### Abstract

-1-

The furlough program has been in operation by the Massachusetts Department of Correction since November 6, 1972. A total of 67,319 furloughs have been granted between the inception of the program and December 31, 1980. During that period, 539 of those furloughs resulted in escapes (a resident failing to return to his/her correctional facility within two hours of his/her designated time), thus yielding an overall escape rate of 0.8%. The present report contains a statistical description of the furlough program for the year 1980 as well as a trend analysis of the program since its inception in 1972.

From January 1, 1980 to December 31, 1980, a total of 8,654 furloughs were granted. The number of individuals furloughed in 1980 was 1,193. The escape rate by furloughs granted during 1980 was 0.3% and the escape rate by individual furloughed was 2.0%.

# Introduction

-3-

This report is a statistical description of the Massachusetts Department of Correction Furlough Program for the year 1980. Included is some information on trends for the program from its inception in 1972 until the end of the year 1980.

The report is divided into two sections. The first section gives an overview of pertinent furlough statistics for the year 1980 only. Section II provides a brief overview of the Massachusetts Furlough Program. Comparisons of furlough characteristics over the past eight years are discussed. In addition, this section contains escape rates on background variables of an individual for each furlough granted during 1980. The background variables include personal background characteristics, present offense variables, criminal history variables, and furlough variables.

The data for the tables in this report were derived from the computerized data base data base developed by the Correction and Parole Management Information System (CAPMIS) and were produced on the Massachusetts State College Computer Network (MSCCN).

# 1980 Statistics

From January 1, 1980 to December 31, 1980, a total of 8,654 furloughs were granted. The number of individuals furloughed in 1980 was 1,193. The average number of furloughs per resident was approximately 7.

### Escape Rate by Furlough: 1980

During 1980, out of the 8,654 furloughs granted, 24 resulted in escapes for an escape rate (by furlough) of 0.3% for 1980.<sup>1</sup>

# Escape Rate by Individuals Furloughed in 1980

Of the 1,193 individuals furloughed in 1980, 24 were declared on escape status. The escape rate by individual furloughed is 2.0%.

#### Late Returns for 1980

For 1980, there were 249 cases which were late returns. These 249 cases involved 188 individuals. These 188 individuals all returned within two hours of their return time. Sixty-one individuals voluntarily returned within the two hour period more than once during 1980.

### Furloughs By Security Level 1980

During 1980, 762 furloughs were from maximum or medium security institutions, representing 9% of the furloughs granted during 1980. There were 2,530 furloughs from minimum security (representing 27%) and 5,362 furloughs from pre-release (representing 62% of the furloughs granted during 1980). Table I presents information on furloughs by security level for 1980 along with the corresponding escape rates.

# Proportion of Releases Participating in Furloughs, 1980

From January 1, 1980 to December 31, 1980, the Department of Correction released 1,015 residents to the community. Of that total, 403 had received one or more furloughs (40%). The remaining 60% of the individuals released had not participated in the furlough program during their incarceration.

# Individuals Returning Voluntarily During 1980

There were seven individuals who were on escape status from their furlough and returned voluntarily within 24 hours from their return date. Table 1

Out of an average population of 3,024, an average of 425 individuals received a furlough during the course of a month in 1980. This results in an average proportion of 14.1% of the population being furloughed during the course of one month. The overwhelming majority (77%) of the population is housed in maximum or medium security institutions in a given month; 2% of this population received a furlough on an average in 1980. On the average, 44% of the minimum security population and 66% of the pre-release population received furloughs during a typical month in 1980. Table II presents information on the number of individuals furloughed in proportion to the average population for 1980.

Furlough Statistics Since Inception of Program

# Overview

-11-

The furlough program for residents of Massachusetts correctional facilities has been operating since November 6, 1972. Between that time and December 31, 1980, a total of 67,319 furloughs have been granted. In 539 cases, individuals have failed to return to their respective correctional facility within two hours of their prescribed time of return. Thus, since the inception of the program there has been an overall escape rate of 0.8%.

Table 3 presents a summary of furlough statistics for the years 1972 to 1980. For each of these years information regarding the number of furloughs, the number of individuals furloughed, the number of escapes and corresponding escape rates is presented.

### Table 3

Summary Furlough Statistics For the Years 1972 To 1980

Year	Number of Furloughs	Individuals Furloughed	Number Of Escapes	Escape Rate For Individual <sup>2</sup>	Escape Rate By Furlough
1972 <sup>3</sup>	1182	793	8	1.0	0.7
1973	7195	1868	134	7.2	1.9
1974	8322	1668	127	7.6	1.5
1975	8680.	1482	88	5.9	1.0
1976	7985	1305	40	3.1	0.5
1977	8199	1355	42	3.1	0.5
1978	9062	1248	38	3.0	0.4
1979	8040	1232	38	3.1	0.5
1980	8654	1193	24	2.0	0.3
TOTAL	67319	6328 <sup>4</sup>	539	8.5	0.8

As Table 3 shows, the escape rates by furlough have decreased from 1973 to 1980 and range from a high of 1.9% to a low of 0.3%. Similarly, the escape rates by individual have also decreased during this time frame from a high of 7.6% to a low of 2.0%. Since the inception of the furlough program, the number of individuals furloughed per year has decreased significantly.

release.

Releasing

Year

1

From 1973 to 1980, the number of individuals furloughed decreased from 1,868 to 1,193 - a decline of 36%. The escape rate by individuals furloughed has also decreased within the same time span. In 1973, the escape rate by individual was 7.2%, and in 1980,

the rate was 2.0%. At the same time, the percentage of individuals being released who had not participated in the furlough program has increased. Table IV presents the data for the percentage of releases who participated in the furlough program prior to their

-12-

Tables 5 and 6 give furlough statistics by institution furloughed from the years 1973 to 1976 and 1977 to 1980 respectively. The number of furloughs and the corresponding escape rates for each correctional institution is given. Although minor fluctuations have occurred at some institutions, the overall escape rates have been decreasing.

Finally, Table 7 looks at the average percentage of individuals furloughed by security levels and the total percentage of the population furloughed from 1974 to 1979.

Percentage of Average Monthly Population Furloughed By Security Level 1974 - 1980<sup>6</sup>

			· · · · · · · · · · · · · · · · · · ·	
Year	Maximum or Medium Security	Minimum Security	Pre-Release	Total
1974	15.2%	55.2%	79.9%	21.9%
1975	13.8%	59.6%	74.6%	20.8%
1976	7.6%	44.9%	55.9%	14.7%
1977	6.2%	60,2%	54.5%	15.5%
1978	4.5%	54.2%	64.6%	16.8%
1979	4.0%	47.1%	59.6%	15.5%
1980 <sup>.</sup>	2,0%	43.7%	66.2%	14.18
As Tabl	e 7 indicates,	the percentag	e of the populat	tion in maximum
and med.	ium security in	nstitutions wh	o received furle	oughs decreased
from 15	.2% in 1974 to	only 2% in 19	80. The total p	percentages have
decreas	ed also.			

# Table 7

At this juncture, the report looks at the escape rates of characteristics of individuals for each furlough granted for 1980. Information concerning an individual's present offense variables, personal background characteristics, criminal history variables, and furlough variables have been examined. In order to determine any significant relationships between the characteristics of the existing variables and their escape ratios, chi square statistics were computed. During 1979, there were ten variables that were found to be significant. They were: sex, known drug use, total number of court appearances, number of charges for person offenses, property offenses, drug offenses, and escape offenses, age at first court appearance, number of Department of Youth Service commitments, and total number of prior incarcerations.

After examining the variables for 1980, the results indicate that the same characteristics were found to be significant. That is, women, offenders with prior known drug use, individuals with prior charges for drug offenses, and individuals with any prior incarcerations have higher escape rates.

The tables which follow in Appendix I contain frequencies and escape rates of characteristics of individuals for each furlough granted during 1980. It is important to note that the figures in these tables refer to the number of furloughs, not the number of individuals furloughed, therefore, some individuals who received more than one furlough are counted more than once in the tables in Appendix I.

#### Footnotes

The Department of Correction furlough statistics define an · "escape from furlough" in accordance with Department, Order 467.1 entitled, "Furloughs - Rules and Regulations", according to Section 10.4(c): "Failure of the resident to return to the correctional facility after the two hour period set forth in Section 10.4(b) shall be considered an escape regardless of prior notification to the facility by the resident that he would be late. The superintendent or his designee shall notify, forthwith, appropriate law enforcement officials of the escape.

These figures may differ from prior departmental reports due to multiple counting of individuals furloughed from different

The figures for 1972 represent totals for only two months of 1972. Therefore, the number of furloughs and individuals furloughed is much lower than subsequent years.

4. The figure for the total number of individuals furloughed since the inception of the program is not the sum of the individual years. Individuals are furloughed in different years and so by adding the yearly totals for individuals participating in the program, multiple counting occurs.

5. The figures in this table were taken from yearly Research Unit reports on A Statistical Description of Releases From the Massachusetts Department of Correction, Massachusetts Department of Correction Publication Numbers 89, 109, 117, 137, 163, 177, 204, and 234.

6. The figures in this table were taken from yearly furlough reports by the Research Unit entitled A Yearly Statistical Report of the Furlough Program, Massachusetts Department of Correction Publication Numbers 95, 115, 145, 162, 176, and

7. Williams, Lawrence T., 1979 Statistical Report of the Furlough Program, Massachusetts Department of Correction Publication Number 206 (September, 1980).
