**NORMAN A. CARON**  
Chief of Police

Commissioners:

I hereby respectfully submit the Annual Report for 1982.

The past year has been most encouraging in many respects. A significant decrease in crime was recorded in Kansas City in 1982. Total Part I crimes were reduced by 9.7%, with the greatest improvement evidenced in 19% fewer homicides, 16% fewer auto thefts, almost 15% fewer robberies, and 12% fewer rapes. The only Part I crime that showed an increase was non-aggravated assault, which rose 18.5%.

I am especially excited about the new vehicle refurbishing program under way at the Vehicle Maintenance Unit. Rather than purchase new patrol cars at about \$8,700 each, garage personnel are able to completely renew our present marked cars for an expected average of \$4,200 per car, resulting in a savings of about 52% on every vehicle.

A total of 87 fatality accidents involving 93 deaths were investigated in 1982. Unfortunately, this is 24 more lives lost than in 1981, an increase of 34%. This increase is deceptively high, due to the fact that 1981 accident deaths numbered substantially lower than any other year in recent department history. However, by comparing the 93 deaths in 1982 with the average of 92.2 traffic fatalities recorded over the past five years, there appears to be little real change.

It is difficult to attribute our successes in 1982 to any one factor. New patrol strategies making better use of available manpower and increased community involvement obviously had a direct impact on the crime picture.

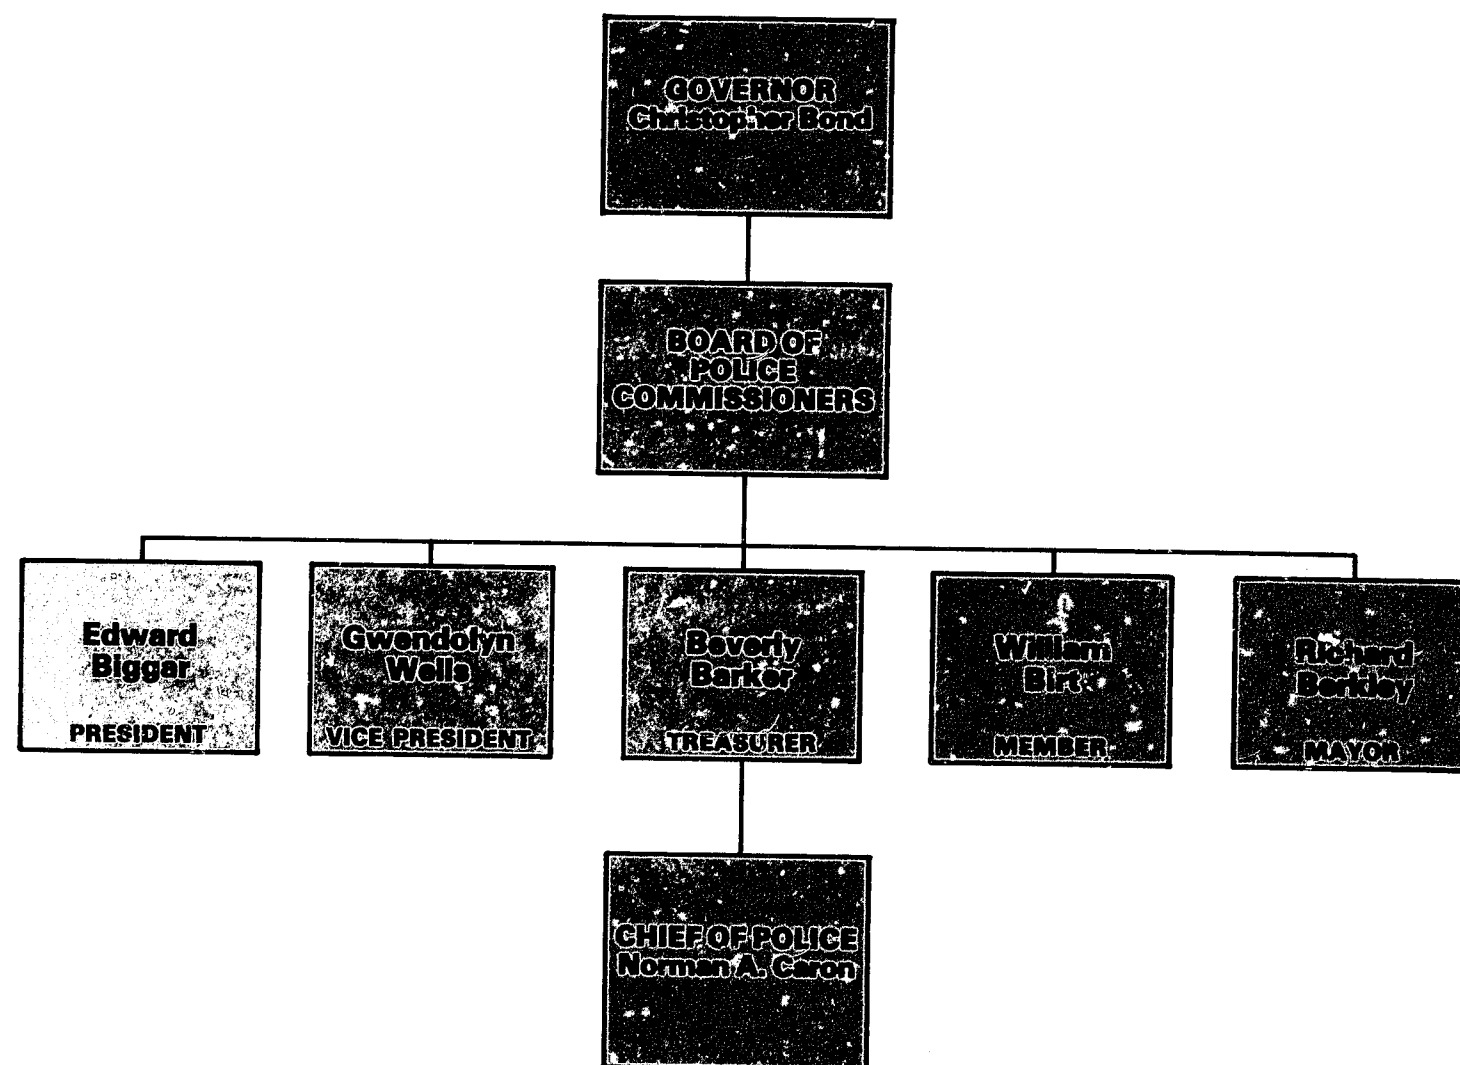

Ultimately, the basic strength of any police department cannot be counted in statistics, but must be measured by the caliber of its officers. Credit must be given not only to all of our dedicated officers and civilian employees, but also to the 181 reserve and auxiliary officers who devoted a portion of their lives to serving the citizens of Kansas City in 1982.

Sincerely,

*N. Caron*  
Norman A. Caron  
Chief of Police

**NORMAN A. CARON**  
**CHIEF OF POLICE**

## BOARD OF POLICE COMMISSIONERS

The Board of Police Commissioners is charged with the responsibility of providing police service to the residents of Kansas City, Missouri. As outlined in state statutes, the Governor of Missouri appoints four citizens to serve on the Board of Police Commissioners. Members serve four year terms, with one commissioner's term expiring each year. The Mayor of Kansas City, by virtue of his elected office, serves as the fifth member of the Board.

**EDWARD S. BIGGAR**  
President

With the exception of St. Louis, Missouri, the Kansas City, Missouri Police Department maintains the only state controlled police department in the United States. This structure has been in existence since the department's formation in 1874, with one brief seven year interruption by "home rule" in the 1930s. When municipal management proved ineffective, state control was re-instituted, removing the department from local political influence.

**GWENDOLYN M. WELLS**  
Vice President

**BEVERLY PARKS BARKER**  
Treasurer

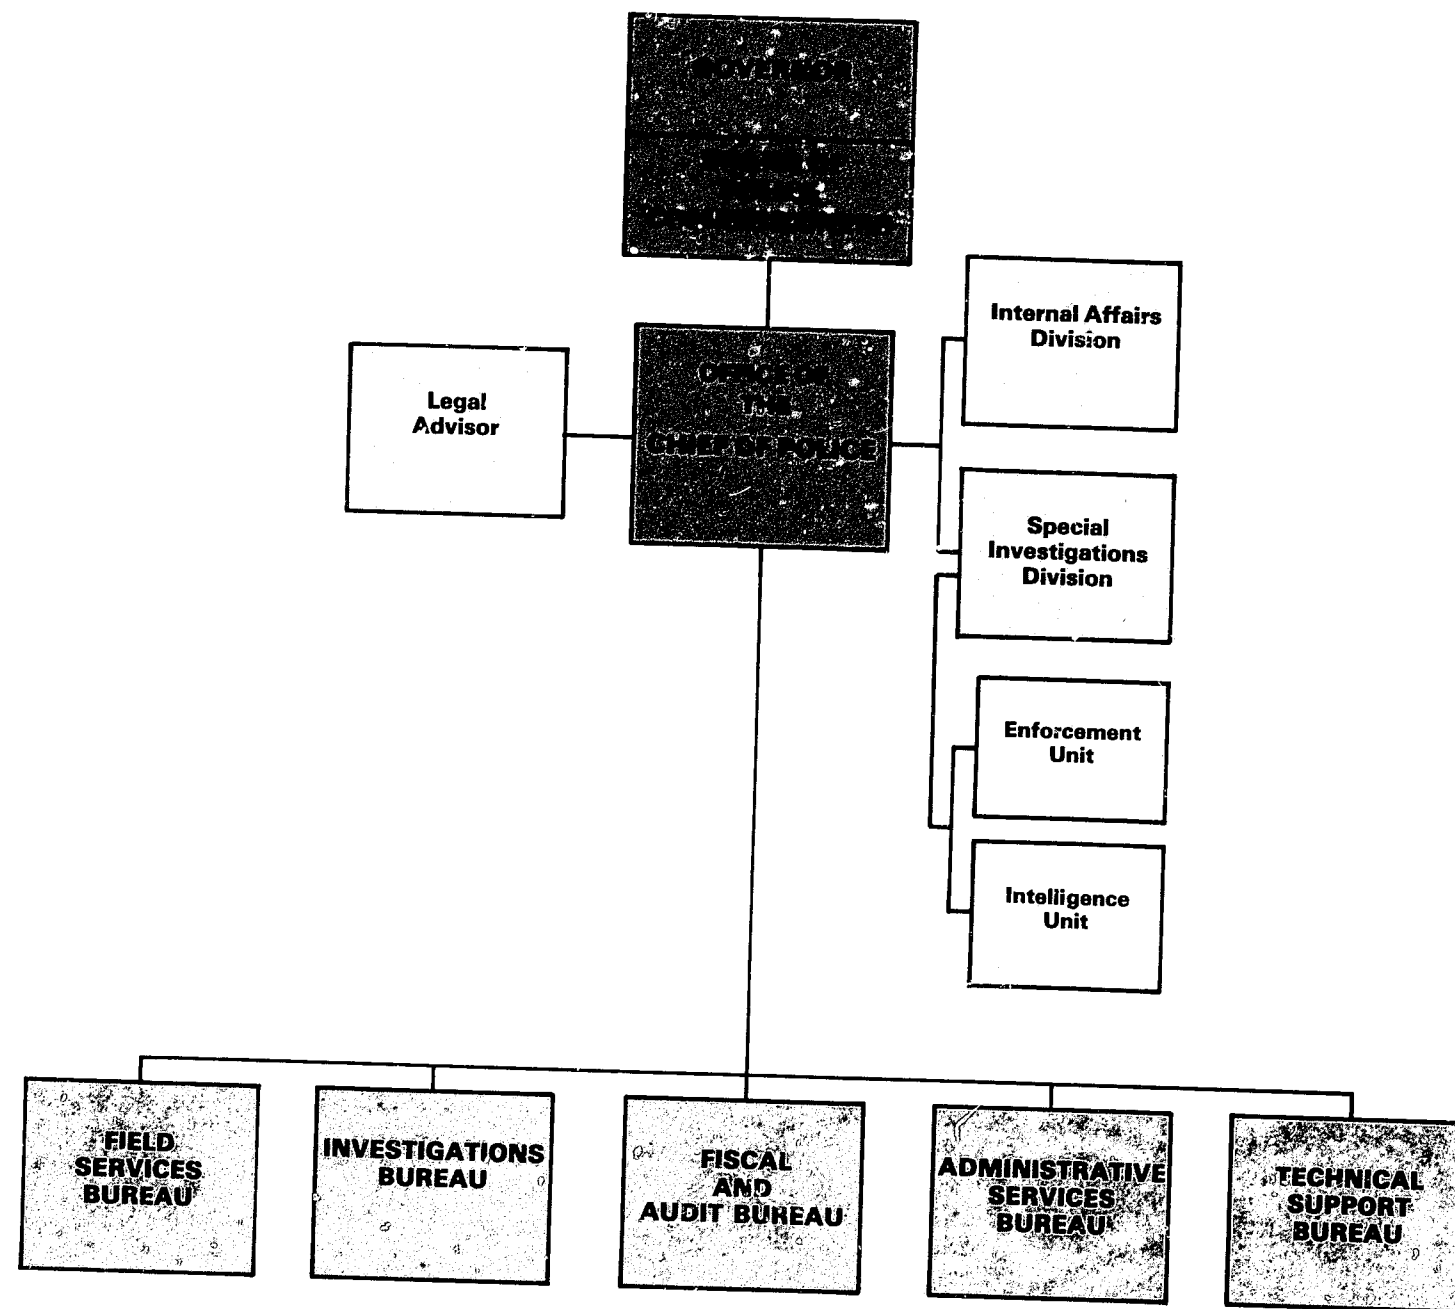

**WILLIAM M. BIRT**  
Member

The Board of Police Commissioners selects the Chief of Police, the city's highest administrative law enforcement officer, who serves at the pleasure of the Board. Under state law, the Board has the exclusive responsibility for management of the department, and has the power to organize a force of reserve officers, retain professional consultants, and review serious disciplinary actions. Public meetings of the Board are held monthly, where citizen and media comments are invited.

**MAYOR  
RICHARD L. BERKLEY**  
Ex-Officio Member

## THE EXECUTIVE COMMITTEE

Chief Norman Caron [center] conducts an executive session with [left to right] Lt. Col. Leroy Swift, Technical Support Bureau; Lt. Col. Larry Joiner, Fiscal and Audit Bureau; Lt. Col. Fred Guenther, Investigations Bureau; Lt. Col. Lester Harris, Executive Officer; Lt. Col. Joseph Smith, Field Services Bureau and Lt. Col. James Keiter, Administrative Services Bureau.

Norman A. Caron, a 24-year veteran of the Kansas City, Missouri Police Department, was appointed Chief of Police by the Board of Police Commissioners on February 7, 1978, and is the 36th man to serve in that capacity.

Assigned to the Office of the Chief of Police and assisting Chief Caron in his administrative duties is the Executive Officer, Lieutenant Colonel Lester N. Harris. Lt. Col. Harris oversees the Internal Affairs Division, whose primary responsibilities are conducting internal investigations and investigating complaints forwarded by the Office of Citizen Complaints.

Lt. Col. Harris also supervises the recently formed Special Investigations Division. Created from two already existing divisions, the Special Investigations Division consists of two units, the Intelligence Unit (formerly the Organized Crime Division) and the Enforcement Unit (previously the White Collar Crime Division). Due to the sensitive nature of their assigned tasks and the need for confidentiality,

both the Internal Affairs Division and the Special Investigations Division are organized under the Chief's Office.

The vast majority of department personnel are assigned to one of five bureaus, the Field Services Bureau, the Investigations Bureau, the Fiscal and Audit Bureau, the Administrative Services Bureau, and the Technical Support Bureau, each commanded by a lieutenant colonel. The bureaus are organized into divisions, which are further divided into units.

### The Executive Committee

Once each week, Chief Caron conducts a meeting of the Executive Committee, comprised of the five bureau commanders, the Executive Officer, the department legal advisor, and the commander of the Administrative Analysis Division. The purpose of the Executive Committee is to discuss, adopt, and amend departmental guidelines and procedures.

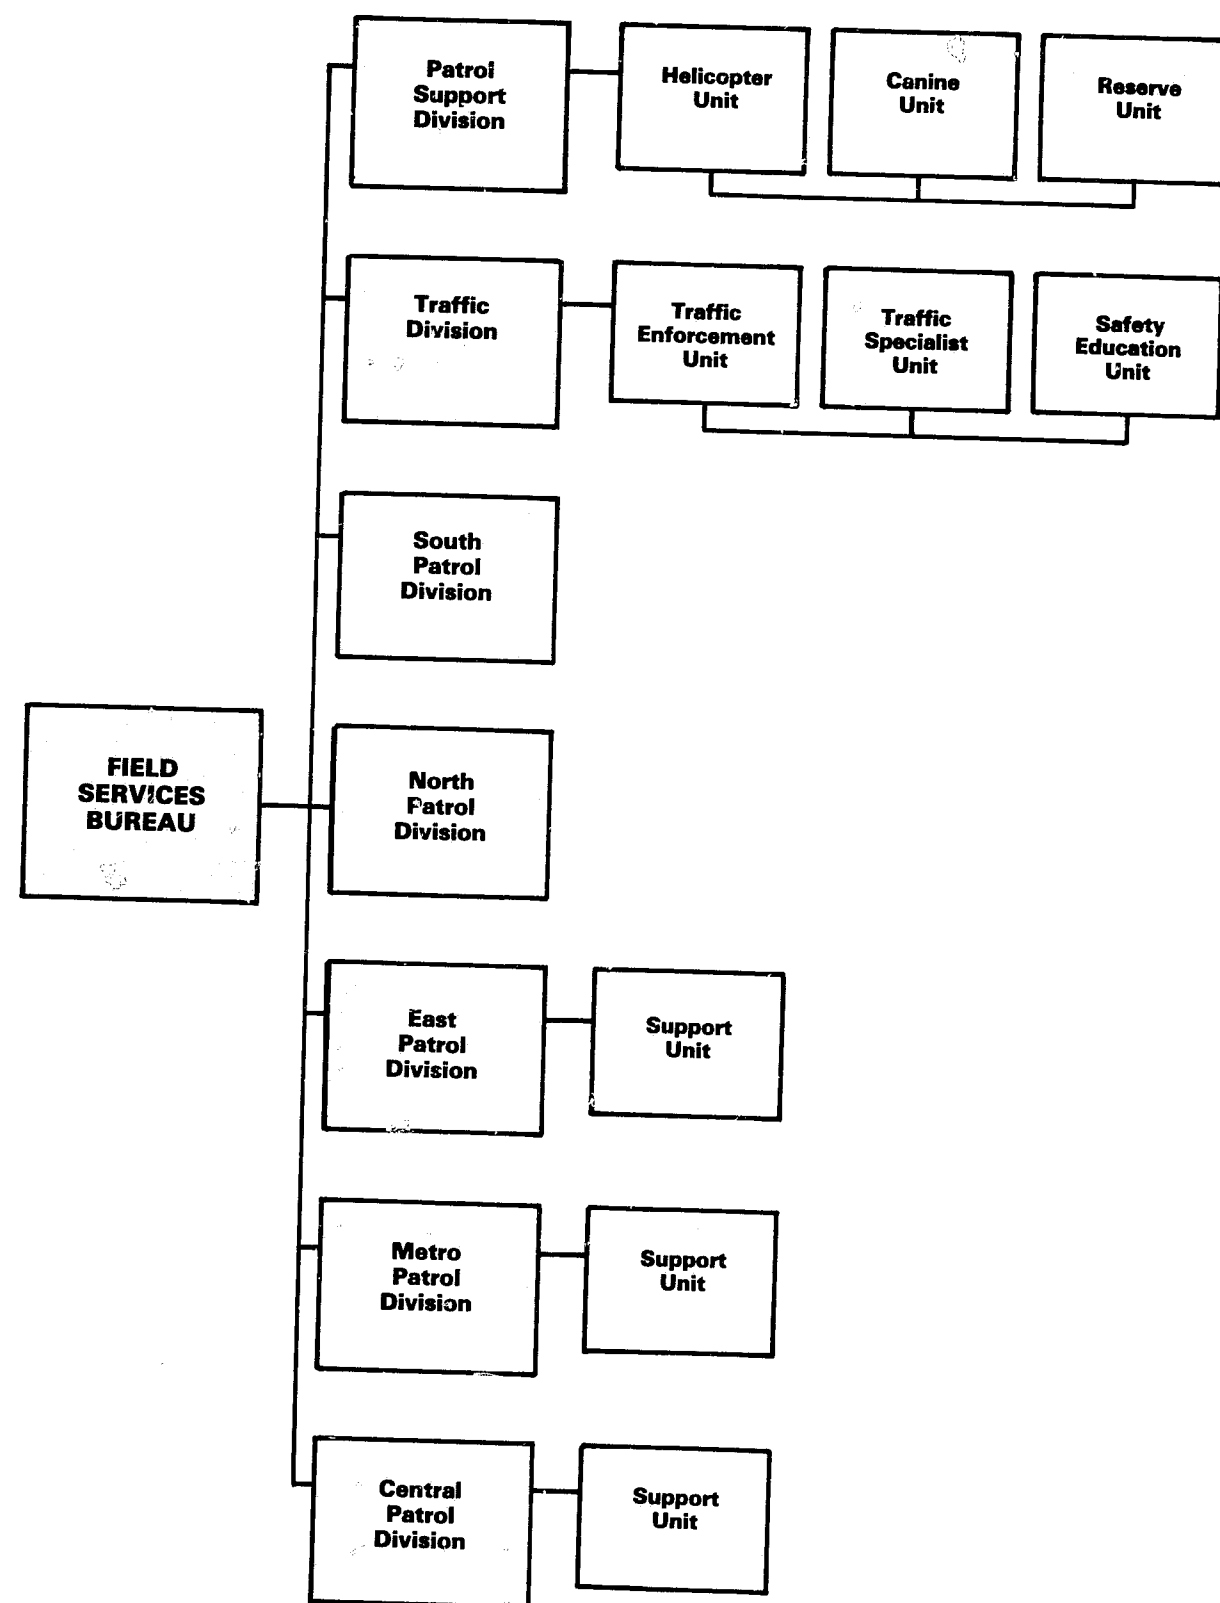

Whenever a change in guidelines or procedure affects more than one

bureau, the written proposal is forwarded through the initiator's chain of command to the Chief of Police. The proposal is then placed on the Executive Committee business agenda for consideration. Most staff work relative to changes is done by the Administrative Analysis Division, but any department element may initiate a proposal for review by the Committee.

Although a formal vote is not tallied, the Executive Committee members reach a general agreement and recommendation on each matter under consideration. The Chief of Police retains the authority to adopt, amend or veto any Committee recommendation.

The Executive Committee concept has proven to be an effective method for allowing each bureau commander to participate in department guideline and procedure decisions and is useful in determining, before implementation, how changes will affect each department element.

## FIELD SERVICES BUREAU

The Field Services Bureau, commanded by Lieutenant Colonel Joseph A. Smith, is the department's largest bureau, consisting of approximately 878 law enforcement and civilian members. The bureau includes five patrol division stations, the Traffic Division, and the Patrol Support Division, all of which perform line functions.

### New Patrol Strategies

Following a beat study in 1981, all patrol division stations returned to eight hour fixed shifts after a two year experiment with ten hour overlapping shifts. Careful evaluation of the ten

hour plan revealed that the number of beat cars was limited by the required high relief factor, limiting the full range of police service provided.

The foundation of the revised eight hour plan was an equalized work load for district officers. The number of beats, or reporting areas, was increased from 173 to 214 and the number of man hours available for any 24 hour period increased from 1,418 to 1,712 hours, with no increase in number of bureau personnel.

The equalized work load, the reduced relief factor, and the decrease in needed administrative time all allowed the assignment of "proactive" cars. Proactive cars, not routinely responsible for calls for service, were then assigned to concentrate patrol efforts on identified crime and traffic problem areas.

While utilizing the new Strategic and Target Oriented Patrol (S.T.O.P.) plan a 9.7% drop in total reported Part I crimes was experienced in 1982.

### Improved Crime Analysis

In order to provide more precise direction in problem areas where the proactive cars were utilized, a complex crime analysis system was implemented in 1982. The same crime analysis program was used at all five patrol divisions to provide program continuity as well as to include data on individuals who are involved in criminal activity in more than one division.

The new crime analysis plan was not merely a method of compiling historical crime data. It provided a detailed analysis which identified patterns and applied suspect information in order to utilize all available resources for a positive impact on crime reduction. Emphasis

was placed on using data from reported offenses so that crime analysts might project areas likely to be victimized.

With the aid of the computer system, information was compiled daily by division crime analysts. Officers assigned to proactive patrol beats on each shift were provided with very specific data on problem areas, enhancing suspect apprehension and crime suppression.

#### Increased Traffic Analysis

In 1982, traffic analysis was expanded from identification of high accident locations to the causes of traffic related problems.

The updated traffic analysis plan identified traffic signs, signals, and markers that were believed to have had some bearing on accident causes. The results of these studies were then

forwarded to city transportation authorities for further research so that corrective steps might be taken.

In 1982, the total number of reported accidents was reduced from 27,321 in 1981 to 25,977, a reduction of 1,344. Personal injuries in vehicular accidents were reduced by 1,377 from 8,260 in 1981 to 6,883 in 1982. Increased enforcement of traffic laws accounted for 7,689 more citations issued for moving violations than in 1981.

#### Safety Education Unit

Over the past two years, the Safety Education Unit has developed an extensive traffic safety program aimed at school age children. During 1982, through personal visits and video taped programs, 25,044 elementary students were exposed to the "Roads to Safety"

program. An additional 15,294 children participated in pedestrian and bicycle safety programs sponsored by the unit.

Over 3,720 adolescents and adults attended Safety Education Unit presentations addressing the dangers of alcohol abuse. The unit also conducted classes in pedestrian safety to 351 senior citizens. Nine different video programs produced by the Safety Education Unit were broadcast on local television stations 52 times throughout the year, with an estimated audience of 152,000 viewers.

#### Reserve Unit Recruitment

The Reserve Unit began a full scale recruitment campaign in January, 1982. Through extensive media coverage, 54 officers were added to the Reserve Unit roster, bringing total reserve strength to 146 officers by December. Reserve officers volunteered 56,059 hours of police

service throughout the year, with 55% of that time actually spent on patrol.

A total of 857 arrests for assorted state and city charges were logged by the Reserve Unit in 1982, as well as 1,274 traffic citations.

#### Auxiliary Services Officers

In October, 1981, the Auxiliary Service Officer program was implemented under the direction of the Reserve Unit commander. Its purpose is to supplement civilian personnel manpower, while increasing citizen involvement with the department on a voluntary basis.

Auxiliary Service Officers are required to donate one four hour shift per week and are provided with necessary uniforms and equipment. By the end of 1982, 35 auxiliary officers were actively participating in the program in various civilian positions.

#### Community Interaction

While all of these programs were designed to make the Field Services Bureau more efficient, the primary goal, to reduce crime, also required improved community-police relations. One

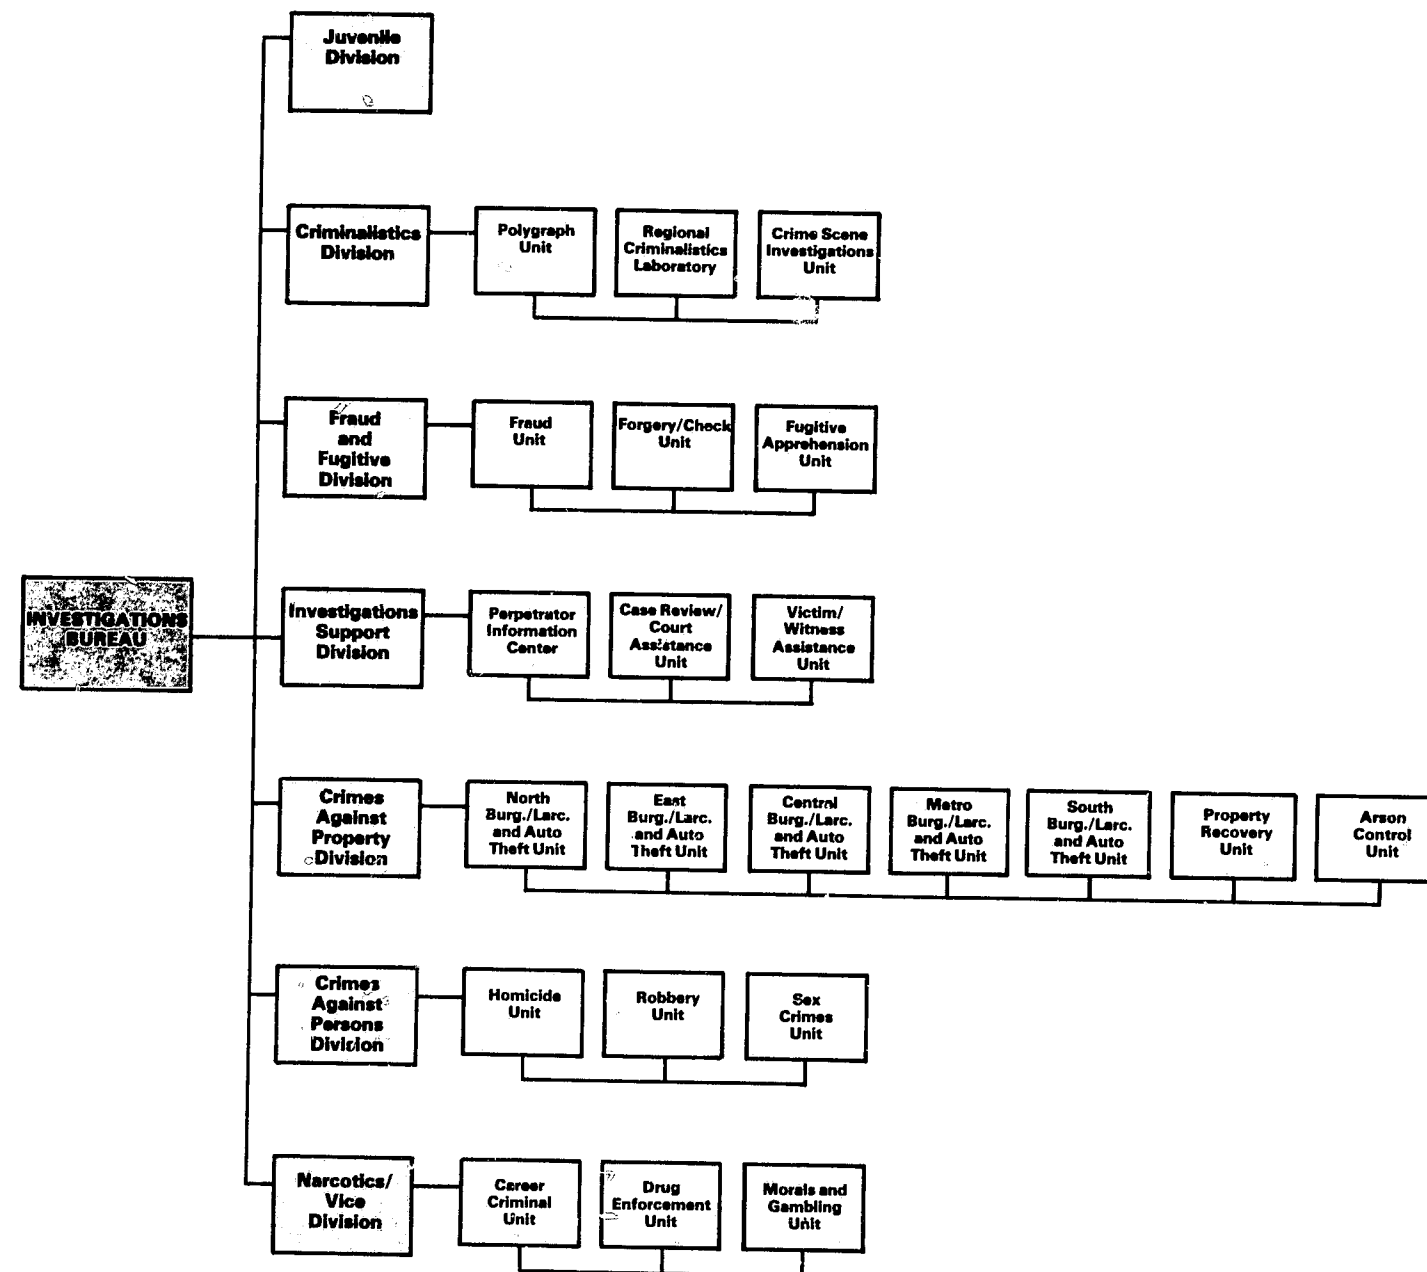

of the Field Services Bureau objectives for 1982 was to increase citizen involvement through the formation of a large number of block clubs.

One Community Interaction Officer was appointed in each patrol division to assist groups in organizing effective clubs and to promote communication between citizens and the department. At hundreds of neighborhood meetings, residents were asked to cooperate with police in reporting crime and suspicious activity.

By the end of 1982, over 2,100 neighborhood block clubs had been established in residential areas of Kansas City, Missouri. With the assistance of these concerned citizens and increased patrol efforts, burglaries were reduced by 13.3% compared to 1981.

## INVESTIGATION BUREAU

The Investigations Bureau, commanded by Lieutenant Colonel Fred W. Guenther, consists of approximately 246 sworn and civilian members. The bureau is charged with the responsibility of conducting investigations of crimes committed within the city limits of Kansas City, Missouri, in an effort to identify, apprehend, and prosecute persons responsible for their commission.

The Crimes Against Property Division is the only decentralized division within the Investigations Bureau. It includes five separate Burglary, Larceny, and Auto Theft Units, with one unit assigned to each of the existing patrol stations.

Each F.A.T. Unit is responsible for the investigation of both residence and non-residence burglaries, auto thefts, and larcenies from buildings and vehicles occurring within their respective geographic areas.

Each of the remaining divisions in the Investigations Bureau is responsible for investigating specific types of offenses that occur anywhere in the city, with the exception of the Investigations Support Division and the Criminalistics Division, which exist primarily to lend support to other investigative elements.

### Regional Crime Lab Moves

In the spring of 1982, the Regional Criminalistics Laboratory, the Crime Scene Investigations Unit, the Crimes Against Property Division office, the Arson Control Unit, and the Property Recovery Unit were relocated in a spacious, newly remodeled building at 1525 Holmes.

The Regional Criminalistics Lab is considered one of the finest forensic laboratories in the nation. In 1982, lab experts expended 20,337 hours performing 23,503 evidence examinations, including firearms and toolmark comparisons and

chemical analysis. Approximately 75% of the 6,044 cases submitted to the lab during the year pertained to criminal investigations and 25% were related to narcotics violations.

Statistics reflect a significant rise in the number of tests performed on each case submitted to the lab in 1982, indicating an increased level of expertise attained by examiners who were able to draw more conclusions on each case. Homicide evidence examinations increased by 38% and rape evidence exams rose by 55%.

The enlarged facilities also provided space for an expanded color photo processing lab. The black and white processing lab, which had been housed in Police Headquarters, was merged with the color lab, forming the Crime Lab's Photography Section. A total of 13,954 photo

cases were processed and printed by the Photo Section in 1982.

#### Arson Control Unit

The Arson Control Project, staffed by members of the Arson Control Unit, was funded by a federal grant in 1980 to combat the growing incidence of arson in Kansas City. The unit's specially trained detectives worked closely with crime lab personnel and with an assistant county prosecutor who was specifically assigned to the prosecution of arson related offenses.

The project's grant was depleted by late 1981. In January, 1982, an additional \$3,000 grant was awarded to the department by the Allstate Insurance Company, providing for the continuation of the project through 1982.

Four of the Arson Control Unit members have also received extensive training in explosive ordinance disposal at the Redstone Arsenal in Huntsville, Alabama.

Two E.O.D. technicians from the Arson Control Unit responded to Liberty, Missouri on February 2, 1982, to assist the Liberty Police Department in the safe handling of a sophisticated explosive device discovered in a residential area.

The detectives determined that one electrical connection in the blast circuit was only 1/100th of an inch from completion of the circuit. The device was fully activated for immediate detonation, preventing movement to a more secure location.

To prevent loss of life and massive property damage, the technicians entered the bomb by hand and successfully dismantled the largest such device ever handled by department technicians.

#### Property Recovery Unit Succeeds

Established in September, 1981, the Property Recovery Unit met with measurable success in its first year of operation by recovering over \$216,378 in stolen property.

Initially, the unit was organized to enforce a 1981 city ordinance regulating precious metal dealers. Under the new law, dealers were required to report each gem and precious metal purchase from an individual.

The new ordinance provided that every transaction be recorded on a specific form, including the seller's identification, photograph, and fingerprint. The ordinance required that the record be deposited at a police facility within 24 hours of the purchase and that items be held for ten days before resale.

Most neighboring cities quickly followed Kansas City's lead in enacting similar ordinances. After only one year of enforcement, the ready outlets for stolen jewelry and precious metals were largely eliminated. Other cities experienced similar success.

In addition to enforcement of the ordinance, the Property Recovery Unit regularly conducts pawn shop inspections. Before the unit's inception, pawn shops in Kansas City had not been uniformly regulated since 1975.

During 1982, Property Recovery Unit personnel also examined unclaimed vehicles in the police tow lot prior to public auction. By locating confidential identification numbers, eight stolen vehicles, valued at \$35,580, were recovered.

The Property Recovery Unit has established itself as a central repository of precious metal losses for the

entire metropolitan area and was instrumental throughout 1982 in assisting other law enforcement agencies in recovered property investigations.

#### "Reverse Sting" Operation

Conducted over a period of seven months, the department's biggest anti-fencing effort, dubbed the "Reverse Sting", concluded in June, 1982, with 41 grand jury indictments charging sixteen individuals with receiving stolen property.

Undercover officers posing as thieves dealt with merchandise that was either purchased by the department, donated by members of the business community, or left unclaimed and scheduled for destruction in the department's Property Room.

Although most of the merchandise consisted of jewelry and precious metals, some of the defendants requested specific merchandise from the officers, such as Polaroid film and appliances. In these instances, the items were secured and made available for purchase.

The items offered were clearly represented to purchasers as stolen. The undercover officers, equipped with listening devices, recorded multiple sales with each buyer.

Originally initiated by the Property Recovery Unit, the object of the "Reverse Sting" was to eliminate outlets for stolen goods and to remove the profit motive from property crimes.

#### Perpetrator Information Center

In 1979, the Perpetrator Information Center was formed as the department's central intelligence processing unit. Data from field interview forms, offense reports and information received from outside agencies is analyzed and catalogued by unit personnel. The center also responds to requests for intelligence information from investigators and field officers.

Although collection and dissemination of intelligence data is the primary responsibility of the unit, video tape filming has become another important unit function. The information center personnel assist investigative elements by video taping, upon request, crime scenes, line-ups, and voluntary statements.

The use of video tape in interviews and crime scene investigations has been widely recognized by the courts as an effective tool in criminal investigations and subsequent prosecutions.

During 1982, Perpetrator Information Center staff members video taped 91 statements, line-ups and crime scenes, and conducted 137 viewings from unit video files.

#### Case Review and Court Assistance

In order to maintain open communications with the prosecutor's staff, the Case Review and Court Assistance Unit acts as a liaison between the court system and the department's investigative elements.

The Case Review and Court Assistance Unit is responsible for the presentation of all felony and misdemeanor cases for prosecution to the involved county prosecutor. This includes arraignments of in-custody arrests and presentation of case files for warrants.

In 1982, the unit processed 3,835 arrest cases, over 95% of which were formally charged by the prosecutor.

# FISCAL AND AUDIT BUREAU

The Fiscal and Audit Bureau, commanded by Lieutenant Colonel Larry J. Joiner, is responsible for budget preparation and control and for initiating actions for proper use of fiscal resources. In the 1982-83 budget year, the bureau, consisting of 37 law enforcement and civilian members, maintained the department's \$54,257,369 budget.

## 1982 Project Grants

Three substantial grants were received and processed by the Grants Unit in 1982. An \$85,700 grant was distributed by the Missouri Division of Highway Safety, appropriated to determine public compliance and the effects of selective enforcement of the 55 m.p.h. speed limit. The study surveyed Kansas City's six interstate highways, which extend over 83 miles and are traveled by 135,000 vehicles daily.

The project began in April, and provided overtime funds for officers involved and equipment necessary for the study. In addition, two Kawasaki motorcycles were presented by the MDHS to the Traffic Division in September, in connection with the grant.

The department also received a \$16,500 grant from the MDHS in December, 1982, for increased emphasis on intoxicated driver arrests. The project commenced during the Christmas holiday season and will be repeated during holiday weekends in 1983. The grant provides overtime pay for ten officers to concentrate on drunk driver arrests between 10 p.m. and 2 a.m.

The Missouri State Legislature appropriated \$35,942 in 1982 to supplement operational costs for the Regional Criminalistics Lab under the Crime Lab Assistance Program. The only forensic facility in the area, the Regional Lab accepts evidence for analysis from law enforcement agencies throughout northwestern Missouri.

## Long Range Planning and Grant Unit

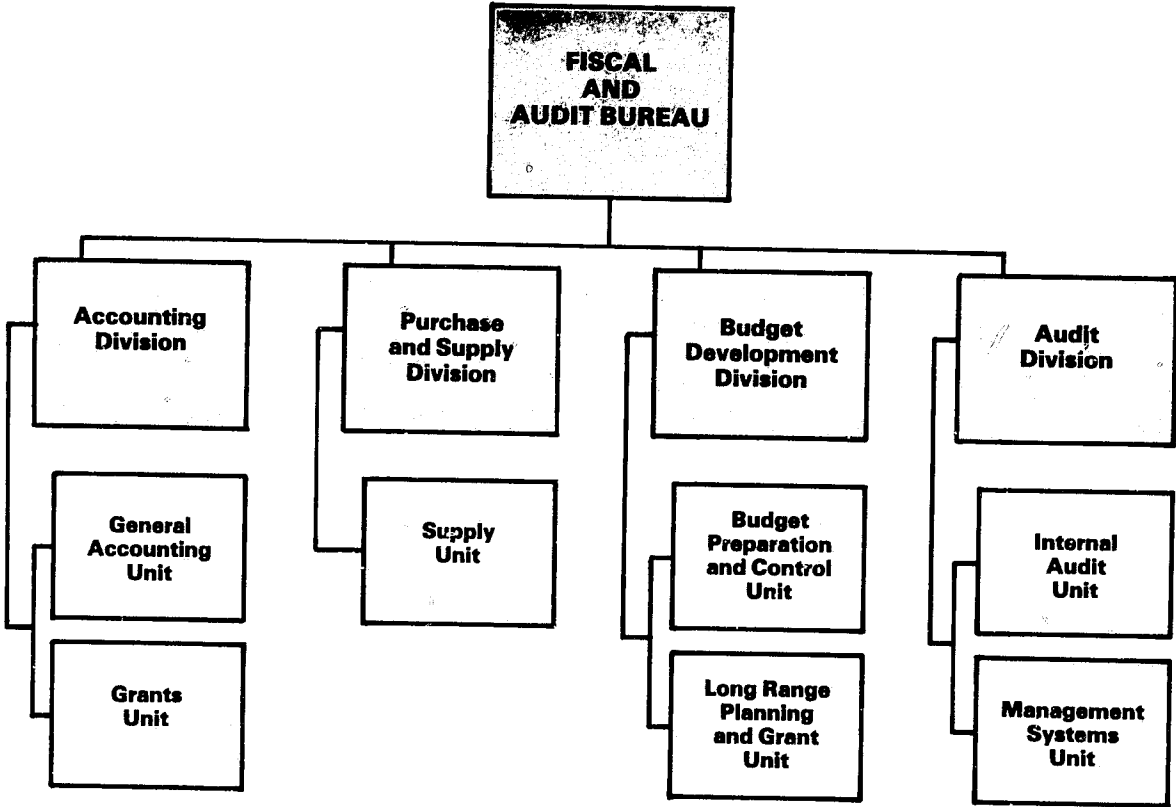

In 1980, the Long Range Planning and Grant Unit began preparing to relocate the Regional Criminalistics Laboratory. The lab had been located at 2100 North Noland Road in Independence, Missouri, since 1972.

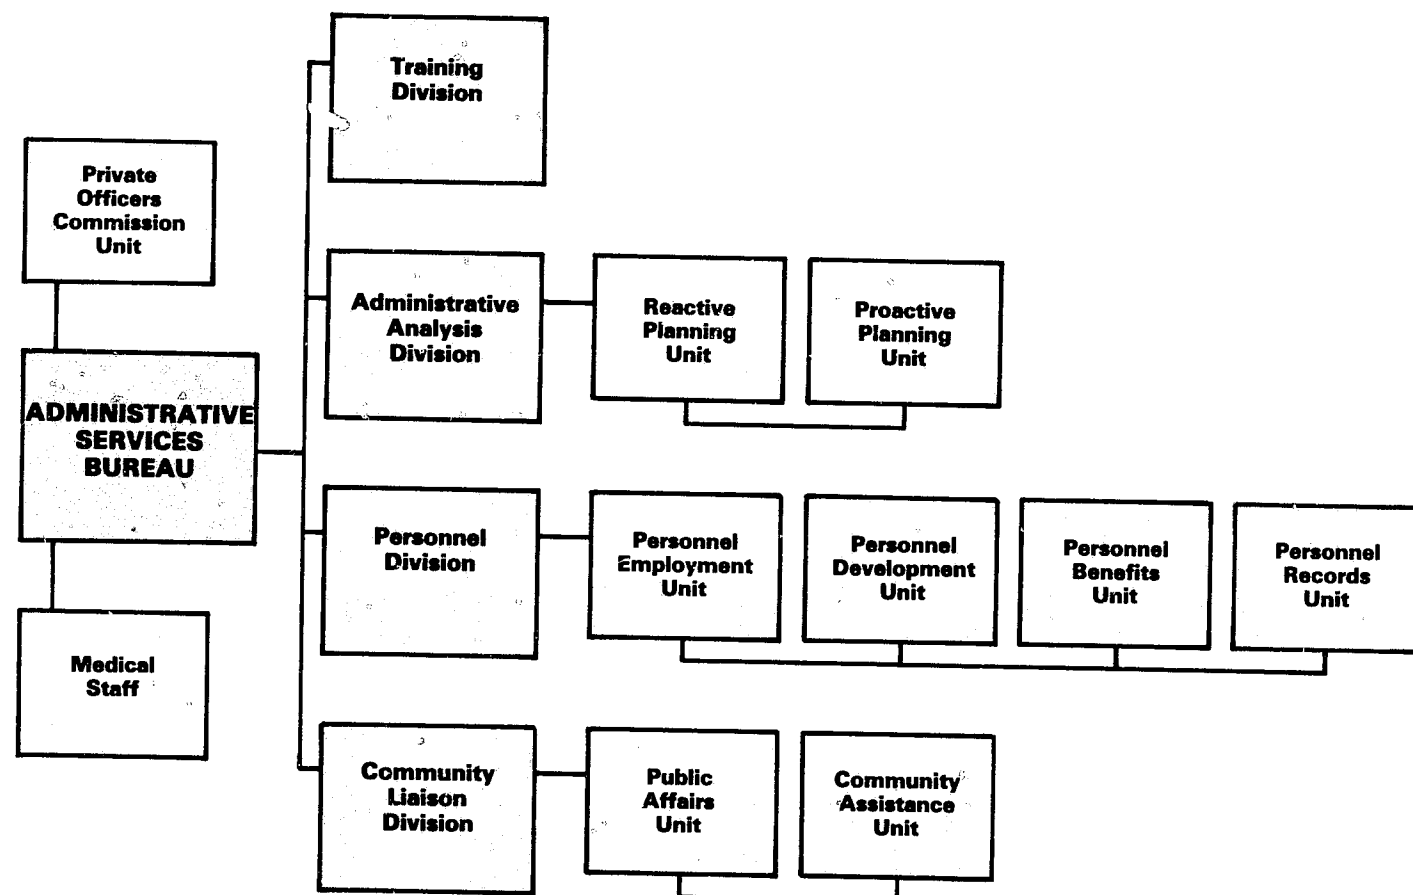

Long Range Planning and Grant Unit members recommended a major shift in the department's past focus on new structures under the Capital Improvements Plan. Instead of designing a new building at an estimated \$1,747,505 the unit selected a 13,500 square foot existing structure at 1525 Holmes for renovation.

For the first time in the department's history, members of the unit located the proposed site, prepared remodeling plans, and completed line drawings for the facility, rather than employ outside consultants for each phase. The only professional advisor utilized in the project was an architect who prepared final blueprints from the unit's sketches.

With renovation completed in the spring of 1982, the large lab building and extensive grounds provided ample space not only for the laboratory facilities, but also for the Crimes Against Property Division Office, the Arson Control Unit, the Property Recovery Unit, and the Crime Scene Investigations Unit. The final cost of the move totaled just over \$876,000, saving the city an estimated \$871,505 over the expense of erecting a new structure.

## ADMINISTRATIVE SERVICES BUREAU

The Administrative Services Bureau, commanded by Lieutenant Colonel James S. Keiter, is comprised of about 80 law enforcement and civilian members. The bureau is responsible for providing administrative support to all elements in order to maintain efficient department operations.

The Administrative Services Bureau consists of the Community Liaison Division, the Personnel Division, the Administrative Analysis Division, and the Training Division. The bureau is also responsible for issuing and reviewing all commissions granted to security guards, private investigators, and private officers in Kansas City, Missouri.

### National Police Planners Conference

The second annual National Police Planners Association Conference was hosted by the Proactive Planning Unit of the Administrative Analysis Division at the Sheraton Royal Hotel on September 13, 1982. One hundred participants from across the nation and Canada met to exchange police planning ideas.

The conference concept originated within the Proactive Planning Unit when it became apparent that no central location existed where police agencies could retrieve information concerning ongoing and past planning projects.

In an effort to make the best possible use of available resources and to avoid duplication of efforts, the Proactive Planning Unit established the National Police Planners Project Repository, located within the Administrative Analysis Division. The repository is a library of current and past law enforcement studies and is available to all association members.

The theme for 1982's conference was "Recognition of the Professional Police Planner". Conference objectives were to exchange information between agencies, to improve communications between police planners, and to expand the data contained in the central project repository.

### Training Academy

With the exception of firearms training, all recruit classes for Kansas City, Missouri Police Department officers are conducted at the Regional Training Academy, located on the campus of the Penn Valley Community College, 3201 Southwest Trafficway.

Department instructors assigned to the academy are considered vocational instructors and are a part of Penn Valley's adjunct faculty. Entrant officers are officially enrolled in the college during training and earn 34 hours of college credit during the 640 hour training program.

In addition to classroom instruction and practical application exercises, the department conducts extensive training in self-defense and weapons tactics, such as use of the baton, come-alongs, the carotid neck restraint, and revolver retention.

At least once a year after completion of academy training, all officers return to Penn Valley for in-service instruction regarding revolver retention and neck restraint techniques, along with classroom instruction to keep abreast of changes in the law enforcement profession.

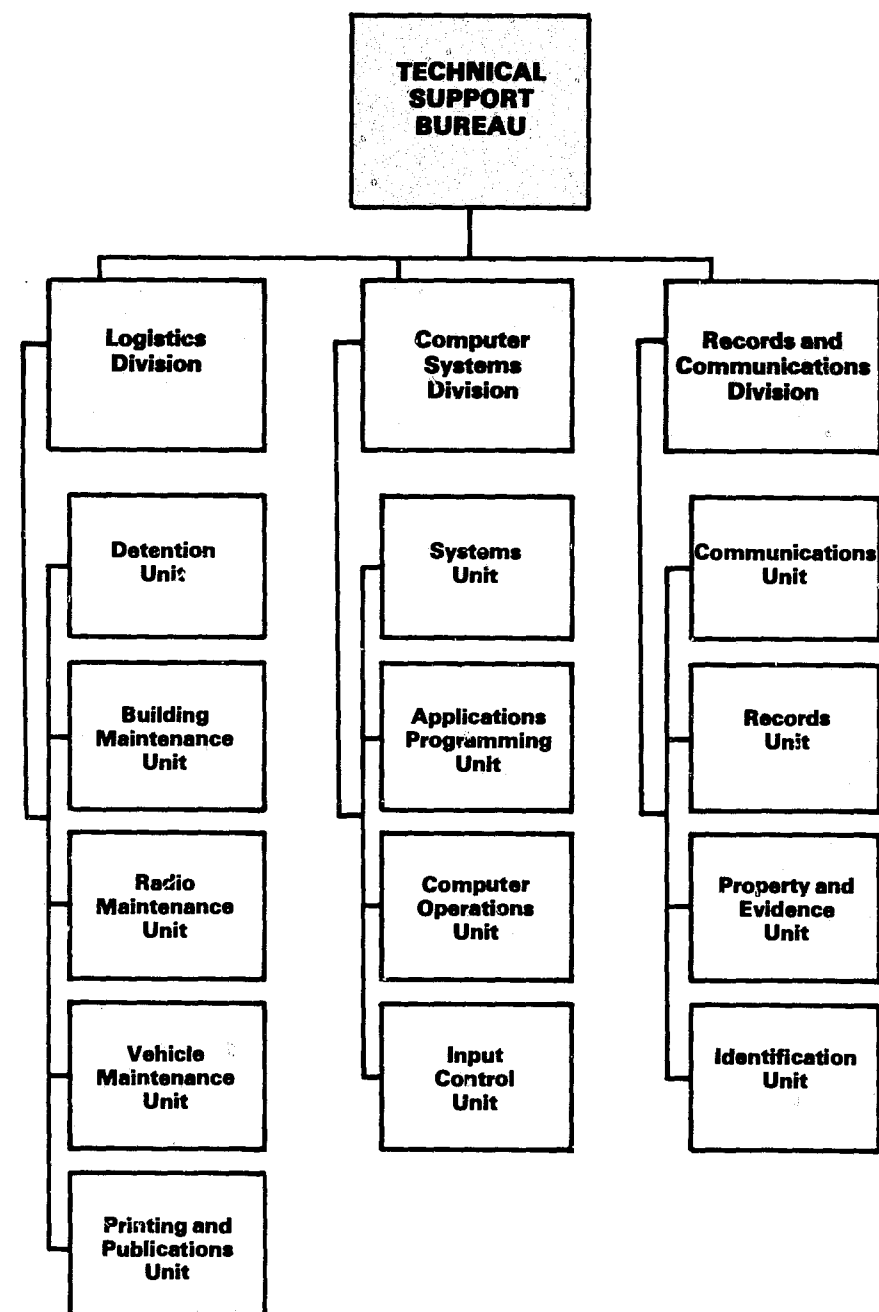

### Pre-Retirement Planning

In February, 1982, the Personnel Benefits Unit of the Personnel Division presented the first of a comprehensive series of pre-retirement planning seminars for department members approaching retirement. A second session was presented in October.

Law enforcement officers in their twenty-second year and beyond, and civilian members, in their fifteenth year and beyond, were invited to attend. Since the transition from employment to retirement can have a major impact on family life, spouses of members were also encouraged to attend.

Specialists in the field of retirement planning voluntarily conducted eight informational lectures. Topics included pensions, Social Security benefits, physical and mental health, second careers, housing options, legal affairs, insurance plans, and investment opportunities.

## TECHNICAL SUPPORT BUREAU

The Technical Support Bureau, commanded by Lieutenant Colonel Leroy V. Swift, provides services to support the department's line functions for more effective law enforcement. The bureau employs 32 police officers and 317 civilians. In recent years, civilian employees and supervisors have replaced most of the bureau's sworn personnel, allowing a large number of officers to return to patrol.

### Computer Systems Division

The Computer Systems Division, located on the fourth floor of Police Headquarters,

performs round-the-clock computer services, supplying criminal records information to the 332 computer terminals, in a total of 63 area criminal justice agencies in the Alert II Network.

### Automated Report Number System

On May 24, 1982, the Automated Case Report Number System was implemented throughout the department. The initial phase of the system was concerned with issuing case report numbers, selecting report information, and the accountability of report numbers. A second phase, scheduled for 1983, will allow an operator to determine the status of cases and to analyze workloads, aiding supervisors and crime analysts in planning and deploying manpower.

The new report number system begins in the Communications Unit when a case number is assigned to a report by computer. After the report is written and approved, the information contained in the report, such as the location, victim's identifiers, and means of attack, is entered into the station's computer terminal by desk clerks. The information is entered directly into the computer data bank and becomes immediately available for inquiries.

The program provides an immensely improved system for the accountability of reports, the availability of accurate and timely information about crime patterns, and the ability to respond to in-

formation requests concerning any reported incident.

### CRASH Program

In the fall of 1982, the CRASH (Calspan Reconstruction of Accident Speeds on the Highway) computer program was implemented. The program is an accident investigation aid aimed at increasing accuracy and uniformity in the interpretation of physical evidence gathered at vehicular scenes.

The program is used mainly by the Accident Investigation Unit for speed calculations in serious injury and fatality accidents or where police equipment is involved.

After the accident report is completed, an accident investigator enters the measurements and calculations, including impact positions and angles, resting positions, and the amount of rotation after impact for each vehicle involved.

The computer instantly provides two separate and independently derived estimates of the speed changes experienced by each vehicle at the time of collision contact. Accuracy of the estimated speeds is within three to five miles per hour, a vast improvement over methods used in the past, and a savings of dozens of man-hours per vehicular accident. Much of the information obtained from the CRASH program has never before been available.

#### Automated Timekeeping Program

In addition to criminal records, warrants, and pick up information, the Computer Systems Division developed an Automated Timekeeping System. Implemented in January, 1982, the system calculates payroll data, accumulated sick leave, and overtime for each department member on a daily basis, eliminating detailed paperwork in all department elements.

#### Communications Unit Prepares for 911

The Communications Unit, located on the first floor of Police Headquarters, began preparing personnel and equipment for Kansas City's new 911 Emergency telephone service, after the system received voter approval in March, 1982. Six specially equipped 60 button telephones were installed in a remodeled area of the unit, creating a separate room for telephone call takers.

At the present time, nine on-duty dispatchers per shift are required to answer telephone calls for service in addition to handling air traffic on the department's six routine (North, Central, East, Metro, South and Traffic and Administrative zones) and one city-wide emergency radio frequencies.

In order to staff the new call taker positions created by the upcoming 911 system, 22 new dispatchers will be trained prior to the project's implementation in mid-February, 1983, bringing the unit total to 66 civilian dispatchers. Each member in the unit will be cross trained in call taking and radio dispatching.

The Computer Aided Dispatching system (or CAD) is also expected to become operational in the Communications Unit by March 1, 1983. Through audio keyed computer terminals, with information displayed in seven colors, call takers will send priority coded calls for service to radio dispatching consoles. The radio dispatchers will have the capability to enter the status and identity of all available field officers on their assigned zone in their terminals at the beginning of the shift.

The CAD terminal will display the location and type of situation involved any time an officer is placed out of service. The screen will note any available suspect information and vehicle descriptions, as well as furnishing warnings to the dispatcher when officers arrive at the scene of potentially dangerous calls, such as hold up alarms or situations where subjects are thought to be armed.

#### Patrol Vehicle Refurbishment

The Kansas City, Missouri Police Department is the first and only known law enforcement agency to implement a vehicle refurbishment program. Initiated by the Vehicle Maintenance Unit during 1982, the department plans to completely refurbish 20 marked patrol cars by the end of the fiscal year in April, 1983.

The program's objective is to provide the safest, best handling, most comfortable, and reliable police vehicle possible, at less than half the price of a new car.

The spacious new 21,500 square foot Vehicle Maintenance Garage contains room for several vehicles in various stages of refurbishment as well as storage for damaged cars, from which serviceable parts may be removed.

With 1983 patrol cars priced at \$8,700, the estimated cost for complete refurbishment of a used vehicle is expected to average \$4,200 per car, or 48% of the replacement cost.

Each automobile requires about 120 hours of labor. During the process, the suspension, engine, transmission, drive line, and steering mechanism are all rebuilt or replaced with original manufacturer parts. The interior is removed and cleaned or repaired and new carpeting and headliners are installed. Body damage is repaired and the car is painted inside and out, making it virtually identical to a brand new model.

## COMMENDATION AND HONOR AWARDS

### Medal of Valor

Kansas City, Missouri Police Department  
Medal of Valor Awarded To

of the Kansas City, Missouri Police Department  
in recognition of distinguished service with valor  
rendered to the citizens of Kansas City, Missouri

President Board of Police Commissioners

Chief of Police

Dated

Bestowed upon a member who  
performs an exceptionally valorous  
act, involving great personal danger.

### Certificate of Commendation

Kansas City, Missouri Police Department  
This award is granted To

## 1982 AWARD RECIPIENTS

### DISTINGUISHED SERVICE MEDAL

Det. Eugene T. Kinser  
Sgt. Robert L. Kinser  
P.O. Randal G. New

### CERTIFICATE OF COMMENDATION

Det. William C. Atwood  
P.O. Thomas W. Barnes  
Sgt. David M. Barton  
Det. Gerald R. Borchers  
P.O. Francy L. Chapman  
P.O. Carl D. Cherry  
P.O. Steven H. Christensen  
Det. Larry L. Cridlebaugh  
P.O. Robert A. Duncan  
P.O. Michael T. Ferguson  
Inv. John E. Fraise  
Det. Dennis M. Gargotto  
P.O. Cindy J. Gibson  
Sgt. Lawrence D. Gilmer  
Det. Michael J. Hand  
Det. Kim I. Harmon  
R/P.O. Mark J. Komoroski  
Sgt. James T. Kopp

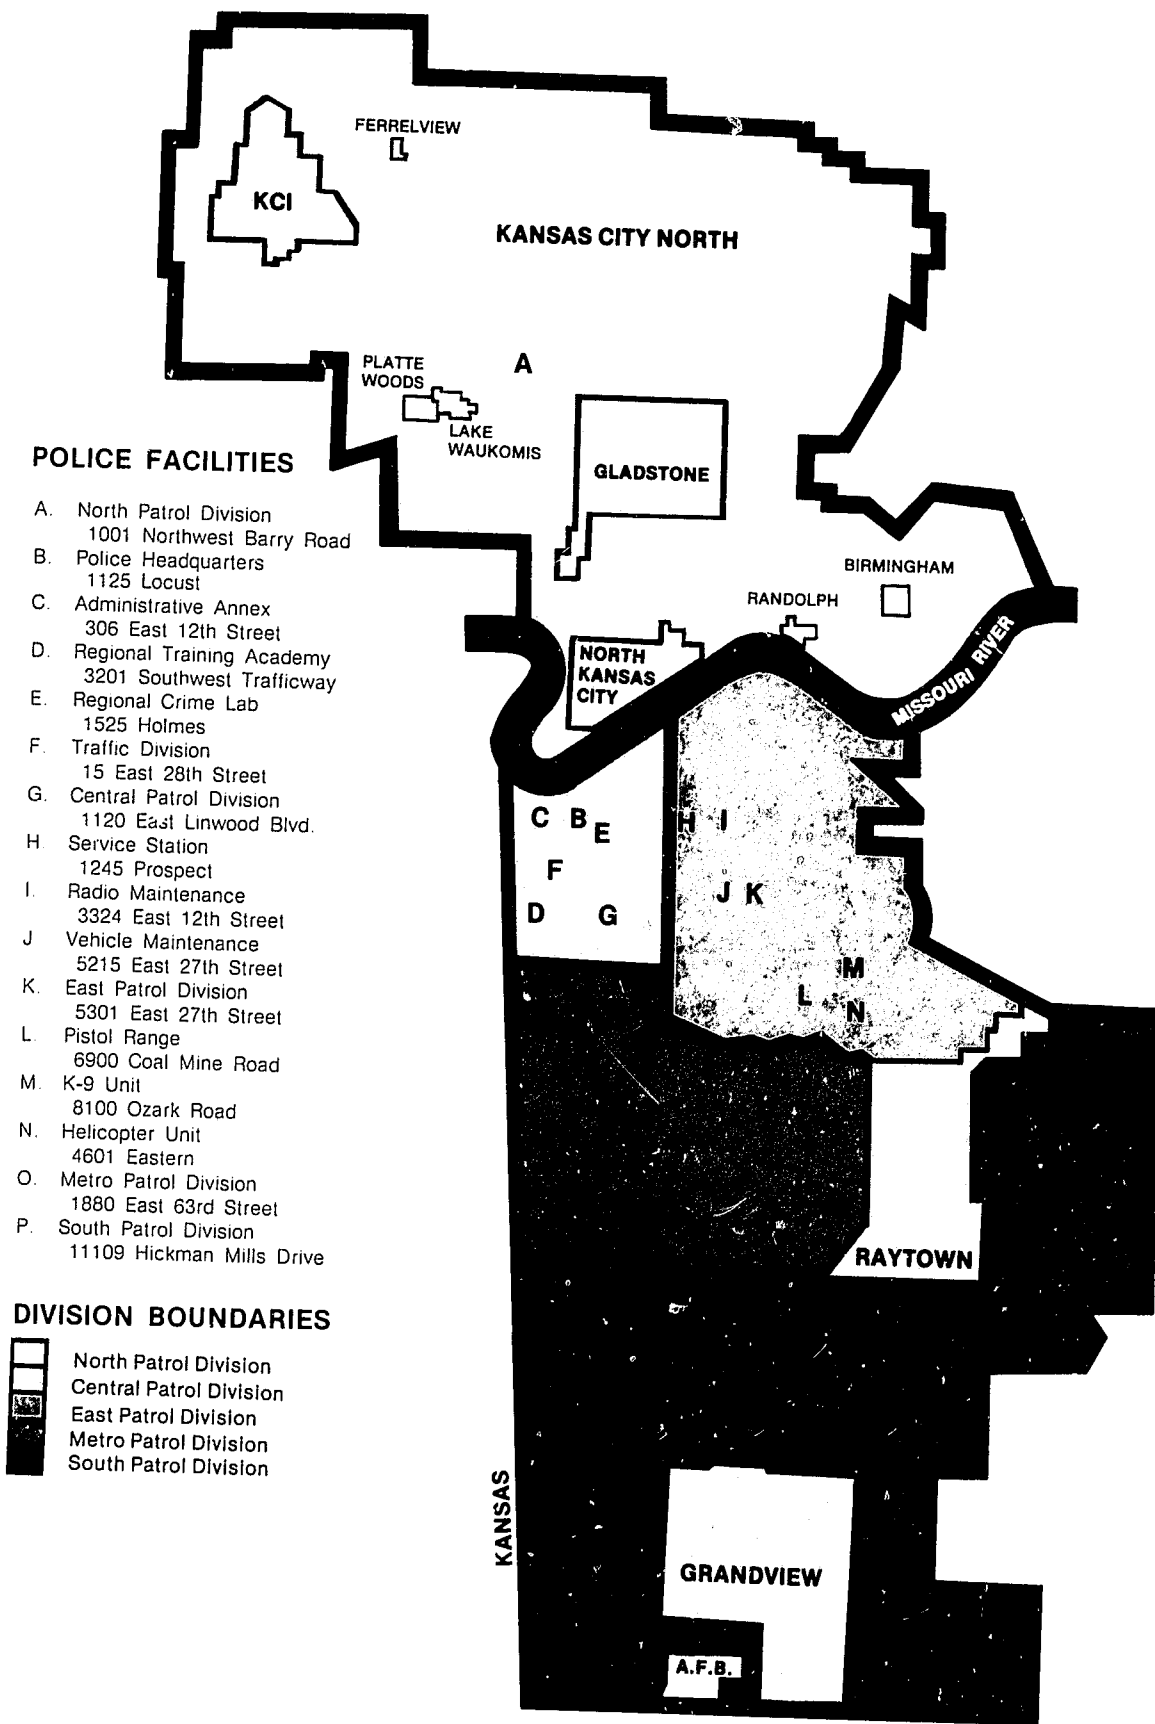

P.O. Lorenza J. Lamar, Jr.  
Det. William L. Lamb  
Det. James R. Lovelady  
P.O. Robert J. Micco  
Capt. Thomas O. Mills  
Det. William C. Moore  
P.O. Gerald L. Oliver  
Det. Cecil O. O'Rear  
Det. Rickey J. Pilgrim  
Civ. Gale A. Roberts  
Det. Paul W. Roberts  
R/Sgt. Craig G. Sarver  
Det. Elmer F. Sellmeyer  
Det. Timothy H. Shanks  
P.O. Michael V. Sola  
Det. Dennis F. Trabue  
P.O. Walter A. Westwood

### MERITORIOUS SERVICE AWARD

Capt. Richard K. Burnett  
P.O. William C. Cahill  
Civ. Cynthia L. Coghlan  
Civ. Richard D. Conway, Jr.  
Sgt. Robert C. Mathis (2)  
Capt. Robert L. McAtee  
Capt. Richard N. McKiddy

Civ. Joy O. Ramsey  
P.O. George F. Roberts  
P.O. Bobby E. Robinett  
Civ. Judith H. Robinette  
Sgt. Benjamin E. Way  
Civ. David H. Wood  
P.O. John L. Young II

POLICE FACILITIES and PATROL DIVISIONS

KANSAS CITY, MISSOURI POLICE DEPARTMENT  
FINANCIAL AND STATISTICAL SUMMARY

\*Figures based on 1980 U.S. Census population of 448,159

Readers are cautioned against drawing conclusions from comparisons of crime figures between communities without considering the factors which will affect the amount and type of crime. Some of those factors are: density and size of the community and metropolitan populations, economic status and mores, attitude of the public toward law enforcement problems, and the administrative and investigative efficiency of the law enforcement agency.
