John A. Johnson, Director Edward J. Bartley, Exec. Deputy Director

NEW YORK STATE EXECUTIVE DEPARTMENT

DIVISION FOR YOUTH

CAPITAL VIEW OFFICE PARK 52 WASHINGTON STREET RENSSELAER, NY 12144

August, 1996

To the Governor and the People of New York State:

I am pleased to present *Youth In Care*, the Division for Youth's 1995 Annual Report. The report contains useful information regarding adjudicated youth in both residential and non-residential programs within the Division's rehabilitation system. This comprehensive overview of the Division's services to the youth of New York State displays data on admitted, in-custody and discharged youth. The utility of the Annual Report is further enhanced by the inclusion of ten-year trends on selected youth characteristics.

Added to the report is a section detailing the characteristics of Division youth for each placing county. This is in response to comments received by my office from a number of local and community-based agencies. I am confident that these new tables will assist the Division's many partners with planning efforts and will serve as a useful resource to the many local agencies dedicated to the welfare of New York State's youth population.

I hope you will join with the Division in using the data presented in the report to provide the best possible services to the youth, families and communities of our State. Please contact me if I can assist you in these efforts.

Respectfully submitted,

John Af Johnson

EXECUTIVE SUMMARY

This report provides a statistical overview of all youth in DFY custody during 1995. It includes data relating to residential and non-residential services, Foster Care, and DFY-placed youth served in Voluntary Agencies. This format recognizes the importance of the entire range of care provided by DFY to adjudicated youth. It also reflects DFY's goal of providing care, where consistent with youth and public safety, in the less costly environments associated with non-residential programs.

Ten-year trends allow the reader to understand current data in historical context. In addition, county-specific data are presented in the last section of the report to reflect the differences in the characteristics of youth served from each New York State county.

Questions regarding the data presented should be directed to: Bureau of Program Evaluation and Research, NYS Division For Youth, Capital View Office Park, 52 Washington Street, Rensselaer, NY 12144, (518) 486-6974.

REPORT HIGHLIGHTS

- Together, youth in custody at the end of 1994, plus admissions during 1995 account for 6,784 youth being served by the Division sometime during the year. This amounts to 6 of every 1,000 youth between 13 and 17 years old in New York State (Based on 1995 Kids Count). (See Tables 1 and 3.)
- During 1995, there were 2,736 admissions, the largest number in ten years. This is a 4 percent increase over the previous year and a 35 percent increase since 1988, when admissions were 2,030. (See Table 1.)
- African-American admissions, including those with Latino ethnicity, increased markedly
 this year, accounting for 67 percent of all admissions. Although the number of all Latino
 admissions remained about the same, African-American Latinos entering Division custody
 increased 40 percent, while White Latinos decreased 14 percent. The number of White
 non-Latinos remained virtually unchanged. Similarly, African-American Latinos in care at
 the end of the year increased 34 percent between 1994 and 1995, while White Latinos
 decreased 18 percent. (See Tables 1 and 3.)
- After falling in 1994, the number of Juvenile Offender admissions rose to its second highest level in ten years. However, the percentage of these Juvenile Offenders granted Youthful Offender status declined from an eight-year high of 56 percent in 1994 to a ten-year low of 44 percent in 1995. (See Table 1.)
- The number of youth placed by the courts for replacement in Voluntary Agencies increased 22 percent from 684 in 1994 to 832 in 1995. (See Table 1.)
- Person crimes accounted for 37 percent of 1995 custody entries. Youth admitted for Crimes Against Persons increased 12 percent between 1994 and 1995. This is the third consecutive year that the number of such admissions exceeded the number of Property crimes and the tenth consecutive year Person crime admissions have increased. (See Table 1.)

- In 1995, 432 youth were admitted with a Controlled Substance crime as their most serious
 offense, representing a 13 percent increase from 1994. Controlled Substance crimes are
 the second largest admission offense category and account for 16 percent of all admissions.
 Only Robbery accounts for more, with 483 (18 percent of all admissions). (See Table 1.)
- Of the 2,634 youth (96 percent of custody entries) who had household assessments in 1995, 50 percent came from households with only one adult present and 16 percent came from households where there was no parent present. (See Table 2.)
- Almost three-quarters (73 percent) of all screened admissions in 1995 needed further assessment for substance abuse services. (See Table 2.)
- One-third (33 percent) of screened youth entering DFY custody in 1995 had mental health service assessment needs. This was an increase of 28 percent over 1994. (See Table 2.)
- Approximately six out of seven youth entering custody in 1995 who were screened at intake had at least one special service need; almost half of all entries had from two to seven such needs. The remaining rates of service need among youth entering DFY in 1995 include: special education, 25%; health, 10% (a 40 percent increase between 1994 and 1995); sex offender, 8%; limited English, 4%; and mental retardation, 4%. (See Table 2.)
- New York City accounted for approximately 60 percent of the youth admitted and discharged in 1995. (See Tables 2 and 7.)
- The number of youth in care at the end of 1995 decreased 6 percent from 4,048 in 1994 to 3,819. This is the first time this number has decreased since 1991. (See Table 3.)
- At the end of 1995, the number of Limited Secure Juvenile Delinquents (the more serious designation) in care reached a ten-year high of 2,276. This population now comprises 60 percent of youth in care. However, the number of less serious, Non-Secure, Juvenile Delinquents in care decreased 41 percent from 1994, declining to a ten-year low of 326 youth at the end of 1995. (See Table 3.)
- One in five youth leaving Voluntary Agency care in 1995 required DFY-operated residential service prior to community release. Youth leaving DFY-operated programs rarely enter Voluntary Agency programs. (See Table 5.)
- The median residential stay for Juvenile Offenders and Restrictive Juvenile Delinquents served only in DFY-operated programs increased from 16.3 to 18.6 months between 1994 and 1995. This reflects the decrease in the proportion of Juvenile Offenders with Youthful Offender status. (See Table 6A.)
- Residential Length of Stay for Juvenile Delinquents and Persons In Need of Supervision served only in DFY-operated programs remained the same as last year (11.3 months).
 Residential Length of Stay is constrained by the number of admissions during a year and the number of beds available. (See Table 6B.)
- Youth served in a combination of Division and Voluntary settings had an increased median Length of Stay of 16.6 to 18.2 months between 1994 and 1995. (See Table 6E.)

STRUCTURE OF THE REPORT

WHAT'S NEW IN 1995

The DFY Annual Report series provides a summary of the Division's services to youth in its custody. This year's format has been changed in the interest of making the data more immediately accessible. The new condensed format includes the same tables and figures as previous years without lengthy supporting text. Each section contains useful tips on when to use each table. Further, this year's report adds a new section, **Section VI - County Profiles**, which covers admission and in-care information for each county.

In addition to the **Glossary** and **Subject Index**, refer to **Table Notes** immediately following the Glossary for explanations of particular youth characteristics.

INTRODUCTION TO DFY's DIRECT SERVICE SYSTEM

The Division For Youth serves two populations. The general youth population is served by local programs receiving financial aid and technical assistance through DFY's Office of Local Services. Youth placed in DFY custody by the courts are served through a continuum of service settings. The focus of this report is on DFY's direct service operations.

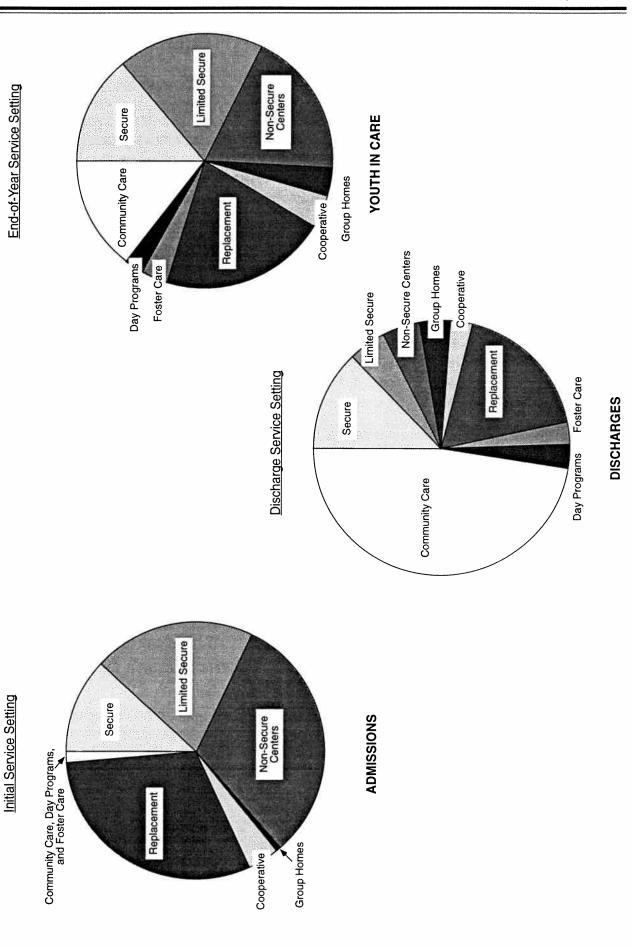

DFY's direct service system includes residential and non-residential programs (Day Programs and Community Care programs) operated by DFY or Voluntary Agencies. Residential programs are further divided into DFY-operated centers and homes, Voluntary Agency-operated programs and Foster Care. DFY centers and homes are organized into three risk control levels: Secure, Limited Secure and Non-Secure. The Non-Secure risk control level is subdivided into two service settings, Non-Secure Centers and Group Homes (see Figure 1).

Youth placed in Voluntary Agency-operated services are of two types, those cooperatively placed by DFY and those placed by the courts with DFY specifically for replacement with a particular Voluntary Agency. Although this administrative distinction has no significant programmatic implications (the same agencies accept youth in both categories and make the same programs available to them), cooperative and replacement cases often have different characteristics and service sequences while in DFY custody. We have kept these types distinct in this report so as not to obscure these differences.

Taken as a whole, these categories comprise the array of service settings through which DFY provides care to youth in its custody. This report uses these service settings extensively to organize the presentation of admission, in-custody, movement and discharge data. **Figure 1** displays the service setting distributions of youth admitted to, in-care, and discharged from DFY custody in 1995.

1995 Service Setting Distributions of Admissions, Youth in Care and Discharges

Figure 1:

GLOSSARY

The following definitions are provided to assist the reader in understanding the data presented in the report:

Adjudication: legal category applied by the court which regulates the types of settings in which a youth may be served.

Juvenile Offender (JO) - a person who was 13 years old when s/he committed Murder 2nd degree, or a person who was 14-15 years old when s/he committed certain crimes of Murder, Kidnapping, Arson, Assault, Manslaughter, Rape, Sodomy, Aggravated Sexual Abuse, Burglary or Robbery who is convicted in adult criminal court. These youth must go to Secure Centers.

Juvenile Offender/Youthful Offender status (JO/YO) - JOs without prior criminal convictions who have been awarded YO status by the court which provides for shorter sentences and sealed records.

Juvenile Delinquent (JD) - a person adjudicated by the family court and who was 7-15 years of age at the time s/he committed an act that would constitute a crime if committed by an adult.

Restrictive (RJD) - a JD committing specific designated felony acts, including certain crimes of Murder, Kidnapping, Arson, Assault, Manslaughter, Rape, Sodomy, Aggravated Sexual Abuse, Burglary or Robbery. These youth are placed by the family courts and must start their custody in Secure Centers, but after a specified time may move to less secure settings.

Limited Secure JD - a JD who may be placed in any setting except Secure, and who may be transferred to a Secure Center following a transfer hearing. Prior to 1993 legislation, these Limited Secure JDs were referred to as Title III Juvenile Delinquents (JDIII). The term Limited Secure JD is used to refer to JDIIIs prior to 1993.

Limited Secure JD - 60 Day Option - a Limited Secure JD who may be placed in a Secure Center without a transfer hearing at any time during the first 60 days of custody in a Division facility. Prior to 1993 legislation, these Limited Secure JDs with 60 Day Options were referred to as Title III Juvenile Delinquents with 60 Day Options (JDIII - 60 Day Option). The term Limited Secure JD - 60 Day Option is used to refer to JDIII - 60 Day Option prior to 1993.

Non-Secure JD - a JD who may not be placed in a Secure or Limited Secure Center. Prior to 1993 legislation, these Non-Secure JDs were referred to as Title II Juvenile Delinquents (JDII). The term Non-Secure JD is used to refer to JDII prior to 1993.

Person In Need of Supervision (PINS) - a person less than 16 years of age who does not attend school in violation of education law, or who is incorrigible, ungovernable or habitually disobedient and beyond the lawful control of parent or other lawful authority or who unlawfully possesses marijuana. These youth may not be placed in a Secure or Limited Secure Center.

Other and None - include youth placed with DFY as a condition of probation, youth whose cases are adjourned in contemplation of dismissal, youth voluntarily admitted under Section

358(a) of the Social Services Law, or youth placed under Interstate Compact agreements.

Youthful Offender (YO) - an adjudication in which the court substitutes a YO finding for an adult conviction.

Admission: initial permanent entry into DFY custody resulting from one or more placement orders or Interstate Compact.

Average: (see mean)

Cooperative Placement: (see placement)

Custody: a status effected by a court order making DFY a youth's custodian.

Day Programs: treatment settings in which youth reside in their own homes, but receive intensive supervision and service from DFY; currently this category includes Home-Based Intensive Supervision (HBIS), In-Home Intensive Treatment and Supervision (I-HITS), Evening Reporting Centers (ERC) and City Challenge.

DFY-operated programs: direct services (residential and non-residential) provided by DFY staff or foster parents as contrasted with Voluntary Agency-operated and other contracted programs.

Direct service: service provided to adjudicated youth pursuant to a placement order. This contrasts with DFY's delinquency prevention programs for which non-adjudicated youth are eligible.

Discharge: exit from DFY custody.

LOS: Length of Stay excluding any absence time beyond seven days (the point at which residential beds are no longer held).

Program LOS - Length of Stay in current or discharging program.

Residential LOS - total Length of Stay in residential service settings (DFY-operated centers and homes, Foster Care or Voluntary Agencies) during custody.

Total custody LOS - total Length of Stay during custody.

Mean: the arithmetic average of a series of numbers (e.g., age or LOS); it is the expected value (one which minimizes error in estimating the actual value) for a youth chosen at random from the series of numbers. For example, if five youth stay 3, 6, 12, 18 and 36 months, the mean LOS of the five is (3+6+12+18+36)/5 or 15 months.

Median: in a series of numbers (e.g., age or LOS), the value above and below which half the values in the series occur. For example, if five youth stay 3, 6, 12, 18 and 36 months, the median value is 12 months since two youth are above and two are below this value.

Movement: entry into initial permanent service setting or discharge from DFY custody or authorized and non-temporary transfer between programs or service settings.

Placement: court order placing a youth in the custody of the Division. Placements either mandate DFY to provide service to a youth or direct the Division to "replace" a youth with a court-designated Voluntary Agency. A youth not placed for "replacement" (see below) may nevertheless be cooperatively admitted to a Voluntary Agency by mutual agreement between DFY and the agency. More than one placement order may apply to a youth at any point in time. Thus, a single custody entry may be the result of more than one placement.

Placement type: There are three distinct types of placement orders by which courts assign custody to DFY.

Court to DFY- this placement type mandates DFY to directly supervise a youth, but permits the Division to admit a youth to a cooperating Voluntary Agency by mutual agreement

between DFY and the agency.

Court to DFY to Voluntary (Replacement) - this placement type directs the Division to retain custody, but to admit a youth to a program operated by a specific Voluntary Agency. This type of placement is referred to as replacement.

Interstate Compact - this entry to custody results from a reciprocal agreement between New York (NY) and other states in which youth adjudicated outside NY whose families reside in NY will be supervised by DFY following any incarceration outside NY. At the same time, out-of-state youth adjudicated in NY can receive supervision in their home state under this agreement.

Prior custody status: distinguishes admissions with prior DFY custody histories from youth entering custody for the first time.

Program: a set of services organized for youth rehabilitation (may be residential or non-residential, DFY-operated or not). For example, a program can be a facility, post-residential service or incarceration alternative. Programs with similar characteristics are combined into service settings.

Release: movement from one program to another.

Replacement: (see placement and court to DFY to Voluntary under placement type)

Residence county: county in which youth resided at time of placement.

Residential services: treatment settings providing room and board. These may be DFY-operated centers or homes, Voluntary Agency-operated facilities or Foster Care.

Responsible county: for non-JOs, county in which youth was adjudicated; for JOs, residence county is responsible county.

Service category: groups of youth with similar service patterns which permit meaningful analyses of residential LOS. The categories are:

JOs, JO/YOs and RJDs - these youth have legally restricted residential LOSs; the only restriction on residential LOS for youth in all other categories is the length of their placements.

DFY Service Only - youth whose residential LOS is unrestricted and have received all residential service during a single continuous stay in one or more DFY-operated programs.

Voluntary Agency Only - youth whose only residential service was during a single continuous stay in one or more Voluntary Agency programs.

Foster Care - youth whose only residential service was during a single continuous stay in Foster Care.

Mixed - youth who received residential service during a single continuous stay in any combination of more than one of the above service categories.

Discontinuous Service - youth who received residential service during two or more discontinuous stays regardless of where services were received.

Service needs: results of preliminary screening at custody entry (intake) indicating youth requiring further assessment to determine if specialized intervention services are necessary.

Health - need for specialized health services such as on-site medical personnel, access to a medical specialist, handicapped accessible facilities, and pregnancy services. Youth may have more than one health service need.

Limited English - need for English as a second language instruction.

Mental health - need for professional services for a mental health problem.

Mental retardation - need for special education and other services for mental retardation.

Sex offender - need for sex offender treatment services.

Special education - need for related services, resource room or special class as designated by a Committee on Special Education.

Substance abuse - need for substance abuse treatment services.

Service sector: a combination of service settings with similar characteristics. There are four service sectors used in this report: DFY-operated residential sector (Secure, Limited Secure and Non-Secure Centers, and Group Homes); Voluntary Agency sector (for both cooperatively placed and replacement youth); Foster Care sector (which includes Independent Living) and non-residential program sector (Day Programs and Community Care).

Service setting: administrative and programmatic environments in which youth in DFY custody are served. They are: Secure, Limited Secure, and Non-Secure Centers, Group Homes, Cooperative and Replacement Voluntary Agencies, Foster Care, Day Programs and Community Care (see Table 2 column headings and section on "DFY's Direct Service System," above).

TABLE NOTES

The following describe relevant information regarding certain youth characteristics included in the tables of this report and should be used as a reference in interpreting the data.

Adjudication. By law all JOs and RJDs must initially enter Secure Centers, and Non-Secure JDs and PINS may never enter a Secure or Limited Secure setting. Adjudications across service settings are not proportionally distributed.

Age. Youth admitted to Secure Centers are generally older than those admitted to other settings. This is largely attributable to the fact that most crimes covered by the Juvenile Offender Law must be committed between the ages of 14 and 15 and to the longer processing time generally associated with these crimes. The age distribution of youth admitted to all other residential settings generally mirrors the distribution of all custody entries.

County. Sections addressing custody entries and youth in care use "Responsible County" because this is both the county where the youth was adjudicated and the county that assumes part of the financial responsibility while the youth is with DFY. For discharges, however, it is more relevant to examine a youth's county of residence, since that is where the youth is most likely to live following discharge.

Household Structure. During 1995, data on household structure were collected on 96 percent of all custody entries.

Most Serious Offense. In considering offense data, it must be remembered that adjudicated offense is a product of a multi-stage process and is subject to many factors other than the actual crime committed. Thus, any changes in offense distributions over time may be the result of shifts in such factors as plea bargaining or prosecutorial practices, rather than any change in criminal behavior. Furthermore, to the extent that these practices exist, the offense for which a youth is adjudicated will under-represent the seriousness of the behavior which prompted the initial arrest. This is offered only as a caution against too literal an interpretation of what "most serious offense" means.

Since a youth's adjudication is related by law and practice to the crime committed and adjudication constrains the service setting into which a youth can be admitted, specific crime categories are not proportionally distributed across service settings. For example, youth adjudicated for Larceny, although one of the most prevalent crime categories, were never admitted to Secure Centers in 1995 (see Table 2).

Although specific crime categories are related to adjudication, they are not proportionally distributed over initial service settings. This is somewhat mitigated in the in-custody population. Youth initially admitted to high control level settings who demonstrate progress are reintegrated into their home communities through stays in programs with lower levels of control. Conversely, some youth insufficiently controlled at their initial level can, through a variety of procedures, be moved to a more restrictive setting. Thus, at any time following initial admission, a youth's location will be the product of his/her legal characteristics and his/her subsequent behavior while in custody (see Table 4).

Placement Type. Court to DFY is by far the most common placement; the next most common placement is Court to DFY to Voluntary. It has been customary for all Interstate Compact youth to be admitted to Community Care (see Glossary for further information).

Race-ethnicity. Prior to July 1, 1989, youth who identified themselves as "Latino" or "Puerto Rican" were assigned to an Hispanic category, regardless of race. In place of this racially undifferentiated category, the current system treats Latino ethnicity as a characteristic separate from race. For this reason, the majority of youth who would have been categorized as "Latino" under the earlier system now appear either as "African-American Latino" or "White Latino." The presence of these race-ethnicity combinations prior to 1989 is a result of the few youth who returned to DFY custody after July 1989 and had their race-ethnicity on prior admissions re-categorized according to the current system. Under the current categorization, youth who do not identify with any of the four racial groups (presumably of mixed ancestry) can choose to be classified as "Other" or "Not Specified."

Screened Service Needs. Beginning in July 1989, screening for potential service needs became an integral part of the intake process. This information is used to assist in the selection of the optimal initial program setting for each youth. Screening is done in the areas of **health**, **limited English**, **mental health**, **mental retardation**, **sex offender services**, **special education** and **substance abuse**.

Systematic screening of each youth entering custody is not done for replacement and Interstate Compact cases who do not go to DFY residential settings. Nevertheless, by the end of 1995, 78 percent (2,979) of all youth in custody and 99 percent of non-replacement youth had been screened at entry.

The number of youth with positive **health** screens will not necessarily equal the number of the types of health services available (i.e., on-site medical personnel, access to medical specialist, and pregnancy services), since youth may have more than one health service need at a time. The total health needs equals the number of youth with one or more such needs, rather than the actual number of health needs.

Service Setting. Changes in the distribution of youth in custody across service settings reflect the realignment of service settings made by DFY between 1986 and 1995 to accommodate changes in the adjudication of youth placed in its custody. For instance, the decline in the number of youth in care in Group Homes is attributable to the decrease in the number of Group Homes operating in 1995 (see Section II - Figure 11).

Group Homes and Day Programs are rarely initial program assignments and function as brief transitional programs for youth returning to their communities.

SECTION I YOUTH ADMITTED TO DFY CUSTODY

This section is divided into two subsections: ten-year trends and characteristics of youth admitted during 1995 by initial service setting. The ten-year trend data are presented in Table 1 and are depicted graphically in Figures 2 through 6. Table 2 describes the characteristics of 1995 admissions.

TEN-YEAR TRENDS

• **Table 1** contains admission data for youth entering DFY custody from 1986 through 1995. **Figures 2 through 6** display the data from Table 1 concerning gender, age, race-ethnicity, adjudication, and initial service setting, respectively. Admission trends are useful for assessing variations regarding the characteristics of youth entering DFY between 1986 and 1996.

The few youth in transit at the end of the year who have technically entered custody, but have not reached their first permanent setting by year's end are excluded from the tables and counted in the succeeding year. This convention insures that the data are not distorted by the settings in which youth are temporarily housed while in transit to the permanent settings deemed most appropriate for them.

CHARACTERISTICS OF YOUTH ADMITTED DURING 1995

 Table 2 describes important demographic, legal and administrative characteristics of youth admitted to DFY custody during 1995 by initial service setting. This information is useful for comparing the characteristics of youth entering various service settings in 1995. The majority of these youth are entering into DFY custody for the first time.

Table 1:

Characteristics of Admissions to DFY Custody, 1986 - 1995

Screening was not performed for every admission and youth may have more than one need. Therefore, column sums may not equal "Total Admissions".

SECTION II YOUTH IN DFY CUSTODY AT THE END OF THE YEAR

Section II is divided into two subsections: ten-year trends and characteristics of youth in custody. This section includes tables and figures displaying data on youth in custody at the end of 1995 as well as end of year populations for the preceding nine years.

Youth in transit or in other temporary settings on December 31 are excluded. While such youth are in DFY custody, they are few in number and might appear misassigned if included. Youth absent more than seven days are also excluded from the tables in this section.

TEN-YEAR TRENDS

• Table 3 and Figures 7 through 11 describe the ten-year trend information as in Section I. These tables and figures, however, deal with the in-care populations at the end of the year, rather than youth admitted to DFY during an entire year. Any differences between admitted and end-of-year populations will largely be a function of the duration of initial placements. Trend data regarding youth in care enable the reader to compare the in-care population of the Division on the same day over a period of ten years.

CHARACTERISTICS OF YOUTH IN CUSTODY AT THE END OF 1995

• Table 4 describes the important demographic, legal, and administrative characteristics of youth in DFY custody on December 31, 1995 in each service setting. An examination of the characteristics at the end of the year provides the reader with a "snapshot" of the youth in Division custody at a given point in time. Admission trends preceding 1995 as well as discharging patterns will affect the number and type of youth in care.

SECTION III

MOVEMENTS BETWEEN AND WITHIN SERVICE SETTINGS

This section identifies the movements of youth beyond initial admissions and discharges. Youth are moved between service sectors as well as within the same service setting. Movements show both the desirable transition of youth to less secure settings, and the less desirable transfers to more secure settings.

YOUTH MOVEMENTS - 1995

• **Table 5** depicts the over 9,500 permanent movements into, out of, between and within service settings in 1995. This section is useful for identifying where youth move throughout the system including the number of youth moving to less secure settings or to higher or same-level service settings. Temporary moves, usually in connection with court appearances or in-transit stays, are excluded.

Movements Between Service Sectors. The largest number of movements between sectors (67 percent of all such moves) was from DFY residential to non-residential programs. These movements represent an ideal service sequence whereby youth move from residential settings to supervised living in their home communities in preparation for discharge from custody. Unfortunately, though not unexpectedly, these trials at living at home do not always work out. In such cases, a youth may re-enter a residential setting.

An examination of total population movements sheds light on the relationship between youth directly served by DFY and those served by Voluntary Agencies. Youth seldom enter Voluntary Agencies from DFY-operated programs. The picture of youth leaving Voluntary Agencies, however, is quite different. Not only did DFY provide post-residential treatment and supervision for 5 percent of the youth who left Voluntary Agencies in 1995, it also provided additional residential treatment for another 20 percent of the youth who left these agencies. In short, it would be incorrect to assume that the 34 percent of all custody entries in 1995 admitted to Voluntary Agencies placed little or no demand on Division resources. By contrast, of the 5,961 moves out of DFY-operated programs in 1995, less than one percent went to a Voluntary Agency for service.

Movements Within Service Sectors. Movements within DFY-operated residential service settings from a higher to a lower control level follow the ideal rehabilitative pattern, where, as youth progress, they are served in less restrictive programs. In contrast, youth moving from a lower control level to one at a higher level usually occur either when it is determined that a particular control level does not provide sufficient custody or security to protect the youth, the staff or the community or, in compliance with a new court order.

Movement Activity Into, Out of, and Within Service Setting in 1995*

SECTION IV YOUTH DISCHARGED FROM DFY CUSTODY

Section IV is divided into two subsections: the first examines ten-year trends in Length of Stay (LOS) for youth discharged from the Division; the second details the characteristics of those youth discharged from DFY in 1995 by the setting from which they were discharged. Personal characteristics of discharges are a function of earlier admission trends and the length of time youth with various characteristics spend in DFY custody. Youth discharged after a temporary stay just prior to discharge are shown in the tables at their last permanent setting, rather than the temporary facility from which they were discharged. Such youth are few in number and to do otherwise would distort the data.

TEN-YEAR TRENDS IN LENGTH OF STAY (LOS)

• To correctly interpret **Figure 12** and **Tables 6A through 6F**, the following issues pertaining to various types of Length of Stay need to be understood.

Because it is DFY policy to retain custody of a youth for the maximum length permitted by the placement order (except for JOs), custody LOS is usually identical to the duration of the placement order, reduced by credit for time spent in detention and increased by extensions and consecutive placements. Residential LOS, on the other hand, is affected by a complex mix of legal, administrative and human factors:

Legal Restrictions. JOs (whose entire stay with DFY is spent in a Secure Center) and RJDs have legally-mandated minimum residential LOSs. In addition, JOs are either discharged from DFY at the discretion of the Parole Board or transferred to an adult prison to complete their sentences. The Division, therefore, has little or no latitude in determining service time for them.

Youth Adjustment. Youth with unrestricted stays in DFY-operated facilities (Limited and Non-Secure JDs, PINS and Other) spend only a part of their custody stay in residential settings. Youth with more difficult problems receive more residential treatment and can even have their court orders extended to accommodate lengths of service beyond the duration of their original placement. Some youth who are released to Community Care or to a Day Program have difficulty meeting the demands of the setting and are returned to residential care. Youth judged to be making rapid progress require shorter periods of residential treatment before release to a non-residential program.

Administrative Factors. For JDs and PINS served by a Voluntary Agency, either as a court-ordered replacement or as part of an agreement with the Division, DFY has no direct control over the youth's residential LOS. In addition, as seen in Section III, youth can transfer between DFY and a Voluntary Agency and thereby have only part of their residential LOS under the control of DFY. Additionally, DFY serves a number of youth without viable homes. Many of these youth are placed in DFY Foster Care, usually after a stay in another DFY-operated residential program, but sometimes for the duration of the placement. These Foster Care stays generally lengthen the time that a youth spends in DFY-operated residential settings.

For these reasons, residential LOS trends are displayed separately for each frequently-occurring youth status (**Figure 12**). Youth with legally restricted residential stays served only in DFY-operated programs are described in **Table 6A**. Youth with unrestricted residential stays only in DFY-operated facilities are presented in **Table 6B**. Youth served only in Voluntary Agency programs are in **Table 6C**. Youth served only in Foster Care make up **Table 6D**. Although the number of discharged youth in this group in any year is small, youth in Foster Care have very different characteristics from youth served in other settings (see Table 4). **Table 6E** shows youth served in any combination of DFY facilities, Foster Care and Voluntary Agency programs. Because most youth served in mixed settings have first had an unsuccessful stay in a Voluntary Agency before being transferred to DFY-operated facilities, it is not surprising that their LOSs tend to be longer than either of the groups served in only one service sector.

Finally, youth with more than one residential stay during custody are shown in **Table 6F**. Because the duration of these second episodes of residential care is typically much shorter than initial stays, to include them in the calculation of overall residential LOS would result in an artificially shortened aggregate figure. It should be noted that the long LOSs of youth with more than one residential stay are not products of unilateral decisions on the part of DFY. To achieve even the 1995 median LOS of 17 months required court intervention for almost half the JDs and PINS, either through formal extensions of placement or as the result of readjudication proceedings.

Mean Number of Months of Residential Stay of Youth Discharged by Service Category, 1986 - 1995

CHARACTERISTICS OF YOUTH DISCHARGED FROM CUSTODY IN 1995

 Table 7 describes the important legal, demographic, and administrative characteristics of youth discharged throughout the year. Discharge information is helpful in examining the number and characteristics of youth returning to their home communities in 1995.

Length of Stay at Discharging Program. The conventional path of non-JO youth who initially enter DFY residential settings is to enter Community Care following one or more stays in progressively less controlled settings. Youth discharged from residential programs represent atypical service sequences and have greatly varying LOSs at their last program. On the other hand, most youth discharged from Secure Centers are more likely to have spent all of their placement at the facility from which they were discharged. Spending most or all of their placement at the discharging facility is also typical for youth discharged from both types of Voluntary Agency placements.

Total Residential LOS. As noted earlier in this section, Residential LOS must be understood by service category in order to be meaningful.

Total Custody LOS. Youth not adjudicated as a JO or RJD are typically placed with the Division for 12 or 18 months. The Division can seek an extension of placement for a youth. However, as a matter of policy, DFY rarely exercises its legal prerogative to apply for termination of placement. Thus, for the majority of youth who have either single or concurrent placements, total custody LOS is so constrained that it is less important than it appears to be at first glance. Nevertheless, total service time is instructive and is therefore included in the report.

Characteristics of Discharges from DFY Custody in 1995 by Discharge Service Setting

SECTION V DAY PROGRAMS

Section V contains three subsections: the first describes Day Program entries in 1995; the second depicts the characteristics of youth in care in Day Programs at the end of the year; and the third presents information regarding the Length of Stay of youth released from Day Programs in 1995.

DAY PROGRAMS OPERATED DURING 1995

Recognizing that it is the period immediately following residential care when youth are most in need of support, Day Programs have been developed to assist youth in their efforts to reintegrate with their home communities. Additionally, some of these programs were intended to serve youth with specialized needs as well as those whose progress in residential care permitted their being admitted to one of these Day Programs in lieu of continued residential care.

Provided below is a brief description of each of the Day Programs that was operated by DFY at any time during 1995.

Evening Reporting Centers (ERC) provide evening and weekend on-site supervision and services to youth as a complement to daytime programming. Participants must attend school or work as a condition of participation. In 1995, these centers were operated in the Bronx, Brooklyn, Buffalo, Poughkeepsie, Rochester and Syracuse.

Home-Based Intensive Supervision (HBIS) provides intensive supervision and services to youth in their home communities. Behavioral contracts and individual and family counseling are provided directly, while all other services are provided by existing community providers. In 1995, these programs were operated by Hillside Children's Center in Erie, Monroe, and Niagara counties and by Berkshire Farm Center and Services for Youth in the Capital District.

In-Home Intensive Treatment and Supervision (I-HITS) is similar to HBIS, but provides special services for youth who have a history of drug abuse or who are adjudicated for drug possession and/or sales. I-HITS operated only in Kings County (Brooklyn) in 1995.

City Challenge is a day placement program which primarily serves youth released from the Sergeant Henry Johnson Youth Leadership Academy and the Adirondack Wilderness Challenge program. This program operates in Brooklyn.

CHARACTERISTICS OF YOUTH ENTERING DAY PROGRAMS DURING 1995

• Table 8 displays important demographic, legal and administrative data on youth who entered Day Program services in 1995. Note that because program participants live at home, the county of residence for youth entering these non-residential programs is largely a reflection of the geographic location of the program sites. Also, since Juvenile Offenders are not eligible to participate in Day Programs, the legal profile of the youth entering these programs varies somewhat from that of all youth entering DFY custody.

CHARACTERISTICS OF YOUTH IN DAY PROGRAMS AT THE END OF 1995

• **Table 9** depicts important demographic, legal and administrative characteristics of youth in Day Programs on December 31, 1995. As mentioned above, the counties in which program participants reside is largely a reflection of the geographic location of the programs.

Youth in transit or in other temporary settings on December 31, 1995 are excluded. While such youth are in DFY custody, they are few in number and might appear misassigned if included. Youth absent more than seven days are excluded from this table.

LENGTH OF STAY FOR YOUTH RELEASED FROM DAY PROGRAMS DURING 1995

• Table 10 describes the Length of Stay for the youth released from Day Programs in 1995.

SECTION VI COUNTY PROFILES

This section is new to the Annual Report. The tables in this section provide important demographic, legal and administrative characteristics of both youth admitted to the Division in 1995 and those in care at the end of the year from each county in New York State. The two tables presented here describe the same youth specified in Tables 2 and 4, but present the information by placing county rather than by service setting.

CHARACTERISTICS OF YOUTH ADMITTED DURING 1995 BY COUNTY

• **Table 11** describes the characteristics of the 2,736 youth admitted to DFY in 1995 by responsible county (compare with Table 2 from Section I). The information in this section's admission table is useful for identifying the number and characteristics of youth sent to the Division from each county.

CHARACTERISTICS OF YOUTH IN CUSTODY AT THE END OF 1995 BY COUNTY

• Table 12 details the characteristics of the 3,819 youth in care on December 31, 1995 by placing county (compare with Table 4 from Section II). This table is useful for identifying characteristics of youth in custody from any given county in New York State at a single point in time.

Youth in transit or in other temporary settings on December 31 are excluded. While such youth are in DFY custody, they are few in number and might appear misassigned if included. Youth absent more than seven days are also excluded from this table.
