A REVIEW OF

MAY S K.

A CQUIGSSIC **UNIFORM CRIME REPORTS**

HAWAII CRIMINAL JUSTICE DATA CENTER

APRIL 1984

FOREWORD

Crime is one of the foremost items of concern to all citizens of Hawaii. As all persons are affected by crime and by the fear of crime, a need exists for timely, accurate and reliable reporting on the number and nature of crime.

The State of Hawaii, Uniform Crime Reporting Program, was established, following national guidelines, in response to this need. Under the auspices of the Department of the Attorney General, the Hawaii Criminal Justice Data Center currently compiles and analyzes Uniform Crime Reports (UCR). The data obtained through the UCR Program serve as a set of uniformly defined criminal statistics that makes possible yearly, inter-agency and national comparisons.

Crime in Hawaii, 1983, A Review of Uniform Crime Reports, is a summary of statistics on crime in the State and Counties of Hawaii. This publication serves as a tool for administrative and operational decisions, however it also serves to inform the public on the extent of criminal activity in Hawaii. The summary shows that reported Index Crimes have decreased significantly in the past year. However, there were three (3) categories that registered increases: murder, aggravated assault, and motor vehicle theft. The increase in aggravated assaults is due in part to changes in classification. Please note the section on aggravated assaults in the Introduction.

The Data Center wishes to express its appreciation to Joseph Cravalho, Chief of Police, Maui Police Department; Roy K. Hiram, Chief of Police, Kauai Police Department; Douglas G. Gibb, Chief of Police, Honolulu Police Department; Guy Paul, Chief of Police, Hawaii Police Department; and to their respective research staffs for providing the accurate and necessary data reported herein; and to the Federal Bureau of Investigation (FBI) which provided assistance and guidance in the collection of the Uniform Crime Reports. Their assistance is gratefully acknowledged.

INTRODUCTION

The Uniform Crime Reports (UCR), are a long-standing source of information about law enforcement and crime. The UCR arose from a recognized need for a nationwide system of uniform crime statistics. The Federal Bureau of Investigation (FBI) was designated to serve as the national clearinghouse for data collected under the UCR Program.

The FBI receives information either directly from a local law enforcement agency or from a state-level UCR Program. Local agencies submitting data directly to the FBI receive support and guidance from the national program. State-level programs also receive support and act as intermediaries between the FBI and local agencies. State-level programs were developed to transfer the data collection responsibility from the FBI to a state agency. This helps to streamline operations at the national level.

Operational Criteria

مى يەرىپىيە يەرى

The purpose of the state-level UCR program is:

to establish, at the state level, the responsibility to collect and report uniform crime data in accordance with standards developed jointly by the FBI and the International Association of Chiefs of Police (IACP).

The conditions under which a State program is developed and by which it must operate are set by the FBI and is designed to ensure consistency and comparability of data collected by State programs. The conditions are as follows:

(1) The State program must conform to the national Uniform Crime Reports standards, definitions, and information required. This, of course, does not prohibit the State from collecting other statistical data beyond the national collection.

(2) The State agency must have a proven, effective, mandatory, statewide program and have instituted acceptable quality control procedures.

(3) Coverage within the State by a State agency must at least be equal to that

attained by Uniform Crime Reports. (4) The State agency must have adequate field staff assigned to assist local units is record practices and crime reporting procedures.

(5) The State agency must furnish to the FBI all of the detailed data regularly collected by the FBI in the form of duplicate returns, computer printouts, and/or

(6) The State must have the proven capability (tested over a period of time) to magnetic tape. supply all statistical data required to the FBI in time to meet national Uniform

Crime Reports publication deadlines. (7) The FBI will continue its internal procedures of verifying and reviewing individual agency reports for both completeness and quality.

(8) The FBI will continue to have direct contact with individual reporting units within the State where necessary in connection with crime reporting matters, but will coordinate such contacts with the State agency.

(9) Upon request, the FBI will continue its training programs within the State with respect to police records and crime reporting procedures. For mutual benefit these will be coordinated with the State agency.

(10) Should circumstances develop whereby the State agency cannot provide the data required by the national program, the FBI will reinstitute a direct collection of Uniform Crime Reports form police units within the State.

Information Requirements analyses.

Reported Offenses

Arrest Patterns

Offense Characteristics

Reported Offenses

All offenses reported by UCR Programs are offenses known to the police. Unreported crimes are difficult to measure and so are not taken into account. Because not all crimes come to the attention of the police, the IACP chose to obtain data on seven offenses. The selection was based on the seriousness of the crime in terms of nature and/or volume, frequency of occurrence and likelihood of being reported. The seven offenses are collectively known as the Crime Index and serve as a gauge to measure the fluctuations in volume and rate of crime. The crimes include the violent crimes of murder and nonnegligent manslaughter, forcible rape, robbery, and aggravated assault; and the property crimes of burglary, larcenytheft, and motor vehicle theft. In 1979, arson was added as the eighth Crime Index offense.

The eight Crime Index offenses together with manslaughter by negligence, make up a group of crimes known as Part I offenses. Part II offenses are all other offenses not included in Part I. Information on Part I offenses include the number of crimes committed, the number cleared by arrest or by exceptional means, and the number of persons arrested. Only arrest data are reported for Part II offenses.

Because there are differences in criminal codes throughout the nation, the UCR program uses a standard set of definitions for each offense. Law enforcement agencies submit data in accordance with these definitions without regard for local statutes. This standardization allows the aggregation of state statistics into a national total.

Arrest Patterns

Statistical reports derived form arrest information are presented with other UCR exhibits because they are primarily of interest to law enforcement agencies.

Offense Characteristics

UCR provides for the collection of information describing criminal events in detail. Law enforcement and planning agencies need this type of data because of their relationship to crime prevention. Such data can be used to analyze crimes of violence according to weapon used, day of the week, victim relationship, victim age, offender age, and the police officer as a victim. Monetary losses resulting from crime against property can also be displayed.

2

The Uniform Crime Reports Program has been traditionally oriented toward law enforcement statistics. The basic data elements required by the FBI, when supplemented by additional state oriented items, permit a variety of interesting statistical

Three categories of statistical reporting are utilized:

Racent Developments

The Congress of the United States, in October, 1978, passed legislation mandating that arson be classified as a Part I, Crime Index Offense in the UCR Program.

The National UCR Program modified its collection of data on the Age, Sex and Race of Persons Arrested effective January 1, 1980. All data concerning race were condensed to reflect only White, Black, American Indian or Alaskan Native, and Asian or Pacific Islander. In addition, ethnic origin data i.e., Hispanic or not Hispanic were collected. New age breakdowns for persons arrested under the age of 18 were also instituted. The new categories show the number of persons arrested under ten years of age and those between the ages of 10 and 12.

Hawaii UCR Program

In an effort to provide a complete picture of crime in the State of Hawaii, the Hawaii Criminal Justice Data Center presently has the responsibility of serving as the clearinghouse for Uniform Crime Reporting (UCR) data.

Uniform Crime reports on violent and property crimes in Hawaii are compiled and analyzed by the Data Center.

As crime and fear of crime are recognized by citizens of the State as a problem of highest concern, timely and accurate information is necessary to assist administrators and other public officials in assessing the problem.

The Data Center is able to provide information related to crime at the State and County levels with sufficient timeliness to alert all criminal justice agencies and the public long before national crime data are released.

Significant changes have been made to the UCRs for the State of Hawaii. Prior to the Data Center's involvement in the UCR Program, the four counties independently submitted reported offense and arrest statistics to the FBI on an optional basis.

UCRs maintained at the Data Center differ from data collected at the National level in that the unique racial breakdown for Hawaii is recognized and compiled. The FBI uses only four racial categories: White, Black, American Indian or Alaskan Native, and Asian or Pacific Islander. The Hawaii program has broken out the categories to include: Chinese, Japanese, Filipino, Samoan, Korean, Hawaiian/Part Hawaiian, and Others.

Another significant change to the UCR Program was the breakdown of racial characteristics of murder victims to conform with the arrest categories.

These changes, along with the functions of clearinghouse and data resource center have added much to the analyses of crime for Hawaii-specific problems.

CRIME IN HAWAII, 1983

The format of Crime in Hawaii, 1983 has been revised. For the first time, a section on arson offenses is presented.

Arson

Aggravated Assaults

Some offenses previously classified by the Honolulu Police Department as reckless endangering, terroristic threatening, or simple assaults are now classified as aggravated assaults. These changes in classification resulted from a stricter interpretation of the definition of aggravated assaults.

of 1983.

Changes in classification do have an effect on offense numbers so care should be taken when comparing 1983 aggravated assault numbers to that of 1982 and when viewing trends presented in this report.

Population Estimates

The resident population figures for 1982 are the most current estimates available and were taken from the State Department of Planning and Economic Development's (DPED) 1983 Data Book. Therefore 1982 rate per 100,000 population figures presented in this report may differ from the rates presented in Crime in Hawaii, 1982.

Population data broken down by race and by age are 1980 data from DPED.

Limitations

The current program does not collect data on incidents or victim characteristics nor does it differentiate between military, visitor, or resident, victims or offenders. This data would be pertinent to any analysis of crime in Hawaii. A data system as an automated incident-based reporting system with direct data entry by agencies, would lend itself to this type of analysis. Such a system may better satisfy Hawaii's need for crime information and still meet FBI requirements.

Although the property crime of arson is an Index offense, arson data is not included in the Index Crime totals in this publication. This allows comparisons to be made with previous years annual reports without having to adjust for arson.

The Maui Police Department also began to classify terroristic threatening offenses as aggravated assaults. The resultant rise in assaults can be seen in the later part

The 1983 resident population figures used in this report are based on the Bureau of the Census' state provisional estimates as of July 1, 1983. These estimates update the 1980 preliminary census counts.

HAWAII CRIME SUMMARY

Index Crimes

The number of Index Crimes reported in 1983, including arson, totaled 59,432. This is a 9.2 percent decrease from the 1982 total of 65,448. The category that registered the largest increase was murder, up 83.9 percent from 1982. The largest drop was recorded in the burglary-breaking and entering category, a drop of 17.2 percent.

Largest Category of Index Crimes

Larceny-theft remains as the largest category of Index Crimes (65.5 percent). A total of 38,920 larceny-thefts were reported to the police in 1983, or a 7.9 percent decrease from 1982.

Personal Crimes

Violent crimes, totaled 2,579 in 1983, a 1.5 percent increase over the 1982 total of 2,542. Murder and aggravated assault increased, while forcible rape and robbery decreased. The number of reported murders increased 83.9 percent and aggravated assault by 46.3 percent. Forcible rape decreased by 12.0 percent and robbery by 14.7 percent.

Property Crimes

5

Crime involving property and committed without the use of force totaled 56,853, or an decrease of 9.6 percent over 1982. Of the total property crimes, larceny-theft accounted for 68.4 percent with burglary and motor vehicle theft accounting for 24.0 and 7.6 percent, respectively.

Residential burglaries accounted for 70.5 percent of all burglaries reported; more than half, or 53.3 percent of all reported burglaries, were committed during the day.

Modified Index Crimes

Modifying the above Index Crime number, 59,432, to include the property crime of arson results in a decrease of 9.1 percent over 1982. Modifying the property crime number results in a decrease of 9.5 percent. Arson itself increased by 10.3 percent over 1982.

Value of Property Stolen

The total value of property stolen in Hawaii during 1983 was \$39,846,000, up 3.4 percent from the 1982 figure of \$38,525,200. The police departments were successful in recovering 29.2 percent of the loss, or \$11,626,100, an increase from the 26.9 percent recovery rate in 1982.

Arrests Reported for Index Crimes

A total of 11,493 arrests were made for Index Crimes in 1983, accounting for 28.2 percent of all arrests.

Total Arrests Reported

A total of 40,725 arrests for all nontraffic offenses were reported in 1983. Juvenile arrests accounted for 26.4 percent of all persons arrested for the year. In 1982 juveniles accounted for 29.5 percent of the arrests.

Narcotic Drug Arrests

A total of 4,205 arrests for drug violations were reported in 1983 as compared with 3,298 in 1982. The majority of arrests (74.9 percent) were for possession of marijuana. Of the total arrests, 18.0 percent were persons under 18 years of age.

Gambling Arrests

There were 1,011 arrests made on charges of gambling in 1983. Of that total, 6.7 percent were juveniles. Juveniles accounted for only 8.6 percent of gambling arrests in 1982.

Definition

Murder and nonnegligent manslaughter, as defined in the Uniform Crime Reporting Program, is the willful (nonnegligent) killing of one human being by another. The classification of this offense, as for all of the other Crime Index offenses, is based solely on police investigation as opposed to the determination of a court, medical examiner, coroner, jury, or other judicial body. Not included in the count for this offense classification are deaths caused by negligence, suicide, or accident; justifiable homicides; and attempts to murder or assaults to murder, which are scored as aggravated assaults.

Trends		
Year	Number of Offenses	Rate Per 100,000 Population
1982	31	3.1
1983	57	5.6
Percent Change	83.9	80.6

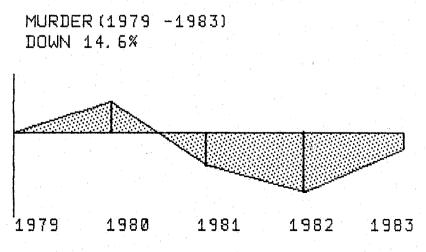

The number of homicides known to law enforcement agencies in Hawaii increased by 83.9 percent from 31 in 1982 to 57 in 1983. Although the percentage increase over the previous year is high, the 1983 figure is not high when compared to recent year figures. The average for the five year period 1978 to 1982 is 57.6 homicides per year.

Most of the increase in terms of actual numbers, 20, occurred in the City and County of Honolulu. Kauai County, which reported no homicides in 1982, reported 3 and homicides also increased by 3 in Hawaii County.

The graph below shows the percent change in the number of homicides for years 1980 through 1983 compared against the base year, 1979. Since 1979, the low point was reached in 1982 and the high point, in 1980.

	50%
percent change	25*
from 1979	0
	-25*
	-50*
	-75*

Murder and Nonnegligent Manslaughter

Risk

The overall risk of being murdered is still very small, approximately 6 in 100,000. However, there are certain characteristics that may increase that risk. Most of the victims were males. They made up 65 percent. Most victims were in the age group 25 to 29, 22.8 percent. This is the first time since 1976 that the age category 25 to 29 registered more victims than the age category 20 to 24. Whites made up most of the victims, 47.4 percent.

The national rate in 1982 was 9 per 100,000 population. The rate for Western States was also 9 per 100,000. In 1982, nationally, most victims were in the 20-24 age group.

Most homicides were reported during the months of June and September. June was also the month with the most homicides in 1982. Nationally in 1982, most people were murdered in December. The table below shows the percentage of murders by month. Please note that the total percent may not add to 100 due to rounding. This pertains to all tables of this type.

Murders by Month (Percent of annual total)

Month	Hawaii 19	83 Hawaii 1982	U. S. 1982
January	· 7.0	9.7	8.3
February	8.8	3.2	7.5
March	7.0	3.2	8.1
April	8.8	6.5	7,9
May	8.8	0.0	8.8
June	15.8	25.8	8.4
July	5.3	16.1	8.8
August	1.7	12.9	8.8
September	15.8	9.7	8.6
October	10.5	6.5	8.2
November	7.0	3.2	7.5
December	3.5	3.2	9.0

-rest victims were killed with a firearm, 31.6 percent. Almost half of the victims (47.4 percent), knew their assailant. The assailant was a relative in 19.3 percent of the cases and an acquaintance in 28.1 percent of the cases.

Arrests

Please note that arrests figures presented here may include arrests for offenses committed in previous years. This also applies to all arrest data presented in this report.

There were 51 arrests made for murder in 1983 as compared to 41 in 1982. This is an increase of 24.4 percent,

were 12.

Forcible Rape

Definition

11

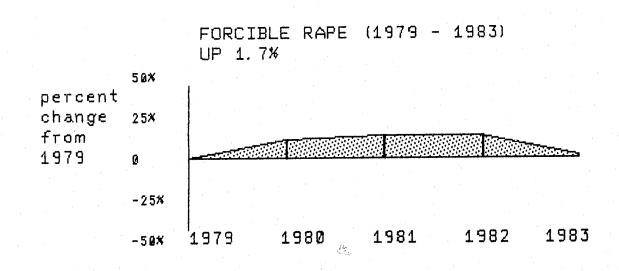

Forcible rape, as defined in the Program, is the carnal knowledge of a female forcibly and against her will. Assaults or attempts to commit rape by force or threat of force are also included; however, statutory rape (without force) and other sex offenses are not included in this category.

Trends		·
Year	Number of Offenses	Rate Per 100,000 Population
1982	342	34.3
1983	301	29.4
Percent Change	(-12.0)	(-14.3)

The number of rapes reported to law enforcement agencies decreased by 12.0 percent from 342 reported in 1982 to 301 reported in 1983. This is the first decrease since the period between 1975 and 1976.

Kauai County reported the fewest number of rapes. There were 3 reports in 1983. This is a 80.0 percent decrease from the 15 reported in 1982. Rapes also dropped for Maui and Honolulu Counties by 37.1 and 7.4 percent respectively. Hawaii County registered a 17.4 percent increase. The percentages for Kauai, Maui and Hawaii Counties are large primarily because the actual numbers are relatively small.

The graph that follows shows the percent change in the number of reported offenses for years 1980 through 1983 compared against 1979 (the base year). The relatively flat curve from 1980 to 1982 indicates that there has been little change in the number of reported rapes for years 1980, 1981 and 1982. For the five year period 1979 to 1983, reported rapes have increased only by 1.7 percent.

Risk

Since under the UCR definition of rape, only women can be victims, reported rapes per 100,000 females may be a better indicator of risk. In 1983 the rate was 60.4 rapes per 100,000 females. This is a 14.2 percent decrease from the previous year's rate of 70.4. In 1982, the national rate was approximately 65 and 89 for the Western States.

Of the 301 rapes reported, 255 or 84.7 percent were actual rapes and 46 or 15.3 percent were attempted.

In 1983, rapes were most frequently reported during the month of August. In 1982, most rapes were reported in the month of July. The table below shows the percentage of reports by month for Hawaii in 1982 and 1983 for the nation in 1982.

Month

January February March April May June July August September October November December

Arrests

The number of arrests for rape decreased by 28.1 percent from 153 in 1982 to 110 in 1983. This is due in part to the decrease in the number of rapes reported.

Of the 110 arrests in 1983, 90.0 percent were adults of which 1 was a woman. Of all ages, 28.2 percent were in the age group 20 to 24 and 24.5 percent were in the age group 25 to 29. Whites made up the largest single race group with 33.6 percent of the arrestees. In 1982 most arrestees were Hawaiian or Part-Hawaiian.

Rapes by Month (Percent of annual total)

Robbery

Definition

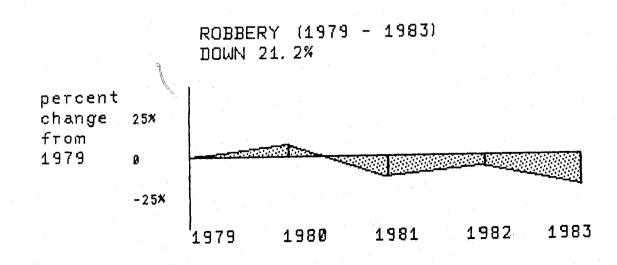

Robbery is the taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or by threat of force or violence and/or by putting the victim in fear.

Trends			
Year	Number of Offenses	Rate Per 100,000 Population	
1982	1,560	156.5	
1983	1,330	130.0	
Percent Change	(-14.7)	(-16.9)	

The number of reported robberies decreased 14.7 percent from 1560 reported in 1982 to 1330 reported in 1983. The 1983 figure is the lowest since 1146 robberies were reported in 1977.

All counties with the exception of Maui County reported decreases. In Maui, robberies increased by 5 from 42 to 47. Robberies decreased in Honolulu by 14.7 percent, in Hawaii County by 36.2 percent and in Kauai County by 28.6 percent.

The graph below shows the percent change in the number of reported offenses for years 1980 through 1983 compared against 1979 (the base year). The curve below the zero line indicates that the number of robberies has remained below the 1979 level since 1981. Overall for the 5 year period 1979 to 1983, reported robberies have decreased by 21.2 percent.

Risk

- (O)

The overall robbery rate per 100,000 population decreased 16.9 percent from 156.5 per 100,000 in 1982 to 130.5 per 100,000 in 1983. The national rate in 1982 was 232 and for Western States, 267.

All types of robberies in Hawaii decreased in 1983 with the exception of convenience store hold-ups. Convenience store robberies increased by 31.3 percent.

Bank robberies declined 22.7 percent in 1983 and is at the lowest level since 1978. Highway robberies declined by 11.8 percent. Highway robberies are those that occur outside of structures such as on streets or in alleys. The chance of being robbed in this manner is approximately 1 in 2,500. Commercial house, service station, and residential robberies declined by 30, 23 and 9 percent respectively.

December.

Month

January February March April May June July August September October November December

Arrests

There were approximately 20 percent less arrests for robbery in 1983 than 1982.

Of the 588 arrests in 1983, males made up 90.6 percent. Juveniles accounted for 36.7 percent of all arrests. The age group 20 to 24 was the next largest group accounting for 24.8 percent followed by 18 and 19 year olds with 15.3 percent.

Most of the arrestees, 30.3 percent, were Hawaiian or Part-Hawaiian. They were followed by Samoans with 20.1 percent. The Hawaiian/Part-Hawaiian category has been the leading arrestee group since 1979.

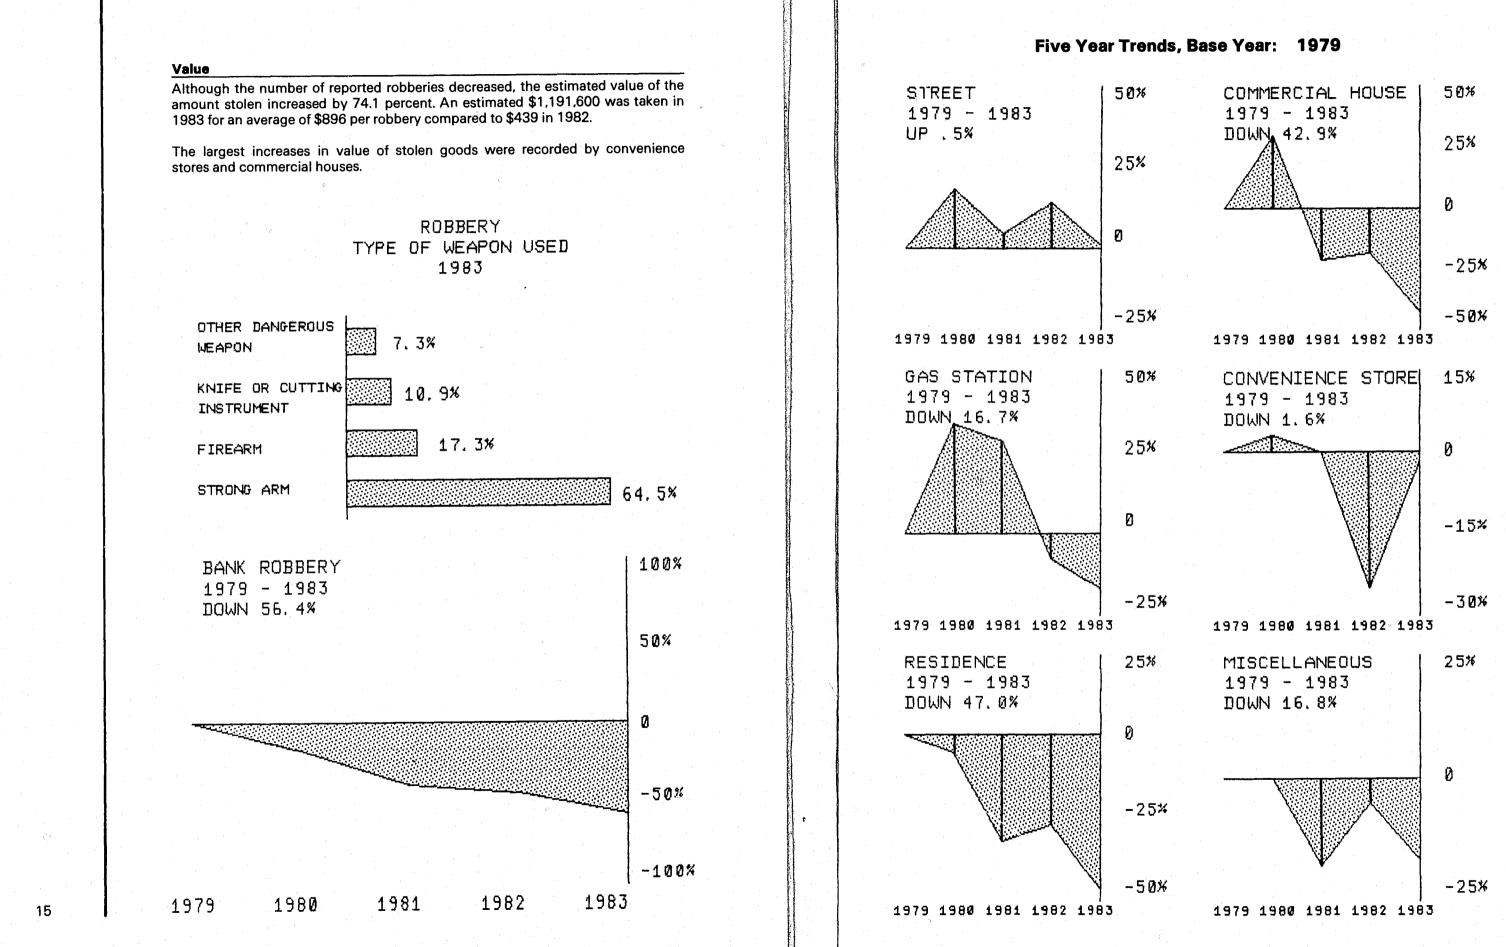

13

Most robberies were committed during the month of January in 1983 as compared to July in 1982. For the nation, in 1982 most robberies were committed in

Robberies by Month (Percent of annual total)

Hawaii 1983	Hawaii 1982	U. S. 1982
9.4	8.0	9.1
9.0	8,8	8.2
8.7	9.3	8,0
8.0	7.8	7.5
9.2	6.9	7 5
6.8	7.8	7.7
8.2	11.6	8.4
8.4	8.3	8.5
8.2	7.9	8.3
8.6	7.3	8.5
8.8	8.5	8.4
6.6	7.8	9.8

Most robberies did not involve the use of a weapon.

Aggravated Assault

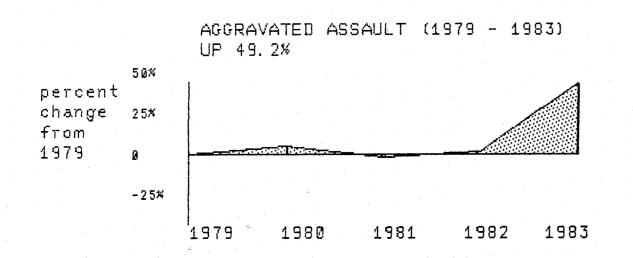

Definition

Aggravated assault is an unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault is usually accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Attempts are included since it is not necessary that an injury result when a gun, knife, or other weapon is used which could and probably would result in serious personal injury if the crime were successfully completed.

Trend		
Year	Number of Offenses	Rate Per 100,000 Population
1982	609	61.1
1983	891	87.1
Percent Change	46.3	42.6

Aggravated assault offenses known to law enforcement agencies increased 46.3 percent from 609 assaults in 1982 to 891 assaults in 1983. Changes in the classifying of aggravated assaults by the Honolulu and Maui Police Departments are partly responsible for the increase. Aggravated assaults increased by almost 50 percent for Honolulu and by 31 percent for Maui County. Kauai County experienced a 179 percent increase. This is due to working with a small base number in calculating the increase (28 aggravated assaults in 1982), and to an unusually high number of incidents involving multiple victims in 1983. Aggravated assaults in Hawaii County increased by only 2.5 p_{\odot} cent.

Since 1979 and until 1983, the number of aggravated assaults remained relatively constant as indicated by the fairly level curve in the graph below. The graph shows the percent change for years 1980 to 1983 compared against 1979.

Risk

The aggravated assault rate in 1983 was 87.1 per 100,000 population, an increase of 42.6 percent over 1982. Even with the increase however, Hawaii's rate is still well below the 1982 national rate of 281.

In 1983, firearms were used in 21.1 percent of aggravated assaults. Knives or other cutting instruments were used 31.6 percent of the time. Most victims however, were assaulted by an assailant using a weapon other than a firearm or knife. These made up 38.0 percent of the assaults.

Most aggravated assaults in 1983 were reported during the month of March. In 1982 most assaults were reported in December for Hawaii and in July for the nation. Nationally aggravated assaults seem to peak during the summer months. No such pattern exists for Hawaii for both 1982 and 1983.

Month

January February March April May June July August September October November December

Arrests

Arrests for aggravated assaults increased 32.4 percent from 321 in 1982 to 425 in 1983. Most of the increase was in the arrests of adults. There was only 1 more juvenile arrest in 1983 than there was in 1982. Adults as a whole account for 9 out of 10 arrests. The age 20 to 24 accounted for 27.3 percent or approximately 1 out of 4 arrests.

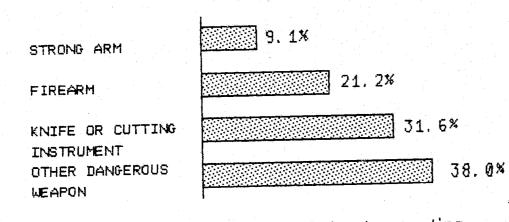

Most arrestees were male, only 1 out of 10 was a female. Most were white. Last year more Hawaiians and Part-Hawaiians were arrested than any other race group.

1 Percentages may not total 100 due to rounding

Definition

The Uniform Crime Reporting Program defines burglary as the unlawful entry of a structure to commit a felony or theft. The use of force to gain entry is not required to classify an offense as burglary. Burglary in this Program is categorized into three subclassifications: forcible entry, unlawful entry where no force is used, and attempted forcible entry.

Trend			
Year		Number of Offenses	Rate Per 100,000 Population

1982 1983

Risk

21

The burglary rate per 100,000 population decreased by 19.4 percent from 1,653.2 to 1,332.7 per 100,000. A rate this low has not been seen since 1972. The burglary rate is the highest for Maui County. They have a rate equivalent to 2,428.3 per 100.000 population almost twice the rate of the State rate. Hawaii County had the lowest rate.

Nationally in 1982, the rate was approximately 1,475 per 100,000 but for Western States it was 1,841 per 100,000. Hawaii's burglary rate always seems to be above the national rate but below the Western States rate. This has been true at least as far back as 1975.

Of all burglaries, 70.5 percent were residential. Using an estimate of approximately 320,800 households in 1983, the chance of a household being burglarized is 2 in 100.

Most residential burglaries occur during the day while most non-residential burglaries occur at night.

No force was involved in 18.6 percent of burglaries. Better security may have prevented about 20 percent of all burglaries. Attempts accounted for 7.5 percent of buralaries.

In 1982 most burglaries occurred during December for both Hawaii and the nation. In 1983 most burglaries occurred during the month of January and seemed to occur more frequently during the first half of the year.

Arrests

Arrests for burglary decreased by 21 percent in 1983. Arrests of both males and females decreased. Similarly with adults and juveniles.

Males accounted for 89.5 percent of arrestees. The ratio of females to males arrested for burglary has remained about the same since 1982.

Juveniles accounted for 52.5 percent of all arrests for burglary. This is down slightly from the 55.6 percent reported in 1982. Burglary is one offense in 1983 were juvenile arrests outnumbered adult arrests.

Hawaiians, Part Hawaiians and Whites accounted for 63.7 percent of the arrestees. Hawaiians and Part Hawaiians accounted for 36.1 percent and Whites, 27.6 percent. In 1982, Hawaiian/Part Hawaiian also led all race groups.

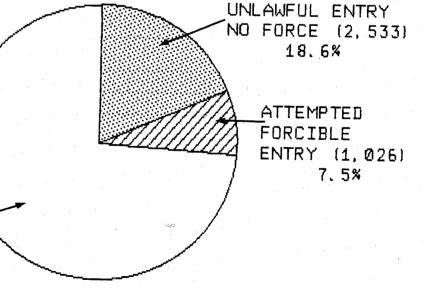

Value

The value of the amount stolen increased slightly (0.7%) despite a decrease in the number of burglaries. The average value per burglary offense in 1983 was \$737. In 1982 the average was \$606.

Definition

<u>د ا</u>

Larceny-theft is the unlawful taking, carrying, leading, or riding away of property or constructive possession of another. It includes crimes such as shoplifting, pocket-picking, purse-snatching, thefts from motor vehicles, thefts of motor vehicle parts and accessories, bicycle thefts, etc., in which no use of force, violence, or fraud occurs. In the Uniform Crime Reporting Program, this crime category does not include embezzlement, "con" games, forgery, and worthless checks. Motor vehicle theft is also excluded from this category inasmuch as it is a separate Crime Index offense.

Year	Number of Offenses	Rate Per 100,000 Population
1982	42,248	4,238.8
1983	38,920	3,803.8
Percent Change	(-7.9)	(-10.3)

Reported larceny-thefts have decreased by 7.9 percent from 42,248 reported in 1982 to 38,920 reported in 1983. This is the lowest number of reported larcenythefts since 1977 and only the second decrease in the past 10 years. The other decrease occurred during the period 1980 to 1981.

All counties reported decreases. Larceny-thefts declined 15.5 percent in Maui County, the largest of all decreases. Larceny-theft was down 7 percent in Honolulu and Kauai Counties and 8 percent in Hawaii County.

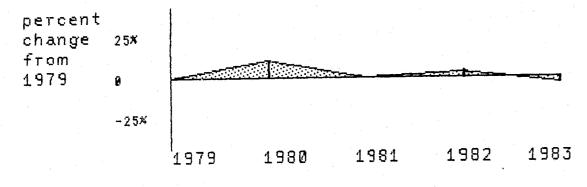

All types of larceny-thefts decreased. Purse-snatching showed the largest percentage decline, 22 percent. Pocket-picking followed, down 18.5 percent.

The following graph shows the percentage change in the total number of larcenythefts for each year compared against 1979. During the 5 year period 1979 to 1983, the largest number of offenses was reported in 1980 and the least in 1983. Larceny-thefts have decreased 4 percent from 1979 to 1983. With the exception of shoplifting, pocket-picking and theft from buildings, the 1983 levels for all types of larceny-thefts are also below their 1979 levels, (see trend graphs for individual types of thefts).

23

Larceny-Theft

Risk

The larceny-theft rate per 100,000 population decreased by 10.3 percent in 1983. This rate is the lowest since 1976. Maui County had the highest rate of all counties, a rate of approximately 5,000 per 100,000 population. Hawaii County had the lowest rate, 3,450 per 100,000.

In 1982 the national rate was 3,070 per 100,000 and the Western States' rate was 3,865 per 100,000. Hawaii's 1982 rate, 4,239 per 100,000, exceeded both the national and Western States' rate, 27.6 percent and 8.8 percent, respectively.

Using 1982 registration data, the chances of having a bicycle stolen is about 4 in 100, the chances of having something stolen from a passenger automobile is about 1 in 100.

Most larceny-thefts were reported during the month of March in 1983 as compared to August in 1982 for both Hawaii and the nation.

Arrests

Arrests for larceny-thefts decreased by 3.2 percent from 8,185 arrests in 1982 to 7,922 arrests in 1983.

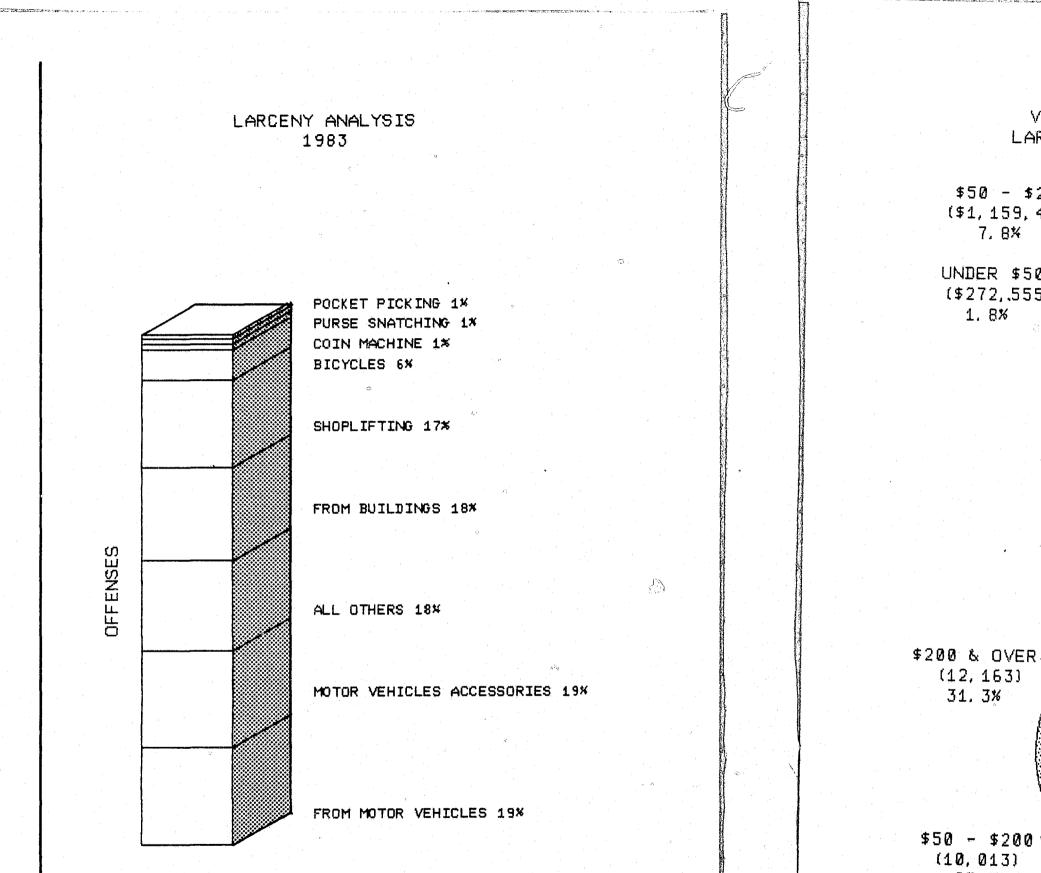

Most of the arrestees, 65.9 percent, were males. The ratio of females to males has remained about the same as it was in 1982.

Most of the arrestees, 62 percent, were adults. This is slightly up from the 59 percent adults in 1982. About 50 percent were 20 years of age or younger. About 24 percent were White and 21 percent were Hawaiian or Part Hawaiian.

Value

was \$370.

The value of goods stolen decreased by 4.4 percent in 1983. Although the number of larceny-theft offenses and total value of goods stolen decreased, the average value per offense increased. In 1983 the average value was \$384 while in 1982 it

Motor Vehicle Theft

Definition

In Uniform Crime Reporting, motor vehicle theft is defined as the theft or attempted theft of a motor vehicle. This definition excludes the taking of a motor vehicle for temporary use by those persons having lawful access.

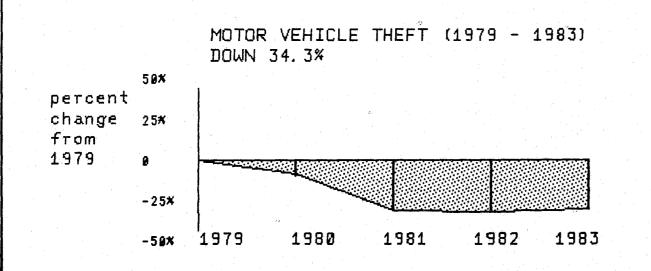

Trend	·	
Year	Number of Offenses	Rate Per 100,000 Population
1982	4,181	419.5
1983	4,297	420.0
Percent Change	2.8	0.1

The number of reported motor vehicle thefts (MVTs), increased 2.8 percent over 1982. This is the first increase since the period 1978 to 1979.

Motor vehicle thefts increased by 5.5 percent for Honolulu. Every other county reported decreases. MVTs were down 21.2 percent for Kauai County, 20.5 percent for Maui County and 7.2 percent for Hawaii County.

The graph below shows that for the 5 year period 1979 to 1983, the number of MVTs was the highest in 1979 and since 1981, the number of MVTs have remained fairly constant.

In the pie chart that follows the graph, automobiles is shown to be the largest component of stolen vehicles.

Risk

lowest, 161.5.

rate.

The chance of having an automobile stolen in Hawaii in 1983 is about 1 in 170 cars. This figure is based on 1982 registrations of passenger cars.

Arrosts

In 1983, 780 arrests were made for motor vehicle thefts, an increase of 9.4 percent over the 713 arrests made in 1982. Males made up 91.4 percent of the arrestees. The number of male arrestees increased by 16.3 percent while the number of women arrested decreased 33 percent.

Juveniles made up a sizable portion of those arrested, 43.0 percent. However the number of juveniles arrested decreased 6.4 percent from 1982. In general people age 20 and under accounted for 68.7 percent of all arrests. In 1982 that group accounted for 72.1 percent.

More than half of the arrestees were Hawaiian/Part Hawaiian or White. Hawaiians and Part Hawaiians accounted for 38.1 percent and Whites, 23.1 percent. Hawaiian/Part Hawaiian also was the race group of people most frequently arrested for MVT in 1982.

31

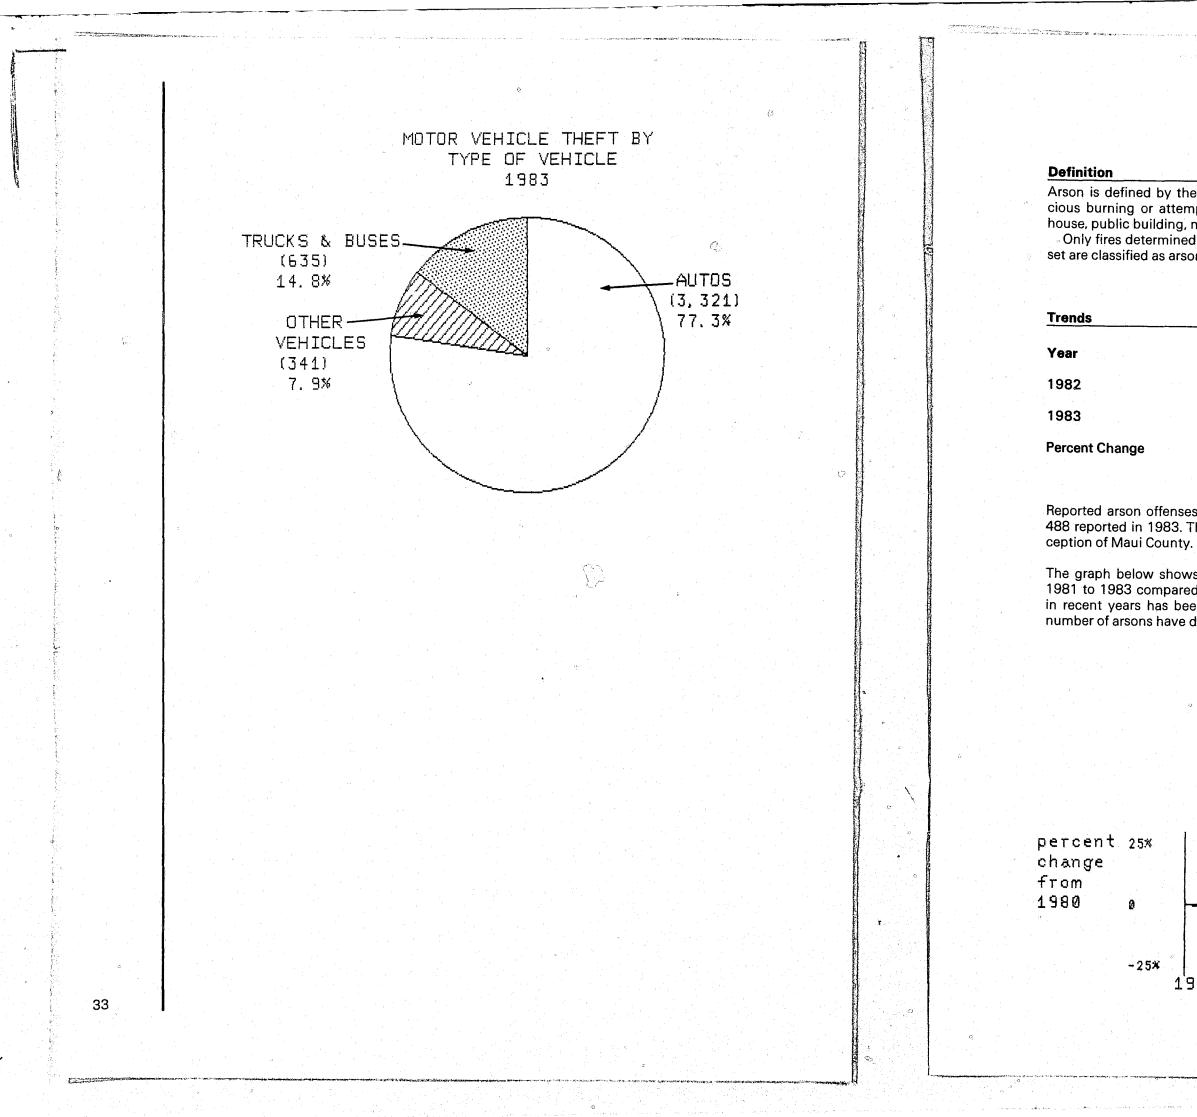

Reported motor vehicle thefts per 100,000 population increased by only one-tenth of one percent (0.1%) in 1983 and has remained fairly stable since 1981. Honolulu had the highest rate per 100,000 population, 476.8, while Kauai County had the

In 1982 the national rate per 100,000 was 453 and for Western States it was 516. Hawaii's 1982 rate of 419.5 was lower than both the national and Western States'

In 1983, most MVTs were stolen in March as compared to August in 1982.

Arson

Arson is defined by the Uniform Crime Reporting Program as any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc. Only fires determined through investigation to have been willfully or maliciously set are classified as arsons. Fires of suspicious or unknown origins are excluded.

Number of Offenses	Rate Per 100,000 Population
438	43.9
488	47.7
10.3	8.7
· · · · · · · · · · · · · · · · · · ·	

Reported arson offenses increased by 10.3 percent from 438 reported in 1982 to 488 reported in 1983. The number of arsons increased in all counties with the exception of Maui County.

The graph below shows the percent change in the number of arson offenses for 1981 to 1983 compared against 1980. It can be seen that the number of offenses in recent years has been below the 1980 level. Overall, from 1980 to 1983, the number of arsons have decreased by 14.7 percent.

Risk

The arson rate per 100,000 population increased by 8.7 percent from 43.9 in 1982 to 47.7 in 1983. The national arson rate was 57.3 per 100,000 in 1982, however because the population covered by agencies reporting arson data is insufficient, it is difficult to estimate the total U.S. arson experience.

In Hawaii in 1983, most arson occurred in March as compared to January in 1982.

Arrests

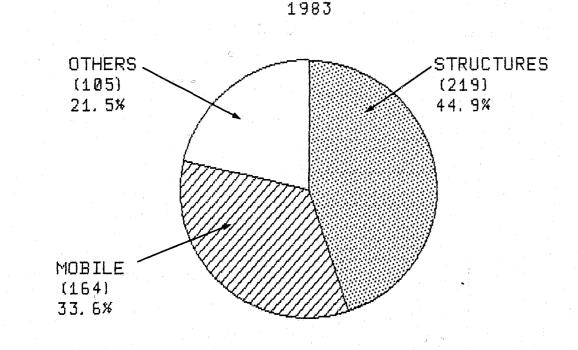

Arrests for arson increased by 66.7 percent from 27 arrests in 1982 to 45 arrests in 1983. Most of the arrestees, 57.8 percent, were juveniles although the percent of iuvenile arrests have decreased from 27 in 1982 to 26 in 1983. All of the increase in arrests for 1983 is attributable to the increase in adult arrests.

Most of the arrestees, 19.1 percent, were male. Most were White followed by Filipinos. In 1982 most arrestees were Hawaiian or Part-Hawaiian.

The following pie chart shows that arson of structures is the most frequent type of arson.

ARSON

NUMBER OF ACTUAL REPORTED OFFENSES

Reported Index Crimes decreased 9.2 percent from 65,448 reported in 1982 to 59,432 in 1983. This is the largest decrease since the period 1980 to 1981. The 59,432 Index Crimes is the lowest reported since 58,549 were reported in 1977. For the 5 year period 1979 to 1983 Index Crimes decreased by 10.3 percent.

Violent crimes increased by 1.5 percent from 2,542 reported in 1982 to 2,579 reported in 1983. Most of this increase is attributable to the increase in aggravated assaults. If aggravated assaults are removed, violent crimes would have decreased by 12.7 percent. Violent crimes increased in Maui and Kauai Counties and decreased in Honolulu and Hawaii Counties.

Property crimes decreased by 9.6 percent. The decrease is attributable to the declines in burglaries and larceny-thefts. Property crimes decreased in all counties.

The rate per 100,000 population for Index Crimes for 1983 is 5,808.4. This rate is the lowest since 1973 and is a decrease of 11.5 percent over the 1982 rate of 6566.5. Maui County had the highest rate, 7,973 per 100,000 and Kauai had the lowest rate, 4979.6 per 100.000.

The national rate for 1982 was 5,553.1 and for Western States, 6,874.6. Western States consist of Arizona, Colorado, Idaho, Montana, Nevada, New Mexico, Utah, Wyoming, Alaska, California, Oregon, Washington, and Hawaii.

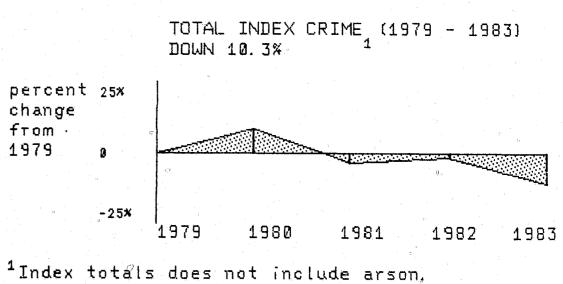

Modified Index Crimes When arson totals are included with other Index Crimes, the 1983 total decreased by 9.1 percent even though the number of arsons increased. Modifying the Crime Index to include arson changes the Crime Index very little because arson accounts for only 0.8 percent of the Crime Index total.

INDEX CRIMES

Adjusted Crime Rate

The rates per 100,000 presented in this publication are based on resident population figures. This allows comparisons to be made with previous reports and with other states and the nation as a whole.

However since Hawaii has a large visitor population on any given day, it would be appropriate to examine an adjusted crime rate that takes the number of visitors into account. The table below presents both the unadjusted crime rate (based on resident population), and the adjusted crime rate (based on de facto population), excluding arson.

Crime Rates: Unadjusted and Adjusted State of Hawaii, 1983

	Unadjusted	Adjusted

.

CLEARANCES

Index Crime offenses can be cleared either by arrest or exceptional means. An offense is cleared by arrest if at least one person is arrested, charged and turned over to the court for prosecution. It should be noted that the number of offenses and not the number of persons arrested are counted as clearances. Several offenses may be cleared by the arrest of one person or the arrest of several people may clear only one crime.

An offense cleared by exceptional means includes cases where the offender dies, the victim refuses to cooperate in the prosecution or when extradition is denied. A complete list can be found in the *Uniform Crime Reporting Handbook*.

Clearances may occur for offenses reported previously.

Percent of Offenses Cleared, 1983 (Arson not included)

Category	Offenses	Cleared	Percent
Murder	57	40	70.2
Rape	301	161	53.5

The following section presents statistics on offenses reported to the Police Departments in the State of Hawaii. Offenses highlighted in this section are the Crime Index Offenses of murder, rape, robbery, aggravated assault, burglary, larceny-theft and motor vehicle theft. Tables 1 through 4 highlight the Hawaii Crime Index, while the remaining tables in this section focus on value of property stolen and recovered. Please note that although arson is a Crime Index Offense, arson is not included in this section.

ARREST STATISTICS

Persons Arrested

The number of persons arrested for all violations except traffic in the reporting jurisdictions is compiled from monthly returns submitted by the contributing agencies. The age, sex and race of these persons is recorded and data are collected for juveniles as well as adults for the purpose of computing arrest trends and volume.

The Age, Sex, and Race of Persons Arrested form is used to collect data on the number of persons arrested and not the number of persons charged. The same person may be arrested several times during a month for similar or several different violations within a jurisdiction; each separate arrest is counted. It is also possible that a person is arrested on several charges at one time; however, in this instance only one arrest is scored.

Race of persons arrested is broken out utilizing the State of Hawaii reporting format. Nationally utilized categories include only White, Black, American Indian or Alaskan Native, and Asian or Pacific Islander. For the State of Hawaii, the categories are further broken down to include Chinese, Japanese, Filipino, Hawaijan/Part Hawaiian, Korean, Samoan and Other.

The following tables present data on persons arrested by age, sex, and race for the State of Hawaii, 1983

Caucasian Negro Indian (American) Chinese Japanese Filipino Samoan Koreen Hawaiian/Part Hawaii Other TOTAL

Table 21 (cont.) Race of Adults Arrested by Offense State of Hawaii, 1983

Table 22 Age and Sex of Juveniles Arrested by Month for Part I and Part II Offenses State of Hawaii, 1983

Juvenile Arrests

This section presents data on juvenile arrests. A juvenile arrest is counted when the situation is such that if the juvenile were an adult, an arrest would be counted. This includes cases where a young person is summoned, cited or notified to appear before the juvenile court, in lieu of actual arrest. Juveniles may be arrested for the additional offenses of "runaways" and "curfew and loitering law violations".

Police Disposition of Juveniles

Unlike arrested adults who are usually held for prosecution or are released for future handling in court, juveniles, depending on the seriousness of the offense and offender's prior record, may be warned and released to parents or guardians. Juveniles may also be referred to the probation agency; to juvenile court; to welfare agencies; to other enforcement agencies; or to adult court. The table below presents police disposition of juveniles by County and type. It should be noted that in cases where total dispositions are less than total arrests, many dispositions were pending at the time of submission of the reports. In cases where total dispositions exceed total arrests, dispositions are reported for juveniles arrested in previous periods.

Police Disposition of Juveniles (Not Including Neglect or Traffic Cases)

	Honolulu	Hawaii	Maui	Kauai	Total

Table 29 (cont.) Race of Juveniles Arrested by Offense State of Hawaii, 1983

UNIFORM CRIME REPORTING DEFINITIONS

Part II Offenses

1. Other Assaults

All assaults other than aggravated are included in this category.

2. Forgery and Counterfeiting

Included in this classification are all offenses dealing with or attempting to deal with the making, altering, or possessing, with intent to defraud, anything false in the semblance of that which is true.

3. Fraud

Fraudulent conversion and obtaining money or property by false pretenses; includes bad checks, confidence games, etc., except forgeries and counterfeiting.

4. Embezzlement

Misappropriation or misapplication of money or property entrusted to one's care, custody, or control.

5. Stolen Property: Buying, **Receiving, Possessing**

Included in this category are all offenses of buying, receiving, and possessing stolen property, as well as all attempts to commit any of these offenses.

6. Vandalism

87

Vandalism consists of the willful or malicious destruction, injury, disfigurement, or defacement of any public or private property, real or personal, without consent of the owner or person having custody or control, by cutting, tearing, breaking, marking, painting, drawing, covering, with filth, or any other such means as may be specified by local law.

This offense covers a wide range of malicious behavior directed at property such as: cutting auto tires, drawing obscene pictures on public restroom walls, smashing windows. destroying school records, tipping over gravestones, defacing library books, etc.

All arrests including attempts are scored as vandalism.

7. Weapons: Carrying, Possessing, Etc.

This class deals with weapon offenses, regulatory in nature, such as: manufacture, sale, or possession of deadly weapons; carrying deadly weapons, concealed or openly; using, manufacturing, etc., silencers; furnishing deadly weapons to minors; aliens possessing deadly weapons.

All attempts to commit any of the above.

8. Prostitution and Commercialized Vice

include in this class the sex offenses of a commercialized nature, such as: prostitution; keeping bawdy house, disorderly house, or house of ill fame; pandering, procuring, transporting, or detaining women for immoral purposes, etc.

All attempts to commit any of the above.

9. Sex Offenses

(Except forcible rape and prostitution and commercialized vice)

Included are offenses against chastity, common decency, morals, etc.; adultery and fornication; buggery; incest; indecent exposure; indecent liberties; intercourse with an insane, epileptic, or venereally diseased person; seduction; sodomy or crimes against nature; statutory rape (no force).

All attempts to commit any of the above.

10. Narcotic Drug Laws

Narcotic drug law arrests are made on the basis of the narcotics used.

The following are subdivisions of narcotic drug law arrests: Included are all arrests for violations of State and local laws, specifically those relating to the unlawful possession, sale, use, growing, manufacturing, and making of narcotic drugs.

(1) opium or cocaine and their derivatives (morphine, heroin, codeine)

(2) marijuana (3) synthetic narcotics - manufactured narcotics which can cause true drug addiction (demerol, methadones)

(barbiturates, benzedrine)

11. Gambling

All charges which relate to promoting, permitting, or engaging in gambling are included in this category.

To provide a more refined collection of gambling arrests, the following breakdown of gambling arrests are furnished:

(1) bookmaking (horse and sport book)

(2) numbers and lottery (3) all other

12. Offenses Against the Family and Children

Included here are all charges of nonsupport and neglect or abuse of family and children: (1) desertion, abandonment, or

nonsupport of wife or child (2) neglect or abuse of child (if injury is serious, score as aggravated

assauit)

above.

And some they are and a set of the set of th

13. Driving Under the Influence This class is limited to the driving or operating of any vehicle or common carrier while drunk or under the influence of liquor or narcotics. Included

(4) dangerous nonnarcotic drugs

(3) nonpayment of alimony All attempts to commit any of the

are: operating a motor vehicle while intoxicated: operating an engine. train, streetcar, boat, etc., while intoxicated.

14. Liquor Laws

With the exception of "drunkenness", liquor law violations, State or local, are placed in this class. included are: manufacture, sale, transporting, furnishing, possessing, etc., intoxicating liquor; maintaining unlawful drinking places; advertising and soliciting orders for intoxicating liquor; bootlegging; operating still; furnishing liquor to a minor or intemperate person; using a vehicle for illegal transportation of liquor; drinking on train or public conveyance.

All attempts to commit any of the above.

15. Drunkennes

Included in this class are all offenses of drunkenness or intoxication, with the exception of "Driving Under the Influence" (Offense No. 14).

(1) drunkennes

(2) drunk and disorderly

(3) common or habitual drunkard (4) intoxication

This class is omitted in the State of Hawaii. There are no arrests made under this section. Chapter 737-1 of the Hawaii Revised Statute was repealed under Act 9, Session Laws of Hawaii, Effective January 1, 1973.

16. Disorderly Conduct

All charges of committing a breach of the peace are placed in this class. Included are: affray; unlawful assembly; disturbing the peace; disturbing meetings; disorderly conduct in State institutions, at court, at fairs, on trains, or public conveyances, etc.; prize fights; blasphemy, profanity, and obscene language; desecrating flag; refusing to assist an officer.

All attempts to commit any of the above.

17. Vagrancy

Persons prosecuted on the charge of being a "suspicious character or person, etc." are included in this class. Included are: vagrancy; begging; loitering (persons 18 and over) vagabondage.

18. All Other Offenses

Included in this class are all other State or local offenses not included elsewhere such as:

(1) admitting minors to improper places

(2) abduction and compelling to marry

(3) abortion (death resulting from abortion is a homicide, offense Class A)

Abortion by a physician is now legal in the State of Hawaii. The crime of abortion (Chapter 768-6, Hawaii Revised Statutes) was repealed under Act 9, Effective January 1, 1973.

(4) bigamy and polygamy

(5) blackmail and extortion

(6) bribery

(7) combination in restraint of trade; trusts, monopolies

(8) contempt of court

(9) criminal anarchism

(10) criminal syndicalism

(11) discrimination; unfair competition

(12) kidnapping

(13) marriage within prohibited degrees

(14) Offenses contributing to juvenile delinquency (except as provided for in offenses 1 to 28 inclusive) such as employment of children in immoral vocations or practices, admitting minors to improper places, etc.

(15) perjury and subordination of perjury

(16) possession, repair,
 manufacture, etc. of burglar's tools
 (17) possession or sale of obscene

literature, pictures, etc.

(18) public nuisance

(19) riot and rout

(20) trespass

(21) unlawfully bringing weapons into prisons or hospitals

(22) unlawfully bringing drugs or liquor into State prisons, hospital, etc.; furnishing to convicts

(23) unlawful disinterment of the dead and violation of sepulture

(24) unlawful use, possession, etc., of explosives

(25) violations of State regulatory laws and municipal ordinances (this does not include those offenses or regulations which belong in the above classes)

(26) violation of quarantine

All offenses not otherwise classified

All attempts to commit any of the above.

19. Suspicion

While "suspicion" is not an offense, it is the ground for many arrests in those jurisdictions where the law permits.

After examination by the police, the prisoner is either formally charged or released. Those formally charged are entered in one of the Part I or II Offense Classes. This class is limited to "suspicion" arrests where persons arrested are released by the police.

20. Curfew and Loitering Laws - (Juveniles)

All arrests made for violation of local curfew or loitering ordinances.

21. Runaway - (Juvenile)

For purposes of the Uniform Crime Reporting Program, reported in this category are apprehensions for protective custody, as defined by your local statute. Arrests made by other jurisdictions of runaways from your jurisdiction are also counted. Not included are protective custody actions with respect to runaways taken for other jurisdictions.
