Notice:
You must submit your application using the Office of Justice Programs’ automated Grants Management System. Paper applications will not be accepted. We suggest you begin the process as soon as possible. To start the process, go to http://www.ojp.usdoj.gov/fundopps.htm.

Deadline for Concept Papers:
January 5, 2005
8 p.m. eastern time

SL 000691
This and other publications and products of
the National Institute of Justice can be found
on the World Wide Web at:

National Institute of Justice

Office of Justice Programs
Partnerships for Safer Communities
http://www.ojp.usdoj.gov
I. Introduction

The National Institute of Justice (NIJ) is the research, development, and evaluation agency of the U.S. Department of Justice and a component of the Office of Justice Programs. NIJ provides objective, independent, evidence-based knowledge and tools to enhance the administration of justice and public safety. NIJ supports research that can provide knowledge and tools to guide policy and practice.

NIJ is seeking concept papers for foundational research, development and testing, or evaluation of technologies that can be used to increase the effectiveness of State and local law enforcement. NIJ is also soliciting papers for projects that advance the use of strategic problem-solving collaborations.

More specifically, NIJ is interested in concept papers in one of the following areas:

- Foundational research focused on identifying current information technologies or technological gaps in the field.
- Development and testing of current or new and innovative technologies.
- Evaluation of technologies with well-defined and measurable outcomes.

NIJ seeks studies that have the potential to reduce or prevent crime, or improve criminal justice policy and practice. The proposal process will consist of two stages: a concept paper that, if selected upon review, will be the basis for a full and detailed proposal.

Due date: The due date for this concept paper is listed on the cover of this announcement and on the NIJ Web site at http://www.ojp.usdoj.gov/nij/funding.htm. Extensions to the deadlines are generally not granted.

Page limit: The program narrative section of your concept paper must not exceed 15 double-spaced pages in 12-point font with 1-inch margins, except papers in response to section II B “Development and Testing,” which must not exceed 7 double-spaced pages. Abstract, table of contents, charts, figures, appendixes, and government forms do not count toward the page limit for the narrative section. (Full proposals, for applicants who will be invited to submit them, are usually limited to 25 to 30 pages.)
Reasons for rejection: NIJ may reject applications that are incomplete, do not respond to the scope of the solicitation, do not comply with format requirements, or are submitted after the deadline. No additions to the original submission are allowed.

How to submit applications to NIJ: Funding applications instructions are in “Guidelines: How to Submit Applications,” available on the NIJ Web site at http://www.ojp.usdoj.gov/nij/funding.htm.

II. Concept Paper Topics

NIJ seeks concept papers to research, develop, test, and/or evaluate technology and procedures that will assist policing professionals in their strategic and tactical efforts to reduce and prevent crime at the State and local levels.

Information-led policing emphasizes tools and partnership practices to process information and guide decisionmaking to reduce and prevent crime and other problems in communities. NIJ seeks concept papers that are responsive to one of the stages of technology development or partnership practices outlined below:

A. Foundational Research

NIJ seeks foundational research focused on identifying information-gathering technologies that could be used by law enforcement officers to enhance the administration of justice and public safety. Funds awarded under this part of the solicitation may support research on the needs and assessments of State and local agencies in order to identify requirements for technological solutions, or to identify problems that new technology could help solve. Foundational research should seek to determine how technological advances can be used (1) to improve the way police executives and officers gather and retrieve information and (2) to develop effective strategies and tactics to respond to or prevent crime and other problems in the community. In addition, foundational research aimed at identifying promising practices for achieving effective, data-driven, strategic problem-solving partnerships is also encouraged.

B. Development and Testing

NIJ encourages applicants to suggest projects that build on existing technologies or develop new and innovative solutions for solving crime and disorder. Proof-of-concept projects are also welcome, particularly if there is an expectation that the product developed as a result of the concept could rapidly be made available to the field. NIJ will consider proposals to develop only technology, but it is our hope that submissions will address the issues of commercialization and wide adoption.
Recognizing the breadth of information-led policing, NIJ is specifically interested in concept papers for development and testing in one of the following four categories:

1. Information Sharing
NIJ requests concept papers that assist State and local law enforcement, corrections, and other criminal justice agencies in their tasks of preventing, solving, and handling crime through the sharing of information between agencies or possible other sources. NIJ is interested in addressing a wide range of issues in information sharing, including but not limited to:

- Security and identity management in an environment where many agencies are tied together in a collaborative relationship.
- Transparent, timely, and secure access to pertinent information across multiple jurisdictions.
- Timely, secure dissemination of information to and from officers.
- Information filtering for State and local law enforcement, corrections, and other criminal justice agencies to help ensure that key information is not buried amid less useful data and that time is not wasted in lengthy information searches.

Applicants may want to follow the guidance provided by the Office of Justice Program’s Global Justice Information Sharing Initiative (http://www.it.ojp.gov), particularly the requirements established by the National Criminal Intelligence Sharing Plan (http://www.it.ojp.gov/documents/National_Criminal_Intelligence_Sharing_Plan.pdf).

2. Analytic Tools
State and local law enforcement, corrections, and other criminal justice agencies have access to vast amounts of data in a variety of formats including data, audio, video, and paper that can be used for crime investigations and prevention. NIJ is interested in proposals to develop affordable analytic tools and techniques that can extract useful information from the data, within the limits of applicable laws, regulations, and policies, including the privacy and constitutional rights of individuals. Of particular interest are projects that:

- Enable agencies to analyze information derived from data stored across multiple jurisdictions.
- Develop analytic tools, which may include, for example, free text extraction, matching and scoring, link analysis, GIS applications, and threat analysis.
- Fuse data and information, which may range from the fusion of multi-model data to architecture and/or concept of operations for a fusion center.
- Develop data analysis tools and practices that synthesize data sets from a variety of criminal justice and community sources.
3. Critical Incident Management
NIJ is interested in collaboration tools that assist State and local law enforcement, corrections, and other criminal justice agencies with incident management, situational awareness, and coordinated response. Of particular interest are concept papers addressing:

- Tools used in other industries that can seamlessly transition to State and local law enforcement, corrections, and other criminal justice agencies.
- Architecture development and concept of operations work with respect to State and local law enforcement.

4. Location and Tracking
NIJ is interested in technologies, policies, and procedures that keep officers safe while respecting privacy issues related to locating and tracking individuals. Specific areas of interest include:

- Tracking personnel in normal operations, undercover operations, and/or special operations.
- Tracking vehicles.
- Tracking convicted offenders who are under correctional supervision.

C. Evaluation Research
Under this solicitation, NIJ strongly encourages evaluations of technologies and practices designed to increase the effectiveness of State and local law enforcement, corrections, and other criminal justice agencies. NIJ encourages research that attempts to determine how well existing or newly developed technology and/or problem-solving strategies work to improve criminal justice policy and practice. NIJ is especially interested in evaluations aimed at improving data-driven, problem-solving policing that involves partnerships with researchers and other practitioner agencies.

Outcome evaluations must have well-defined, measurable indicators of success, such as increases in effective targeting of specific offenders or hot spots, increased capabilities to reduce crime and disorder through better problem-solving techniques, or better overall decisionmaking at the strategic and operational levels. Evaluations of technologies might also address issues of cost effectiveness, ease of use, and/or technical assistance requirements.

Concept Paper Requirements. Concept papers should clearly indicate which area of interest you are responding to: (A) Foundational Research, (B) Development and Testing, or (C) Evaluation Research. Concept papers should identify one as the main focus and only briefly address the relevance or potential for work in the other two areas. The research team should
comprise individuals who have experience in the type of research proposed, including the necessary social science or technological expertise or both. For projects focused on technology development or testing, the concept paper should describe the technology in as much detail as needed to understand its operations and the hardware or software requirements, along with any infrastructure or operational changes that will be necessary. Evaluations should assess the impact of technology or strategic practices in a real-world setting, testing for the contribution to key behavioral, organizational, or social outcomes.

Concept papers should indicate what additional key issues will need to be resolved for the concept to be fully functional. For example, questions might need to be raised about risks to the victim when protective or restraining orders end or other events occur, about the possibility that the system will engender a sense of subjective safety that leads to compromised planning, or about problems involving access to information by agencies that are collaborating with one another.

III. General Requirements and Guidance

NIJ is asking you to submit a concept paper that captures the essence of a full proposal. The main difference between a concept paper and a proposal is that concept papers are much shorter and do not contain detailed budgets.

Your concept paper should state the problem under investigation (including goals and objectives of the proposed project) and the relevance of the project to public policy, practice, or theory. The narrative program section should state the research question and objectives and explain how the work will contribute to knowledge and practice. It should describe in sufficient detail the research methods and analytic strategy.

While the concept paper should not include a detailed budget or management plan, it should include a staffing plan and an estimate of the funding required, summarized by task, and a general timeframe for completion of those tasks and the project as a whole.

The format for your concept paper is as follows:

1. Abstract of no more than 400 words.
2. Program narrative.
   a. Research question or problem.
   b. Research goals and objectives.
   c. Research design and methods.
   d. Implications for knowledge and practice.
   e. Dissemination plan for project deliverables.
   f. Description of estimated costs.
Peer reviewers will evaluate each concept paper and based on their recommendations, NIJ will invite authors of selected concept papers to submit full applications.

A. Submit applications online: Paper applications are not accepted. Applications must be submitted through the Office of Justice Programs’ online Grants Management System. NIJ suggests you begin the process early, especially if this is the first time you have used the system. To begin, go to http://www.ojp.usdoj.gov/fundopps.htm. There are three types of documents that can be uploaded to an application package: PDFs, Word documents, and text documents. The Grants Management System does not consider an application complete until three files are uploaded: (1) “Program Narrative.” (2) “Budget Detail Worksheet and Narrative,” and (3) “Other Program Attachments.” Upload your concept paper into the “Program Narrative” box. Concept papers do not have “Budget Detail Worksheets and Narratives” and do not have “Other Program Attachments.” Therefore, you should upload blank files into those boxes in the Grants Management System.

B. Relevance of the project for policy and practice: Higher quality concept papers clearly explain the practical implications of the project. They connect technical expertise with policy and practice. To ensure that the project has strong relevance for policy and practice, some researchers and technologists collaborate with practitioners and policymakers. You may include letters showing support from practitioners, but they carry less weight than clear evidence that you understand why policymakers and practitioners would benefit from your work and how they would use it. While a partnership may affect State or local activities, it should also have broader implications for others across the country.

C. Equal opportunity for all applicants: It is OJP’s policy that faith-based and community organizations that statutorily qualify as eligible applicants under OJP programs are invited and encouraged to apply for awards. Faith-based and community organizations will be considered for an award on the same basis as any other eligible applicants and, if they receive an award, will be treated on an equal basis with non-faith-based and community organization grantees in the administration of such awards. No eligible applicant or grantee will be discriminated against on the basis of its religious character or affiliation, religious
name, or the religious composition of its board of directors or persons working in the organization.

**D. Cofunding:** A grant made by NIJ under this solicitation may account for up to 100 percent of the total cost of the project. You must indicate whether you believe it is feasible for you to contribute cash, facilities, or services as non-Federal support for the project. Your concept paper should identify generally any such contributions that you propose to make. If you are asked to submit a full proposal, your proposed budget should indicate in detail which items, if any, will be supported with non-Federal contributions.

**E. Number of grants to be awarded:** NIJ’s grant award process is highly competitive. The number of awards to be made is subject to the availability of funds and the number and quality of applications received.

**F. When awards will be made:** All applicants, whether they are accepted or rejected, will be notified. The review and approval process for concept papers takes about 8 weeks. The review and approval process for full proposals takes about 6 months. You should not propose to begin work until at least 8 months after the concept paper deadline on the cover of this solicitation. Also, you should not expect to receive notification of a decision for at least 8 months after that date. Lists of awards are updated regularly on NIJ’s Web site at http://www.ojp.usdoj.gov/nij/funding.htm.

**G. Financial audits are required:** If your organization spends $500,000 or more of Federal funds during the fiscal year, you may be asked to submit an organization-wide financial and compliance audit report before any award is made. The audit must be performed in accordance with the U.S. Government Accountability Office Government Accounting Standards and must conform to Chapter 19 (“Audit Requirements”) of the Office of Justice Programs’ Financial Guide (available at http://www.ojp.usdoj.gov/FinGuide). You may include the costs of complying with these audits in the proposed budget submitted as part of your application. Detailed information regarding the independent audit is available in Office of Management and Budget Circular A-133 (available at http://www.whitehouse.gov/omb/circulars).

**H. An environmental assessment may be required:** All award recipients must comply with the National Environmental Policy Act (NEPA). To ensure NEPA compliance, NIJ may require some award recipients to submit additional information.

**I. Protection of confidentiality:** Federal regulations require applicants for NIJ funding to outline specific procedures for protecting private information about individuals as part of the Privacy Certificate submitted with the application package. For additional information, see “Guidelines: How to Submit Applications,” http://www.ojp.usdoj.gov/nij/funding.htm.
J. **A DUNS number is required:** The Office of Management and Budget requires that all businesses and nonprofit applicants for Federal funds include a DUNS (Data Universal Numeric System) number in their application for a new award or renewal of an award. Applications without a DUNS number are incomplete. A DUNS number is a unique nine-digit sequence recognized as the universal standard for identifying and keeping track of entities receiving Federal funds. The identifier is used for tracking purposes and to validate address and point of contact information. NIJ will use the DUNS number throughout the grant life cycle. Obtaining a DUNS number is a free, one-time activity. Obtain one by calling 1–866–705–5711 or by applying online at [http://www.dunandbradstreet.com](http://www.dunandbradstreet.com). Individuals are exempt from this requirement.

K. **Funds cannot be used to lobby:** Under the Anti-Lobbying Act (18 U.S.C. § 1913), grantees generally may not use funds to support the enactment, repeal, or modification of any law, regulation, or policy at any level of government. For additional information on rules and regulations, see “Guidelines: How to Submit Applications” at [http://www.ojp.usdoj.gov/nij/funding.htm](http://www.ojp.usdoj.gov/nij/funding.htm) and OJP’s Financial Guide at [http://www.ojp.usdoj.gov/FinGuide](http://www.ojp.usdoj.gov/FinGuide).

L. **What will not be funded:** Typically, NIJ does not fund the following:
   1. Provision of training or direct service.
   2. Proposals primarily to purchase equipment, materials, or supplies. (Your budget may include these items if they are necessary to conduct applied research, development, demonstration, evaluation, or analysis, but NIJ does not fund proposals that are primarily to purchase equipment.)
   3. Work that will be funded under another specific solicitation.

M. **Cost of proposed work:** NIJ anticipates that up to $1 million may become available for awards made through this solicitation. All awards are subject to the availability of appropriated funds. NIJ may make 2–4 awards depending on funds available and number of high-quality applications. If you propose a project that exceeds the amount of money that may be available for this solicitation, we recommend that you divide the project into phases, stages, or tasks so that NIJ can consider making an award for a specific portion of the work. NIJ cannot guarantee that subsequent phases, stages, or tasks will be funded. Such additional funding depends on NIJ’s resources and your satisfactory completions of each phase, stage, or task. Note: Deliverables (e.g., a final report) will be required at the end of each phase, stage, or task.

N. **Call for assistance:**
   1. For technical guidance about using the Grants Management System, call the hotline at 1–888–549–9901.
2. For questions about this solicitation, the research being solicited, or other NIJ funding opportunities, contact at NIJ 202–307–2942.

IV. Selection Criteria

NIJ is firmly committed to the competitive process in awarding grants. All concept papers and proposals are subjected to an independent peer-review panel evaluation. External peer-review panelists consider both technical and programmatic merits. Panelists are selected based on their expertise in subject areas pertinent to the proposals.

Peer-review panelists will evaluate concept papers and full proposals using the criteria listed below. Following this assessment, NIJ will then invite selected applicants to submit full proposals. Full proposals will also be peer reviewed. NIJ staff then make recommendations to the NIJ Director. The Director makes final award decisions.

Successful applicants must demonstrate the following:

A. Understanding of the problem and its importance.

B. Quality and technical merit.
   1. Awareness of the state of current research or technology.
   2. Soundness of methodology and analytic and technical approach.
   3. Feasibility of proposed project and awareness of pitfalls.
   4. Innovation and creativity (when appropriate).

C. Impact of the proposed project.
   1. Potential for significant advances in scientific or technical understanding of the problem.
   2. Potential for significant advances in the field.
   3. Relevance for improving the policy and practice of criminal justice and related agencies and improving public safety, security, and quality of life.
   4. Affordability and cost-effectiveness of proposed end products, when applicable (e.g., purchase price and maintenance costs for a new technology or cost of training to use the technology).
   5. Perceived potential for commercialization and/or implementation of a new technology (when applicable).

D. Capabilities, demonstrated productivity, and experience of applicants.
   1. Qualifications and experience of proposed staff.
   2. Demonstrated ability of proposed staff and organization to manage the effort.
3. Adequacy of the plan to manage the project, including how various tasks are subdivided and resources are used.
4. Successful past performance on NIJ grants and contracts (when applicable).

E. **Budget.**
1. Total cost of the project relative to the perceived benefit.
2. Appropriateness of the budget relative to the level of effort.
3. Use of existing resources to conserve costs.

F. **Dissemination strategy.**
1. Well-defined plan for the grant recipient to disseminate results to appropriate audiences, including researchers, practitioners, and policymakers.
2. Suggestions for print and electronic products NIJ might develop for practitioners and policymakers.

V. **Requirements for Successful Applicants**

If you are invited to submit a proposal and your proposal is funded, you will be required to submit several reports and other materials as follows:

A. **Final report:** The final report should be a comprehensive overview of the project and should include a detailed description of the project design, data, and methods; a full presentation of scientific findings; and a thorough discussion of the implications of the project findings for criminal justice practice and policy. It must contain an abstract of no more than 400 words and an executive summary of no more than 2,500 words.

A draft of the final report, abstract, and executive summary must be submitted 90 days before the end date of the grant. The draft final report will be peer reviewed upon submission. The reviews will be forwarded to the author with suggestions for revisions. The author must then submit the revised final report, abstract, and executive summary by the end date of the grant. The abstract, executive summary, and final report must be submitted in both paper and electronic formats.

For evaluation studies, the final report should include a section on measuring program performance. This section should outline the measures used to evaluate program effectiveness, modifications made to those measures as a result of the evaluation, and recommendations regarding these and other potential performance measures for similar programs. (This information will be particularly valuable to NIJ and other Federal program agencies in implementing performance measures for federally funded criminal justice programs.)
B. **Interim reports:** Grantees must submit quarterly financial reports, semi-annual progress reports, and a final progress report. Future awards and fund drawdowns may be withheld if reports are delinquent. Post-award reporting requirements are described in “Guidelines: How to Submit Applications,” available at [http://www.ojp.usdoj.gov/nij/funding.htm](http://www.ojp.usdoj.gov/nij/funding.htm).

C. **Materials concerning protection of confidential information and human subjects:**
Recipients of NIJ research funds must comply with Federal regulations concerning the protection of private information about individuals. Recipients also must comply with Federal regulations concerning protection of human subjects. In general, all research involving human subjects that is conducted or supported by NIJ funds must be reviewed and approved by an Institutional Review Board before Federal funds are expended for that research. NIJ may also ask grant recipients for additional information related to privacy and human subjects testing.

D. **Electronic data:** Some grant recipients will be required to submit electronic data and supporting documentation, such as a codebook or dictionary, capable of being re-analyzed and used by other researchers. The materials must be submitted by the end date of the grant. Grant applicants should ensure that the proposed timeline and budget accommodate these requirements.

E. **Performance guidelines:** As part of government-wide efforts to measure the performance of Federal funding, in May 2002, the White House issued guidance on how to evaluate the performance of Federal research programs. Research should be: (1) relevant—that is, important and appropriate for meeting the needs of the field, (2) of high quality, and (3) well-managed by grantees and well-monitored by the Federal agency. Therefore, in addition to the reporting requirements discussed above, a grantee’s performance on an award made under this solicitation will be evaluated on whether the final research report was (1) relevant to the needs of the field as measured by whether the grantee’s substantive scope did not deviate from the funded proposal or any subsequent agency modifications to the scope; (2) of high quality as assessed by peer reviewers; and (3) well-managed as measured by whether significant interim project milestones were achieved, final deadlines were met, and costs remained within approved limits. For more information see “Guidelines: How to Submit Applications,” available at [http://www.ojp.usdoj.gov/nij/funding.htm](http://www.ojp.usdoj.gov/nij/funding.htm).
Tips for Submitting Your Application

1. Begin the application process early—especially if you have never used the online Grants Management System before. NIJ will not accept applications received after the closing date and time listed on the cover. To start the process, go to http://www.ojp.usdoj.gov/fundopps.htm.

3. Although your proposal may budget for the purchase of equipment if the equipment is necessary to conduct the project, NIJ will not fund applications that are primarily to purchase equipment, materials, or supplies.

4. Call for help:
   • For technical guidance about the Grants Management System, call the hotline at 1–888–549–9901.
   • For questions about this solicitation, the research being solicited, or other NIJ funding opportunities, contact NIJ at 202–305–7807.

View or print a copy of this document from the NIJ Web site (http://www.ojp.usdoj.gov/nij/funding.htm) or request one by calling NCJRS at 1–800–851–3420 or e-mailing askncjrs@ncjrs.org.
The National Institute of Justice is the research, development, and evaluation agency of the U.S. Department of Justice. NIJ provides objective, independent, evidence-based knowledge and tools to enhance the administration of justice and public safety.

NIJ is a component of the Office of Justice Programs, which also includes the Bureau of Justice Assistance, the Bureau of Justice Statistics, the Office of Juvenile Justice and Delinquency Prevention, and the Office for Victims of Crime.
