PHOENIX POLICE

Phoenix, the home of Arizona State Government, functions under a council-manager form of city administration.

Phoenix has grown from a population of 65,000 people and 10 square miles in 1940 to over 674,900 people and 276.6 square miles in 1976.

This growth has resulted in a considerable increase in requests for police service and an increase in Police Department strength from 173 employees in 1940 to 1,926 employees in 1976.

In 1976, a "Team Experiment In Area Mobilization" was initiated which provided citizens of a nine-square mile area with the advantages of a small-town police force plus the resources of a large police department. The experiment involved 50 officers assigned to serve and protect 25,000 inhabitants. The officers assigned to this experimental project were responsible for providing total police services, including functions normally handled by detectives and community relations specialists. An essential part of the program is citizen involvement. Team members met with clubs, citizen groups, and groups of businessmen to foster an awareness of crime prevention techniques and develop solutions to specific crime problems of the area.

Another program that stressed the involvement of the community in the reduction of crime was initiated in February, 1976, when two agents of the Federal Bureau of Investigation were detached from

the bureau and assigned to work with two Phoenix police officers from the Community Relations Division. The goal of these four officers was to target major street crime problems and develop effective community involvement deterrents. This program, titled Crime Resistance, focused on increasing public awareness of the crime problem through radio, television, newspaper advertisements, and information pamphlets. The program enlisted the support of various community service organizations to assist in special projects. In one area, Girl Scouts painted house numbers on the curbs for easy identification by police officers and other emergency services. Other clubs have sponsored home security checks and encouraged participation in Departmental crime prevention programs such as Operation Identification and the Clock Watch Program. In some areas, previous burglary victims were contacted in order to ascertain what security measures had been taken since being victimized. Officers then offered suggestions on how to further improve security.

In 1976, the Department implemented plans to train and equip two bomb detection dog teams. Elsewhere, dogs have been invaluable in the defense against terrorism, especially in transportation terminals. Studies have shown that a trained dog and handler can detect explosives much more efficiently than a man alone. The bomb detection teams will supplement the Department's narcotic sniffing dogs who, in 1976, were responsible for the seizure of 1,604 pounds of marijuana, 6 pounds of cocaine, 5 pounds 8½ ounces of heroin, and 130,000 units of LSD.

In 1975, Phoenix voters approved a 12.4 million dollar Capital Improvement Program for the Phoenix Police Department. During 1976, design work was completed on seven of these projects which

include a new Regional Police Academy, two new briefing stations, a new Air Patrol Facility, and the expansion of three briefing stations.

Work was initiated in 1976 on a Departmental reorganization plan. On January 24, 1977, the Department was reorganized into the following five divisions, each commanded by an assistant chief: Management Services (formerly Administrative Services); Field Operations; Community Services (formerly Community Relations); Technical Services; and a newly-created Inspectional Services Division.

Under the January 24, 1977 reorganization, the Management Services Division includes the Office of Administration, the Training Bureau, the Employment Services Bureau, the Planning and Research Bureau (formerly Research and Development Bureau), and the Fiscal Bureau. Under the Division of Field Operations, two Patrol Zone Majors each command two patrol districts, and the General Investigations Major commands the Criminal Investigations Bureau and the Special Investigations Bureau; the Special Operations Major Commands the Selective Enforcement Bureau and the Traffic Bureau. The Community Services Division is comprised of Youth Services, Community Relations, Crime Resistance, and Public Information activities. The Technical Services Division includes the Communications Bureau, the Information Bureau, the Laboratory Bureau, and the Computer Services Bureau. The Duty Majors, the Organized Crime Bureau, the Internal Inspections Bureau, the Internal Affairs Bureau, the Property Bureau, and the Law Specialists are under the Inspectional Services Division.

This report is presented on the basis of the organizational structure that existed in 1976.

DEPARTMENTAL GOALS, OBJECTIVES AND ACCOMPLISHMENTS FOR 1976

Provide the community with a law enforcement system that integrates and utilizes all Departmental, civic, and community resources to provide police service, to protect the life and property of society, and to enforce the laws and ordinances within the framework of the Constitution.

- Maintain response time to emergency requests for service at 5 minutes and non-emergency response time at 15 minutes.

ACCOMPLISHMENTS: In 1976, emergency response time was reduced to 4.8 minutes and non-emergency response time was reduced to 12.7 minutes. This compares to an emergency response time of 5.1 minutes and a non-emergency response time of 12.9 minutes in 1975.

- Increase total narcotic offenses charged in order to limit and control such activities.

ACCOMPLISHMENTS: The Department increased the number of offenses charged in the sale and possession of narcotics and other dangerous drugs by 33% over 1975.

- Increase prosecution-oriented investigations into the area of business fraud and other organized criminal activity.

ACCOMPLISHMENTS: During the latter part of 1975, a squad of investigators was assigned to the Organized Crime Bureau for the purpose of prosecuting persons involved in white-collar crimes and other organized criminal activity. The efforts of this squad in 1976, have resulted in successful prosecutions in areas of crime previously unexplored by local law enforcement. These prosecutions have resulted in indictments on 30 principals involved in organized/economic criminal activity.

- Initiate an innovative approach to law enforcement which fosters a highly cooperative, and thus more effective, relationship between police officers and the citizens of the area they serve.

ACCOMPLISHMENTS: A team policing experiment was implemented in District 8 and involved 50 police officers assigned to perform a full range of police functions for 25,000 inhabitants living in a nine-square mile area.
