December, 1976

Dear User,

This is the second publication of the Management Data Book by the Corrections Research and Statistics Bureau. This Data Book, utilizing the experiences gained by the first publication, again attempts to provide timely and useful statistics for use in the areas of corrections and parole.

There have been quite a few changes in the format and style of the second publication. Many of the tables in the first data book have been deleted for one of the following reasons: (1) the table was too complicated; (2) the data, in the Bureau's opinion, was not useful; and (3) the source of the data was found to contain ambiguities that could totally distort the picture of what actually occurred.

CAUTION: Before making comparisons between data from the first publication and the second, be sure to first check with Corrections Research and Statistics Bureau, since many of the definitions used are not identical.

This Management Data Book primarily focuses on fiscal year 1975-76 data and is intended to be utilized as a management tool for correctional administrators. However, in keeping with the executive policy of open government, we are making this information available to the public.

We realize that data in any form may be misused or misinterpreted. It is hoped that this will not happen. The research staff of the Bureau will be more than willing to assist the user in clarification or further interpretation of the data. The contact persons in the Bureau are William Arbeit, Research Section Supervisor and Dave Hamamura, Research Statistician, phone 548-2500.

Mahalo,

Conroy Chow
Project Director

INTRODUCTION

The ultimate objective of Corrections Research and Statistics Bureau in the development of the Management Data Book is to clear the field of corrections of ambiguous and unusable statistical information. It is our hope that, eventually, this data book will evolve into what might be referred to as a corrections "Bible" of information from which uniform and employable statistical inferences may be utilized toward assisting the Corrections Division in its pursuit of sound and effective rehabilitation programs.

The above stated objective is not one that can be accomplished by the staff of CRSB alone, but requires the cooperation of all agencies involved. Statistics is a management tool that could prove to be a very powerful one when not abused. Abuse, however, is not the only vulnerability of statistics. Statistical inferences can only be as accurate as the information or data that is fed into the research unit. This is why the establishment of stable and consistent lines of communication between the users and the researchers is vitally important to maximizing the benefits of research.

The evolvement of the data book into a corrections "Bible" itself depends heavily on the cooperation of the users and agencies out in the field. Without proper feedback from the users, the research staff will have a difficult time in determining what information is needed and what information is useless. For this reason, each figure in this data book will be accompanied by a feedback mechanism comprised of a brief questionnaire to be filled out by the user and sent to our office. This will assist the

research team in determining which types of information should be maintained and continue to be published. User cooperation in this determination will be greatly appreciated.

Information on population accounting and movement will be published as a separate report by this office sometime in January, 1977.

Aloha,

Dave A. Hamamura

Dave Hamamura

population

MEDIAN AGE AT ADMISSION
BY YEAR OF ADMISSION (FOR YEARS 1961-1974)

DEFINITIONS

MEDIAN AGE

This is the age above and below which 50% of the admission population in a given year fall.

YEAR OF ADMISSION

This is the calendar year by which the admissions populations were segregated. This was obtained by dropping the month and day figures of the admissions date.

* * *

FOOTNOTES

- (1) SOURCE: The information in this table was taken from a computerized study file of historical population movement data coded from the Kardex population accounting system currently located at Corrections Research and Statistics Bureau.
- (2) POPULATION - The population used was the total number of admissions to Corrections Division facilities for a new conviction. Those admitted for technical parole violations are not included.

* * *

PURPOSE

The information in this graph gives an indication of any possible trend over the years of the median age of people committed to Corrections Division for a felony.

MEDIAN AGE AT ADMISSION BY YEAR OF ADMISSION 1961-1974

Figure 1

OFFENSE TYPE BY AGE AT TIME OF ADMISSION FOR ADULT FELON POPULATION
IN CORRECTIONS DIVISION FOR THOSE ADMITTED DURING 1961-1975

DEFINITIONS

PERSON OFFENSES

These offense types include those offenses which put a person's life in danger or is capable of resulting in serious bodily injury.

PROPERTY OFFENSES

These offense types include those offenses which intends to deprive a person(s) of his/her/their property.

OTHER OFFENSES

These offense types include those offenses dealing with public administration, public order, public health and morals, etc.

AGE AT COMMITMENT

These are the ages of the felons at time of admission. The categories are not of equal range.

* * *

FOOTNOTES

- (1) Source: This information was obtained from the Kardex Historical Movement File for adult felons and the Felony Offender Computerized Update System (FOCUS).
- (2) Population - The population consists of all adult felons admitted to the custody of Corrections Division for a felony by the felon's age at time of commitment. If one person was admitted more than once at the same age, he would be counted more than once, because each incarceration is treated separately.

* * *

PURPOSE

This table gives a breakdown of the offense type committed by the age of the felon at the time of admission. This data is useful in determining program development.

Figure 2

OFFENSE BY YEAR OF ADMISSION OF ADULT FELONS
ADMITTED TO CORRECTIONS DIVISION FROM 1966-1975

DEFINITIONS

PERSON OFFENSES

These offense types include those offenses which put a person's life in danger or is capable of resulting in serious bodily injury.

PROPERTY OFFENSES

These offense types include those offenses which intends to deprive a person(s) of his/her/their property.

OTHER OFFENSES

These offense types include those offenses dealing with public administration, public order, public health and morals, etc.

YEAR OF ADMISSION

This is the year in which the admission to the jurisdiction of Corrections Division occurred.

* * *

FOOTNOTES

- (1) Source: This information was obtained from the Kardex Historical Movement File for adult felons and the Felony Offender Computerized Update System (FOCUS).
- (2) Population - The population consists of all adult felons admitted to the custody of Corrections Division for a felony by the year incarcerated. If one person was committed to CD more than once, each incarceration is counted separately.

* * *

PRUPOSE

This table gives a breakdown of the admissions population for each year by the type of offense committed. This information could be used to test any trends in the types of offenses for which felons are incarcerated.

Figure 3

OFFENSE TYPE BY MAXIMUM SENTENCE FOR ADULT FELON POPULATION
IN CORRECTIONS DIVISION FOR THOSE ADMITTED 1961-1975

DEFINITIONS

PERSON OFFENSES:

These offense types include those offenses which put a person's life in danger or is capable of resulting in serious bodily injury.

PROPERTY OFFENSES:

These offense types include those offenses which intends to deprive a person(s) of his/her/their property.

OTHER OFFENSES:

These offense types include those offenses dealing with public administration, public order, public health and morals, etc.

MAXIMUM SENTENCE:

This is the maximum sentence handed down by the court when a felon is committed to Corrections.

* * *

FOOTNOTES

- (1) Source: This information was obtained from the Kardex Historical Movement File for adult felons and the Felony Offender Computerized Update System (FOCUS).
- (2) Population - The population consists of all adult felons admitted to the custody of Corrections Division for a felony by the year incarcerated. If one person was committed to Corrections Division more than once, each incarceration counted separately. It is an aggregate population of those admitted from 1961-1975.

* * *

PURPOSE

This table gives a breakdown of the types of maximum sentences handed down by the courts for certain types of offenses.

Figure 4

OFFENSE TYPE BY TIME SERVED FOR ADULT FELON POPULATION
IN CORRECTIONS DIVISION FOR THOSE RELEASED DURING 1961-1975

DEFINITIONS

PERSON OFFENSES

These offense types include those offenses which put a person's life in danger or is capable of resulting in serious bodily injury.

PROPERTY OFFENSES

These offense types include those offenses which intends to deprive a person(s) of his/her/their property.

OTHER OFFENSES

These offense types include those offenses dealing with public administration, public order, public health and morals, etc.

TIME SERVED

This is the length of incarceration in a facility under the jurisdiction of the Corrections Division. Length of incarceration is the number of years from date of admission to date of release from the jurisdiction of Corrections Division.

(a) 1 year represents one or less.

(b) 2 years represents greater than one year but less than or equal to two years, etc.

*

*

*

FOOTNOTES

- (1) Source: This information was obtained from the Kardex Historical Movement File for adult felons and the Felony Offender Computerized Update System (FOCUS).
- (2) Population - The population consists of all adult felons released from the custody of Corrections Division from 1961 to 1975 after serving a sentence for a felony. If one person was committed to CD more than once, each incarceration is counted separately.

*

*

*

PURPOSE

This table gives a breakdown of the types of offenses along with a breakdown of the number of commitments with their length of time served. This information could be useful in population projections and simulation model type of analysis.

Figure 5

SECURITY CLASSIFICATIONS OF SENTENCED FELON POPULATION
IN CORRECTIONS DIVISION FACILITIES ON 6/30/76

DEFINITIONS

SECURITY CLASSIFICATIONS

The following classification scheme is that which is used by the Corrections Division to label the degree of security risk a resident obtains as he passes through the corrections system.

- (1) Close - A resident whose degree of risk is not yet determined.
- (2) Maximum - A resident who requires constant observation because of his high risk.
- (3) Medium-close - A resident who is considered to be medium security risk but cannot be allowed to do work outside of the facility's walls.
- (4) Medium - A resident who is considered to be medium security risk and is permitted, on occasion, to do work outside of the facility.
- (5) Minimum - A resident who is considered to be minimum security risk and is usually allowed to work in the community.

* * *

FOOTNOTES

--- Facility not designed to maintain that security type population.

Source: Information was gathered from individual facilities.

* * *

PURPOSE

This information enables the user to see the distribution of the various security types among the Corrections Division facilities. It is of little use to facilities that have only one security type. However, a facility like HSP which has to develop programs and provide facilities for four different security types could use this data for operations planning.

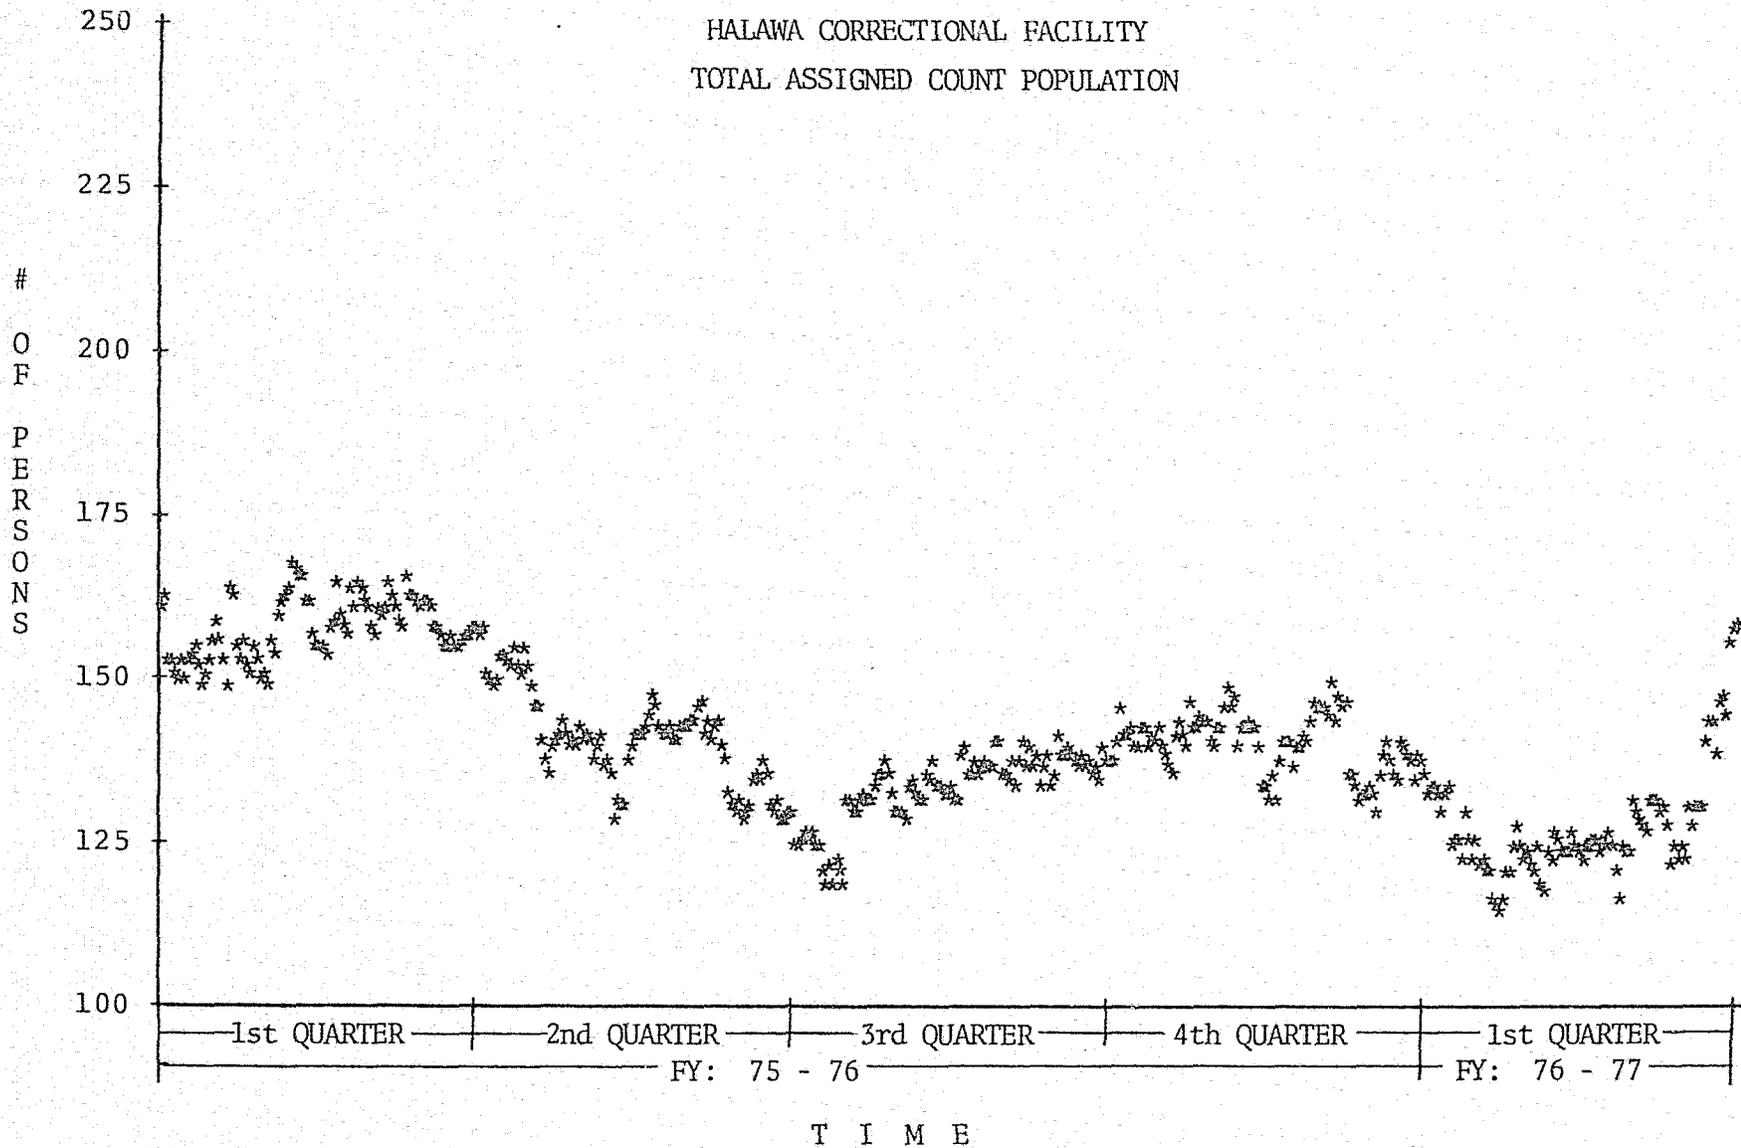

Figure 8

HAWAII COMMUNITY CORRECTIONAL FACILITY
TOTAL ASSIGNED COUNT POPULATION

DEFINITIONS

OF PERSONS

This is the total count of the population assigned to Hawaii Community Correctional Facility.

TIME

This is the day on which the associated assigned count was taken.

* * *

FOOTNOTES

- (1) Source: This data was compiled from the daily population movement accounting system located at Corrections Research and Statistics Bureau (CRSB).
- (2) Assigned Count Population - This is the number of residents assigned to Hawaii Community Correctional Facility including those physically located elsewhere (ie., furloughs, hospitals, mainland transfers, etc.).

* * *

PURPOSE

This information could be used to examine any possible trends in population or the effect of special events on population. It could also be used in population projections.

Please answer and mail to:

Table No. _____

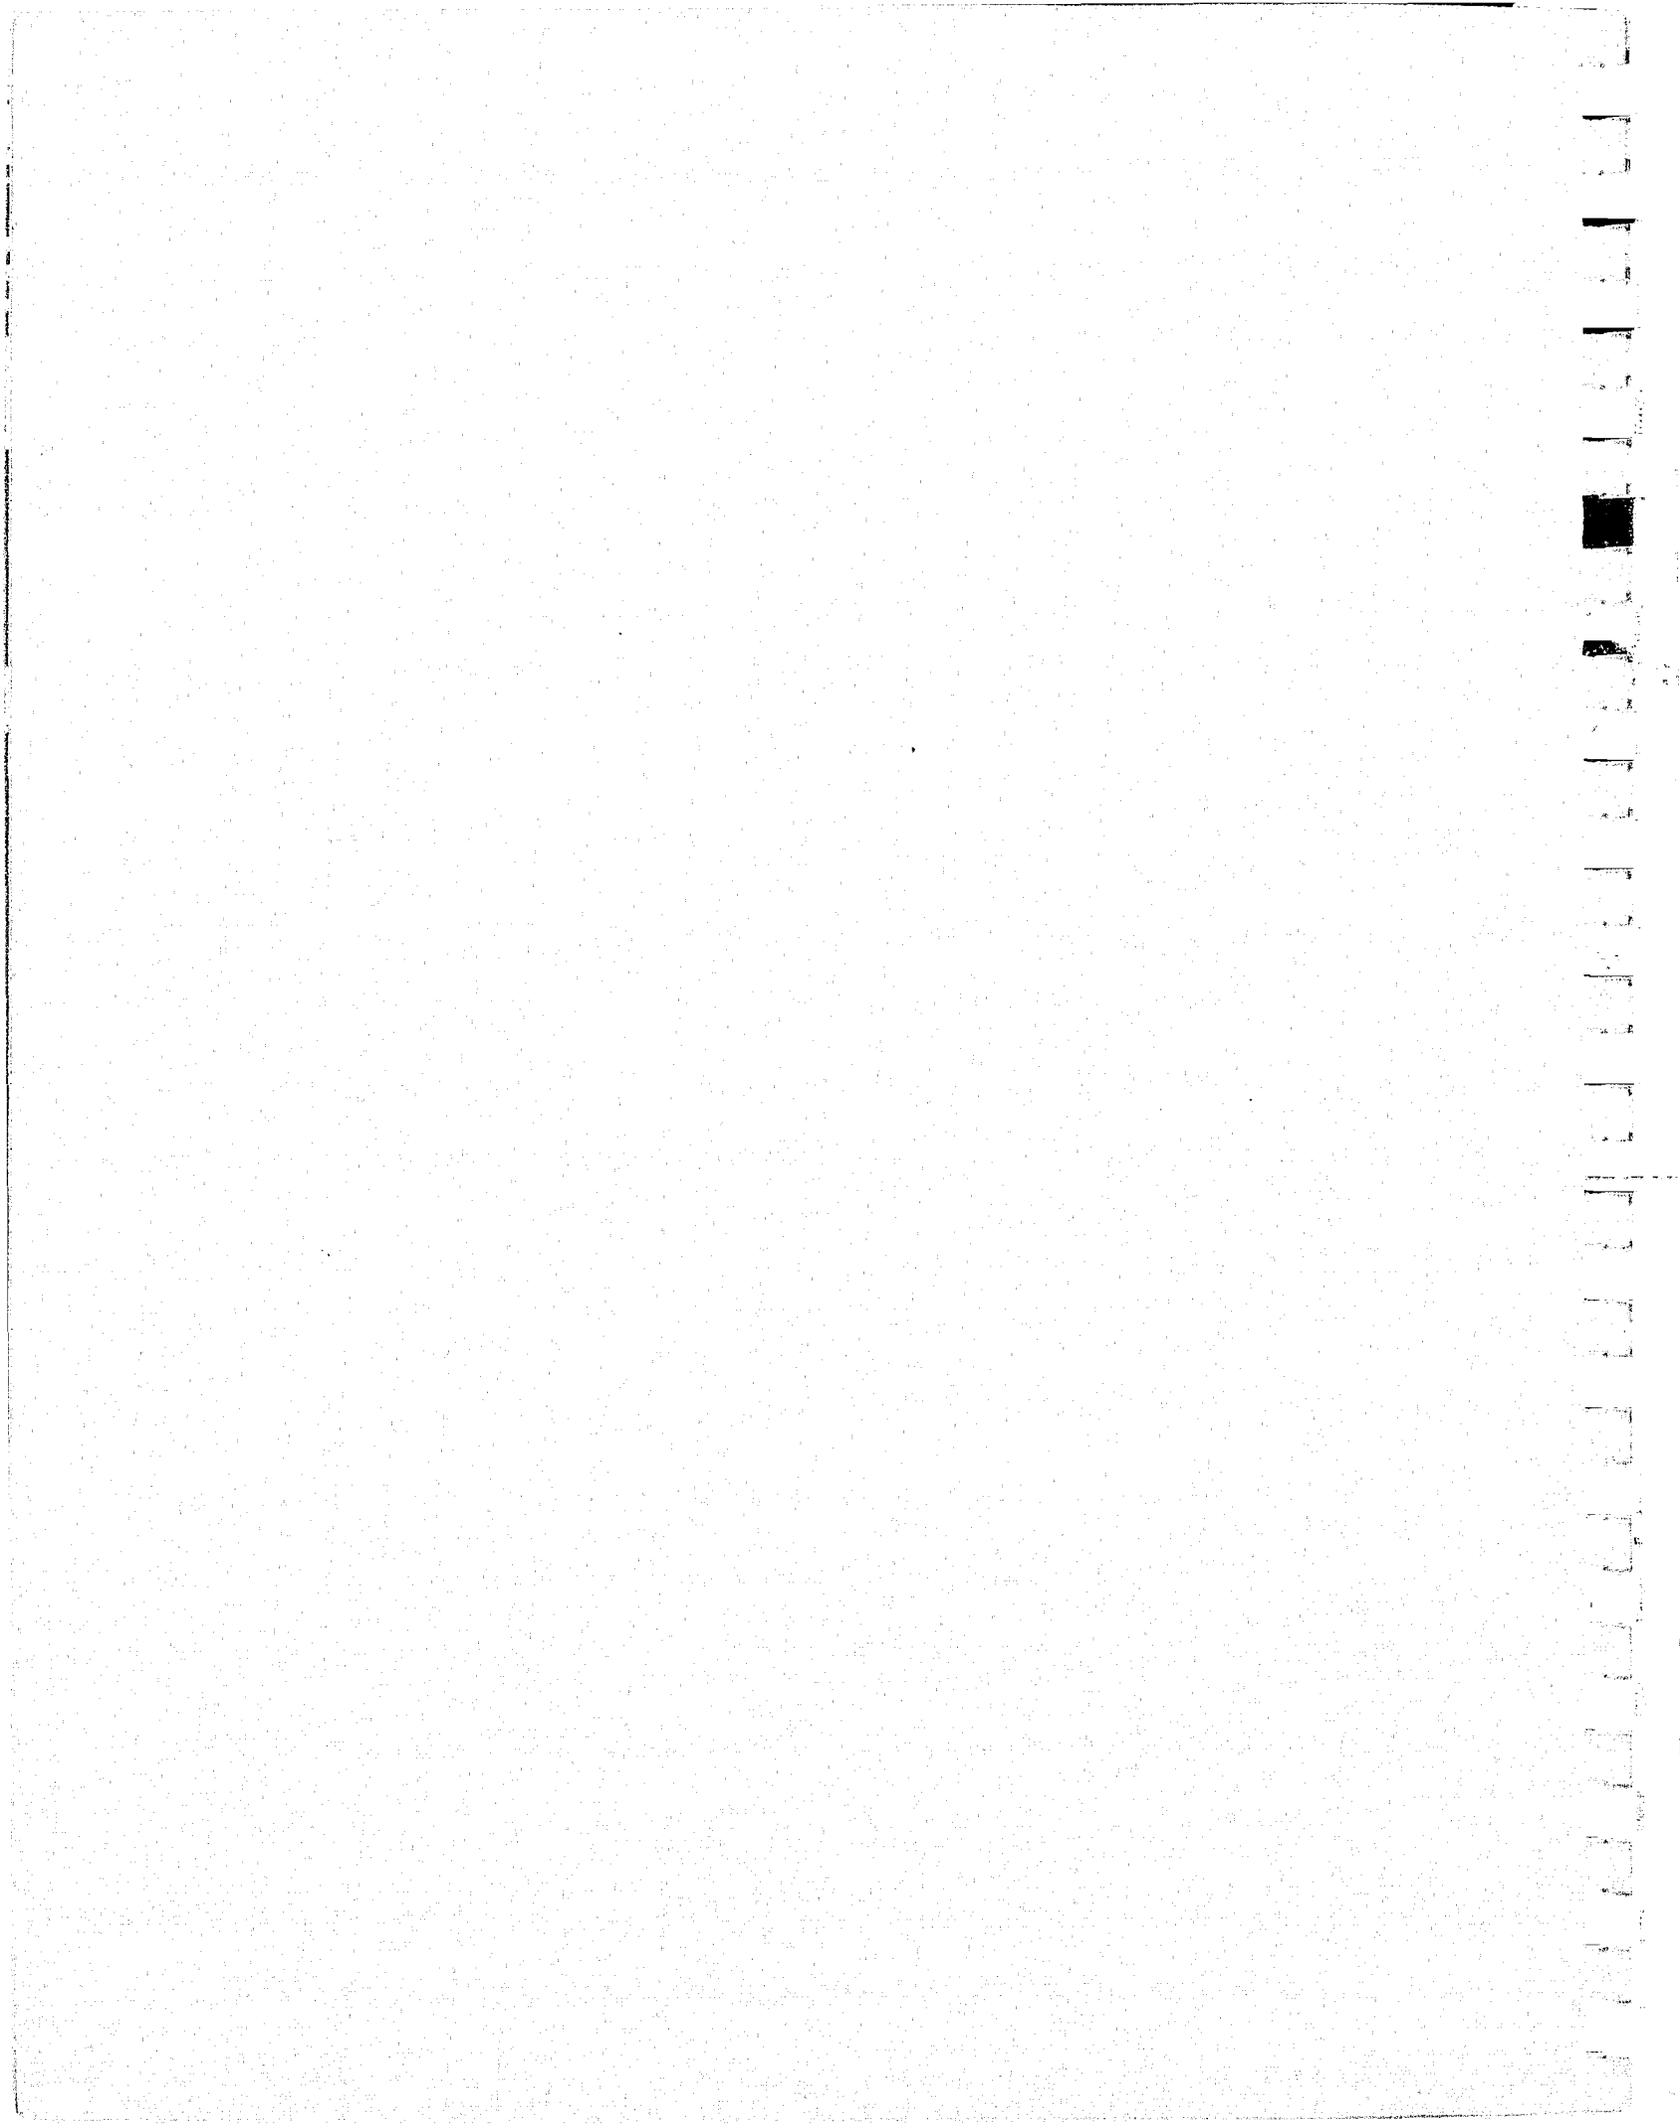

Corrections Research and Statistics Bureau
1149 Bethel Street
Honolulu, Hawaii 96813

- (1) How useful did you find the information in this table (or graph)?
Highly useful _____
Somewhat useful _____
No use at all _____
- (2) How easily understandable did you find the format of this table (or graph)?
Easy to understand _____
Somewhat complicated _____
Too complicated _____
- (3) How much information do you feel is contained in this table (or graph)?
Too little _____
Enough _____
Too much _____
- (4) Did you find the narrative helpful in explaining each table (or graph)?

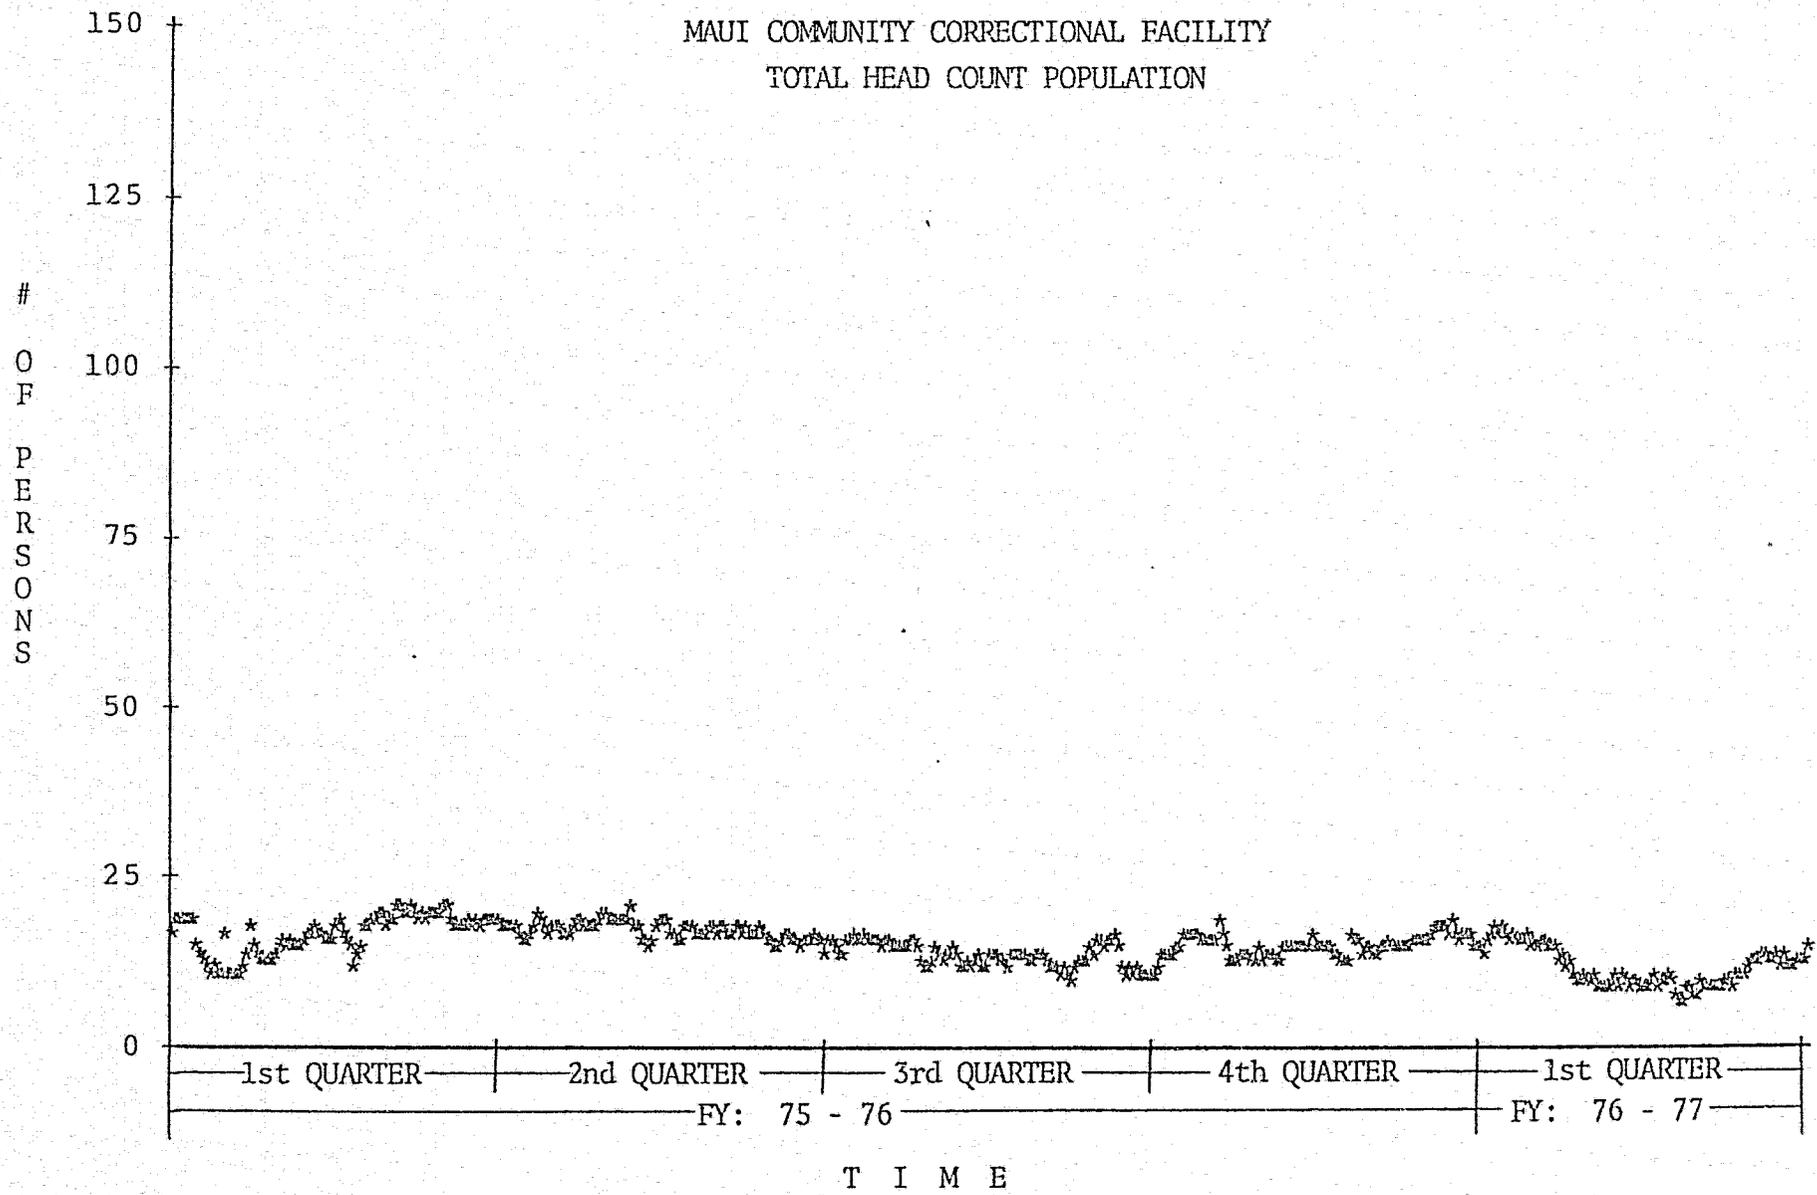

Figure 24

MISCONDUCT RATES BY SIX MONTH PERIODS AT
HAWAII STATE PRISON DURING FY: 73 - 74 TO FY: 75 - 76

DEFINITIONS

NUMBER OF MISCONDUCT REPORTS

This is the total count of the misconduct reports on inmates at Hawaii State Prison.

NUMBER OF CHARGES

This is the total count of the misconduct charges on inmates at Hawaii State Prison. (One report can contain a number of charges.)

NUMBER OF DIFFERENT INDIVIDUALS REPORTED

This is the total count of the number of individual inmates charged with at least (1) one misconduct.

NUMBER OF REPORTS INVOLVING MORE THAN ONE INMATE

This is the total count of the misconduct reports which charge more than (1) one inmate.

* * *

FOOTNOTES

Source: This information was gathered from the DSSH-CD FORM 107 (Misconduct Reports).

* * *

PURPOSE

The information in this table may be used to get a clearer breakdown of what is happening in the area of misconducts. For example, the number of misconducts may be attributable to a select number of inmates.

Figure 25

HAWAII STATE PRISON

TYPES OF MISCONDUCT CHARGES BY SIX MONTH PERIODS: FY 73-74 TO FY 75-76

DEFINITIONS

MISCONDUCT CHARGES:

- (a) Physical Violence - This includes any violence where someone is physically struck.
- (b) Threats of Force - This includes any verbal threat or intimidation.
- (c) Destruction of Property - This includes any misconduct charges dealing with damage done to State property.
- (d) Improper Movement - This includes such misconduct charges as Respect and Attitude, Refusal to Work, Refuse to Obey Orders, Limits, and Being in an Unauthorized Area.
- (e) Contraband - This includes any misconduct dealing with the possession of any unauthorized material by an inmate.
- (f) Substance Abuse - This includes any misconduct charges dealing with the improper use of food.
- (g) Other - This includes such charges as Kitchen Utensils, Inmate Search, and Self-mutilation.
- (h) Escape - This includes all charges of escape. Data for periods I, II, III, and IV include attempted escape.
- (i) Attempted Escape - This includes all charges of attempted escape. Data for periods I - IV were not available for this category.

* * *

FOOTNOTES

Source: This data was taken from DSSH-CD FORM 107 (Misconduct Reports).

* * *

PURPOSE

This table could be used to measure the increase or decline in misconduct charges within six month periods. Also, any trends in types of charges could be seen, keeping in mind the definitions of the categories used.

Figure 26

CATEGORIES OF MISCONDUCT CHARGES BY MONTH
AT HAWAII STATE PRISON DURING FY: 75 - 76

DEFINITIONS

MISCONDUCT CHARGES:

- (a) Disturbance - This includes such misconducts as violence, threats, and property destruction.
- (b) Administrative - This includes such misconducts as contraband, improper movement, substance abuse.
- (c) Other - This include all other misconduct charges such as kitchen utensils, inmate search, self-mutilation, and others.

* * *

FOOTNOTES

¹ Percent - These are row percentages. The number of charges in a given month as a percent of the total charges in that given month.

* * *

PURPOSE

The information in this table gives a picture of any trends or shifts in the three classifications of misconducts during the fiscal year. This type of information is vital in the study of misconducts.

Figure 27

HAWAII STATE PRISON

MISCONDUCT CHARGES AND PLACE OF OCCURRENCE DURING FY: 75 - 76

DEFINITIONS

MISCONDUCT CHARGES:

Physical Violence - This includes any violence where someone is physically struck.

Threats of Force - This includes any verbal threat or intimidation.

Destruction of Property - This includes any misconduct dealing with damage done to State property.

Improper Movement - This includes such misconduct charges as Respect and Attitude, Refusal to Work, Refuse to Obey Orders, Limits, and Being in an Unauthorized Area.

Contraband - This includes any misconduct dealing with the possession of unauthorized material by an inmate.

Substance Abuse - This includes any misconduct charges dealing with the improper use of food.

Other - This includes such charges as Kitchen Utensils, Inmate Search, and Self Mutilation.

Escape - This includes all charges of escape (excluding attempted escape).

Attempted Escape - This includes all charges of attempted escape.

* * *

FOOTNOTES

¹ Other - This includes workline, backyard, hobo yard, court yard, gate 13, landscape line, maximum security unit, and between towers 3 and 4.

² Other - This includes outside prison, and no location given.

Source: This information was collected from DSSH-CD FORM 107 (Misconduct Report).

* * *

PURPOSE

This type of data could be used to point out high incident areas along with types of misconducts in these areas. This kind of data would be invaluable to the personnel manager.

Figure 28

HAWAII STATE PRISON

MISCONDUCT CHARGES AND REPORTS BY MONTH FOR FY: 73-74 TO FY: 75-76

DEFINITIONS

MISCONDUCT REPORTS

These are the counts of the number of DSSH-CD FORM 107 (Misconduct Report) written in a given month.

MISCONDUCT CHARGES

These are the total count of the number of charges that appear on the misconduct reports. One report may contain more than one charge.

MONTH

This is the month in which the associated number of reports and charges were made.

* * *

FOOTNOTES

Source: The information in this graph was taken from the DSSH-CD FORM 107 (Misconduct Report).

* * *

PURPOSE

This graph gives a picture of the trend in the number of misconduct reports and charges over the given fiscal years. It also enables the user to identify any months that seem to be associated with highs in terms of misconducts or possible events that occurred which could possibly be causes of high misconduct rates.

HAWAII STATE PRISON MISCONDUCT CHARGES AND REPORTS BY MONTH FY 73-74 - 75-76

HAWAII STATE PRISON

MISCONDUCT CHARGES BY DAY OF THE WEEK FOR FY: 74-75 AND FY: 75-76

DEFINITIONS

NUMBER OF CHARGES

This is the total number of misconduct charges during the fiscal year that occurred on a given day of the week.

DAY

This is the day of the week on which the given number of misconduct charges occurred.

* * *

FOOTNOTES

(1) Source: This information was taken from forms DSSH-CD 107 (misconduct reports).

* * *

PURPOSE

The information on this graph may be used to determine possible similarities among the two fiscal years. It also gives an indication of the days of the week that have a high incident rate. If it is possible to isolate certain days of the week that are suspected to have a high concentration of charges, then this information could assist in the allocation of manpower resources such as the granting of vacation leave etc.

HAWAII STATE PRISON

MISCONDUCT CHARGES BY TIME OF DAY FOR FY: 74-75 AND FY: 75-76

DEFINITIONS

NUMBER OF CHARGES

This is the total number of misconduct charges during the fiscal year that occurred within the given hour.

TIME OF DAY

This was determined using the criteria of dropping the minutes portion of the time given on the misconduct report.

* * *

FOOTNOTES

(1) Source: This information was taken off of form DSSH-CD 107 (misconduct reports).

* * *

PURPOSE

The information on this graph may be used in determining possible similarities among the two fiscal years. It also gives an indication of those times of the day that have a high incident rate. Being able to identify these critical hours of the day, this information may be used to assist the user with the allocation of manpower resources.

HAWAII STATE PRISON MISCONDUCT CHARGES BY TIME OF DAY

FY 74-75, 75-76

HAWAII STATE PRISON
MISCONDUCT CHARGES AND DISPOSITIONS DURING FY: 75-76

DEFINITIONS

MISCONDUCT CHARGES:

Physical Violence - This includes any violence where someone is physically struck.

Threats of Force - This includes any verbal threat or intimidation.

Destruction of Property - This includes any misconduct dealing with damage done to State property.

Improper Movement - This includes such misconduct charges as Respect and Attitude, Refusal to Work, Refuse to Obey Orders, Limits, and Being in an Unauthorized Area.

Contraband - This includes any misconduct charges dealing with the possession of unauthorized material by an inmate.

Substance Abuse - This includes any misconduct charges dealing with the improper use of food.

Other - This includes such charges as Kitchen Utensils, Inmate Search, and Self Mutilation.

Escape - This includes all charges of escape (excluding attempted escape).

Attempted Escape - This includes all charges of attempted escape.

SUSPENDED

If half or more of the punishment is temporarily suspended pending good behavior.

EXECUTED

If more than half of the punishment is not suspended.

* * *

FOOTNOTE

SOURCE: This data was taken from the DSSH-CD FORM 107 (Misconduct Report).

* * *

PURPOSE

The information in this table gives a breakdown of the types of dispositions that were received for certain types of misconduct charges. This information, along with other information, such as the number of Adjustment Committee meetings, would give the user an idea of the workload of the Committee.

Figure 33

HAWAII YOUTH CORRECTIONAL FACILITY

NUMBER OF MISCONDUCT REPORTS BY MONTH DURING FY: 75 - 76

DEFINITIONS

NUMBER OF REPORTS

This is the count of the number of DSSH-CD FORM 107 (Misconduct Report) written up on residents of the facility in a given month during the fiscal year.

MONTH

This is the month during which the associated number of reports were written.

TOTAL

This is the total juvenile resident population written up for at least one misconduct.

MALE/FEMALE

This is the breakdown, by sex, of the above defined total juvenile misconduct population.

* * *

FOOTNOTE

Source: The information in this graph was taken from DSSH-CD 107 (Misconduct Report).

* * *

PURPOSE

This histogram gives a breakdown, by sex, of the misconduct reports on the residents of the Hawaii Youth Correctional Facility during the fiscal year. This enables the user to identify the sources of misconduct reports by sex, by month.

Figure 38

RESIDENTS' EARNINGS AND SAVINGS AT
HAWAII STATE PRISON DURING FY: 75 - 76

DEFINITIONS

COMPENSATIONS

This is the sum total of compensations earned by Hawaii State Prison inmates in the various programs.

INCOME FROM OTHER SOURCES

This is the sum total of other income such as contributions from their families, tax returns, etc.

TOTAL INCOME

This is the sum of compensations and income from other sources.

EXPENDITURES AT HSP STORE

This is the sum total of expenditures by inmates at the HSP store during the fiscal year.

EXPENDITURES AT JAYCEES BENEFIT SALE

This is the sum total of expenditures by inmates at the annual Jaycees benefit sale.

APPROXIMATE SAVINGS

This is derived from the following formula:

TOTAL INCOME - (EXPENDITURES AT HSP STORE + EXPENDITURES AT JAYCEES BENEFIT) = APPROXIMATE SAVINGS

* * *

FOOTNOTES

SOURCE: Hawaii State Prison log of inmates' expenditures.

* * *

PURPOSE

This data, along with other pieces of data, could be used for cost-benefit analysis, program planning, or other similar studies. The accumulation of this type of data will, in the future, give researchers another variable with which to do tests for trends.

APPROXIMATE SAVINGS	<u>\$ 43,105.83</u>

Figure 39

INMATES' RECEIPTS AND DISBURSEMENTS AT
KULANI HONOR CAMP DURING FY: 75 - 76

DEFINITIONS

RECEIPTS:

Compensation Earned - This is the sum total of the compensation earned by inmates at KHC for work done for the State (earnings from workline).

Craft Sales - This is the sum total of the amount earned by inmates for the sale of their crafts.

Other - All other receipts by inmates during FY 75-76.

DISBURSEMENTS:

Expenditures - This is the sum total of all expenditures by inmates during FY 75-76.

Other - All disbursements other than inmates' personal expenditures.

* * *

FOOTNOTES

¹ Other Receipts - This includes gifts to inmates, tax refunds both State and Federal, and social security income. It does not include receipts resulting from a transfer of funds from one account to another.

² Other Disbursements - This includes postal and medical/dental expenses. This does not include disbursements for saving bonds, money sent home, savings accounts, or the closing of accounts by transfers.

Population at KHC is divided into two distinct populations - inmates and furlougees.

* * *

PURPOSE

This information provides the user with an overview of population activities and their impact on any cost-benefit analysis or program evaluation. Such evaluations may be done along with population figures, facility expenditures, encumbrances figures, and others.

COMPENSATION EARNED	\$12,004.66	EXPENDITURES	\$31,234.99
CRAFT SALES	25,999.50		
OTHER ¹	7,714.84	OTHER ²	854.61

Figure 40

FURLOUGHEES' RECEIPTS AND WITHDRAWALS AT
KULANI HONOR CAMP DURING FY: 75 - 76

DEFINITIONS

RECEIPTS:

Wages Earned - This is the sum total of all wages earned by furloughees from their jobs in the community.

Craft Sales - This is the sum total of the amount earned from the sale of furloughees' crafts.

Other - This is the sum total of other receipts to furloughees during FY 75-76.

WITHDRAWALS:

Personal Expenditures - This is the sum total of all personal expenditures by furloughees at KHC.

Room and Board Charges - This is the sum total of the room and board charges assessed to furloughees.

Other - This is the sum total of all other withdrawals by furloughees.

* * *

FOOTNOTES

¹ Other Receipts - This includes tax refunds and gifts, and does not include receipts resulting from a transfer of funds from one account to another.

² Other Withdrawals - This includes craft assessments, wood purchases, medical/dental costs, and union dues. It does not include money sent home or from the closing of accounts due to transfer.

* * *

PURPOSE

This information provides the user with an overview of population activities and their impact on any cost-benefit analysis or program evaluation. Such evaluations may be done along with population figures, facility expenditures, encumbrances figures, and others.

Figure 41

RESIDENT EARNINGS AND SAVINGS AT
KAMEHAMEHA CONDITIONAL RELEASE CENTER
FY 74 - 75 AND FY 75 - 76

DEFINITIONS

Gross Wages

This is the sum total of all gross earnings by residents holding jobs within the community.

Net Wages

This is the sum total of all net earnings, after taxes, by residents holding jobs within the community.

Other Income

This is the sum total of bank interest earned, gifts received from friends and relatives, tax returns, etc. for all residents at the Kamehameha CRC during FY 74-75 and FY 75-76.

Total Net Income

This is the sum of Net Wages and Other Income.

Expenditures

This is the sum total of room and board assessments, contributions, medical and dental expenses, tools and clothing expenses, car and transportation expenses, and personal allowances.

Savings

This is derived from the equation: Savings = Total Net Income - Expenditures

PROGRAM COMMITTEE MEETINGS AT
HAWAII STATE PRISON DURING FY: 75 - 76

DEFINITIONS

PROGRAM COMMITTEE

This is the committee that reviews applications by inmates for jobs, schooling, facility transfers, etc., and any recommendations made by the adjustment committee. It also approves or disapproves any activities of inmate organizations and outside organizations coming into the facility to hold any activity involving inmates.

AVERAGE ACTIONS PER MEETING

This is obtained by dividing the number of actions taken by the number of committee meetings in a given month.

* * *

FOOTNOTES

Source: This information is taken from the Hawaii State Prison Program Committee Meeting agendas.

* * *

PURPOSE

This table gives information on the workload of the program committee by month during the FY: 75-76.

Figure 45

HAWAII STATE PRISON

DAILY AVERAGE POPULATION IN MEDICAL CARE FACILITIES DURING FY: 75-76

DEFINITIONS

DAILY AVERAGE

This is the daily average population of residents assigned to Hawaii State Prison but located (overnight) at a medical care facility outside of HSP during the given month.

MONTH

This is the month of the fiscal year from which population in medical care facilities figures were used to compute the associated daily average population.

* * *

FOOTNOTES

- (1) SOURCE: The information in this figure was extracted from the manual daily movement population accounting system currently located at Corrections Research and Statistics Bureau.
- (2) POPULATION - The population counts of residents in medical care facilities does not include residents who are there for less than a day (couple hours then return to HSP on the same day).

* * *

PURPOSE

The information in this histogram may be used for medical services program evaluation or cost-benefit analysis. With more of the same information, trend analysis or population projections may be possible.

HALAWA CORRECTIONAL FACILITY DAILY AVERAGE POPULATION IN MEDICAL CARE FACILITIES

FY 75 - 76

Figure 47

POSITIONS WITHIN CORRECTIONS DIVISION
AS OF JUNE 30, 1976

DEFINITIONS

ADMINISTRATIVE PERSONNEL

Corrections Administrators (CDA) - CDA I, CDA II, CDA IV, CDA V.

CORRECTIONAL OFFICERS

Adult Corrections Officers and Youth Corrections Officers (ACO and YCO) - ACO I, ACO II, ACO III, ACO IV, ACO V, ACO VI, YCO III, YCO IV.

SOCIAL WORK PERSONNEL

Social Workers and Social Services Assistants (SW and SSA) - SW I, SW II, SW III, SW IV, SW V, SSA III, SSA IV.

CLERICAL PERSONNEL

Secretaries, Clerk-Stenos, Personnel Clerks, Clerk-Typists, Accounts Clerks, Receptionists, and Clerks (SEC, CLK-STENO, PERS-CLK, CLK-TYPIST, ACCT-CLK, RECEP, CLK) - SEC V, SEC III, CLK-STENO III, PERS-CLK IV, CLK-TYPIST I, ACCT-CLK IV, RECEP, CLK III, CLK IV.

OTHER PERSONNEL

All positions dealing with operations, maintenance, medical, and other programs that are not considered to fall into any of the above.

* * *

FOOTNOTES

Limited Term, Short Term, and Half-Time positions were counted the same as a full time permanent position.

Source: Manning table from Corrections Division Personnel Clerk.

* * *

PURPOSE

The information given in this table enables the user to see the distribution of personnel within the Corrections Division, along with a categorical breakdown of the types of positions within the specific branches. This data, along with population or client data, could be used to obtain personnel-to-client ratios, either for all of Corrections Division or for individual branches. The important things to keep in mind when using this data are the following:

- (1) Definitions of categories should coincide with those of the user's purpose.
- (2) The assumptions stated in the footnote must be recognized

Figure 48

INMATE/STAFF RATIOS OF
CORRECTIONS DIVISION FACILITIES ON 6/30/76

DEFINITIONS

INMATE/STAFF RATIO

This is obtained by dividing the number of inmates, both assigned count and head count (see footnotes #1 and #2), by the total staff size.

* * *

FOOTNOTES

1 ASSIGNED COUNT

This is the total number of inmates assigned to the jurisdiction of a particular facility. This includes those assigned to one facility but who are physically located elsewhere.

2 HEAD COUNT

This is the total number of inmates physically located at a particular facility.

3 COMMUNITY CENTERS BRANCH

The community centers branch includes the combined operations of both the Kamehameha and Laumaka Conditional Release Centers. Their assigned count population include many people on furlough, which makes it difficult to compare with the assigned count population at other facilities.

* * *

PURPOSE

The information in this table gives the user some idea of the type of workload with which the staff must contend at any one facility. This data could also be used in manpower allocation decisions along with the idiosyncratic variables of each facility.

COMPLAINTS PERTAINING TO CORRECTIONS AND PAROLE
SUBMITTED TO THE OMBUDSMAN DURING FY: 75 - 76

DEFINITIONS

MEDICAL TREATMENT OF INMATE

This type of complaint refers to those relating to medical mistreatment or the lack of proper medical care for an inmate.

PERSONAL BELONGINGS OF INMATE

This type of complaint pertains to the loss of personal belongings of an inmate by the State or its officials.

PHYSICAL SAFETY OF INMATES

This type of complaint pertains to the fear of physical harm to the inmate.

PROGRAMMING OF INMATE

This type of complaint pertains to facility procedures or living conditions.

FACILITY EMPLOYEES

This type of complaint pertains to misconduct on the part of a facility employee.

PAROLE BOARD ACTIONS

This type of complaint pertains to decisions of the Parole Board.

PUBLIC SAFETY

This type of complaint pertains to Corrections Division policies and procedures relating to public safety.

OTHER

This type of complaint pertains to complaints that do not clearly fit into any of the above categories.

* * *

FOOTNOTE

¹ Other - This includes the following:

- (a) A request to baptize an inmate's child within the prison that was turned down.
- (b) A request to marry an inmate within the prison that was turned down.
- (c) An employee of one of the facilities made a complaint regarding his pay.

* * *

PURPOSE

The information given in this table enables the user to see the types of complaints that are submitted to the Office of the Ombudsman. This information could be used to locate problem areas within Corrections Division.

ACKNOWLEDGEMENTS

This Corrections Management Data Book - 1976 is the second publication of compiled data available in the field of Corrections in the State of Hawaii by the Corrections Research and Statistics Bureau (CRSB). The Bureau is headed by Conroy Chow, Project Director. This publication was coordinated by Dave A. Hamamura, Research Statistician, with the guidance and assistance of the entire CRSB staff.

Much mahalo to the intermittent staff of CRSB who contributed their assistance to this effort. This includes those people who were summer hires, work incentive program hires, and temporary labor force hires.

The Bureau wishes to acknowledge the many individuals of the various correctional facilities for their much appreciated cooperation and interest in this undertaking. It is the hope of the Bureau that this publication will prove to be a useful tool in assisting these individuals in their constant endeavor of rehabilitation.

The Corrections Research and Statistics Bureau's core staff consists of:

Conroy Chow, Project Director
William Arbeit, Research Associate
Gail Fukuda, Systems Analyst
Sheila Cline, Systems Analyst
Dawn Ratterman, Computer Programmer
Michael Mametsuka, Computer Programmer
Douglas Gugudan, Computer Programmer
Dave Hamamura, Research Statistician
Gail Takeda, Statistical Clerk/graphics
Sali Toda, Statistical Clerk/graphics
Georganne Akamine, Clerk
Patricia Fajardo, Clerk-Steno
Faith Takaesu, Clerk-Typist

Dave Hamamura
Data Book Coordinator
