ACKNOWLEDGEMENTS

This report on crime and arrests in Oregon for the calendar year 1978 was prepared jointly by the Planning and Data Analysis Unit of the Oregon Law Enforcement Council and the Law Enforcement Data System, Executive Department. The publication is the fifth annual analytical report prepared from statistics collected and compiled by the Oregon Uniform Crime Reporting program of the Law Enforcement Data System and analyzed by the Oregon Law Enforcement Council.

This report was prepared and published with financial assistance from the National Criminal Justice Information and Statistics Service, Law Enforcement Assistance Administration, United States Department of Justice.

CORRECTED PAGES FOR ANALYSIS OF CRIME IN OREGON 1978

MURDER ARREST DATA AND SEVERAL OTHER CATEGORIES HAVE BEEN FOUND IN ERROR AS PRINTED IN SECTION 4, PAGES 159 THROUGH 176.

Changes have been hand written on the corrected copy for easy identification.

It is suggested that you delete this section in its entirety and replace it with these corrected pages. Page 200 of Section 5 should be inserted at that location.

ABSTRACT

This report is an in-depth analysis of criminal offenses and arrests reported in Oregon during 1978.

Contained herein, on a statewide basis, are detailed data regarding Index and Part II offenses under the FBI Uniform Crime Reporting categories including month, day of week, and time of occurrences, location of offenses, and types of property stolen. Arrest statistics reflect age, sex, race and degree of charge.

This report also includes additional data regarding Index and Part II offenses and a comparison of arrest charges for juveniles versus adults (felonies, misdemeanors, violations).

Other comparisons include Index Crime Rates for Oregon and neighboring states; Oregon's 14 administrative districts and 36 counties; Portland, Salem, and Eugene SMSA; and detailed Index crime comparisons between the cities of Portland, Salem, and Eugene.

Also included, in tabular form only, are types of offenses, clearances, and arrests for each reporting agency in Oregon and type of arrests by age grouping for each of the 36 counties.

SUMMARY

In 1978, the Index Crime rate for Oregon was 6,012.3 (offenses per 100,000 population)—an increase of 1.6 percent over 1977. Murder, forcible rape, robbery, aggravated assault, burglary, larceny, and motor vehicle theft represent Index Crimes.

The Part II Crime rate (all other types of criminal offenses) in 1978 was 6,526.9--an increase of 1.4 percent over 1977. The total crime rate was 12,539.2 offenses per 100,000 population in 1978--an overall increase of 1.5 percent.

Between 1977 and 1978, there were no statistically significant differences in the Index or Part II crime rates for the state. Although there are no significant differences in these rates, there are a number of differences between the 1977-78 rates for various offenses worth pointing out.

Violent offenses, involving murder, rape, robbery, aggravated assault, other (lesser) assaults, assaults against police officers, resisting arrest, and disorderly conduct have shown steady increases in the state since at least 1975. In total, the rate for these eight categories has shown an increase of approximately 40 percent from 1975 to 1978.

Theft offenses involving property (burglary, larceny, motor vehicle theft) showed a decrease of 12 percent from 1975 to 1977, and increased only slightly (+0.8%) in 1978.

Individual offense categories that have shown steady increases over the past few years are rape, shoplifting, fraud (mainly bad checks), and offenses against the family which includes child abuse and neglect. A portion of these increases can be attributed to an increase in reporting to the police--to what degree is not yet known.

The total number of arrests in 1978 remained relatively stable (up only 0.2%). The total number of juveniles arrested decreased by 4 percent from 1977, while the number of adults arrested increased by 2.2 percent. The median age of persons arrested in 1978 was 20 years of age.

In terms of Index Crime in 1978, the combined metropolitan areas of Portland, Salem, and Eugene showed a slight decrease (-0.4%), while the remainder of the state showed an increase of 5.7 percent. Violent offenses in the metropolitan areas rose 5.0 percent in 1978, while rising 19.5 percent throughout the remainder of the state.

SUMMARY OF STATISTICS

	<u>1977</u>	<u>1978</u>	PERCENT CHANGE
TOTAL OFFENSES	295,997	310,194	+ 4.8%

OREGON AT-A-GLANCE*

Oregon, central state of the Pacific group, is bounded on the north by Washington, on the east by Idaho, on the south by California and Nevada and on the west by the Pacific Ocean, and lies between 42 degrees and 46 degrees 15 minutes, north latitude; and 116 degrees 45 minutes and 124 degrees 30 minutes, west longtitude.

Oregon originally included Washington, Idaho, and parts of Montana and Wyoming, with an area of 286,541 square miles. The width east and west is 395 miles, and the length north and south is 295 miles. Oregon was admitted to the Union on February 14, 1859, and the 33rd star in the flag was added for the state on July 4, 1859.

COMMERCE AND INDUSTRY*

Growth of diversified manufacturing in recent years has been changing Oregon's largely resource-oriented economy, which historically has been heavily dependent on forest and agriculture products as the basic foundation.

Forest products, including lumber and plywood and paper and allied products, continue to be Oregon's leading industry. The harvesting and processing of timber into a wide variety of products accounts for over 43 percent of the state's more than 4,600 listed manufacturing establishments, about 73 percent of its manufacturing employment and slightly less than 30 percent of the value added by all of the state's manufacturing industry.

From 1958 to 1976, the value added by all manufacturing increased from \$1,222 billion to \$5,392 billion. During this same period, value added by the forest products industry increased from \$0.660 million to \$1,499 billion.

The relative position of the forest products industry has been lessened somewhat by the growth of other kinds of manufacturing and the growth of service industries.

High technology industries, primarily electronics or computer related durable goods, constitute the fastest growing sector of manufacturing. Employment has increased 89.9 percent from 1966 to 1977 in this area, and some forecasts indicate one out of every four new manufacturing jobs in Oregon over the coming years will be in the electronics industry.

Oregon's annual farm sales are more than \$1 billion. The total impact of agriculture, including food processors and handlers, is estimated at over \$3 billion a year. This places agriculture's importance to the state's economy second only to forestry and forest products.

Tourism is another important contributor to Oregon's economy. The impact of spending by tourists from out of state is felt on a number of industries and activities, including retail and wholesale trade, services and transportation.

SECTION 1

OVERVIEW OF OREGON CRIME REPORTING AND CRIMINAL JUSTICE SYSTEM

INTRODUCTION

This is the fifth annual report of criminal offenses and arrests produced by the State of Oregon since the beginning of the Oregon Uniform Crime Reporting Program (OUCR). OUCR is an incident based reporting program, tailored to the needs and operational procedures of the police agencies in Oregon.

Incident based reporting requires the recording of specific information about each criminal event known to the police. A criminal event may be reported to a police department by a victim or other source or discovered as a result of police operations. Any reported criminal incident that is determined to be unfounded through subsequent police investigation is deleted from the counts.

The Oregon Uniform Crime Reporting Program requires the reporting of all criminal offenses defined as "Part I and Part II Crimes", and the reporting of all arrests for such offenses. Law enforcement agencies also report the clearance of such offenses by arrests of persons or other means. The number of persons reported as arrested includes all persons reported as physically arrested, summoned or cited by police agencies during 1978.

The OUCR system provides reporting agencies with the capability to record statistics on activities handled by the agency that do not constitute criminal events. It also allows the agency to record and report additional attributes of both criminal events and activities such as the location within the jurisdiction or time of day of the occurrence.

Reporting agencies submit the recorded data monthly to the Law Enforcement Data System either on provided forms or magnetic tape. The data is then processed in a computerized system and reports reflecting the monthly activity of each agency are produced and returned to the contributor for their use.

As agency reports are processed each month, data required for the FBI National UCR Program is extracted. When all agencies have been processed, a magnetic tape containing UCR data for all Oregon incident reporting agencies is mailed to the FBI.

Definitions of the offenses, clearances, and arrests are included in Appendix A of this report.

REPORTING JURISDICTION

Reported offenses relate to the jurisdiction in which they occur. The arrest and clearance, in every case, is attributed to the jurisdiction in which the offense occurred, even though the arresting agency may not be the department originally reporting the offense. State Police and County Sheriffs have concurrent jurisdiction in all counties of the state. Their reports generally apply to criminal offenses and arrests occurring in those areas outside incorporated cities which have municipal police departments.

DEGREE OF REPORTING

During 1978, offense and related supplementary information, including arrest data, was received from 141 municipal and other police departments, 36 county sheriff departments and the Oregon State Police, who have provided offense and arrest information in all 36 counties. In 1978, the number of agencies participating in the OUCR program represented service to 99 percent of the state's population.

The Portland Police Bureau reported both Part I and Part II information in summary form, and because of the summary method, statistics relating to day of week, time of day, premise type and article type do not include that agency.

USE OF OUCR

Only crimes known to the police will be included as part of the official crime rate. Thus, under-reporting of crime can have a significant impact on crime rates and also on the evaluation of the effectiveness of crime reduction programs.

Substantial evidence is contained in reports on criminal victimization surveys which indicates that reporting rates are highly stable among most social groups and across different geographical areas. This suggests reported crime can be a good indicator of crime patterns and trends.

While it is apparent that crime information reported to the police does not provide a complete picture of the crime situation in our society, it is compiled and analyzed because of the following reasons:

- a. Reported crime information is used by the police agencies for resource allocation and determining appropriate agency responses to occurrences.
- b. Reported crime data, recognized as a portion of the total crime, is, in fact, a highly accurate measurement of occurrences in society that must be addressed by the criminal justice system.
- c. This system is based on definitions which are standardized (uniform) across the nation and it is unlikely that it will be appreciably altered in the forseeable future.

INTERJURISDICTIONAL COMPARISONS

Care should be taken in drawing conclusions and making decisions about problems based solely on crime and arrest data as reported by different law enforcement jurisdictions. Factors relating to crime reporting practices, law enforcement policies, population characteristics and attitudes all contribute to variation in reported data.

Some general factors which may affect the amount of crime reported and type of crime committed are:

- Density and size of the community population and the metropolitan area of which it is a part.
- Composition of the population with reference particularly to age.
- Economic status, education, and recreation characteristics of the community population.
- Relative stability of the population, including commuters, seasonal, and other transient types.
- Climate, including seasonal weather conditions, and other geographical variations.
- Religious characteristics of the population.
- Effective strength of the police force.
- Policies of the prosecuting officials and the courts.
- Attitude of the public toward law enforcement problems.
- The administrative and investigative follow-up of the local law enforcement agency, including the degree of adherence to crime reporting standards.

LAW ENFORCEMENT IN OREGON

Municipal police departments have full police powers within their jurisdictions including the investigation of crime, enforcement of state criminal and traffic laws and city ordinances.

County sheriffs exercise general law enforcement authority in their respective counties enforcing state criminal and traffic laws, and county ordinances. Sheriffs departments generally confine their law enforcement services to areas not served by municipal police departments. Sheriffs may provide law enforcement services to incorporated municipalities on a contract basis.

The Oregon State Police have full law enforcement authority. They may conduct criminal investigations and enforce state laws anywhere within the State. However, they generally function outside of incorporated cities except when assistance is requested by a local police agency. State Police have primary responsibility for patrol of interstate freeways, the state highway system, and enforcement of fish and game laws. Occasionally, patrols are also provided on county roads.

The Department of State Police also provides support services to municipal and county departments upon request. These include crime laboratory services, fingerprint identification, criminal records, questioned document examination, polygraph service and specialized investigation teams for arson and narcotics investigations.

Law Enforcement employees - 1978

The Oregon Uniform Crime Reporting Program also includes the collection of data relating to the number of full-time employed police officers and civilian personnel. There were 5,851 full-time law enforcement employees reported in 1978 as illustrated in Table 1. This represents a decrease of 2.2 percent in the total of all personnel in municipal police agencies, sheriffs departments, and the State Police from 1977.

Male employees accounted for 77.7 percent of the total employees. The total number of male employees decreased by 1.7 percent in 1978 while the number of female employees decreased by 4.0 percent. Sworn officers accounted for 76.1 percent of the total work force with the remaining 23.9 percent being full-time civilians.

Of the 4,547 total male employees, 94.2 percent were sworn officers and 5.8 percent were civilians. Of the 1,304 total female employees, 12.9 percent were sworn officers and 87.1 percent were civilians. Using the total state population of 2,472,100, the number of law enforcement employees per 1,000 population was 2.37. The number of sworn officers per 1,000 population was 1.8. The number of sworn officers decreased from 1977 by 0.7 percent.

COURTS

During 1978, there were forty-four Justice Courts with misdemeanor and traffic jurisdiction. Twenty-four counties had district courts, with circuit courts providing service to all 36 counties. Circuit courts have jurisdiction in all felony criminal matters. The State Court of Appeals and the State Supreme Court provide service at the appellate levels.

During 1978, 16,097 felony cases, 82,137 misdemeanors and violations, and 600,996 traffic cases were filed in the state court system; municipal courts reported handling an additional 195,696 traffic cases1 (includes only those municipal courts reporting for the entire 12 month period).

¹Data from <u>Judicial Administration</u> in the Courts of Oregon - 25th Annual Report, State Court Administrator, 1978.

Child Welfare and the prevention and control of juvenile delinquency is a joint responsibility of the State of Oregon and its 36 counties, working in conjunction with private agencies. Oregon's circuit courts, and in some cases, county courts, have exclusive jurisdiction in cases involving persons under 18 years of age whose actions may be in violation of a law and/or ordinance.

Juvenile courts and departments are essentially involved with the juvenile correction process. Referrals made by law enforcement officers, parents, relatives, neighbors or any interested party may result in an informal or formal hearing, followed by dismissal, supervision or detention, depending on a referral cause and the needs of the child. The juvenile department, under the auspices of the circuit court or county court, is responsible for disposition of all delinquency cases.

CORRECTIONS

At the state level the Corrections Division of the Oregon Human Resources Department is responsible for all adult offenders sentenced to penal institutions or placed under the supervision of parole and probation. In 1978, the Division received 1,588 offenders committed to institutional custody. This represented a 9.8 percent increase over 1977. The number of offenders sentenced to supervision on probation increased by 11.5 percent from 3,619 in 1977 to 4,035 in 1978. On December 31, 1978, the Division had 2,643 inmates in actual custody plus another 183 housed in work release facilities and 193 out for other reasons for a total inmate population of 2,919. An additional 9.541 persons were under parole or probation supervision including 798 being supervised in Oregon for other states. Seven hundred seventy-three Oregon offenders were being supervised by other compact states. The Oregon parole board ordered the release of 1.671 inmates on parole in 1978. This represented an increase of 29.0 percent over the 1,296 persons paroled in 1977. Persons ordered returned to custody from parole increased by 19 percent from 288 in 1977 to 343 in 1978. In addition to the State Corrections Division, six counties were participating in Community Corrections programs under the Community Corrections Act. Since most of them have been operational for less than a year, meaningful statistics are not available for this report.

Responsibility for state programs dealing with juvenile delinquency, welfare and other needs of children is vested in the Children's Services Division of the Department of Human Resources. The division operates two training schools, two work-study camps, a juvenile parole and community service unit, administers subsidy funds distributed to county juvenile departments, certifies foster homes and child care agencies, and purchases group treatment and care from private child care agencies and family foster care from families.*

*Data supplied by Corrections Division, 1979.

SECTION 2

STATEWIDE OFFENSE AND ARREST DATA

INTRODUCTION

This section presents the number of criminal offenses and arrests reported by police agencies in 1978. The statistics represent the aggregate of all reporting agencies within the state, except when noted, and is arranged in the following six subsections:

- 1. Overview of offenses.
- 2. Overview of arrests.
- 3. Detailed information regarding Index and Part II offenses.
- 4. Data regarding other types of calls for service.
- 5. Data concerning assaults against police officers.
- 6. Comparison with neighboring states.

Certain types of information do not represent the State as a whole (e.g., day of week, time of day, type of premise, article stolen, degree of charge at time of arrest). Some of these elements are optional for agencies to report and others, such as Part II offense breakdown data, were not reported by the Portland Police Bureau which is still using the summary reporting method. .

The statewide offense totals in this section are not identical to those shown in Section 4 of this report. The differences are less than 1/2 of one percent and are the result of two different and separate methods of compiling the data at two different points of time. This difference is not significant enough to affect the overall results.

OVERVIEW OF OFFENSES

The total crime rate in 1978 (12,539.2) increased by 1.5 percent over 1977. The Index crime rate in 1978 (6,012.3) showed an increase of 1.6 percent over 1977, while the Part II crime rate in 1978 (6,526.9) increased by 1.4 percent (see Table 2). The Part II crime rate in 1978 was 7.9 percent higher than the Index rate. Among all crimes, the highest rate was calculated for larceny at 3,518.5 offenses per 100,000 population while the second highest was burglary at 1,594.5. Together, these two offenses represented 40.8 percent of the total number of offenses reported in 1978.

GRAND TOTAL	295,997	310,194		12,539.2	+ 1.5%

The 1978 percentage distribution of both Index offenses and Part II (from Table 2) is depicted in the form of a pie chart in Figure 1. Larceny represents the largest single offense portion of all offenses with larceny, burglary, and vandalism together representing 52.6 percent of the total in 1978. Two major crimes, normally considered the most serious, murder and forcible rape, represented a very small percentage of crime in 1978 (less than 0.4 percent).

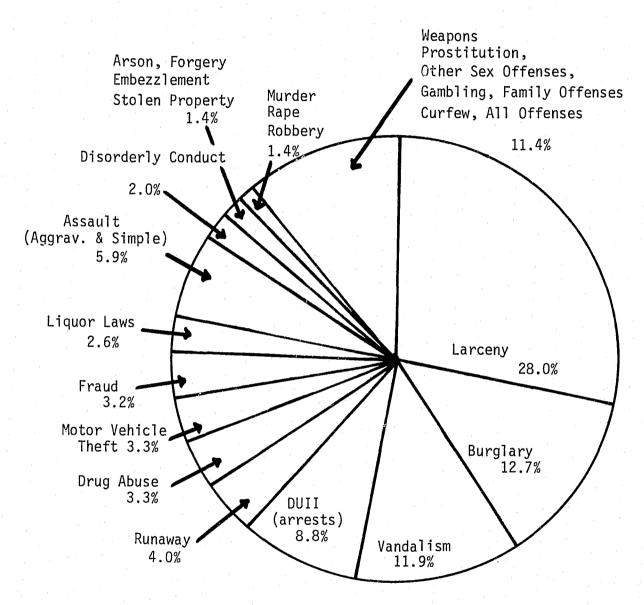

FIGURE 1 - ALL OFFENSES - 1978 PERCENT DISTRIBUTION

The Index and Part II offenses were combined into seven general categories as shown in Table 3 with their respective percent distribution, rate per 100,000 population, and change from 1977 to 1978. As shown, the crimes involving theft represented the highest rate per 100,000 (6,042) and showed an increase of +1.8 percent over 1977. Crimes involving destruction to property also showed an increase (2.6 percent) with decreases in only drug and liquor violations, and other offenses.

A chi-square test on the distribution of rates for the two years showed a significant difference at the 99 percent confidence level ($X^2=41.34$, DF = 6). The most significant difference in the rates was in the category of crimes involving theft, down 5.6 percent from 1976.

Index Offenses

There were 148,624 Index offenses reported by police agencies in 1978, representing 47.9 percent of all offenses reported statewide. Of the Index offenses, 8.23 percent (12,243) were violent offenses (murder, forcible rape, robbery, aggravated assault) and 91.7 percent (136,381) were property offenses (burglary, larceny, motor vehicle theft).

Larceny accounted for 58.52 percent of all Index offenses and 63.8 percent of the property offenses as depicted in Figure 2.2 with burglary second at 28.9 percent of the total. Aggravated assault accounted for 5.3 percent of all Index offenses, but represented 64.5 percent of the violent offenses. Murder represented the lowest percentage of the total (0.08 percent) in 1978.

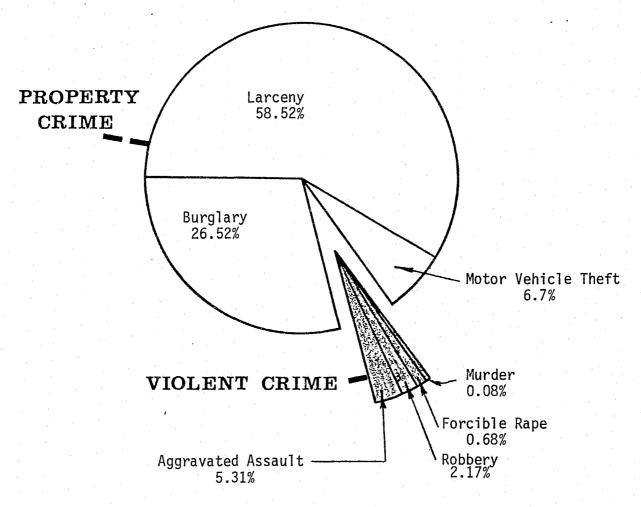

FIGURE 2 - INDEX OFFENSES - 1978
PERCENT DISTRIBUTION

The Index crime rate (offenses per 100,000 population) was 6,012.3 per 100,000 in 1978—an increase of +1.6 percent from 1977 as presented in Table 4. The highest increase in Index crime rates was in Aggravated Assault (13.9 percent over 1977) while the robbery rate increased by 6.4 percent.

There were 31,589 arrests in 1978 for Index offenses of which 5,085 (16.1 percent) were for violent offenses and 26,474 (83.8 percent) were for property offenses. As in 1977, the highest number of arrests in 1978 were for larceny (56.8 percent of the total arrests for Index crimes).

Of the 148,624 reported Index offenses, 21.7 percent (32,294) were cleared compared to 21.8 percent in 1977. The clearance rate for violent crimes was 45.4 percent (up 0.3 percentage points) while the clearance rate for property crimes was 19.6 percent (up 3.2 percentage points from 1977). The highest clearance rate was for murder (75.8 percent) with the next highest being for aggravated assault (50.3 percent), down slightly from 1977. Since 1974 the clearance rates in all categories except murder have increased.

Part II Offenses

There were 161,570 Part II offenses reported by police agencies in 1978 representing 52.09 percent of all offenses reported statewide. The highest number of Part II offenses were of vandalism (22.8 percent of the Part II total) with DUII offenses second and representing 16.9 percent of the Part II total.

The Part II crime rate in 1978 (offenses per 100,000 population) was 6,526.9 compared to 6,012.3 for Index offenses. The Part II crime rate increased by 1.4 percent over 1977 with increases in 11 out of 19 categories and decreases in 8 out of 19 categories. The largest increase in 1978 was shown in the offenses against family rate--up 56.9 percent over 1977. The largest decrease was shown in the rate for gambling offenses down 40.5 percent from 1977.

STOLEN, DAMAGED, DESTROYED PROPERTY AND LOSS VALUE

Index Offenses

In 1978, the total value of property stolen in the commission of Index offenses was reported at \$59,532,456--an increase of 22.8 percent over 1977 (see Table 5). Of this total, \$21,023,796 or 35.3 percent in value was recovered. The largest increase in recovery rate (percent recovered) was for jewelry (from 16.4 percent in 1977 to 21.2 percent in 1978).

The highest value of type of property stolen was \$21,588,219 for stolen motor vehicles which accounted for 36.3 percent of the total stolen value and showed the highest percentage of recovered value (73.9 percent). If motor vehicles are subtracted from the totals, the stolen value of property stolen would be \$37,944,237; recovered, \$5,479,673--a recovery rate of 14.4 percent (13.2 percent in 1977).

Part II Offenses

Part II offenses reported to the police, which involved a loss of property, either stolen, damaged, or destroyed, are presented in Table 6. Property loss values for Part II offenses were not reported by the Portland Police Bureau in 1978. Consequently, the values shown in Table 6 are considerably less than actual for the state as a whole.

The loss of property resulting from arson was over \$3.7 million compared to vandalism which accounted for over \$3.1 million in property loss. The property loss involved with fraud, which is mainly bad check writing, exceeded \$1.2 million in 1978.

TOTAL ARRESTS STATEWIDE (TABLE 7)

In 1978, police agencies reported a total of 114,040 arrests—an increase of 0.2 percent over 1977 and reflects a increase of 14.0 percent since 1975. Arrests for Index offenses (murder, forcible rape, robbery, aggravated assault, burglary, larceny, motor vehicle theft) accounted for 27.7 percent of the total (31,589 arrests reported for Index offenses in 1978—an increase of 3.4 percent over 1977). Arrests for Part II offenses accounted for the remaining 72.3 percent of the total (82,451 arrests reported for Part II offenses in 1978). This is an increase of 4.1 percent over 1977.

Juvenile Arrests (17 years of age and under)

In 1978, the total number of arrests of juveniles (36,683) decreased by 4.0 percent from 1977. Arrests of juveniles for Index offenses in 1978 (15,390) decreased 2.3 percent, while arrests of juveniles for Part II offenses (21,293) decreased by 5.2 percent.

Of the total arrests, 32.17 percent were juveniles; of the arrests for Index offenses, 48.7 percent were juveniles; and of the arrests for Part II offenses, 25.8 percent were juveniles. As in 1977, the highest numbers of arrests of juveniles were for larceny, liquor laws, runaway, burglary and curfew respectively.

Adult Arrests (18 years of age and older)

In 1978, the total number of arrests of adults (77,357) increased by 2.2 percent over 1977. Arrests of adults for Index offenses in 1978 (16,199) increased 9.4 percent while arrests of adults for Part II offenses (61,158) increased by 0.5 percent.

Of the total arrests, 67.8 percent were adults; of the arrests for Index offenses, 51.3 percent were adults; and of the arrests for Part II offenses, 74.2 percent were adults. As in 1977, the highest numbers of arrests of adults were for DUII, larceny, liquor laws, and drug abuse respectively.

Summary - Juvenile/Adult Arrests (Table 8)

A summary of the arrest rates (arrests per 1,000 population) for both juveniles and adults is presented in Table 8 by general offense categories for 1978.

Although there were significant differences in the absolute numbers of arrests between 1977 and 1978, there were no significant statistical differences in the rate of arrests (per respective 1,000 population). The change in numbers of arrests reflects a change in population rather than a change in the behavior of juveniles.

TABLE 8 - ARREST RATES BY OFFENSE CATEGORY

OFFENSE	NUMBER OF	ARRESTS
CATEGORY	Juveniles	Adults
Crimes Involving Violence (Murder, Forcible Rape, Robbery, Assault)	2.13	3.95
Crimes Involving Theft (Burglary, Larceny, Motor Vehicle Theft, Receiving and Buying Stolen Property, Forgery, Fraud, Embez- zlement	21.3	7.85
Crimes Involving Destruction To Property (Arson, Vandalism)	3.04	1.02
Drug and Liquor Violations (Drug Abuse, Liquor Laws, DUII)	11.12	23.56
Disorderly Conduct	1.06	2.42
Sex Crimes (Prostitution, Other Sex Offenses)	0.34	0.58
Other Offenses (Weapons, Gambling, Family Offenses Curfew, Runaway, All Other)	12.39	4.47

Male Arrests (Table 9)

Of the total arrests in 1978, 92,983 or 81.5 percent were of males. The total of male arrests reflects an increase of 0.67 percent over 1977.

Of the total arrests of males in 1978, 24,692 or 26.6 percent were for Part I offenses—this represents an increase of 4.4 percent over 1977. Arrests of males for Part II offenses in 1978 (68,291) accounted for the remaining 73.4 percent of the total male arrests—a decrease in number of arrests for Part II offenses of 0.6 percent over 1977.

Female Arrests (Table 10)

Of the total arrests in 1978, 21,057 or 18.5 percent were of females. The total of female arrests reflects a decrease of 1.8 percent from 1977.

Of the total arrests of females in 1978, 6,897 or 32.6 percent were for Part I offenses—this represents a decrease of 0.3 percent from 1977. Arrests of females for Part II offenses in 1978 (14,057) accounted for the remaining 67.4 percent of the total female arrests—a decrease in number of arrests for Part II offenses of 3.3 percent from 1977.

Summary - Male/Female Arrests

In general, the number of males arrested in 1978 increased while the number of females arrested decreased. Of the number of female arrests, 33 percent were for Part I offenses as compared to 27 percent of the arrests of males. Of the number of females arrested, 67 percent were for Part II offenses compared to 73 percent of the arrests of males.

Number of Arrests By Degree of Charge (Table 11)

Of 114,040 arrests made in 1978, 86,099 were reported by the degree of charge at time of arrest and could be related to Oregon Revised Statues (0.R.S.) and class of crime. Arrests by degree of charge were not reported by agencies using the summary method in 1978 (Portland Police Bureau).

Of the 86,099 arrests reported by degree of charge, 15.5 percent were for felony offenses; 30.6 percent were for misdemeanor offenses; and 53.9 percent were for unclassified misdemeanors and violations such as DUII and liquor law violations. Among the most serious, felony-class A comprised 5.7 percent of the total arrests.

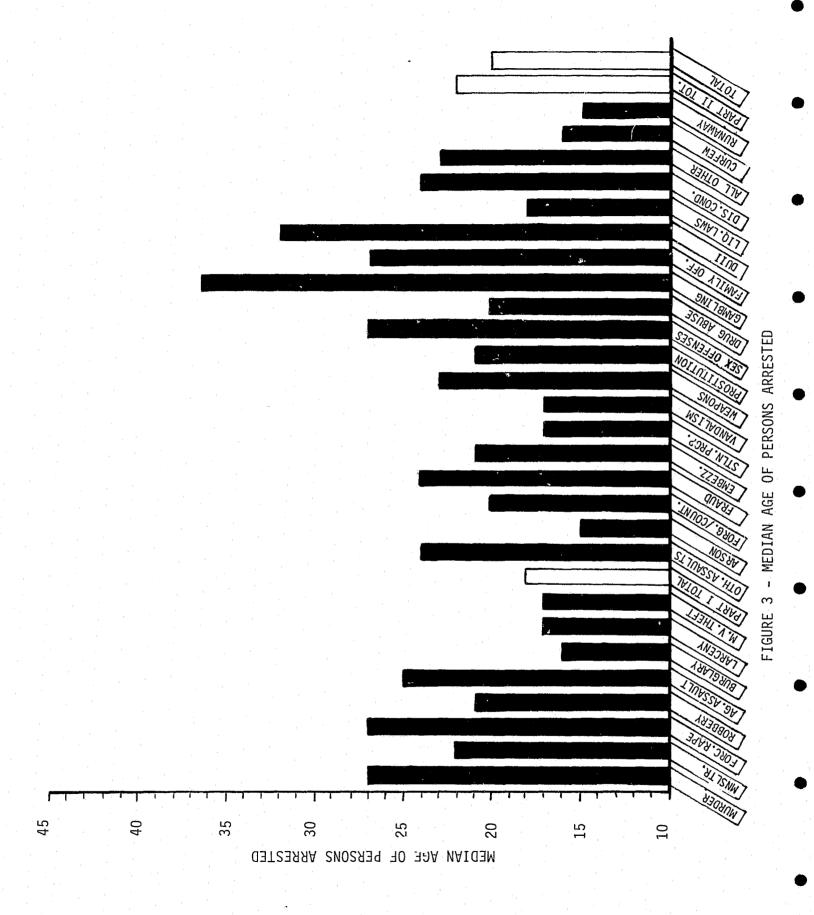

A greater percentage of juveniles were arrested for felony offenses than were adults (25.5 percent of the juveniles arrested compared to 15.5 percent of the adults), whereas the majority of the adults (53.9 percent) were arrested for unclassified misdemeanors, DUII, and liquor violations. Arrests for class A felony offenses represented 10.7 percent of the arrests of juveniles compared to 5.7 percent of the arrests of adults.

Of the total arrests for felony offenses, juveniles represented 28.5 percent and adults represented 71.5 percent.

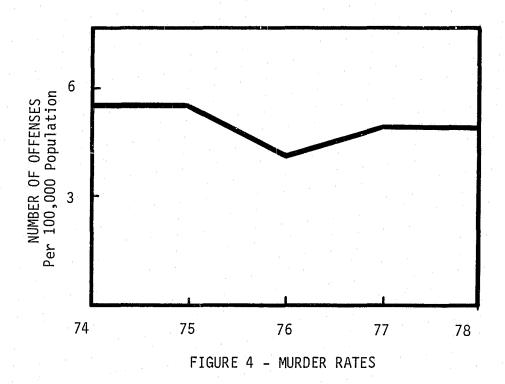

Figure 3 depicts the median age of persons arrested for each offense category including the median age of persons arrested for total Part I offenses, Part II offenses, and all offenses. As illustrated, the median age of persons arrested for Part I offenses was 18 years compared to 22 years of age for Part II offenses. The lower median ages of 15 to 18 were for vandalism, runaways, and crimes of theft, (burglary, larceny, motor vehicles). These median ages in 1978 are consistent with the median ages for the same crime categories in 1977.

MURDER

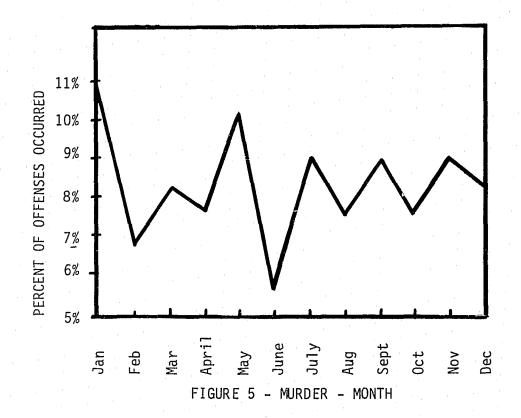

There were 120 offenses of murder reported in 1978—an increase of 2.6 percent over 1977. Murder represented 0.08 percent of the total Index offenses in 1978 and 0.04 percent of all crimes. The clearance rate, which was 72.6 percent in 1977, increased to 75.8 in 1978.

As depicted in Figure 4, the murder rate (number of offenses per 100,000 population) has not changed substantially since 1974. The rate in 1974 was 5.5; the rate in 1978 was 4.8.

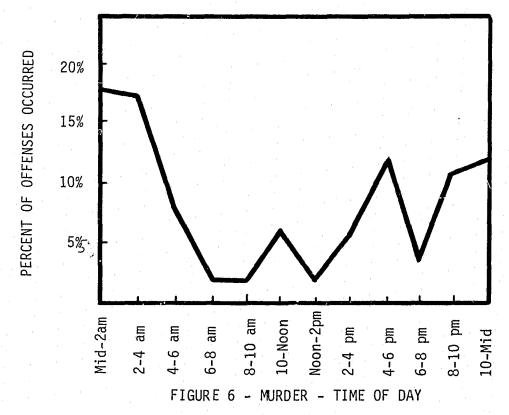

Murder--Month of Occurrence (Figure 5)

The number of murder offenses in 1978 are depicted in Figure 5 by the month in which they were reported. The highest percentage of murders in 1978 occurred during January and May; in 1977, the highest percentage of murders occurred in August.

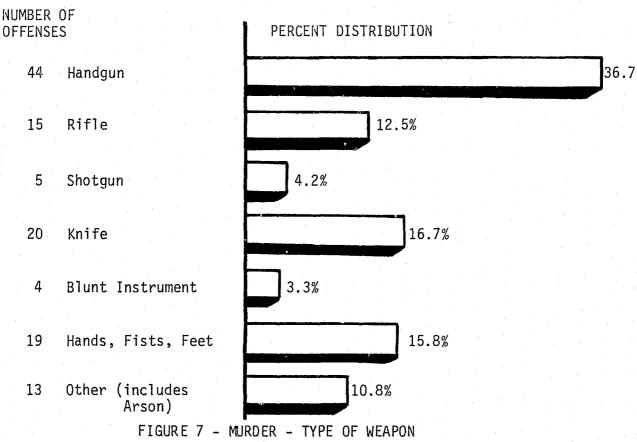

Murder--Time of Day (Figure 6)

Figure 6 depicts the number of murders in 1978 by the time of day in which they occurred. As shown, the period midnight to 2 a.m. accounted for the highest percentage of incidents. The majority of murder offenses occurred between 4 p.m. and 4 a.m.

Murder--Weapon (Figure 7)

The percentage of murders by type of weapon used is shown in Figure 7. Of the 120 murders reported, 64 (53 percent) were committed using a firearm (handgun, rifle or shotgun). The remaining 47 percent involved a knife, blunt instrument, hands, fists, and feet, or other type of weapon. The percentage of murders involving a handgun has remained relatively stable in the last four years: 40.0 percent in 1975, 35.1 percent in 1976, 41.0 percent in 1977, and 36.7 percent in 1978.

Murder--Victims (Table 12)

The number of murder victims are presented in Table 12 by various age groupings, sex, and race. Of the total victims, 14.1 percent were under 18 years of age, 20.0 percent were 18 to 24 years of age, and the majority (65.9 percent) were 25 years of age or older. Male victims represented 56.7 percent of the total with the remaining 43.3 percent being female; 84.2 percent were White; 8.3 percent were Negro; 4.2 percent were Indian; and 3.3 percent were of other races.

Of the 10 victims 10 years and under, 7 were 1 year of age or under. The number of victims 17 and under increased from 12 in 1977 to 17 in 1978. The number of victims 18-24 decreased from 31 to 24, while the number of victims age 25 to over 65 increased from 74 to 79.

Murder--Circumstances (Figure 8)

The number of murders are depicted in Figure 8 by the type of circumstance surrounding the incidents. As shown, 17.5 percent involved family relations (spouse, parent/child, other family). Persons involved in a romantic triangle or lovers quarrel represented 5.0 percent, and other types of arguments constituted 35.8 percent. The number of murders involving family or interpersonal violence has increased 11.1 percent over 1977, while the total number of murders has increased by only 2.6 percent over 1977. Of the total, 20.8 percent were the result of unknown circumstances.

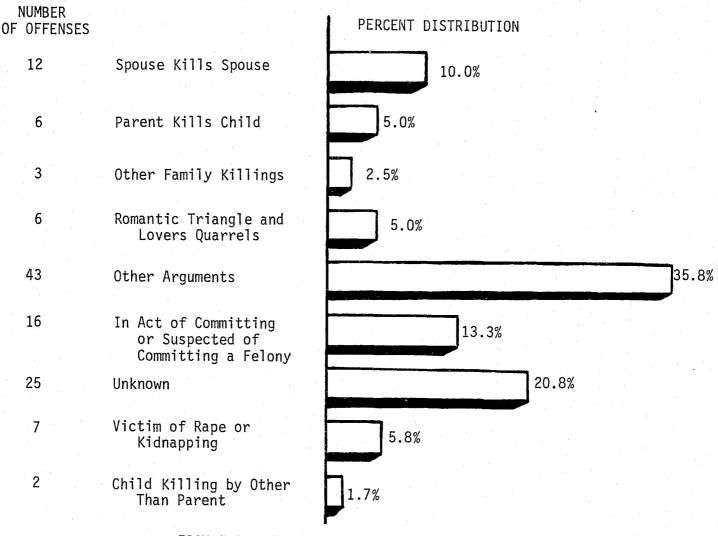

FIGURE 8 - MURDER - KNOWN CIRCUMSTANCES

Arrests for Murder (Table 14)

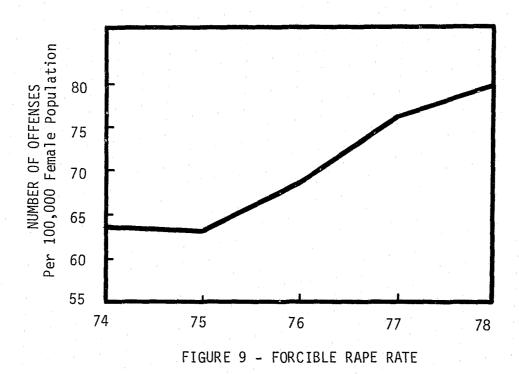

In 1978, there were 108 arrests made for murder; of these 108 arrests 10 percent were juveniles and 90 percent were adults. Eighty-eight percent of the total were male, and 12 percent were female. The median age of arrest for murder was 27.0 years.

TABLE 14 - ARRESTS FOR MURDER

	Key	Juvenile	Adult	Total	Male	Female	
Murder	No. of Arrests Percent Across Percent Down	11 10% 100%	97 90% 100%	108 100% 100%	88%	13 12% 100%	

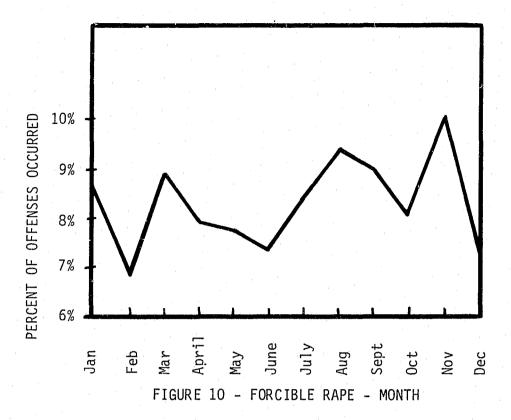

FORCIBLE RAPE

There were 1,008 forcible rape offenses (which includes attempts) reported in 1978—an increase of 7.6 percent over 1977. Forcible rape represented 0.7 percent of all Index offenses and 0.3 percent of all crimes. The clearance rate of 44.8 percent is among the highest rates for Index crime and showed a slight decrease from 1977. In 1974, the forcible rape rate per 100,000 females was 63.4. The figure dropped slightly in 1975 to 63.1 and has increased since (68.8 in 1976; 79.7 in 1978). The rate in 1978 showed an increase of 3.0 percent over 1977.

Rape--Month of Occurrence (Figure 10)

The number of forcible rape offenses for 1978 are depicted in Figure 10 by the month in which they occurred. The highest percentages of offenses occurred in November and August: 10.1 percent of offenses occurred in November, and 9.4 percent of offenses occurred in August. This is consistent with the percentages of offenses in the same months of 1977 (10.3 percent in November, 1977; 9.6 percent in August, 1977).

Rape--Day of Week (Figure 11)

Of the 1,008 forcible rape offenses in 1978, 608 were reported by the day of the week on which they occurred as shown in Figure 11.

Of the 608 offenses reported by day of week, the highest number were reported as occurring on Monday (112 offenses or 18 percent); the next highest day was Wednesday (91 offenses or 15 percent)—however, on the whole there was very little fluctuation throughout in a day of week.

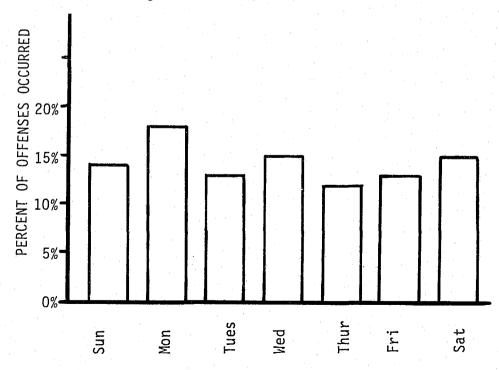

FIGURE 11 - FORCIBLE RAPE - DAY OF WEEK

Rape--Time of Day (Figure 12)

Of the 1,008 forcible rape offenses in 1978, 518 were reported by the time of day in which they occurred as shown in Figure 12.

Of the 518 offenses reported by time, the highest number were reported between 10 p.m. and Midnight (96 offenses or 18 percent) with 238 offenses (46 percent) reported between 10 p.m. and 4 a.m. Of the total, 359 offenses (69 percent) were reported at night (6 p.m. - 6 a.m.). The distribution is similar to that reported in 1976 and 1977.

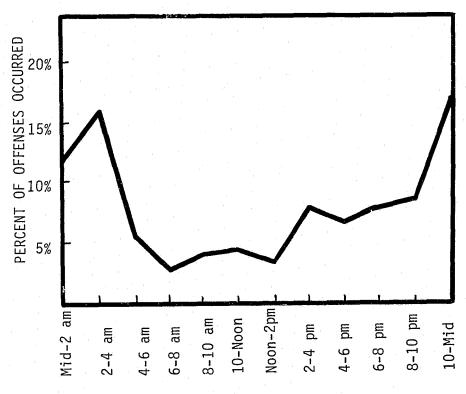

FIGURE 12 - FORCIBLE RAPE - TIME OF DAY

Rape--Type of Offense (Table 15)

Of the total 1,008 forcible rape offenses reported in 1978, 736 offenses (73.0 percent) were rape by force, and 272 offenses (27.0 percent) were attempted forcible rape as shown in Table 16. The clearance rate for rape by force was 49.4 percent (51.6 percent in 1977) and 32.4 percent for attempted offenses (35.1 percent in 1977). The total clearance rate for rape decreased from 47.0 percent in 1977 to 44.8 percent in 1978.

Using estimated female population figures for 1978, the rate per 100,000 for rape by force was 58.2 (an increase of 5.6 percent over 1977) while the rate for attempts was 21.4 (up +0.5 percent over 1977). The total rate per 100,000 female residents was 79.7. Assuming one victim/one offense, one out of 1,718 female residents was a victim of a forcible rape offense in 1978. The national rate in 1977 was one victim out of 1,307 female residents.

TABLE 15 - FORCIBLE RAPE - OFFENSES, CLEARANCES

TYPE	NUMBER OF OFFENSES	PERCENT DISTRI- BUTION	NUMBER OF CLEARANCES	PERCENT CLEARED	RATE PER 100,000 FEMALE * POPULATION	CHANGE 1977-78
Rape by Force	736	73.0%	364	49.4%	58.2	+5.6%

TOTALS	1,008	100.0%	452	44.8%	79.7	+4.2%

^{*} Using 1978 estimated population figure of 2,472,000 and applying percentages of male/female residents from 1975 estimate (male 48.85%, female 51.15%)

Rape--Type of Weapon (Table 16)

Of the 1,008 forcible rape offenses in 1978, 660 were reported by the type of weapon used as shown in Table 16. Of the 660 offenses, 540 (82 percent) involved the use of hands or fists and the remaining 120 (18 percent) involved the use or threat of a dangerous weapon. The number of rape offenses involving the use or threat of a dangerous weapon increased 36.4 percent over 1977, while the total number of rape offenses increased 29.4 percent.

TABLE 16 - FORCIBLE RAPE - TYPE OF WEAPON

WEAPON	NUMBER OF OFFENSES	PERCENT DISTRIBUTION
Firearm	35	5%
Knife	68	10%
Other dangerous weapons	17	3%
Hands or Fists	540	82%
TOTAL	660	100%

Arrests For Rape (Table 17)

In 1978, there were 306 arrests for forcible rape (up 13 percent over 1977). Eleven percent were juveniles and 89 percent were adults. The median age of persons arrested was 22 years with 78.4 percent of those arrested being White.

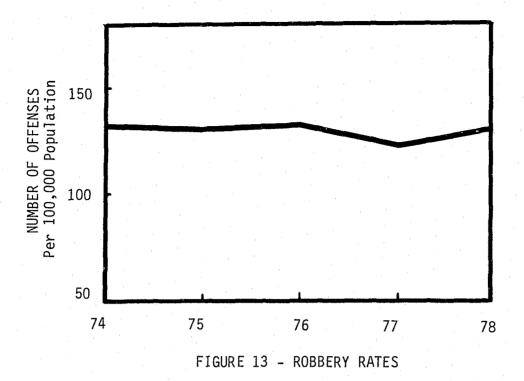

TABLE 17 - ARRESTS FOR FORCIBLE RAPE

	Key/	Juvenile	Adult	Total	Male	Female
İ	No. of Arrests Percent Across Percent Down	35 11% 100%	89%	306 100% 100%	304 99% 100%	2 1% 100%

ROBBERY

There were 3,221 robbery offenses in 1978 - an increase of 9.7 percent over 1977. Robbery represented 2.2 percent of Index crimes and 1.0 percent of all crimes in 1978. The clearance rate for robbery in 1978 was 32.5 percent compared to 31.5 percent in 1977. In 1978, the rate per 100,000 population was 130.3 (an increase of 6.4 percent over 1977). The national rate in 1977 was 187.1.

Figure 13 depicts the robbery rates (offenses per 100,000 population) in Oregon from 1974 to 1978. The rate in 1978 was 130.3 as compared to 130.7 in 1974. This means that approximately one out of every 765 persons was a victim of a robbery in 1978 assuming one victim/one offense.

Robbery--Month of Occurrence (Figure 14)

The number of robbery offenses for 1978 are depicted in Figure 14 by the month in which they occurred. As shown, the highest percentage of offenses occurred during December and August. The pattern is quite similar to the three-year average, 1974-1976. The highest number of offenses occurred in December of 1978, consistent with that shown in the last four years.

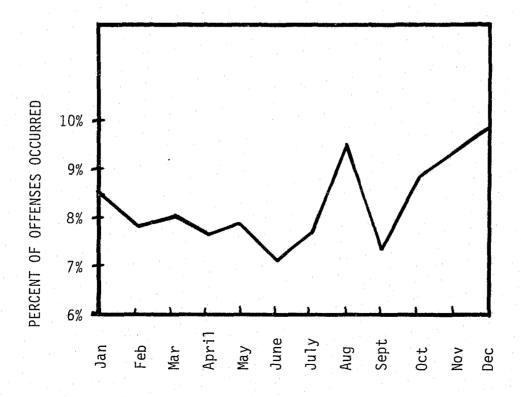

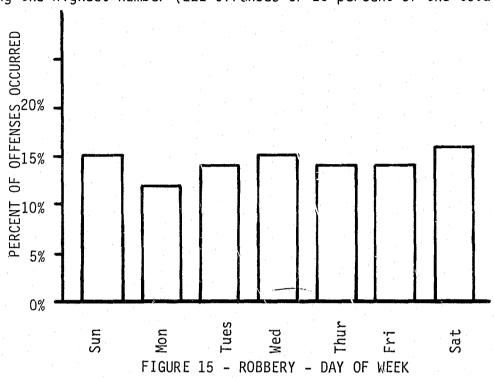

FIGURE 14 - ROBBERY - MONTH

Robbery--Day of Week (Figure 15)

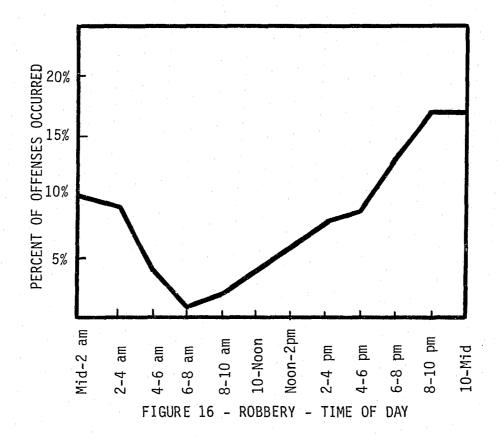

Of the 3,221 robbery offenses in 1978, 1,391 offenses were reported by the day of the week in which they occurred as depicted in Figure 15. As shown, the lowest number of offenses were reported as occurring on Monday with Saturday showing the highest number (221 offenses or 16 percent of the total).

Robbery--Time of Day (Figure 16)

Of the 3,221 robbery offenses reported in 1978, 1,360 were reported by time of day in which they occurred as shown in Figure 16.

Of the 1,360 offenses, the highest number occurred between 8 p.m. and Midnight (473 offenses or 34.7 percent of the total). Robberies occurring at night (6 p.m. - 6 a.m.) represented 70.2 percent of the total. The distribution is similar to that shown in 1976 and 1977.

Robbery--Target (Table 18)

The number of robbery offenses in 1978 are presented in Table 18 by location of their occurrence. The highest number of robberies occurred at miscellaneous locations such as public schools, parking lots, parks, etc. (42.1 percent of the total) with the second highest percentage (16.0 percent) occurring in chain stores. The highest increase in 1978 was in robberies of chain stores (30.6 percent) followed by robberies on the highway (street, alley, etc.) which increased by 14.2 percent; however, even the increase of 30.6 percent in robberies of chain stores was not a statistically significant change. It is interesting that the mean value per offense involving a commercial house increased from \$273 in 1977 to \$707 in 1978—the number of commercial house offenses increased by only 1.1 percent.

In 1978 the robbery category of "chain store" was changed nationally and in OUCR to "convienence store". In Oregon, convienence stores are typified by 7-11 and Circle K, etc.

Robbery--Type of Weapon (Table 19)

As shown in Table 19, 43.0 percent of the robbery offenses in 1978 involved the threat or use of strong-arm (hands, fists, feet). Of the total robbery offenses 39.2 percent involved firearms—a slight increase of 0.5 percent over 1977. There are only slight differences in the clearance rates for the type of weapon involved.

Arrests For Robbery (Table 20)

In 1978, there were 1,051 arrests for robbery—an increase of 1.2 percent over 1977. Of the total, 28 percent were of juveniles and 72 percent were adults; 92 percent were male, and 8 percent were female. The median age of persons arrested was 21 years with 93 percent of the total arrested being White, 4 percent being Negro (down 21 percent from 1977), and the remaining 3 percent other races.

Of the 1,051 arrests for robbery in 1978, 546 were reported by specific degree of charge at time of arrest as shown in Table 20. The distributions by degree were similar to those in 1977. The majority of persons arrested were for first degree robbery (59 percent) which is a class A felony. The majority of adults arrested were for first degree (62 percent) while 52 percent of juveniles arrested were for second and third degree robbery, class B and C felonies respectively.

TABLE 20 - ARRESTS FOR ROBBERY

AGGRAVATED ASSAULT

There were 7,894 aggravated assault offenses in 1978—an increase of 17.5 percent over 1977. Aggravated assault represented 5.3 percent of Index crime and 2.5 percent of all crimes reported in 1978. The clearance rate for aggravated assault was 50.3 percent in 1978 compared to 50.4 percent in 1977.

The rate per 100,000 population in 1978 was 319.3, an increase of 13.8 percent over 1977. The rates for the period 1974-1978 are depicted in Figure 17 and have shown rather sharp increases in both 1975 and 1978.

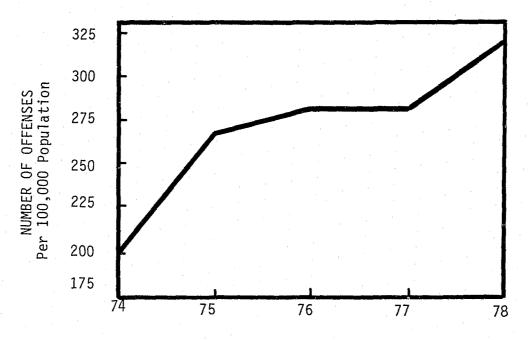

FIGURE 17 - AGGRAVATED ASSAULT RATES

Aggravated Assault--Month of Occurrence (Figure 18)

As shown in Figure 18, the highest number of offenses occurred in July and August. The distribution is similar to that for the previous four years except for December. The percent of offenses in December, 1978, decreased from the percent of offenses in December, 1977, reflecting the three-year average, 1974-1976.

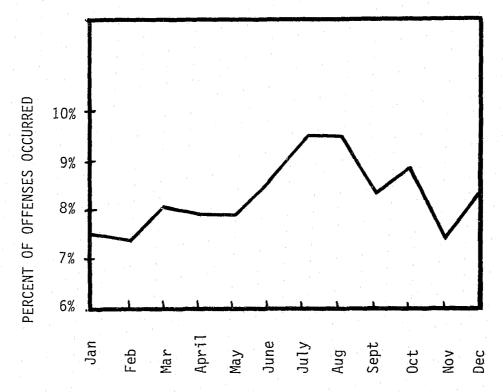

FIGURE 18 - AGGRAVATED ASSAULT - MONTH

Aggravated Assault--Day of Week (Figure 19)

Of the 7,894 offenses of aggravated assault in 1978, the highest numbers were reported as occurring on Sunday with 34 percent occurring on the weekend (Saturday - Sunday). The distribution is similar to that reported in 1976 and 1977 (Figure 19).

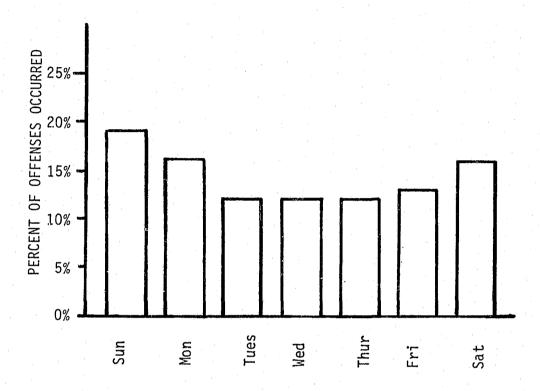

FIGURE 19 - AGGRAVATED ASSAULT - DAY OF WEEK

Aggravated Assault--Time of Day (Figure 20)

Of the offenses of aggravated assault in 1978, the highest number occurred between the hours of 10 p.m. and Midnight. The distribution is similar to those reported in 1976 and 1977 (Figure 20).

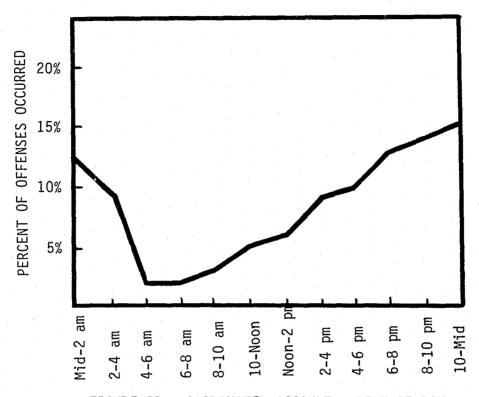

FIGURE 20 - AGGRAVATED ASSAULT - TIME OF DAY

Aggravated Assault -- Type of Weapon Used (Table 21)

As shown in Table 21, 56.7 percent of the offenses in 1978 involved the use of hands, fists, or feet, while only 15.6 percent involved the use of a firearm.

TABLE 21 - AGGRAVATED ASSAULT - TYPE OF WEAPON

WEAPON	<u> 1977</u>	1978	Change	1978 Percent Distribution

Knife or Cutting Instrument	900	1,074	+19.3	13.6%
Other Dangerown Weapon	1,032	1,115	+ 8.0	14.17
Hands, Fists, Feet	3,700	4,473	+20.9	56.7%
TOTAL	6,720	7,894	+17.5	100.0%

Arrests For Aggravated Assault (Table 22)

In 1978, there were 3,620 arrests for aggravated assault--a 20.6 percent increase over 1977. Of the total, 16 percent were juveniles and 84 percent were adults; 89 percent of the total were White, 7.2 percent Negro, and 3.8 percent other races. The median age was 25 years.

Of the 3,620 arrests for assault, 3,183 were reported by specific degree of charge at the time of arrest as shown in Table 22. The distribution of arrests cannot be compared to 1977 because of the addition of two reporting categories--4th degree assault and local ordinance.

As shown, the highest percentage of arrests were for 4th degree assault (59 percent) which is a Class A Misdemeanor.

BURGLARY

There were 39,415 burglary offenses reported in 1978—an increase of 1.9 percent over 1977. Burglary represented 26.5 percent of Index crime and 12.7 percent of all crime in 1978. The rate of burglary per 100,000 population in 1978 was 1,594 which showed a decrease of 1.2 percent from 1977.

Table 23. Residential burglaries represented 66.8 percent of the total. Non-residential burglaries represented the remaining 33.2 percent.

The number of forcible entries made in 1978 decreased by 1.3 percent from 1977, while the number of no force entries increased 8.1 percent. The number of attempted forcible entries showed a slight increase of 0.2 percent.

The total reported value of property stolen in burglary in 1978 was \$18,113,380--up 15.4 percent over 1977.

Residential Burglary--Introduction

In 1978, the residential burglary rate (offenses per 1,000 residential units) 3 was 26.7 compared to the non-residential rate of 209.5 per 1,000 business units.

The residential rate in 1978 increased less than 1.0 percent over 1977 and has shown a net decrease of approximately 16 percent since 1975 (Figure 21).

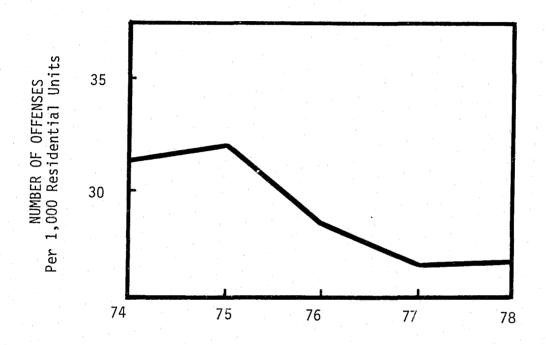

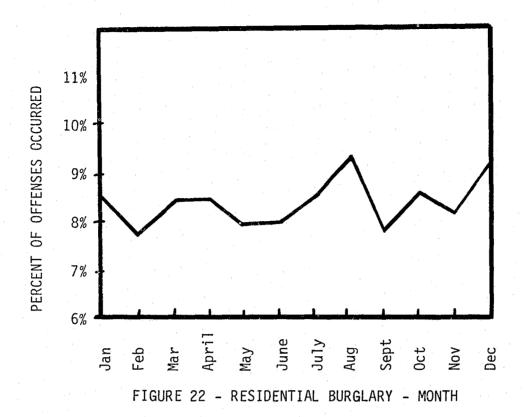

FIGURE 21 - RESIDENTIAL BURGLARY RATES

Residential Burglary--Month (Figure 22)

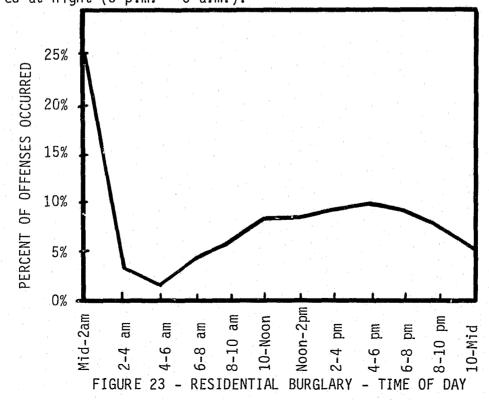

As shown in Figure 22, there was very little variation in the percentages of burglaries occurring in specific months. The highest numbers of residential burglaries occurred in August, December, and October of 1978. The lowest numbers of residential burglaries occurred in February, May, and September.

³Based on data from State of Oregon, Department of Commerce, Housing Division.

Residential Burglary--Time of Day (Figure 23)

Of the 26,346 residential burglaries in 1978, 16,955 were reported by time of day in which they were known to have occurred. As shown in Figure 23, the highest number occurred between midnight and 2 a.m. Approximately 54 percent occurred at night (6 p.m. - 6 a.m.).

Residential Burglary--Type of Premise (Table 24)

Of the 26,346 residential offenses in 1978, 12,497 were reported by the type of premise in which they occurred.

As shown in Table 24, 75.8 percent occurred in a single-family residence and 14.9 percent occurred in an apartment/duplex.

TABLE 24 - RESIDENTIAL BURGLARY - TYPE OF PREMISE

PREMISE TYPE	NUMBER OF INCIDENTS	PERCENT DISTRIBUTION

TOTAL	12,497	100.00%

Residential Burglary--Type of Property Stolen (Table 25)

Of the 26,346 residential offenses in 1978, 19,782 were reported by the type of property stolen as shown in Table 25.

Excluding the miscellaneous category, the category of articles involved in the highest number of offenses was that of televisions, radios, and stereos, followed by the categories of currency, jewelry, and consumable goods.

Of the value of T.V.s, radios, and stereos stolen (\$1,708,372), only \$101,058 in value or 5.9 percent was recovered. One of the highest recovery rates (15.1 percent) was for bicycles while the lowest recovery rates were for saddles and tack, and currency, securities, etc. (0.6 percent and 2.7 percent respectively).

Non-Residential Burglary--Introduction

In 1978, the non-residential burglary rate (offenses per 1,000 business units) 4 was 209.5 compared to the residential rate of 26.7 per 1,000 residential units. Assuming one victim/one offense the rate of 209.5 means that one out of every 4.7 business units in Oregon in 1978 was a victim of a burglary.

The rate of 209.5 in 1978 was 8.2 percent lower than 1977 and 13.9 percent lower than 1976 (Figure 24). The trend is similar to that for residential burglary .

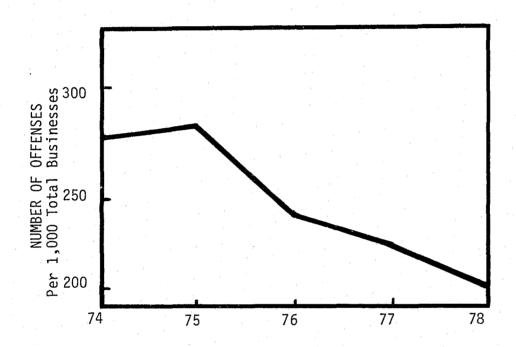

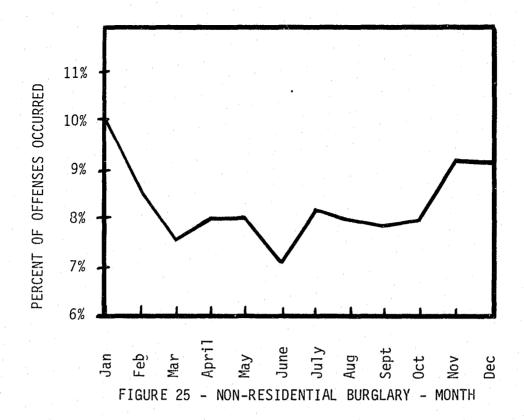

FIGURE 24 - NON-RESIDENTIAL BURGLARY RATES

Non-Residential Burglary--Month (Figure 25)

As shown in Figure 25, the highest number of non-residential burglaries occurred during the month of January in 1978, declining through the spring and summer months, and then gradually increasing through November and December. The peak period of non-residential burglary in January is unlike the peak period of residential burglary in August.

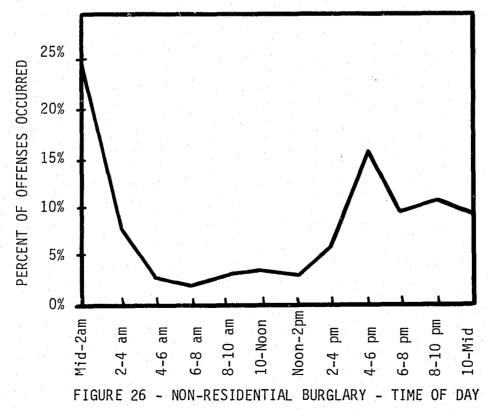

⁴Based on data from <u>Oregon Covered Employment and Payrolls By Industry and County</u>, State of <u>Oregon</u>, <u>Department of Human Resources</u>, <u>Employment Division</u>, quarterly reports 1974-1977. "Total Business Units" include wholesale trade, retail trade, manufacturing, construction, services, finance, and unclassified. A business unit considers a chain of department stores as one unit.

Non-Residential Burglary--Time of Day (Figure 26)

Of the 13,069 non-residential burglaries reported in 1978, 8,058 were reported by the time of day in which they were known to have occurred as depicted in Figure 26.

As shown, the highest numbers of offenses occurred between Midnight and 2 a.m. and 4 p.m. and 6 p.m. Approximately 65 percent of the total occurred at night (6 p.m. - 6 a.m.).

Non-Residential Burglary--Type of Premise (Table 26)

Of the 13,069 non-residential burglaries reported, 6,097 were reported by the type of premise in which the offense occurred as shown in Table 26.

Of the total, 22.4 percent occurred in a public building and 72.3 percent occurred in a business. Types of businesses other than listed, accounted for 41.8 percent of the total, while Nightclub/Tavern/Restaurant represented the second highest percentage (10.5 percent). The third highest percentage involved schools/colleges (9.2 percent).

TABLE 26 - NON-RESIDENTIAL BURGLARY - TYPE OF PREMISE

TOTAL	6,097	100.0%

Non-Residential Burglary--Type of Property Stolen (Table 27)

Of the 13,069 offenses reported, 10,034 were reported by the type of property stolen as shown in Table 27. Excluding miscellaneous items, the highest number of incidents involved currency and securities followed by tools and consumable goods.

The highest recovery rates were for the items of livestock (42.4 percent of the value stolen was recovered), jewelry, watches (35.7 percent), and bicycles (20.0 percent). The lowest recovery rates were shown for construction equipment (0.7 percent), household appliances (3.5 percent), and saddles and tack (3.5 percent).

Arrests For Burglary

In 1978, there were 6,033 arrests for burglary—an increase of 2.0 percent over 1977. Of that total, 64.0 percent were juveniles and 35.9 percent were adults; 94.2 percent were males and 5.8 percent were females. The median age of persons arrested for burglary was 16 years with 92.9 percent of the total arrested being White; 5.7 percent being Negro; and 1.4 percent as other race.

Of the 6,033 arrests for burglary, 5,015 were reported by the degree of charge at time of arrest as shown in Table 28.

As shown, the majority of persons arrested were for first degree burglary (73 percent) which is a class A felony in Oregon. Twenty-seven percent of persons arrested were for 2nd degree burglary, a Class B Felony. The percentage distributions were similar to those shown in 1976 and 1977.

	Key	Juvenile	Adult	Total	Male	Female

TABLE 28 - ARRESTS FOR BURGLARY

LARCENY

In 1978, 86,977 offenses of larceny were reported by police agencies—an increase of 4.8 percent from 1977. Larceny represented 58.5 percent of Index crime and 28.0 percent of all crime reported in 1978. The clearance rate for larceny 20.4 percent in 1978 compared to 21.3 percent in 1977.

The various types of larceny offenses are shown in Table 29. As shown, the highest percentage of offenses involved theft of articles from motor vehicles (23.5 percent) with theft of articles from buildings representing the second highest percentage (20.5 percent). The total value of property stolen in 1978 was \$14,563,460--a decrease of 4.7 percent over 1977.

The largest percentage increase in the larceny categories in 1978 was shown in theft of articles from buildings (15.3 percent). The largest percentage decrease was shown in pocket-picking (12.9 percent). A chi-square test on the distribution of offenses for 1977 and 1978 revealed significant changes in five out of nine categories: an increase of 0.8 percent in shoplifting; a 1.5 percent increase in bicycle theft; an increase of 15.3 percent in theft from buildings; a significant increase in theft of motor vehicle parts and accessories; and a decrease of 12.9 in pocket-picking. The highest percent increase (15.3 percent) was for theft of articles from buildings which contributed most to the significant change in larceny offenses.

Shoplifting has increased 19.4 percent since 1975; theft of articles from motor vehicles has shown a total decrease of 10.0 percent since 1975; and theft of motor parts have shown a total decrease of 24.6 percent since 1975. The lowest mean value per offense was for shoplifting (\$25) which also had the highest clearance rate in 1978 (83.7 percent).

SHOPLIFTING

In 1978, the rate of shoplifting (offenses per 1,000 retail business units) 5 was 1,204 compared to 1,202 in 1977—an increase of 0.2 percent. The rate has increased 20.9 percent since 1974 (996 in 1974).

Shoplifting represented 13.4 percent of the total larceny offenses and 7.9 percent of all offenses reported in Oregon in 1978.

⁵"Total Retail Businesses," <u>Oregon Covered Employment and Payrolls by Industry and County</u>, State of Oregon, Department of Human Resources, <u>Employment Division</u>, guarterly reports, 1974-1977.

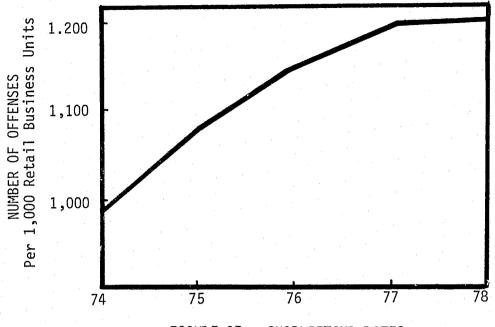

FIGURE 27 - SHOPLIFTING RATES

Shoplifting--Month (Figure 28)

As shown in Figure 28, the highest number of shoplifting offenses were reported to have occurred during the months of December and March with a distribution similar to that shown in 1977.

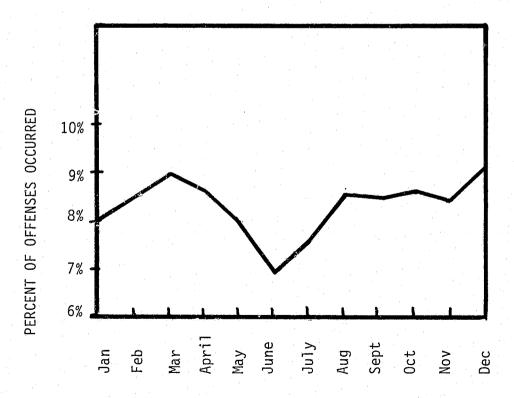

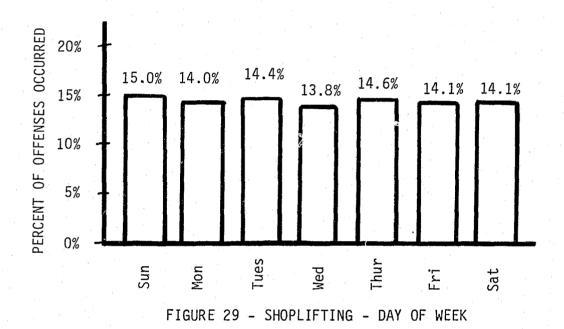

FIGURE 28 - SHOPLIFTING - MONTH

Shoplifting--Day of Week (Figure 29)

Of 11,696 shoplifting offenses reported in 1978, 7,800 were reported by the day of week on which the offense was known to have occurred as depicted in Figure 29.

As shown, there is only a slight variation in the percentages of offenses occurring on different days. The highest number of offenses occurred on Sunday (15.0 percent of the total) with the lowest number occurring on Wednesday.

Shoplifting--Time of Day (Figure 2.30)

Of the 11,696 shoplifting offenses reported in 1978, 7,765 were reported by the time of day in which they were known to have occurred as depicted in Figure 30.

Of the 7,765 offenses reported, the highest number occurred during the hours of 2 p.m. and 4 p.m. (1,819 offenses or 23.4 percent). Of the total reported, 4,861 offenses or 62.6 percent occurred between noon and 6 p.m.

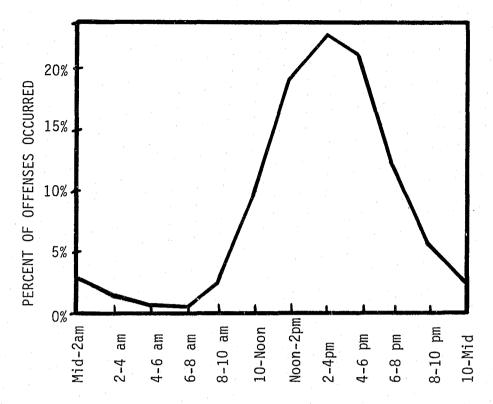

FIGURE 30 - SHOPLIFTING - TIME OF DAY

Shoplifting--Type of Premise (Table 30)

Of the 11,696 offenses in 1978, 6,080 were reported by type of premise in which they occurred as shown in Table 30. The highest percentage (48.9 percent) occurred in a variety/department store, while the second highest percentage (22.8 percent) occurred in a grocery store.

TABLE 30 - SHOPLIFTING - TYPE OF PREMISE

BUSINESS TYPE	NUMBER OF INCIDENTS	PERCENT DISTRIBUTION
Drug Store	279	4.5%
Grocery Store	1,384	22.8%
Clothing Store	447	7.4%
Variety/Department	2,975	48.9%
Other Businesses	995	16.4%
TOTAL	6,080	100.0%

Shoplifting--Type of Property Stolen (Table 31)

Of the 11,696 offenses in 1978, 8,774 were reported by the type of property stolen as shown in Table 31. The type of article most often in shoplifting offenses were consumable goods followed by clothing and furs. The recovery rate for consumable goods was 73.5 percent, and the recovery rate for clothing and furs was 65.6 percent. The lowest recovery rate (11.7 percent) was for cameras and camera accessories.

THEFT OF ARTICLES FROM MOTOR VEHICLES

In 1978, the rate of theft of articles from motor vehicles (offenses per 10,000 registered motor vehicles) was 100.58 compared to 92.9 in 1977—an increase of 7.6 percent. The rate has decreased a total of 19.73 percent since 1975 (125.3 for 1975).6

Theft of articles from motor vehicles represented 23.5 percent of the total larceny offenses and 6.58 percent of the total offenses reported in Oregon in 1978.

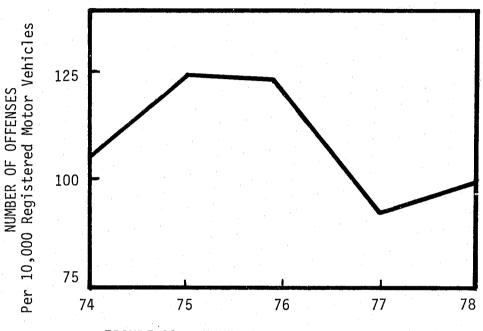

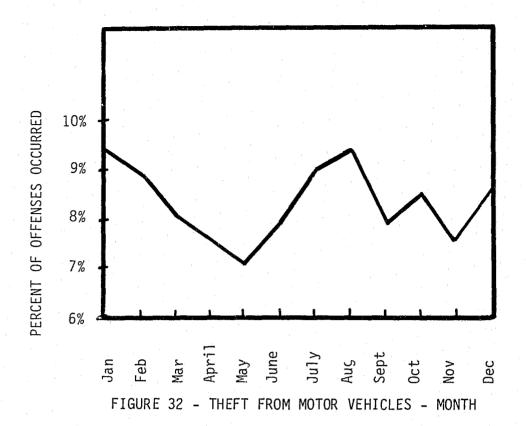

FIGURE 31 - THEFT FROM MOTOR VEHICLES RATES

Theft From Motor Vehicles--Month (Figure 32)

Figure 32 depicts the number of thefts of articles from motor vehicles by the month in which they occurred. As shown, the highest percentage of offenses occurred during January and August (9.4 percent respectively), with the lowest percentage occurring during May (7.2 percent). Contrary to expectation the percentages for December 1977 and 1978 (Christmas Season) did not show a large increase.

⁶Based on data from State of Oregon, Department of Transportation, Motor Vehicles Division.

Theft of Articles From Motor Vehicles--Day of Week (Figure 33)

Of 20,404 offenses of theft of articles from motor vehicles in 1978, 10,262 were reported by the day of week in which they were known to have occurred as depicted in Figure 33.

As shown, the highest number of offenses occurred on Monday (17.5 percent of the total) with little variation among the other days of the week.

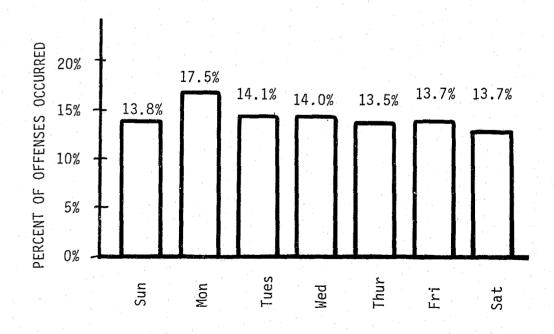

FIGURE 33 - THEFT FROM MOTOR VEHICLES - DAY OF WEEK

Theft From Motor Vehicles -- Time of Day (Figure 34)

Of the 20,404 offenses reported in 1978, 10,056 were reported by time of day of occurrence as depicted in Figure 34.

The highest number of offenses occurred during the period 12 Midnight to 2 a.m. with 67.1 percent of the total occurring between 4 p.m. and 2 a.m.

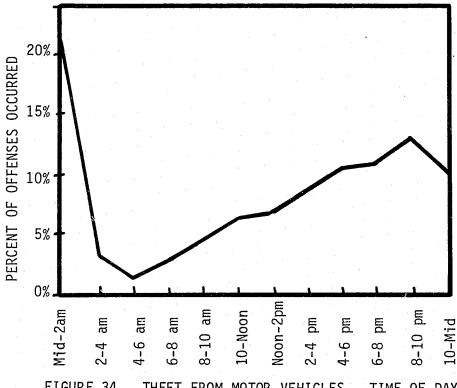

FIGURE 34 - THEFT FROM MOTOR VEHICLES - TIME OF DAY

Theft From Motor Vehicles--Type of Property Stolen (Table 32)

Of the 20,404 offenses in 1978, 16,689 were reported by the type of property stolen as shown in Table 32. The type of property most often stolen was sound equipment (t.v.s, radios, stereos, etc.). Excluding the miscellaneous category, the other types of property most often involved were clothing, motor vehicle parts and accessories, tools, currency, and consumable goods. The highest recovery rate was for musical instruments (12.6 percent), with the lowest recovery rate for office equipment (1.0 percent).

THEFT OF MOTOR VEHICLE PARTS AND ACCESSORIES

In 1978, the rate of theft of motor vehicle parts and accessories was 49.7 (offenses per 10,000 registered motor vehicles) compared to 50.1 in 1977—a decrease of 0.8 percent. This larceny offense category has shown a net decrease of 52.1 percent since 1974.7

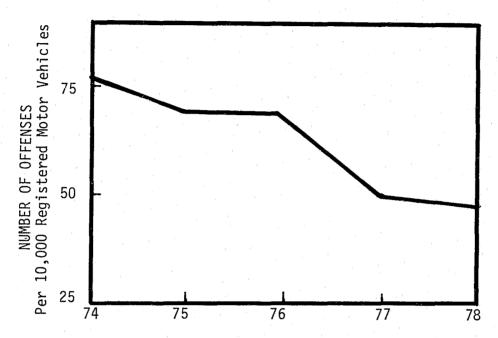

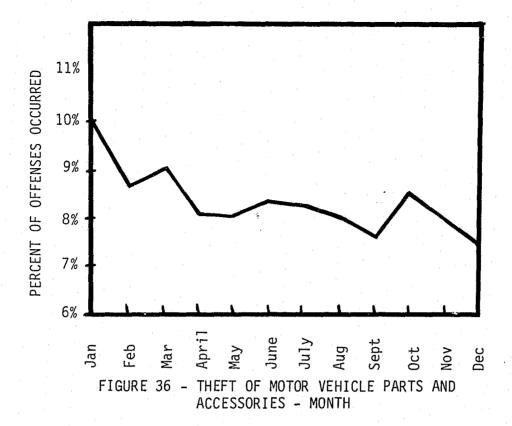

FIGURE 35 - THEFT OF MOTOR VEHICLE PARTS AND ACCESSORIES RATES

Theft of Motor Vehicle Parts and Accessories--Month (Figure 36)

As depicted in Figure 36, the highest number of thefts occurred during January. The number decreased slightly through September, increased in October, then decreased again through December.

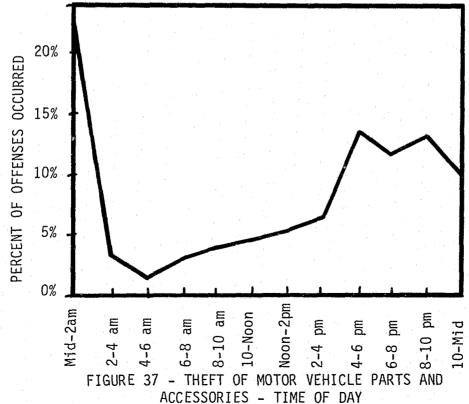

⁷ Ibid.

Theft of Motor Vehicle Parts and Accessories -- Time of Day (Figure 37)

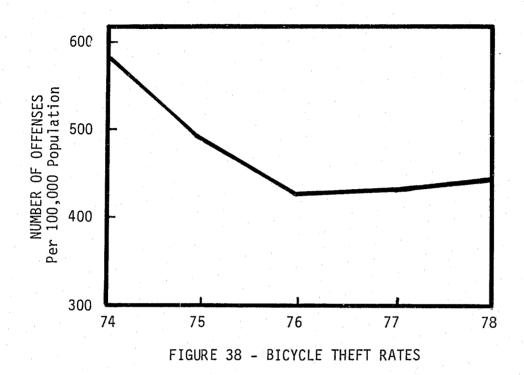

Of the 10,073 offenses in 1978, 3,462 were reported by the time of day in which they were known to have occurred as depicted in Figure 37.

As shown the highest number occurred during the period 12 Midnight to 2 a.m. with 55.6 percent occurring between 4 p.m. and 2 a.m.

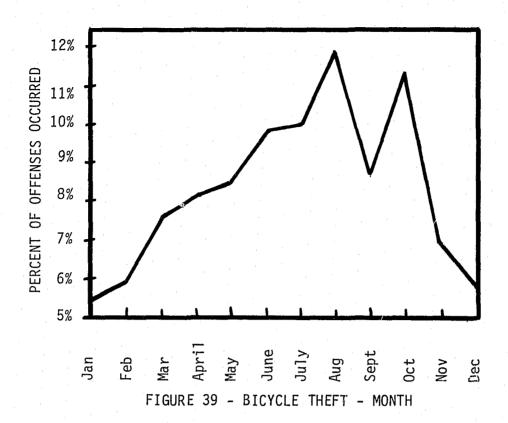

THEFT OF BICYCLES

In 1978, the rate for theft of bicycles was 442.04 (offenses per 100,000 population) an increase of 2.6 from the rate of 431 in 1977. Bicycle theft showed a 26 percent decrease from 1974 to 1976. Theft of bicycles represented 12.0 percent of the total larceny offenses and 3.4 percent of all offenses reported in Oregon in 1978.

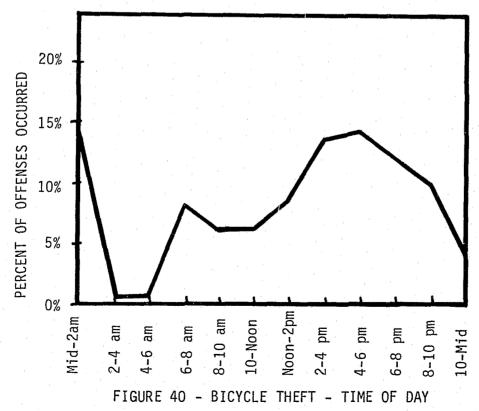

Theft of Bicycles--Month (Figure 39)

In 1978, the highest numbers of offenses occurred between May and October (60.0 percent) as shown in Figure 39. The highest month was August followed by October.

Theft of Bicycles--Time of Day (Figure 40)

Of the 10,472 offenses in 1978, 6,221 were reported by the time of day in which they were known to have occurred as shown in Figure 40. The highest numbers of offenses occurred between 12 midnight and 2 a.m. and 4 p.m. to 6 p.m.

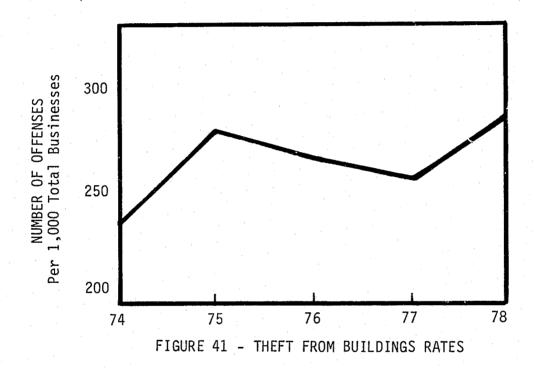

-64-

THEFT OF ARTICLES FROM BUILDING

In 1978, the rate for theft of articles from buildings was 286.9 (offenses per 1,000 total businesses--includes public buildings) compared to 258.1 in 1977--an increase of 11.2 percent.⁸

As shown in Figure 2.41, after a 17.7 percent increase from 1974 to 1975, the rate showed a 7.6 percent net decrease through 1977; however, in 1978 the rate again increased 11.2 percent.

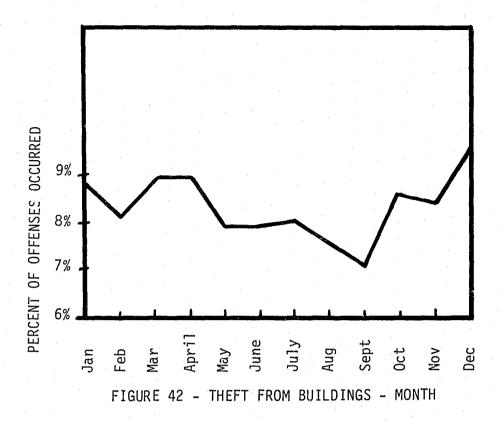

In 1978, theft of articles from buildings represented 20.6 percent of all larceny offenses and 5.8 percent of all crimes reported.

Theft of Articles From Building--Month

As depicted in Figure 42, the percentage of offenses in 1978 showed quite a fluctuation from month to month. The highest months reported were December, January, March, and April, with the high for December.

⁸ Oregon Covered Employment and Payrolls By Industry and County, op. cit.

Theft of Articles From Buildings--Type of Premise (Table 33)

Of the 17,893 offenses in 1978, 4,801 were reported by the type of premise in which they were committed as shown in Table 33.

Of the 4,801 offenses reported, 72.4 percent occurred in a business and 27.6 percent in a public building. Aside from "Other Business" (32.0 percent) the highest percentages of offenses occurred in Schools/Colleges (18.4 percent) Nightclub/Tavern/Restaurants (18.3 percent), and Service Stations (8.6 percent).

Theft of Articles From Buildings--Type of Property Stolen (Table 34)

Of the 17,893 offenses, 12,569 were reported by the type of property stolen as shown in Table 34. Excluding miscellaneous items, the highest numbers of incidents involved currency and securities, and clothing and furs.

The highest recovery rate in property value was calculated for livestock (37.5 percent of the value stolen was recovered) followed by musical instruments (23.2 percent) and cameras (16.2 percent). The lowest recovery rates were for jewelry and watches (0.07 percent), construction equipment (1.7 percent), and tools (5.7 percent).

Arrests For Larceny

In 1978, there were 17,931 arrests for larceny offenses—a 1.5 percent decrease from 1977. Of the total, 50.7 percent were juveniles and 49.3 percent were adults; 67.6 percent of the total were males and 32.3 percent were female. The median age of persons arrested was 17 years with 90.4 percent of the total being White; 7.1 percent were Negro; and 2.5 percent were other races.

Of the 17,931 arrests for larceny in 1978, 14,227 were reported by the degree of charge at time of arrest as shown in Table 35.

The majority of arrests in 1978 (83 percent) were for second degree theft --a class A misdemeanor in Oregon (property value was under \$200). The distributions were quite similar to those shown for 1976 and 1977. Of the total arrests, 11 percent were felonies; 83 percent were misdemeanors; and 6 percent cannot be determined from the data given.

TABLE 35 - ARRESTS FOR LARCENY

MOTOR VEHICLE THEFT

There were 9,989 offenses of motor vehicle theft reported in 1978--an increase of 5.7 percent over 1977. Motor vehicle theft represented 6.7 percent of Index crime and 3.2 percent of all crimes reported in 1978. The clearance rate was 26.2 percent in 1978 compared to 22.1 percent in 1977.

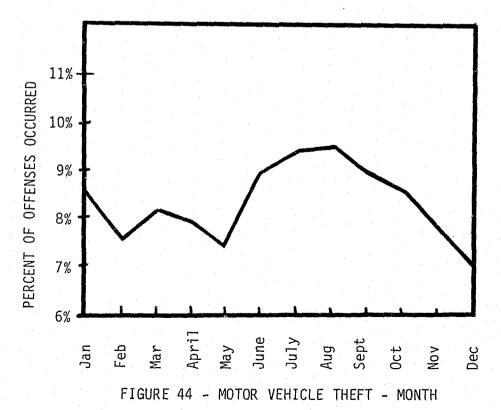

The motor vehicle theft rate in 1978 (offenses per 10,000 registered motor vehicles) was 49.2 compared to 45.7 in 1977--an increase of 7.7 percent (see Figure 43.). This increase in rate is contrary to the steady decrease in rate from 1975 through 1977 (down 21 percent total).9

⁹Motors Vehicles Division, op. cit.

Motor Vehicle Theft--Month (Figure 44)

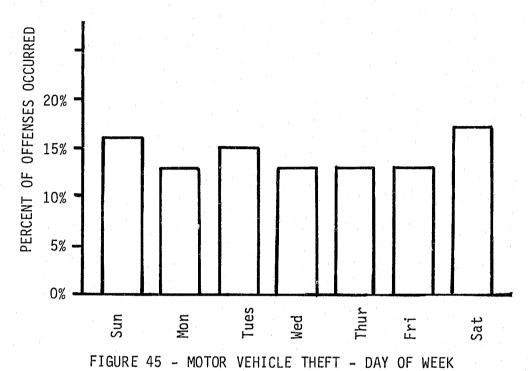

In 1978, the highest percentage of offenses occurred during August $(9.5 \, \text{percent})$ compared to September in 1977 and October for the 3-year average 1974-1976. The percentage of offenses in 1978 were the highest from June through September $(36.9 \, \text{percent})$.

Motor Vehicle Theft--Day of Week (Figure 45)

Of the 9,989 offenses reported in 1978, 5,132 were reported by the day of the week in which they were known to have occurred as shown in Figure 45.

The highest number of offenses occurred on Saturday and Sunday (32.2 percent of the total).

Motor Vehicle Theft--Time of Day (Figure 46)

Of the 9,989 offenses in 1978, 3,692 were reported by the time of day in which they were known to have occurred as shown in Figure 46. As shown, the highest number of offenses occurred between 10 p.m. and midnight with 54 percent occurring between 4 p.m. and 2 a.m.

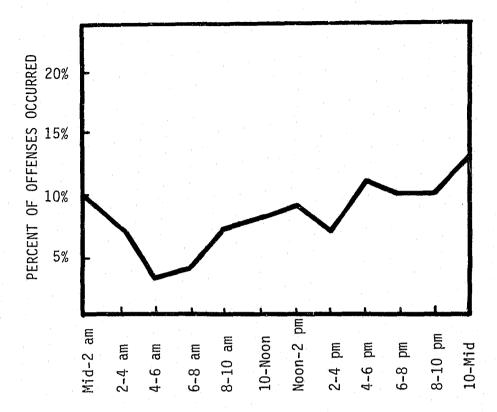

FIGURE 46 - MOTOR VEHICLE THEFT - TIME OF DAY

Motor Vehicle Theft--Rates By Type (Table 36)

The rates (number of offenses per 10,000 registered vehicles) are presented in Table 36 by the various type of vehicle for the period 1975-1978.

As shown, the largest increase was calculated for the category of trucks and busses (29.4 percent in 1978) while the smallest increase was calculated for automobiles (+0.8 percent).

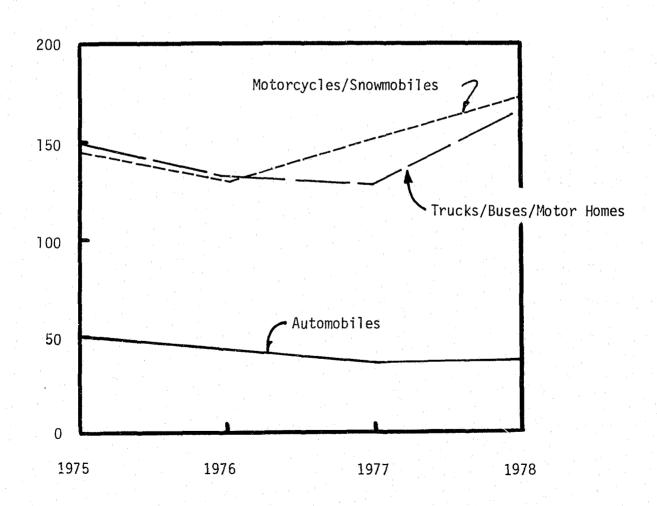

In 1978, the rate for stolen automobiles was 36.6 compared to 165.1 for trucks/busses (more than 4 times higher than autos) and 171.1 for other types. The other category includes motorcycles and snowmobiles.

Arrests For Motor Vehicle Theft

In 1978, 2,510 arrests were made for motor vehicle theft--an increase of 16.7 percent over 1977. Of the total, 60.8 percent were of juveniles and 39.2 percent were adults; 89.9 percent were male and 10.1 percent were females.

The median age of persons arrested for motor vehicle theft in 1978 was 17 years with 93.4 percent of the total arrested being White; 4.1 percent were Negro; and 2.5 percent were other races.

Of the 2,510 arrests for motor vehicle theft in 1978, 2,118 were reported by the degree of charge at time of arrest as shown in Table 37. The majority of arrests (82 percent) were for unauthorized use--a class C felony in Oregon. The distribution of types of arrests in 1978 was similar to that shown in 1976 and 1977.

Of the total arrests reported by degree of charge, 99 percent were felonies.

OTHER ASSAULTS (NOT AGGRAVATED)

There were 10,380 offenses of other assaults reported in 1978--an increase of 22.2 percent over 1977. Other assaults represented 6.4 percent of Part II offenses and 3.4 percent of all offenses reported in 1978.

Of the 10,380 offenses, 5,577 were reported by the specific type of offenses as shown in Table 38. Of the 5,577 offenses reported, 52.5 percent involved harrassment; 17.5 percent were for resisting arrest; 4.2 percent were for coercion; and 25.8 percent were for other types of less serious assaults. The distribution is similar to that shown for 1977.

TABLE 38 - OTHER ASSAULTS - TYPE

TYPE	NUMBER OF OFFENSES	PERCENT DISTRIBUTION
Resisting Arrest	976	17.5%
Coercion	236	4.2%
Harrassment (physical)	2,928	52.5%
Other	1,437	25.8%
TOTAL	5,577	100.0%

Arrests For Other Assaults

In 1978, there were 3,400 arrests made for other assaults—an increase of 52.1 percent over 1977. Of the total, 17.8 percent were juveniles and 82.2 percent were adults; 89.0 percent were males and 11.0 percent were female. The median age of persons arrested for other assaults was 24 years with 83.1 percent of the total being White; 13.6 percent were Negro; and 3.3 percent were other races.

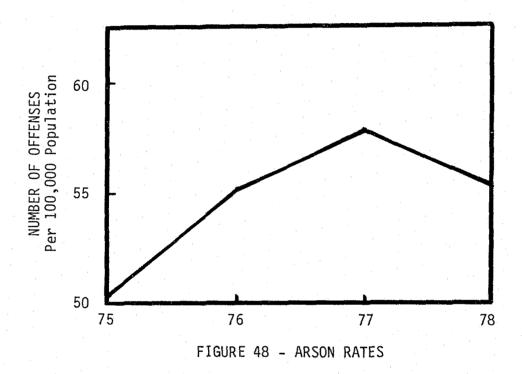

Of the 3,400 arrests for other assaults, 1,889 were reported by the degree of charge at time of arrest as shown in Table 39. The highest percentage of arrests (32 percent) were for resisting arrest. The distributions were different from 1977 with a lesser percentage arrested for resisting arrest, coercion, and harassment. Of the total arrested, 0.4 percent were for felonies (coercion) and 99.6 percent were misdemeanors.

ARSON

There were 1,379 offenses of arson reported in 1978. Arson represented 0.9 percent of Part II offenses and 0.4 percent of all offenses reported in 1978. The clearance rate for arson was approximately 18.5 percent based on 1,374 offenses and 254 clearances. The rate (offenses per 100,000 population) for arson in 1978 was 55.8 compared to 57.9 in 1977—a decrease of 3.6 percent. This decrease in rate shows a change in the trend of a steady increase from 1975 through 1977 (+15.1 percent total) as shown in Figure 48.

Arson--Month of Occurrence (Figure 49)

As shown in Figure 49, the highest number of offenses reported in 1978 occurred during the months of August and September.

Arson--Day of Week (Figure 50)

Of the 1,379 arson offenses in 1978, 948 were reported by the day of week on which they were known to have occurred as shown in Figure 50. As shown, there was little variation in the percentages of offenses occurring on specific days.

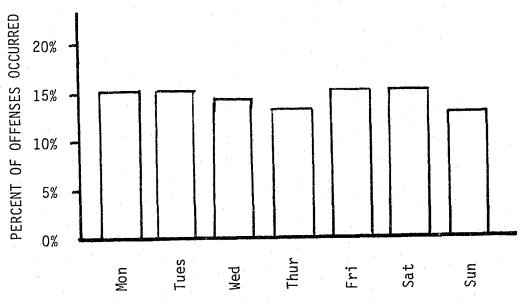

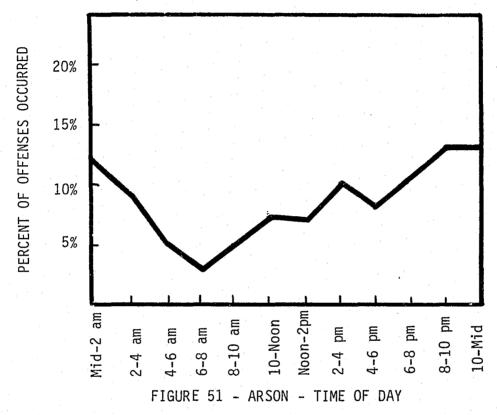

FIGURE 50 - ARSON - DAY OF WEEK

Arson--Time of Day (Figure 51)

Of the 1,379 arson offenses in 1978, 870 were reported by the time of day in which they were known to have occurred as shown in Figure 51.

In 1978, the highest percentage of offenses occurred between 10 p.m. and Midnight (13 percent of th total). Thirty-four percent of the offenses occurred between 8 p.m. and 2 a.m.

Arson--Target (Table 40)

Of the 1,379 offenses in 1978, 1,083 were reported by the specific target or location of offense as shown in Table 40. Of the 1,083 offenses, 32 percent involved residences; 32 percent involved other buildings; 17 percent involved vehicles; and the remaining 19 percent involved other types of targets or locations.

TABLE 40 - ARSON - TYPE OF PROPERTY

TARGET	NUMBER OF OFFENSES 1978	PERCENT DISTRIBUTION
Residence	350	32.0%
Other Building	342	32.0%
Vehicle	189	17.0%
Other	202	19.0%
TOTAL	1,083	100.0%

Arrests For Arson

There were 342 arrests made in 1978 for arson compared to 334 in 1977--an increase of 2.4 percent. Of the total, 63.4 percent were juveniles and 36.6 were adults; 89.2 percent of the total were male and 10.8 percent were female. The median age of persons arrested was 15 years with 95.0 percent of the total White; 4.4 percent Negro; and 0.6 percent other races.

Of the 342 arrests for arson in 1978, 305 were reported by the degree of charge at time of arrest as shown in Table 41. The highest percentage of arrests were for first degree arson (42 percent of the total)--a class A felony in Oregon. Of the total arrested, 42 percent were for Class A (first degree), 20 percent for Class C felonies (2nd degree) and 38 percent were for misdemeanors (reckless burning).

FORGERY/COUNTERFEITING

In 1978, there were 2,492 offenses of forgery/counterfeiting reported. Forgery/counterfeiting represented 1.5 percent of the Part II offenses and 0.8 percent of the total offenses reported in 1978. The clearance rate for forgery/counterfeiting was approximately 28.7 percent based on 2,490 offenses--715 clearances.

The rate of forgery/counterfeiting offenses in 1978 (offenses per 100,000 population) was 100.8 compared to 93.9 in 1978—an increase of 7.4 percent. The rates have shown a net increase of 36.9 percent since 1975 (Figure 52).

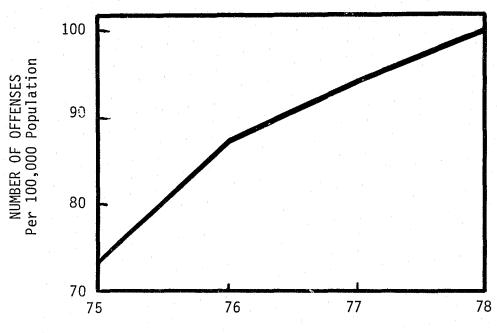

FIGURE 52 - FORGERY/COUNTERFEITING RATES

Forgery/Counterfeiting--Month (Figure 53)

The highest number of offenses were reported as occurring during the months of September and October as shown in Figure 53. The decrease in the percentage of offenses in November of 1978 is similar to the decrease in November, 1977; however, in 1978 the smallest percentages of offenses occurred in February, June, and November, whereas in 1977 the smallest percentages occurred in April and November with a peak percentage in June.

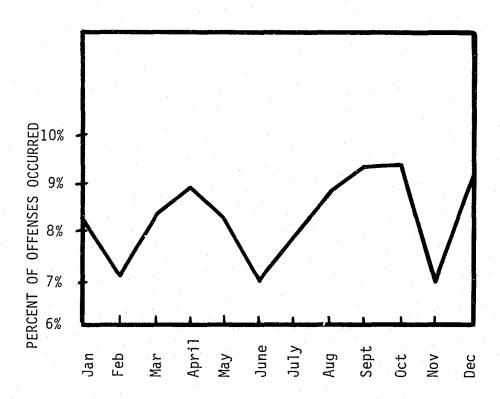

FIGURE 53 - FORGERY/COUNTERFEITING - MONTH

Forgery/Counterfeiting--Type of Offense (Table 42)

Of the 2,492 offenses in 1978, 1,596 were reported by specific type of offense as shown in Table 42.

Of the 1,596 offenses reported, 96 percent were forgery offenses and 4.0 involved counterfeiting. The majority of offenses (74.4 percent) involved forging checks.

Arrests For Forgery/Counterfeiting

In 1978, 751 arrests were made for forgery/counterfeiting compared to 691 in 1977--an increase of 8.7 percent. Of the total, 31.2 percent were juveniles and 68.8 percent were adults; 61.5 percent were male and 38.5 percent were female. The median age of persons arrested was 20 years with 85.0 percent of the total arrested White; 14.5 percent Negro; and 0.5 percent other races.

Of the 751 arrests for forgery/counterfeiting in 1978, 523 were reported by the degree of charge at time of arrest as shown in Table 43. Of that total, 78 percent were for Forgery I--a class C felony in Oregon. Of the 523 arrests, 82 percent were for felonies (Forgery I, Criminal possession of forged instrument, and criminal possession of a forgery device (First Degree); 5.1 percent were for misdemeanors (Forgery II criminal possession of a forged instrument, second degree, and criminal simulation), and 2.9 percent cannot be determined with the data given.

FRAUD

In 1978, there were 9,948 offenses of fraud reported. Fraud represented 6.2 percent of the Part II offenses and 3.2 percent of the total offenses reported in 1978. The clearance rate for fraud was approximately 37.9 percent based on 9,950 offenses--3,771 clearances.

The rate for fraud in 1978 (offenses per 100,000 population) was 402.4 compared to 347.6 in 1977—an increase of 15.8 percent. The rates have shown a net increase of 49.9 percent since 1975 (Figure 54).

Fraud--Type of Offense (Table 44)

Of the 9,948 fraud offenses in 1978, 8,584 were reported by the specific type as shown in Table 44.

Of the 8,584 offenses reported, 70.1 percent involved check fraud; 18.5 percent were for theft of services; 6.9 percent were theft by deception; 3.1 percent involved credit cards; and 1.3 percent were other types of fraud.

The lowest mean value per offense was \$30 for theft of services which includes obtaining compensable services and intentionally not paying for them. The highest mean value for offense was \$711 for theft by deception.

Arrests For Fraud

In 1978, 1,301 arrests were made for fraud compared to 1,140 in 1977--an increase of 14.1 percent. Of the total, 13.5 percent were juveniles and 86.5 percent were adults; 72.7 percent were male and 27.3 percent were females. The median age of persons arrested was 24 years with 93.2 percent of the total arrested being White; 4.9 percent being Negro; and 1.9 percent being other races.

Of the 1,301 arrests for fraud in 1978, 1,078 were reported by the degree of charge at time of arrest as shown in Table 45. The highest percentages of arrests were for negotiating a bad check (39 percent) and theft of services (38 percent). The majority of arrests of juveniles was for theft of services (50 percent) while the highest percentage of adults arrested were for bad checks (44 percent).

STOLEN PROPERTY OFFENSES

The offense category of Stolen Property includes buying, receiving, and possessing as well as all attempts to commit any of these offenses.

Of the 312 offenses involving stolen property in 1978, 272 were reported by the specific type of activity involved as shown in Table 46. The highest percentage of offenses (39.0 percent) involved receiving and concealing, followed by possession of stolen property (32.0 percent).

TABLE 46 - STOLEN PROPERTY OFFENSES - TYPE

TOTAL	272	100.0%

Arrests For Stolen Property Offenses

In 1978, there were 410 arrests made for stolen property offenses compared to 509 in 1977--a considerable decrease of 19.5 percent. Of the total, 52.9 percent were of juveniles and 47.0 percent were adults; 88.1 percent were male and 12 percent were female. The median age of persons arrested was 17 years with 91.7 percent of the total arrested being White; 7.3 percent being Negro; and 1 percent being other races.

VANDALISM

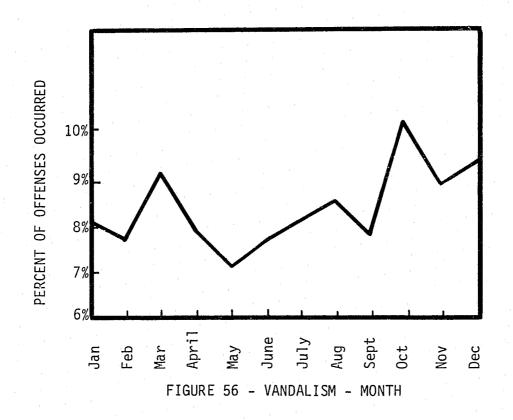

There were 36,814 offenses of vandalism reported in 1978. Vandalism represented 22.8 percent of the Part II offenses and 11.9 percent of all offenses reported in 1978. The clearance rate for vandalism was approximately 12.1 percent in 1978.

The rate for vandalism in 1978 was 1,489.2 (offenses per 100,000 population) compared to 1,447.6 in 1977—a slight increase of 2.9 percent. Vandalism rates decreased 1.4 percent from 1976 to 1977 after an increase of 1.9 from 1975 to 1976 (see Figure 55).

Vandalism--Month (Figure 56)

The highest numbers of vandalism offenses reported in 1978 occurred during the months of October, November, December, and March as shown in Figure 56. Like the pattern in 1977, the number of offenses were the lowest during the late spring and early summer months of 1978 with a slight increase during August.

Vandalism--Day of Week (Figure 57)

Of the 19,452 offenses reported by the day of week on which they were known to have occurred, the highest percentage occurred on Saturday and Sunday (34 percent)—see Figure 57.

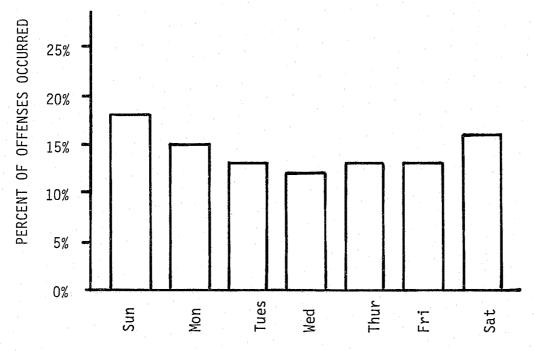

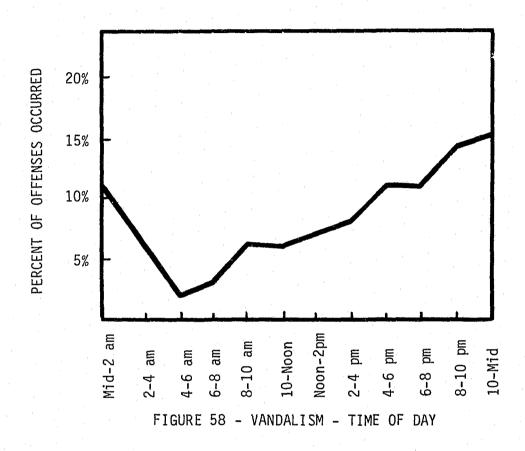

FIGURE 57 - VANDALISM - DAY OF WEEK

Vandalism -- Time of Day (Figure 58)

Of the 15,326 offenses reported by the time of day in which they were known to have occurred, the highest percentage (15 percent) occurred between 10 p.m. and 12 midnight. Of the total, 62 percent occurred between 4 p.m. and 2 a.m. as shown in Figure 58.

Vandalism--Type of Property Involved (Table 48)

Of the 36,814 vandalism offenses in 1978, 26,081 were reported by the type of property damaged or destroyed (Table 48).

As shown, the highest percentages outside of the "Other" category involved vehicles (38.8 percent) followed by residences (19.7 percent), and public buildings (18.0 percent).

TABLE 48 - VANDALISM - TYPE OF PROPERTY

Arrests For Vandalism

In 1978, 3,830 arrests were made for vandalism compared to 3,179 in 1977 -- an increase of 20.5 percent. Of the total, 56.3 percent were of juveniles and 43.7 percent were adults; 92.3 percent were male and 7.7 percent were female. The median age of persons arrested was 17 years with 94.5 percent of the total arrested being White; 3.5 percent were Negro; and 2.0 percent were other races.

Of the 3,130 arrests reported by degree of charge, as shown in Table 49, the majority (60 percent) were for Criminal Mischief 2--a class A misdemeanor in Oregon. The next highest percentage (22 percent) was for Criminal Mischief 3--a class C misdemeanor. The distributions were similar to those shown in 1976 and 1977.

WEAPONS OFFENSES

This category deals with weapons offenses, regulatory in nature, and includes manufacturing, selling, furnishing, and illegal possession of deadly weapons.

Of the 1,988 offenses in 1978, 1,458 were reported by the specific type of activity involved as shown in Table 50. Of the total, 449 (30.8 percent) involved "Other" such as discharging and selling; 41.8 percent involved carrying concealed weapons; and 27.4 percent involved illegal possession.

TABLE 50 - WEAPONS OFFENSES - TYPE

TYPE OF OFFENSE	NUMBER OF OFFENSES	PERCENT DISTRIBUTION
Possess Illegally	399	27.4%
Carry Concealed	610	41.8%
Other (Discharge, Selling, etc.)	449	30.8%
TOTAL	1,458	100.0%

Arrests For Weapons Offenses

In 1978, 1,623 arrests were made for weapons offenses compared to 1,375 in 1977—an increase of 18.0 percent. Of the total, 19.2 percent were of juveniles and 80.8 percent were adults; 90.6 percent were male and 9.4 percent were female. The median age of persons arrested was 23 years with 85.0 percent of the total being White; 12.8 percent were Negro; and 2.2 percent were of other races.

Of the 1,013 arrests reported by degree of charge in 1978, as shown in Table 51, 49 percent were for concealed weapons—an unclassified misdemeanor in Oregon. The distributions are similar to those shown in 1976 and 1977.

PROSTITUTION

In 1978, 821 offenses of prostitution were reported—an increase of 27.5 percent over 1977. Prostitution represented 0.5 percent of Part II offenses and 0.3 percent of all offenses reported in 1978. Because of the low numbers of offenses, information regarding month, day of week, and time of day are not presented in this report.

Arrests For Prostitution

In 1978, there were 849 arrests made for prostitution offenses compared to 659 in 1977—a substantial increase of 28.8 percent. Of the total, 7.9 percent were of juveniles and 92.1 percent were adults; 47.2 percent were males and 52.8 percent were female. The median age of persons arrested was 21 years with 73.7 percent of the total arrested being White; a disproportionally high 23.4 percent being Negro; and 2.7 percent being other races.

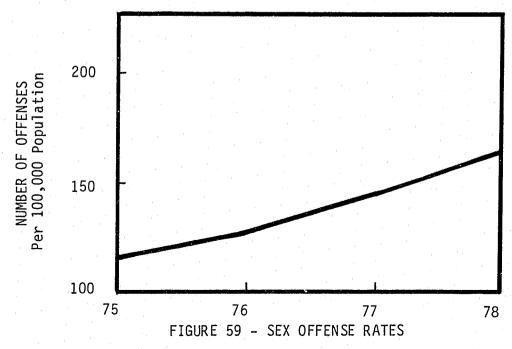

Only 47 arrests were reported by the degree of charge at time of arrest and therefore are not shown in this report.

SEX OFFENSES

This category includes all sex offenses (other than forcible rape, prostitution, and commercialized vice) such as incest, indecent exposure, sodomy, and statutory rape.

In 1978, 4,078 sex offenses were reported by police agencies. Sex offenses represented 2.5 percent of Part II offenses and 1.3 percent of all offenses reported in 1978.

The rate for sex offenses in 1978 was 165.0 (offenses per 100,000 population) compared to 146.2 in 1977—an increase of 12.9 percent. The rate has shown a net increase of 42.9 percent since 1975 (Figure 59).

Sex Offenses--Month (Figure 60)

In 1978, the highest percentage of offenses occurred during May and July shown in Figure 60.

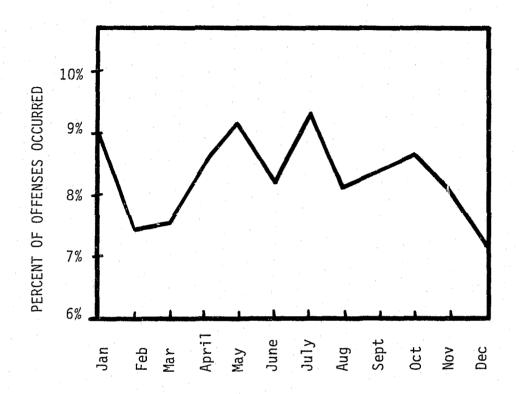

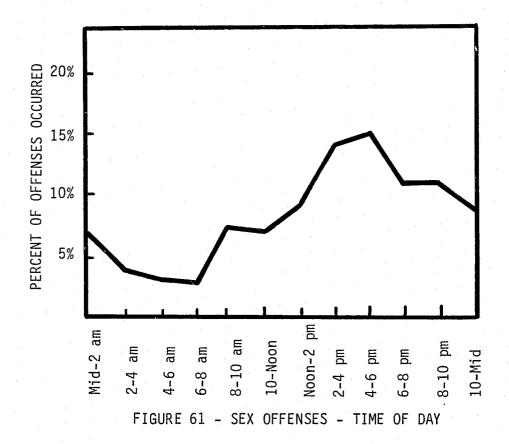

FIGURE 60 - SEX OFFENSES - MONTH

Sex Offenses--Time of Day (Figure 61)

Of the 4,078 sex offenses in 1978, 2,223 were reported by the time of day in which they were known to have occurred as shown in Figure 61.

The highest number occurred between 4 p.m. and 6 p.m. with 69 percent of the total occurring between Noon and Midnight.

Sex Offenses -- Type of Offense (Table 52)

Of the 4,078 sex offenses in 1978, 2,943 were reported by the type of offense committed and the victim's age and sex as shown in Table 52. Of the 2,943 offenses reported, 35.0 percent involved exposure followed by molesting (31.0 percent) and forcible-sodomy (7.4 percent).

<u>Victims--Age</u> and Sex

Of the total victims, 84.0 percent involved females and 16.0 percent were males; 50.0 percent were juveniles and 50.0 percent were adults. The rate per 100,000 females was 195.26 compared to 39.16 for males. The rate for juvenile victims was 104.56 compared to 83.64 for adults.

Arrests For Other Sex Offenses

In 1978, 812 arrests were made for other sex offenses compared to 627 in 1977—a significant increase of 29.5 percent. Of the total, 21.4 percent were of juveniles and 78.6 percent were of adults; 97.3 percent were males and 2.7 percent were females. The median age of persons arrested was 27 years with 93.0 percent of the total arrested being White; 4.7 percent being Negro; and 2.3 percent being of other races.

Of the 812 arrests for other sex offenses, 597 were reported by the specific charge at time of arrest as shown in Table 53. The highest number of arrests were for sexual abuse (35.5 percent of the total) followed by public indecency (29.6 percent). Of the total arrests, 52.6 percent were for felonies; 44.9 percent were misdemeanors; and 2.5 percent could not be determined with the data given.

DRUG ABUSE

Due to the nature of this offense and the fact that an arrest is usually made at the time an offense is reported or discovered, only arrest data is presented in this section.

The rate of arrests for drug abuse (arrest per 100,000 population) in 1978 was 417.5 compared to 437.5 in 1977--a decrease of 4.8 percent as shown in Figure 62.

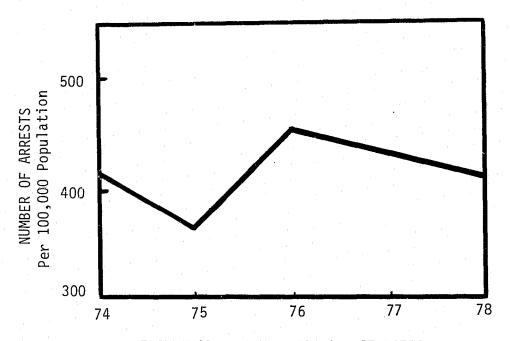

FIGURE 62 - DRUG ABUSE ARREST RATES

Type of Drugs Involved (Table 54)

Of the 9,242 arrests for drug abuse, 22.7 percent were juveniles and 77.3 percent were adults; 86.9 percent were male and 13.1 percent were females. The median age of persons arrested was 20 years with 97.0 percent of the total arrested being White; only 0.9 percent being Negro; and 2.1 percent being of other races.

The majority of arrests (85.7 percent) were for marijuana with 5.2 percent of the the total for narcotics such as heroin, cocaine, and opium (Table 54).

Degree of Charge at Arrest

Of the 9,242 arrests for drug abuse, 7,490 were reported by the specific type of drug and degree of charge at time of arrest. The data are arranged by juvenile and adult arrests as presented in Tables 55 and 56.

In total, 5,898 arrests or 78.7 percent were for possession of drugs for use. Of those 5,898 arrests, 5,408 were for marijuana.

Of the total arrests of juveniles, 58.5 percent involved possession for use of under one ounce of marijuana.

Of the total arrests of adults, 60.6 percent involved possession for use of under one ounce of marijuana.

Of the juvenile arrests, 11.7 percent were for felonies, 6.3 percent were misdemeanors, and 82 percent were unclassified. Of the adult arrests, 17.6 percent were for felonies, 7.4 percent were misdemeanors, and 75 percent were unclassified. Possession for use of under one ounce of marijuana is accountable for most of the unclassified offenses for both juveniles and adults.

OFFENSES AGAINST THE FAMILY

In 1978, 1,595 family offenses were reported by police agencies. Family offenses represented 1.0 percent of Part II offenses and 0.5 percent of the total offenses reported in 1978. The clearance rate was approximately 22.5 percent based on 4,070 offenses--917 clearances.

The rate for offenses against the family in 1978 was 64.5 (offenses per 100,000 population) compared to 41.1 in 1977—a sharp increase of 56.9 percent as shown in Figure 63; however, this increase is apparently attributable to enactment of ORS 518-777 which requires Children's Services Division to report all suspected cases of child abuse to the police.

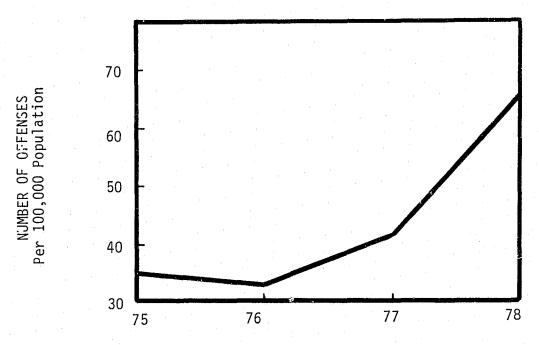

FIGURE 63 - FAMILY OFFENSE RATES

Of the 1,595 family offenses, 1,298 were reported by specific type of offense in 1978 per Table 57. As shown, 40.3 percent of the total involved child neglect and 45.0 percent involved child abuse. The largest increase was shown for child abuse.

Arrests For Family Offenses

In 1978, there were 143 arrests made for family offenses—a significant increase of 83.3 percent over 1977. The median age of persons arrested was 27 years. Of the 143 arrests, 93 were reported by the specific charge at time of arrest as shown in Table 58. Of the total, 40 percent of the arrests were for types of offenses other than shown. In 1978, 5 percent of the arrests were for child abuse, whereas only 3 percent of the arrests in 1977 were for child abuse.

DRIVING UNDER THE INFLUENCE OF INTOXICANTS (DUII)

Due to the nature of the offense and the fact that an arrest is made at the time an offense is known, data regarding DUII is presented in the following arrest section.

In 1978, there were 26,850 arrests made for DUII compared to 27,563 in 1977—a decrease of 2.6 percent. The arrest rate in 1978 was 1,547.5 (per 100,000 registered Oregon drivers) compared to 1,648.1 in 1977. This decrease in rate (6.1 percent) is a change from the steady increase (total +50 percent) from 1974 through 1977.10

 $^{10 \}text{Based}$ on number of arrests per 100,000 licensed Oregon drivers.

Arrests For DUII--Day of Week (Figure 65)

Of the 26,850 arrests for DUII, 23,555 were reported by the day of the week on which they occurred. As shown in Figure 65, the highest percentage (24 percent) occurred on Sunday with 58 percent of the total occurring from Saturday through Monday.

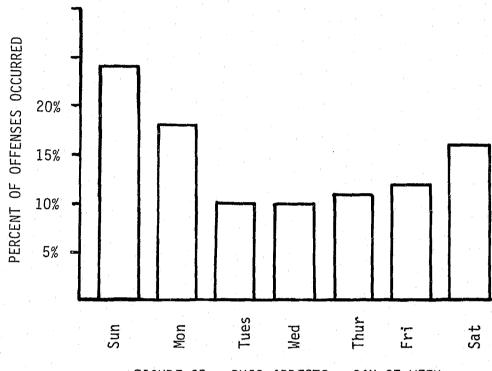

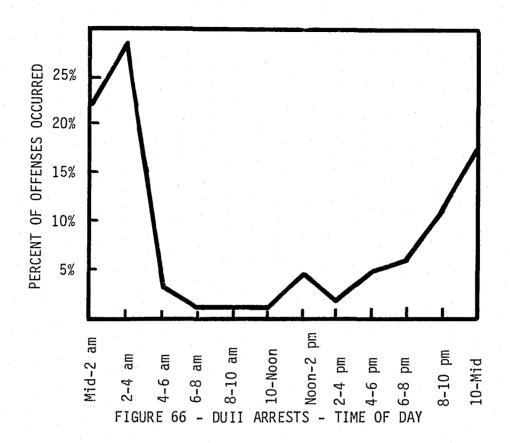

FIGURE 65 - DUII ARRESTS - DAY OF WEEK

Arrests For DUII--Time of Day (Figure 66)

Of the 26,850 arrests for DUII, 23,506 were reported by the time of day in which they occurred. As shown in Figure 66, the highest percentage of arrests occurred between 2 a.m. and 4 a.m. with 78.0 percent of the total occurring between 10 p.m. and 4 a.m.

Arrests For DUII

Of the 26,850 arrests for DUII in 1978, 2.4 percent were of juveniles and 97.6 percent were adults; 87.6 percent were male and 12.4 percent were female. The percentages of arrests for DUII by age and sex are consistent with those shown during 1977. The median age of persons arrested was 32 years.

There were 23,243 arrests reported by specific type and circumstances at time of arrest as shown in Table 59. Of that total, 96.0 percent were arrested for alcohol; 0.3 percent for drugs; and 3.0 percent for other types of intoxicants.

LIQUOR LAWS

Due to the nature of these offenses and the fact that an arrest is usually made at the time an offense is reported or known, data regarding these offenses are presented in the following arrest section.

Arrests For Liquor Laws

In 1978, there were 13,328 arrests made for violation of Oregon's liquor laws. Of the total, 38.6 percent were juveniles (17 years and under) and 61.4 percent were adults (18 years and older); 84.1 percent were males and 15.9 percent were females. The median age of persons arrested was 18 years.

Of the 13,328 arrests, 11,388 were reported by the specific type of violation that occurred as shown in Table 60. Of the 11,388 arrests reported, 80 percent were for minor-in-possession (M.I.P.). The distributions of arrests were similar to those shown in 1976 and 1977.

DISORDERLY CONDUCT

In 1978, there were 6,287 offenses of disorderly conduct reported. The rate in 1978 was 254.3 (offenses per 100,000 population) compared to 242.4 in 1977—an increase of 4.9 percent. The rate has shown a steady increase since 1975 as shown in Figure 67.

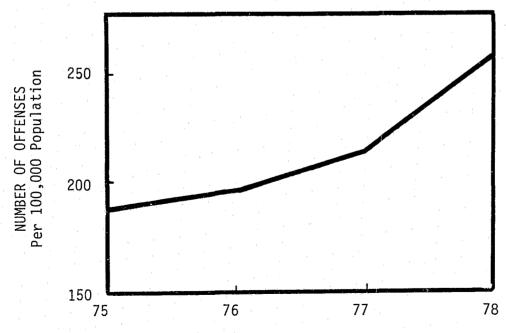

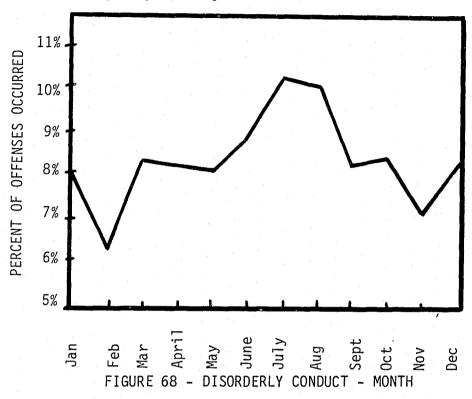

FIGURE 67 - DISORDERLY CONDUCT RATES

Disorderly Conduct--Month (Figure 68)

As shown in Figure 68, the highest numbers of offenses occurred during the months of June, July and August.

Disorderly Conduct -- Day of Week (Figure 69)

Of the 6,287 offenses in 1978, 4,623 were reported by the day of week on which the offenses was known to have occurred (Figure 69). The highest numbers of offenses occurred on Sunday and Monday (40.0 percent of the total).

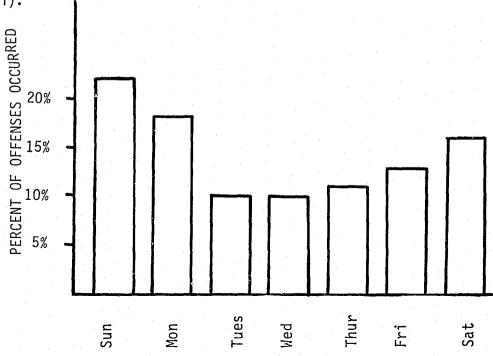

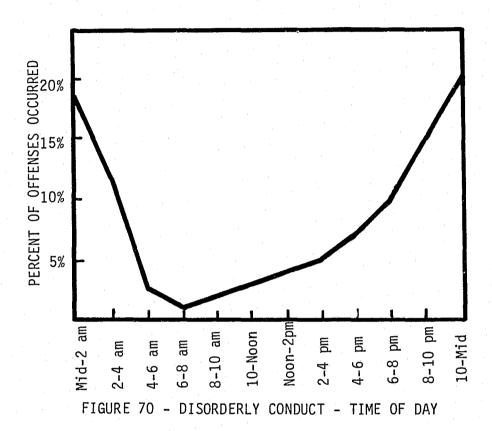

FIGURE 69 - DISORDERLY CONDUCT - DAY OF WEEK -106-

Disorderly Conduct--Time of Day (Figure 70)

There were 4,523 offenses reported by the time of day in which the offense was known to have occurred as shown in Figure 70. The highest number occurred between 10 p.m. and Midnight (20 percent of the total) with 55 percent of the total occurring between 8 p.m. and 2 a.m.

Disorderly Conduct--Type of Offense (Table 61)

Of the 6,287 offenses in 1978, 5,387 were reported by the specific type of disorderly conduct as presented in Table 61. Of that total, 44.4 percent were for fighting; 23.1 percent were for profane or abusive language; 2.1 percent for refusing to assist a police or fire officer; and 30.4 percent for other types of disorderly conduct.

TABLE 61 - DISORDERLY CONDUCT - TYPE OF OFFENSE

TYPE OF OFFENSE	NUMBER OF OFFENSES	PERCENT DISTRIBUTION
Fight	2,394	44.4%
Profane or Abusive Language	1,239	23.1%
Refuse to Assist Police or Fire	112	2.1%
Other	1,642	30.4%
TOTAL	5,387	100.0%

Arrests For Disorderly Conduct

There were 5,029 arrests made in 1978 compared to 5,098 in 1977--a decrease of 1.4 percent. Of the total, 15.0 percent were of juveniles and 85.0 percent were adults; 86.2 percent were male and 13.8 percent were females. The median age of persons arrested was 23 years with 89.2 percent of the total being White; 5.9 percent were Negro; and 4.9 percent were of other races.

Of the 5,029 arrests in 1978, 3,990 were reported by the specific type of offense as shown in Table 62. Of the 3,990 arrests reported, 75 percent were for disorderly conduct—a class B misdemeanor in Oregon.

"ALL OTHER" OFFENSES

"All Other" is the category of Part II offenses included as offense category number 26 of the F.B.I. and Oregon UCR classifications.

Of the 24,632 offenses in 1978, 22,122 were reported by the specific type of offense as shown in Table 63.

As shown, 36.0 percent of the total were for harassment (vocal/nuisance) and 23.2 percent for trespassing. The two most serious offenses (kidnapping and blackmail/extortion) represented only 2.5 percent of the total.

TABLE 63 - "ALL OTHER" OFFENSES - TYPE

TYPE	NUMBER OF OFFENSES 1978	PERCENT DISTRIBUTION
Kidnapping	458	2.1%
Trespassing Public Property Private Property	5,199 (1,038) (4,161)	23.2%
Escape	470	2.17

Blackmail/Extortion	78	0.4%
Other .	5,011	22.6%
TOTALS	22,122	100.0%

Arrests For "All Other" Offenses

In 1978, there were 8,376 arrests reported under this category with 6,918 reported by specific type and degree of offense (Table 64).

As shown, 44.9 percent of the total arrests were for trespassing and 20.7 percent were for animal ordinances. The highest number of arrests of juveniles and adults were for trespassing, and more specifically for second degree, while the highest number of arrests of females were for animal ordinances.

RUNAWAY JUVENILES

In 1978, 12,440 incidents of runaway were reported. Juvenile runaways represented 7.7 percent of the Part II offenses and 4.0 percent of all offenses reported in 1978.

The rate in 1978 was 1,757.1 (offenses per 100,000 juveniles) compared to 1,878.3 in 1977—a decrease of 6.5 percent as shown in Figure 71.

Runaways--Month (Figure 72)

As shown in Figure 72, the highest numbers of runaway offenses occurred during April and May.

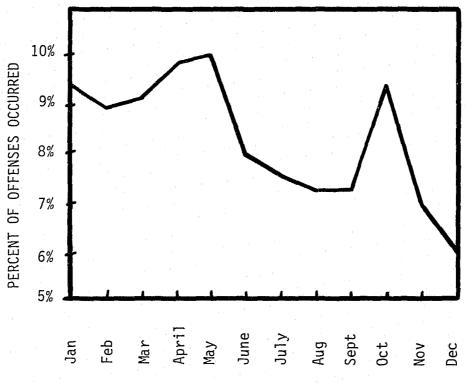

FIGURE 72 - JUVENILE RUNAWAYS - MONTH

Runaways -- Day of Week (Figure 73)

Of the 12,440 offenses in 1978, 8,666 were reported by the day of week on which the offense occurred. As shown in Figure 73, the highest percentage was reported on Tuesday. The lowest percentage of runaways occurred on Sunday and Monday.

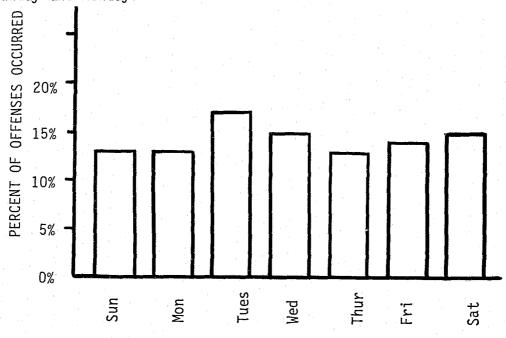

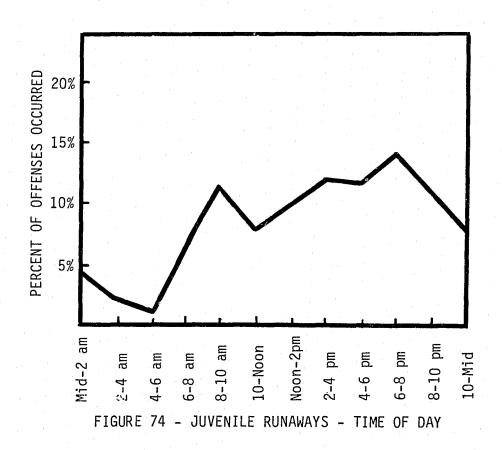

FIGURE 73 - JUVENILE RUNAWAYS - DAY OF WEEK

Runaways--Time of Day (Figure 74)

Of the 12,440 offenses in 1978, 7,614 were reported by the time of day in which they were known to have occurred. As shown in Figure 74, the highest numbers occurred from 6 p.m. and 10 p.m. and 8 a.m. to 10 a.m.

Runaways--By Sex and Age

Of the 12,440 offenses in 1978, 9,762 were reported by age and sex of runaway as shown in Table 65.

As shown, 58.1 percent of the runaways were female--an increase of 4.9 percent over 1977--with 70.4 percent of the total runaways being between 14 and 16 years of age.

Runaways--Sex and Residency

Of the 12,440 offenses in 1978, 9,762 were reported by sex and place of residency as shown in Table 66.

As shown, 71.2 percent of the total ran away from home; 10.0 percent from a residential treatment facility; and 12.4 percent from a foster home.

PROFILE OF PART I AND II OFFENSES AND PART III CALLS FOR SERVICE

Included in the Oregon Uniform Crime Reporting Program is an option for police agencies to report types of calls for service for other than criminal offenses (called Part III), including such activities as traffic accidents, disturbances reported, animal problems, alarms, and, in general, any type of report to a police agency for non-criminal problems.

A sampling of police agencies that report all Part I, II and III activity was compiled for this report and included in Table 67 by three groupings: Sheriff's Departments (six departments serving populations ranging from 88,055 to 220,349); Group I Police Departments (seven police agenices serving populations ranging from 15,300 to 90,000); and Group II Police Departments (nine police agencies serving populations ranging from 4,460 to 11,250). As with Part I and II offenses, Part III activity definitions have been included in the Appendix.

In general, of the agencies sampled, 19.3 percent of the total calls were for Part I offenses; 21.9 percent were for Part II offenses; and the remaining 59.8 percent involved Part III activity as shown in Figure 75.

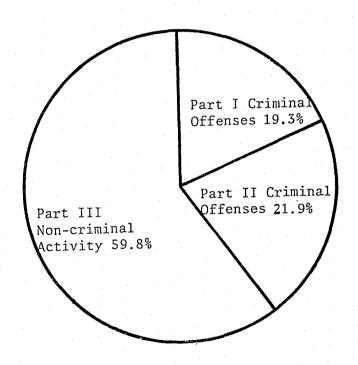

FIGURE 75 - CALLS FOR SERVICE BY CATEGORY

Figure 76 depicts the ten highest percentages of calls for service for the sample. As shown, the ten categories represented 65.4 percent of the total calls for service ranging from 11.8 percent of the total being for rendering assistance to other agencies to 3.3 percent for responding to animal problems. The three criminal offenses of larceny-theft, vandalism and burglary, together, represented 21.8 percent of the total calls.

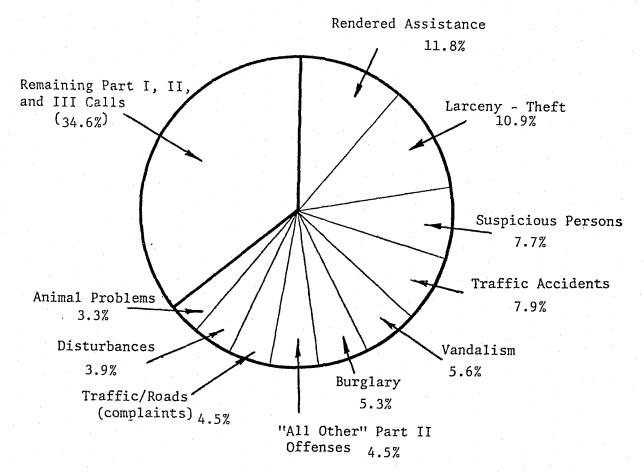

FIGURE 76 - CALLS FOR SERVICE BY TYPE

Table 67 presents a summary of the number of calls for service in 1977 and 1978 for the six Sheriff's Departments in comparison with the two groupings of police agencies, including percentage change. As shown, the majority of calls to police agencies were for Part III (non-criminal) activities, whereas, the slight majority of the calls to Sheriff's Departments were for Part I and II (criminal) offenses.

Some of the important findings from Table 67 are:

- 1. Sheriff's Department received a significantly higher percentage of calls for burglary and juvenile runaways than police.
- Police received a higher percentage of calls for rendering assistance, security, alarms and traffic/roads problems than did sheriffs.
- 3. Group II Police (population 4,000 to 10,500) receive a small percentage of calls for traffic accidents compared to larger police agencies and sheriffs, however, they do respond more often to animal problems, store security and illegal alien problems.

As shown, both Sheriff's Departments and Police Departments had increases in calls for service for Index offenses, while only Sheriff's Departments had an increase in calls for Part II offenses (up 4.7 percent).

Overall, Group II Police Agencies had the greatest increase in calls for service (up 16.6 percent) with calls for Part III assistance (up 23.0 percent) accounting for the majority of that increase.

ASSAULTS AGAINST POLICE OFFICERS

Officer assault is described as an assault or aggressive attack upon a law enforcement officer whether or not there is personal injury.

The number of assaults against police officers is presented in Table 68 by the county in which they were reported for 1977 and 1978.

There were 832 assaults against police oficers reported statewide in 1978--an increase of 16.9 percent over 1977. Of 832 assaults, 459 (55.2 percent) were reported in Multnomah and Lane Counties combined.

Type of Department

The number of assaults reported against police officers is presented in Table 69 by type of injury and law enforcement agency for 1975 to 1978. The total number of assaults with injury to the officer in 1978 increased by 6.1 percent from 1977, 31.9 percent from 1976 and 40.5 percent from 1975. The number of assaults without injury increased by 25.9 percent from 1977, by 58.0 percent from 1976, and 108.2 percent from 1975.

Month

The number of assaults against police officers is presented in Figure 77 by the time of year in which they were reported in 1975 through 1978. Of the 832 assaults of police officers in 1978, 42.4 percent or 353 were reported during the first 6 months and 57.6 percent or 479 in the last six months of the year. The first six months of 1978 showed a 0.3 percent increase over the first six months of 1977 while the last six months of 1978 showed a 33.1 percent increase over the same period of 1977.

October through December	254	187	155	121

FIGURE 77 - ASSAULTS AGAINST POLICE OFFICERS - MONTH

Circumstances

As illustrated in Figure 78, the highest number of assaults (233 of 832 or 28 percent) involved officers responding to a disturbance while 157 (or 18.9 percent) was second for assaults while attempting other arrests. The number of assaults increased for 10 of the 11 assignment categories in 1978 with the highest percent increase (180.0 percent) being for robberies in progress or pursuing robbery suspects.

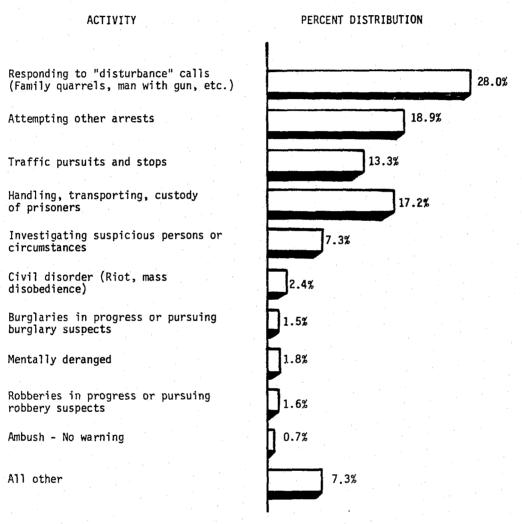

FIGURE 78 - ASSAULT AGAINST POLICE OFFICERS - CIRCUMSTANCES

The total number of assaults against police officers in 1978 is presented by type of assignment, type of activity, and weapon used in Table 70. Of the 832 reported assaults, 215 (25.8 percent) were of officers in a two-man vehicle, 513 (61.7 percent) in a one-man vehicle either alone or assisted, 21 (2.5 percent) were against detectives, and 83 (10.0 percent) were involved in other types of assignments.

Of the 832 reported assaults 706 (84.9 percent) were committed using hands, fists, and/or feet and the remaining 126 (15.1 percent) were committed using a dangerous weapon (firearm, knife, other).

Time of Day

The number of assaults against officers by the time of day they were reported are depicted in Figure 79. The pattern remains similar to the 1976 and 1977 pattern with the greatest number of assaults occurring between 6 p.m. and 6 a.m. (716 of the total 832 or 86.1 percent). Within that 12 hour period, 522 assaults or 62.7 percent were committed between 10 p.m. and 2 a.m.

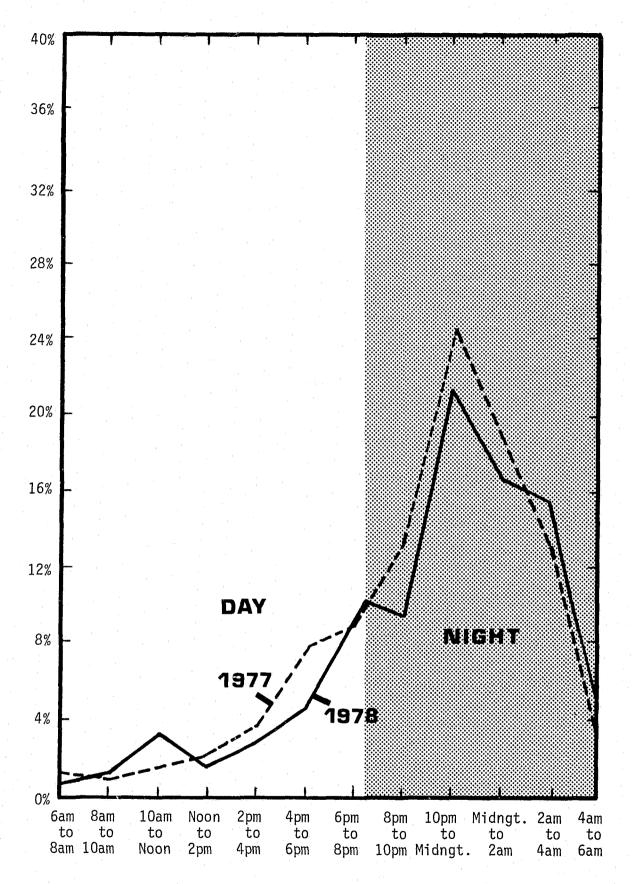

FIGURE 79 - ASSAULTS AGAINST POLICE OFFICERS - TIME OF DAY

OREGON COMPARED TO NEIGHBORING STATES

A comparison of population and Index Crime rates (offenses per 100,000 population) in 1976, 1977, and 1978 for Oregon, California, Washington, Idaho, and Nevada is presented in Table 71. However, Index crime data was not available from Washington or Nevada at the time of this printing.

Among the three states, Oregon had the highest estimated increase in population in 1978 (+3.2 percent over 1977) while California showed the highest population density (139.9 persons per square mile). Idaho was the only state to show a decrease in the Index crime rate (2.9 percent) with a decrease in both the violent crime category (murder, forcible rape, robbery, aggravated assault) of 0.5 percent from 1977, and in property crime (burglary, larceny, motor vehicle theft) of 2.8 percent from 1977.

SECTION 3 OFFENSE DATA BY ADMINISTRATIVE DISTRICT, COUNTY, AND SMSA

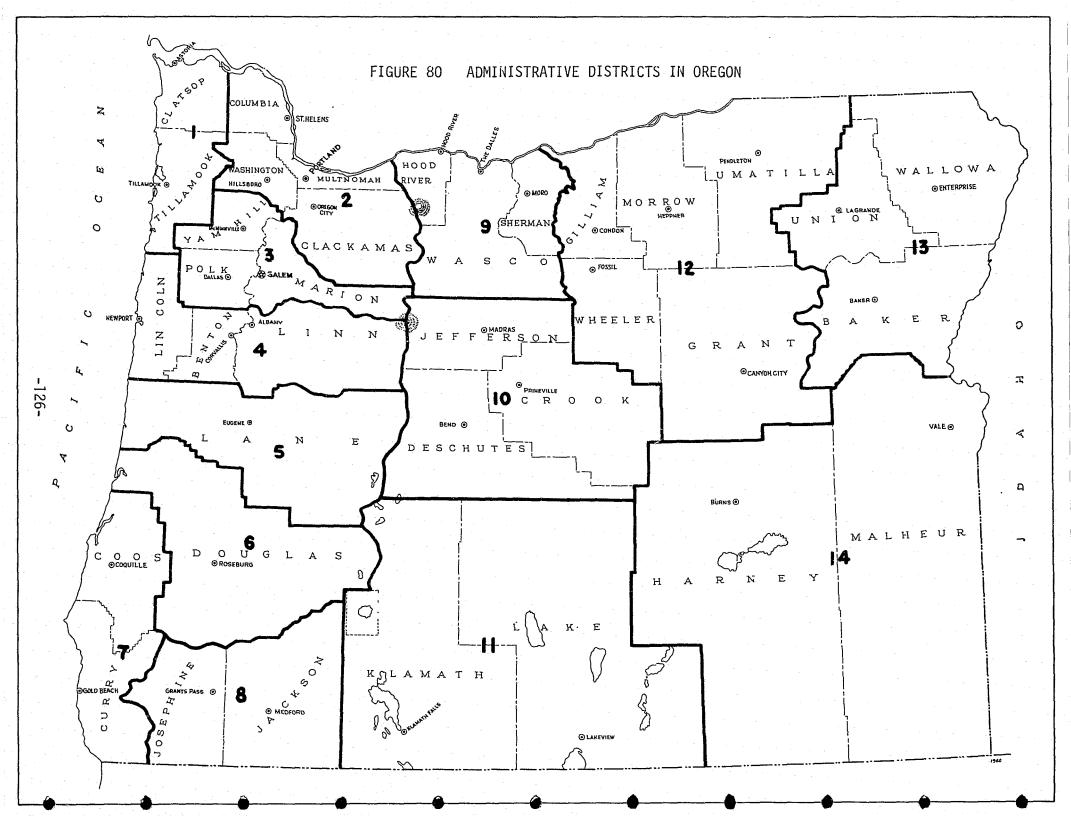

INTRODUCTION

Oregon is divided into fourteen administrative districts for two purposes: (1) to provide a system for state agencies to use in planning and administrating areawide programs and (2) for providing the Governor with an administrative tool for planning and evaluating the use of state and federal resources.

The following crime statistics are presented by districts to provide information relevant to local planning of criminal justice programs and for comparisons and analysis of trends.

The type and volume of offenses vary from district to district as do the influencing factors that contribute to the commission of crimes and the circumstances surrounding them. Factors such as population density, population characteristics, and geographic location must be considered in attempting to analyze the variance in crime rates among the fourteen districts in Oregon.

For the purposes of this report, the district data has also been combined into two regional areas: Western Oregon (west of the Cascade Mountains, including Districts 1-8), and Eastern Oregon (east of the Cascades, including Districts 9-14). Western Oregon is more densely populated than Eastern Oregon with a topography consisting mainly of forest, timberland and agricultural areas. It receives most of Oregon's annual rainfall. In contrast, Eastern Oregon is sparsely populated with a much drier climate and colder winter temperatures. Its topography consists of timberland and agricultural areas, but also includes high desert and arid land.

		1979-1980	TOTAL POPULATION	AREA IN SQUARE MILES	DENSITY (persons per square mile)	INDEX CRIME RATE
District	Counties	Principal Industry				
1	Clatsop, Tillamook	Fishing, lumber, agri- culture, recreation	50,400	2,060	24.5	4,189
2	Clackamas, Columbia, Multnomah, Washington	Agriculture, lumber, industry, warehousing	1,018,200	3,756	271.1	6,933
3	Marion, Polk, Yamhill	Agriculture, government, manufacturing	282,245	2,629	107.4	5,493
4	Benton, Lincoln, Linn	Agriculture, lumber, fishing, recreation	188,055	3,983	47.2	5,842
5	Lane	Lumber, agriculture, education, recreation	262,300	4,610	56.9	6,496
6	Douglas	Lumber, mining, agri- culture, fishing	85,700	5,089	16.8	4,667
7	Coos, Curry	Lumber, manufacturing, agriculture, fishing	79,200	3,256	24.3	5,203
8	Jackson, Josephine	Lumber, agriculture, manufacturing	176,600	4,446	39.7	5,379
9	Hood River, Sherman, Wasco	Agriculture, livestock, food processing	38,400	3,762	10.2	3,971
10	Crook, Deschutes, Jefferson	Forest products, agri- n culture, livestock	72,300	7,837	9.2	5,218
11	Klamath, Lake	Livestock, mining, lumber, argriculture	65,600	14,491	4.5	4,469
12	Gilliam, Grant, Morrow, Umatilla, Wheeler	Livestock, manufactur- ing, agriculture	72,150	12,764	5.7	4,470
13	Baker, Union, Wallowa	Mining, agriculture, lumber, livestock	47,300	8,300	5.7	3,505
14	Harney, Malheur	Agriculture, livestock, manufacturing, lumber	33,550	20,110	1.7	4,697
	Western Oregon (Districts	1 through 8)	2,142,700	29,829	71.8	6,251
	Eastern Oregon (Districts	9 through 14)	329,300	67,264	4.9	4,461

INDEX CRIMES

Index Crime rates (offenses per 100,000 population) are presented in Table 73, for each of Oregon's 14 administrative districts for 1977 and 1978.

District 2 reported the highest total Index crime rate in 1978 as in 1976 and 1977. District 2 also reported the highest individual rates for violent crime, (i.e., forcible rape and robbery) and for property crime, (i.e., burglary and motor vehicle theft). Of the 14 administrative districts, six had decreases in their crime rates (1, 2, 3, 6, 9, 13), and ten of the districts had increases in their crime rates (4, 5, 7, 8, 10, 11, 12, 14, 15, 16). The Index crime rate showed a total increase thoughout the districts in Western Oregon of 0.8 percent and an increase in the rate for Eastern Oregon of 9.0 percent.

The crime rates decreased in Eastern Oregon in three categories, Murder, Robbery, Aggravated Assault, while the only category to show a decrease in Western Oregon was Burglary.

Table 74 is a ranking of administrative districts by their respective change in Index crime rates from 1977 to 1978.

NOTE: Increases or decreases in crime rates are not necessarily indicative of increases or decreases in the actual number of offenses, but rather may be due to increases or decreases in agency reporting. Reference should be made to Section 4 of this report, the 1977 report, and another previous report entitled Analysis of Criminal Offenses and Arrests, January-December, 1975, regarding the number of months of reporting from individual agencies in attempting to interpret the changes in 1977-78 crime rates.

PART II OFFENSES

Table 75 presents a summary of the highest Part II crime rates in 1978 by administrative districts. As an example, the highest rate for liquor law violations in 1978 was calculated for District 1 (Clatsop and Tillamook County).

TABLE 75 - SUMMARY OF HIGHEST PART II CRIME RATES BY DISTRICT - 1978

District 1

District 10

Liquor Laws Vandalism

Drug Abuse

DUII

District 2

District 12

Other Assaults Prostitution

Gambling.

Other Sex Offenses

District 13

Runaway

Weapons Offenses

District 7

Forgery/Counterfeiting

District 14

Stolen Property Family Offenses

District 8

Arson Fraud

Embezzlement

Table 76 presents the individual Part II crime rates in 1977 and 1978 by administrative districts. In both Eastern and Western Oregon there was a balance of increases and decreases in crime rates between the different categories. In Eastern Oregon there were increases in ten categories, decreases in seven, and three categories stayed the same. In Western Oregon there also were increases of crime rates in ten categories, decreases in nine, with only one staying the same.

^{*} Based on Number of Arrests

COUNTY CRIME RATES

The 36 counties in Oregon are presented in Table 79 and are ranked in order by their respective Index crime rate, violent crime rate, and property crime rate.

As presented, five counties (Multnomah, Marion, Lane, Lincoln, and Linn) were above the state Index crime rate (6,012.3). Seven counties (Multnomah, Harney, Jefferson, Coos, Linn, Douglas, and Lincoln) were above the state violent crime rate (495.3) and five counties (Multnomah, Marion, Lane, Lincoln, and Linn) were above the state property crime rate (5,517).

The ten counties with the highest Index crime rates in 1978 (Multnomah - Umatilla from Table 79) represented a population of 1,469,267 or 59.4 percent of the state total.

Multnomah County continued to show the highest Index crime rate in the state and being approximately 35 percent higher than the next highest (Marion County).

The greatest changes in ranking by Index crime rate were shown for Wasco County (from No. 10 in 1977 to No. 22 in 1978) and Klamath County (from No. 24 in 1977 up to No. 12 in 1978).

There were quite a few sizeable changes in rankings by violent crime rate in 1978 from 1977. The two greatest increases were Sherman County (from No. 36 in 1977 up to No. 16 in 1978) and Malheur County (from No. 31 in 1977 up to No. 17 in 1978). The three greatest decreases in rankings were for Union County (from No. 8 in 1977 to No. 24 in 1978), Marion County (from No. 7 in 1977 to No. 18 in 1978), and Wasco County (from No. 15 in 1977 to No. 26 in 1978).

Often counties with small populations fluctuate drastically in rank from year to year because one or two occurrences of violent crime can significantly alter their crime rates.

TABLE 79 - RANKINGS OF COUNTIES BY CRIME RATES - 1978

STANDARD METROPOLITAN STATISTICAL AREAS (SMSA)

Within three of Oregon's administrative districts (2, 3 and 5 inclusive) are three metropolitan areas designated as Standard Metropolitan Statistical Areas (SMSA) by the Bureau of the Census. The Bureau of the Census recognized 243 SMSAs in the United States and four in Puerto Rico in the 1970 census.

Except in the New England states, an SMSA is a county or group of contiguous counties which contain at least one city of 50,000 population or more, or "twin cities" with a combined population of at least 50,000. In addition to the county or counties containing such a city or cities, contiguous counties are included in the SMSA if according to certain criteria, they are socially and economically integrated with the central city.

One of the prime reasons for establishing SMSAs was to delineate densely populated areas. It is therefore meaningful to compile reported crime data by these designated areas, since population density plays a role in crime rates. Cities located within areas of dense population concentration tend to have relatively more crimes than do isolated cities.

There are three SMSAs in Oregon: Portland SMSA, Salem SMSA and Eugene SMSA as depicted by the map in Figure 81. For purposes of this report, Portland SMSA does not include Clark County, Washington.

The total population in the three SMSAs combined was 1,478,667 in 1978 (59.8 percent of the state total). This is approximately 0.5 percent lower than 1977.

There were a total of 99,701 Index crimes reported in 1978 within the three SMSAs representing 67.0 percent of the total Index crimes reported statewide.

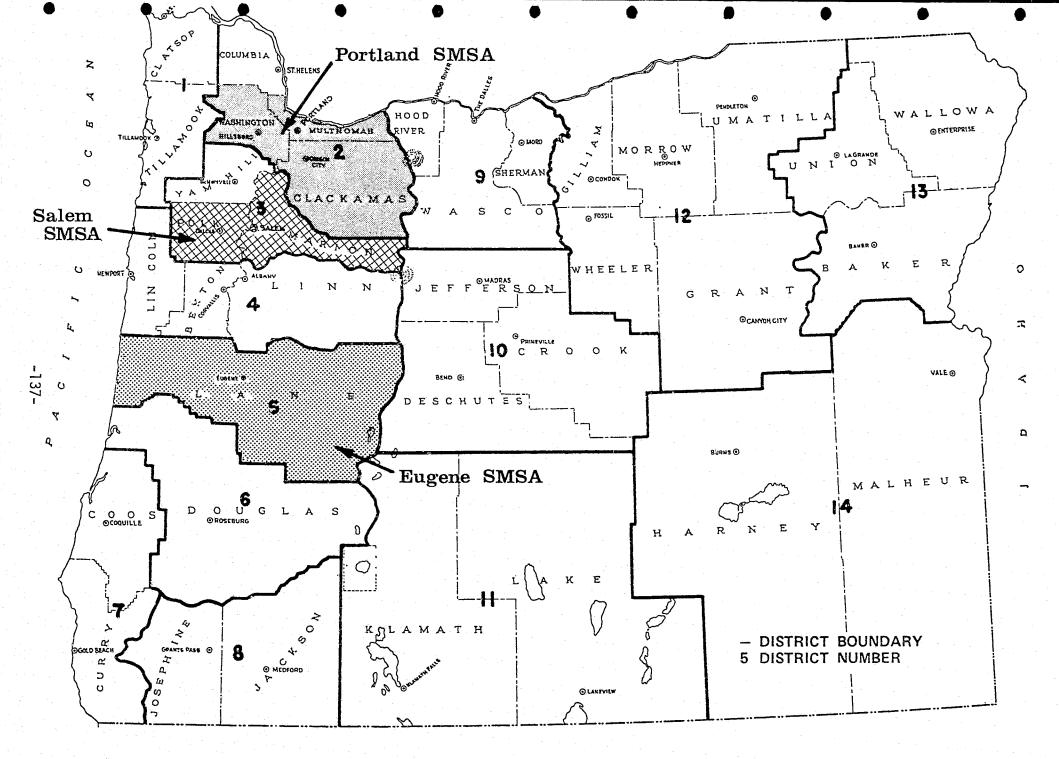

FIGURE 81 OREGON'S STANDARD METROPOLITAN STATISTICAL AREAS

PORTLAND/EUGENE/SALEM SMSA COMPARISONS

The Index Crime Rates (offenses per 100,000 population) for the three SMSAs in Oregon, separately and combined, and the remainder of the state are presented in Table 80, including the change in rates from 1977 to 1978.

The total population for the combined SMSAs increased by 2.7 percent over 1977 while the population of the remainder of the state increased by 3.9 percent. The population in the Salem SMSA showed the highest increase over 1978 (+5.8 percent) while the population in the Portland and Eugene SMSAs increased by 1.6 percent and 3.9 percent respectively.

The Index crime rate for the combined SMSAs was 6,743 (offenses per 100,000 population)—a decrease of 0.4 percent from 1977. The same rate for the remainder of the state was 4,926.9 which increased by 6.1 percent. The violent crime rate increased by 5.0 percent in the three SMSAs and showed a statistically significant increase in the remainder of the state (up 19.5 percent). The property crime rate for the three SMSAs decreased in 1978 by 0.8 percent while the remainder of the state increased by 4.4 percent.

The forcible rape rates continued to increase in the combined SMSAs but decreased in the remainder of the state 8.3 percent. Burglary rates continued to decrease in the combined SMSAs while increasing 4.0 percent in the remainder of the state. The motor vehicle theft rate showed a decrease for the first time in four years in the combined SMSAs of 1.6 percent, while the remainder of the state continued to show an increase for the fourth consecutive year.

^{*}Portland SMSA does not include Clark County, Washington

PORTLAND SMSA

The Portland SMSA, for this report, is comprised of Multnomah, Clackamas and Washington Counties with its core city being Portland.

The estimated population for the Portland SMSA in 1978 was 984,000 (39.8 percent of the state's population). The majority of the population reside in the Greater Portland metropolitan area and includes various suburban communities ranging from 10,000 to 25,000 population.

Of the total index offenses reported statewide, 46.7 percent were by police agencies within the Portland SMSA. In 1978, 69,364 Index offenses were reported within Portland SMSA as shown in Table 81.

The total Index crime rate in 1978 was 7,049.2 offenses per 100,000 population, a decrease of 0.52 percent from 1977 and a total decrease of 11.96 percent from 1975. The violent crime rate increased +7.8 percent from 1977; the property crime rate decreased by -1.3 percent. The highest increase in 1978 was in the aggravated assault rate (+10.9 percent) while the largest decrease was shown in the murder rate (-18.3 percent).

The number of persons arrested by police agencies within the Portland SMSA increased for the crimes of rape, aggravated assault, burglary, and motor vehicle theft, while arrests for the other offenses decreased. The arrest rate (arrests per 100,000 population) decreased by 2.6 percent for total Index crimes in 1977. Arrest rates for violent crimes increased by 5.7 percent while the arrest rate for property crimes decreased by 4.1 percent. Of all the total number of robbery offenses in Oregon during 1978, 73.0 percent occurred in the Portland SMSA.

Of the total 69,364 Index offenses in 1978, 12,538 (18.1 percent) were cleared--compared to 18.2 percent in 1977. Of the violent crime offenses, 39.8 percent were cleared, and 15.8 percent of the property crime offenses were cleared--both clearance rates lower than in 1977.

CITY OF PORTLAND

Portland is the core city within the Portland SMSA as well as the largest city in Oregon.

Situated on the bank of the Columbia River at the Oregon-Washington border, the estimated population for Portland was 366,650 in 1978--a decrease of approximately 4.6 percent from 1977.

The city is a major shipping center for lumber and agricultural products and trade with other ports further east on the Columbia River. It is also the center for much of Oregon's insurance, financial, and stock brokerage business with many other types of "clean" industry such as electronics and light manufacturing.

Index and Part II Offenses

A total of 66,187 criminal offenses were reported by the Portland Police Bureau in 1978 as shown in Table 82.

Of this total, 53.9 percent were Index offenses and 46.1 percent were Part II. Contrary to the state as a whole, the Index crime rate (9,713.1) was higher than the Part II rate (8,338.7). The highest crime rates in Portland in 1978 were for the categories of larceny-theft, burglary, and vandalism.

City of Portland--Selected Offenses

Robbery

Table 83 compares the number of robbery offenses by target locations in 1978 to those of 1977, accounting for 55.1 percent of the total robberies in the state.

In total, the number of robbery offenses increased by 4.2 percent over 1977. Robbery of chain stores (+43.2 percent) and on highways (+9.1 percent) represent the highest percentage increases. Gas stations (-25.0 percent) and banking institutions (-16.7 percent) robberies constitute a substantial decrease. The highest number of offenses continued to occur at miscellaneous locations such as parks, streets, and parking lots and increased +5.2 percent over 1977.

The highest amount of property stolen was reported under miscellaneous locations at \$131,723. The second highest value is robbery on highways. The highest mean value of \$931 per offense was calculated for bank robberies.

TABLE 83 - CITY OF PORTLAND - ROBBERY OFFENSES

Burglary

The number of burglary offenses in Portland in 1978, as compared to 1977, is shown in Table 84. As indicated, the total number of offenses decreased for the fourth straight year (down -12.7 percent from 1977). Residential burglaries decreased by 12 percent and non-residential or commercial offenses decreased by 14.1 percent from 1977.

The number of night, day and unknown time burglary offenses, are combined at the bottom of Table 84. All three categories, forcible entry (-14.9 percent), no force used (-6.7 percent), and attempted entry (-12.7 percent) indicate decreases.

Residential burglaries represented 68.8 percent of the total value of property stolen in burglary in 1978 and showed a mean value of \$564 per offense compared to \$387 per offense for non-residential burglaries.

Larceny

The number of larceny offenses in Portland in 1978, compared to 1977, by type, is presented in Table 85.

In total, the number of larceny offenses in Portland increased by 1.9 percent from 1977 (19,047 to 19,411). The largest reductions were purse snatching (-27.0 percent) and pocket picking (-22.0 percent). Theft of articles from buildings and theft of articles from motor vehicles, both of sizeable volume, showed increases of +18.7 percent and +6.3 percent respectively.

The highest amount of reported property stolen was under the category, articles stolen from buildings (\$1,857,074 or 39.1 percent of the total) with the highest mean value per offense of \$343 in this category, excluding the category of "all other."

INDEX CRIME RATES--CITY OF PORTLAND COMPARED TO MAJOR WEST COAST CITIES

Table 86 is a comparison of Index crime rates (offenses per 100,000 population) for the years 1977 and 1978 for the cities of Portland, Seattle, San Francisco and Los Angeles. Because these cities are so individually unique in terms of population, topography, area, climate and other various characteristics, the comparison of percentage change in rates is probably more meaningful than a straight comparison of rates for any particular year.

In 1978, the Index crime rate increased in all of the cities: Portland (+1.4 percent), Seattle, (+17.2 percent), San Francisco (+1.1 percent) and Los Angeles (+6.2 percent). The violent crime rate also increased for all of the cities: Portland (+6.2 percent), Seattle (+20.3 percent), San Francisco (+15.2 percent), and Los Angeles (+8.3 percent).

The murder rates for Portland and San Francisco decreased (-8.4 percent and -13.0 percent); however, the murder rates for Seattle and Los Angeles rose (+54.3 percent and +12.5 percent).

Since 1975, the burglary rate in Portland has decreased 22 percent, while the same rate in Seattle decreased by 9 percent and 1 percent in Los Angeles. Since 1975, the burglary rate in San Francisco has shown an increase of 5 percent.

EUGENE SMSA

The Eugene SMSA is comprised of Lane County which is also the Administrative District 5 and includes Eugene as its core city.

The estimated population for the Eugene SMSA in 1978 was 262,300 (10.6 percent of the state total). Approximately one-half of the population of this SMSA reside within the city limits of the two contiguous cities, Eugene and Springfield. With the exception of this one metropolitan area, Lane County (Eugene SMSA) is almost entirely rural (agriculture and timber).

In 1978, 17,039 Index offenses were reported within Eugene SMSA as shown in Table 87 which indicates an increase of 8.0 percent from 1977.

The Index crime rate for 1978 in the Eugene SMSA was 6,503.4 offenses per 100,000 population, an increase of +4.1 percent from 1977.

The violent crime rate in 1978 increased by 6.8 percent over 1977 but decreased 7.0 percent since 1976, while the property crime rate increased by 4.0 percent over 1977 and 1.1 percent since 1976. The increase in the total Index crime rate for Eugene SMSA was +4.1 percent while Portland SMSA total Index crime rate decreased by 0.5 percent and Salem SMSA total Index crime rate decreased by -4.2 percent. The most notable decrease in the Eugene SMSA crime rate was in the aggravated assault category (-13.1 percent). Contrary to the Portland SMSA, the motor vehicle theft rate showed an increase.

The number of people arrested by police agencies within the Eugene SMSA increased in all categories except larceny. The arrest rate (arrests per 100,000 population) decreased by -0.1 percent from 1977 and by 3.8 percent since 1976. The property crime arrest rate decreased by -0.6 percent, while the violent crime arrest rate increased by 13.3 percent. The most notable increase for the Eugene SMSA was in the arrest rate for murder (+130.0 percent); however, this arrest rate (4.6 arrests per 100,000 population) is comparable to the arrest rate for murder in the Portland SMSA (4.5) and lower than the Salem SMSA arrest rate for murder (7.8).

Of the 17,039 offenses in the Eugene SMSA for 1978, 3,667 or 21.5 percent were cleared. The clearance rate for murder (90.0 percent) was the highest for the listed offenses.

CITY OF EUGENE

Eugene is the core city within the Eugene SMSA as well as the second largest city in Oregon representing 4.2 percent of the state's population.

Situated at the southerly end of the fertile Willamette Valley and adjacent to two of Oregon's major rivers--Willamette and Mackenzie, the estimated population for Eugene was 103,500 in 1978--an increase of 3.0 percent over 1977.

Eugene is a major center for higher education in Oregon having the University of Oregon located within the city and attracting approximately 17,000 students annually. A progressive city, and still maintaining a rural atmosphere, its contiguous area is a hive of activity in the lumber and agricultural business.

Index and Part II Offenses

A total of 15,366 criminal offenses were reported by the Eugene Police Department in 1978 as shown in Table 88.

Of this total, 57.7 percent were Index offenses and 42.3 percent were Part II. The Index crime rate (8,564.2) was 36.3 percent higher than the Part II rate (6,282.1). The highest crime rates in Eugene in 1978, as in 1977, were for the categories of larceny-theft, burglary, and vandalism.

Burglary

Table 89 compares the number of burglary offenses, by target and time of day, for 1977 and 1978.

In 1978, 2,145 burglary offenses were reported in Eugene, an increase over 1977 of +9.3 percent and 4.8 percent since 1976. Of this total, 1,532 or 71.4 percent were of residences; 613 or 28.6 percent were of commercial businesses. The number of residential burglaries increased by 13.8 percent while the number of commercial burglaries decreased by -0.7 percent.

The total value of property stolen in residential burglaries amounted to \$751,198 in 1978, an increase of 46.0 percent over 1977. The total value of property stolen in residential burglaries amounted to \$524,396, an increase of 49.4 percent; the total value of non-residential burglaries amounted to \$226,802, an increase of 38.8 percent.

Larceny

The number of larceny offenses in Eugene in 1978 compared to 1977, is presented in Table 90 by type and value of property stolen.

There were 5,736 larceny offenses reported in 1978--an increase of 6.2 percent over 1977 and 4.0 percent since 1976. There were increases in all categories except purse-snatching (-87.5 percent). The largest increase was in theft from coin-operated machines (up 173.9 percent over 1977); however, this category accounted for only 1.1 percent of the total larceny offenses in Eugene during 1978.

The total value of stolen property resulting from larceny was \$1,326,909, -- an increase of 104 percent over 1977.

SALEM SMSA

The Salem SMSA is comprised of Marion and Polk Counties with Salem as its core city.

The estimated population for the Salem SMSA in 1978 was 232,367 (9.4 percent of the state total). Approximately one-half of the population of this SMSA reside within the Greater Salem metropolitan area with the remaining population scattered throughout numerous small farming communities in the two counties. Marion and Polk counties are primarily recreation and agricultural areas with the center of Oregon's government located in Salem.

In 1978, 13,298 Index offenses were reported within Salem SMSA as shown in Table 91 and indicate a 1.1 percent increase over 1977.

The total Index crime rate for the Salem SMSA in 1978 was 5,731.9 offenses per 100,000 population, a decrease from 1977 of 4.2 percent. The violent crime rate decreased by 8.4 percent, and the property crime rate decreased by 3.9 percent from 1977. There were increases in murder (73.3 percent) and rape (5.5 percent); however the decreases in robbery and aggravated assault (1.8 and 13.3 percent respectively) account for the decrease in the violent crime rate.

Of the total 13,298 Index offenses in the Salem SMSA in 1978, 3,911 or 29.4 percent were cleared. This indicates a decrease of 2.3 percent from 1977. The clearance rates for burglary, larceny, and motor vehicle theft have the highest percentage of clearances of the three SMSAs. The most noted change in the rate was the decrease of forcible rape offenses cleared (from 56.0 percent to 38.9 percent) a decrease of 32.2 percent.

CITY OF SALEM

Salem is the core city within the Salem SMSA as well as the third largest city in Oregon and the state's capital. Situated near the middle of the Willamette Valley and lying adjacent to the Willamette River, the estimated population for Salem was 90,000 in 1978—an increase of 8.2 percent over 1977.

Salem is not only the center of government for Oregon but also a major food processing center for much of the fruit and vegetables grown in the Willamette Valley. Willamette University, the oldest in the West, is located in the City of Salem.

<u>Index and Part II Offenses</u>

A total of 11,949 criminal offenses were reported by the Salem Police Department in 1978 as shown in Table 92.

Of this total, 56.2 percent were Index offenses and 43.8 percent were Part II offenses. The Index crime rate (7,455.5) was 28.1 percent higher than the Part II rate (5,821.1). The highest crime rates in Salem in 1978 were for the categories of larceny-theft, burglary, and vandalism.

Burglary

The number of burglaries reported in Salem in 1978 increased over the number in 1977 by 9.9 percent. Of the total in 1978, residential burglaries constituted 72.2 percent and non-residential burglaries represented the remaining 27.8 percent as shown in Table 93. Residential burglary showed an increase of 24.1 percent, while non-residential burglaries decreased by 14.9 percent.

The total value of property stolen in residential burglaries increased from \$238,674 in 1977 to \$362,816 in 1978. The total value of property stolen in non-residential burglary increased from \$138,752 to \$147,140 in 1978. The mean value per residential offense in 1978 was \$309 while the mean value per non-residential offense was \$326.

Larceny

The number of larceny offenses reported in Salem decreased by 1.5 percent in 1978 (from 4,642 to 4,571 in 1978) as shown in Table 94.

Theft of articles from motor vehicles accounted for 28.2 percent of the total larcenies while shoplifting accounted for 22.6 percent of the total. Theft of articles from motor vehicles represented the highest property loss figure in the total value.

The largest increase outside of the "All Other" category was shown for shoplifting (+7.3 percent) while theft of motor vehicles parts and accessories showed a rather large decrease of 22.6 percent.

Core Cities Comparisons

The three SMSA core cities of Portland, Eugene, and Salem, combined represent 22.7 percent of the state's population and reported 38.4 percent of the state's total Index offenses. A comparison of the change in Index crime rates from 1977 to 1978 is presented in Table 95.

As shown, the Index crime rates increased slightly in Portland and Eugene (1.4 percent and 4.2 percent respectively) while the Index crime rate decreased in Salem by 8.5 percent. The violent crime rates increased somewhat in Portland and Eugene (6.2 percent and 8.1 percent respectively) and decreased substantially in Salem (32.4 percent). Portland was the only city to have a decreasing murder rate (-8.4 percent) with murder rates in Eugene and Salem increasing 93.3 and 86.1 percent respectively. Eugene showed the highest increase in robbery rates of 49.5 percent.

Property crimes increased in Portland (15.0 percent) and Eugene (10.7 percent) with Salem showing a decrease in property crime rate of 1.7 percent.

TABLE 95 - CITIES OF PORTLAND, EUGENE, SALEM PERCENT CHANGE IN INDEX CRIME RATES 1977-1978

OFFENSE	CITY OF PORTLAND	CITY OF EUGENE	CITY OF SALEM
Murder	-8.4%	+93.3%	+86.1%
Forcible Rape	+15.5%	+55.9%	-14.9%
Robbery	+9.2%	+49.5%	-7.6%
Aggravated Assault	+1.9%	-15.9%	-68.2%
Violent Crimes	+ 6.2%	+8.1%	-37.4%
Burglary	-8.5%	+5.5%	+1.7%
Larceny	+6.9%	+2.6%	-9.0%
Motor Vehicle Theft	-3.0%	+6.0%	-20.9%
Property Crimes	+1.0%	+3.5%	-7.5%
TOTAL	+1.4%	+4.2%	-8.5%

The following highlights regarding burglary offenses in the three cities in 1978 are from Table 96--a comparison of the percent change in the number of offenses from 1977 to 1978.

Residential burglaries decreased in Portland for the fourth straight year while increasing in Eugene. Residential burglary increased in Eugene 13.8 percent after being down 4.5 percent, and increased 24.1 percent in Salem after being down 5.0 percent 1977. Non-residential burglaries decreased in all three cities with Salem leading at 14.9 percent.

Burglaries involving forcible entry decreased in Portland (14.9 percent) while increasing in Eugene by 11.2 percent and in Salem by 9.9 percent.

Burglaries in which entry was gained without force decreased in Portland (6.7 percent) while showing a substantial increase in Salem of 23.0 percent, and Eugene of 4.5 percent.

In summary, and compared with the 1975-77 statistics, all three cities have shown an increasing decline in the occurrences of non-residential burglaries with Eugene and Salem showing increases in residential burglary in 1978.

TABLE 96 - CITIES OF PORTLAND, EUGENE, SALEM PERCENT CHANGE IN BURGLARY OFFENSES 1977-1978

TYPE	City of Portland	City of Eugene	City of Salem
Residential	-12.0%	+13.87	+24.1%
Non-Residential	-14.1%	- 0.7%	-14.9 Z
TOTAL	-12.7%	+ 9.3%	+ 9.9%
Forcible Entry	-14.9%	+11.27	+ 1.37
No Force In Entry	- 6.7%	+ 4.5%	+23.0%
Attempted Entry	-12.7%	+ 4.7%	+10.2%

The following highlights on larceny offenses in the three cities in 1978 are taken from Table 97--a comparison of the percent change in the number of offenses from 1977.

Portland showed decreases in all categories except in articles from motor vehicles (+6.3 percent) and articles from buildings (+18.7 percent) while showing a 1.9 percent increase in larceny as a whole.

Salem also had decreases in all larceny categories except two (shoplifting, up 7.3 percent and theft of articles from motor vehicles up 2.6 percent) while showing an overall decrease of 1.5 percent in larceny.

Eugene, unlike Portland and Salem, showed increases in all larceny categories except for purse-snatching (down 87.5 percent) with a 6.2 percent increase in larceny as a whole.

In summary, the trend indicates increases of larceny in Portland and Eugene with a continued decrease of larceny in Salem.

SECTION 4

OFFENSES, CLEARANCES AND ARRESTS BY DISTRICT, COUNTY, AND AGENCY

The agency statistics concerning Part I and II offenses contained in the following tables was reported to the Oregon UCR program by the individual participating agencies for 1978 and includes totals for each administrative district and county including a total for the Oregon State Police in each county.

The following key is included as an explanation of the abbreviations used throughout the tables:

KEY TO FORMAT ABBREVIATIONS

Months of Reporting	The number of months reported by each individual agency.
Officer Assaults	The number of reported assaults on police officers during the reporting period.
0FF	The number of actual verified offenses or attempts as set forth by UCR guidelines and definitions.
ARR	The number of arrests made during the reporting period. (Includes any arrests made during this period for offenses reported prior to 1/1/78. Includes persons cited, summoned, and notified as well as those taken into physical custody.)
CLR	The number of offenses cleared by arrest or cleared exceptionally during the reporting period. (Includes any clearances made during this time for offenses reported prior to 1/1/78.)
	These are counts of offenses cleared, not persons arrested.

NOTE:

When counting arrests, only those arrests which are made for an agency's "own" cases are counted for UCR purposes. For example, if Agency A makes an arrest on a warrant for Agency B, Agency B counts the arrest for UCR purposes. Agency A does not count it. For this reason, the number of arrests shown in this report will not necessarily agree with the statistics within a department which may show all arrest activity.

APPENDIX A

OFFENSE DEFINITIONS
OREGON UNIFORM CRIME REPORTING PROGRAM

APPENDIX A

INTRODUCTION

An offense, under Oregon law (ORS 161.505 - Revised 1974) is defined as: "Conduct for which a sentence to a term of imprisonment or to a fine is provided by any law of this state or by any law or ordinance of a political subdivision of this state. An offense is either a crime or a violation."

A crime is described as an offense for which a sentence of imprisonment is authorized and is either a felony (maximum sentence of more than one year) or a misdemeanor (maximum sentence of not more than one year).

A violation is described as an offense designated by statue to be a violation or if the offense is punishable only by a fine, forfeiture, fine and forfeiture or other civil penalty. Violations are not classified.

UCR DEFINITIONS

The FBI's Uniform Crime Reporting program collects and reports criminal offense data for the nation and in many instances reports data for smaller subdivisions of the country. Essential to the maintaining of uniform and consistent data was the establishment of a standard definition of the offenses used in the program. This insures that offenses with different titles under state and local laws are considered and appropriately counted in UCR.

The offense definitions in this publication conform to those published in the FBI 1975 UCR Handbook.*

Part I Offense Definitions

1.a. <u>Crim.nal Homicide - Murder and Non-negligent Manslaughter</u>

Definition - the willful (non-negligent) killing of one human being by another.

As a general rule, any death due to a fight, argument, quarrel, assault, or commission of a crime is counted as Homicide. One offense for each person willfully killed by another.

Suicides, accidental deaths, assaults to murder, and attempted murders are not counted as Murder and Non-negligent Manslaughter. Suicides are not counted in Uniform Crime Reporting. Some accidental deaths are counted as Manslaughter by Negligence. Assaults to murder and attempted murders are counted as aggravated assaults.

^{*}Federal Bureau of Investigation "Uniform Crime Reporting Handbook", United States Department of Justice, January 1975.

1.b. Criminal Homicide - Manslaughter by Negligence

Definition - the killing of another person through gross negligence.

As a general rule, all deaths caused by the gross negligence of another are counted. One offense is scored for each person killed. The death of a person caused by his own negligence is not counted as an actual offense. All traffic deaths are counted and recorded. Those traffic deaths which are found through police investigation to be accidental (without gross negligence) whould be counted as "unfounded."

Forcible Rape

Definition - the carnal knowledge of a female forcibly and against her will.

One offense for each person raped or upon whom an assault to rape or attempt to rape has been made. Does not include statutory rape offenses. Statutory rape is defined as the carnal knowledge or the attempted carnal knowledge of a female with no force used and wherein the female victim is under the legal age of consent. Does not include other sex offenses under this category. Statutory rape and other sex offenses are classified and counted as Part II offenses.

3. Robbery

Definition - the taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

Robbery is a vicious type of theft in that it takes place in the presence of the victim. The victim, who usually is the owner or person having custody of the property, is directly confronted by the perpetrator and is treatened with force or fear that force will be used. Robbery involves a theft or larceny but aggravated by the element of force or threat of force. If no force or threat of force is used, such as in pocket picking, or purse snatching, the offense must be scored as larceny rather than robbery.

If force is used in the commission of a theft such as in overcoming the active resistance of the victim in a purse snatching, then the offense is to be classified as strong-arm robbery.

4. Aggravated Assault

Definition — an unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault usually is accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Assault may be defined as an unlawful attack by one person upon another. Aggravated assault is defined as an unlawful attack by one person upon another for the purpose of inflicting severe bodily injury usually accompanied by the use of a weapon or other means likely to produce death or great bodily harm. Attempts should be included since it is not necessary that any injury result from an aggravated assault when a gun, knife, or other weapon is used which could and probably would result in serious personal injury if the crime was successfully completed.

The categories of aggravated assault include the commonly entitled offenses of assault with intent to kill or murder; poisoning; assault with a dangerous or deadly weapon; maiming, mayhem, and assault with intent to maim or commit mayhem, assault with explosives; and all attempts to commit the foregoing offenses. Attempt to murder or assault to murder are reported as aggravated assault.

5. <u>Burglary - Breaking or Entering</u>

Definition - the unlawful entry of a structure or dwelling with intent to commit a felony or a theft.

Offenses locally known as burglary (any degree); unlawful entry with intent to commit a larceny or felony; breaking and entering with intent to commit a larceny; housebreaking; safe-cracking; and all attempts at these offenses are counted in UCR as burglary.

6. <u>Larceny - Theft</u>

Definition - the unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another.

Larceny and theft mean the same thing in Uniform Crime Reporting. Motor vehicle theft is not included and is counted separately because of the great volume of thefts in that particular theft category.

All thefts which are not part of a robbery, burglary, or motor vehicle theft should be classified in this category regardless of the value of the article stolen. All thefts and attempted thefts are counted.

NOTE: Embezzlement; fraudulent conversion of entrusted property; conversion of goods lawfully possessed by bailees, lodgers, or finders of lost property; obtaining money by false pretenses; larceny by check, larceny by bailee, and check fraud are all to be classified as Part II offenses.

Larceny - thefts are broken down into the following categories:

A. Pocket Picking

Definition - the theft of articles from a person by stealth where the victim usually does not become immediately aware of the theft.

The theft includes removal of such items as wallets from women's purses or handbags and men's pockets and usually occurs in a crowd, public conveyance, or other similar situation to disguise the activity. Theft from a person in a conscious or unconscious state, including drunks, is included. However, if the victim is manhandled or force beyond simple jostling is used to overcome the resistance of the victim, the offense becomes a strong-arm robbery.

B. Purse Snatching

Definition - the grabbing or snathing of a purse, handbag, etc., from the custody of an individual.

If more force is used than is actually necessary to snatch the purse from the grasp of the person, then a strong-arm robbery has occurred.

C. Shoplifting

Definition - the theft by a person other than an employee of good or merchandise exposed for sale.

This violation assumes that the offender had legal access to the premises and thus no trespass or unlawful entry was involved. This category includes thefts of merchandise displayed outside a building as part of the stock in trade such as in department stores, hardware stores, supermarkets, fruit stands, gas stations, etc.

D. Thefts From Motor Vehicles (Except Theft of Motor Vehicle Parts and Accessories)

Definition - the theft of articles from a motor vehicle, whether locked or unlocked.

This type of larceny includes thefts from automobiles, trucks, truck trailers, buses, or motorcycles. It also includes thefts from any area in the automobile or other vehicle including the truck, glove compartment, or other enclosure. Some of the items included in this category of theft are cameras, suitcases, wearing apparel, packages, etc.

Certain state statutes might interpret Thefts From Motor Vehicles as burglaries. For Uniform Crime Reporting these thefts must be scored as larceny.

E. Theft of Motor Vehicle Parts and Accessories

Definition - the theft of any part or accessory attached to the interior or exterior of a motor vehicle in a manner which would make the part an attachment to the vehicle or necessary for the operation of the vehicle.

This category would include theft of motors, transmissions, radios, heaters, hubcaps and wheel covers, manufacturers emblems, license plates, radio antennas, side-view mirrors, gasoline, tape decks, etc. Theft of items being transported in the vehicle should be classified in Category D, Thefts From Motor Vehicles.

F. Theft of Bicycles

Definition - the unlawful taking of any bicycle, tandem bicycle, unicycle, etc.

G. Theft From Buildings

Definition - the theft from within a building which is open to the general public and where the offender has legal access.

Not included are shoplifting and thefts from coin-operated devices or machines as these offenses should be scored in their separate categories of larceny. The category of Theft From Buildings includes thefts from such places as churches, restaurants, schools, libraries, public buildings, and other public and professional offices during the hours when such facilities are open to the public.

Theft from coin-operated machines or pay telephone boxes within open buildings should be counted as Thefts From Coin-Operated Devices or Machines.

H. Theft From Coin-Operated Device or Machine

Definition - a theft from a device or machine which is operated or activated by the use of a coin.

Some examples of such machines are candy, cigarette, and food vending machines; telephone coin-boxes; parking meters; laundry machines; pinball machines; washers and dryers located in laundromats where no breaking or illegal entry of the building is involved.

I. All Other Larceny - Theft Not Specifically Classified

Definition - all thefts, which do not fit the definitions of the specific categories of larceny listed above.

This category includes theft from fenced enclosures, boats, and airplanes. Theft of animals, lawnmowers, lawn furniture, hand-tools, farm and construction equipment are also included, where no breaking or entering of a structure is involved.

The illegal entry of a tent, tent trailer, or travel trailer used for recreation purposes followed by a theft, felony, or attempt to commit a felony should be counted as larceny.

7. <u>Motor Vehicle Theft</u>

Definition - the theft or attempted theft of a motor vehicle.

Included in this classification is the theft or attempted theft of a motor vehicle which is defined for this program as a self-propelled vehicle that runs on the surface and not on rails. Examples of motor vehicles are automobiles, trucks, buses, motorcycles, motor scooters, snowmobiles, etc.

Part II Offense Definitions

8. Other Assaults

Assaults and attempted assaults which do not result in serious or aggravated injury to the victim are included as other assaults.

9. Arson

Included are all violations of state laws and municipal ordinances relating to arson and attempted arson - any willful or malicious burning or attempts to burn, with or without intent to defraud, a dwelling house, church, college, jail, meeting house, public building or any building, ship or other vessel, motor vehicle or aircraft; contents of buildings, personal property of another, goods or chattels, crops, trees, fences, gates, grain, vegetable products, lumber, woods, cranberry bogs, marshes, meadows, etc.

If personal injury results from the arson, the situation would include an offense of aggravated assault. In the event a death results from arson, the incident would include murder.

10. Forgery and Counterfeiting

Forgery and counterfeiting are treated as allied offenses. In this class are placed all offenses dealing with the making, alterning, uttering or possessing, with intent to defraud, anything false in the semblance of that which is true.

11. Fraud

Fraudulent conversion and obtaining money or property by false pretenses. Includes bad checks, confidence games, etc., except forgeries and counterfeiting.

12. Embezzlement

Misappropriation or misapplication of money or property entrusted to one's care, custody, or control.

13. Stolen Property; Buying, Receiving, Possessing

Included in this class are all offenses of buying, receiving, and possessing stolen property, as well as all attempts to commit any of these offenses.

14. Vandalism

Vandalism consists of the willful or malicious destruction, injury, disfigurement, or defacement of any public or private property, real or personal, without consent of the owner or person having custody or control, by cutting, tearing, breaking, marking, painting, drawing, covering with filth, or any other such means as may be specified by local law. This offense covers a wide range of malicious behavior directed at property such as: Cutting auto tires, drawing obscene pictures on public restroom walls, smashing windows, destroying school records, tipping over gravestones, defacing library books, etc.

15. Weapons; Carrying, Possessing, etc.

This class deals with weapon offenses regulatory in nature.

16. <u>Prostitution and Commercialized Vice</u>

Included in this class are the sex offenses of a commercialized nature.

17. Sex Offenses

(Except forcible rape and prostitution and commercialized vice.) Includes offenses against chastity, common decency, morals, and the like.

18. Narcotic Drug Laws

Included are all violations of state and local laws, specifically those relating to the unlawful possession, sale, use, growing, manufacturing, and making of narcotic drugs.

- a. Opium, or cocaine and their derivatives (morphine, heroin, codeine).
- b. Marijuana.
- c. Synthetic narcotics manufactured narcotics which can cause true drug addiction (demerol, methadones).
- d. Dangerous non-narcotic drugs (barbiturates, benzedrine).

19. Gambling

All charges which relate to promoting, permitting, or engaging in gambling are included in this category.

20. Offenses Against the Family and Children

Included here are all charges of non-support and neglect or abuse of family and children.

21. <u>Driving Under the Influence</u>

This class is limited to the driving or operating of any vehicle or common carrier while drunk or under the influence of liquor or narcotics.

22. Liquor Laws

With the exception of "driving under the influence" (Offense No. 21), liquor law violations, state or local, are placed in this class.

23. Drunkenness*

Included in this class are all offenses of drunkenness or intoxication, with the exception of "driving under the influence" (Offense No. 21). Detoxification cases are not recorded here.

24. Disorderly Conduct

In this class are placed all charges of committing a breach of the peace.

25. <u>Vagrancy*</u>

Persons prosecuted on the charge of being a "suspicious character or person, etc." are included in this class.

26. <u>All Other Offenses</u>

Included in this class are every other state or local offense except traffic, not included in offenses 1 to 25.

27. Suspicion*

While "suspicion" is not an offense, it is grounds for many arrests in those jurisdictions where the law permits.

28. <u>Curfew and Loitering Laws - (Juveniles)</u>

Counted are all arrests made by departments for violation of local curfew or loitering ordinances were such laws exist.

29. <u>Runaway - (Juveniles)</u>

For purposes of UCR, this category includes apprehensions for protective custody as defined by local statute.

*NOTE: Suspicion is not a criminal offense in Oregon. Drunkenness and vagrancy were repealed by the 1975 Oregon Legislature and are not longer criminal offenses by statute.

Arrest Definition

For the purposes of UCR, adult persons are considered "ARRESTED": whether by actual physical arrest or the issuance of misdemeanor citations.

Juveniles are considered "ARRESTED" when the circumstances are such that if he or she were an adult an arrest would be made or a misdemeanor citations issued.

Clearance Definition

Clearances by Arrest

An offense is "cleared by arrest" or solved for crime reporting purposes when at least one person is:

- 1. Arrested;
- 2. Charged with the commission of the offense; and
- 3. Turned over to the court for prosecution.

The prosecution can follow arrest, court summons, or police notice. A clearance by arrest can be claimed when the offender is a person under 18 years of age and is cited to appear in juvenile court or before other juvenile authorities. This clearance can be taken even though no physical arrest was made.

The number of offenses and not the number of persons arrested are counted in the clearances recorded.

Exceptional Clearances

In certain situations, police are not able to follow the three outlined steps under "clearance by arrest" to clear offenses known to them. In many instances, police have exhausted all leads and have done everything else possible in order to clear a case. If the following questions can all be answered "yes" the offense can then be cleared exceptionally.

- 1. Has the investigation definitely established the identify of the offender?
- 2. Is there enough information to support an arrest, charge, and turning over to the court for prosecution?
- 3. Do you know the exact location of the offender so that you could take him into custody now?
- 4. Is there some reason outside the police control that stops you from arresting, charging, and prosecuting the offender?

Examples of exceptional Clearances:

An offense can be exceptionally cleared when it falls into one of the following categories:

- a. Suicide of the offender (the person responsible is dead).
- b. Double murder (two persons kill each other).
- c. Deathbed confession (the person responsible dies after making the confession).
- d. Offender killed by police or citizen.
- e. Confession by offender already in your custody or serving sentence (this is actually a variation of a true clearance by arrest you would not "apprehend" the offender but in most situations like this the offender would be prosecuted on a new charge).
- f. An offender prosecuted in another city for a different offense by state or local authorities or prosecuted in another city or state by the federal government for an offense which may be the same (you attempt to return him for prosecution, but the other jurisdiction will not release to you).
- q. Extradition is denied.
- ň. The victim refuses to cooperate in the prosecution (this does not "unfound" the offense and the answer must still be "yes" to the first three questions above).
- i. For some reason outside your control, an offender is prosecuted for a less serious charge than that for which you arrested him (such as a charge of reckless driving for a negligent manslaughter offense the offense on Return A remains the same).
- j. The handling of a juvenile offender either orally or by written notice to parents in instances involving minor offenses such as petty larceny.

It is recognized that departmental policy in various police agencies permit the discontinuance of investigation and the closing administratively of cases in which all investigation has been completed. The administrative closing of a case or the "clearing" of it be departmental policy, under UCR reporting, does not permit the clearance of an offense by exceptional clearance unless the four questions mentioned above can all be answered "yes." The recovery of proeprty does not give a reason to clear the case for UCR purposes. The clearance of a case for UCR purposes should have no affect on whether or not the department has internal policies as to "closing" a case or discontinuing active investigation on a case.

Part III - Activity Code Definitions

Part III is defined in Oregon as Police Activity, Non-Criminal Complaints and requests for service, etc. from 39 Traffic Crime thru 99 Other, including Custody activity 500 thru 550.

The definitions presented in this section vary from exact and specific to standardized guide lines for code usage.

A number of these codes frequently border on criminal offense circumstances. When subsequent information or investigation uncovers criminal situations, the appropriate offense/arrest entry(s) are required.

39. <u>Traffic Crime (Except DUII)</u>

"Serious Traffic" offenses as defined by the Oregon Motor Vehicle code.

EXAMPLES: Officers from the department are investigating an Injury Accident where one of the participating vehicles fled the scene.

Officers from the department pursue a vehicle for Reckless Driving.

40. Traffic Accident - Fatal

Traffic accidents that result in the death of at least one of those persons involved.

41. <u>Traffic Accident - Injury</u>

Non-fatal traffic accidents that result in the injury of at least one of those persons involved.

42. Traffic Accident - Property damage

Traffic accidents that result in property damage $\underline{\text{without}}$ personal injury.

50. Illegal Alien

Police Activity surrounding circumstances relating to Illegal Aliens.

EXAMPLES: Officers from the department assist Immigration authorities with a search for illegal aliens.

52. Warrants

Receiving warrants as an activity.

53. Stolen Motor Vehicles Recovered for Another Agency

The recovery of a stolen "Motor Vehicle" when the original theft report and case is not from your department.

EXAMPLE: Officers from your department recover a motor vehicle reported stolen by another law enforcement agency.

54. <u>Stolen Property Recovered for Another Agency</u>

The recovery of stolen property (other than motor vehicles) when the original theft report and case is not from your department.

EXAMPLE: Your department recovers property for other agency.

57. Sudden Death/Bodies Found

The finding of a deceased person when the cause of death is of natural, suspicious or unknown circumstances.

If it is later determined that Homicide is involved an additional entry for that particular offense is required.

58. Suicide

The attempt of or the actual taking of ones own life by purposely self inflicted means or circumstances.

59. Other Accidents

Other forms of accidents that are not traffic related.

60. Animal Problems

Circumstances or complaints relating to the care of or actions of animals.

61. Property

The circumstances relating to lost, found or confiscated property. Does not include recovery of property associated with a reported offense by your department or outside agency or jurisdiction.

EXAMPLE: Your department receives information that a citizen lost his wallet on the street in the downtown business district.

A citizen reports that a mans' wallet and contents were found on the sidewalk by a grocery store.

62. Abandoned Auto

The circumstance or complaint/investigation of an abandoned auto.

64. Locate Only Auto

The complaint/investigation or search related to a missing auto.

NOTE: If a stolen motor vehicle report is subsequently taken a criminal offense entry will also be required.

EXAMPLE: An intoxicated and confused subject reports his car is "stolen". Your department does not wish to take a stolen report until the victim is more rational. In the meanwhile officers are checking here and there for the auto.

65. Impound Auto

Recording the activity of legally removing a motor vehicle from its location.

EXAMPLES: Your detective division impounds a vehicle involved in a Narcotics case.

A lending institution advises that they have repossessed a local resident's auto.

66. Assistance Rendered

An act or actions taken rendering assistance or service to the public, other law enforcement or governmental agencies that is not specifically covered by other codes.

EXAMPLES: Your department rolls a patrol unit to assist a neighboring jurisdiction with an injury traffic accident.

Your department delivers an emergency message to a local address.

67. Domestic Problems

Complaints or problems of the home and/or family relationships, family beefs, etc.

NOTE: If any criminal offense is determined an additional offense entry is required.

69. Insecure Premises/Security

Citizens reporting and/or officers finding and investigating unlocked or open doors, windows, insecure building, etc.

If it is subsequently determined that a criminal offense is involved an additional entry(s) for the particular offense is required.

70. <u>Suspicious Persons and Circumstances</u>

Complaints, observations, finding resulting from suspicious actions.

NOTE: If any criminal offense is determined and if any arrest is made, appropriate offense and custody entries are required.

71. Public Safety

Situations that relate to problems created by man or acts of nature that present possible danger or potential hazard, etc.

EXAMPLES: Children are reported to be playing in a vacant-dilapidated building.

73. Disburbance/Noise

Complaints relating to disturbances involving noise.

75. Sick Cared For

Assistance rendered to ill or injured persons.

EXAMPLES: An officer from your department responds to a "man down" call and provides heart massage to an apparent heart attack victim.

An officer from your department responds to a "man down" call and upon arrival finds that another citizen is applying proper treatment to an apparent victim of some form of seizure. The officer summons an ambulance, provides additional assistance and crowd control.

Officers on routine patrol come across a local person known to have a mental problem who is wandering far from home, proper care, and attention.

76. Marine

Complaints relating to boating and water ways.

EXAMPLE: The department receives a complaint that power boats are frequently speeding thru a beach area clearly marked and designated for swimming only.

77. Traffic/Roads

Reports relating to moving traffic, parking, obstructed throughfares, etc. This code should not be used for the recording of traffic citations.

EXAMPLES: A local resident phones to advise that a parked car is blocking their driveway.

The department receives information that a traffic signal is stuck and is not changing colors - traffic is starting to back up.

78. Civil Complaints

Complaints relating to civil matters that may or may not involve the departments presence in an effort to mediate minor disputes or to keep the peace, etc.

EXAMPLES: Your department receives a complaint from a local resident that two other neighbors are involved in a heated argument over possession of apples from a tree growing on their property line.

A lady requests that an officer accompany her to a former husbands' residence because she wishes to pick up some property awarded to her as the result of divorce.

The manager of a local apartment house requests that an officer remove an guest of one of his tenants for violating building rules.

79. <u>Vehicle Disposition</u>

The release or discharge of vehicles within the custody of or held by the authority of the department.

81. Alarm

Complaints or observations of fire, burglary, robbery and similiar alarms.

NOTE:

If it is subsequently determined that a criminal offense is involved an additional entry(s) for the particular offense is required.

99. Other

Miscellaneous complaints, actions, service, etc., not covered by preceding codes.

APPENDIX B
STOLEN PROPERTY CATEGORIES

Stolen Articles Categories

The following table illustrates the twenty-two categories of stolen articles presented in this report with a complete listing of articles included within each category.

Category

Includes:

Bicycles

Bicycles, tricycles.

Boats, marine equipment

Boats, marine equipment.

Cameras, accessories

Cameras, accessories, viewing

equipment.

Clothing, furs

Clothing, furs, luggage, purses,

wallets

Furniture

Furniture

Jewelry, watches

Jewelry, watches.

Currency

Money, securities, stamps, notes.

T.V., Radio, Stereo, etc.

Television, radios, stereo/ phonographs, tape recorder/ players, accessories, P.A./paging

players, accessories, P.A./paging devices, sound metering devices,

other.

Household appliances

Appliances, household goods.

Tools

Tools.

Sports equipment

Sporting goods.

Firearms

Firearms.

Motor vehicles

Motor vehicles.

Motor vehicle parts and accessories

Motor vehicle parts and accessories, miscellaneous vehicles, motors/engines, convertible tops/tonneau, trailers/campers/canopies.

Office equipment

Office furniture and equipment.

Construction equipment

Heavy construction machinery.

Musical instruments

Musical instruments.

Aircraft, parts, accessories

Livestock

Consumable goods

Saddles and tack

Miscellaneous

Aircraft, parts and accessories.

Livestock/farm animals.

Beverages/liquor, food/meat, personal hygiene items, gas/fuel, hay/feed, cigarettes/tobacco, drugs, other.

Saddles and tack.

Farm and garden equipment, knives, explosives, spraying devices and attachments, fire extinguishing equipment, metals (brass, copper, etc.), other miscellaneous items.

APPENDIX C
STATISTICAL METHODS

APPENDIX C

STATISTICAL METHODS

CALCULATION OF CRIME RATES

Quite often it is desired to compare the volume of crime occurrence, either totally or by individual offense, over a period of time for a selected group of agencies or jurisdictions. The geographical area being studied will undoubtedly consist of law enforcement agencies of various strengths and serving widely varying sizes of population. An agency equalizing factor must be developed, or in other terms, a common denominator is needed. To arrive at a valid comparison, the concept of rate is utilized.

The crime rate is defined as the number of offenses occurring per 100,000 population over the period of one year. The common denominator for any community, county, district, or state is obtained by dividing the population represented by 100,000. Once this denominator is determined, it becomes a relative constant until such time as the population of the community, county, district, or state changes appreciably. The crime rate can be calculated then by dividing the number of offenses by the denominator.

- a. Population 100,000 = common denominator
- b. Number of offenses common denominator = crime rate

Example:

Agency A serves a population of 50,000 and experienced a total of 2,500 Index offenses in 1976.

Index Crime Rate -

- a. 50,000 (population) = 0.50 (common denominator)100,000
- b. $\frac{2,500 \text{ (number of offenses)}}{0.50 \text{ (common denominator)}} = 5,000 \text{ (crime rate)}$

Therefore, the Index crime rate for Agency A in 1976 was 5,000 offenses per 100,000 population.

Example:

Agency B serves a population of 128,750 and experienced a total of 13,500 robbery offenses in 1975.

Robbery rate -

- a. $\frac{128,750}{100,000} = 1.2875$
- b. $\frac{13,500}{1.2875} = 10,485$

The robbery rate for Agency B in 1975 was 10,485 offenses per 100,000 population.

CALCULATION OF TRENDS

Crime trend information is a presentation of the fluctuation of data from one time period to another. Trends can be computed on the basis of volume (number of offenses, arrests, etc.) or rates (offenses, arrests, etc. per 100,000 population). The trend is then presented as a percent change. The statistical connotation for trend is usually based on data over a substantial length of time such as five or ten years (at least three); however, a comparison can be made between two years, months, weeks, etc.

To compute the trend, always take the difference between the number of offenses or rates of both periods of time, divide by the number for the prior period, and multiply by 100, thus yielding a percent change.

- a. Number of offenses (one period) Number of offenses (the other period) = difference
- b. Difference prior period x 100 = percent change

Example:

Agency A showed an Index crime rate of 1,000 in 1975 and 1,250 in 1976. By visual inspection there was an increase.

Change -

- a. 1,250 (1976) 1,000 (1975) = 250 (difference)
- b. $\frac{250 \text{ (difference)}}{1,000 \text{ (prior period } 1975)} \times 100 = 25.0\%$

Thus the Index crime rate for Agency A increased 25 percent from 1975 to 1976.

Example:

Agency B reported 1,850 burglaries in 1970 and 1,365 burglaries in 1975. By visual inspection there was a decrease.

Change -

a.
$$1,850 - 1,365 = 485$$

b.
$$\frac{485}{1,850}$$
 x 100 = 26.2%

Thus, the number of burglaries for Agency B showed a decrease of 26.2 percent from 1970 to 1975.

One point is important in calculating change from one period to another. If the number of offenses, arrests, etc. increases from zero for the prior period to a specific number for the current period, no change can be mathematically calculated.

Example:

Agency A showed no burglary offense in 1975 and 100 offenses in 1976. The increase in \underline{not} +100 percent as may appear but cannot be determined.

Calculation -

a.
$$100 - 0 = 100$$

b.
$$\frac{100}{0}$$
 = indeterminant number

Another example worth mentioning is the case where the number decreases from a specific number in the prior period to zero in the current period. The change is always -100 percent regardless of the number for the prior period.

Example:

Agency B showed 175 robbery offenses in 1975 compared to no offenses in 1976.

Change -

a.
$$175 - 0 = 175$$

b.
$$\frac{175}{175} \times 100 = 100\%$$

Thus the number of robberies for Agency B showed a decrease of 100 percent from 1975 to 1976.

THE CHI-SQUARE TEST

The Chi-square tests presented in Section 2 of this report indicate whether or not two or more frequency distributions are different enough statistically so that they could be considered independent of each other. For example, a Chi-square value is computed for males versus females on the various categories of robbery. Assume the Chi-square value was not significant at the customarily chosen 5 percent level of confidence. A non-significant value of Chi-square indicates that males and females have essentially the same distribution of arrests over the various categories of robbery. That is, the relative proportion of males in each category is the same as the relative proportion of females in the same category. No discussion concerning the calculation of a Chi-square value is presented in this report. There are numerous books available which explain various statistical methods in more detail.
