A Criminal Justice Information Policy Report

October 2009

Criminal Justice Information Policy

U.S. Department of Justice

Bureau of Justice Statistics

Michael D. Sinclair, Ph.D. Acting Director

Acknowledgments. This report was prepared by SEARCH, The National Consortium for Justice Information and Statistics, Francis X. Aumand III, Chairman, and Ronald P. Hawley, Executive Director. The project director was Owen M. Greenspan, Director, Law and Policy. Mr. Greenspan and Dennis A. DeBacco, Justice Information Services Specialist, Law and Policy, authored the report. Mr. DeBacco conducted the survey and compiled the results. Support was provided by Eric C. Johnson, Justice Information Services Specialist, Law and Policy; Twyla R. Putt, Manager, Corporate Communications; and Jane L. Bassett, Publishing Specialist and Writer/Editor, Corporate Communications. This project was supported by Cooperative Agreement No. 2005-RU-BX-K014 and No. 2007-RU-BX-K011 awarded by the Bureau of Justice Statistics, Office of Justice Programs, U.S. Department of Justice to SEARCH, The National Consortium for Justice Information and Statistics, 7311 Greenhaven Drive, Suite 145, Sacramento. California 95831. The Federal project monitors were Gerard Ramker, Ph.D., and Devon Adams. Points of view in this document are those of the authors and do not necessarily represent the official position or policies of the U.S. Department of Justice.

Glossary of terms

Automated fingerprint identification **system (AFIS):** An automated system for searching fingerprint files and transmitting fingerprint images. AFIS computer equipment can scan fingerprint impressions (or utilize electronically transmitted fingerprint images) and automatically extract and digitize ridge details and other identifying characteristics in sufficient detail to enable the computer's searching and matching components to distinguish a single fingerprint from thousands or even millions of fingerprints previously scanned and stored in digital form in the computer's memory. The process eliminates the manual searching of fingerprint files and increases the speed and accuracy of ten-print processing (arrest fingerprint cards and noncriminal justice applicant fingerprint cards).

AFIS equipment also can be used to identify individuals from "latent" (crime scene) fingerprints, even fragmentary prints of single fingers in some cases.

Criminal history record information (CHRI) or criminal history record information system: A record (or the system maintaining such records) that includes individual identifiers and describes an individual's arrests and subsequent dispositions. Criminal history records do not include intelligence or investigative data or sociological data such as drug use history. CHRI systems usually include information on juveniles if they are tried as adults in criminal courts.

Most, however, do not include data describing involvement of an individual in the juvenile justice system. Data in CHRI systems are usually backed by fingerprints of the record subjects to provide positive identification. State legislation and practices vary widely concerning disclosure of juvenile record information and access to criminal history records for noncriminal justice purposes.

Data quality: The extent to which criminal history records are complete, accurate, and timely. In addition, accessibility sometimes is considered a data quality factor. The key concern in data quality is the completeness of records and the extent to which records include dispositions as well as arrest and charge information. Other concerns include the timeliness of data reporting to State and Federal repositories, the timeliness of data entry by the repositories, the readability of criminal history records, and the ability to have access to the records when necessary.

Interstate Identification Index (III): An

"index-pointer" system for the interstate exchange of criminal history records. Under III, the Federal Bureau of Investigation (FBI) maintains an identification index to persons arrested for primarily felonies or serious misdemeanors under State or Federal law. The index includes identification information (such as name, date of birth, race, and sex), FBI Numbers, and State Identification Numbers (SID) from each State holding information about an individual.

Search inquiries from criminal justice agencies nationwide are transmitted automatically via State telecommunications networks and the FBI's National Crime Information Center (NCIC) telecommunications lines. Searches are made on the basis of name and other identifiers. The process is entirely

automated. If a hit is made against the Index, record requests are made using the SID or FBI Number, and data are automatically retrieved from each repository holding records on the individual and forwarded to the requesting agency. As of December 2008, 50 States and the District of Columbia participated in III. Responses are provided from FBI files when a jurisdiction, such as a U.S. territory, is not a participant in III. The III system may also be employed when responding to fingerprint-based noncriminal justice purpose criminal record background checks.

Participation requires that a State maintain an automated criminal history record system capable of interfacing with the III system and also capable of responding automatically to all interstate and Federal/State record requests.

Juvenile justice records: Official records of juvenile justice adjudications. Most adult criminal history record systems do not accept such records, which are frequently not supported by fingerprints and which usually are confidential under State law. The FBI accepts and disseminates juvenile records. States, however, are not required to submit such records to the FBI and may be legislatively prohibited from doing so.

"Lights-out" processing: "Lights-out" criminal record processing occurs when fingerprint data submitted to a criminal record repository by a local justice jurisdiction for the purpose of determining an individual's identity, and frequently associated criminal history record information, is processed electronically and a response is returned electronically to the submitting jurisdiction, all without human intervention.

"Livescan": The term "livescan" refers to both the technique and technology used to electronically capture fingerprint and palm print images without the need for the more traditional ink-and-paper methods. Livescan devices also allow the electronic transfer of digitized images and accompanying textual information to a criminal history repository.

National Crime Information Center

(**NCIC**): A computerized information system available to law enforcement and criminal justice agencies maintained by the FBI. The system includes records for wanted persons, missing persons, other persons who pose a threat to officer and public safety, and various property files. The Interstate Identification Index (III) is accessible through the NCIC system. The NCIC operates under a shared-management concept between the FBI and local, State, tribal, and Federal criminal justice agencies. The FBI maintains the host computer and provides a telecommunications network to the Criminal Justice Information Services Systems Agency (CSA) in each of the 50 States, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, Guam, and Canada as well as Federal criminal justice agencies. A CSA is a criminal justice agency that has overall responsibility for the administration and usage of NCIC within a district, State, territory, or Federal agency. NCIC data may be provided only for criminal justice and other specifically authorized purposes.

National Crime Prevention and Privacy Compact: An interstate and Federal/State compact that establishes formal procedures and governance structures for the use of the Interstate Identification Index (III). It is designed to facilitate the exchange of criminal history data among States for noncriminal justice purposes and to eliminate the need for the FBI to maintain

duplicate data about State offenders. Under the Compact, the operation of this system is overseen by a policymaking council comprised of State and Federal officials.

The key concept underlying the Compact is agreement among all signatory States that all criminal history information (except sealed records) will be provided in response to noncriminal justice requests from another State—regardless of whether the information being requested would be permitted to be disseminated for a similar noncriminal justice purpose within the State holding the data. (That is, the law of the State that is inquiring about the data—rather than the law of the State that originated the data—governs its use.) In some cases, ratification of the Compact will have the effect of amending existing State legislation governing interstate record dissemination, since most States do not currently authorize dissemination to all of the Federal agencies and out-of-State users authorized under the Compact. Noncriminal justice inquiries sent to the FBI are handled by a combination of information retrieval by the FBI from its files of voluntarily contributed State arrest and disposition records and by accessing State-held information. This requires that the FBI maintain duplicates of State records (see National Fingerprint File discussion for exception) and generally results in less complete records being provided, since FBI files of State records are not always as complete due to reporting deficiencies.

The Compact was passed by Congress and signed into law by the President in October 1998. The Compact became effective in April 1999, following ratification by two State legislatures, those being Montana on April 8, 1999, and Georgia on April 28, 1999. As of December 31, 2008, 25 additional States have entered into the Compact: Nevada (May 1999); Florida

(June 1999); Colorado (March 2000); Iowa (April 2000); Connecticut (June 2000); South Carolina (June 2000); Arkansas (February 2001); Kansas (April 2001); Alaska (May 2001); Oklahoma (May 2001); Maine (June 2001); New Jersey (January 2002); Minnesota (March 2002); Arizona (April 2002); Tennessee (May 2003); North Carolina (June 2003); New Hampshire (June 2003); Missouri (July 2003); Ohio (January 2004); Wyoming (February 2005); Idaho (March 2005); Maryland (May 2005); Oregon (July 2005); West Virginia (March 2006); and Hawaii (May 2006). (Editor's Note: In January 2009, Michigan entered into the Compact, bringing the total number of Compact States to 28.) Twelve States and territories have signed a Memorandum of Understanding indicating compliance with the Privacy Compact: American Samoa, Guam, Illinois, Kentucky, Mississippi, Nebraska, New Mexico, North Dakota, Puerto Rico, South Dakota, Vermont, and Virginia.

National Fingerprint File (NFF): A

system and procedures designed as a component of the III system, which, when fully implemented, would establish a totally decentralized system for the interstate exchange of criminal history records. The NFF will contain fingerprints of Federal offenders and at least one set of fingerprints on State offenders from each State in which an offender has been arrested, primarily for a felony or a serious misdemeanor. Under the NFF concept, States are required to forward only the first-arrest fingerprints of an individual to the FBI accompanied by other identification data such as name and date of birth.

Fingerprints for subsequent arrests are not required to be forwarded. Disposition data on the individual also is retained at the State repository and is not forwarded to the FBI.

Upon receipt of the first-arrest fingerprint cards (or electronic images), the FBI enters the individual's fingerprint information, name and identifiers in the III, together with an FBI Number and a State Identification (SID) Number for each State maintaining a record on the individual. Charge and disposition information on State offenders are maintained only at the State level, and State repositories are required to respond to all authorized record requests concerning these individuals for both criminal justice and noncriminal justice purposes. States are required to release all data on record subjects for noncriminal justice inquiries regardless of whether the data could legally be released for similar purposes within the State. The NFF has been implemented in 12 States: Colorado, Florida, Georgia, Idaho, Kansas, Montana, New Jersey, North Carolina, Oklahoma, Oregon, Tennessee, and Wyoming.

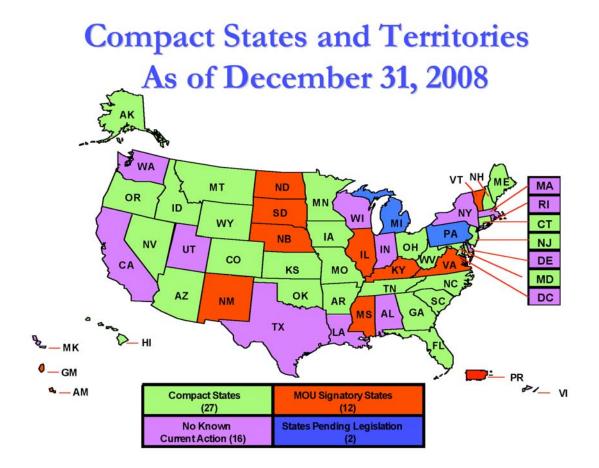

Positive Identification: Identification of an individual using biometric characteristics that are unique and not subject to alteration. In present usage, the term refers to identification by fingerprints but may also include identification by iris images, voiceprints, or other techniques. Positive identification is distinguished from identification using name, sex, date of birth, or other personal identifiers as shown on a document subject to alteration or counterfeit such as a birth certificate, Social Security card, or driver's license. Because individuals can have identical or similar names, ages, etc., identifications based on such characteristics are not reliable.

Rap back: A "rap back" or "hit notice" program will inform an employer or other designated entity when an individual who has undergone a fingerprint-based background check, and whose fingerprints are retained by a criminal history repository

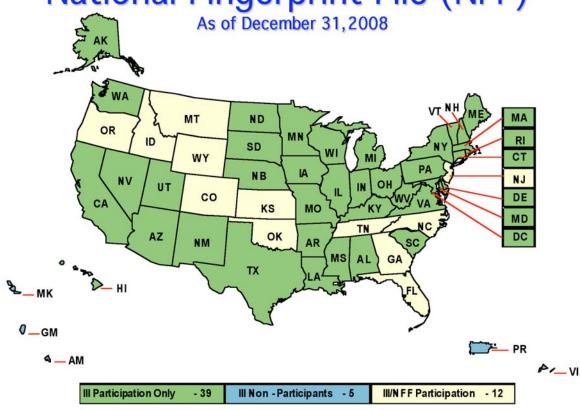

after the check, is subsequently arrested. His or her fingerprints, obtained after the arrest, are matched against a database that contains the fingerprints that were initially submitted. Employers are then notified of the individual's arrest. Employers pay a fee for the service in some States; other States provide the service for free. Some States also provide "rap back" services for notifications within the criminal justice system. For example, this might involve a notification to a parole or probation officer of the arrest of a person under supervision.

State central repository: The database (or the agency housing the database) that maintains criminal history records on all State offenders. Records include fingerprint files and files containing identification segments and notations of arrests and dispositions. The central repository is generally responsible for State-level identification of arrestees. The repository agency often is the Criminal Justice Information Systems Agency for contact with FBI record systems. Non-fingerprintbased inquiries from local agencies for a national records check are routed to the FBI via the central repository. Although usually housed in the Department of Public Safety, the central repository is maintained in some States by the State Police, Attorney General, or other State agency.

Maps

Interstate Identification Index (III) National Fingerprint File (NFF)

Note to readers

This is the tenth survey of criminal history

information systems conducted by SEARCH, The National Consortium for Justice Information and Statistics, since 1989. Some of the tables include data from previous surveys. Caution should be used in drawing comparisons between the results of earlier surveys and the data reported here. Over the course of the survey years, the U.S. Department of Justice, Bureau of Justice Statistics (BJS), has continued to administer assistance programs dedicated to improving criminal history records. As a result, some States focused new or additional resources on the condition of their records and, in many cases, know more about their records today than in the past. Similarly, expansion, advancement, and adoption of technology have also made a beneficial impact. Some State repositories, however, have suffered fiscal cutbacks and consequently have had to shift priorities away from certain criminal history information management tasks. For these and other reasons, trend comparisons may not as accurately reflect the status of the State's criminal history records as the current data considered alone.

Survey revisions

Given the dramatic advances in information technology, legislative and social trends that increase demand for criminal history record access, and the need for criminal record managers to respond to these developments, BJS and SEARCH conducted an in-depth review of the existing survey questions for additions and changes and developed a newly revised survey instrument.

New formats for easier response and collection of data were also considered and implemented. Many of these changes were suggested by users and respondents during the review process. Comments and suggestions collected focused on—

- increasing data on disposition reporting
- criminal versus noncriminal justice fingerprint processing
- livescan usage and repository operations
- sex offender registries
- how information is disseminated and how it is used.

SEARCH developed and tested an online database system to collect more complete and comprehensive data. New features included online, password-protected reporting forms allowing respondents to complete and submit individual sections of the survey, as well as to examine/update previously submitted portions.

The Survey of State Criminal History Information Systems, 2008 consists of 30 data tables of information. To reflect the evolving criminal record management environment, some questions are new to this survey, and some questions asked during previous surveys have been removed.

Introduction

This report is based upon the results from a survey conducted of the administrators of the State criminal history record repositories in March-June 2009. Fifty-six jurisdictions were surveyed, including the 50 States, the District of Columbia, American Samoa, the Territory of Guam, the Commonwealth of Puerto Rico, the Northern Mariana Islands, and the U.S. Virgin Islands. Responses were received from 53 jurisdictions. It presents a snapshot as of December 31, 2008.

Throughout this report, the 50 States will be referred to as "States"; the District of Columbia, American Samoa, Guam, Puerto Rico, the Northern Mariana Islands, and the Virgin Islands will be referred to as "territories," consistent with prior surveys; "Nation" refers collectively to both States and territories.

In addition, the Federal Bureau of Investigation (FBI) was the source for some of the information relating to criminal history records, including State participation in the Interstate Identification Index (III) system (the national criminal records exchange system) and the number of III records maintained by the FBI on behalf of the States; the number of records in the protection order file; and the number of sex offender records in the FBI National Crime Information Center (NCIC) files.

Major findings

Criminal history files

Overview of State criminal history record systems, December 31, 2008 (table 1):

- Forty-eight States, the District of Columbia, and Guam reported the total number of persons in their criminal history files as 92,329,600, of which 85,836,300 were automated. (An individual offender may have records in more than one State.)
- All jurisdictions that provided data on the number of subjects in their State criminal history files indicated that at least some of these records were automated.

• Twenty-three States and Guam have fully automated criminal history files.

Level of disposition reporting

Overview of State criminal history record systems, December 31, 2008 (table 1):

- A total of 16 States, representing 25% of the individual offenders in the Nation's criminal history records, reported that 80% or more arrests within the past 5 years in the criminal history database have final dispositions recorded.
- A total of 21 States, representing 37% of the individual offenders in the Nation's criminal history records, reported that 70% or more arrests within the past 5 years in the criminal history database have final dispositions recorded.

¹ Hereafter, these territories will be referred to as American Samoa, Guam, Puerto Rico, the Northern Mariana Islands, and the Virgin Islands.

- A total of 27 States, representing 54% of the individual offenders in the Nation's criminal history records, reported that 60% or more arrests within the past 5 years in the criminal history database have final dispositions recorded.
- When arrests older than 5 years are considered:
 - Seventeen States, representing 29% of the individual offenders in the Nation's criminal history records, reported that 80% or more arrests in the entire criminal history database have final dispositions recorded.
 - Twenty-three
 States, representing
 37% of the
 individual
 offenders in the
 Nation's criminal
 history records,
 reported that 70%
 or more arrests in
 the entire criminal
 history database
 have final
 dispositions
 recorded.

- Thirty-three States, representing 64% of the individual offenders in the Nation's criminal history records, reported that 60% or more arrests in the entire criminal history database have final dispositions recorded.
- Guam reported that 90% or more felony charges have a final disposition recorded in the criminal history database. Seventeen States and Guam reported that 80% or more felony charges have a final disposition recorded in the criminal history database.

Overview of State criminal history record system functions, 2008 (table 1a):

reported that
fingerprint-based
background checks for
criminal justice
purposes accounted for
50% or less of the
State's total number of
fingerprint-based
background checks. In
31 States, background
checks for criminal
justice purposes

- accounted for 60% or less of the State's total number of fingerprint-based background checks. The significant numbers of noncriminal justice purpose checks represent statutorily authorized screening for employment, licensing, and volunteers.
- Sixteen States do not retain any fingerprints processed as part of criminal history background checks for noncriminal justice purposes.

Detailed findings

Status of State criminal history files

Number of subjects (individual offenders) in State criminal history file, 2003, 2006, and 2008 (table 2):

 Over 92 million individual offenders were in the criminal history files of the State criminal history repositories on December 31, 2008. (An individual offender may have records in more than one State.)

- Ninety-three percent of the approximately 92 million criminal history records maintained by the State criminal history repositories are automated.
- Four States (Alaska, Maryland, Massachusetts, and South Dakota) and Guam reported an overall decrease in the total number of subjects in manual and automated files between 2006 and 2008.
- Five States reported an overall increase of at least 30% in the total number of subjects in manual and automated files.
- Forty-four States and the District of Columbia reported an overall increase in the total number of subjects in manual and automated files.

Criminal history records of Interstate Identification Index (III) participants maintained by the State criminal history repository and the Federal Bureau of Investigation (FBI), 2008 (table 21):

Nationwide, over 65
million criminal history
records are accessible
through the III. Sixtynine percent of all III
records are supported
by the States and 31%
are supported by the
FBI.

Biometric image data

Biometric and image data collection by State criminal history repository, 2008 (table 3):

- Forty-six States and Guam accept latent fingerprint images.
- Thirty-six States and Guam accept flat fingerprint images.
- Thirty-four States and Guam accept palm print images.
- Two States accept facial images or digitized mug shots.
 Three States reported accepting facial recognition data information.
- A total of 19 States accept scars, marks, and tattoos biometric information.

Protection order information

Protection order information and records, 2008 (table 4):

- Twenty-five State repositories and Guam receive protection order information, with a reported total of over 966,000 records.
- Thirteen States reported the ability to flag criminal history records for protection orders.
- Twenty-five States and Guam operate with felony flagging capability for <u>all</u> criminal history record subjects.
- Thirteen States operate with felony flagging capability for some criminal history record subjects.
- Nine States do not have felony flagging capability for criminal history record subjects.

Sex offender registry information

State registry of sex offenders, 2008 (table 5):

- Forty-eight States and Guam reported a total of 661,000 registered sex offenders. The record count reported by the FBI for the NCIC National Sex Offender Registry is 561,706.
- A reported total of 472,000 registered sex offenders are listed on publicly available State registries.
- Twenty-six States and Guam reported that information on at least 80% of registered sex offenders is publicly available on State registries, corresponding to 308,480 registered sex offenders (figures based on FBI NCIC data).
- Twenty-four States and Guam reported that information on at least 90% of registered sex offenders is publicly available on State registries, corresponding to 240,881 registered sex offenders (figures

based on FBI NCIC data).

Community notification services

Community notification services and public access to records, 2008 (table 5a):

- Seventeen States offer a community notification service for sex offender residency, employment, or school.
- Seven States offer a community notification service for victims of crime.
- Forty States and Guam offer access to a sex offender registry.
- Twenty-six States and Guam offer access to orders of protection/ protection orders.
- Twenty-six States and Guam offer access to wants and/or warrants/wanted persons.

State criminal history repository practices

Fingerprint record processing by State criminal history repository, 2008 (table 16):

- Thirty-two State repositories conduct "lights-out" processing of fingerprints (an identification decision is made without fingerprint technician intervention).
- Fifteen State repositories conduct lights-out processing of 80% or more of criminal and noncriminal fingerprints.
- Eighteen State
 repositories conduct
 lights-out processing of
 70% or more of
 criminal and
 noncriminal
 fingerprints.
- Twenty State repositories conduct lights-out processing of 50% or more of criminal and noncriminal fingerprints.

State criminal history repository operating hours, 2008 (table 17):

Twenty-one States operate their repositories 24 hours per day, 7 days a week.
 Of those, 16 States also operate with fingerprint technicians onsite 24 hours per day, 7 days a week.

 Fifty States and Guam operate the repository at least 8 hours a day, Monday through Friday. Of those, 50 States also operate with fingerprint technicians onsite at least 8 hours per day, Monday through Friday.

Disposition data

Number of final dispositions reported to State criminal history repository, 2001, 2003, 2006, and 2008 (table 6):

 Forty-nine States and Guam provided data on the number of final dispositions reported to their criminal history repositories, indicating that nearly 12.5 million were reported in 2008.

Final disposition reporting, 2008 (table 6a):

- A reported total of nearly 4.6 million final case dispositions were sent to the FBI from 26 States and Guam.
- Sixteen States send final case dispositions to the FBI with 90% or more by machine readable data (MRD).
- Ten States and Guam send final case dispositions to the FBI

with 80% or more via hard copy or paper.

Automation of disposition reporting to State criminal history repository, 2008 (table 7):

- Thirty-eight States and Guam reported receiving court disposition data by automated means.
- Nine States reported that 25% or more of all dispositions received could <u>not</u> be linked to the arrest/charge information in the criminal history database.
- Thirty-two States reported that 30% or less of all dispositions received could <u>not</u> be linked to a specific arrest record.
- Twenty-nine States reported that 20% or less of all dispositions received could <u>not</u> be linked to a specific arrest record.
- Twenty-three States reported that 10% or less of all dispositions received could <u>not</u> be linked to a specific arrest record.

Timeliness of data in State criminal history repository

—Arrests

Arrest records submitted electronically, 2008 (table 8):

- Forty-two States, the
 District of Columbia,
 and Guam reported a
 total of nearly 5,300
 livescan devices in use
 as of December 31,
 2008, for criminal
 justice purposes only.
- Forty States and the District of Columbia reported a total of nearly 7,000 livescan devices in use for noncriminal justice purposes only.
- Twenty-five States reported a total of over 2,200 livescan devices in use for both criminal and noncriminal justice purposes.

Number of felony arrests and current status of backlog, 2008 (table 11):

 Thirty-seven States, the District of Columbia, and Guam reported a total of nearly 3.1 million felony arrests in 2008. Some States and territories indicated that, at the time of the survey, they had backlogs in entering arrest data into their criminal history databases. A total of nearly 298,000 unprocessed or partially processed fingerprint cards for automated fingerprint identification system (AFIS) databases were reported by 14 States.

—Disposition data

Length of time to process disposition data submitted to State criminal history repository and current status of backlog, 2008 (table 12):

- Twenty-three States, Guam, and the Virgin Islands reported a backlog of entering court disposition data into the criminal history database.
- A total of more than 1.6 million unprocessed or partially processed court disposition forms are reported by 20 States, ranging from 52 in Illinois to 724,541 in Utah.

- Based on responses from 34 jurisdictions, the length of time between occurrence of the final felony court disposition and its receipt by the repository ranges from 1 hour or less in New Jersey and New York to 510 days in Kansas.
- Based on responses from 38 jurisdictions, the number of days between the receipt of a final felony court disposition and its entry into the criminal history database ranges from less than 1 day in Connecticut, Hawaii, Indiana, New Jersey, New York, and Utah to 854 days in Kansas.
- Four States (California, Indiana, Ohio, and Rhode Island) use livescan devices in the courtroom to link positive identification with dispositions.

—Admission to correctional facilities

Length of time to process correctional admission data submitted to State criminal history repository and current status of backlog, 2008 (table 13):

- Based on responses from 41 jurisdictions, the length of time between the receipt of correctional information and its entry into the criminal history database ranges from 1 day or less in 24 jurisdictions, to 180 days in Alabama.
- Twenty-seven jurisdictions reported that at least one correctional agency reports by automated means.
- Twenty-five jurisdictions receive 95% or more of admission/status change/release activity information via agencies using automated reporting means.
- Eight jurisdictions indicate that they have or had backlogs in entering correctional information into their criminal history databases. A total of more than 1.5 million unprocessed or partially processed corrections reports are reported from five jurisdictions.

Criminal and noncriminal justice background checks

Criminal and noncriminal justice background checks submitted electronically, 2008 (table 9):

- Forty-nine States and the District of Columbia reported a total of nearly 10.7 million fingerprints submitted to the repository via livescan devices for <u>criminal</u> justice purposes.
- Forty-five States and the District of Columbia reported a total of over 7.7 million fingerprints submitted to the repository via livescan devices for <u>noncriminal</u> justice purposes.
- Thirty-one States and the District of Columbia reported that 80% or more of all criminal justice purpose fingerprints are submitted to the repository via livescan devices.
- Eighteen States and the District of Columbia reported that 90% or more of all criminal justice purpose fingerprints are

- submitted via livescan devices.
- Twelve States reported that 80% or more of all noncriminal justice purpose fingerprints are submitted to the repository via livescan devices.
- Six States reported that 90% or more of all noncriminal justice purpose fingerprints are submitted via livescan devices.
- Twenty-nine States and Guam indicate that the fingerprint databases maintained by their State repositories contain some noncriminal justice fingerprints.
- Three States reported noncriminal justice fingerprints represent 50% or more of the criminal history fingerprint records.
- Twelve States reported noncriminal justice fingerprints represent 30% or more of the criminal history fingerprint records.
- Forty-seven States, the District of Columbia, and Guam reported a combined total of nearly 5,700 agencies

- submitting fingerprints via livescan devices for <u>criminal justice</u> purposes.
- Forty-four States, the
 District of Columbia,
 and Guam reported a
 combined total of more
 than 10,300 agencies
 submitting fingerprints
 via livescan devices for
 <u>noncriminal justice</u>
 purposes.
- Twenty-seven States and the District of Columbia reported a combined total of more than 6,500 agencies without livescan devices that receive livescan services from other agencies.

Noncriminal justice applicant information, 2008 (table 9a)

Seventeen States combine both criminal events and noncriminal justice applicant information in the same record. Of these, 12 States reported that more than 1.9 million records contained both criminal events and noncriminal justice applicant information. And of these 12 States, nine reported that these records represent from 3% to 21% of the total records in their

database, for an average of 8.1%.

Certification and privatization of fingerprint capture services, 2008 (table 10):

- Eleven States have programs to certify persons authorized to take fingerprints.
- Seventeen States have privatized the capture of noncriminal justice fingerprints.

Noncriminal justice namebased background checks, 2008 (table 14):

- Forty-three States and Guam reported receiving a total of over 42.3 million name-based noncriminal justice background check requests. Six States and Guam reported an identification rate of 95% or more.
- Twenty-four States received name-based noncriminal justice background checks via the Internet, with a reported total of over 37.8 million submitted online.

- Thirty-five States and Guam received namebased noncriminal justice background checks via the mail, with a reported total of over 2.2 million submitted that way.
- Six States received name-based noncriminal justice background checks via telephone, modem, or public walk-in access, with a reported total of 690,100 received by these various methods.

Noncriminal justice namebased background check processing, 2008 (table 14a):

- Thirty-two States and Guam reported at least four identifiers are required for namebased criminal history record searches. In most cases, these identifiers include first and last name, and date and year of birth. Five States require seven or more identifiers for a name-based criminal history records search.
- Twenty-five States and Guam reported at least four identifiers are required to "hit" before a name-based criminal history record search response is returned. In

- most cases, these identifiers include first and last name, and date and year of birth. Six States and Guam require six or more identifiers to "hit" on a name-based search before a response is returned.
- Twenty States offer at least one search feature for name-based criminal history background checks.

Noncriminal justice namebased background check results, 2008 (table 14b):

- In 24 States and Guam, a name-based noncriminal justice background check returns the <u>full</u> criminal history record.
- In 17 States, a namebased noncriminal justice background check returns <u>convictions</u> only.

Noncriminal justice namebased background check authorizations/fees, 2008 (table 14c):

• Twenty States reported that written consent by the subject is required before a name-based search is conducted.

• Local agencies in 13
States and Guam are
authorized to conduct
name-based checks of
state records for
noncriminal justice
purposes. Of these,
seven States and Guam
reported local
authorized agencies
charge fees ranging
from \$1 to \$29, for an
average fee of \$14.10.

Noncriminal justice fingerprint-based background checks, 2008 (table 15):

- Thirty-eight States and Guam retain some noncriminal justice fingerprints.
- Twenty States offer some form of "rap back" notification.
- In 31 States, the
 District of Columbia,
 and Guam, the full
 record is provided in
 response to a
 fingerprint-based
 noncriminal justice
 background check.
- In seven States, the results of a fingerprintbased noncriminal justice background check contain conviction information only.

Noncriminal justice fingerprint-based background check requirements, 2008 (table 15a):

- Forty-nine States reported that criminal history background checks are legally required for the following:
 - nurses/elder caregivers (41 jurisdictions)
 - daycare providers(46 jurisdictions)
 - individuals who live in the residences of home-based daycare providers (40 jurisdictions)
 - school teachers (47 jurisdictions)
 - nonteaching school employees (38 jurisdictions)
 - volunteers working with children (30 jurisdictions)
 - prospective foster care parents (48 jurisdictions)
 - prospective adoptive parents (47 jurisdictions)
 - relative caregivers(26 jurisdictions)
 - nonteaching school personnel (38 jurisdictions)

 hazardous materials licensees (29 jurisdictions)

Fees for State criminal history repository services

FBI fee retention, 2008 (table 15b)

- Thirteen States and Guam, representing 25% of the responding jurisdictions, retrieve the Interstate Identification Index (III) record through the FBI and forward it to the requestor when the State check reveals a III record rather than forwarding the fingerprints to the FBI.
- Nine of these States and Guam retain the FBI fee, while none reported that the FBI fee is returned to the requestor.

Fees charged by State criminal history repository for noncriminal justice purposes, 2008 (table 18):

• Thirty-three States and Guam offer noncriminal justice fingerprint-supported criminal history checks, at an average price of \$27.10 with retention of fingerprints. Fees range

from \$10 in Idaho and New Mexico to \$75 in New York.

- Thirty-seven States offer noncriminal justice <u>fingerprint-supported</u> criminal history checks, at an average price of \$19.69 without retention of fingerprints. For those States that assess fees, the fees range between \$2 in Pennsylvania to \$75 in New York.
- Twenty-two States offer noncriminal justice fingerprint-supported criminal history checks for volunteers at an average price of \$21.71 with retention of fingerprints.
- Thirty-one States offer noncriminal justice <u>fingerprint-supported</u> criminal history checks for <u>volunteers</u> at an average price of \$16.23 without retention of fingerprints.

Fees charged for additional services by State criminal history repository, 2008 (table 19):

 Nineteen States and Guam allocate <u>all</u> fees collected for noncriminal justice background checks to

- their State repository operations or support agencies.
- Thirteen States allocate <u>all</u> fees collected for such purposes to their States' general funds.
- Eight States allocate a <u>percentage</u> of collected fees to State repository operations.
- One State (West Virginia) allocates collected fees to its State Police retirement fund.

Fees charged for webbased services by State criminal history repository or other entity for noncriminal justice purposes, 2008 (table 20):

- Twenty State repositories provide web-based noncriminal justice background checks. Of the 19 repositories that charge a fee for this service, the average fee is \$15.51 per search.
- Sixteen State offices of court administration provide web-based noncriminal background checks with an average fee of \$13.05 collected by the private agencymaintained website. Of these collected fees, an

- average of \$8.55 is returned to the State repository.
- Five States reported that repositories and offices of court administration both provide web-based noncriminal background checks. (Kansas, Oregon, Vermont, Washington, and Wisconsin.)

Table 1 explanatory notes:

- Percentages and numbers reported are estimates.
- Percentages have been rounded to the nearest whole percent.
- Numbers have been rounded to the nearest 100.
- ... Not available.
- The "number of subjects (individual offenders)" in the State criminal history file for each year applies only to the criminal history file, including partially automated files, and does *not* include release by police without charging, declinations to proceed by prosecutor, or final trial court dispositions.
- The total number of subjects (individual offenders) in State criminal history files does not include Alabama, American Samoa, New Hampshire, the Northern Mariana Islands, Puerto Rico, or the Virgin Islands, from which no data were submitted.

Data footnotes:

- a The California total number of combined criminal and applicant records on file as of December 31, 2008, was 20,295,178, of which 48.4% were criminal and 85% of the criminal records were automated.
- b Juvenile disposition data were not required to be submitted until July 2008, for day forward, not historic data. If juveniles are not calculated into the totals, then the numbers would be: a) 51.1%; b) 62.1%; c) 71.8%.
- c Total disposition numbers have fallen because of the acceptance of all arrests from the contributing agencies and the lack of a strong program to get declined prosecutions from the prosecutors.
- d Figures reflect arrest records maintained by the repository. Massachusetts has additional non-fingerprint supported records maintained by a separate agency.

Table 2 explanatory notes:

- Percentages and numbers reported are estimates.
- Percentages have been rounded to the nearest whole percent.
- Numbers have been rounded to the nearest 100.
- ... Not available.
- The totals for the percent of automated files and the percent change in total files represent percentages of column totals, not averages.
- The total number of subjects in manual and automated State criminal history files for 2008 does not include Alabama, American Samoa, New Hampshire, the Northern Mariana Islands, Puerto Rico, or the Virgin Islands, from which no data was submitted.
- The "number of subjects (individual offenders)" in the State criminal history file for each year applies only to the criminal history file, including partially automated files, and does not include the master name index.

Data footnotes:

- The California figures for 2006 and 2008 were updated subsequent to this report being published. The numbers in this table represent the accurate numbers for the state. Note: the figures for 2006 have been changed in this table, but **not** in the corresponding table included in the *Survey of State Criminal History Information Systems*, 2006 report.
- The total increased due to changes in processing operations.
- c The 2008 numbers decreased due to consolidations and expungements.
- d The Tennessee figure represents the total number of criminal history files/fingerprint cards in the database, which may include multiple files for an individual offender.

Table 4 explanatory notes:

- Percentages and numbers reported are estimates.
- ... Not available.

Data footnotes:

- a Figure refers to active orders as of 2/9/09.
- b This figure includes inactive orders that are still in the database.
- c Protection order information is maintained by the Indiana State Police Criminal Justice Data Division. The repository queries the file daily with regard to firearm permit holders and new applications.
- d Protective orders are available through the State network but are not considered part of the criminal history because they are not fingerprint-based.
- e Figures are as of 4/7/09.
- f All records after 1994 are flagged, not prior.
- g Queries spawn a check of the State Protective Order database.

Table 5. State registry of sex offenders, 2008

| State | Total number of registered sex offenders | Number of registered sex offenders on publicly available State registry | Actual total record count from FBI-NCIC (1/1/2009) | Percentage on publicly available State registry | |
|--------------------------|------------------------------------------|-------------------------------------------------------------------------|----------------------------------------------------------|-------------------------------------------------|---|

Table 5 explanatory notes:

- Percentages and numbers reported are estimates.
- Percentages have been rounded to the nearest whole percent.
- Numbers have been rounded to the nearest 100, except for the FBI-NCIC record count.
- Not available
- The total number of State registered sex offenders does not include American Samoa, the District of Columbia, Indiana, the Northern Mariana Islands, Oklahoma, Puerto Rico, or the Virgin Islands, from which no data was submitted.

Data footnotes:

- a Total figure in the database was 10,883 as of 3/25/2009.
- b Only level 2 and 3 offenders are posted on the site.
- c The Indiana Sex Offender Registry is maintained by the Indiana Department of Correction in partnership with the Indiana Sheriffs' Association.
- d Does not include the number of persons incarcerated (1,480) awaiting release, as Oregon law does not require them to register until they are released.
- e Oregon registry is for high-risk offenders only.

In addition to criminal history information, to what other records did your State provide access in 2008?

Table 5a explanatory notes:

... Not available.

- a Alaska also provides rap back for certain government agencies.
- In addition to criminal history information, Colorado provides access to the Carry Concealed Weapon (CCW) file.
- c Public may sign up for email notification of Sexually Violent Predators (SVPs).
- d Georgia contributes data to the NCIC wanted persons file, but does not maintain a local database.
- e Orders of protection are not accessible by the public but can be accessed by statewide criminal justice users.
- f Firearm permits and rap-back for those permit holders to Indiana State Police firearms section.
- g Missing persons, concealed handgun permits.
- h CCW, Parole and Probation, DMV vehicle and driver's license. CCW permit fingerprints are for rap back only.
- i Some Department of Corrections.
- j Permit to carry a firearm.
- k Child abuse registry/concealed weapons permit.

Table 6. Number of final dispositions reported to State criminal history repository, 2001, 2003, 2006, and 2008

| State | 2001 | 2003 | 2006 | | 2008 | | 2001-2003 | 2003-2006 | 2006-2008 |

Table 6 explanatory notes:

- Percentages and numbers reported are estimates.
- Percentages have been rounded to the nearest whole percent.
- Numbers have been rounded to the nearest 100.
- ... Not available.
- Final dispositions include release by police without charging, declination to proceed by prosecutor, or final trial court disposition.
- Except for Ohio, for which corrected data were submitted, the data in the columns for 2001 were taken from Bureau of Justice Statistics, Criminal Justice Information Policy: *Survey of Criminal History Information Systems*, 2001 (September 2003), Table 3.
- Except for Ohio, for which corrected data were submitted, the data for 2003 were taken from Bureau of Justice Statistics, Criminal Justice Information Policy: Survey of Criminal History Information Systems, 2003 (February 2006), Table 3.

- a Figure includes all Florida charge levels for calendar year 2001.
- b 818,953 entered into the Florida computerized criminal history (CCH) file.
- c Figure includes dispositions received where there is no associated fingerprint-based arrest in CCH.
- d Increase due to Idaho beginning to receive all dispositions and discarding those not matching.
- e Increase due to Kentucky beginning Automated Fingerprint Identification System (AFIS) to CCH interface and Administrative Office of the Courts (AOC) to CCH database.
- f The Commonwealth of Massachusetts has a separate disposition database. Currently these dispositions are not submitted to the repository. Ninety-nine percent of records in the Massachusetts database have dispositions.
- g Figure includes all transmissions (not unique court files), including juvenile dispositions
- h 2003 Nevada total included incomplete dispositions. 2006 total does not include incomplete dispositions.
- i The figure represents final New Jersey charge dispositions.
- j Figure represents total dispositions received; however, several of those cases were reported multiple times (each time a clerk makes a change, information is received again). There is no way to separate those from the count.
- k Increase due to online connectivity of Utah courts and other system changes.

Percent of FBI-

Table 6a explanatory notes:

- Percentages and numbers reported are estimates.
- Percentages have been rounded to the nearest whole percent.
- Numbers have been rounded to the nearest 100.
- ... Not available.

- a Not all criminal history records maintained in Alaska's CCH are based on positive fingerprint identification. Consequently, unable to send to FBI in these cases.
- b 99.9% MRD through May/June 2008; 99.99% through III beginning June 2008.
- c 818,953 entered into the Florida CCH file.
- d Florida is an NFF state and does not submit dispositions to the FBI.
- e Idaho is an NFF state and does not submit dispositions to the FBI.
- f Indiana is beginning to test sending dispositions via the III Message Key.
- g Nebraska has migrated to a new criminal history system and has not been able to submit a working MRD. The Nebraska State Police has continuously worked with the FBI to ensure MRD information is sent in a timely manner.
- h New Jersey is an NFF state and does not submit dispositions to the FBI.
- i One hundred percent of those convicted were sent to the FBI.
- j Figure represents total dispositions received; however, several were reported multiple times. There is no way to separate those from the count.

Table 7. Automation of disposition reporting to State criminal history repository, 2008

| Maibana | State | Percentage of all dispositions received that could <u>not</u> be linked to a specific arrest record | | Was any court disposition data reported directly to the repository by automated means? | Does your state have a statewide Administrative Office of the Courts (AOC)? | Does the AOC provide disposition information to the state repository? |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|--------------------------------------------------------------------------------------------------------------|---|----------------------------------------------------------------------------------------|-----------------------------------------------------------------------------|-----------------------------------------------------------------------|

Table 7 explanatory notes:

- Percentages and numbers reported are estimates.
- Percentages have been rounded to the nearest whole percent.
- ... Not available.
- na Not applicable.

- a In Alabama, the 2008 dispositions have not been entered due to a backlog.
- b Florida State law requires that juvenile arrests be reported to the repository for felonies and only certain specified misdemeanor offenses. As of 7/1/08, clerks of court are required to submit all juvenile dispositions. For this reason, many juvenile dispositions reported relate to offenses for which the repository did not receive arrest fingerprints.
- c In Georgia, it is unknown how many dispositions are submitted by law enforcement vs. courts, although the majority would be from individual courts. With new computerized criminal history (CCH), the repository will be linking dispositions to individual charges.
- d Indiana's repository is currently receiving the bulk of dispositions from the Prosecuting Attorneys' system, PROSLINK. The court Judicial Technology Advisory Committee (JTAC) is building a statewide automated court reporting system that will ultimately send dispositions electronically to the repository.

Table 8 explanatory notes:

- ... Not available.
- na Not applicable.

- a Noncriminal prints are not sent electronically.
- b It is unknown how many livescan devices are used for only criminal justice purposes.
 They may be used exclusively for criminal arrest processing or may provide local service for employment/licensing applicants.
- c All livescan devices are capable of submitting criminal and noncriminal fingerprints; however, policy prohibits the submission of applicant prints.
- d Total figure refers to number known by Nevada Department of Public Safety only.
- e Most livescan devices represented here are at county jails that book for all local law enforcement within the county (PD, SO, SP). Twenty-five of 36 total counties.

Table 9 explanatory notes:

- Percentages and numbers are estimates.
- Percentages have been rounded to the nearest whole percent.
- Numbers have been rounded to the nearest 100.
- ... Not available

- a Figure represents number of locations, not machines.
- b These are the percentages of prints submitted via livescan to the repository. One hundred percent are submitted electronically to the FBI.
- c Total figure refers to number known by Nevada Department of Public Safety only.
- d Most livescan devices represented here are at county jails that book for all local law enforcement within the county (PD, SO, SP). Twenty-five of 36 total counties.
- e South Dakota does have agencies that use livescan devices to print applicants, but the cards are printed out and mailed to the Division of Criminal Investigation (DCI), not submitted electronically via livescan.

Table 10 explanatory notes:

• ... Not available.

- In Idaho, some noncriminal justice agencies are exploring outsourcing these services.
- b Unable to answer; there are several vendors.
- c Used by Department of Child Services (DCS). They provided DCS with software to generate letters. Vendor has no access to CHRI.
- d The State of Indiana just signed a contract April 3, 2009, with L-1 Identity Solutions to provide noncriminal justice applicant/volunteer fingerprinting statewide. Their fee is \$10.95 per transaction.
- e Accepted fingerprints are from law enforcement agencies.
- f Executed a contract in February 2009 with L-1 Identity Solutions to take and launch civil fingerprint transactions for an initial fee of \$11.50 (amount will change based upon volume). Implementation has begun in Spring 2009.
- The Oklahoma State Bureau of Investigation (OSBI) trains all current Livescan operators per MOU between site and OSBI. Additionally, OSBI offers ink fingerprint training to law enforcement. No training is offered to the private sector.
- h Individuals may conduct searches on website by utilizing a credit card account or they may establish a billing account. Nonprofit organizations may set up an account for no fee.

Table 11. Number of felony arrests and current status of backlog, 2008

Table 12 explanatory notes:

- ... Not available.
- na Not applicable.

- a In Connecticut, final felony trial court dispositions link up with information immediately upon automated receipt.
- b This figure represents a median, not an average.
- c In Hawaii, court dispositions are sent electronically to the repository once a week and are posted directly into the criminal history record database.
- The Hawaii court disposition backlog reflects the number of delinquent court charges and pending charges that we identify through our ongoing delinquent monitoring programs because the repository does not receive court forms for the purpose of ongoing data entry. Court dispositions are posted primarily via electronic interfaces to the repository.
- e This figure is skewed due to entering old records from shelf because we request dispositions we never received.
- f Immediate.
- g Six-month backlog; unsure of number.
- h Thirty-day time lapse is a holding period that was established to ensure that the arrest is entered in CCH before the disposition is transmitted electronically.
- i This is due to the transition to a new criminal history system and delay in receiving electronic input from the courts (monthly dump).
- j Disposition backlog was for electronically submitted dispositions requiring human intervention to link to associated arrest event.

Table 13. Length of time to process correctional admission data submitted to State criminal history repository and current status of backlog, 2008

| State | Average number of days between receipt of corrections data and entry into criminal history database | Number of corrections agencies currently reporting by automated means | Percent of admission/status change/release activity occurring in State represented by agencies reporting by automated means | Backlog of entering corrections data into criminal history database | Number of unprocessed or partially processed corrections reports |

Table 13 explanatory notes:

- Percentages and numbers are estimates.
- Percentages have been rounded to the nearest whole percent.
- ... Not available.
- na Not applicable.

- a The Hawaii Department of Public Safety sends admissions, releases, and status changes to the repository via an electronic file transfer/interface on a daily basis. Information as to the timeliness of this information, etc., is not available.
- b Only the admission status is reported automatically, via livescan on entry into the corrections system.
- c The Indiana Department of Corrections is the only State correctional agency. It reports all information on offenders initially via livescan and subsequent movements are submitted on 8"x8" fingerprint cards.
- d Admission information only.
- e Corrections data are not submitted to the repository but they are available in a separate automated database.
- f The Michigan State Police CHR is linked to the Department of Corrections information. Correctional information is not actually submitted to the CHR.
- g Currently receptions into the Oklahoma Department of Corrections are fingerprint-based and submitted electronically to the Criminal History Database. These submissions include descriptor information, fingerprints, mug photos, palm prints, and arrest information. There is no backlog of these entries. Sentence information is submitted separately and must be manually entered. Custody changes (releases, movement, etc.) are submitted manually. There is a current 2-week backlog of these manual submissions.

Number of name-based noncriminal justice background checks

Table 14 explanatory notes:

- Percentages and numbers reported are estimates.
- Percentages have been rounded to the nearest whole number.
- Numbers have been rounded to the nearest 100.
- ... Not available.
- na Not applicable.

- a Telephone figure actually refers to in-person checks.
- b In Colorado, there is a 100% identification rate when the subject has a criminal record in this State.
- c 422,635 received via modem, 0 by phone.
- d Hawaii reported in 2006 only the number of Internet-based searches that were purchased. The 2008 number represents the total number of searches, regardless of whether or not the rap sheet was purchased.
- e Illinois does not currently have an Internet-based name check service, but offers a means of electronic submission of name-based requests.
- f This figure includes name/DOB checks run by the repository, and does not include the 274,400 name-based checks run by the Minnesota Departments of Human Services and Education via interface. Nor does it include the name-based Minnesota noncriminal checks run by law enforcement agencies.
- g All noncriminal background checks processed by the repository are fingerprint-based. However, if prints are rejected, we provide a name-based check.
- h Additional 94,346 checks over NLETS to include firearms.

Table 14b explanatory notes:

- a In Georgia, sealed First Offender records are restricted to certain purpose codes.
- b Nebraska statute 29-3523 went into law on 9/1/07 and requires that (1) not filed charges shall be removed from public view after 1 year from the arrest, (2) successful completion of diversion shall be removed from public view 2 years after public view, and (3) dismissed by the court on motion of the prosecutor shall be removed from public view 3 years after arrest. Exceptions: (1) subject is currently being prosecuted or under correctional control for a separate arrest, (2) announced candidate for public office, or (3) has made a notarized request for the release of such record to a specific requester.

Table 15 explanatory notes:

- Percentages reported are estimates.
- Percentages have been rounded to the nearest whole percent.
- ... Not available.

• na Not applicable.

Data footnotes:

- Alabama retains noncriminal justice fingerprints for applicants.
- In Colorado, ID rate is 100% when subject has previously submitted prints or has criminal history.
- Florida retains noncriminal justice fingerprints for security of seaports. С
- Only to Indiana State Police firearms section.
- e Used only when name hits for firearm permits.
- f In Kansas, some noncriminal justice State agencies have legislation that allows for nonconviction and juvenile information.
- Other, if required for ongoing standards.
- Partially retained for firearm licenses.
- Also utilized for a rap back.
- Missouri retains all applicant fingerprints.
- Nebraska Statute 29-3523 went into law on 9/1/07 and requires that (1) not filed charges shall be removed from public view after 1 year from the arrest, (2) successful completion of diversion shall be removed from public view 2 years after public view, and (3) dismissed by the court on motion of the prosecutor shall be removed from public view 3 years after arrest. Exception: (1) subject is currently being prosecuted or under correctional control for a separate arrest, (2) announced candidate for public office, or (3) has made a notarized request for the release of such record to a specific requester.
- Nebraska retains all applicant fingerprints as electronic images. 1
- For the full record, the majority except for NRS 449.176 and NRS 179A.210. For the convictions, it's only NRS 179A.210. m
- Carry Concealed Weapon Permits and schools. All others are archived for 3 years and then destroyed.
- Concealed handgun permits. 0
- Concealed weapon permit holders.
- Public housing. a
- Only for applicants stored in AFIS.
- Law enforcement officers.
- Retained to eliminate latents from crime scenes. t
- Special services districts.
- Vermont Department of Public Safety applicants.

Legend: State retains noncriminal justice fingerprints

- 1 Licensing.
- 2 Private sector employment.
- 3 Employment by justice agencies.
- 4 Employment by noncriminal government agencies.
- 5 Retention limited to private sector employment involving vulnerable populations, e.g., children, the elderly, and the disabled.

Table 15a. Noncriminal justice fingerprint-based background check requirements, 2008

Average processing time (days)

Table 16 explanatory notes:

- Percentages and numbers are estimates.
- Percentages have been rounded to the nearest whole percent.
- ... Not available.
- na Not applicable.

Data footnotes:

- a Figures represent work days.
- b Percentage figures are based on the number of new SIDs only.
- c "Lights-out" processing for criminal, not civil.
- d The Division of Criminal Justice Services has a partial "lights out" processing on the back end for "sure hits" but not for "no sure hits." Patterns may be entered manually on the front end.

Data footnotes:

- a In Colorado, no charge to law enforcement agencies only.
- b There is no fee if the volunteer being checked is going to work for a nonprofit agency with direct contract with children, the elderly, or the disabled. No fee is assessed for government checks via the mail if for criminal justice purposes.
- c *The New York State Division of Criminal Justice Services maintains a personal record review program (9 NYCRR 6050.1) -\$50 processing fee.
 - **This is a base processing fee of \$25 supplemented by two surcharges of \$25 each as mandated by the Legislature.

Survey Instrument: Survey of State Criminal History Information Systems, 2008

Survey of State Criminal History Information Systems, 2008

Since 1989, the *Survey of State Criminal History Information Systems* has been used to collect the nation's most complete, comprehensive and relevant data on the number and status of state-maintained criminal history records and on the increasing number of operations and services provided by the state repositories.

Respondents using the online survey tool, accessible at http://www.search.org/surveys/repository, to enter 2008 data can view previously submitted 2006 data for comparison purposes. References to your state's 2006 responses are displayed within each section of the online form. It is hoped that this information will assist respondents in completing the survey more accurately and efficiently. If you have any questions or comments, please contact SEARCH staff Dennis DeBacco at 916-392-2550 ext. 325, email dennis.debacco@search.org.

If more convenient, the survey sections may also be printed, completed manually, and faxed to the attention of Ms. Cheryl Moore at SEARCH at 916-392-8440. Responses will also be accepted by mail, directed to Ms. Cheryl Moore, SEARCH, 7311 Greenhaven Drive, Suite 145, Sacramento, CA 95831.

Recognizing that some previously collected information changes infrequently, the 2008 survey contains about 40% fewer questions than the 2006 version. The survey is divided into 7 sections, each of which may be submitted independently and not necessarily in the order presented. This was done so that different people on each repository's staff may submit the data for which their section is responsible. **Repository directors will still be responsible to see that the survey is submitted in its entirety**. Please note the following:

- 1. All reported data should be for calendar year 2008, or as of December 31, 2008.
- 2. The term "felony" includes any crime classified as a felony under your state's laws. These offenses are generally punishable by a term of incarceration in excess of one year. If your state's laws do not use the term "felony," please substitute functional equivalents, such as class 1, 2, 3 and 4 offenses in New Jersey and class A, B and C offenses in Maine.
- 3. Questions which seek responses based on a "legal requirement," refer *only* to a *state statute* or a *state administrative regulation having the force of law*.
- 4. If additional space is needed, please use the "Additional Comments" area at the end of each section.
- 5. Please use the "Additional Comments" area at the end of each section to identify questions for which "no data is available."
- 6. If a question is not applicable to your repository, please indicate "NA" in the "Additional Comments" area at the end of each section.

Burden Statement

Under the Paperwork Reduction Act, we cannot ask you to respond to a collection of information unless it displays a currently valid OMB control number. The survey will be sent to criminal history repositories in 56 jurisdictions, including the 50 States, the District of Columbia, American Samoa, Guam, the Northern Mariana Islands, Puerto Rico and the U.S. Virgin Islands. The average time required for each agency to complete the survey is estimated at 3 hours. Send comments regarding this burden estimate or any aspect of this survey, including suggestions for reducing this burden, to the Director, Bureau of Justice Statistics, 810 Seventh Street, NW, Washington DC 20531. Do not send your completed form to this address.

| | <u>Purpose</u> | Number | Percentage of 2008 volume | <u>Totals</u> |
| | (a) Criminal | (table 1a) | (table 1a) | |
| | (b) Non-criminal (not retained) | (table 1a) | (table 1a) | |
| | (c) Non-criminal (retained) | (table 1a) | (table 1a) | (b+c) <u>(table 1a)</u> |
| | (d) What was the <u>total number</u> background checks conducted | | based | (a+b+c) <u>(table 1a)</u> |

| 3. | (a) Does your state retain any non-criminal justice fingerprints? |
|----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| | ☐ Yes ☐ No (table 15) |
| | (b) Non-criminal justice fingerprints represent <u>(table 9)</u> percent of the total fingerprints maintained by the state criminal history repository. |
| 4. | (a) Does your state combine both criminal events and non-criminal justice applicant information in the same record? |
| | ☐ Yes ☐ No (table 9a) |
| | (b) If so, how many records on your database contain both criminal events and non-criminal justice applicant information? (table 9a) |
| | (c) Of the total records on your database <u>(table 9a)</u> percent represent records that contain both criminal events and non-criminal justice applicant information. |
| 5. | (a) Percentage of criminal prints submitted via livescan during 2008?(table 9) % |
| | (b) Percentage of non-criminal prints submitted via livescan during 2008? <u>(table 9)</u> % |
| 6. | Do you have felony conviction flagging capability, i.e., does your criminal history record database include a data field or flag enabling you to quickly determine whether a given record subject has a felony conviction? (table 4) |
| | ☐ Yes, all subjects with felony convictions |
| | ☐ Yes, some subjects with felony convictions |
| | □ No |

SECTION II: ARREST/FINGERPRINT REPORTING AND ENTRY

| | This section completed by |
|----|--------------------------------------------------------------------------------------------------------------------|
| | Name Title |
| | Agency |
| | Phone Email |
| | Date Completed |
| 1. | How many felony arrests were reported during calendar year 2008? |
| | <u>(table 11)</u> arrests |
| 2. | How many fingerprints were submitted to the repository via livescan during 2008? |
| | (a) <u>(table 9)</u> criminal justice |
| | (b) <u>(table 9)</u> non-criminal justice |
| 3. | (a) As of December 31, 2008, was there a backlog of arrest data to be entered into the AFIS database? |
| | ☐ Yes ☐ No (table 11) |
| | (b) If yes, how many unprocessed or partially processed fingerprint cards (work backlog) did yo have at that time? |
| | (table 11) |
| | (c) ☐ Size of backlog as of December 31, 2008, is not available (table 11) |
| 4. | What biometric information does your repository retain? Check all that apply: (table 3) |
| | ☐ Latent fingerprints |
| | ☐ Flat prints |
| | ☐ 2-Finger prints for identification purposes |

| | ☐ 2-Finger prints for updating incarceration or release identification | |
|----|--------------------------------------------------------------------------------------------------------------------------------|------------|
| | ☐ Palm prints | |
| | ☐ Facial images/mug shots | |
| | ☐ Scars, Marks, and Tattoo images | |
| | ☐ Facial Recognition Data | |
| | ☐ 1- or 2-Finger prints for updating disposition information | |
| | ☐ Other: | |
| | | |
| 5. | Please indicate the number of livescan devices in use as of December 31, 2008 | : |
| | (a) Total number of livescan devices available for <u>criminal</u> justice purposes only: | _(table 8) |
| | (b) Total number of livescan devices available for <u>non-criminal</u> justice purposes only: | _(table 8) |
| | (c) Total number of livescan devices used for both <u>criminal</u> and <u>non-criminal</u> justice purposes: | _(table 8) |
| | (d) Grand total of livescan devices in use: | (table 8) |
| 6. | Please indicate: | |
| | (a) Total number of agencies that submit criminal prints via livescan: | (table 9) |
| | (b) Total number of agencies that submit non-criminal prints via livescan: | (table 9) |
| | (c) Total number of agencies without livescan devices that receive livescan services from agencies that do have that equipment | (table 9) |
| | (e.g., a sheriff might submit arrest prints on behalf of 20 agencies): | (table 9) |

SECTION III: DISPOSITIONS

| | | This section completed by | |
|--------|--------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------|-----------------------|
