ACQUISITIONS

This directory has been prepared to provide users of the National Law Enforcement Telecommunications System (NLETS) with an organized and cross-referenced list of criminal justice agency addresses using the Federal Bureau of Investigation's ORI's. It is the culmination of a four year LEAA supported effort to improve interstate telecommunications for criminal justice.

During the period from 1973-1977, the NLETS network has evolved from an overburdened, low-speed teletype system to a high-speed, fully automated message routing system serving law enforcement agencies in the fifty states. Excellent service is now available to NLETS users at a reasonable cost.

The preparation and publication of this directory is a continuation of the overall effort to provide service to NLETS users, and will serve as an easy to use reference listing of the addresses of local, state and Federal criminal justice agencies in the U.S. and Canada which have access to or are accessible through the NLETS network.

LEAA would like to express its appreciation to the Federal Bureau of Investigation for their cooperation, and especially for their willingness to provide the NCIC magnetic tapes of ORI addresses, without which the publication of this document could not have taken place.

A. PURPOSE

NLETS is a nationwide message switching system created to provide for the interstate exchange of criminal justice and criminal justice related information. To facilitate this exchange, NLETS utilizes the Federal Bureau of Investigation (FBI) ORI's as addresses.

The principle purpose of this directory is to provide law enforcement and criminal justice users with the ability to easily locate an agency's ORI based on the name and/or location of that agency.

B. CONTENT AND ORGANIZATION

The directory is divided into four parts. Within each subdivision, agencies have been sequenced to provide maximum usability by the NLETS user.

Part I - Law Enforcement Agencies

This section, subdivided by state, is sequenced alphabetically by agency name. In addition, agencies are also listed under the city in which they are located if the city name and the agency name differ. These additional entries are asterisked (*) and indented. State agencies may be found under both their name as well as the location of the agency.

Federal agencies in each state may be found at the end of each state's listing.

Part II - Criminal Justice Agencies

The section, also subdivided by state, is sequenced alphabetically by location.

Part III - Federal Agencies

This section is arranged alphabetically by federal agency name. Within each agency, the entries are sequenced alphabetically by location.

Part IV - Canadian Agencies

This section is arranged alphabetically by province. Within each province, the entries are sequenced alphabetically by location.

C. ORI CHANGES

Requests for additions, deletions, or corrections of ORI's should be coordinated through the NCIC control terminal agency within the users' state.
