Preface

Last year, the first annual *Crime in Ohio* report containing crime statistics and analysis for the State of Ohio was published by this office. Prior to that publication detailed statewide statistics were unpublished regarding the reported occurrence of crime in Ohio; or the efforts by law enforcement officers to preserve peace in our neighborhoods and protect our people. With the publication of that report, the people of Ohio, for the first time, could realistically assess the problems for themselves.

This publication includes data collected from Ohio law enforcement during the second year of operation of the Ohio Uniform Crime Reporting Program. By having these statistics collected on the state level, we are able to provide the FBI with crime information for publication in their national report, and also to provide more detailed information on the state level for publication within Ohio. Through the excellent response to the first *Crime in Ohio*, it was learned that there is considerable interest in and need for this type of information on the state level.

I wish to express my special thanks to the participating sheriff's offices and police departments throughout Ohio. Without their efficient recordkeeping and reporting this publication would not have been possible.

It is with great pleasure, therefore, that I present the following report to the people of Ohio.

William J. Brown Attorney General

Foreward

Crime in Ohio 1977 attempts to present detailed information about crime to law enforcement managers, planners and the public.

The program is entirely dependent on the voluntary submission of data by law enforcement agencies. In 1977, all 88 sheriffs participated and many police departments who previously did not report joined the program.

Many requests for special reports were handled this year and new methodologies were considered and implemented.

This report is not intended to provide solutions on crime in our state. Rather, it attempts to give some insight into the scope of the crime problem using the most accurate data available.

We recognize that not all crime is reported and that not every law enforcement agency participated in the program.

However, without drawing conclusions, the report attempts to put the serious crime situation in our state in some perspective.

> Jack E. McCormick Superintendent Ohio Bureau of Criminal

Jale E. McComo

We wish to thank the Federal Bureau of Investigation, Uniform Crime Reporting Section for assisting Ohio in the state level collection of UCR data.

Our appreciation is extended to the Law Enforcement Assistance Administration for their support in this effort.

Section

The Ohio Uniform Crime Reporting Program

٠		
	-	

History of Uniform Crime Reporting

Although the impetus for collecting nationwide crime information dates back to the 1890's, no ongoing program was initiated until the Committee on Uniform Crime Records of the International Association of Chiefs of Police (IACP) was established in 1927. This Committee's responsibility to provide management information to law enforcement agencies was eventually turned over to the Federal Bureau of Investigation (FBI) in 1930, when the FBI received a Congressional mandate to collect and disseminate national crime information. The IACP has continued to serve the Uniform Crime Reporting Program (UCR) in an advisory capacity, and has been joined in this responsibility by the Committee on Crime Records of the National Sheriffs' Association.

UCR receives crime information through voluntary reports submitted by individual law enforcement agencies across the country. In 1966, the FBI began coordinating UCR data collection through designated state level agencies which report statevide information to the FBI each month. The Ohio Bureau of Criminal Identification and Investigation (BCI) is pleased to administer one of the 43 state level UCR programs.

Objectives of Ohio UCR

Because increasing attention has been focused on the problem of crime in our communities in recent years, many segments of our population need more complete information for a variety of reasons.

Ohio citizens are understandably concerned about the possibility of becoming victims of crime. Law enforcement professionals, managers and administrators who must focus on crime in their own jurisdictions, also need to know what is occurring in surrounding jurisdictions in order to deploy personnel and equipment most efficiently. Legislators need statewide information about crime in order to pass laws that will increase the stability of our society. Researchers and planners need to know what is actually happening to predict trends and recommend changes.

The goal of *Crime In Ohio* is to identify the nature and extent of criminal activity in this state and present the information needed by each of these groups. This information will not in itself prevent crime, but it may encourage all segments of society, by understanding the problem, to work together with law enforcement agencies to reduce crime through more effective enforcement.

The objectives of Crime In Ohio are:

 To identify the nature and extent of crime in our state;

- 2. To provide the management information needed by the law enforcement community to augment their ability to attack the crime problem;
- 3. To provide our citizens with the most complete information available;
- To provide legislators with the information necessary to formulate laws which address the crime problem; and
- 5. To provide sufficiently detailed data for researchers and planners.

Considerations for Interpretation

Statistics are a tool used to summarize information so that patterns or trends become clearer. All statistics must be interpreted with an understanding of just what it is that they can say. Too often information of the type in this report is used incorrectly to draw conclusions that the statistics simply do not support. In order to avoid this error, it is necessary to know what information is included and how it is reported.

To obtain accurate information from many different agencies, the national UCR program had to precisely define the methods for collecting such information as the number of offenses, arrests, clearances and value of stolen or recovered property. The methods of collecting and some resulting limitations are explained below.

Classification of Offenses

UCR divides offenses into two major classifications which are designated Part I and Part II offenses. This distinction is important to keep in mind because different information is collected for each. Part I offenses include 1) Violent Crimes: murder and non-negligent manslaughter, negligent manslaughter, forcible rape, robbery and aggravated assault; and 2) Property Crimes: burglary, larceny (theft) and motor vehicle theft. All other offenses are classified under Part II (see Offense Definitions section, page 10).

Part I offenses, excluding negligent manslaughter, are used to calculate the Crime Index and Crime Rate (see sections entitled Crime Index and Crime Rate).

All offenses are classified on the basis of law enforcement officer investigation in accordance with UCR offense definitions (which will not necessarily be identical to State Code definitions). Because UCR identifies a police problem, offense classifications are not based on the findings of a court, coroner, jury or decision of a prosecutor.

Counting of Offenses

The number of offenses is counted (collected) only for Part I crimes and simple assault. The method of counting varies with the type of crime committed, and it is important to remember that the number of offenders does not determine the number of offenses.

For murder and non-negligent manslaughter, negligent manslaughter, rape, aggravated assault and simple assault, one offense is counted for each victim, regardless of the number of offenders involved.

For robbery and larceny, one offense is counted for each distinct operation which is separate in time and place. The number of victims in any one operation does not determine the number of offenses. For example, if 20 people are robbed in a bar at the same time, only one offense is counted. However, if that robber then leaves the bar and holds up a passerby, a second offense has occurred.

For burglary, one offense is counted for each structure which is illegally entered. However, when the structure is an apartment house, or business or office building in which units are leased for a period of time, one offense is counted for each unit burglarized.

For motor vehicle theft, one offense is counted for each vehicle stolen.

Note: Attempts to commit any of the above are also counted as offenses, except that attempts to kill and assaults to kill are counted as aggravated assault.

For multiple offenses that occur in one crime incident, only the most serious offense is counted. Part I crimes are ranked according to seriousness and appear in order from most serious to least serious under "Classification of Offenses," above. Example: A robber takes a man's wallet and then beats him causing serious injury. Both a robbery and an aggravated assault have occurred, but because robbery is considered by UCR to be more serious, only the robbery is counted. From one perspective, this method of counting seriously understates the crime problem, but from another, it prevents undue inflation of crime statistics.

Note: The number of offenses is not counted for Part II offenses.

Clearances

An offense is considered cleared (solved) when at least one offender is arrested for a crime, even though several may have been involved.

Offenses may also be cleared by exceptional means when the offender: commits suicide; makes a dying declaration; confesses while in custody or serving time for another crime; is prosecuted in another jurisdiction for the same offense; is a juvenile who is handled by notifying the parents; or when the victim refuses to prosecute or another jurisdiction refuses to extradite the offender.

Clearances are counted as "adult" and "juvenile". A "juvenile" clearance is counted only when juveniles are exclusively involved in the clearance of an offense. If the arrest of both adults and juveniles results in a clearance, it is counted as an "adult" clearance.

Note: Not all crimes are cleared within the calendar year in which the offense occurs.

Property Stolen and Recovered

The figures for value of property stolen and recovered report the value at *each* point in time. Although property can increase in value over time, it is more likely that stolen property will be recovered in a damaged condition. Therefore recovery value does *not* necessarily represent a "clearance rate" for stolen property, and one cannot use it to determine aw enforcement effectiveness in recovering stolen goods. Because stolen and recovered property figures indicate thefts and recoveries in the current year, it is important to note that recovered property may have been stolen in a previous year. In addition, the type and value of stolen or recovered property is reported only for Part I offenses and does not include such Part 2 offenses as fraud, forgery or embezzlement.

Arrests

Arrest information is collected for all Part I and Part II offenses according to the age, sex and race of the offender. It is not possible, however, to correlate race with sex or specific ages because the information is collected independently, thus limiting analysis. Furthermore, arrest figures cannot be directly related to the number of crimes cleared because arrest totals count all offenders arrested for each offense, and clearance totals count only the offenses for which an arrest or arrests have occurred.

Reporting Variations

Ohio now receives Uniform Crime Reports from 445 law enforcement agencies. Because the number of reporting agencies is so large, one must be aware that unintentional variations from UCR guidelines may occur that would affect the validity of the data presented here.

Offense totals vary from the actual number of offenses that occur because UCR statistics are based on crimes that are reported to law enforcement agencies and many crimes are not reported.

Information Grouping

The crime statistics reported by an individual agency indicate what is happening in one particular area, but to make rational comparisons among a number of jurisdictions, communities with similar characteristics need to be grouped together. It may be important to know how a city compares with cities of similar size, or how patterns of crime differ in various types of communities. Grouping agencies with similar characteristics allows these determinations to be made. Aside from being merely interesting, such comparative analysis provides the basic information for long-range criminal justice planning.

UCR groups jurisdictions on the basis of population size and community type, both of which are necessary to view a jurisdiction in proper perspective. Grouping by population size considers only the population of the relevant area. It does not consider proximity to a major metropolitan area in spite of the fact that widely different crime patterns could be expected in a city of 20,000 which is a suburb of Cleveland or Cincinnati and one which is in a rural area. Grouping by community type does take into account the urban/rural character of the area, and includes a wider range of populations in each category. For use in interpreting this report, the UCR grouping systems are listed below.

Population Groupings

Cities	
Group	Population
1	Over 250,000
2 .	100,000 to 250,000
3	50,000 to 100,000
4	25,000 to 50,000
5	10,000 to 25,000
6	2,500 to 10,000
7	Under 2,500
Counties	
Group	Population
8	Outside a Standard Metropolitan Statistical Area (SMSA) Inside a Standard Metropolitan
9	Statistical Area (SMSA)

Community Types

Standard Metropolitan Statistical Area (SMSA): A core city and the county within which it is located, plus surrounding counties which are socially and economically integrated with the central county and which are metropolitan in character.

Socially and Economically Integrated: At least 15% of the workers *living* in the *adjacent* county work in the central county or at least 25% of those *working* in the *adjacent* county live in the central county.

Metropolitan Character: At least 75% of the labor force is engaged in nonagricultural work.

Core City:

Any city with a population of 50,000 or more that is within an SMSA.

Suburban City:

Any city that is within an SMSA.

Rural City:

Any city that is outside an SMSA.

Suburban County:

Any county that is within an SMSA.

Rural County:

Any county that is outside an SMSA.

Crime Index

The Crime Index is a basic measure of crime which can be used for comparing the extent of crime among cities, counties and states of similar size. The Index is simply the total number of certain offenses that occur in a given area in one calendar year. These offenses are murder and non-negligent manslaughter, rape, robbery, aggravated assault, burglary, larceny and motor vehicle theft—all of the Part I offenses except negligent manslaughter.

These offenses were selected as indicators of the total amount of criminal activity because they are serious offenses that are the focus of widespread concern; they occur with sufficient frequency to reflect fluctuations in the overall level of criminal activity; they are most likely to be reported, and reported accurately, to law enforcement officers due to their seriousness; and, they are offenses that can be clearly and specifically defined.

Notwithstanding its usefulness, the Index does have limitations. The relationship between the Index offenses and total criminal activity, both reported and unreported, has never been firmly established. The varying severity of offenses is not taken into account, resulting in equal weight being given to a shoplifting and a rape. Furthermore, the actual incidence of crime in a city may not be accurately depicted by the Index if the majority of the city's crime involves non-index offenses such as gambling and narcotics.

Crime Rate

The Crime Rate is based on the Crime Index, but adjusts the Index for variances in population by indicating the number of Index offenses for each 100,000 persons. This means that comparisons may be made among several areas with different populations, or within one area with different populations over a period of time, without the information being biased by population differences¹. For most general comparisons, the Crime Rate is probably the most accurate figure to use.

To calculate the Crime Rate, first divide the population of the area by 100,000, and then divide the Crime Index by that answer. For example, if a city has a population of 273,000 and a Crime Index of 21,257, the calculations would be:

- 1) 273,000 divided by 100,000 = 2.73000
- 2) 21,257 divided by 2.73 = 7,786

Thus, although the city's Crime Index is 21,257, its Crime Rate (the number of crimes for each 100,000 people) is 7,786.

For the same city a crime rate for each of the 7 Index Crimes can be calculated. For example 6,400 robberies were reported in this city of 273,000 population:

- 1) 273,000 divided by 100,000 = 2.73000
- 2) 6,400 divided by 2.73 = 2,344

The robbery crime rate is 2,344 per 100,000 population.

The calculations are the same for a city with fewer than 100,000 inhabitants. A city has 45,000 population and a Crime Index of 1,588:

- 1) 45,000 divided by 100,000 = .45000
- 2) 1,588 divided by .45 = 3,529

The Crime Rate is higher than the Index because it indicates the number of offenses that would have occurred if the city had 100,000 inhabitants.

Offense Definitions

Uniform Crime Reporting, as a nationwide program, receives information from more than 16,000 law enforcement agencies in 50 states. Because titles and descriptions of crimes can vary widely among state codes, it was necessary to ensure that each agency would define offenses the same way. For this reason, UCR established the following standard offense definitions:

Part I Offenses

Criminal Homicide:

a. Murder and Non-negligent Manslaughter:

The willful, non-negligent killing of one person by another. Excludes attempts to kill and assaults to kill (classified as aggravated assault), suicide, accidental death and justifiable homicide²

b. Negligent Manslaughter:

The killing of another person through gross negligence.

Rape:

The carnal knowledge of a female forcibly and against her will. Includes rape by force or threat of force, assault to rape and attempted rape. Excludes statutory rape which is based on the victim's age.

Robbery:

Taking or attempting to take anything of value from a person or persons by force, or threat of force or violence and/or putting the victim in fear. Includes assault to rob, strong-arm robbery and armed robbery.

Aggravated Assault:

An unlawful attack by one person on another for the purpose of inflicting severe bodily injury or death, usually accompanied by the use of a weapon that is likely to produce death or great bodily harm. Includes attempted murder and attempted aggravated assault when a non-personal weapon (not part of the attacker's body) is used, even though there is no injury. Attacks using personal weapons (part of the attacker's body) must result in serious personal injury to be classified as aggravated assault. Excludes simple assault.

Burglary:

The unlawful entry of a structure to commit a felony or a theft. It is not necessary that force be used in the entry or that a loss result from it. Includes attempted forcible entry.

Larceny:

The unlawful taking or stealing of property from the possession of another without the use of force, violence or fraud. Includes attempted larceny. Excludes motor vehicle theft (classified separately because of volume), embezzlement, forgery, worthless checks and other thefts by fraud.

Motor Vehicle Theft:

The unlawful taking of a motor driven vehicle. Includes attempted motor vehicle theft. Excludes the theft of motor boats, construction equipment, airplanes and farming equipment.

Part II Offenses

Other Assaults:

An unlawful attack or attempted attack on another person which does not result in serious injury to the victim and which does not involve the use of a dangerous weapon.

Arson:

The willful or malicious burning of property with or without the intent to defraud. Includes attempted arson.

Forgery and Counterfeiting:

The making, altering, using or possession, with intent to defraud, of anything false which is made to appear true. Includes attempts.

Fraud:

Fraudulent conversion, and obtaining money or property by fraudulent means. Includes confidence games, larceny by bailee and bad checks (except forged or counterfeit checks).

Embezziement:

Misappropriation or misapplication of money or property entrusted to one's care, custody or control.

Stolen Property Offense:

The buying, receiving and possessing of stolen property, or the attempt to do so.

Vandalism:

The willful or malicious destruction, injury, disfigurement or defacement of real or personal property without the consent of the owner or person having custody or control.

Weapons Offense:

All violations of regulations or statutes that control

carrying, using, possessing, furnishing and manufacturing deadly weapons or silencers. Includes attempts.

Prostitution and Commercialized Vice:

Sex offenses and attempted sex offenses of a commercialized nature.

Sex Offenses:

All offenses against common decency and morals. Includes statutory rape and all other sex offenses or attempted sex offenses not previously defined.

Drug Laws:

The unlawful possession, sale, use, growth or manufacture of controlled substances.

Gambling:

Promoting, permitting or engaging in illegal gambling.

Offenses Against the Family and Children:

Nonsupport, neglect, desertion or abuse of family and children.

Driving Under the Influence: Operating any motor vehicle or common carrier while under the influence of liquor or drugs.

Liquor Laws:

Violation of state or local regulatory liquor laws. Includes sale to minors and drinking on a public conveyance. Excludes Driving Under the Influence and Drunkenness.

Drunkenness:

All offenses of intoxication except Driving Under the Influence.

Disorderly Conduct:

Breaching the peace or attempting to do so.

Vagrancy:

Offenses such as begging and loitering (age 18 and over).

All Other Offenses:

All violations of state or local laws except traffic violations and offenses defined above.

Suspicion:

(Not an offense). Arrest for no specific offense and release without formal charges being filed.

Curfew and Loitering Laws:

Juvenile violations of local curfew and loitering ordinances.

Runaway:

The unlawful truancy from a legal place of residence by a juvenile.

Other Definitions

Three terms will be used throughout this publication that should be defined.

Reported Crime:

The number of crimes reported to BCI via the UCR Program. These figures do not represent the total number of crimes that have occurred in Ohio during 1977. The actual crime is higher than the Reported UCR Crime figures because: not all crimes are reported by the victims, not all police departments in Ohio contribute to the voluntary UCR Program and of those agencies that do contribute, seventy-seven did not submit a full twelve months of crime statistics.

Estimated Crime: An effort has been made in this publication to present a picture of what the Crime Rate and number of crimes may have been in 1977. BCI/UCR took statistics from agencies that contributed less than twelve months but more than three and estimated the full twelve months crime statistics for those agencies. These estimates were added to the Reported Crime figures and a total estimate for the State was derived. The state-wide Estimated Crime may be lower than the actual amount of crime in Ohio because of the crimes not reported to law enforcement agencies. Neither could we estimate crimes for agencies that did not contribute to UCR or contributed less than four months.

Reported Value:

The value of items stolen which is reported to BCI via the UCR Program. The value of items stolen is not always reported to UCR, thus the values presented in this publication may be lower than the actual monetary loss in 1977. The reason for this incomplete statistic is the same as for Reported Crime above.

Officers Assaulted and Killed

				,	
				·	
				٢	
				ţ	
		·			

Officers Assaulted and Killed

One officer was killed in the line of duty during 1977 as compared to six officers in 1976. The officer killed was a member of the Lodi Police Department.

Assaults on officers in Ohio during 1977 increased 14.5% from the number reported in 1976. During 1977 the total number of assaults reported was 2,669. Of that group, detailed information on sixty-five assaults was not submitted. (See Table 1). Assaults on officers occurred at a rate of 16 for every 100; forty-two percent of whom sustained injury.

Officers dealing with traffic matters had the highest rate of assault, 29%. This was followed by arrests for offenses other than burglary or robbery, 20%, and disturbance calls, 18%. The weapon most frequently used during the traffic assaults was personal weapons (hands, fists or feet), 93%. Ninty-nine percent of the traffic assaults were cleared by arrest. Firearms and cutting instruments were used against officers in disturbance calls more often than in any other single type of activity. Officers assigned to one-man vehicles sustained the largest number of assaults, 1,392 (53.5%). One-man units without assistance from fellow officers sustained 36% of all assaults; with assistance from another officer, 17%. Officers in two-man vehicles sustained 31% of the assaults.

Personal weapons, such as hands, fists and feet were used in 86% of the assaults and resulted in 86% of all injuries. Cutting instruments were encountered in only 2% of the assaults. Firearms accounted for only 5% of weapons used in assaults.

Fifty-one percent of all assaults occurred between the hours of 10:00 p.m. and 4:00 a.m., the same as in 1976. The lowest number of assaults occurred between 6:00 a.m. and 12:00 p.m., 7%.

Assaults on officers were cleared 94% of the time, down from 96% in 1976. The months of July and September had the largest number of officers assaulted per month. January had the lowest number of assaults.

Section 3

Ohio Index Crime

- #	
•	

Introduction

"Ohio Index Crime" is presented in two parts: 1) an overview of crime in Ohio, and 2) individual reports for murder and non-negligent manslaughter, cape, robbery, aggravated assault, burglary, larceny, motor vehicle theft and stolen property. The overview deals with the Index Offenses in general terms. Individual Index Offense Reports describe each offense in more detail, primarily through the use of charts and graphs. Stolen property is described by Index Offense, average losses for each type of offense and monthly loss by type of item stolen.

The number of Index Offenses reported to law enforcement officers is the basic measure of yearly fluctuations and long-term trends in criminal activity. It is important to note that not all Index Offenses are reported to law enforcement agencies, and no victimization studies are included in UCR statistics. Furthermore, since UCR is a voluntary program, not all law enforcement agencies report crime statistics.

The tables, graphs, and charts in this report refer to the number of Reported Offenses submitted by law enforcement agencies participating in the Ohio UCR Program. Reported Crime Rates presented are based on Ohio law enforcement agencies' statistics reported to UCR for a full twelve months.

Individual agency crime figures presented in Table 24 are the actual figures submitted to BCI/UCR prior to February 28, 1978. Information received after that date could not be included in this publication. Estimated Crime Rates are not presented for individual agencies but are included for population groups, (5 through 7), sheriff's departments and state grand total in Table 24. Estimated figures in this publication may differ slightly from FBI estimates because of a later cut-off date for submitted data and possible differences in estimating methodology.

Ohio Overview

The total Crime Index for Ohio, for the first time since 1972, has decreased from a previous year. The total Crime Index was 483,195 in 1977. Violent crime represented about 9% of all Ohio crime. Property offenses comprised the remainder. Overall, violent crime increased 9% from 1976 and property crime decreased 2.4%. Aggravated assault had the largest increase from 1976, 13.8%. Larceny was the only crime category to drop, 6.6%.

The Estimated Total Crime Rate per 100,000 population for Ohio dropped from 4,948.2 in 1976 to 4,561.7 in 1977. The Reported Crime Rate for different population groups, derived from agencies contributing twelve full months, varied from a reduction of 15% for cities with 100,000 to 250,000 population to an increase of 16% for rural sheriffs. Increased monthly participation by sheriff's departments in the UCR Program during 1977 may explain this increase in crime rate.

There were 337,406 arrests for Part I and Part II crimes during 1977, an increase of 6% over 1976. Adults accounted for 74% of all arrests and juveniles 26%, the same as in 1976. Males of all ages accounted for 83% and females for 17% of arrests. By race, 72% of arrested persons were white, 25% negro and 3% other races.

The age and race arrest groupings, in order of frequency are:

White/18 years and older	51%
White/under 18 years	20%
Black/18 years and older	20%
Black/under 18 years	5%

Males of all ages were arrested in far greater numbers than females, at a ratio of about 5 to 1. Among juveniles, males account for 78% of the arrests and females for 22%. Considering all age groups, the highest number of arrests occurs at age 18 for males and age 16 for females, with the second most arrest-prone age occurring at age 17 for males and 15 for females.

Clearance rates were from 1% to 10% lower for each Index Offense than in 1976, except for motor vehicle theft which did not change. Juvenile arrests cleared 6% of all 1977 offenses, slightly lower than the 6.3% in 1976. Overall, 20% of all Index Offenses were cleared.

Crime Rates by Population Group and County Type

Clearance Rates

Murder:

The willful, non-negligent killing of one person by another, excluding attempts to kill, assaults to kill, suicide, accidental death and justifiable homicide.

Murder in Ohio increased by 7.2% over the number reported in 1976. A total of 821 individuals were murdered during 1977, which represents 2% of all reported violent crime. The largest number of murders reported in one month was eighty-five in December. Cuyahoga County, again this year, had the largest number of murders reported state-wide, (34%), but experienced a 2% decline from 1976. The Estimated Crime Rate for murder increased 4%.

Because murder is such a serious crime, detailed information is collected concerning victims, offenders, weapons used, and the circumstances in which the offense took place. Handguns were used in the majority of killings, 55.9% of the time. Knives or cutting instruments followed as the second most frequent weapon used, 13.2%.

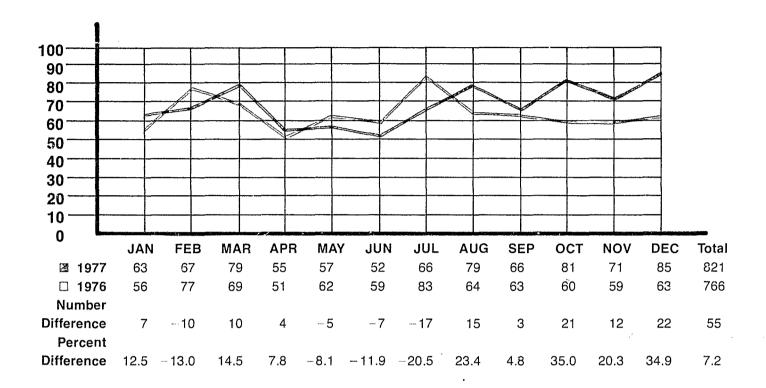

The relationship between the victims and the offenders was unknown in 23% of the murders. Acquaintance was the next most frequent relationship, 20%; and stranger was third, 18%. Arguments led to 38% of the deaths, and in 24% of the cases police were unable to determine the circumstances that caused this crime of violence to occur. The large number of cases where the circumstances were unknown and the victim/offender relationship was also unknown may have contributed to the 12% reduction in murder clearances from 1976. Despite this reduction, murder had the highest clearance rate, 74% of the seven Index Crimes.

Murder victims were eighteen years or older in 90% of the crimes, and the majority, 77% were male. Victims were negro 53% of the time and whites accounted for 46%. Of the offenders, 74% were eighteen and older. Males accounted for 67% of the offenders and 44% were black. Twenty-six percent of the reported 859 offenders were unidentifiable as to age, sex and race.

Murder Clearance Rates: 1976 & 1977

Rape:

The carnal knowledge of a female forcibly and against her will, including rape by force or threat of force, assault to rape and attempted rape, but excluding statutory rape.

Rapes reported in 1976. A total of 2,834 rapes were reported, which represents 7% of all reported violent crime. Forcible rape accounted for 83% (2,343) of all rapes. The largest number of reported forcible rapes for one month was in July, 254, followed by August with 241. The month of November has the largest increase in rapes (70) from 1976.

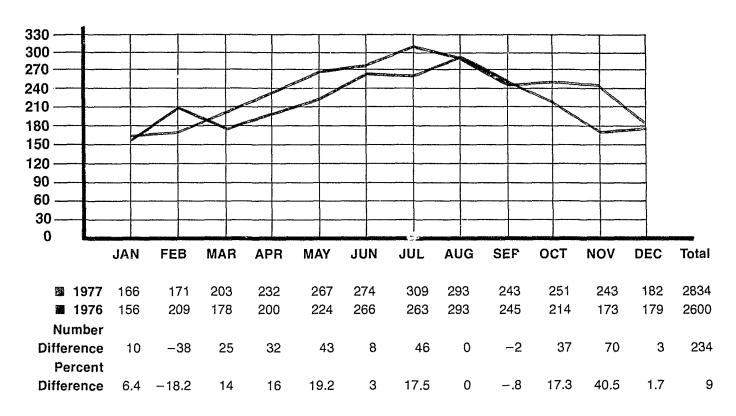

The Reported Crime Rate for rape per 100,000 people in Ohio was 29.0 in 1977, an increase from 25.7 in 1976. Cities with populations under 2,500 had a 40% decrease in their Reported Crime Rate for rape from 9.9 in 1976 to 6 in 1977. The Estimated Crime Rate for rape increased 3%.

Rapes were cleared 55% of the time in 1977, down 4% from 1976. Adults had the largest drup from 52% to 47%. There were only 45 more arrests for rape in 1977 than in 1976. The arrest increase was equally divided between adults and juveniles.

Robbery:

Taking or attempting to take anything of value from a person or persons by force, or threat of force or violence and/or putting the victim in fear, including assault to rob, strong-arm robbery and armed robbery.

During 1977, a total of 20,063 robberies were reported in Ohio. There was a 5% increase (998) over the number of robberies reported during 1976. Robbery represents 48% of violent crime and 4% of all Reported Crime.

Robberies occurring on highways, that is streets, alleys and sidewalks, were the most frequent type of robbery reported and of the different types of robbery locations, had the highest dollar loss (\$2,976,303). As in 1976, banks had the lowest number of reported robberies, but the largest loss per robbery, \$3,638. A Reported Value of \$6.4 million was taken in robberies, up from \$5.5 million in 1976.

December had the largest number of robberies for one month (2,074), followed by November (1,888). These two months were also first and second in the number of robberies last year. During 1977, only January had fewer crimes for the month compared to 1976. All other months had an increase in robberies.

Firearms were used in 47% of all robberies and strong-arm was the weapon used 41% of the time.

The Reported Crime Rate for robbery per 100,000 people increased from 188.2 statewide in 1976, to 209.1 in 1977. The Reported Crime Rate for robbery decreased in the larger cities with populations between 100,000 to 250,000 from 636.6 to 517.0, an increased substantially in the rural cities under 2,500 population from 7.1 in 1976 to 20.5 in 1977. The Estimated Crime Rate rose 2%.

Robberies were cleared in 27% of the cases, a decrease from 1976, when the clearance rate was 31%. Adult arrests accounted for 22% of the clearances and juveniles 5%. January had the largest number of clearances for one month during the year. There were also 321 fewer arrests for robbery in 1977 than in 1976.

Aggravated Assault:

An unlawful attack by one person on another for the purpose of inflicting severe bodily injury or death, usually accompanied by the use of a weapon that is likely to produce death or great bodily harm. Includes attempted murder.

During 1977, there were 61,235 assaults reported in Ohio, 9% more than in 1976. Of the total assaults, 18,494 (30%) were aggravated and 42,741 (70%) were simple. Simple assault is primarily differentiated from aggravated assault by the seriousness of the injury and the weapon used. Aggravated assault increased 14% from 1976 and simple assault increased 7%. Aggravated assault represents 44% of violent crime and 4% of all Reported Crime.

The largest number of aggravated assaults for one month occurred during August, which also had the highest number of firearms assaults for the year. October had the largest increase over the same month last year, 363 more assaults.

Hands, fists and feet were used in 39% of the aggravated assaults and firearms were used in 25%.

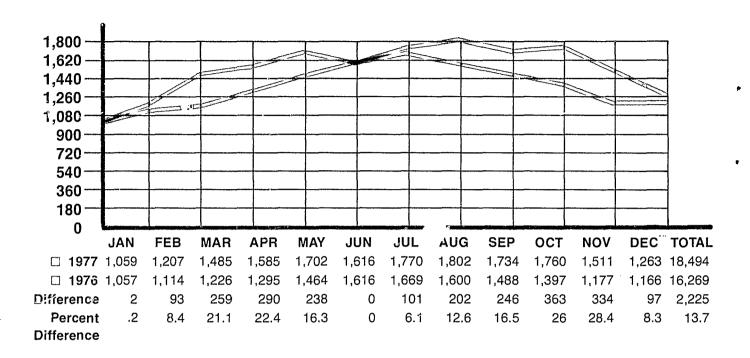

The Reported Crime Rate for aggravated assault increased from 160.4 per 100,000 statewide in 1976 to 184.5 in 1977. The rate dropped slightly in cities over 100,000 population. The Estimated Crime Rate for aggravated assault rose 2%.

For the second year the aggravated assault clearance rate dropped from the previous year, from 65% in 1975 to 64% in 1976, and now 61% in 1977. Adults accounted for 54% of the clearances and juveniles 7%. There were 122 more arrests for assaults during 1977 than 1976.

Burglary:

The unlawful entry of a structure to commit a felony or a theft, with or without forcible entry or loss.

During 1977, there were 125,545 burglaries reported in Ohio, an increase of 5% from 1976. Burglary represented 28% of property crime and 26% of all Reported Crime.

The largest number of burglaries occurred during August in both 1976 and 1977. Forcible entry was used in 79% of the burglaries. Residential burglaries accounted for 66% of all burglaries for which detailed information was submitted. Of those residential burglaries, 43% occurred at night. Sixty-five percent of the non-residential burglaries occurred at night. A Reported Value of forty-six million dollars was lost to burglaries during 1977, up from \$43 million in 1976. The majority of the dollar loss occurred during residential burglaries, \$31 million.

The Reported Crime Rate for burglary per 100,000 people increased from 1182.6 in 1976, to 1274.2 in 1977. The Estimated Crime Rate for burglary decreased 2%.

Burglaries were cleared in 18% of the cases, down slightly from the 19% clearance rate in 1976. Adults accounted for 12% of the clearances and juveniles 6%. There were 458 more persons arrested in 1977 than 1976 for burglary and again in 1977, more juveniles than adults were arrested.

Burglary Clearance Rates: 1976 & 1977

Larceny:

The unlawful taking or stealing of property from the possession of another without the use of force, violence or fraud, including attempted larceny, but excluding motor vehicle theft.

Larceny, as in years past, is the largest component of the seven Index Crimes. In 1977, a total of 274, 047 larcenies were reported. Larceny was the only crime category that decreased from 1976. There were 19,517 fewer larcenies reported in 1977 than in 1976, for a reduction of 7%. Larceny accounted for 62% of property crimes and 57% of all Index Crimes. Detailed information was not submitted for 20,253 larcenies.

The greatest number of larcenies for one month occurred during August. November was the only month which showed an increase in larcenies. All other months had lower figures in 1977 than in 1976. January had a 31% reduction in larceny.

Despite the large drop in larcenies, the Reported Value loss decreased only \$1 million (2%). The value range of dollar loss with the largest number of larcenies was \$50 to \$200 as in 1976. The value range of \$200 plus had the largest reported dollar loss, \$29.5 million, 69% of all larceny loss. Larceny accounted for 23% of all property stolen during the year.

In 1977 as in 1976, theft from motor vehicles and theft of motor vehicle parts accounted for almost half (42%) of all larcenies. In these two categories the months of March, August and October had the highest number of reported thefts. Thefts from buildings followed motor vehicle parts as the next most frequent type of larceny. Pickpocketing and theft from coin operated machines were the least frequent type of larcenies.

The Reported Crime Rate for larceny dropped from 2897.9 per 100,000 population in 1976, to 2,769.3 in 1977. Suburban cities of under 2,500 population had a 25% increase in their larceny crime rate. The Estimated Crime Rate for larceny decreased 13%.

Larceny clearances dropped slightly from 19% to 18% in 1977. Adults accounted for 13% of larceny clearances and juveniles 6%. There were 118 more larceny arrests in 1977 than in 1976.

Larceny Clearances: 1976 & 1977

Motor Vehicle Theft:

The unlawful taking of a motor driven vehicle, excluding motor boats, construction equipment, airplanes and farming equipment.

During 1977, in Ohio there were 41,391 motor vehicle thefts reported, an 8% increase from 1976. Motor vehicle theft accounted for 9% of property crime and 9% of all Index Crimes

October had the largest total of reported vehicle thefts. January had the lowest number of thefts. Of the motor vehicles stolen, 68% (29,371) were recovered. This is a decrease from the 77% recovery rate of 1976. More vehicles were stolen and fewer were recovered in 1977 than in 1976.

Motor vehicle thefts accounted for a reported dollar

loss of \$93,737,220 in 1977. Of that amount, \$58,688,318 was recovered. The recovered amount reflects the value of the vehicle when recovered and may be lower than the value when stolen because of parts missing or damaged.

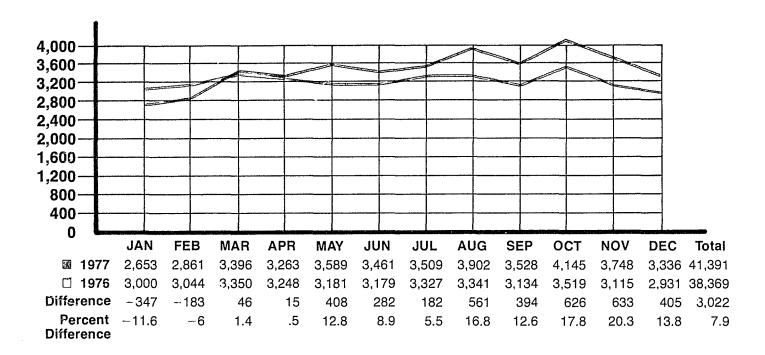

The Reported Crime Rate for motor vehicle theft per 100,000 people rose statewide from 378.8 in 1976 to 422.6 in 1977. The Estimated Crime Rate for motor vehicle theft increased 3%.

Motor vehicle theft clearances remained at 17% in 1977 as in 1976. Adults accounted for 12% of the clearances and juveniles 5%. A total of 394 more people were arrested for motor vehicle theft in 1977 than in 1976. Again in 1977, the number of juveniles arrested exceeded the adults.

Reported Value of Property Stolen and Recovered

Property valued at \$188 million was reported stolen in 1977. The reported property recovered was valued at \$69 million. Motor vehicle thefts had the greatest dollar value of property stolen, 49.7%, followed by miscellaneous items at 20.6%. Livestock had the lowest percent of total value stolen at .1%.

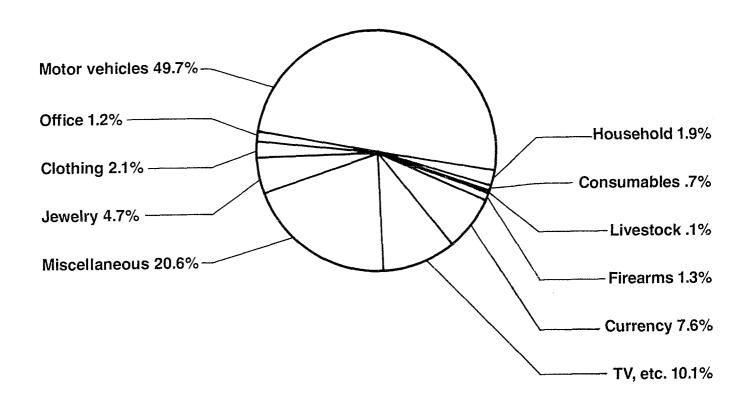

The Reported Value of property stolen was highest in

October and lowest in January. The highest month for motor vehicle loss was also October.

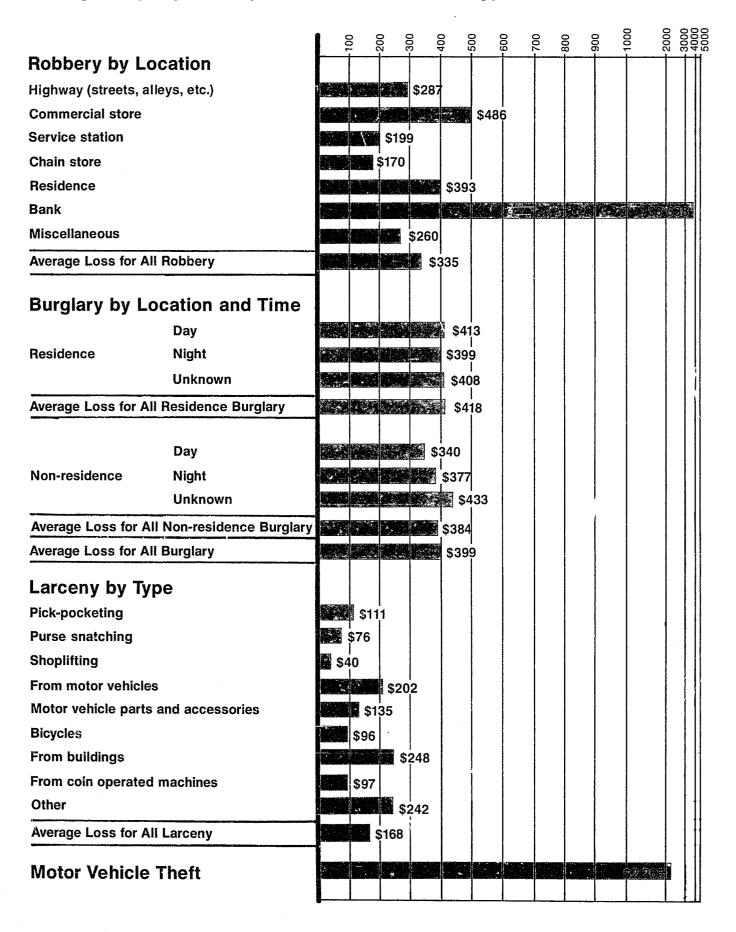

Reported total losses by Crime Index were: robbery, \$6.4 million; burglary, \$46.2 million; larceny, \$42.7 million; and motor vehicle theft, \$93.7 million.

Recovered property values indicate the value of the property at the time it is recovered whether it is damaged or in its original condition. From the figures available, there is no way to determine the original value of stolen property which has been cleared by recovery.

Section 4

Tables

Table 17 Ohio Estimated Crime Index: 1966-778

Since the Ohio Uniform Crime Reporting (UCR) Program is a voluntary program, not every law enforcement agency in Ohio participates. Of those who do participate, seventy-seven agencies did not contribute a complete year's data. For this reason (see Estimated Crime, page 12) BCI/UCR cannot present a 100% accurate figure for the total number of crimes that oc-

curred in Ohio. The figures below are an estimate by BCI/UCR of the total crime in Ohio. These Estimated Crime Rate totals are calculated by estimating the crime rate for those agencies reporting less than twelve months and adding that estimate to the actual figures submitted by full contributors.

Year	Population		Total Crime Index	Violent ³ Crime	Property⁴ Crime
1966	10,305,000	Number Crime Rate	216,186 2,097.9	15,536 150.8	200,650 1,947.1
1967	10,458,000	Number Crime Rate	263,372 2,518.4	19,344 185.0	244,028 2,333.4
1968	10,591,000	Number Crime Rate	294,529 2,780.9	21,228 200.4	273,301 2,580.5
1969	10,740,000	Number Crime Rate	336,614 3,134.2	26,648 248.1	309,966 2,886.1
1970	10,652,017	Number Crime Rate	380,744 3,574.4	30,279 284.3	350,465 3,290.1
1971	10,778,000	Number Crime Rate	395,142 3,666.2	32,159 298.4	362,983 3,367.8
1972	10,783,000	Number Crime Rate	370,870 3,439.4	32,286 299.4	338,584 3,140.0
1973	10,731,000	Number Crime Rate	375,140 3,495.9	31,304 291.7	343,836 3,204.1
1974	10,737.000	Number Crime Rate	453,471 4,223.4	39,094 364.1	414,377 3,859.3
1975	10,759,000	Number Crime Rate	528,745 4,914.4	43,901 408.0	484,884 4,506.4
1976	10,690,000	Number Crime Rate	528,962 4,948.2	41,553 388.7	487,409 4,559.5
1977	10,701,000	Number Crime Rate	488,143 4,561.7	42,570 397.8	445,573 4,163.8

Footnotes

- 1. Factors other than population that also influence crime rates include level of economic activity and unemployment; the cultural, religious, racial and age mix of the population; the time of day, day of the week, or the season of the year; local standards and enforcement policies; proximity to a metropolitan area; and, transience of the population, among others.
- 2. Justifiable homicide is the killing of a person by a law enforcement officer in the line of duty or the killing of a person in the act of committing a felony by a private person.
- 3. Violent crime includes offenses of murder, rape, robbery and aggravated assault.
- 4. Property crime includes offenses of burglary, larceny-theft, and motor vehicle theft.
- 5. Based on statistics from agencies contributing for twelve full months.
- 6. Commercial: commercial establishments with the exception of gas stations, chain stores and banks, but including drug stores, theatres, grocery stores and finance companies.
- 7. The Stolen/Recovered portion of this table contains supplementary information which is not always reported.
- 8. Sources for 1966-1976 information; Crime in the U.S., 1976, Federal Bureau of Investigation, Washington, D.C. The number of offenses are estimated for 100% of the population.
- 9. 1977 figures are based on preliminary estimates.
- 10. Population figures provided by FBI/UCR.
- 11. Based on total population of county and total statistics from all contributors in county, some of which may not have submitted for a full twelve months. See Table 24 for individual agency figures.
