INTRODUCTION

The International Halfway House Association is proud to present this seventh edition of its Directory of Residential Treatment Centers, 1977-1978. The Directory should prove an invaluable tool for all agencies and individuals working in the field of rehabilitation services.

In identifying those agencies which merited inclusion in this volume, we were guided by the broad definition of “halfway house,” a structured residential program designed to assist the socially handicapped in gradually re-entering society. Therefore, we have included both “transitional residences” and “therapeutic communities.” At the same time, we have excluded agencies dealing solely with the medically ill and infirm; similarly, we have not included those facilities which are only sheltered workshops or long-term residential care programs.

The International Halfway House Association is a non-profit corporation dedicated to supporting and expanding the concept of community-based residential treatment for the socially handicapped. The Association attempts to meet this goal by sponsoring regional workshops, convening an annual conference, and printing a newsletter, plus other publications. The IHHA’s membership consists of public agencies, private organizations, and concerned individuals who are engaged in various aspects of rehabilitation programing. Members are found in both adult and juvenile programs in the following fields: alcohol abuse, drug abuse, corrections and mental health.

Though larger and more complete than its predecessors, This 1977-1978 IHHA Directory does not contain the descriptions of all the known residential treatment centers. Some listings were received too late for inclusion within this Directory. If the Association can be of further assistance, or if you would like additional information about our activities, please contact:
