Preface

The 1983 edition of Capital Punishment, a serial publication in the National Prisoner Statistics (NPS) program, provides data on the Nation's death-row population and on the legal status of death penalty laws.

As in past editions, it examines basic sociodemographic classifications—age, sex, race and ethnicity, marital status at time of imprisonment, level of education, and State and region of incarceration—and describes the main judicial decisions during the past year. The criminal justice matters treated include offense, time spent on death row, and for those removed from death row, both the method of removal and status at yearend. Also reported were data on statutory changes in each jurisdiction, methods of execution, automatic appeals for persons receiving the death sentence, and whether there is a minimum age at which it can be imposed. This year's report provides data on the criminal histories of the persons on death row, such as the number with prior felony convictions and prior convictions for homicide and the criminal justice status of the offenders at time of capital offense.

Appendix I surveys the current status of capital punishment and the history of death penalty laws in each jurisdiction. The data tables on which the report is based are in Appendix II. Appendix III, Methodology, discusses data collection procedures and changes made in the questionnaires during the past several years.

Based on voluntary reporting, the NPS program collects and interprets data on State and Federal prisoners. Begun by the Bureau of the Census in 1926, the program was transferred to the Bureau of Prisons in 1950, the Law Enforcement Assistance Administration (LEAA) in 1971, and the Bureau of Justice Statistics (BJS) late in 1979. Since 1972, the Bureau of the Census, as the collecting agent for LEAA and BJS, has had responsibility for compiling the relevant data.

Five persons were executed during 1983, bringing to 11 the total executed since the reinstatement of capital punishment in 1972 (figure 1).¹ This increase in the pace of executions came as many inmates on death row neared the end of a series of appeals and as the courts became increasingly reluctant to sanction a lengthy appeals process in capital punishment cases.

The executions that took place during 1983 brought to 3,870 the total conducted under civil authority in the United States since national reporting began in 1930 (figure 2).² After 1967, an unofficial moratorium on executions prevailed as legal challenges to the death penalty were pressed at various court levels. There were no executions until 1977, when one occurred. Two more followed in 1979, one in 1981, and two in 1982. Two-fifths of all executions since 1930 have taken place in five States, each with over 200 executions (figure 3).

Capital punishment in the courts

The number of successful challenges to the constitutionality of capital punishment laws has dropped off sharply in the past several years as guidelines set down in U. S. Supreme Court cases during the 1970's became incorporated into State capital punishment laws. In the 1972 decision in *Furman v. Georgia*, the Supreme Court for the first time struck down a State capital punishment law as unconstitutional under the Eighth Amendment. Five justices, in as many opinions, found the Georgia capital punishment law objectionable for a number of reasons, most of which were related to the arbitrary application of the death sentence. Many States responded by adopting new laws designed to answer the Court's objections.

In 1976, in five cases considered together, the Court addressed these new laws and attempted to clarify its decision in *Furman*. In *Woodson v. North Carolina* and *Roberts v. Louisiana*, the Court struck down as unconstitutional State laws that eliminated all discretion from the sentencing process

by imposing a mandatory death penalty for specific crimes. However, in *Gregg v. Georgia*, *Jurek v. Texas*, and *Proffitt v. Florida*, the Court upheld laws that provided guidelines to assist the sentencing authority in exercising the required discretion as it considers aggravating and mitigating circumstances surrounding the crime.

Further refinements were provided in a number of cases that reached the U.S. Supreme Court in the late 1970's and early 1980's. By 1982, few cases before the Court had the potential for producing the broad application of earlier decisions. In 1982, and again in

1983, no one was removed from death row because a State capital punishment law had been declared unconstitutional.

During 1983, one of the more important remaining issues in capital punishment was brought to the U. S. Supreme Court—that of proportionality. Proportionality, in the sense that capital punishment must not be excessive and disproportionate given the type of crime, had been mentioned in the plurality opinion of Justice Stewart in *Gregg v. Georgia* as being part of Eighth Amendment death penalty analysis. However, the concept that States

must make punishment for a crime similar to sentences for similar crimes committed by offenders with similar characteristics had not yet been addressed by the Nation's highest court.

Early in 1984, the U. S. Supreme Court ruled in Pulley v. Harris that a proportionality review by a court of statewide jurisdiction is not a Constitutional requirement. Although many State death penalty laws provide for such a review, the court ruled that the Eighth Amendment does not require it as an invariable rule in every case. The Court held that California's death penalty statute and similar post-Furman laws, while perhaps "occasionally producing" aberrational outcomes, were "a far cry from the major systemic defects identified in Furman," and thus passed constitutional muster under the Eighth Amendment.

Three important cases were handed down by the U.S. Supreme Court on July 6, 1983: California v. Ramos, Barclay v. Florida, and Barefoot v. Estelle. In 1982, the California Supreme Court had ruled (in People v. Ramos) that a required instruction to the jury that a life sentence without parole could be commuted by the Governor rendered the State's death penalty law unconstitutional under the Eighth Amendment of the Federal Constitution. However, the U. S. Supreme Court reversed that decision and held that the Federal Constitution does not prohibit such instructions to the jury. By bringing to the jury's attention the possible commutation of a life sentence, the instruction, the Court said, "invites the jury to assess whether the defendant is someone whose probable future behavior makes it undesirable that he be permitted to return to society..." Such considerations were approved of in Jurek v. Texas, but were emphasized as appropriate in California v. Ramos.

The Barclay case dealt with violations of State law committed during sentencing proceedings in capital punishment cases. In Barclay, the trial judge sentenced the defendant to death on the basis of several considerations. One of these, the defendant's past criminal record, was improper under the capital punishment statute. The Florida Supreme Court had upheld the sentence because under "harmless error analysis" it was clear that the judge's improper use of the defendant's record was a harmless error that did not alter the final sentence. On review, the Supreme Court upheld the Florida decision.

The Barefoot case was notable both because it upheld the admissibility of psychiatric evidence predicting future dangerousness and because the High Court approved the acceleration of the appeals process in capital cases. The Court used Barefoot to establish general guidelines for habeas appeals of capital sentences. The Court held that a strong showing that a federal right has been denied is needed to obtain a certificate of probable cause, and that even with the certificate, the court of appeals may expedite its consideration of the merits of habeas appeals. Thus, the court of appeals may deny an application for a stay of sentence if, in doing so, it determines that the defen-

dant lacks substantial grounds on the merits; such procedures were held especially appropriate where the petition is a second or successive collateral attack.

On October 11, 1983, the U.S. Court of Military Appeals, the Nation's highest military court, ruled that sentencing procedures in the Uniform Code of Military Justice did not conform to U. S. Supreme Court guidelines set down in the 1972 and 1976 landmark decisions. As a result of this decision, U.S. v. Matthews, the death sentences of seven men condemned under court-martial procedures were removed. New regulations remedying the defects in the code were promulgated in an executive order effective January 24, 1984.

Among the issues still pending at yearend 1983 were the effectiveness of counsel in capital cases, the practice by trial judges of overriding a jury's sentence recommendation, and the admissibility of research findings of racial discrimination in the imposition of the death penalty.

Massachusetts, which had an earlier law struck down in 1980, enacted a new law effective January 1, 1983, so that by the end of 1983, 38 States and the Federal government had laws authorizing the death penalty. This was the largest number of jurisdictions authorizing the death penalty since it was declared unconstitutional in 1972.

Persons under sentence of death at yearend 1983

The number of persons under sentence of death at yearend 1983 was 1,202, a 13% increase over yearend 1982 (figure 4). During 1983, 252 persons received the death penalty and 113, including the 5 executed, were removed from death row. The 252 death penalties imposed during 1983 was higher than in any other year since at least 1968 except 1982. The number removed from death row during 1983 was higher than in the four previous years.

Since 1953, when the official count of those under sentence of death began, the number under sentence at yearend has increased almost tenfold (figure 5). The buildup on the Nation's death rows initially coincided with the legal challenges to the death penalty in the 1960's. All persons under sentence of death at the time of the 1972 Supreme Court decisions were eventually removed from death row. The buildup

began anew as offenders were sentenced under laws passed after the 1972 and 1976 landmark decisions, marking the sharpest rise in the number of death-row inmates since data were first compiled.

All death-row prisoners remaining under sentence at yearend had been convicted of murder. One-third of the 902 persons under sentence of death for whom the information was available were already under sentence for an-

other crime when arrested for capital murder. Most of them (19% of those reporting) were on parole, while 6% were on probation, 4% serving time in prison, 3% on escape, and 2% on various other types of prison release. Two-thirds of all death-row prisoners had been convicted of felonies before they were charged with a capital crime.

Of the 38 States authorizing the death penalty, 33 had prisoners under sentence of death at yearend 1983, more States than in any previous year. Five States (Connecticut, Massachusetts, New Hampshire, South Dakota, and Vermont) and the Federal system had death penalty laws on their books but no one on death row. No one has been under sentence of death in Federal facilities since 1977.

The 1,202 persons on death row were concentrated, as in previous years, mainly in the South, which held almost two-thirds of all death-row prisoners. Some 21% were held in correctional facilities in the West, 11% in the North Central States, and 3% in the Northeast. The States with the largest numbers on death row were

NOTE: States not listed and the District of Columbia did not have the death penalty as of 12/31/83. Some of the figures shown for year-end 1982 are revised from those shown in *Capital Punishment 1982* (final report), NCJ-91533. The revised figures include 23 inmates who were reported late to the NPS program or who were not in the custody of State correctional authorities by 12/31/82 (8 in Louisiana, 6 in Georgia, 2 in Alabama, and 1 each in Delaware, Illinois, Nevada, Oklahoma, Pennsylvania, Tennessee, and Texas), and exclude 10 inmates relieved of the death sentence before 12/31/82 (3 in Florida, 2 each in Mississippi and Tennessee, and 1 each in Arkansas, Georgia, and Oklahoma).

* 1983 executions: 1 each in Alabama, Florida, Georgia, Louisiana, Mississippi.

¹ Includes five inmates who died of natural causes (one each in Alabama, Florida, Georgia, Louisiana, and Mississippi), three who committed suicide (one each in California, Colorado, and Texas), and one who was killed attempting to escape while on a court appearance (Texas).

² Excludes prisoners held under Armed Forces jurisdiction. Six such prisoners who were under sentence on 12/31/82 and one who was sentenced during 1983 were relieved of the death sentence on 10/11/83, leaving no one under military death sentence at yearend 1983.

Figure 5

Florida (193), Texas (163), California (149), and Georgia (102) (figure 4). Nine States held between 25 and 99 inmates under sentence of death; 10 held between 10 and 24 inmates; and 10 held between 1 and 9 inmates.

About a fifth of those on death row at yearend had received sentences during 1983. The median time on death row was 28 months, but almost 3 in 10 inmates had spent at least 4 years under sentence of death by yearend, including 143 persons with 6 years or more on death row. The median age of death row prisoners was about 31 years, although the ages ranged from 17 to 82.

There were 500 black inmates under sentence of death in 1983. Since 1978, the proportion of death-row inmates who were black has remained about 2 in 5. Between 1968 and 1975, the proportion exceeded 50%; it dropped to 46% in 1976, 45% in 1977, and 41% in 1978. Blacks also amounted to about 2 in 5 inmates receiving new death sentences in 1983. Since 1968, the proportion of those receiving death sentences each year who were black ranged from 38% to 62%.

The 13 women on death row at yearend 1983 amounted to about 1% of all death-row inmates. Their number has more than tripled since 1972 (figure 6).

An increase in the number of Hispanics on death row brought to 72 the number of Hispanic death-row inmates at yearend 1983. Twelve States held at least one Hispanic under sentence of death with the largest numbers being held in States with relatively large Hispanic populations: California (24), Texas (20), Florida (8), and Arizona (6). Hispanics have generally averaged about 6% of the total death-row population in the United States since data on ethnicity were first collected in 1978. Their increase on death row in relation to most non-Hispanics (about twice as fast since 1978) may in part reflect improved reporting on ethnicity.

Like that of most State prisoners, the educational level of death-row inmates was generally low; only 41% had completed high school, while 1 in 10 had not graduated from the eighth grade. Most death-row prisoners were not married; some 44% had never married, 20% were divorced or separated, and 2% were widowed.

Figure 7

Persons sentenced to death during 1983

Twenty-seven States, one less than in 1982, imposed death sentences during 1983. The number of new death sentences imposed fell from 281 in 1982 to 252 in 1983, a decline of over 10%.³ New York imposed its first death sentence since 1977 and New Jersey its first since a new law was enacted in 1982. Montana and Utah were the only other States that imposed sentences of death in 1983 but not 1982. Five States that had new death-row prisoners in 1982 imposed no death sentences in 1983: Colorado, Delaware, Idaho, Maryland, and Wyoming.

Three women were sentenced to death during 1983, two in Ohio and one in Alabama. Ohio last had women on death row in 1978, when four women had death sentences lifted when Ohio's law was found to be unconstitutional. Alabama had begun the year with one woman on death row.

³Each year, some death sentences from previous years are reported for the first time, so the magnitude of the decrease may be lessened after the 1983 figures are revised.

Eighteen Hispanics received death sentences in 1983, the largest numbers being sentenced in California (6), Texas (4), and Florida (3).

The median age of those newly sentenced to death was just over 27 years, slightly higher for whites and slightly lower for blacks. With the exception of their being younger on the average, inmates sentenced in 1983 were similar in most other characteristics to those already on death row.

Persons leaving death row during 1983

In all, 21 States had a combined total of 113 persons removed from death row during 1983. Ten States (Delaware, Idaho, Indiana, Kentucky, Missouri, Montana, New Mexico, Ohio, Utah, and Wyoming) had no removals, although they began the year with prisoners under sentence of death.

Of the 113 inmates who left death row—

- 60 had their sentences lifted but convictions upheld
- 28 had their sentences and convictions vacated
- 11 had their sentences commuted

- 5 were executed
- 5 died of natural causes
- 3 died by suicide
- 1 was killed while attempting escape

The five persons executed spent from 4-1/2 to 10 years on death row, with an average stay of 7 years and 2 months. In addition to the five who were executed, five persons died of natural causes, three committed suicide, and one was killed attempting to escape while in court. Since the major capital punishment decisions handed down by the Supreme Court in 1976, the number removed from death row has dropped each year with two exceptions--1980 (when 42 persons were removed from Alabama's death row after a major court decision there) and 1983.

Over half of the 99 persons no longer under sentence of death at the end of the year were serving reduced sentences (almost all of them life). Twenty-one persons were still awaiting retrial and 19 persons were awaiting resentencing. One person had all capital charges dropped.

The median time spent on death row by those who left during 1983 was 38 months. For the first time since the death row buildup began anew after 1976, the median time was lower than that of the previous year. More than half of the removals occurred in three of the four States with the largest death-row populations, Florida, Georgia, and Texas. California, with the Nation's third largest death-row population, had four removals from death row during 1983.

Death penalty laws in 1983

During 1983, 11 States modified existing death penalty statutes. Six of the 11 changed those sections of the law relating to the method of execution. Four States (Arkansas, Montana,

North Carolina, and Utah) added lethal injection as a method of execution; Illinois changed from electrocution to lethal injection and Nevada from gas to lethal injection. For the remaining five States, the changes were mainly of a technical nature, including renumbering sections of the law, changing words, and correcting citations. Indiana added a new aggravating circumstance to its capital punishment law: that of murder committed by a person serving a prison term with at least 20 years of time remaining.

Fourteen States provided for more than one method of execution, usually lethal injection or an alternate method, at the election of the condemned prisoner (figure 7). Electrocution was the most common method of execution provided for in the statutes; 18 States had electrocution as a method of execution. Lethal injection was permitted in 13 States; lethal gas in 8 States; hanging in 4 States; and a firing squad in 2 States. Some States have anticipated the possibility that lethal injection may be found unconstitutional by providing for an alternate method. Each of the other four methods challenged on Eighth Amendment grounds as cruel and unusual punishment have been found constitutional.

Almost all death penalty statutes provide for an automatic review of all death sentences. Some require a review of both conviction and sentence while others require only a review of the sentence. Typically, the review is undertaken by the State supreme court and results in affirming or vacating the conviction alone or both the conviction and sentence. If either the conviction or the sentence is vacated, the case may be remanded to the trial court for additional proceedings. Some statutes also allow the State supreme court to commute a death sentence to life imprisonment.

In some States, a minimum age for the imposition of the death penalty is cited in State law; in others, the minimum age is, in effect, the youngest age at which a juvenile may be transferred to adult court by judicial waiver. In South Dakota, for example, 10 is the youngest age at which a juvenile may be waived to adult court, and thus, at least technically, the youngest age at which the death penalty may be imposed. At the opposite extreme, in New York only persons over age 18 may be executed. The majority of States put the age limit at 15 to 18, with 18 being the most prevalent age. However, a number of States have neither a specific age at which a juvenile may be transferred to criminal court by judicial waiver nor a minimum age at which the death penalty may be imposed. In such States, the decision to file capital charges against youthful defendants is at the discretion of the prosecutor.

Methodological note

Statistics in this series may vary from other death-row counts for any of the following reasons:

Inmates are not added to the NPS death-row counts at the time the court hands down sentence, but at the time they are admitted to a State or Federal correctional facility.

Inmates sentenced to death under statutory provisions later found unconstitutional are removed from the death-row count on the date of the relevant court finding rather than on the date the finding is applied to individual cases. Thus, persons who are technically under sentence of death, but who are no longer at risk, are not counted.

NPS death-row counts are always as of the last day of the calendar year and will therefore differ from estimates made for more recent periods.

Status of death penalty statutes, by jurisdiction, December 31, 1983

General note

Most death penalty laws in force prior to the *Furman v. Georgia* decision of June 29, 1972, provided for the imposition of the death penalty for murder, and, in some States, one or more additional crimes. In that decision, the U.S. Supreme Court found that the death penalty, as then being administered, was "cruel and unusual punishment" in violation of the Eighth Amendment of the U.S. Constitution. Many States revised their laws to conform to standards set by the Furman decision and, subsequently, by other decisions that determined the validity of revised statutes. Since Furman, critique of individual States' statutes has continued as appeals of capital sentences reached State courts or the U.S. Supreme Court.

Under the revised State laws, the different types of capital murder have been specifically defined. Although varying somewhat from one jurisdiction to another, the kinds of homicide most commonly specified are murder perpetrated during the commission of another felony; murder of a peace officer, corrections employee, or fireman engaged in the performance of official duties; murder by an inmate serving a life sentence; and murder for hire. Different statutory terminology may be used by different States to designate substantively identical crimes; in some States but not necessarily all, such terms as "murder," "1st degree murder," "murder Class A felony," etc., may denote the same offense. While there are other offenses which carry the death penalty, most have not yet had their constitutionality tested.

¹In this category, the eight Federal executions were for sabotage (six) and espionage (two). The nine executions in North Carolina and the two in Alabama were for burglary. In California, the six executions were for aggravated assault committed by prisoners under life sentence.

²As States, Alaska and Hawaii are included in the series beginning January 1, 1960.

NOTE: Figures for 1980 through 1982 have been revised from those reported in Capital Punishment, 1982, NPS Bulletin SD-NPS-CP-11, December 1983. In addition, as a result of a major procedural change regarding dispositions, the number of dispositions other than execution and the number of persons under sentence of death in 1976 and subsequent years are not strictly comparable to corresponding data for earlier years. See Methodology for explanation.

NOTE: This table identifies the legal or other event effectively terminating the death sentence. Status as of reporting date is indicated in Table 18.

- Represents zero.

¹Persons in this category are subject to further administrative and legal steps before final disposition. This process could result, for example, in a commutation of sentence or in the vacation of sentence with either affirmation or voiding of conviction (see Footnote 3 for further discussion).

²The category "Death Other than Execution" includes 9 deaths. Five (one each in Virginia, North Carolina, Georgia, Florida and Louisiana) were of natural causes; three were suicides (Texas, Colorado and California) and one in Texas was killed during an attempted escape while out to court.

³Commutation effects an immediate change in sentence from death to life or a term of years.

⁴Persons whose capital sentence is vacated or whose capital sentence and conviction are vacated are subject to further legal proceedings (such as resentencing if the conviction has been vacated) to determine their ultimate disposition. Neither the vacating of the sentence nor the vacating of both sentence and conviction precludes the possibility of reimposition of the death sentence.

⁵Persons enumerated under "All Other Races" were Asian.

NOTE: This table identifies the status of persons removed from death row during the year as of reporting date. Disposition is final only for those who are serving reduced sentences, are deceased, have been found not guilty, or who have had all charges on the capital offense dropped. Persons in each of the other categories are subject to further legal proceedings prior to final disposition.

- Represents zero.

¹The category "Decensed" includes 14 deaths: 5 by execution (Georgia, Florida, Alabama, Mississippi and Louisiana); 5 from natural causes (Virginia, North Carolina, Georgia, Florida and Louisiana); 3 by suicide (Texas, Colorado and California); and 1 person in Texas who was killed attempting to escape while out to court.

²Persons enumerated under "All Other Races" were Asian.

NOTE: For persons who were resentenced to death during 1983 after having been relieved of the death sentence prior to 1983, the time elapsed is calculated from the most recent sentence date only; thus, the person's total time on death row is understated. There were 9 such cases in Texas (2 originally sentenced in 1975, removed in 1982, 1 sentenced in 1976, removed in 1979, 2 sentenced in 1977, 2 in 1978, 1 in 1979, 1 in 1981, removed in 1982) resented in 1983 and 2 in South Carolina (sentenced in 1980, removed in 1982) and resented to death in 1983. For those persons relieved of the death sentence and resented within the same year, time elapsed is calculated from the original sentence date and, thus, is slightly overstated. There were no such cases reported for 1983.

¹The longest amount of time served on death row by those under sentence of death at the end of 1983 was 119 months, served by a black inmate sentenced in January 1974 in Florida.

²Persons enumerated under "All Other Races" were 7 American Indians and 5 Asians.

Methodology

This report is based mainly on data obtained through a mail canvass of the Federal Bureau of Prisons and correctional authorities in the 50 States and the District of Columbia. Information on the legal status of the death penalty and on methods of execution was obtained through a questionnaire mailed to the office of the Attorney General of each jurisdiction. All responded.

Capital Punishment covers all persons under sentence of death at any time during the year and held in a State or Federal nonmilitary correctional facility. The coverage includes capital offenders transferred from prison to such noncorrectional institutions as mental hospitals and those who may have escaped from custody (no such prisoners were reported for 1983). Not included are capital prisoners who for any reason remain in local correctional institutions outside the jurisdiction of the State or Federal correctional authorities from whom data for this series are obtained.

A major procedural change introduced in 1976 was continued through 1982. Beginning with 1976, inmates sentenced to death under statutory provisions later found unconstitutional are removed from the death row count at the time of the relevant court finding rather than when the finding is applied to the individual case, as had been the practice before 1976. As a result of this change, statistics for two items for 1976 and after are not strictly comparable with statistics for those prior to 1976. The items are: The length of time elapsed from sentencing to disposition in the case of those removed from under the death penalty, and the amount of time expired since sentencing in the case of those still on death row at yearend. This change also precludes strict comparability between data for 1976 and after and pre-1976 data on the number of persons removed from death row and on individuals remaining under sentence of death at yearend.

Two other changes in concept and format differentiate 1977-83 information from data reported in earlier issues of this report. For

persons removed from death row, respondents were asked, as in previous years, to supply information about disposition. Prior to 1971, the "method of disposition" was displayed exactly as reported to the NPS program (e.g., indictment dismissed or judgment reversed, commuted to life or term of years, resented to life or term of years, new trial granted or resentencing ordered, etc.). Between 1971 and 1975, the specific method of disposition reported by respondents was not tabulated in the report; rather, persons removed from the death row count were listed under one of two categories: "removed from death row" or "died." In 1976, a single table displayed either the method of removal or, in the case of inmates who had undergone further processing after removal from death row, the yearend status (see table 12, Capital Punishment 1976). Beginning in 1977, respondents were asked to report, for each person relieved of the death sentence, both the "method of removal" (table 17) and the "yearend status" in the followup process (table 18). In 1976, for example, a prisoner whose capital sentence was vacated as a result of the nullification of a death penalty statute and who received a reduced sentence before yearend was tallied only once, i.e., under "reduction of sentence" (table 12, Capital Punishment 1976); beginning in 1977, a prisoner experiencing this sequence of events was tallied both in table 17 (under "sentence provisions of State statute struck down") and in table 18 (under "serving reduced sentence"). Because method of disposition information beginning in 1977 included both method of removal and yearend status for each prisoner relieved of the death sentence, it is not comparable with that for 1976 nor with that for the years prior to 1971. Because no detail was published in the 1971 through 1975 issues, no such comparison is possible.

A second procedural change was initiated in the 1977 issue of this report to improve the methods of revision and removals of capital prisoners reported a year or more late to the NPS program.

Previously, such transactions were simply added to or deleted from the January 1 count of the year in which the report was received, without, however, adjusting the data on admissions, removals, or net yearend figures for the year in which the transactions actually occurred. Beginning with the 1977 report, the relevant data are presented to reflect such adjustments, and figures for previous years have been comparable revised to provide a consistent basis for assessing historical trends (table 6). Because of the time lag likely to occur between the receipt of the death penalty and transfer to a State correctional facility, the figures for recent years are subject to revision.

The collection of data on ethnicity (i.e., Hispanic or non-Hispanic origin) started with the 1977 enumeration, and the characteristic is determined irrespective of race. Hispanic origin is defined in the instruction to item 4b, Form NPS-8. The count of Hispanic inmates may be subject to error, as correctional authorities in some jurisdictions maintain such information as a matter of record, whereas those in other jurisdictions make a determination solely on the basis of surname inspection.

Overall, coverage on questions of legal status at time of arrest and prior felony history has been available for about 8 out of 10 prisoners since these items were first incorporated in the questionnaire in 1977.

The 1983 questionnaire was the fourth to ask for information on homicide convictions for inmates with a history of prior felonies (see item 10b, Form NPS-8). For those under sentence at yearend, the type of felony was reported in 70% of the cases, up from 61% the previous year. For those removed from death row during 1982, coverage was inadequate (54%), but was better (94%) for those newly sentenced to death.

For the third year in a row, States reported whether their death penalty laws provided for an automatic appeal from death sentences (see Item 7, Form NPS-8B and NPS-8C); coverage for this item was complete.

Questionnaire

INSTRUCTIONS

Please complete one card for each person who (1) entered your State's correctional system under sentence of death at any time during the report year, or (2) had received a sentence of death in a previous year but was not previously reported. Attempt to answer all items.

Item b. Card of Cards — Complete this item to insure proper accounting of all persons under sentence of death in your correctional system who have not been previously reported.

Example: *If you are reporting 4 persons who were given a sentence of death during the report year, or had not been previously reported, and this card relates to the third person reported, you would enter: Card 3 of 4 Cards*

Item 4a. Race

- (1) **White** — A person having origins in any of the original peoples of Europe, North Africa, or the Middle East.
- (2) **Black** — A person having origins in any of the black racial groups of Africa.
- (3) **American Indian or Alaskan Native** — A person having origins in any of the original peoples of North America, and who maintains cultural identification through tribal affiliation or community recognition.
- (4) **Asian or Pacific Islander** — A person having origins in any of the original peoples of the Far East, Southeast Asia, the Indian Subcontinent, or the Pacific Islands. This area includes, for example, China, India, Japan, Korea, the Philippine Islands, and Samoa.
- (5) **Other** — Any other race not covered by the above categories. Please specify the race in the space provided.

Item 4b. Hispanic Origin — Hispanics are defined as those having an ethnic origin or background in Central America, South America, Mexico, Cuba, Puerto Rico, or Spain.

Item 5. Date of Birth — Enter two digits for month (January=01, February=02, etc.) and last two digits of year.

Item 6. Capital offense for which imprisoned — Mark all and only those offenses for which capital punishment was originally levied.

Item 7. Marital status at time of first imprisonment for capital offense — "Time of first imprisonment" refers to the inmate's original time of arrival at

prison after his first sentencing to death. Separated does not include separation for reason of imprisonment.

Item 8. Highest year of education completed at time of first imprisonment for capital offense — Time frame as in Item 7 above. Include Graduate Equivalent Degree (GED) as "12th grade."

Item 9. Legal status at time of capital offense — If the person was known to be free in all States with no charges pending at the time of the offense, mark "Not under sentence — no charges pending."

If the person was charged but not sentenced, e.g., out on bail, mark "Not under sentence—charges pending."

If person was under sentence (not merely charged) at time of offense, mark "On probation," "On parole," "Imprisoned," "On escape," or "Other" as appropriate.

Item 11. Date of original conviction for capital offense — Enter the first month and year (digits as in item 5) in which the person was found guilty of the capital offense. **DO NOT** enter the date of appeal rejections or prison admission.

Item 12. Date of first sentence for capital offense — Enter the month and year (digits as in item 5) after the person's original conviction in which inmate was first sentenced to death.

Item 13a. Inmate status on December 31, 19— Indicate whether or not the inmate was under sentence of death at the end of the report year.

Item 13b. If inmate was under sentence of death on December 31, indicate if the inmate was on escape or at a mental hospital. Enter the month and year of escape or transfer to mental hospital.

Item 13c. Manner of removal from sentence of death — Complete this item only if sentence of death was removed during the calendar year. Mark the box which most accurately describes how the inmate was initially removed from sentence of death.

Item 13d. Current status of inmate removed from sentence of death — Mark the one box which most accurately shows the inmate's legal status as of THE DATE THIS REPORT IS COMPLETED. If "Under new sentence" enter new sentence.

FROM THE ACTING DIRECTOR
BUREAU OF THE CENSUS

The Bureau of the Census has been requested by the Bureau of Justice Statistics (BJS), formerly LEAA, to collect data annually on inmates under sentence of death in the 50 states, the District of Columbia, and the federal system. This program is authorized by title 42, United States Code, sections 3732 and 3789. These inmate data are collected from correctional and prison personnel. In addition, the Bureau also compiles information for a descriptive table on the current status of the death penalty in the 52 jurisdictions. This information is requested from the office of the chief legal officer of each jurisdiction.

The report period covers January 1, 1983, through December 31, 1983. Please complete and return the report by February 16, 1984, to expedite timely publication of the data.

Should you have any questions regarding the completion of this voluntary report, please call collect for assistance on (301) 763-2061.

Sincerely,

C. L. KINCANNON

Announcing the new Fact-Finding Service

Need a specialized report—one tailor-made just for you?

The National Criminal Justice Reference Service's new **Fact-Finding Service** is your solution. Get answers to your hard-to-find criminal justice questions in a report tailored just for you.

We'll gather the facts and figures using BJS resources, NCJRS resources, professional associations, news articles, juvenile justice agencies, or whatever it takes to find the answers. We then send you a full report that matches your specific needs.

Examples of reports:

- statistical tables and graphs with explanatory text;
- State-by-State program or legislative information presented in an easy-to-read format;
- specialized directories or listings of justice agencies, organizations, or instructions;
- crime trend information over a specified period of time.

Prices:

Your cost for the **Fact-Finding Service** covers actual expenses only. Prices are determined by the time needed to respond to your request. A request that requires up to 5 hours could cost between \$75 and \$250.

Call NCJRS with your request. An information specialist will estimate the cost. We can begin work as soon as we have your approval.

Suppose you needed to know. . .

Now you can have the answers to these and other burglary questions at your fingertips with the **Criminal Justice Information Package—Burglary Statistics**.

This innovative package produced by the Bureau of Justice Statistics/ National Criminal Justice Reference Service contains:

- Descriptions of the two major sources of burglary statistics: the FBI's Uniform Crime Reports and the Bureau of Justice Statistics' National Crime Survey. This succinct narrative also answers some of the most commonly asked questions about burglary and gives sources for the data.
- Two issues of the *Bureau of Justice Statistics Bulletin*, each one packed with current information

on burglary occurrences and trends. The issues are *Household Burglary* (February 1985) and *Households Touched by Crime, 1984* (June 1985).

- A list of printed sources for further research.
- Contacts and referrals.

☒ How many residential burglaries occurred in 1984?

☒ How often violent crimes are committed in the course of a burglary?

☒ Are particular groups more likely to be victimized by burglary than others?
