KANSAS JUVENILE JUSTICE INFORMATION SYSTEM (KJJIS)

Annual Report - Calendar 1980

November 1, 1981

\* \* \* HIGHLIGHTS \* \* \*

\*THE 22,784 JUVENILE COURT REFERRALS REPORTED BY ALL 29 JUDICIAL DISTRICTS IN 1980 REFLECTED A 1.2% INCREASE OVER 1979. (page 3)

\*LARCENY-OTHER (16.4%) WAS THE MOST FREQUENT DELINQUENT/MISCREANT OFFENSE REPORTED IN 1980. (page 6)

\*RUNNING AWAY (39.7%) CONTINUES TO BE THE MOST COMMON REFERRAL MADE IN THE STATUS OFFENSE CATEGORY. (page 6)

\*JUVENILE'S REFERRED AS DEPRIVED SHOW THE LARGEST INCREASE IN 1980 (18.2%) OVER 1979. (page 8)

\*THE AVERAGE AGE OF YOUTHS REFERRED TO THE COURT IN 1980 WAS 15.2 YEARS OLD. (page 16)

\*MALE OFFENDERS ACCOUNT FOR 67.5% OF THE TOTAL NUMBER OF YOUTHS REFERRED TO THE COURT, BUT, ONLY SHOW AN INCREASE OF .1% IN 1980 OVER 1979. (page 18)

\*THERE WERE 7,161 FEMALES REFERRED TO THE COURT IN 1980 WHICH IS AN INCREASE OF 4.1% IN 1980 OVER 1979. (page 18)

\*39.2% OF THE TOTAL NUMBER OF ALL JUVENILE'S REFERRALS ARE DISMISSED. (page 22)

\*40% OF ALL REFERRALS ARE DISPOSED OF IN TEN DAYS OR LESS.

\*81.6% OF THE TOTAL NUMBER OF JUVENILES REFERRED FOR DELINQUENT/MISCREANT OFFENSES ARE WHITE. (page 42)

\*YOUTHS 17 YEARS OF AGE ACCOUNT FOR 28.6% OF THE COURTS WORKLOAD IN DELINQUENT/MISCREANT OFFENSES. (page 43)

#### PREFACE

Probably the most important activity concerning juvenile justice in the state of Kansas during the past year has been the work on a comprehensive revision of the Juvenile Code. The most sweeping change proposed for the legislative session in the spring of 1982 is the splitting of the Juvenile Code into an "offender" section and a "child in need of care" section. The ramifications of this proposed restructuring will be extensive, therefore, work on the Kansas Juvenile Justice Information System has been delayed. It is believed that any information system developed should be based totally on the existing juvenile code after completion of the 1982 legislative session and will be implemented January 1, 1983. All participating parties in the KJJIS believe this delay is appropriate.

The Kansas Statistical Analysis Center remains committed to the implementation of a viable, statewide database on juvenile justice activities in Kansas. Similarly, the linkage of existing "systems" into a comprehensive whole is a goal continued to be supported by KSAC. However, only through continued cooperation of all parties concerned and exhaustive efforts by the participants will this ideal be realized in the near future.

Michael E. Boyer, Director Kansas Statistical Analysis Center

# **ACKNOWLEGEMENTS**

I would like to take this opportunity to express my sincere appreciation to those people whose efforts have lended to this publication of annual juvenile data for the state of Kansas:

To all the clerks, probation staff and judges involved in the process and who have any responsibility for the completion of the source documents;

To the Office of Judicial Administration, especially Howard Schwartz, Judicial Administrator, Mr. John Johnston and Mr. Lowell Long;

To the Department of Social and Rehabilitation Services, especially Mr. James Trast and Ms. Gwen Simpson;

To Ms. Debra A. Smith and Ms. Pamala L. Faust for the clerical support necessary to produce a publication of this nature;

And, finally to Ms. M. Kathleen Bledsoe, who once again served as author for the annual juvenile report, shouldered the majority of the data entry and to whom final responsibility falls for the overall product.

Michael E. Boyer, Director Kansas Statistical Analysis Center

# INTRODUCTION

The data contained in this publication represents juvenile activity in the district court system in Kansas for the calendar year 1980. The form found in Appendix D, the Juvenile Court Statistical Card, serves as the source document for this data. As in prior years, input was received from all 105 Kansas counties for the 1980 report.

The data collection effort for this publication is a coordinated effort between the office of Judicial Administrator, the Department of Social Rehabilitation Services and the Kansas Statistical Analysis Center. There is every indication this cooperative effort should continue well into the future yielding continued benefits for the entire juvenile justice system.

There are two important changes in this 1980 report. Heretofore, data has always been presented by county; however, as Kansas has supported a unified court system since 1977, the report has been changed to reflect the judicial district structure. While county data is still available, the primary method of presentation is by district.

Secondly, due to legislative and public concern over the issue of delinquent/miscreant offenders, an entire section has been created to examine these referrals. This replaces the status offender section in previous issues.

As in the past, the issue of "missing information" is of great concern. While the situation has improved considerably since in-house maintenance and processing of the database has taken place, holes still exist. A concentrated effort is made to complete all input documents received by Kansas Statistical Analysis Center. In many cases, the data is simply not available. In other instances procedural problems mitigate totally complete data.

Any questions, criticisms or other reactions are greatly appreciated concerning either form or content and will be received as constructive for future publications. Please address any comments to:

# SECTION I

Juvenile Court Activity in 1980

# SECTION I

#### JUVENILE COURT ACTIVITY IN 1980

# TRENDS IN JUVENILE COURT REFERRALS

Statistical information was received on 22,784 referrals processed through the juvenile divisions of the Unified Courts in Kansas for calendar 1980. Chart 2 illustrates the trend in juvenile referrals for the twenty year period from 1960 through 1980. The chart shows a steady increase in juvenile referrals

TOTAL JUVENILE REFERRALS, 1960 - 1980

from 1960 reaching a peak in 1975. The 1980 referral total of 22,784 represents a 1.2% increase from the 1979 total of 22,509, but an 8.0% decrease from the peak of 24,777 referrals in 1975.

The average number of referrals per court has increased slightly from 214 in 1979 to 217 in 1980. This year's tabulation includes data from all 29 judicial districts representing all 105 Kansas counties.

Table 1 exhibits the total number of referrals over a three year time period (1978-80) for the four largest judicial districts (District 3-Shawnee Co., District 10-Johnson Co., District 18-Sedgwick Co., District 29-Wyandotte Co.) and a combined total for the other 26 judicial districts. District 3 shows a 15.4% increase in the total number of referrals between 1978 and 1980, while District 18 shows a 5.1% increase. The table indicates a decline in total referrals for Districts 10 and 29 and for the balance of the state, (All Others) from 1978 to 1980. Chart 3 graphically depicts the increases and decreases in total number of referrals experienced by the judicial districts.

<sup>\*</sup> All percentages rounded

Examination of the 1980 data shows District 10 had a 6.5% increase in total referrals from 1979, while District 18's referral increase was 3.7%.

CHART 3

TOTAL REFERRALS

THREE YEAR TREND, 1978 - 1980

# REASON FOR REFERRAL

Referrals in 1980 were made for the offenses listed in Table

2. The offenses reflect standardized offense descriptions and,

in some respects, are not reflective of Kansas statutes. This table is divided into six sections, based on broad general categories. The first section constitutes the delinquent/miscreant offenses committed by the juvenile offender; these offenses are equivalent to the adult classification of felony and misdemeanor. Of this category, "Larceny-Other" was the most frequent juvenile offense reported (1,894) followed by "Larceny-Shoplifting" (1,601). The second section includes the so-called status offenses. Status offenses are those acts that pertain only to juveniles (e.g. Running Away, Truancy) and for which adults are not arrested. Running Away (2,224) continues to be the most common type of referral in this category. Traffic offenses comprise the third section of referrals. The fourth section contains those referrals designated as Deprived. This category includes offenses committed against a juvenile (e.g. dependency, neglect, abuse, etc.). Special Proceedings, the fifth section, includes petitions to marry, adoption proceedings, custody proceedings, requests to enlist, and requests for emancipation. Referrals for which an offense was unassignable or unavailable are assigned to the "Missing Information" section. Throughout this publication any referral lacking the data element under consideration will be assigned to the "Missing Information" classification for that element.

When comparing offense data for 1980 (Table 2) with similar data for 1979, District 10 exhibits an increase of 8.0% in delinquent/miscreant referrals. District 3 shows an increase of 21.7% in status offenses in 1980 from 1979 with the largest increase

occurring in the "Truancy" category (55.2%). District 29 shows a 25.9% increase in Abuse and All Other Neglect for 1980.

Legal categories of offenses are summarized in Table 3. Delinquent/miscreant acts accounted for slightly over one-half of the reported court activities in 1980, while status offenses accounted for less than one-quarter of the court's workload. Reported delinquent/miscreant referrals show a 6.2% decline in 1980 from 1979. Status offenses exhibit a slight increase of 2.7%. The contributing factor for the overall 1.2% increase in the 1980 referral rate from 1979 appears to be related to increased reporting in the deprived category. Deprived referrals show the largest increase in 1980 (18.2%).

In a cross-district comparison, considerable variation was found in the different categories. For status offenders District 10 shows the highest proportion of referrals (24.4%) while District 29 had the lowest proportion with 6.7%. District 29 also reported the largest proportion of Deprived referrals, 57.7%, an increase of 25.9% from 1979. References throughout this book will be relative to these broad, legal categories.

Table 4 demonstrates the percent change by legal categorization of the 1978-1980 period. Delinquent/miscreant referrals have increased by only 1.4% from 1978 to 1980 with yearly fluctuations exhibited. Status offenses continue to be about one-quarter of the court's workload, yet show an overall decline of 10.3% in the three year span. Traffic referrals show the largest decrease for this time frame with 56.9%. Deprived referrals manifested the largest increase of 39.6%. This is a steady increase in Deprived referrals over the period. Chart 4 illustrates the yearly fluctuations for the reader.

CHART 4 LEGAL CATEGORY OF OFFENSE THREE YEAR TREND, 1978 - 1980

Offenses listed in the Kansas Criminal Code (K.S.A. 21-101 et. seq.) are classified into topical categories (i.e., Crimes Against Persons, Crimes Against Property, etc.). Table 5 provides the distribution of referral offenses into these larger topical categories. Non-criminal type of referrals (status, traffic, deprived, special) comprised the largest proportion of

THREE YEAR TREND
1978 - 1980

the total number of referrals (49.3%). Shoplifting and burglary are the primary Crimes Against Property (45.7%). Nearly 62.0% of Crimes Against Persons referrals are for simple assault. Examination of the data for Uniform Controlled Sub-

stances referrals shows that non-narcotic drug offenses comprised 77.2% of the total for that category. Chart 5 provides the reader a visual interpretation of offenses by category for a three-year trend study.

#### MANNER OF HANDLING

Of primary importance in the handling of a juvenile is the decision whether or not to file a formal petition. When a petition is filed, the youth is formally placed into the juvenile justice system and will become part of the court's activity. Table 6 indicates that 48.7% of the 1980 referrals were handled with a formal petition.

With one exception, the data suggests a preference for informal handling of juvenile referrals in the large districts. District 29 exhibits a marked tendency (68.9%) to handle juvenile referrals informally. Figures indicate, however, a tendency toward formal handling by the balance of the state, as 68% of all referrals were handled with petition.

TABLE 6
MANNER OF HANDLING
1980

| MANNER OF HANDLING  | TOTAL  | DISTRICT<br>3 | DISTRICT<br>10 | DISTRICT<br>18 | DISTRICT<br>29 | ALL OTHER<br>DISTRICTS |

| Missing Information | 13     | 0             | 2              | 1              | 2              | 8                      |
| TOTAL               | 22,784 | 2,693         | 3,911          | 3,041          | 4,702          | 8,437                  |

Chart 6 gives the reader a pictorial view of Manner of Handling for a three-year period (1978-80). The graph indicates only a slight variation in the number of referrals handled with or without petition across the state.

#### SEASONALITY OF REFERRALS

Table 7 provides a monthly breakdown of referrals for 1980. The 1980 data fails to demonstrate any clear peak in referrals. Chart 7 shows that March and October were peak periods in 1978 and 1979, but 1980 data does not necessarily indicate a continuation of this trend. However, December continues to be the lowest month for juvenile activity.

# DEMOGRAPHIC CHARACTERISTICS OF REFERRALS

The three primary demographic variables in the current data base are age, sex, and race. From a program planning perspective, knowledge of demographic variables should allow for crime effective allocation of limited resources across the state. Table 8 shows the distribution of referrals based on age. The data shows the average age of youths referred in 1980 to be 15.2 years old. The data indicates that youths from 15 to 17 years old comprise the largest group referred to the courts (57.9%). Also indicated is an increase in the number of 17 year old's referred to the court in 1980 (2.5%) from 1979.

Table 9 presents the distribution of juvenile referrals by sex. Male offenders continue to constitute the greatest number of youths referred to the court (67.5%). There were 15,597 males referred to the court in 1980 and 15,579 in 1979; this is a .1% increase in 1980 from 1979.

While in contrast, there were 7,161 females referred to the court in 1980 and 6,867 referred in 1979. This figure represents a 4.1% increase in 1980 from 1979. This percentage distribution for total number of referrals was approximated across all localities.

The distribution of referrals by race is presented in Table 10. The figures indicate that 76.3% of all referrals in 1980 were white. The large percentage of "Missing" entries (6.3%) suggests that reporting of race may be problematic for some agencies.

# SOURCE OF REFERRAL

Analysis of the data supplied on source of referral shows that law enforcement agencies were responsibile for 68.2% of the total number to the court in 1980 (Table 11). Referrals from a law enforcement agency varied across localities, from 90.4% of referrals in District 10 to 40.9% of the total referrals in Dis-

<sup>\*\*</sup> Reader advised to use caution in interpreting percent totals due to large amount of missing information from District 18.

trict 29. Referrals by social agencies in 1980 show a steady increase from 1979 (30.6%). District 29 showed the highest referral rate from a social agency (49.3%) compared to the referral rate from District 18 of .9%. As the state total for social agency referrals is 15.1%, the data indicates there is a broad division in the number of referrals provided by local social agencies.

#### CARE PENDING DISPOSITION

Table 12 shows out of home care provided juveniles prior to case disposition. For 1980 only 18% of the total number of juveniles referred were provided some form of temporary out of home care. This distribution was approximated across all localities, but ranged from 8.6% for District 10 to 22.9% of referrals in the balance of state portion of the data.

<sup>\*</sup> All percentages rounded

#### CASE DISPOSITION

The manner in which a referral is resolved by the court is presented in Table 13. Of the 22,784 referrals in 1980, 138 juveniles were waived to adult court (.6%); District 18 accounted for 28.4% (21) of these waivers. Cases that were not substantiated or dismissed and warned comprised 39.2% (8,928) of the court's work load. Considerable variation was found in the percentages of cases dismissed across the reporting localities. Data submitted from District 10 indicated that 65.9% of all referrals were dismissed. Probation was the disposition in 17.9% of the total number of cases, and this figure appears to be approximated across all localities.

"Referred Elsewhere" and "Diversion" accounts for disposition of over one-fourth of the court's workload. Data indicates that District 29 disposed of 51.9% of its referrals in this manner. Of the total number of youths referred in 1980, 7.7% were confined to some type of institutional care.

### TIME FROM REFERRAL TO DISPOSITION

The length of time between the date of referral and final disposition of the referral is computed from two data elements, the date of referral and the date of disposition.

Examination of the data shows that 40.1% (9,128) were disposed of in ten days or less. This percentage rate is approximate for all localities across the state with the exception of District 29, which has a disposal rate of 65.7% within ten days or less.

# SUMMARY

The purpose of this section has been to present each variable from the current input document of the Kansas Juvenile Justice Information System (KJJIS) and to provide some narrative and pictorial interpretation of the data submitted for 1980. While problems do exist in the current data collection system, and caution is advised in drawing conclusions from the data in these areas, this data base does represent the best source of social-demographic information concerning activity through the juvenile justice systems in Kansas.

SECTION II

Comparative Analysis of Selected Variables

#### SECTION II

#### COMPARATIVE ANALYSIS OF SELECTED VARIABLES

The purpose of this section is to examine the interrelationship of selected variables from the 1980 data on Kansas juvenile referrals. The emphasis is on comparisons generally requested or that indicate some noteworthy occurrence.

Table 15 presents Race by Sex for 1980 referrals. The data indicate that white males account for 55.3% of the total number of juveniles referred to the court. Black males accounted for 10.3% of the total, and Indian males represented .5% of the total figure. In addition, white females constituted 26.1% of all referrals; black females represented 5.2%; and Indian females accounted for .4% of the total number of referrals. The percentage rate of 26.1% for white female referrals is an increase of 4.3% in 1980 from 1979.

Careful consideration should be given to the amount of "Missing Information" (6.4%) before any conclusions are drawn or interpretations of these two variables are made. In addition, a more precise breakdown of the category "Other" needs to be made (Oriental, Mexican American, etc.) to produce a more useful breakdown of referrals.

\*All Percentages Rounded

Table 17, Referrals by Race, Three-Year Trend, depicts total number of referrals of juveniles referred in this category. The study shows a slight (.7%) increase in white referrals in 1980 from 1979 and a decrease of 6.2% for the trend period. However, the study shows an overall increase in black youth referrals (21.5%) in 1980 from 1978, and a 49.8% increase in Indian youths referred to the court in 1980 from 1978. Again, we ask the reader to use caution in interpreting this variable due to the "Missing Information" factor.

<sup>\*</sup> All Percentages Rounded

The relationship of Category of Offense to Sex is presented in Table 18. Of the male referrals, 60.2% were for delinquent/miscreant offenses, which is a decrease of 7.1% in 1980 from 1979. Males referred for status offenses in 1980 constitute 18.9% of the total number males referred, which is an increase of 5.2% in 1980 from 1979. The most significant change occurs in the deprived category where 2,266 males were referred in 1980, which represents an increase of 19.2% from 1979's referral total of 1,831.

By contrast, analysis of female referrals showed that 28.3% of total referrals were for delinquent/miscreant offenses, and 37.0% were for status offenses. Again, a significant difference is noted in female youths referred as deprived in 1980 (2,292) from 1979 (1,880). This is an increase of 17.9% in 1980 from 1979.

<sup>\*\*</sup> Reader advised to use caution in interpreting percent totals due to large amount of missing information in race categories.

Missing Information - 68

Table 19 provides data showing Category of Offense by Race. For white referrals, 47.6% were made for delinquent/miscreant offenses, 28.3% were for status offenses, and 18.2% for deprived. Similarly, 48.9% of black referrals were for delinquent/miscreant acts and only 14.1% were referred for status offenses. A higher percentage of black youths are referred in the deprived category (34.7%) than are white youths. Data for Indian referrals show that delinquent/miscreant offenses accounted for 30.0% of the total, status offenses constitute 18.4%, and deprived cases account for the highest incidence of referrals (50.2%). It should again be noted that due to a sizable number of "Missing" cases, caution should be exercised in drawing conclusions based solely on this data.

Missing Information - 1,479

The manner in which a referral is handled in relationship to the category of offense is shown in Table 20. Examination indicates that 58.0% of the delinquent/miscreant referrals are dealt with by formal petition, while in contrast, 66.4% of youths referred for status offenses were handled without petition. Data also indicate a preference by the court to handle deprived referrals in an informal manner (60.0%).

Missing Information - 56

Data reported for Manner of Handling by Sex (Table 21) shows 52.6% of male referrals are handled with formal petition; while 40.2% of the female referrals are handled formally. Further examination shows that of the total referrals handled with formal petition, 74.0% were male.

Missing Information - 39

Table 22 provides figures on the interrelationships of Manner of Handling and Race. Examination of this data shows there is no significant difference in manner of handling by racial groups. On the average, 54.5% of the total number of referrals are handled with a formal petition. However, the reader is cautioned to observe the high number of missing cases (6.4%) and interpret the table accordingly.

TABLE 22

Table 23 outlines Disposition by Category of Offense. In the delinquent/miscreant offense category 44.5% (5,077) of the 11,409 juveniles referred were dismissed with a warning or as unproved. Probation was given in 25.8% of the cases. 12.6% were referred elsewhere or diverted into another program, and 8.9% were placed in a custody type situation. Fifty-two and one half percent of all status offenses were dismissed as unproved or warned by the court; 13.5% were placed on probation; 15.1% were referred elsewhere or placed in diversion programs, and 7.2% of the total number of status offenders were confined in some way. About one-third (31.3%) of the traffic offenses referred to the court were dismissed in 1980 and 34% were placed on

probation. Of the deprived cases referred to the court in 1980, only 11.7% were dismissed as unproved or warned, 76.7% of these cases were referred elsewhere for aid or consultation, and in only 6.5% of these cases did the court find it necessary to award custody to a public agency (generally SRS).

Missing Information - 44

An indication of possible inaccuracy in the data is found in Table 24, Disposition by Manner of Handling. Of the 136 cases listed as being waived to criminal court, 20 were reported as being handled without petition. It is doubtful such was the case. Similarly, 13 of the entries pertaining to the transfer of legal custody were reported to have been handled without petition, which is also questionable. As is evident from the cited examples, care should be taken in the interpretation of the data in this table.

Table 25 presents data for Disposition by Sex. Examination of data shows that 39.0% of both sexes referred to the courts were dismissed as unproved or warned. Of the total number of referrals for males, 21.6% were placed on probation. This percentage rate was not true for females, as only 9.8% of referred females were placed on probation. More females (27.1%) were referred to other agencies or placed in diversion than males (17.3%) and more females were remanded to the custody of an institution (15.8%) than were males (12.2%).

Disposition by Race is presented in Table 26. Data indicate about thirty five and one-half percent of the black and white referrals made to the court were dismissed as unproved or warned, while twenty nine and one half percent of Indian and "Other" referrals were dismissed. Further probation was granted to 18.4% of white referrals, 9.5% of blacks, 8.8% of Indian, and 14.2% of "Other". Differences are also noted in the use of diversion or referrals to other agencies as 22.7% of the white referrals, 37.2% of the black referrals, 46.5% of the Indian referrals, and 34.0% of the "Other" referrals were recorded in these two categories. There appears to be no significant difference in the use of custody placements for 1980.

Table 27 presents the data for Time Elapsed Between Referral and Disposition by Category of Offense. Examination of this table shows that overall 40.6% of the total referrals are disposed of in ten days or less. In looking at the individual categories, 28.0% of the delinquent/miscreant offenses, 48% of all status offenses, and 66.4% of all deprived cases were disposed of by the court in ten days or less. The court further disbursed 65.3% of all referrals within thirty days.

#### SUMMARY

Included in this section have been selected tables representing either notable comparisons from the juvenile information system, or to highlight known areas of concern when attempting to evaluate the reported data. While numerous cautions have been cited in relationship to the "Missing" category, the reader is advised that the quality of the data received and the manner in which it is processed has improved considerably over the past few years. Although heeding the cautions is wise, the reader should be advised this data is currently the best available socio-demographic information concerning juvenile court activity in the state.

While numerous other comparisons may have been offered, the decision was made to limit the number to those presented. Additional information for any specific locality or category may be received by contacting the Kansas Statistical Analysis Center in Topeka, Kansas.

SECTION III

Delinquent/Miscreant Referrals

# SECTION III

# DELINQUENT/MISCREANT REFERRALS

Currently, decision makers and legislators are focusing their attention on juveniles referred for delinquent/miscreant offenses. The purpose of this section is to examine those referrals classified as Delinquent/Miscreant and, hopefully, supply pertinent information or some of the more frequently asked questions.

Table 28 presents Delinquent/Miscreant referrals for a three year time frame for the four most populous districts and a combined total for all other districts. The table indicates that District 10 was the only district to experience an increase in delinquent/miscreant referrals in 1980 from 1979 (8.4%). District 3 shows the greatest percentage of decrease for total referrals in 1980 (-32.1%) from 1979. In looking at the three year trend between 1978 and 1980 three of the major districts (3-10-18) show a steady percentage increase while District 29 exhibits a decrease of 21.8%.

Preceding page blank

Table 29 gives the reader Reason Referred by Sex and Race. The table shows that of the total number of referrals 82.3% were male. The table further shows males are referred for 94.6% of the "Breaking and Entering" offenses, 88.4% of the "Larceny-Other" category and 87.4% of the total number of "Vandalism" referrals. In contrast, females account for only 17.7% of the total number of referrals. They are referred for 40% of the total number of "Shoplifting" offenses, 21.4% of the total referrals for drug usage, and 21.4% of "Non - Aggravated Assault" referrals.

The table also shows that white referrals account for 81.6% of the total number of juveniles referred for delinquent/
miscreant offenses. White youths are most frequently referred for "Larceny-Other" (17.1%) and account for 84.4% of the youths referred in this category. White youths also account for 90% of the total number referred for "Vandalism".

Black youths account for 16.0% of the total number of juveniles referred. They are most frequently referred for the offense of "Shoplifting" (24.4%) and account for 28.2% of the total number of youths referred for this category.

As has been noted elsewhere, all data pertaining to race must be examined cautiously due to the level of "Missing Information" of 11.4% for Delinquent/Miscreant referrals.

\*Discrepancies will occur due to cross-tabulations and "Missing Information".

Reason Referred by Age is presented in Table 30. This table shows that youths 17 years of age account for 28.6% of the court's workload in delinquent/miscreant offenses. The table also shows 17 year olds account for 31.5% of offenses committed against persons, 28.6% of juveniles referred for "Burglary," 30.3% of the total number of youths referred for "Larceny-Other," and 36.2% of all youths referred for drug related offenses.

The table also reveals that youths 16 years of age account for one-fourth of the total number referred to the court for delinquent/miscreant offenses. Sixteen year old youths account

for 25% of offenses committed against persons, 24.8% of "Burglary" offenses, 25.5% of the "Larceny-Other" category referrals, and 31.1% of the total number of juveniles referred for drug offenses. Fifteen year old youths account for 17% of the total number of youths referred in 1980. This age also accounts for almost 17% of the above mentioned offenses.

Missing Information 101

specific month as a peak month when most delinquent/miscreant offenses occur. By contrast, the table does show that by individual offense, August had more robberies and burglaries, July had the largest number of referrals for "Larceny-Other," and March had the largest number of "Shoplifting" offenses.

Table 32 provides the reader with Reason Referred by Time Elapsed Between Referral and Disposition. The table shows the court disposes of 48.8% of all crimes against persons within thirty days and disposes of 20.8% of this number in ten days or less. The table further shows the disposition rate for crimes against property to be 56.2% within thirty days. Overall, the 11,308 referrals made to the court in 1980 for delinquent/miscreant offenses, 6,508 (57.6%) were disposed of within 30 days.

Reason Referred by Manner of Handling is given in Table 33. This table indicates that 58.0% of all referrals made to the court for delinquent/miscreant offenses in 1980 were handled with a formal petition.

Missing Information 8

Manner of Handling by Sex and Race is presented in Table 34. Examination of data by sex reveals that of the total number of juveniles handled with formal petition 85.6% are male, and only 14.4% are female. There were 9,369 males referred to the court for delinquent/miscreant offenses in 1980, 60.4% of which were handled with formal petition. In contrast, only 47.0% of the 2,020 female referrals were handled with formal petition.

When considering the race of offenders, white referrals constitute 81.6% of the total number of referrals in this category, of which 52.2% were handled by formal petition. Black referrals make up 16.0% of the total number of referrals for delinquent/ miscreant offenses in 1980 of which 56.6% were handled by formal petition. A notable aspect of this comparison is found in the

Indian referrals. While Indian referrals constitute .6% of the total number of youths referred for delinquent/miscreant offenses, 66.1% are handled by formal petition.

Manner of Handling by Age is presented in Table 35. This table indicates that youths 15 through 17 constitute 70.2% of the total number of referrals made for delinquent/miscreant offenses. The table also shows that in each of these age groups slightly over 60% of the referrals made were handled with petition.

Care Pending Disposition by Race and Sex is shown in Table 36. This table indicates that 86.3% of all youths referred for delinquent/miscreant offenses are not detained in any manner prior to disposition of their case. The table also shows that of the males referred to the court for delinquent/miscreant offenses in 1980, 14.1% were detained in some manner until disposition of their case; in contrast only 11.5% of the 2,016 females referred were detained.

White referrals were detained until disposition in 12.6% of the cases; black referrals were detained in 17.7% of the cases, and Indian youths, which account for .6% of the total number of referrals, were detained until disposition in 31.7% of these cases.

Reason Referred by Disposition is reported in Table 38. The table shows that of the 11,409 referrals made to the court for delinquent/miscreant offenses, 5,077 (44.5%) were dismissed as not proved or warned; 25.8% were placed on probation; 7.2% were placed in a diversion program, 8.9% were placed in a juvenile facility, and .9% made restitution.

An analysis of individual offenses shows wide differences from the overall disposition alternatives for all referrals. The data show that 25.8% of "Burglary" cases, 49.8% of "Shoplifting," 53.7% of all drug referrals, and 70% of "Disorderly Conduct" referrals are dismissed not proved or dismissed warned. The data also indicate that probation is granted in 35% of "Aggravated Assault" referrals, 38% of "Burglary" referrals, and in 34% of "Larceny-Other" referrals. In the category of "Restitution," payment was ordered by the court in .6% of all "Burglary" referrals, .1% of "Shoplifting" referrals, 1% of "Larceny-Other" referrals, and in 2.9% of "Vandalism" referrals. Incarceration was ordered for 15.8% of juveniles referred for "Burglary" .3%

of juveniles referred for "Shoplifting," and 11.4% referred for "Larceny-Other."

Table 39 presents Disposition by Sex and Race. The table shows that of the 126 youths waived to criminal court, 94.4% (119) were males. Of the 5,073 referrals that were dismissed by the court as unproved or warned in 1980, 79.5% (4,034) were males and 20.5% (1,039) were females. Data indicate that probation was granted to 27.8% of the total number of male referrals and to 16.9% of the total number of females referred. The table shows that 6.5% of the total number of males referred were placed in a "Diversion" program while 10.4% of the total number of females were handled in a like manner.

of the 108 youths "Waived to Criminal Court," 75.9% (82) were white, 18.5% (20) were black, and 3.7% (4) were Indian. An analysis of white referrals shows that 47% of the total number referred were dismissed as unproved or warned, probation was grapted in 26.4% of all white referrals, 3.6% of white referrals were placed in "Diversion" programs and 7.9% were incarcerated in an institutional setting. Of the black referrals 56.9% were dismissed by the court as unproved or warned, 16.8% of all black referrals were placed on probation, and 9.7% of these referrals were placed in the custody of an institution. Analysis of data available for Indian referrals shows 40% of the total number of Indian youths referred were dismissed as unproved or warned, probation was granted to 23%, 9.2% were incarcerated in an institution.

Missing Information 52

Table 40, Disposition by Age, shows that 40.3% of all fifteen year old referrals, 42.1% of all sixteen year old referrals, and 44.4% of all seventeen year old referrals are dismissed by the court as unproved or warned. The table further indicates that in the fifteen year old age group, 26.3% receive probation, 15.4% were ordered to pay restitution, 16.7% were placed in a diversion program, and 12.7% were placed in the custody of an institution. For sixteen year olds 28.7% were placed on probation, 21.1% were ordered to make restitution, 24.7% were placed in a diversion program, and 10% were remanded to the custody of an institution. Of the 17 year olds, 29.7% were given probation; 28.8% were ordered by the court to pay restitution; slightly under 21% were placed in a diversion program, and 20.4% were placed in an institutional setting.

## SUMMARY

Ü

The purpose of this section has been to present delinquent/
miscreant offenses and to provide some descriptive highlights
and pertinent information of these offenses. It is hoped that
this information will aid those persons responsible for program
planning in the juvenile justice area to make better use of
limited funding or in revision of the current juvenile laws.

Further data analysis is available by contacting the Kansas Statistical Analysis Center in Topeka.

APPENDIX C Glossary of Terms 1980 Preceding page blank

# GLOSSARY

Adjudication

- the process of deciding whether or not a youth fits into one of the categories of delinquent, miscreant, deprived, wayward or truant.

Criminal-type offender

to a child who has been charged with, or adjudicated as, being a delinquent or miscreant child.

Delinquent child

- a child less than 18 years of age who does an act which, if done by a person 18 years of age or over, would make such a person liable to be arrested and prosecuted for the commission of a felony.

Deprived

- a child less than 18 years of age: (1) who is without proper parental care or control,
- subsistence, education... or control necessary for such child's physical, mental or emotional health, and the deprivation is not due solely to the lack of financial means of such child's parents, guardian or other custodian;
- (2) who has been placed for care or adoption in violation of law;
- (3) who has been abandoned or physically, mentally, emotionally abused or neglected or sexually abused by his or her parent, guardian or other custodian;
- (4) who is without a parent, guardian or legal custodian;

Juvenile offender

- a child, subject to the jurisdiction of the Kansas juvenile code, that is an accused or adjudicated delinquent, miscreant, wayward or deprived child or a traffic offender or truant.

Miscreant child

- a child less than 18 years of age who does an act which, if done by a person 18 years of age or over, would make such person liable to be arrested and prosecuted for the commission of a misdemeanor; or the violation of any city ordinance or county resolution; or who escapes from or runs away from any lawful court ordered placement.

Petition

- a formal statement of the allegation(s) alleging a child to be delinquent, miscreant, deprived, wayward or truant.

Status offender

- a child alleged or adjudicated to be a wayward or deprived child or a truant.

Preceding page blank

Traffic offender

- a child under 14 years of age who does an act which, if done by a person 14 years of age or over, would make such person liable to be arrested and prosecuted make such person liable to be arrested and prosecute for the violation of specific traffic offenses. Whenever a child of 14 years of age or older is charged with a traffic offense, the prosecution of such offense shall not be heard pursuant to the juvenile code but shall be commenced in a court of competent jurisdiction in the same manner as prosecutions involving adults. ecutions involving adults.

Truant

- a child who, being by law required to attend school, absents himself or herself therefrom to the extent of being a truant.

Wayward child

- a child less than 18 years of age:
  (1) whose behavior is injurious to his or her welfare;
  - (2) who deserted his or her home without good or sufficient cause;
- (3) who is habitually disobedient to the reasonable and lawful commands of his or her parent, guardian or other lawful custodian;
- (4) who does an act the commission of which by persons under the age of 18 years is specifically prohibited and made unlawful by state law, city ordinance or county resolution.
