STATE OF MAINE DEPARTMENT OF PUBLIC SAFETY 36 HOSPITA' STREET AUGUSTA, MAINE 04330

March 28, 1980

The Honorable Joseph E. Brennan Governor, State of Maine Augusta, Maine 04333

Dear Governor Brennan:

In accordance with Title 25, \$1543 of the Maine Revised Statutes, the Department of Fublic Safety respectfully submits its fifth annual report on Crime in Maine.

Information contained herein is based on statistics submitted to this department on a monthly basis by law enforcement agencies within the State of Maine for the year 1979.

Comparable statistical data from certain prior years is also presented so that viable trend data can be portrayed.

This report has been prepared to provide reliable and comprehensive data to the criminal justice community. The graphic and statistical representation of the various crime trends and factors should prove to be of invaluable assistance to law enforcement personnel, planners and legislators.

Effective application of this knowledge has greatly assisted in the efforts to combat and hopefully reduce criminal activity throughout the State of Maine.

As in the past, we extend our sincere gratitude to the many professional police administrators whose excellent reporting efforts make this publication possible.

Sincerely,

Arthur A. Stille

NCJRS

Arthur A. Stilphen Commissioner

007 24 669

ACCUSSIONS

FOREWORD

The State Police is pleased to participate in, and act as the coordinating agency for the "Crime in Maine, 1979" annual publication.

It is a significant publication for the extensive crime information it contains, but even more significant is the spirit of cooperation among all law enforcement agencies that make this book possible.

One hundred percent reporting by all law enforcement agencies to the Uniform Crime Reporting system since its inception in 1974 clearly emphasizes this united effort.

We look forward to the continued expansion of this cooperative effort in many other areas of mutual law enforcement concerns. With this attitude, we can continue to improve law enforcement in Maine and better protect the citizens of this State.

1

COLONEL ALLAN H. WEEKS Chief Maine State Police

CRIME IN MAINE - HIGHLIGHTS

During the year 1979, the crime clock average in Maine showed the following: × ONE MURDER EVERY 114 PAYS ONE RAPE EVERY 67 HOURS, 23 MINUTER, 5 SECONDS × ONE ROBBERY EVERY 25 HOURS, 37 MINUTES, 54 SECONDS * ONE AGGRAVATED ASSAULT EVERY 5 HOURS, 11 MINUTES, 63 MAC NOT × ONE BURGLARY EVERY 41 MINUTES, 57 SECONDS × ONE LARCENY THEFT EVERY 17 MINUTES, 43 SECONDS ONE MOTOR VEHICLE THEFT EVERY 3 HOURS, 22 MINUTES, 51 SECONDS × × ONE VIOLENT CRIME EVERY 4 HOURS ONE PROPERTY CRIME EVERY 11 MINUTES, 44 SECONDS ONE INDEX CRIME EVERY 11 MINUTES, 12 SECONDS INDEX OFFENSES: THERE WERE 46,967 INDEX OFFENSES REPORTED DURING THE YEAR 1979 - AN INCREASE OF 1,883 OFFENSES OVER 1978. (SEE PAGE 9) × CRIME RATE: THE CRIME RATE IS BASED ON THE OCCURRANCE OF AN INDEX OFFENSE PER 1,000 INHABITANTS OF THE STATE. IN 1979 THE CRIME RATE WAS 42.50. -THERATE FOR 1978 was 41.68. (SEE PAGE 9) VIOLENT CRIME: IN TOTAL, VIOLENT CRIMES DECREASED BY 3.2%. MURDER INCREASED BY ONE OFFENSE; RAPE BY 7.4%; WHILE ROBBERY DICREASED BY 4.2% AND AGGRAVATED ASSAULT DECREASED BY 3.9%. (SEE PAGE 14) IN TOTAL, PROPERTY CRIMES INCREASED BY 1,956 PROPERTY CRIME: OFFENSES - REPRESENTING A 4.6% INCREASE OVER 1978. LARCENY-THEFT WAS THE ONLY PROPERTY CRIME REFLECTING AN INCREASE. MOTOR VEHICLE THEFT AND BURGLARY BOTH DECREASED FROM 1978. (SEE PAGE 16) * MURDER THE CRIME OF MURDER REMAINED ESSENTIALLY THE SAME AS IN PREVIOUS YEARS - 31 OFFENSES REPORTED IN 1979 AS COMPARED TO 30 IN 1978. (SEE PAGE 20) × RAPE THE CRIME OF RAPE INCREASED DURING 1979 BY NINE MORE OFFENSES THAN 1978 - 130 OVER 121. SEE PAGE 24)

* ROKRERY:

ROBBERY DUOWED A PECLINE FOR THE SECOND STRAIGHT YEAR. THERE WERE FAA KOBBNEJED IN 1979: 359 IN 1978: 419 ID 1977. (SEE PAGE 26)

AGGRAVATED ASSAILLT:

THE OFFENSE OF AGGRAVATED ASSAULT DECREASED BY 3.9% IN 1979. THIC MARKS THE SECOND YEAR THAT THIS OFFENSE HAS SHOWN A DECLINE. (SEE PAGE 30)

* BURGLARY:

THE CRIME OF BURGLARY CONTINUED TO DECREASE IN 1979. SINCE 1975 BURGLARIES HAVE DECREASED BY 1,915 - OR 13.3%. (SEE PAGE 34)

LARCHNY:

4

THE CRIME OF LARCENY CONTINUES TO BE A RAPIDLY INCREASING OFFENSE IN THE STATE OF MAINE. IN 1979 THERE WERE 29,658 OFFENSES REPORTED AS COMPARED TO 26,533 IN 1978. LARCENY HAS INCREASED BY 6,662 OFFENSES (29%) SINCE 1975. (SEE PAGE 38)

* MOTOR VEHICLE THEFT:

MOTOR VEHICLE THEFT OFFENSES DECREASED DURING 1979 - FROM 2,763 OFFENSES IN 1978 TO 2,591 OFFENSES IN 1979. (SEE PAGE 42)

STOLEN/RECOVERED PROPERTY:

DURING 1979 POLICE REPORTED \$15,042,639 IN STOLEN PROPERTY – \$730,411 MORE THAN IN 1978. POLICE RECOVERED 46.4% OF STOLEN PROPERTY DURING THE YEAR. (SEE PAGE 45)

CLEARANCE RATE:

POLICE CLEARED 25.4% OF ALL INDEX CRIMES DURING 1979. (SEE PACE 51)

* ARREST DATA:

ARRESTS FOR THE VIOLATION OF LIQUOR LAWS, AND MORE SPECIFICALLY WITHIN THE 18 AND 19 YEAR OLD AGE GROUPS, CONTINUED TO INCREASE AT AN ALARMING RATE. IN 1977 THERE WERE 344 ARRESTS FOR THIS VIOLATION COMPARED TO 963 IN 1978. IN 1979 ARRESTS IN THIS CATEGORY INCREASED TO 1,482. THIS REPRESENTS AN INCREASE OF 331% OVER THE THREE YEAR PERIOD.

CREDITS

The Maine Uniform Crime Reporting Division, Department of Public Safety, wishes to acknowledge and express their appreciation to Gary Sawyer, Director of the Maine Criminal Justice Data Center for the generous and cooperative assistance throughout the year and in the preparation of this annual report. Special thanks to Data Center associate Richard Gribbin for the excellent graphics and his dedication to improving this publication.

The Maine Criminal Justice Planning and Assistance Agency, under the Director Richard E. Perkins, provided generous assistance through its Data Processing Unit.

MESSAGE FROM THE STAFF

Early in 1979, the UCR collection format was modified to include Arson data as an Index offense. This important change was mandated to the F.B.I. by the U.S. Congress and was subsequently merged into the individual State UCR systems. Previous Arson data known to law enforcement agencies covering the period between January 1, 1979 and April 30, 1979, was requested from all contributors and was absorbed into the reporting system. Computer programming is currently being amended to include Arson statistics in future printouts and publications. Additional refinements will undoubtedly be required throughout the current year. The UCR staff will continue to expand and improve on both data collection and its dissemination.

We encourage constructive criticism, suggestions, inquiry, and the continued assistance of our contributors and related criminal justice agencies.

The staff members at the present time are as follows:

Robert E. Wagner, Jr., Director, SBI-UCR Richard C. Rideout, Supervisor Priscilla L. Martin, Clerk/Verifier

Any information or assistance needed may be obtained by calling 289-2025.

INTRODUCTION

The Maine Uniform Crime Reporting Program was the initial step in the establishment of an efficient state-wide Criminal Justice Information System. This phase of the CJIS deals primarily with a state-wide uniform method of collecting crime statistics and producing a consolidated annual report of crime in Maine.

Maine statistics are forwarded to the Federal Bureau of Investigation for inclusion in the National Crime Report.

NATIONAL UNIFORM CRIME REPORTING SYSTEM

Uniform Crime Reports were first collected in 1930 after being developed by a Committee of the International Association of Chiefs of Police. The Federal Bureau of Investigation was authorized by the Congress to act as a clearinghouse for the collection of crime statistics.

Today the IACP continues to serve in an advisory capacity to the FBI in the operation of the program.

Crime statistics, voluntarily submitted by individual law enforcement agencies from all fifty states, are presented annually in the FBI's Uniform Crime Reports Publication entitled "Crime in the United States". 1.61

As a result of several national studies and recommendations and a determined need, the FBI has been actively assisting individual states in the development of state-wide programs of law enforcement statistics compatible with the National Uniform Crime Reporting Program. With excellent cooperation and assistance from the FBI, Maine has developed its own state-wide program for collection of law enforcement statistics.

PROGRAM DEVELOPMENT

The Maine UCR Program started July 15, 1973 as a module of the Comprehensive Data System Program. It was originally funded by LEAA Discretionary Grant No. 74-DF-01-0001 to the Maine Criminal Justice Planning and Assistance Agency with the State Bureau of Identification, Bureau of State Police, as the implementing subgrantee.

One year was spent researching and developing the reporting system. The staff was selected; the project researched; a manual was designed and printed; 250 people were trained in regional seminars; standard arrest sheets and complaint sheets were developed; all reporting forms were designed; and printed; staff visits to all operational departments were made; and all objectives of the original grant were completed.

On July 1, 1974, the Maine UCR system was certified as operational by Director Clarence Kelly of the FBI and Maine became the 22nd state to have a Uniform Crime Reporting System. Forty-six states have Uniform Crime Reporting systems today and the remaining four are in the development stages.

The success of this program is directly related to the intense interest and cooperation of the Maine contributors. Indicative of the cooperation, is a 100 percent reporting record for all communities over 2,500 population, and the organized departments under 2,500 filing through the county sheriff's departments, who are reporting 100 percent, and the State Police by county areas. The result is a complete state-wide coverage of crime statistics under supervised rules and controls to insure the integrity of the program.

"Crime in Maine July-December, 1974" was our first publication. This year we are publishing our fifth calendar year report and it is far improved over the initial publication. All publications were well received and the accumulated information becomes more valuable each year.

It becomes obvious that more use could be made of the UCR data for the benefit of the contributors. This resulted in a complete reprogramming of the UCR data to provide monthly computer printout crime profiles as a by-product to the gathering of the UCR data. More information on the crime profiles, with sample printouts, is included in a further section of this publication.

The staff of UCR, teaming up with the Criminal Justice Data Analysis Center, hopes to expand the uses of UCR data and continue to serve as a valuable tool in identifying and combating crime in Maine.

Indications are that the maximum potential of this program will not be reached for several years. Better reporting, an expanded data base, improved systems and faster feedback to contributors etc., will provide the type of information needed in Maine. The data will have endless uses in planning, administration, research, problem identification and solving, and special studies.

OBJECTIVES OF UNIFORM CRIME REPORTING

The fundamental objective of the Uniform Crime Reporting Program is to produce a reliable set of criminal statistics on a State and National basis for use in law enforcement administration, operation and management. This compiled data is also intended for the use of other professionals and scholars who have an interest in the crime problem. At the same time, this information is important as a reference source for the general public as an indicator of the crime factor in our society.

The objectives of the Maine Uniform Crime Reporting program are:

- 1. Inform the governor, legislature, other governmental officials, and the public as to the nature of the crime problem in Maine its magnitude and its trends.
- 2. Provide law enforcement administrators with criminal statistics for administrative and operational use.
- 3. Determine who commits crimes by age, sex and race in order to find the proper focus for crime prevention and enforcement.
- 4. Provide proper base data and statistics to measure the workload and effectiveness of Maine's Criminal Justice System.
- 5. Provide base data and statistics for research to improve the efficiency, effectiveness and performance of criminal justice agencies.
- 6. Provide base data and statistics to measure the effects of prevention and deterrence programs.
- 7. Provide base data to assist in the assessment of social and other causes of crime for the development of theories of criminal behavior.

The means utilized to obtain these objectives are:

- To measure the extent, fluctuation, distribution, and nature of serious crime in the State of Maine through presentation of data on the seven Crime Index offenses.
- 2. To measure the total volume of serious crime known to the police.
- 3. To show the activity and coverage of law enforcement agencies through arrest counts, disposition of persons charged and police employee strength data.

The offenses of murder, forcible rape, robbery, aggravated assault, burglary, larceny-theft, and motor vehicle theft are used to establish an index in the Uniform Crime Reporting Program. They measure the trend and distribution of crime in the United States and, more significantly, within the geographic regions of contributing states such as Maine. These crimes are counted by law enforcement agencies as they become known and are reported on a monthly basis. The crime index offenses were selected as a measuring device because, as a group, they represent the most common local crime problems. They are all serious crimes, either by their very nature or due to the volume and frequency in which they occur.

The offenses of murder, forcible rape, aggravated assault and robbery make up the violent crime category. The offenses of burglary, larceny-theft and motor vehicle theft make up the property crime category.

Although "offense known" statistics are gathered in the classifications of manslaughter by negligence (lb) and simple assault (4e), they are not computed into the crime index for purposes of establishing crime trends.

Classification in all Part I offenses is based solely on police investigation as opposed to the determination of a court, medical examiner, coroner, jury or other judicial body.

The total number of criminal acts that occur is unknown, but those that are reported to the police provide the first means of a count. Not all crimes come readily to the attention of the police; not all crimes are of sufficient importance to be significant in an index; and not all important crimes occur with enough regularity to be meaningful in an index. With these considerations in mind, and with all state and national reporting jurisdictions using uniform reporting procedures, the above crimes were selected as a group to furnish an abbreviated and convenient measure of the crime problem.

The crime counts used in the Crime Index and set forth in this publication are based on actual offenses established and determined by police investigation. When a law enforcement agency receives a complaint of a criminal matter and the follow-up investigation discloses no crime occurred it is "unfounded". These "unfounded" complaints are eliminated from the actual crime counts.

CRIME RATES

The computation of crime rates as they appear in this report are based on 1979 population estimates submitted by the communities involved. Total County and State populations are based on estimates supplied by the State Planning Office. Rural populations are arrived at by deleting the community population within their respective counties. All population estimates are approved by the Federal Bureau of Investigation through the cooperation and assistance of the United States Bureau of Census.

Monthly and annual Uniform Crime Reports currently received from approximately 150 municipal, county and state law enforcement agencies in Maine represent 100 percent of the estimated Maine population.

The crime rate involves the number of Index Crimes per unit of population, usually per 100,000 persons. Because Maine has such a low population total, a rate per 1,000 persons has been used to reflect a more realistic volume. No attempt has been made to incorporate either transient population or other factors which contribute to the ratio and type of crime in a given area. Any effort to make comparisons of crime rates between one area and another should recognize these population changes and varying environmental factors.

The Crime Index rate for Maine for the year 1979 was 42.50 offenses per 1,000 persons. Violent crimes occured at a rate of 1.98 offenses per 1,000 persons, while the rate for property crimes was 40.52 offenses per 1,000 persons.

VIOLENT CRIMES

A

1

Π

X

1.00

14

Crimes of violence involve the element of personal confrontation between the perpetrator and victim and entails the use or threat of violence. By their very nature, violent crimes - murder, rape, robbery, and aggravated assault, are considered more serious than property crimes. The total number indicates only the number of incidents reported to police and does not reflect the number of criminals who committed them or the number of injuries inflicted.

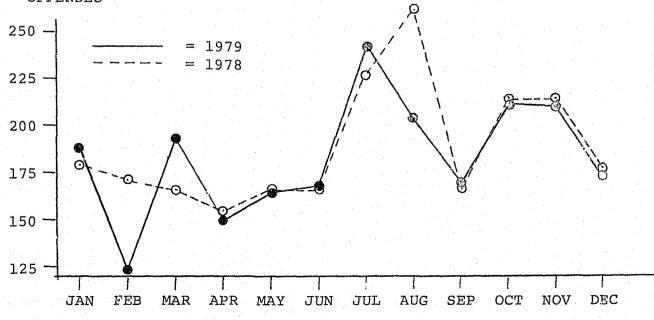

During the year 1979, violent evimes continued to show a slight decline in total compared to the previous year, 1978. Reported violent crimes totaled 2,190 in 1979 as compared to 3,263 in 1978 - a decrease of some 73 offenses, or, a reduction of 3.2%. Foreible rape and murder were the only violent crimes that increased. Murder increased by one offense over 1978 (31 compared to 30) and foreible rape increased by nine offenses (130 compared to 121) for a +7.4% change.

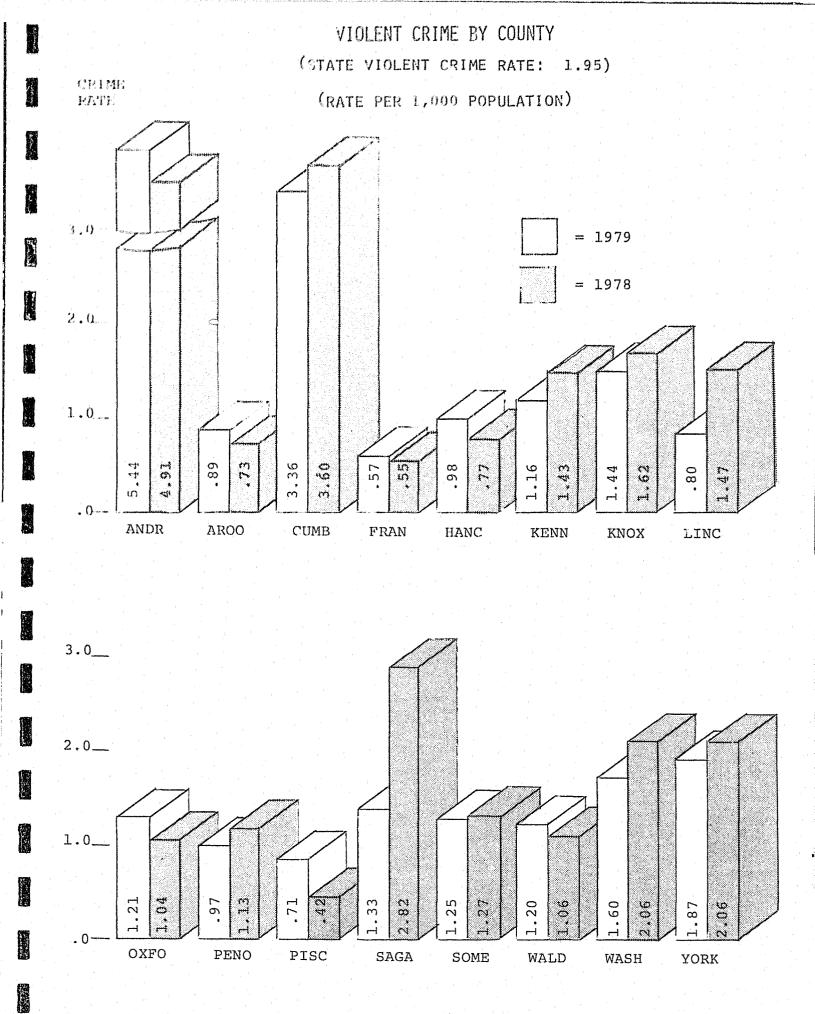

The crime rate for violent crimes is 1.98 per 1,000 population. The clearance rate for violent crimes for 1979 is 70.8%.

PROPERTY CRIMES

3

Π

10.0

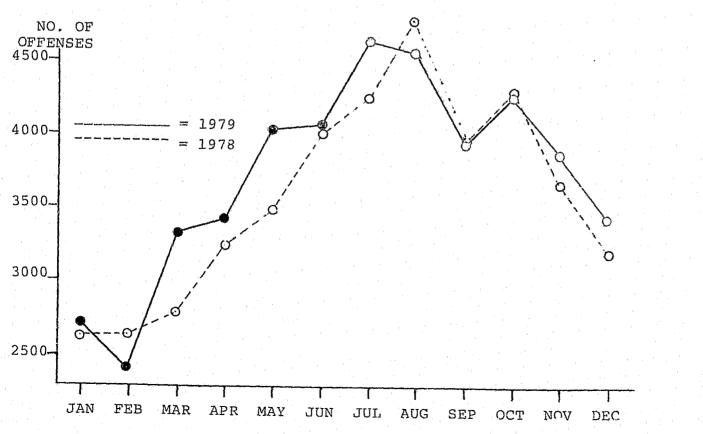

Property crimes include burglary, larceny, and motor vehicle theft. These crimes do not involve the threat of violence but entail property taken from one by another.

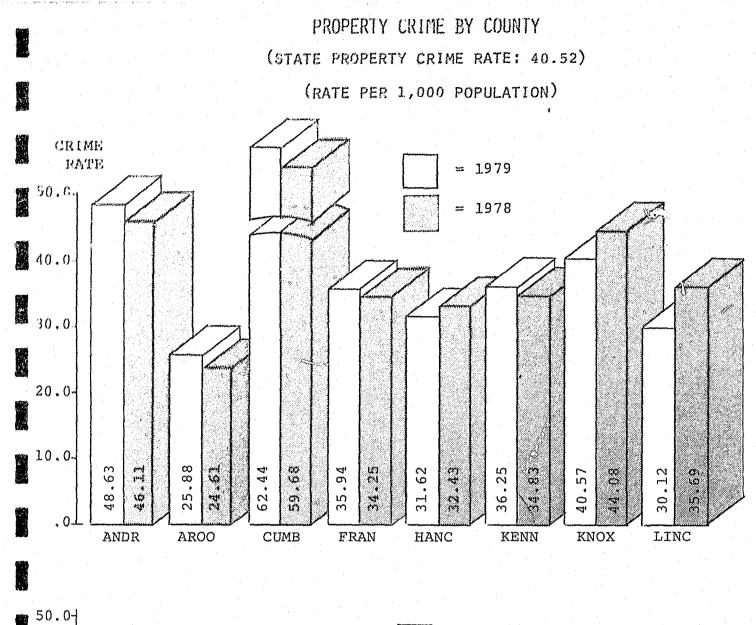

During 1979 property enimos increased by 4.8% open the presented year. There were 44,777 property animas reported in 1979 concerns of 42,821 in 1978. Individual analysis of these offenses, here were except an encouraging trend. The only offense showing an increase one increase theft - up 11.77% from last year; all other property crimes indicated decreases.

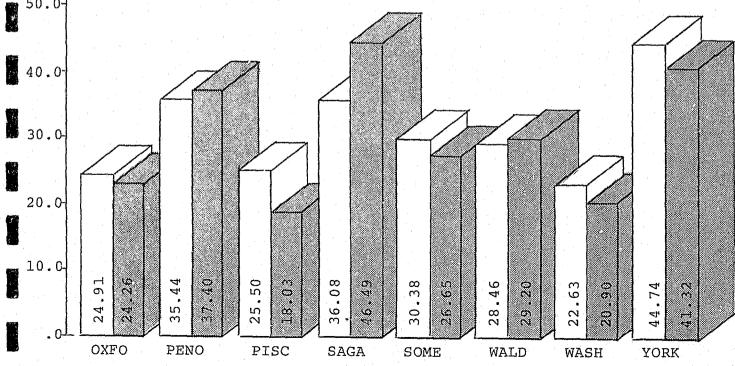

Law enforcement agencies eleared 26.2% of all property erimen to 1979.

MURDER AND NON-NEGLIGENT MANSLAUGHTER CRIME CLOCK - 1 MURDER EVERY 11¹/₂ DAYS

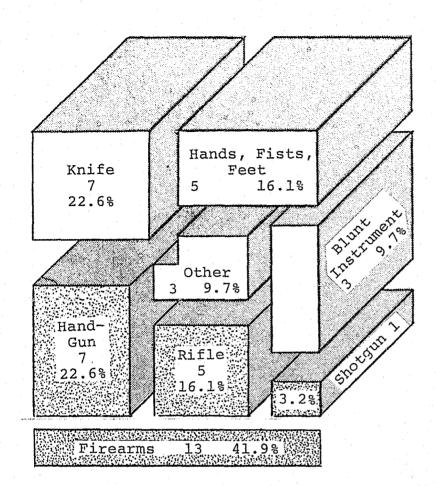

The definition of murder and non-negligent manslaughter is "the unlawful killing of a human being with malice aforethought". This offense is recorded by a police agency on the basis of investigation alone, without regard to the findings of a court or the decision of a prosecutor. Although, manslaughter by negligence is recorded on the "Offenses known to Police" form along with murder and non-negligent manslaughter, it is not considered an Index Crime and is not discussed in this report.

There were 31 murders committed during 1979 - an increase of one over the preceding year. Thirty-two total homicides were reported by law enforcement agencies. One of these reported homicides, however, was termed as a justifiable killing (determined as self defense or the killing of a felon by a police officer or private citizen) and is not included in the actual homicide category. Seven homicides were committed by handgun; 5 by rifle and 1 by shotgun. Seven of the reported murders were committed by knife.

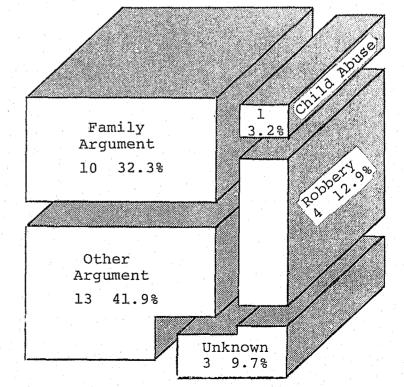

Law enforcement agencies cleared 25 homicide cases during the year for an 80.6% clearance rate.

FORCIBLE RAPE

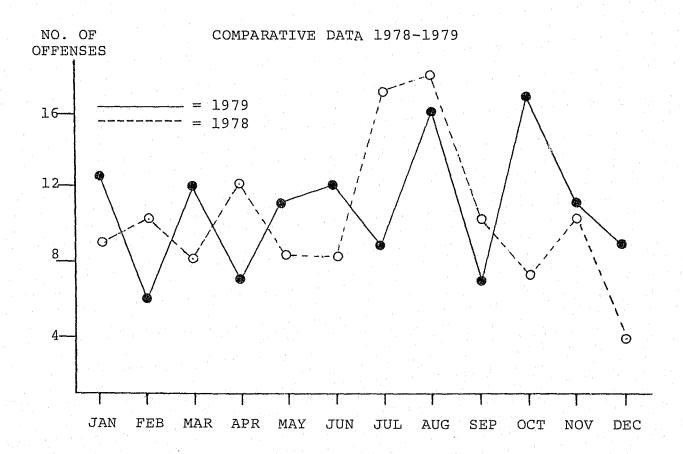

CRIME CLOCK - 1 RAPE EVERY 67 HOURS, 23 MINUTES, 5 SECONDS

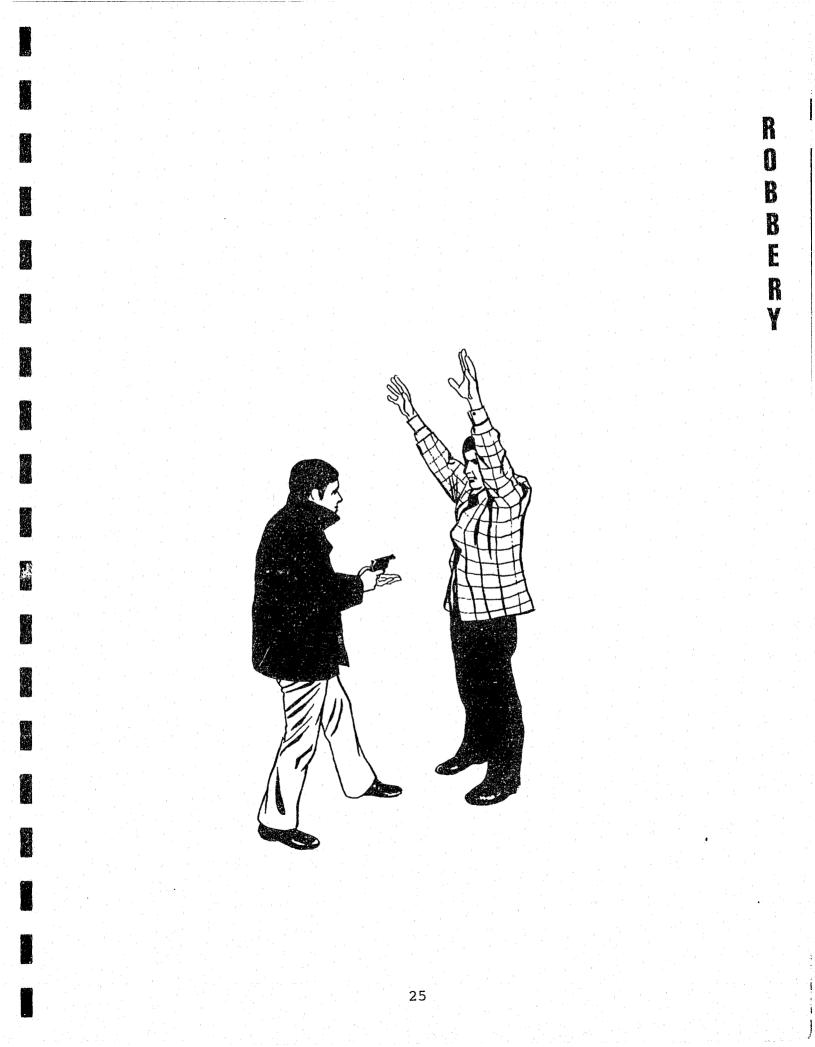

Forcible rape is "the carnal knowledge of a female forcibly and against her will". For purposes of the Uniform Crime Report this offense is divided into two categories: Rape by Force; and Attempted Forcible Rape. Carnal abuse without force (statutory rape) and other sex offenses are not included.

Forcible rape differs from other violent crimes in that the victim, in many cases, is reluctant to report the offense to police. The investigation by police, medical examination, court procedure, embarrassment and fear of any accompanying stigma have a deterrent effect on the victim's willingness to make the offense known to police.

The offense of forcible rape increased 7.4% from 1978 to 1979. Law enforcement agencies reported 130 offenses in 1979 compared to 121 similar offenses in 1978. This offense has fluctuated over the past several years and has not established any significant trend or pattern. In 1975 police reported 113 forcible rapes or attempted rapes, this figure dropped to 106 in 1976 and then increased to 147 in 1977. Of the 130 crimes reported in 1979, 104 were classified as "rape by force" and 26 were classified as "attempts to commit forcible rape".

Law enforcement agencies cleared 99 offenses of forcible rape - or attempt - for a 76.2% clearance rate.

ROBBERY

CRIME CLOCK - 1 ROBBERY EVERY 25 HRS., 27 MINS., 54 SECS.

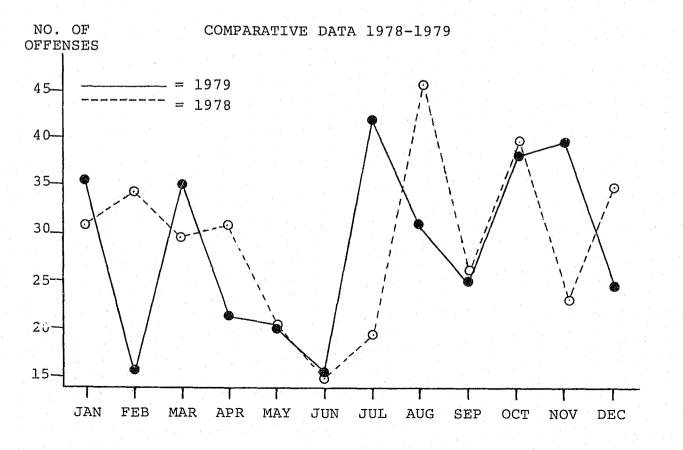

Robbery is "the felonious and forcible taking of the property of another against his will, by violence or by putting him in fear". All attempts to rob are included in the Uniform Crime Report. Robberies and attempts are reported in four categories: (1) gun (any firearm); (2) knife or cutting instrument; (3) other dangerous weapons; and (4) strong arm (hands, fists, feet, etc.).

The offense of robbery decreased for the second year in a row. Law enforcement agencies reported 344 offenses in 1979. In 1978, 359 such offenses were reported. This decrease of 15 offenses reflects a 4.2% change.

The value of property stolen during robbery remained somewhat similar to the previous year. In 1979 \$194,513 was stolen as a result of robbery crimes. In 1978 this value was \$201,342. Bank robberies accounted for 7 reported offenses for a \$33,407 loss.

The offense classification of "robbery from streets or highways" continued to be the highest with 172 of the 344 robbery offenses committed from these areas - or, 50%. Forty robberies were committed at residences and represented 11.6% of all robberies.

Police cleared 146 robbery crimes for a 42.4% clearance rate.

ASSAULT

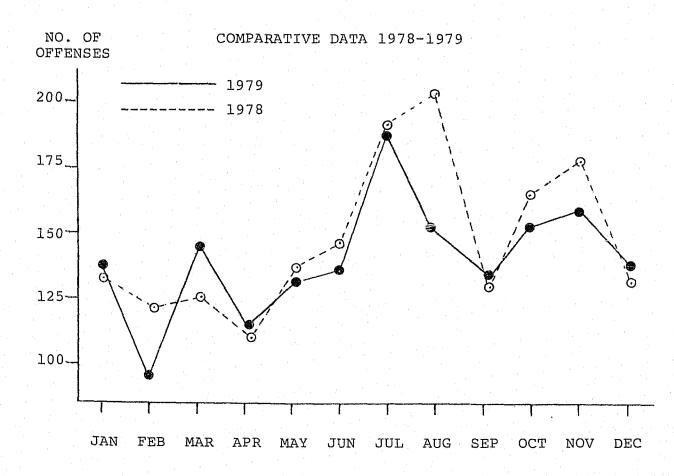

CRIME CLOCK - 1 AGGRAVATED ASSAULT EVERY 5 HOURS, 11 MINS., 56 SECS.

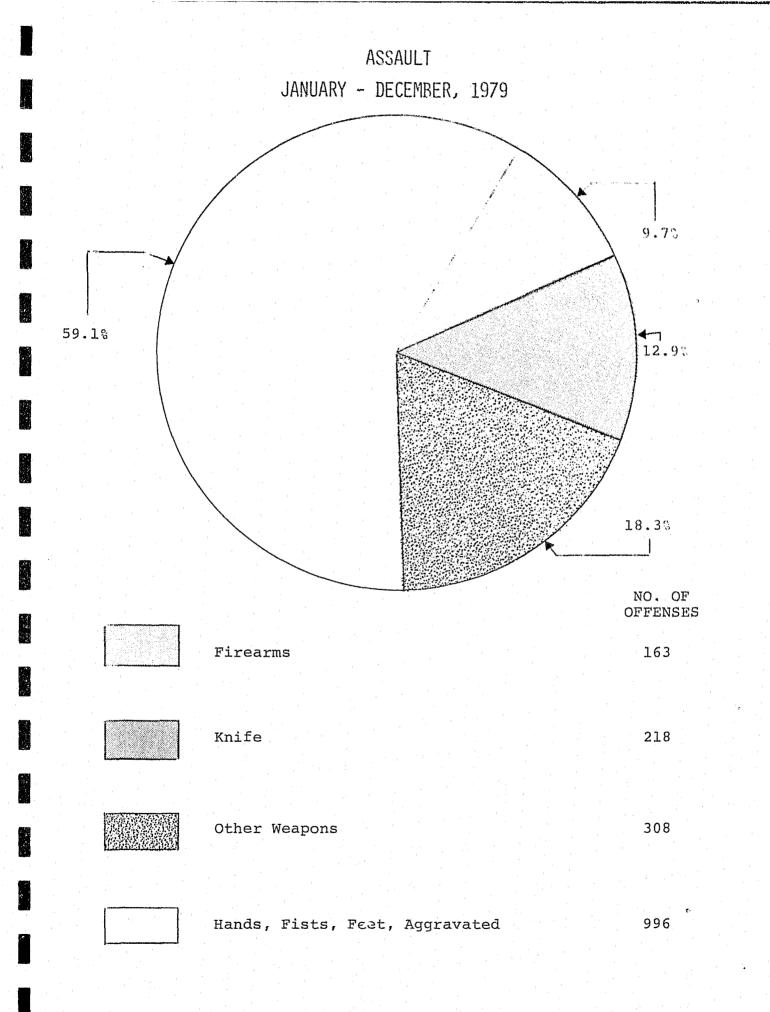

An assault is "an attempt or offer, with unlawful force or violence, to do physical injury to another". Assaults with the intent to rob or rape are not included here. For Uniform Crime Reporting, this offense is divided into four categories: (1) gun (any firearm); (2) knife or cutting instrument; (3) other dangerous weapons; and (4) hands, fists, feet, etc. (causing aggravated injury). Also recorded, but not considered an Index Crime is the category "other assaults - simple", which is nonaggravated.

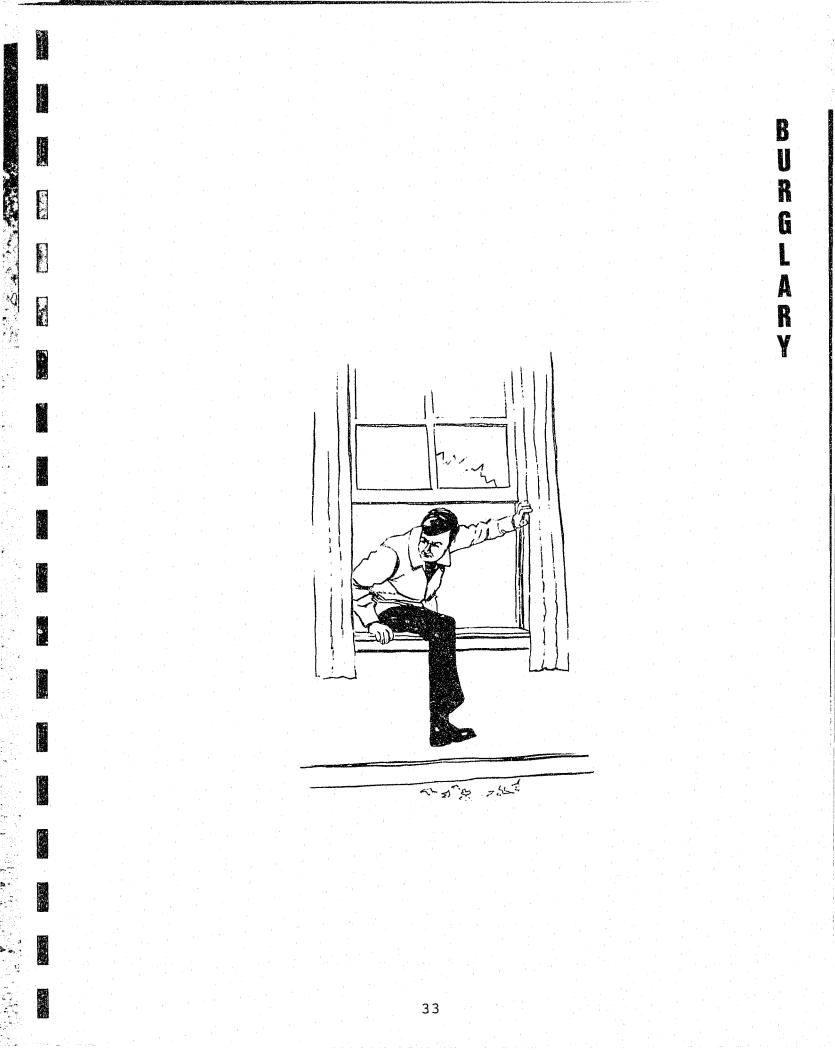

In 1979, there were 1,685 aggravated assaults reported; a decrease of 3.9%, or 68 fewer offenses than in 1978. Hands, fists, or feet accounted for the majority of assaults with 996 incidents. Firearms were used in 163 assaults; knife or cutting instrument with 218 reported offenses, and "other weapons" with 308 offenses accounted for the balance of the aggravated assaults.

Police cleared 76.0% of all aggravated assaults.

There were 3,540 simple assaults (non-aggravated) reported in 1973 - compared to 3,542 in 1978.

BURGLARY

CRIME CLOCK - 1 BURGLARY EVERY 41 MINUTES, 57 SECONDS

Burglary, also known as breaking and entering, is "the unlawful entry or attempted forcible entry of any structure to commit a felony or larceny". Data collection for this offense in Uniform Crime Reporting is recorded in three categories: (1) forcible entry; (2) unlawful entry - no force; and (3) attempted forcible entry.

The offense of burglary maintained a steady downward trent in 1979 over previous years.

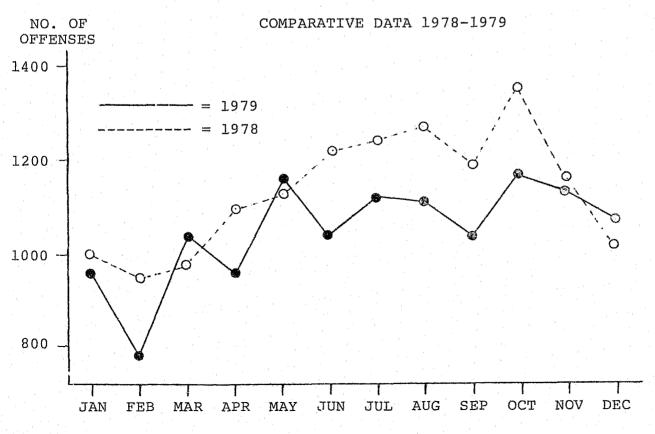

Law enforcement agencies reported 12,528 burglary offenses in 1979. This figure compares significantly when compared with the previous data from 1975 (14,443 offenses) 1976 14,047 offenses). This decrease of 1,915 burglaries indicates a decrease of 18.8% over the five year period.

It is notable that the period of heaviest burglary activity has been reported during the month of October for the past three years.

Burglary represented a property loss of \$4,122,933 during 1979. This dollar loss is approximately \$100,000 greater than in 1978. Sixty-four percent of all reported burglaries occurred from residential properties.

.

Law enforcement agencies cleared 21.9% of burglaries.

LARCENY - THEFT

.....

2

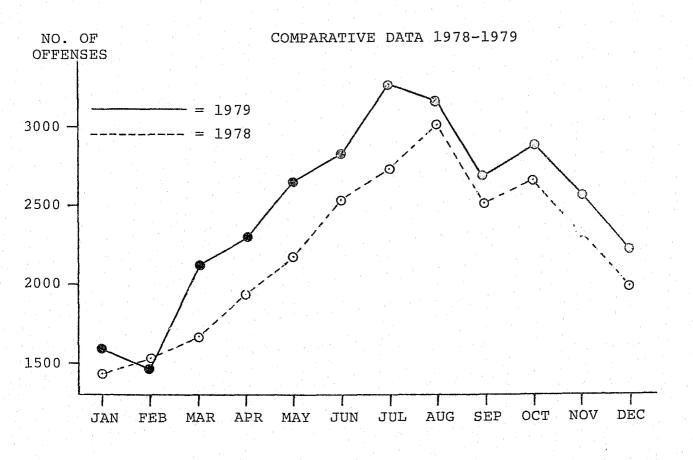

CRIME CLOCK - 1 LARCENY EVERY 17 MINUTES, 43 SECONDS

Larceny-theft is "the unlawful taking of the property of another with the intent to deprive him of ownership". Motor vehicle thefts are excluded from this offense classification. A supplementary report form breaks out several categories: (1) pocket-picking; (2) pursesnatching; (3) shoplifting; (4) from motor vehicles; (5) motor vehicle parts and accessories; (6) bicycles; (7) from buildings; (8) from coin-operated machines; and (9) all other. Larcenies are also categorized by dollar value: (1) under \$50; (2) \$50 to \$200; and (3) \$200 and over.

Larcenies increased dramatically during 1979 from the prior year. Police reported 29,658 offenses in 1979 - an increase of 11.8% over the 26,533 reported offenses of 1978 and an increase of 29% over the 22,996 reported larceny crimes in 1975.

Shoplifting, thefts from autos, theft of auto parts and accessories and bicycles recorded the most dramatic trends over the time period 1975-1979. Shoplifting increased 62.6% - theft from autos, 14.7%; auto parts and accessories - 33.2%; bicycle thefts increased 47.6% during this period and amounted to a monetary property loss of \$390,266 in 1979 alone.

Larceny crimes reach their peak during the months of July and August. Police cleared 22.3% of larceny crimes during 1979.

NATURE OF LARCENY

MOTOR VEHICLE THEFT

Π

1.33

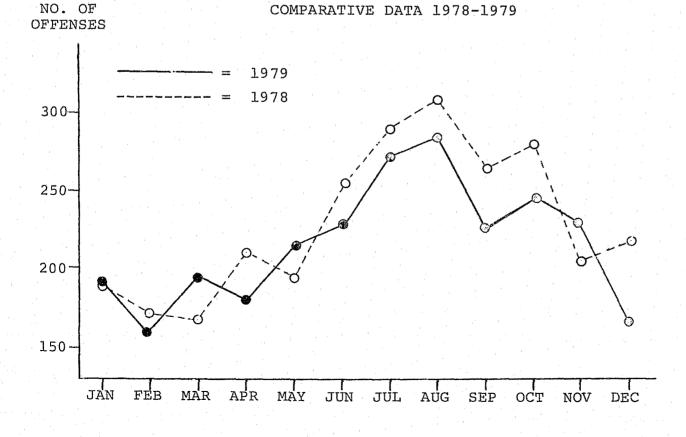

CRIME CLOCK - 1 MOTOR VEHICLE THEFT EVERY 3 HRS., 22 MINS., 51 SECS.

Motor vehicle theft is simply "the larceny or attempted larceny of a motor vehicle"; included here is "joy riding". Excluded from this offense for Uniform Crime Reporting is a reported offense where there is lawful access to the vehicle, such as a family situation, or unauthorized use by others with lawful access, such as with employees. The type of vehicle is classified as: (1) automobile; (2) trucks and buses; and (3) other vehicles.

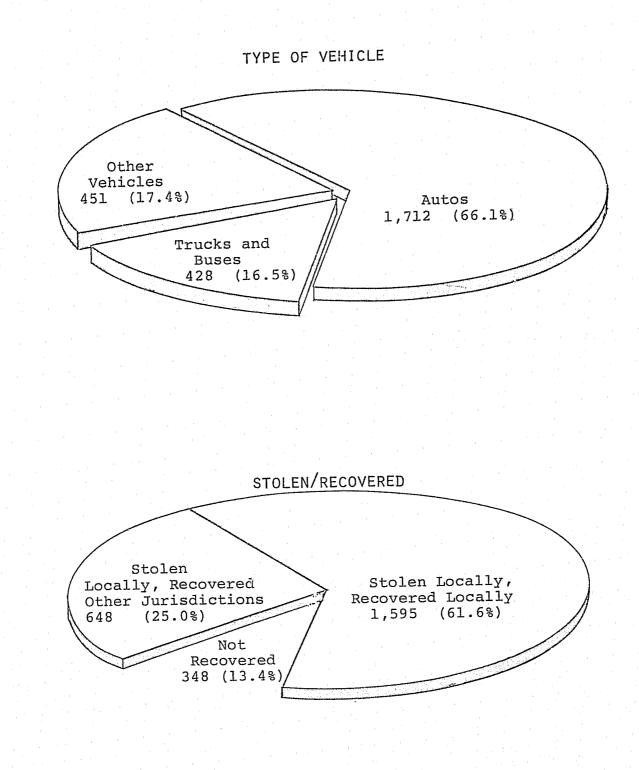

Motor vehicle thefts decreased 6.2% in 1979 - from 2,76% offenses in 1978 to 3,591 offenses in 1979.

Alarming increases in this erime category since 1975 (2,385) as noted by UCR statistics resulted in a selected enforcement effort by police. This special effort resulted in a crime reduction in 1979.

The value of stolen vehicles in 1979 was \$6,216,880. Police recovered 2,243 stolen motor vehicles - or 87.6% and cleared 1,035 of the reported crimes resulting in a 39.9% clearance rate. This was a 5% clearance improvement over the 1978 clearance rate of 34.9%.

MOTOR VEHICLE THEFT

STOLEN AND RECOVERED PROPERTY VALUES

Supplementary reports relating to properties stolen and recovered provide information on the estimated value of such properties. The investigating officer has the obligation to assess the value of property stolen and recovered in each crime index offense. The officer is guided by the following instructions:

- (1) Use fair market value for items subject to depreciation.
- (2) Use wholesale cost of goods stolen from retail establishments.
- (3) Use victim's evaluation of nondepreciable items.
- (4) Use cost of replacement to victims for new or almost new items.

During the year 1979, property valued in excess of \$15 million was stolen during the commission of index crimes. This amount does not include damage to property or loss due to vandalism or malicious mischief. During this same period, law enforcement officers recovered more than \$6.9 million for a recovery rate of 46.4%. Property recovery on a national level was 32.2% in 1978 - the latest national comparison figures available.

A breakdown by type of property follows:

TYPE OF PROPERTY	STOLEN		RECOVERED	PERCENT RECOVERED
Currency, Notes, Etc.	\$1,242,564		\$ 237,631	19.1
Jewelry & Precious Metals	729,506		106,043	14.5

CLEARANCE RATES

For Uniform Crime Reporting purposes, a Crime Index Offense is cleared when a law enforcement agency has identified the offender, there is enough evidence to charge him and he is actually taken into custody. The arrest of one person can clear several crimes, or several persons may be arrested in the process of clearing one crime.

Crime solutions are also recorded in exceptional cricumstances when some element beyond law enforcement control precludes formal charges against the offender. An offense may be exceptionally cleared when it falls into one of the following categories:

- 1. The offender commits suicide.
- 2. A double murder occurs (two persons kill each other).
- 3. The offender dies after making a confession (dying declaration).
- 4. The offender is killed by law enforcement officers.
- 5. The offender confesses to committing the crime while already in custody for another crime or serving a sentence.
- 6. The offender is prosecuted in another city for a different crime by federal, state or local authorities, or for the same offense, and the other jurisdiction refuses to release the offender.
- 7. Another jurisdiction refuses to extradite the offender.
- 8. The victim of a crime refuses to cooperate in the prosecution.
- 9. The offender is prosecuted for a less serious charge than the one for which he was arrested.
- 10. The offender is a juvenile who is handled by a verbal or written notice to the parents in instances involving minor offenses such as petit or simple larceny.

For the year 1979, 25.4% of all Index Crimes were cleared either by arrest or exceptional means. The percentage of violent crimes cleared was 70.8% while the clearance rate for property crimes was 23.2%.

CLEARANCE RATES OF INDEX OFFENSES JANUARY - DECEMBER, 1979

OFFENSES	NUMBER OF OFFENSES	NUMBER OF OFFENSES CLEARED	PERCENT CLEARED
MURDER	31	25	80.6
RAPE	130	99	76.2
ROBBERY	344	146	42.4
AGGRAVATED ASSAULT	1,685	1,281	76.0
BURGLARY	12,528	2,739	21.9
LARCENY	29,658	6,619	22.3
MOTOR VEHICLE THEFT	2,591	1,035	39.9
TOTAL	46,967	11,944	25.4

NOTE:

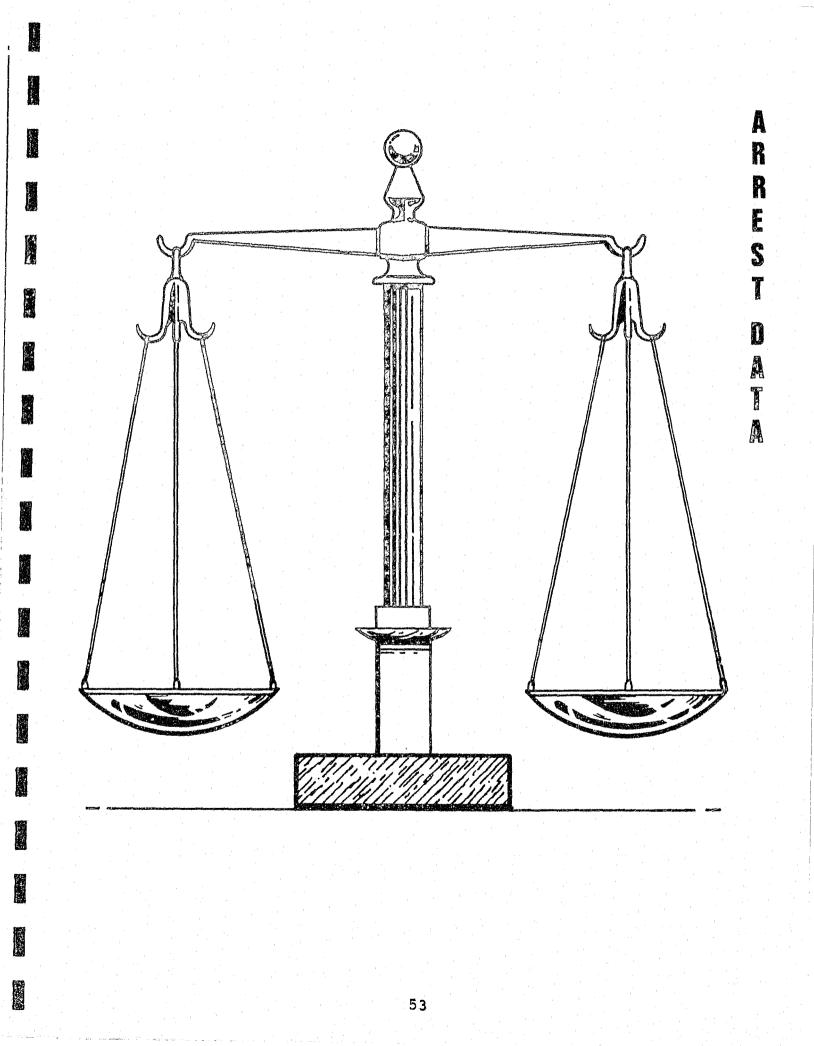

*

Offenses cleared do not necessarily relate to the actual offenses during the January - December period.

ANALYSIS OF OFFENSES CLEARED BY AGE

	18 and Over	ONLY UNDER 18*
Murder	96.0%	4.0%
Rape	86.9%	13.1%
Robbery	75.3%	24.7%
Aggravated Assault	85.8%	14.28
Burglary	62.6%	37.4%
Larceny	62.0%	38.0%
Motor Vehicle Theft	74.1%	25.9%
TOTAL	66.2%	33.8%

If a clearance involves both a juvenile and adult, it is cleared on the adult side only.

ARREST DATA

In addition to the monthly reports on the number of Index Crimes reported, law enforcement agencies also submit monthly forms detailing the number of persons arrested. These forms categorize the arrests by offense classification (both Part I and Part II crimes), and by age, race and sex. No traffic offenses, except driving under the influence, are included. The same individual may be arrested several times over a period of time; each separate arrest is counted. A person may be arrested on several charges at one time; only one arrest is counted and is listed under the most serious charge. For Uniform Crime Reporting, a juvenile is counted as "arrested" when the circumstances are such that if he or she were an adult, an arrest would result; in fact, there may not have been a formal charge.

Nearly one third (29.6%) of all arrests in 1979 were juveniles. Of the 12,377 arrests of juveniles, 41.6% were for index offenses. This is the same percentage as 1978. The report form on juvenile arrests used by the police agency, includes a section on the disposition of each person. These categories are: (1) handled within the department and released; (2) referred to juvenile court or a probation and parcle officer; (3) referred to a welfare agency; (4) referred to other police agency; and (5) referred to the criminal or adult court. During 1979, 46.5% of all juvenile violators were handled within the police agencies and released without charges to their parents or guardians; 49.2% were referred to juvenile court or probation department; and a total of 4.3% were either referred to a welfare agency, another police agency or criminal or adult court.

A review of adults arrested (18 years of age and over) reveals that 18.1% were for index offenses. More than one half (55.9%)of adults arrested were under 25 years of age; and 24.6% were between 25 and 34 inclusive.

Considering both juveniles and adults, 86.3% of the 41,381 persons arrested were under 35 years of age. More than one fourth of all arrests were for index offenses.

ARKESTS - DRUG AND LIQUOR VIOLATIONS

Due to the nature of the violations and a high interest and concern by public officials and the citizens of Maine generally, a special review is provided of drug and alcohol related arrests. The charts displayed reveal the number and age of people arrested during 1979.

The information provided here should be of interest to social agencies involved in the study of drugs and alcohol problems in Maine. The information pinpoints the predominant drug and liquor arrests in Maine by age and identifies possible problem areas.

Facts revealed by the chart on drug violations:

80.0% of all juvenile drug arrests involved possession violations, while 20.0% were for sale or manufacturing of drugs.

85.3% of all adult drug arrests involved possession violations, while 14.7% were for sale or manufacturing of drugs.

Facts revealed by the chart on liquor violations:

- * 82.4% of all arrests involving juveniles were for violation of liquor laws, while 17.6% were for driving under the influence of liquor.
- * 78.7% of all arrests involving adults were for driving under the influence of liquor, while 21.3% were for violations of liquor laws.

POLICE EMPLOYMENT DATA

The Uniform Crime Reporting System in Maine incroporates a collection of important data relating to police within the state. Information, such as ratio of police to population, assaults on officers, and related analyses are covered in this section.

On October 31, 1979 there were 1,252 full time municipal law enforcement officers in communities with organized police departments. This represents 1.69 officers per 1,000 population.

In Maine's 16 Sheriff's Departments there were 341 full time law enforcement officers. The Maine State Police, with state-wide jurisdiction, and providing all phases of law enforcement services, employs 307 full time sworn officers. The number of full time law enforcement officers per 1,000 population ratio for rural areas, those areas not covered by full time municipal police, is 1.77.

5

1. S

1.1

State-wide, there were 1,900 full time sworn law enforcement officers. The total complement of officers represents a rate of 1.72 officers per 1,000 population. Nationally, the rate per 1,000 population is 2.5.

Caution should be exercised in using rates for comparative purposes since a wide variety of factors dictate the number of employees necessary to various law enforcement agencies. The same conditions and factors that affect the amount and type of crime in a given community also must be considered in the employment of personnel. Employee numbers are best determined by citizens and public officials of a community based upon the level of service they need and are willing to pay for.

ASSAULTS ON LAW ENFORCEMENT OFFICERS

The following information is based on a detailed monthly collection of data in the Uniform Crime Reporting System regarding the problem of assaults on municipal, county and state law enforcement officers. The large number of reported assaults on law enforcement officers is partially due to a prevalent attitude of disrespect for law enforcement in certain elements of our society.

There were 338 assaults on law enforcement officers during the year 1979. This represents an assault ratio of 17.8 assaults per 100 full time law enforcement officers. This indicates a reduction of 82 actual assaults from the 420 reported in 1978, or a 19.67 decrease. In 1976 the number of assaults on police officers numbered 608 in the State of Maine. In 1977 the begislature imposed stiffer penalties to those persons convicted of assault on police officers. It is felt that this deterrent affect had a measurable impact on the reduction of this offense during the last two years.

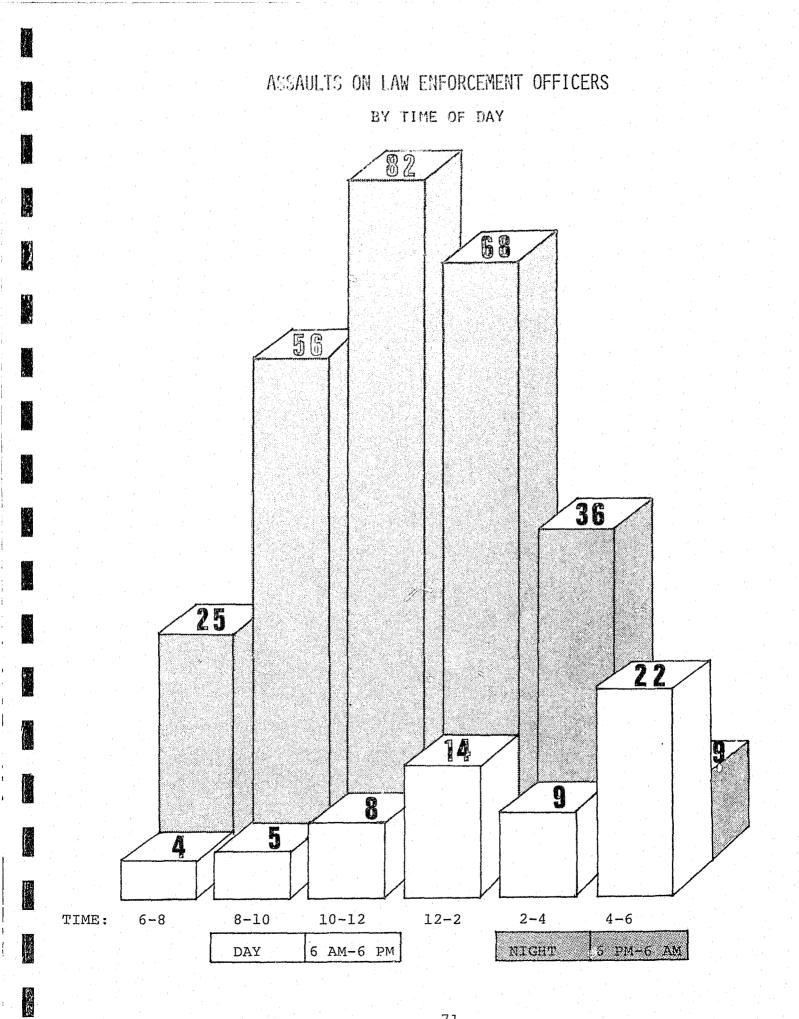

The greatest number of assaults, 32.2% occurred while officient were responding to disturbance calls (family quarrels, person with weapon, etc.). Attempting other arrests accounted for 17.5% of all assaults on officers; traffic pursuits and stops, 10.4%; handling and transporting prisoners, 10.7% and "all other" situations, 10.8%.

Personal weapons, (hands, fists, or feet) were used in 88.2% of all assaults while 2.7% were committed by firearm; 3.8% by knife or cutting instrument and 5.3% were committed by other dangerous weapons.

33.4 percent of all assaults on officers resulted in personal injury to the officer that resulted in either lost time or need of medical attention. Police cleared 99.4% of all reported assaults on officers.

CRIME FACTORS

100

Statistics gathered under the Uniform Crime Reporting Program are submitted by the law enforcement agencies of Maine and represent a spectrum of Maine crime on state-wide, region, and county levels. Awareness of the presence of certain crime factors, which may influence the resulting volume and type of statistics presented, is necessary if fair and equitable conclusions are to be drawn. These crime influencing factors are present, to some degree, in every community and their presence affects, in varying degrees the crime developments of that community. Comparison of crime figures between communities should not be made without first considering the individual factors present in each community.

Crime, as an outgrowth of society, remains a social problem of grave concern and the police are limited in their role to it's suppression and detection. As stated by the President's Commission on Law Enforcement and Administration of Criminal Justice in their report "The Challenge of Crime in a Free Society" (1967 - pg. 92).

"But the fact that the police deal daily with crime does not mean that they have unlimited power to prevent it, or reduce it, or deter it. The police did not create and cannot resolve the social conditions that stimulate crime. They did not start and cannot stop the convulsive social changes that are taking place in America. They do not enact the laws that they are required to enforce, nor do they dispose of the criminals they arrest. The police are only one part of the criminal justice system; the criminal justice system is only one part of the government; and the government is only one part of society. Insofar as crime is a social phenomenon, crime prevention is the responsibility of every part of society. The criminal process is limited to case by case operations, one criminal or one crime at a time."

Set forth below are some of the conditions which will, by type and volume, affect the crime that occurs from place to place:

Density and size of the community population and the metropolitan area of which it is a part.

Composition of the population with reference particularly to age, sex and race.

72

Economic status of the population.

Relative stability of population, including commuters, seasonal, and other transient types.

Climate, including seasonal weather conditions.

Educational, recreational, and religious characteristics.

Standards governing appointments to the police force.

Policies of the prosecuting officials and the courts.

Attitude of the public toward law enforcement problems.

The administrative and investigative efficiency of the local law enforcement agency, including the degree of adherence to crime reporting standards.

The main goal of this program is to identify crime and related problems. The statistics in this publication should not be used to measure or evaluate the workloads and results of the individual contributing departments. While most police agencies are collectively thought of as crime fighting units, considerable independent research shows only a small portion of the workload of many departments is spent fighting crime. Because of other assigned duties, the peculiar cycle of crime and clearances, and the different community factors that normally affect crime statistics, no conclusions on individual departments should be reached without consulting their in-house duties and records.

Crime rates in this publication are based on the stable population of the community. Seasonal population figures are too inaccurate and fluctuating to be used as a measurement for determining crime rates. Communities with extra high seasonal populations may show a higher crime rate per thousand than might be normal for a community their size.

This does not impair the police administrator of the community from using this standard measure for planning and administrative purposes as data is available to him on a monthly basis and months of population influx can be taken into consideration.

PROFILE OF THE STATE OF MAINE

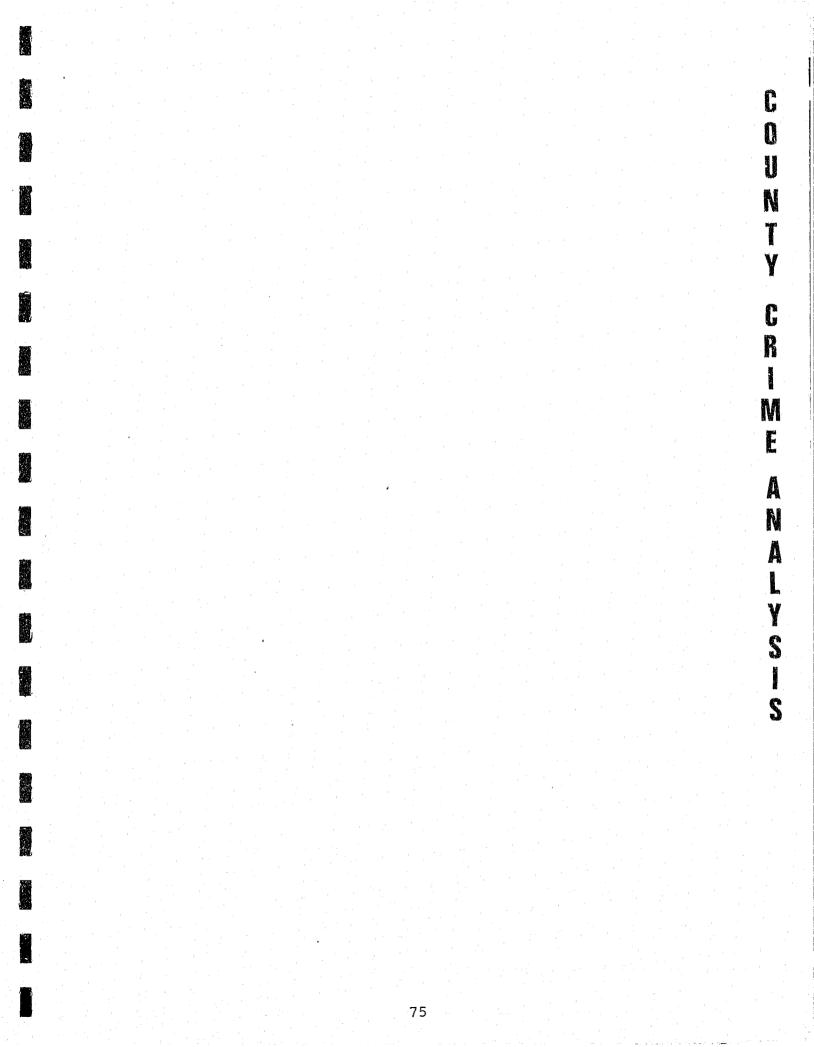

This profile is presented to provide some general knowledge and facts about the State of Maine. It is hoped that this information might assist in understanding the environment in which the reported crime incidence and arrest data detailed in this report occurred.

Maine is situated in the northeast corner of the New England states and is bounded by New Hampshire, Quebec Province, the Maritime Provinces and a 3,500 mile coast on the Atlantic Ocean. Eighty-four percent of Maine's 33,000 square miles is classified as timberland, and seven percent as inland water; the remaining nine percent contains approximately a million people. The state's population density is approximately 36 persons per square mile ranging from Cumberland County's 230 per square mile to just over 4 per square mile in Piscataquis County.

There are sixteen counties containing 496 minor civil divisions (cities and townships) in the State. Nearly one-half of the population lives in towns of less than 2,500 inhabitants. The larger metropolitan areas are Greater Portland, Lewiston/Auburn, and Bangor/Brewer. In 1970, 70% of Maine's population lived in a corridor 30 miles wide and 250 miles long. This corridor was bounded 15 miles on either side of the Maine Turnpike/Rt. I-95, extending from Kittery in the south to Houlton in the north. The population density within the total corridor was over three times the average for the State. Some shifts have occurred since 1970, but of only minor significance.

Historically, Maine has had a larger percentage of population over 60 and under 18 than other states in this region. Nearly 12 percent of the people are 65 and over; nearly one-third of the population is under 18 years of age. This fact was exaggerated in Maine by the significant out-migration of career-aged people in search of career opportunities in other parts of the nation. However, in recent years, with an increased environmental awareness and an appreciation of the natural resources of Maine coupled with better in-state job opportunities, this exodus has been stemmed by the arrival of a number of young people abandoning the professions in the eastern megalopolis and the retention of a greater number of Maine youth.

Although it is true that agriculture, tourism, and fishing comprise large economic activities in the state, Maine's economy is now primarily dependent on manufacturing. Slightly over onethird of employment is manufacturing; nearly three quarters of the people so employed work in six industries: leather, paper, lumber and wood products, food, transportation equipment, and textiles. Although great efforts have taken place to improve the economy of Maine's people, the state remains relatively poor. The average family income is still well below the other New England states. The influence of the lure of the natural features and the variable, but comfortable climate upon the State of Maine should not be understated. Maine's population swells to over 1,500,000 during the summer months, and an estimated 10,000,000 people visit the state throughout the year.

UCR POTENTIAL USES

In July of 1974 after a year or research and development, Maine became the 22nd state to collect Uniform Crime Reports as part of the national system. The system now numbers 46 states with the other four states expecting to join the system soon.

The program created as a result of planning by the Maine Criminal Justice Planning and Assistance Agency and implemented by the Maine State Police, Bureau of Identification, provides a comprehensive look at crime in the State of Maine. It carries the strong support of the Maine Chiefs of Police and Sheriffs Associations.

The Maine program was unique from the beginning as it was dedicated to doing more than just gathering statistics. The program received national recognition when individual monthly crime profiles were developed by computer for all contributors. These crime profiles set the stage for extensive use of the data by police administrators and other criminal justice agencies.

This brings us to the question - what good are Uniform Crime Reports and how may they be used? The initial thought response is limited but as the information unfolds many varied uses are revealed. Foremost is keeping the public informed as to the volume and nature of crime so they may judge and act accordingly.

Actually, UCR is a many faceted vehicle with many varied uses. Here are a few, but by no means all, of the possible uses as they relate to various groups and agencies.

I. Contributors -

Administrative information relating to:

- 1. Budget need and justification.
- Manpower number needed as to state average employees vs population and crime rate.
- 3. Department makeup Laboratory, Detective Division, Juvenile Officers, as related to particular crime problems in the community.
- 4. Problem crimes identified.
- 5. Disbursement of personnel and shifts according to the crime picture of the individual communities. In case of State Police and sheriffs with concurrent jurisdic-tion, placement according to need and avoiding of duplication of services.
- 6. Training needs training according to crime problems in the areas by priority.
- 7. Equipment purchase according to justified need.
- 8. Selective enforcement by crime volume as identified by particular times and seasons through UCR information.
- 9. Community crime profiles identifying particular problems.
- 10. Long-range planning as anticipated by crime trends.

II. Governor and Legislature -

- Broad true picture of crime in Maine by location, volume, type and crime rate as derived from records of all enforcement agencies.
- 2. Guide to valid funding needs of special interest groups and their requests for same.
- 3. Need for additional or less specialized type programs.
- Identification of crime trends and their relation to training, courts, corrections and other criminal justice agencies.
- 5. Identification of various social problems relating to drugs, alcohol, juveniles and rehabilitation.
- 6. Effectiveness of various social programs relating to above.
- III. Maine Criminal Justice Planning and Assistance Agency -
 - 1. Base to evaluate needs for assistance and grant requests.
 - 2. Source data for long-range planning.
 - 3. A measure of effectiveness of grant programs in given communities and areas.
 - 4. Identification of crime problems peculiar to Maine for inclusion in the Maine plan to the Federal Law Enforcement Assistance Administration.
 - 5. Justification of a continued need for crime planning in Maine.
- IV. Courts Prosecution -
 - 1. Valuable general research information on crimes within the areas being served.
 - 2. Crime trend information.
 - 3. Identified problem crimes to be considered in the prosecution or judicial process.
 - V. Press -

A factual source for use in reporting crime problems and socially related problems.

- VI. Social Agencies -
 - 1. Identifies problem areas to concentrate on.
 - 2. Some basis for general evaluating of the effectiveness of their programs.

VIII. Educational Institutaions (for various studies) -

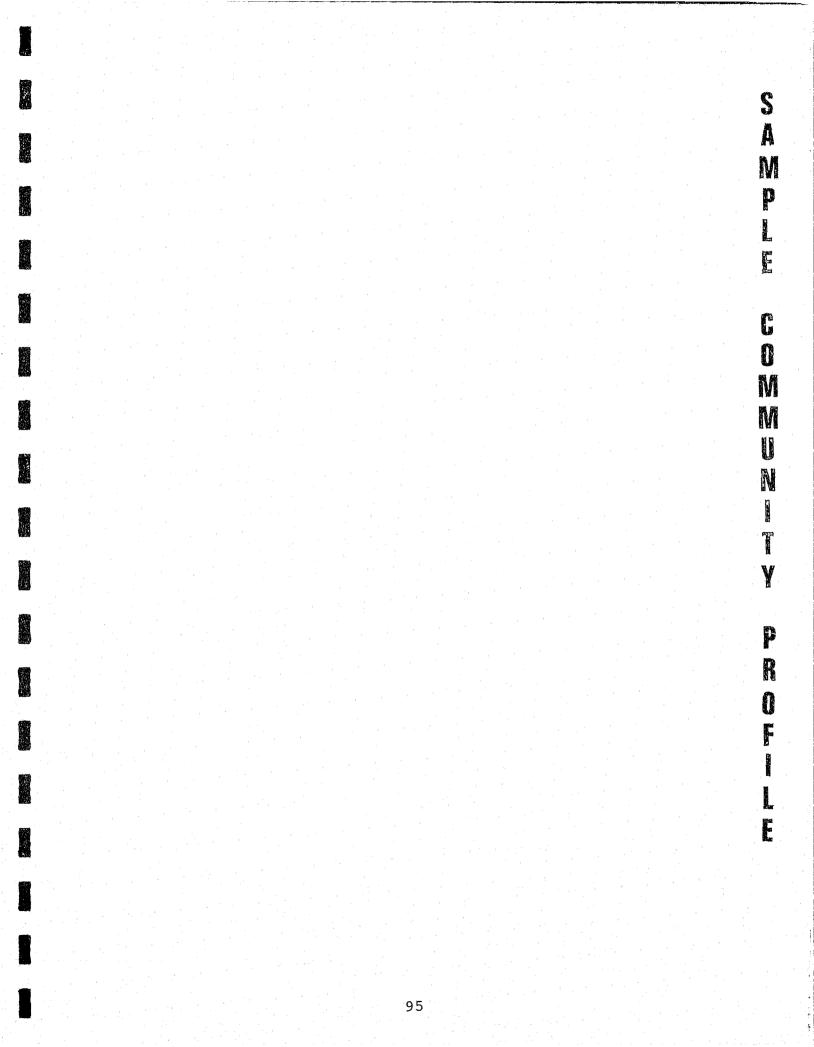

These are but a few possible uses and surely many more exist. The broader the base data accumulated, the clearer the value of UCR will become. If effective problem solving begins with the identification of the problem, then UCR will continue to be meaningful for a long time. Interestingly enough the by-products of a Maine UCR system have proven nearly as valuable as the information obtained from it.

It has served as a catalyst for many departments to set up realistic record systems for the first time and to institute upgrading of records in many others.

Realistic goals for contributing departments are being set and achieved based on sound statistical knowledge.

Administrators on the Chief and City Manager level have been taking a new look at their police departments and as a result internal operational changes have taken place. An awareness among low level personnel that their reports and arrests are being used, and not just filed, has resulted in better and more comprehensive reporting.

Finally, the periodic release of this crime information to the general public keeps the crime problem in its proper perspective.

PROGRAMMED COMMUNITY CRIME PROFILES

Reprogramming of UCR generated data was initiated in 1975 to provide maximum utilization of computer efficiency. In January of 1976 the new programs became operational. Chief benefactors of the new format are the contributors who make this comprehensive program possible by their outstanding support and cooperation.

On the following pages are sample printouts of generated data which are available monthly to every contributor. Quarterly printouts are mailed routinely to every reporter. Portland, Maine has been selected as the sample community for explanation in this publication. This sample is applicable monthly to every community submitting data through direct reporting to the UCR Division, the State Police by county, the Sheriffs' Departments, the county totals, and the State totals.

The <u>first printout</u> sample consists of offense data submitted monthly on Part 1, or index crimes.

Specific monthly data is identified and recorded in columns to the left of the first vertical dotted line. In between the dotted lines are the cumulative figures on each index crime to date, the projected crime rate per 1,000 population and the cumulative crime to date comparison with the preceeding year. The final column reflects the percent change in all crime classifications on the comparison figures.

Totals for all reported offenses appear at the bottom of the printout with distinctions being made between the index and Part 1 crimes. Law enforcement officer assault data for the reporting month and the accumulated total is included. The sample printout is for the month of December. However, any particular selected monthly printout will provide similar data...both for the monthly data and the cumulative data to date as well as last year to date comparison figures.

<u>Printout number 2</u> consists of property stolen and recovered by property type and values. The printout includes data for the reporting month, year to date and last year to date comparison figures. Recovery percentages are computed for each property type on all monthly and cumulative entry. Totals of each column and a total with motor vehicle values removed are included.

<u>Printout number 3</u> is a breakdown of the offense data reported on form number 1. It primarily identifies locations of crime occurrance in crimes of robbery and burglary and expands data on larceny by the analysis of larceny types and locations. This printout systematically records the values of property stolen during commission of the various types and methods of the criminal act. This particular printout records the monthly data, year to date totals and the percentage of the total combined offenses reported on this printout which involve only those crimes in which property may be stolen. You will note assaults are not included because when property is stolen during an assault it automatically becomes a robbery. Printout number 4 relates to the clearance of particular offenses by the reporting agency. The form is divided into three individual areas - current month, year to date and last year to date for comparison purposes. It reflects, in each one of the three areas, the number of actual offenses, number of offenses cleared, percentage of offenses cleared and the number of clearances that involved only persons under the age of 18 years. Clearance data is totaled to the bottom of the printout and reflects both Part 1 and index crime totals.

The final printout is intended to indicate to the police administrator on a month to month, year to year comparison any large variances in crime that requires further analysis. The final column indicating plus or minus change in a crime category may signal administrative or department changes are needed. The total columns also may indicate necessary changes.

Included in these printouts is a wealth of information for analysis and comparison by the police administrator and when combined with other furnished pertinent arrest data truly represents a continuing crime profile for the communities and areas involved.

Additional printouts, containing arrest statistics pertinent to age, sex and race of offenders, make up the total data packet returned to contributors on a quarterly basis.

REPORTING PROCEDURE

In the State Uniform Crime Reporting Program, contributing law enforcement agencies are wholly responsible for compiling their own crime reports and submitting them to the Uniform Crime Reporting Division in Augusta, Maine.

The Uniform Crime Reporting Division, in an effort to maintain quality and uniformity in the data received, furnishes to the contributing agencies, continuous training and instruction in Uniform Crime Reporting procedures. All contributors, also, are furnished with a State of Maine Uniform Crime Reporting Guide Manual which outlines in detail, procedures for scoring and classifying offenses. The Guide Manual illustrates and discusses the monthly and annual reporting forms as well as providing a question and answer training syllabus in the Crime Index categories.

A centralized record system is necessary to the sound operation of any law enforcement agency. The record system is an essential basis for crime reporting by the agency. Trained Uniform Crime Reporting field advisors are utilized to assist contributors in the established reporting procedures of Uniform Crime Reporting.

On a monthly basis, law enforcement agencies (state, county and local) report the number of offenses that become known to them during the month in the following crime categories:

- (1) Criminal Homicide
 - a. Murder and Nonnegligent Manslaughter
 - b. Manslaughter by Negligence
- (2) Forcible Rape
 - a. Rape by Force
 - b. Attempts to Commit Forcible Rape
- (3) Robbery

1.0

Sec. Sec.

- a. Firearm
- b. Knife or Cutting Instrument
- c. Other Dangerous Weapon
- d. Strong-Arm (Hands, Fists, Feet etc.)
- (4) Assault
 - a. Firearm
 - b. Knife or Cutting Instrument
 - c. Other Dangerous Weapon
 - d. Hands, Fists, Feet, etc.-Aggravated Injury
 - e. Other Assaults-Simple, Not Aggravated
- (5) Burglary
 - a. Forcible Entry
 - b. Unlawful Entry No Force
 - c. Attempted Forcible Entry
- (6) Larceny-Theft
 - (Except Motor Vehicle Theft)

- (7) Motor Vehicle Theft
 - a. Autos
 - b. Trucks and Busies c. Other Vehicles
 - :. voner veneer

This count is taken from a record of all complaints of erime received by the law enforcement agency from victims, other sources, and/or discovered by officers. **[**].

0

ŧ

Whenever complaints of crime are determined through investigation to be unfounded or false, they are eliminated from the actual count. The number of "actual offenses known" in these crime categories is reported to the Uniform Crime Reporting Division whether or not anyone is arrested for the crime; the stolen property is recovered; prosecution is undertaken; or any other restrictive consideration is in effect. Law enforcement agencies, on a monthly basis, report the total number of these reported crimes which they clear either by arrest or exceptional means. A separate count of crimes cleared which involve only persons under the age of 18 is shown. The number of law enforcement officers killed and assaulted and the value and type of property stolen and recovered during the month are also reported.

Arrests are reported monthly for all criminal acts, except traffic violations, by crime category and include the age, sex and race of each person arrested. A report is also submitted on an annual basis concerning the number of persons formally charged by crime classification and the disposition of such charges.

VERIFICATION PROCEDURES

Uniformity and accuracy of crime data collected under this program is of primary concern. With the receipt of reports covering approximately 150 reporting jurisdictions within the State of Maine, the problems of attaining uniformity are readily Issuance of instructions and the training of personnel apparent. within contributing agencies does not complete the role of the Uniform Crime Reporting Division. It is standard operating procedure to examine each incoming report for mathematical accuracy and completeness, and perhaps of even greater importance, for reasonableness as a possible indication of error. Clearance factors, recovery rates and other possible benefits are scrutinized and changes are suggested to the contributors where noted. In the instance of minor mathematical corrections, the contributing agencies are either contacted by phone or in-person visitations by qualified Uniform Crime Reporting field advisors.

The possibility of duplication in crime reporting is given constant attention when reports are received and verified by internal consistency checks. If duplication is suspected, the contributing agencies are immediately contacted and the matter is resolved in accordance with existing guidelines. A continual analysis of reports is maintained to assist contributors when needed and to maintain the quality necessary for a factual and successful program. Personal visitations are made to contributors to cooperatively assist in needed revisions of records and reporting methods.

Regardless of the extent of the statistical verification processes used by the Uniform Crime Reporting Division, the accuracy of the data assembled under this program depends on the sincere effort exerted by each contributor to meet the necessary standards of reporting.

CALCULATION OF RATES, PERCENTAGES AND TRENDS

The Uniform Crime Reporting program provides data for police executives to measure local problems. To facilitate this function, the local data must be converted into terms of rates and percentages. Simple formulas are presented which may assist in these computations.

CRIME RATES

One of the most meaningful crime statistics is the crime rate. This rate is the number of Part I Offenses per 1,000 inhabitants. This rate can be calculated regardless of the number of inhabitants in any city, town or county.

To compute rates, divide your communities population by 1,000 and divide the number of offenses in each class by that answer. The answer is the number of offenses in that class per 1,000 population and is your crime rate for that particular offense.

EXAMPLE:

a. Population for your jurisdiction, 75,000

b. Number of burglaries for your jurisdiction for a year, 215

Divide: 75,000 by 1,000 = 75.0Divide: 215 by 75.0 = 2.87

Your burglary rate is 2.87 per 1,000 inhabitants. The number 75.0 can now be divided into your totals in any offense class to produce a crime rate for that offense. This same computation can be completed to give you arrest rates per 1,000 inhabitants.

CLEARANCE RATES

The percentage of crimes cleared by arrest is obtained by dividing the number of offenses cleared by the number of offenses known. This answer is then multiplied by 100.

EXAMPLE:

a. Number of clearances in robbery, 38 b. Number of total robberies, 72 Divide: 38 by 72 = 0.528 Multiply: 0.528 x 100 = 52.8

Your percentage of clearance in robbery is 52.8%

CRIME TREND DATA

Local agencies can compute crime trends for a given offense for their agency for a particular period of time.

EZAMPLE:

a. Auto thefts in your jurisdiction for July through December last year were 21
b. Auto thefts in your jurisdiction for July through December this year were 29.

Subtract: 30 - 31 = 8

Notice that 8 is an increase over the past year.

binide: -8 by 21 = 0.38

Always divide the difference by the total in the earlier time period. 00 = 38

Multiply: $0.38 \times 100 = 38$

Your trend in auto theft is an increase of 38% for the first six months of this year as compared to the first six months of last year.

POLICE EMPLOYEE DATA

Divide:

Divide:

Police employee rates are expressed as a number of employees per 1,000 inhabitants of your city or town. To compute this rate, divide your population by 1,000 and divide the number of employees in your department by this number.

EXAMPLE:

a. Your jurisdiction's population 75,000
b. Your agency's number of employees 102
75,000 by 1,000 = 75
102 by 75 = 1.36

Your employee rate is 1.36 employees per 1,000 inhabitants.

CLASSIFICATION OF CT CASES

Paifeamity in reporting under the Maine Uniform frime Reporting System is based on the proper classifaction of offenses reported to or known by the police.

The ad action of the National System of Uniform Chime Reporting included the utilization of the offenso classifications of that system. Low enforcement in this there has made accurate application of those classifications in the reports submitted to the Maine Uniform tions Reporting System.

In view of the need for compatibility with the National System "offenses" under the program are not distinguished by designation of "misdemaaners", "felonies" or violation of municipal ordinances.

The explanations of offense classifications may vary slightly with language used by those familiar with Mains State Law. However, the major categories of effense classification remain the same between the netional and state levels.

PART 1 OFFENSES

Offense data consists of information that has been extiacted from reports of Part I crimes that have came to the attention of Maine Law Enforcement Agencies. In general, Part I crimes are those crimes that, because of their very nature, are usually reported to law enforcement agencies. Part I crimes are comprised of the following offences.

OFFENSE CLASSIFICATIONS

1 HOMICIDE

- 14. Murder and nonnegligent manulaughter -The unlawful killing of a human being with malice aforethought.
- 1t. Manslaughter by nogligence The unlawful killing of a human being, by another, withcut malice aforethought.

General Rule - The killing may result from the commission of an unlawful act or from a lawful act performed with gross negligence. Traffic deaths, when due to the gross negligence of someone other than the victim are classified in this category.

FORCIBLE RAPE

. Rape by force - The carnal knowledge of a female forcibly and against her will.

General Rule - FORCIBLE rape of a female excluding carnal abuse (statutery rape) or other sex offences.

2b. Attempted forcible raps - All assaults and transpts to raps.

5 ROBBERY

The felonious and forcible taking of the property of another, against his will, by violence or by putting him in fear. Includes all attempts.

- 3a. Gun All robberies and attempted robbaries involving the use of any type firearm (rovolvers, automatic pistols, shotguns, zip guns, riflos, pellet guns, etc.).
- 3b. Knife or Cutting Instrument All robberies and attempted robberies involving the use of cutting or stabbing objects (knife, razor, hatchet, axe, cleaver, scisuors, glass, broken bottle, dagger, ice pick, etc.).

- 3c. Other Dangerson Measure All rebberies or attrapted robberies when any other object or thing is used as a weapen. (This includes clubs, brives, jack handles, bottles, enplosives, word, etc.).
- 34. Strong Arm-Mando, Fista, Foot, Stc. All robbories which include suggings and similar offensos where no waspon is used, but strong arm tactics are explayed to deprive the vitim of his preparty. This is limited to hands, arms, fists, foot, atc. As is armost robbory, include all attempts.

4 ASSAULTS

An accoult is an attempt or offer, with us lawful force or violance, to de physical injury to another.

General Rule ~ All accounts will be closessied in the following caregories, on hulling accounts with intent to rub or repo.

da. Gun ~ All accounts and attropyted accounts involving the use of any type of fineners (revolvers, automatic pictole, shotymns, usp guns, pailet guns, etc.).

- 4b. Naifo or Cutting Instrument All accepted and attempted aboaute, involving the use of cutting or atabbing objects (knike, resor, hatchet, axo, cleaver, odication, glace, brohom bottle, dagger, ice pick, etc.).
- dc. Other Dangerous Weapon All appavite of attempted assaults when any other object of thing is used as a weapon (clubs, bricks, pick handles, bottles, acid, explosives, lys, poison, scalding water and coses of attempt ed drowning, burning, etc.).
- 4d. Nando, Fisio, Foot, Etc.-Aggrevated accoults which are of an aggrevated nature when hands, fists, foot, etc., are used. To be classified as aggrevated assault, the attack must result in derious personal i very
- do. Othor Assaulta-Not Aggravated All offenses of simple assault and battery.

5 BURGLARY

Breaking and Entering - Unlawful ontry of attempted forcible entry of any eleveture to commit a folony or largeny.

General Rule - Any unlawful entry or attempted forcible entry of any dwalling house, attached structure, public building, shop, office, factory, storenouse, apartment, house trailer (considered to be permanent structures), warehouse, mill, barn, camp, other building, ship or sailroad car.

NOTE: For Uniform Crime Reporting purposed, the terms Burglary and Breaking and Entering are considered synonymous. All suck offenses and attempts are secred as Burglary. Do not secre the larceny. Breaking and Entering of a motor vehicle is classified as a larceny for Uniform Crime Reporting purposes.

- Sa. Forcible Entry All offenses where force of any kind is used to enter unlawfully a hested structure, with intent to steal or commit a folony. This includes entry by use of a master key, colluleid, or other device that leaves no outward mark but is used to open a lock. Concealment inside a building, followed by the breaking out of the structure, is also included.
- Unlawful Entry-No Force Any unlawful entry without any ovidence of forcible entry.

Sc. Attempted Forcible Entry - When determined that forcible entry has been attempted.

LARCENY-THEFT (EXCEPT AUTO THEFT)

The unlawful taking of the property of another with intent to deprive him of ownership.

General Rule - All larconies and thafts resulting from posket-picking, purse smatching, shoplifting, larcony from suite, larconies of suite parts and accessories, thaft of bicycles, larconies from buildings, and from coin operated machines. Any theft that is not a robbary or the result of breaking and entering is included. Emboarlement, larcony by bailos, fraud or bed check cases are excluded.

MOTOR VEHICLE THEFT

10.0

The larceny or attempted larcony of a poter vehicle.

General Rule - This classification includes the thefts or attempted thaft of a meter vehicle which, for Uniform Crime Reporting designation. Is described as a solf-propolled vehicle that runs on the surface and not on ratis. Excludes reported offences where there is a lawful access to the vehicle, such as a family situation or unauthorized use by others with lawful access to the vehicle (charfaur, employees, etc.). Includes "Joy riding". Excluded from this category are arplanes, beats, fam equiprert and heavy construction vehicles, which are scored in the larceny category.

FART II OFFENSES

The Maine Uniform Crims Reporting System requires nformation on persons arrested and charged by municipal, ounty and state agencies on a monthly basis.

In compiling data for the Honthly Returns, the lolations of municipal ordinances as well as state laws re to be included.

DEFENSE CLASSIFICATIONS

CINER ASSAULTS

This class is comprised of all assaults and attempted assaults which are simple or minor in nature. These "Other Assaults" are also scored on ME. UCR-1 under item 4a as an offense known to Police. Revever, for the purpowe of this return argists for this offense are scored in this class.

ARSON

Include all arrests for violations of state laws and municipal ordinances relating to erson and attempted ars. ..

Includa: Any willful or Balicious burning to defraud, a dwelling house, church, college, jail, meeting house, public building or any building, ship or other vessel, motor vehicle or aircraft; contents of buildings, personal property of another, goods or chattels, crops, trees, fences, gates, grain, vegetable products, lumber, woods, cranberry bogs, marshes, meadows etc.

In this class place all offeness dealing with the making, altering, uttering or possessing, with intent to defraud, anything false in the semblance of that which is true.

Include:

Altering or forging public or other records. Making, altering, forging, or counterfaiting bills, notes, drafto, tickets, checks, credit cards atc.

Counterfoiting coins, plates, bank notes, chocks, stc.

Possessing or uttaring forgod or counterfalting instruments.

Signing the name of another or fictitious person with intent to defraud.

All attempts to commit any of the above.

11 FRAND

Praudulent conversion and obtaining money of property by false protense. Includes bad checks, confidence games sto., except forgerics and counterfeiting.

12 ENDEZZLERENT

Misappropriation or misapplication of money or property entrusted to one's care, custody or control.

13 STOLEN PROPERTY; BUYING, RECE. /ING, POSSESSING

Include in this class all offences of baying, receiving, and possession of stolen property, as well as all attempts to commit any of these offences.

IN VANDALISH

Include in this class all willfel or maliclous destruction, injury, disfigurement or defacement of any public of private property real or personal, without consent of the owner or person having custody or centrel by cutting, tearing, breaking, marking, painting drawing, covering with filth, or any other such means as may be specified by law or ordinance. This offense covers a wide range of malicious behavior directed at property.

15 HEAPONS; CARRYING, POSSESSING ETC.

This class deals with violations of wespens laws such as:

Hanifacture, sale or possession of deadly waspons.

Carrying deadly weapons.

Furnishing deadly weapons to minors.

Alians possessing deadly weapons.

All attampts to commit the above.

16 PROSTITUTION AND COMMERCIALIZED VICE

Include in this class the sex offenses of a commercialized nature, such as:

Prostit tion

Resping bavdyhouse, disorderly house, or house of ill repute.

Pandering, procuring, transporting or staining women for issuaral purposes etc.

All attempts to commit any of the above.

17 SEX OFFENSES

Except forcible rape, prostitution and commercialized vice. Include offenses against chastity, common decency, morals, and the like.

Adultery and fornication

Budgory

Tecost

Indecent exposure

Sodomy

Statutory Rape-(No Force)

All att mpts to commit any of the above.

18 NAR OTIC DRUG LAWS

Narcotic drug law arrests are requested on the basis of the narcotics used. Include all arrests for violations of stats and local ordinances, specifically those relating to the unlawful possession, sale, use, growing, manufacturing and making of narcotic drugs. Make the following subdivisions of narcotic drug law arrests.

Opium or cocaine and their derivatives morphine, heroin, codeine.

Marijuana.

Synthetic narcotics, manufactured narcotics which can cause true drug addiction. Demorol, methadones.

Dangerous non-marcotic drugs Barbituarates, bonsodrino.

19 GAMBLING

All charges which relate to promoting, pormitting or engaging in gambling. To provide a more refined collection of gambling arrests, the following breakdown should be furnished:

Bookmaking (Horse and sport books)

Numbers and lottery.

All other.

. O OFFENSES AGAINST THE FAMILY AND CHILDREN

Include here all charges of nonsupport and noglect or abuse of family and children.

Desertion, abandonment, or nonsupport.

Neglect or abuse of children.

Nonpayment of alimony.

1 DRIVING UNDER THE INFLUENCE

This class is limited to the driving or operating of any vehicle while drunk or under the influence of liquor or marcotic drugs.

22 LIQUOR LAWS

With the exception of "Drunkenness" (Class 23) and "Driving Under the Influence" (Class 21), iiquor law viclations, state or local, are placed in this class. Do not include federal violations. Includo: manufacturing, walo, transporting, furnishing, possessing ste.

Maintaining unlowful drinking places.

Doctlegging

operating still.

Fornishing liquor to a minor.

Using vehicle for illugal transportation of liquor.

23 DRUNKENNESS

Include in this class, all offenses of drunkenness or intexication, with the exception of "Driving Under the Influence" (Class 21)

Drunk and disorderly.

Public Intoxication.

NOTE: Although "brunkenness" and/or "Intomication" offenness have been removed from a criminal offenne category witho Naine Legislature, the category remains In the Uniform Crime Reporting Part II offenses and is to be used administratively. Persons taken into custody and/or referred to alcohol rehabilitation or "Do-Ton" centers should be scored in this category by age, sox and race.

24 DISORDERLY CONDUCT

In this class, count all disordarly persons arrested except these counted in classes 1 through 23 and class 25.

25 VAGRANCY

Place in this class arrests for disorderly persons when the person is prested for failure to give a good account of hisself.

26 ALL OTHER OFFENSES

Include in this class, every other state or local offense not included in classes 1 through 25.

Abduction and compolling to marry.

Aborcion (Death resulting from abortion is homicide).

Bastardy and concoaling death of a bastard.

Digamy and polygomy.

Blackmail and extortion.

Bribory.

Contempt of Court.

Discrimination, unfair compotition.

Kidnapping.

Offenses contributing to juvenile dolinguency except as provided for in classes 1 through 29, such as employment of children in immoral vocations or practices, admitting minors to improper places, etc.

Perjury and subornation of porjury.

Possession, repair, manufacture, etc., of burglar's tools.

Possession or sale of obscene literature.

Unlawful use, possession, stc., of explosives, stc.

27 SUSPICION (NOT REPORTED IN MAINE)

28 CURFEW AND LOITERING LAWS (JUVENILES)

Count all arrests made for violations of local curfew or loitering ordinances.

29 RUHAWAY (JUVENILES)

Count arrests made by other jurisdictions of runaways from your jurisdiction. Do not include protective custody actions with respect to runaways you take for other jurisdictions. Count only your own local cases,

UNIFORM CRIME REPORTING ADVISORY COMMITTEE

The Maine Chiefs of Police Association and Maine Sheriffs Association have continued to provide excellent support and cooperation to the Maine UCR Program.

A STATE

Station and an

1.1.1

A committee made up of members from these associations was instrumental in the development of uniform arrest sheets and complaint sheets now in use in many Maine Departments. Their expert advice and consultation are appreciated.

Listed below are the present members of the Technical Services Committee appointed by President Peter Mador of the Maine Chiefs of Police Association.

Robert Wagner, Chairman	SBI
Russell Bruton, Vice Chairman	Bath PD
William Carter, Vice Chairman	Lincoln County
Richard Wise	Frank C. Wise
Donald Cummings	FBI
Frank Stevens	
Leon Planche	Cumberland PD
Howard Sarris	Central Equipment Co.
Albert Smith	Camden PD
Steve Vermette	Unlimited Sec. Serv.
Shep Simons	J. B. Simons
Hermel Vallaincourt	Van Buren PD
Tim Richardson	Penobscot County
Verne McKenney	Caribou PD

This newly structured committee replaces the previous advisory committee and is responsible for all technical services which falls within the purview of the Maine Chiefs of Police Association.

UNIFORM CRIME REPORTING

STATEMENT OF POLICY

FOR THE RELEASE OF UCR STATISTICAL INFORMATION

The following regulations will be observed by this agency concerning the release of Uniform Crime Reporting statistical information. Employees of this agency will observe these procedures and will not deviate from this policy without the express consent of the Supervisor, Uniform Crime Reporting Division. All information to be released will originate from, and will be approved prior to being released, by the Uniform Crime Reporting Division.

REGULATIONS

10° - 21

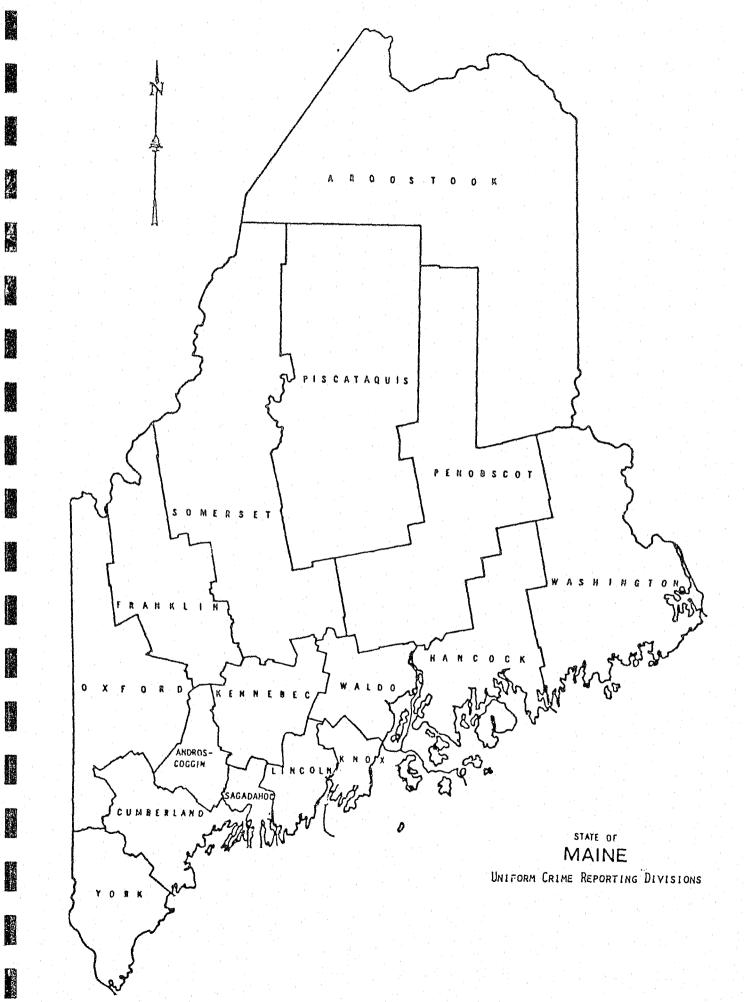

- 1. This agency will publish an annual report reflecting orime in Maine. This report will be distributed to the Governor, to members of the Legislature, to the Attorney General, to the Maine Criminal Justice Planning and Assistance Agency, to enforcement agencies or to any agency or committee dedicated to law enforcement or criminal justice work.
- 2. Published reports will be released to the above named agencies prior to their being released to individuals or agencies extraneous to the criminal justice community.
- 3. UCR information requests

С.

No person or agency will be furnished statistical information which has not previously been published, concerning any individual agency's reports without the written consent of the Chief Administrator of that Agency. The Uniform Crime Reporting Division will maintain for one year a copy of the information released along with the request and the authority for release.

- A. Information contained in the published annual report may be released via phone, letter, etc., to any interested party.
- B. All requests for unpublished information from agencies or individuals should be directed by letter to the Supervisor, Uniform Crime Reporting Division. These special requests will be holored only with the written consent of the agency whose statistics are requested.

Law enforcement agencies may receive interim, unpublished, specialized reports identifying their agency only providing the request is not unreasonable. Law enforcement agencies may also receive their respective county totals along with state or district totals. All requests should be directed to the Supervisor, Uniform Crime Reporting Division.

AUTHORITY

The Maine Uniform Crime Reporting System Act was passed by the Special Session of the 105th Legislature and was signed into law by the Honorable GOVERNOR KENNETH M. CURTIS on February 28, 1974.

AN ACT RELATING TO THE INSTALLATION OF A UNIFORM CRIME REPORTING SYSTEM:

Revised Statutes., Title 25, Section 1543, amended. Section 1543 of Title 25 is amended by adding the new paragraph at the end to read as follows:

"It shall be the duty of all state, county and municipal law enforcement agencies, including those employees of the University of Maine appointed to act as policemen, to submit to the State Bureau of Identification: uniform crime reports, to include such information as is necessary to establish a Criminal Justice Information System and to enable the supervisor to comply with section 1544. It shall be the duty of the Bureau to prescribe the form, general content, time and manner of submission of such uniform crime reports. The Bureau shall correlate the reports submitted to it and shall compile and submit to the Governor and Legislature annual reports based on such reports. A copy of such annual reports shall be furnished to all law enforcement agencies."
