINAL

    ● BREAK-IN ALARM TRANSMISSION TO HEADQUARTERS

    ● COUPLED CAR LOCATOR SYSTEM (when available)

62

A Procedure for Preventing Unauthorized Use
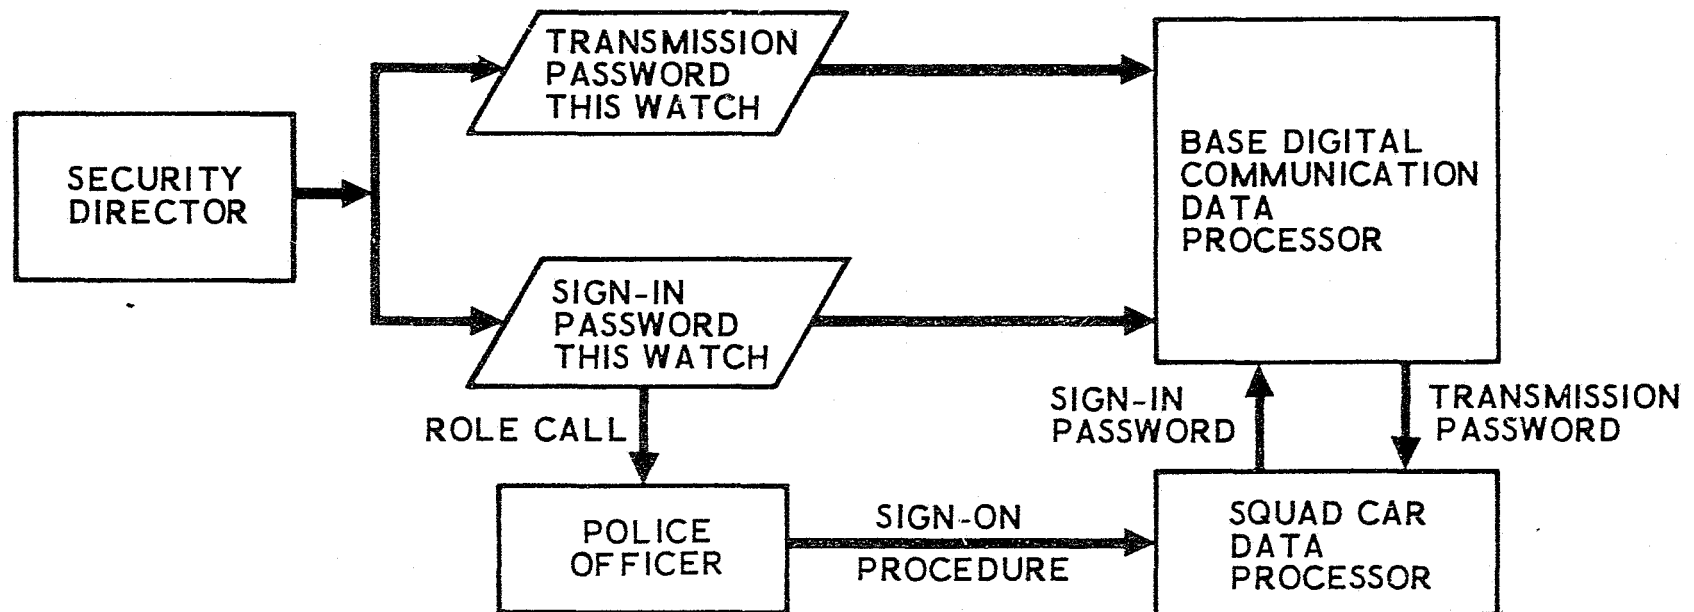

- ALL CAR TRANSMISSIONS EXCEPT SIGN-ON REQUIRE CORRECT TRANSMISSION PASSWORD

- ALL SIGN-ONS MUST CONTAIN CORRECT PASSWORD FOR THE WATCH

- TRANSMISSIONS WITHOUT CORRECT PASSWORDS WILL BE ANSWERED WITH STALLING DECOY MESSAGES

Error Detection - Simple Example

ALLOWABLE CODES	INTERPRETATION
A 101	101 → A
B 010	010 → B

INTERPRETATION continued:

```
000 ⎫
001 ⎪
011 ⎬  ERROR
100 ⎪  REPEAT MESSAGE
110 ⎪
111 ⎭
```

● ERROR DETECTION CAN BE READILY IMPLEMENTED IN A COMPUTER

Software

Channel Conservation

- NEW RADIO CHANNELS ARE DIFFICULT TO OBTAIN

- DATA TRANSMISSION AT LEAST 20 TIMES AS EFFICIENT
  AS VOICE (1/20 the duration per message)

- CAREFUL FORMATTING OF THE MESSAGES CAN MAKE
  FURTHER IMPROVEMENTS

- IN-CAR DATA BASE CAN BE ARRANGED TO HANDLE MOST
  FREQUENT DATA NEEDS

- ADVANCED DATA COMPRESSION METHODS CAN MAKE
  FINGERPRINT AND/OR PHOTOGRAPH TRANSMISSION OVER
  PRESENT LINKS FEASIBLE

Software Development — Base System

OPERATING SYSTEM
- INTERRUPT, SCHEDULING, TIMING, POWERFAIL, DEVELOPMENT AIDS, BOOTSTRAP

INPUT DRIVERS AND PROCESSORS
- RADIO FROM CAR, INCLUDING ERROR DETECTION
- OPERATOR CONSOLE INPUT
- RESPONSES FROM FECS
- SUPERVISOR CONSOLE INPUT
- EMERGENCY DISCRETES

OUTPUT DRIVERS AND PROCESSORS
- RADIO TO CAR, INCLUDING MESSAGE ASSEMBLY
- DISPATCHER DISPLAY - MESSAGES, STATUS, HITS FROM CAR INQUIRIES
- SUPERVISOR DISPLAY - STATUS
- INQUIRY TO FECS
- TRANSACTION LOG
- PRINTER

SUBSYSTEMS
- EDIT REPORTS FOR LENGTH
- GENERATE PROMPTERS
- SIGN-ON AUDIT
- INTERPRET KEYBOARD INPUT
- ERROR CORRECTION - REQUEST FOR CAR TO RETRANSMIT
- ERROR CORRECTION - RETRANSMIT LAST TRANSMITTED MESSAGE
- BUFFER MANAGEMENT
- COMMUNICATIONS SECURITY
- MESSAGE FORWARDING TO OTHER MOBILES

Software Development — Car System

OPERATING SYSTEM

- INTERRUPT, SCHEDULING, STATE MONITORING, TIMING, POWERFAIL

INPUT DRIVERS AND PROCESSORS

- RADIO FROM BASE, INCLUDING ERROR DETECTION
- KEYBOARD, INCLUDING VERIFY MEANINGFUL ENTRY
- RADIO FROM REMOTE TERMINAL
- STATUS DISCRETES
- MONITORING DEVICES

OUTPUT DRIVERS AND PROCESSORS

- RADIO TO BASE, INCLUDING MESSAGE ASSEMBLY
- DATA DISPLAY
- PRINTER
- SWITCH DISCRETES
- RADIO TO REMOTE TERMINAL

SUBSYSTEMS

- COMMUNICATIONS SECURITY
- ERROR CORRECTION - REQUEST FOR BASE TO RETRANSMIT
- ERROR CORRECTION - RETRANSMIT LAST TRANSMITTED MESSAGE
- GENERATE TROUBLE INDICATORS
- INTERPRET KEYBOARD INPUT
- MESSAGE LOGGING
- GENERATE PROMPTERS
- SIGN-ON PROCESSOR
- ACTIVITY LOGGING
- MESSAGE FORWARDING TO REMOTE TERMINAL

RECORDER HANDLER

- WRITE OPERATION
- READ OPERATION

Phase I — Test and Demonstration Objectives

- POLICE VEHICLE
  - EFFECTIVENESS OF: – COMPACT CAR AND DRIVER TRAINING IN
    REDUCING GASOLINE CONSUMPTION
    – MAINTENANCE AND CONDITION SENSORS
    – ANTI-LOCK BRAKES
  - ACCEPTABILITY OF: – COMPACT SIZED CAR
    – NEW SEAT
  - DESIGN CRITERIA FOR: – CAR INTERIOR
    – SEAT
    – HUMAN ENGINEERING OF CAR

- INTEGRATED DATA SYSTEM
  - ACCEPTABILITY OF CONCEPT
  - UTILITY OF HAND-HELD REMOTE TERMINAL
  - DEMONSTRATION OF IN-CAR DATA BASE
  - FLEXIBILITY AND GROWTH
  - DEMONSTRATION OF NEW FUNCTIONS: – SECURITY
    – AIDED REPORTING

  - AREAS OF IMPROVEMENT NEEDED

Phase I — Field Test

Program Rationale

○ WILL BE AVAILABLE BY 1985

○ COST WILL BE EQUIVALENT WITH 650

○ 5MB OR DISK EQUIVALENT MC

○ 5MB WORDS I/O BITS

○ 64K WORDS I/O BITS

○ 180 nsec ADD TIMES

○ COMPLETE COMPUTER SYSTEM ON ONE PC CARD

○ INSTRUCTION TIMES WILL BE 350-25 nsec WITH 3

○ BY 1985 THERE WILL BE 16 TERMINALS USING MICROPROCESSORS

○ TODAY $5,000 MINI'S ARE 16K - 16 BIT SYSTEM

○ IMPLICATION: SMALLER COMPUTERS

FUTURE TRENDS
SMALL SYSTEMS

Avionics Equipment and Computation
(OPTIONS)

NAV & COMM
- INERTIAL REF UNIT
- REF UNIT INTERFACE
- NAV COMPUTATIONS
- KALMAN FILTERING & PROCESSING
- GUIDANCE & FLIGHT PATH CONTROL
- RADAR INTERFACE
- NAV AIDS (Vor, Tacan, Loran)

WEAPON DELIVERY
- FIRE CONTROL SIGHT
- WEAPON DELIVERY COMPUTATIONS
- MISSILE & GUN CONTROL
- AIR/GROUND & AIR/AIR RADAR INTERFACE

ELECTRONIC WARFARE
- RADAR WARNING THREAT SITUATION
- JAMMING CONTROL & BLANKING
- COUNTERMEASURE CONTROL IR disposable

COCKPIT CONTROLS & DISPLAYS
- PREPROGRAMMED CONTROL LOGIC
- KEYBOARDS, SHARED & DEDICATED
- WARNING INDICATORS
- INTEGRATED DISPLAYS
- EXCEPTION DISPLAYS
- SYMBOLOGY GENERATION
- FLIGHT INSTRUMENTS
- ENGINE, FUEL & OIL INDICATORS

COMMUNICATIONS DATA LINK
- DIGITAL COMM
- VOICE COMM
- CRYPTO, SECURE DATA EXCHANGE
- IDENTIFICATION (IFF A/A & A/G)
- SATELLITE (Comm/NAV)
- ALL WEATHER LANDING AIDS
- COMMAND & CONTROL INTERFACE

FLIGHT CONTROLS
- FLIGHT CONTROL COMPUTER
- FAILURE ANNUNCIATION
- REDUNDANCY MANAGEMENT
- AIR DATA COMPUTER
- INERTIAL SENSOR INTERFACE
- ENGINE SYSTEM INTERFACE
- POWER ACTUATORS INTERFACE

ENERGY MANAGEMENT
- ENGINE CONTROL
- THRUST LEVEL CONTROL
- FUEL MANAGEMENT
- WEIGHT & BAL, C.G. CONTROL
- OPTIMUM ENERGY MANAGEMENT CRUISE CONTROL
- AVOIDANCE OF STALL CONDITION

OTHER SYSTEMS
- ELECTRICAL POWER CONTROL
- LANDING GEAR
- ENVIRONMENTAL CONTROL
- STORES MANAGEMENT
- INTEGRATED TEST

Trends in Avionics Procurement Cost
FLY-AWAY

WWII	TOTAL COST (millions)	ELECTRONICS (avionics)
MUSTANG	.10	1-3%
HELL CAT		
CURRENT		
F-4Es	2.5	15%
F-15	7.0	30%
F-16/17	4.5	10% - 30% (options)

Patrol Car Applications
ADVANCED SENSOR/COMPUTER

- MECHANICAL OPERATION
    - ECONOMY GAUGE
    - MONITORING/DIAGNOSTIC CAPABILITY

- SAFETY
    - ANTI-LOCK BRAKES
    - IMPROVED EMERGENCY WARNING (siren)
    - EMERGENCY CALL -- REMOTE
    - VOICE TO DIGITAL

- PERSONNEL EFFICIENCY
    - SUSPECT IDENTIFICATION
      SUSPECT DESCRIPTION
      SUSPECT MODUS OPERANDI
      SUSPECT PHOTOGRAPH
      SUSPECT FINGERPRINT
      SUSPECT VOICE
    - PROPERTY IDENTIFICATION
      PROPERTY AUTO AND CYCLES
      PROPERTY FIREARMS -- REGISTERED PROPERTY
    - CAR LOCATION
    - TIME TAGGING
    - AUTOMATIC REPORT GENERATING
    - IMPROVED TWO-WAY COMMUNICATION
    - IMPROVED SEAT DESIGN

Automated Avionics Functions
TYPICAL

MECHANICAL OPERATION
- ENGINES
- SENSORS (e.g. radar)
- WEAPONS AND WEAPONS AUXILIARIES
- POWER SYSTEMS
- FUEL MANAGEMENT (gal, time, radius)

SAFETY
- WARNING (sensing, computing, display)
  - ENGINES
  - FLIGHT CONDITIONS
  - WEAPONS

PERSONNEL EFFICIENCY
- NAVIGATION
  - FLIGHT CONTROL - HANDS-OFF
  - INERTIAL GUIDANCE - CONTINUOUS POSITION LOCATION
  - TERRAIN AVOIDANCE - PILOT RELIEF - ALL WEATHER
  - LANDING - GLIDE SLOPE/FLARE OUT
- WEAPONS
  - SEARCH, ACQUISITION, LOCK-ON
  - TARGET I.D.
  - ATTACK ENVELOPE
  - READINESS STATUS
  - LAUNCH

COMMUNICATION
- STATUS REPORTING AND UPDATING

Fuel Economy
MANIFOLD VACUUM GAUGE MONITORING

1972 LAPD CITY TEST
401 - cu in. ENGINE

MILES PER GALLON

14.7 — 10 in.
12.5 — 5 in.
8.5 — 0 in. "JACK RABBIT"
7+ — 0 in. +1 hr IDLE PER SHIFT

VACUUM LEVEL
Patrol Car Annual Cost Breakdown
REF: NBS

	EXISTING	ADDITION PROPOSED
EXISTING HARDWARE		
VEHICLE DEPRECIATION	$ 1800	
COMMUNICATIONS, etc DEPRECIATION	200	
GASOLINE	1800	
MAINTENANCE AND REPAIR	1000	
OIL AND TIRES	200	
	$ 5000	
PROPOSED IMPROVEMENTS		
COMMUNICATION AND DATA SYSTEM (at 7 year lifetime)		$ 2000
PERSONNEL		
1 MAN/UNIT (24 hours)	$ 100,000	
2 MAN/UNIT (24 hours)	$ 200,000	
EXISTING TOTAL (Personnel, Equipment, Overhead, etc)	$ 258,000	

A 40% IMPROVEMENT IN MECHANICAL OPERATOR OR

A 1% TO 2% INCREASE IN PERSONNEL EFFICIENCY JUSTIFIES THE IMPROVEMENT

Digital Communications

	VOICE	DIGITAL	TIME SAVINGS	
			PATROLMAN	RADIO CHANNEL
STATUS CODES* (e.g. 10-4)	3.6 sec	.9 sec	75%	95%
LICENSE PLATE** CHECK	2 min	10 sec	92%	93%

* "Locates" System - Montclair Calif.

** New Jersey Experience

CURRENT EXPERIENCE INDICATES A 400 - 1000 PERCENT INCREASE IN TRANSACTIONS WITH MOBILE DIGITAL TERMINALS (Ref JPL Study: 1974)

Projected Annual Mechanical Costs

	STANDARD	COMPACT
VEHICLE DEPRECIATION	$ 1 800	$ 1,000
EQUIPMENT DEPRECIATION	200	200
GASOLINE	1,800	1,200
MAINTENANCE AND REPAIR	1,000	900
OIL AND TIRES	200	180
TOTAL	$ 5,000	$ 3,480

PROJECTED SAVINGS - 1530 (31%)

Vehicle Locator System "Locates" - Montclair California

- DISPATCH REACTION TIMES ~ LESS THAN 1 min

  - CRITICAL EVENTS 64% ——➤ 86%

  - TOTAL EVENTS   63% ——➤ 81%

- MOBILE RESPONSE TIMES ~ LESS THAN 3 min

  - CRITICAL EVENTS 50% ——➤ 82%

  - TOTAL EVENTS   61% ——➤ 80%

- TOTAL RESPONSE TIMES ~ LESS THAN 4 min

  - CRITICAL EVENTS 58% ——➤ 78%

  - TOTAL EVENTS   60% ——➤ 83%

Summary

● MAJOR COST OF PATROL OPERATIONS IS PERSONNEL - NOT EQUIPMENT, HENCE ANY INCREASE IN PERSONNEL EFFICIENCY HAS SIGNIFICANT PAYOFF

 ● DIGITAL COMMUNICATIONS CAN REALIZE A 95% IMPROVEMENT IN RADIO CHANNEL CAPACITY AND A SUBSTANTIAL REDUCTION IN INQUIRY/RESPONSE DELAY

 ● ON-BOARD COMPUTER PROCESSING HAS POTENTIAL ENHANCED CAPABILITY PRESENTLY NOT ACHIEVABLE

Par Phrase List With Criteria

Regular PAR Approach	Criteria for Issuance
Approaching glidepath	top of target touches glidepath cursor (10-30 sec prior to intercept)
Begin descent	target intercepts glidepath cursor
On glidepath	target bisected by glidepath cursor
Going above glidepath	center of target leaves the glidepath cursor (upward)
Going rapidly above glidepath	center of target leaves the glidepath cursor (upward), rapidly
Going slowly above glidepath	center of target leaves the glidepath cursor (upward), slowly
Slightly above glidepath	2/3's of target above glidepath cursor
Slightly above glidepath and holding	2/3's of target above glidepath cursor, unchanged
Slightly above glidepath and coming down	2/3's of target above glidepath cursor, with movement toward cursor
Slightly above glidepath and coming rapidly down	2/3's of target above glidepath cursor, with rapid movement toward cursor
Slightly above glidepath and coming slowly down	2/3's of target above glidepath cursor, with slow movement toward cursor
Slightly above glidepath and going further above	2/3's of target above glidepath cursor, movement from slightly above to above
Slightly above glidepath and going rapidly further above	2/3's of target above glidepath cursor, rapid movement from slightly above to above
Slightly above glidepath and going slowly further above	2/3's of target above glidepath cursor, slow movement from slightly above to above
Well above glidepath	bottom of target breaks contact with glidepath cursor
Well above glidepath and holding	bottom of target breaks contact with glidepath cursor, unchanged
Well above glidepath and coming down	bottom of target breaks contact with glidepath cursor, with movement toward cursor
Well above glidepath and coming rapidly down	bottom of target breaks contact with glidepath cursor, with rapid movement toward cursor
Well above glidepath and coming slowly down	bottom of target breaks contact with glidepath cursor, with slow movement toward cursor
Well above glidepath and going further above	bottom of target breaks contact with glidepath cursor, movement from well above to beyond
Well above glidepath and going rapidly further above	bottom of target breaks contact with glidepath cursor, rapid movement from well above to beyond
Well above glidepath and going slowly further above	bottom of target breaks contact with glidepath cursor, slow movement from well above to beyond
Going below glidepath	center of target leaves glidepath cursor (downward)
Going rapidly below glidepath	center of target leaves glidepath cursor (downward), rapidly
Going slowly below glidepath	center of target leaves glidepath cursor (downward), slowly
Slightly below glidepath	2/3's of target is below the glidepath cursor
Slightly below glidepath and holding	2/3's of target is below the glidepath cursor, unchanged
Slightly below glidepath and coming up	2/3's of target is below the glidepath cursor, movement toward cursor
Above glidepath	bottom of target touches glidepath
Below glidepath	top of target touches glidepath

*Target refers to radar return of controlled aircraft as shown on CRT

Par Phrase List With Criteria (Cont)

Regular PAR Approach	Criteria for Issuance
Slightly below glidepath and coming rapidly up	2/3's of target below glidepath cursor, rapid movement toward the cursor
Slightly below glidepath and coming slowly up	2/3's of target below glidepath cursor, slow movement toward the cursor
Slightly below glidepath and going further below	2/3's of target below glidepath cursor, movement from slightly below to below
Slightly below glidepath and going rapidly further below	2/3's of target below glidepath cursor, rapid movement from slightly below to below
Slightly below glidepath and going slowly further below	2/3's of target below glidepath cursor, slow movement from slightly below to below
Well below glidepath	top of target breaks contact with glidepath cursor
Well below glidepath and holding	top of target breaks contact with glidepath cursor, unchanged
Well below glidepath and coming up	top of target breaks contact with glidepath cursor, movement toward cursor
Well below glidepath and coming rapidly up	top of target breaks contact with glidepath cursor, rapid movement toward cursor
Well below glidepath and coming slowly up	top of target breaks contact with glidepath cursor, slow movement toward cursor
Well below glidepath and going further below	top of target breaks contact with glidepath cursor, movement from well below to beyond
Well below glidepath and going rapidly further below	top of target breaks contact with glidepath cursor, rapid movement from well below to beyond
Well below glidepath and going slowly further below	top of target breaks contact with glidepath cursor, slow movement from well below to beyond
On course	target bisected by azimuth cursor
Turn right heading _____	target left of desired course
Turn left heading _____	target right of desired course
Heading is _____	establish heading
Going right of course	target center leaves the azimuth cursor, right
Going left of course	target center leaves the azimuth cursor, left
Going rapidly right of course	target center rapidly leaves the azimuth cursor, right
Going slowly right of course	target center slowly leaves the azimuth cursor, right
Going rapidly left of course	target center rapidly leaves the azimuth cursor, left
Going slowly left of course	target center slowly leaves the azimuth cursor, left
Right of course	left edge of cursor touches azimuth cursor
Left of course	right edge of cursor touches azimuth cursor
Slightly right of course	2/3's of target is right of azimuth cursor
Slightly right of course and holding	2/3's of target is right of azimuth cursor, unchanging
Slightly right of course and correcting	2/3's of target is right of azimuth cursor, movement toward cursor
Slightly left of course	2/3's of target is left of azimuth cursor
Slightly left of course and holding	2/3's of target is left of azimuth cursor, unchanging
Slightly left of course and correcting	2/3's of target is left of azimuth cursor, movement toward cursor

Par Phrase List With Criteria (Cont)

Regular PAR Approach	Criteria for Issuance
Right of course and holding	left edge of target touches azimuth cursor, unchanged
Right of course and correcting	left edge of target touches azimuth cursor, movement toward cursor
Left of course and holding	right edge of target touches azimuth cursor, unchanged
Left of course and correcting	right edge of target touches azimuth cursor, movement toward cursor
Well right of course	target breaks contact with azimuth cursor (right)
Well right of course and holding	target breaks contact with azimuth cursor (right), unchanged
Well right of course and correcting	target breaks contact with azimuth cursor (right, movement toward cursor
Well left of course	target breaks contact with azimuth cursor (left)
Well left of course and holding	target breaks contact with azimuth cursor (left), unchanged
Well left of course and correcting	target breaks contact with azimuth cursor (left), movement toward cursor
Wind is ____ ____ ____ at ____ ____.	surface wind
Cleared to land runway ____ ____ right.	tower clearance given, 3–4 miles from touchdown
Cleared to land runway ____ ____ left.	tower clearance given, 3–4 miles from touchdown
At decision height	2/3 miles from touchdown (published decision height)
No glidepath information available	loss of altitude information (glidepath)
_____ miles from touchdown	range at point where leading edge to target touches mile marker
Over landing threshold, centerline is right/left	approximately 1/3 mile from touchdown
Over approach lights	approximately 1/2 mile from touchdown
Execute missed approach	a. safety limits are exceeded b. radical aircraft maneuver is observed c. position of aircraft is in doubt d. identification of aircraft is in doubt e. radar contact is lost f. bad airport conditions g. bad airport traffic
